PROCEEDINGS AND DEBATES OF THE 99th CONGRESS, SECOND SESSION

HOUSE OF REPRESENTATIVES—*Monday, May 12, 1986*

The House met at 12 noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

At the beginning of this new week we place before You, O God, our innermost thoughts and feelings asking that You would correct us when arrogant or selfish and bless us when we truly seek justice and mercy. Help us to be honest when we speak in our prayers admitting our shortcomings and truly seeking Your benediction in our lives. May Your spirit be with all of us and may Your love never depart from us. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Hallen, one of its clerks, announced that the Senate has passed a bill of the following title, in which the concurrence of the House is requested:

S. 2308. An act to authorize the President of the United States to award congressional gold medals to Natan (Anatoly) and Avital Shcharansky in recognition of their dedication of human rights, and to authorize the Secretary of the Treasury to sell bronze duplicates of those medals.

AIRPORT SECURITY SHOULD BE THE ANSWER, NOT PART OF THE PROBLEM

(Mr. GLICKMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GLICKMAN. Mr. Speaker, last night "Sixty Minutes" reported that security at some major airports in this country is vulnerable from the inside. People are being hired without adequate verification of their past, thereby creating the possibility that terrorists could end up working behind the lines at our airports, monitoring passenger scanners, and having unsupervised access to aircraft. We cannot let that continue.

The FAA requires all employees who have access to aircraft at U.S. airports to undergo a thorough 5 year background check to verify their identities before hiring and employers to certify to airport officials that this was completed. Something is not working. Unauthorized people are being given access to areas around commercial airlines.

It appears that some of our airports have not taken implementation of this requirement very seriously. To ignore it is nothing short of an invitation to terrorists to infiltrate our security systems and put domestic airline travelers at risk.

Airport administrators around the country need to require that all employees with access to aircraft have their background checks reviewed and to let employers know they mean business when it comes to future background checks. If commonsense is not enough to make them take this seriously, we will have to up the ante. I am going to be introducing legislation in the next few days to give the Secretary of Transportation authority to withhold airport improvement funds from airports which have not complied with the requirements on meaningful airport security.

Maybe this will get the attention of both the FAA and those certain airport administrators who may be giving lipservice to airport security.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. Pursuant to the provisions of clause 5, rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, will be taken on Wednesday, May 14, 1986.

PROVIDING FOR APPROPRIATE CITIZENSHIP CEREMONY ON ELLIS ISLAND ON JULY 3 OR 4, 1986

Mr. GLICKMAN. Mr. Speaker, I move to suspend the rules and pass the joint resolution (H.J. Res. 613) allowing qualified persons representing all the States to be naturalized on Ellis Island on July 3 or 4, 1986.

The Clerk read as follows:

H.J. RES. 613

Whereas citizenship ceremonies are planned on July 3 and 4, 1986, as part of the centennial celebration of the Statue of Liberty;

Whereas, as this is a national celebration, these ceremonies should include a naturalization ceremony that truly reflects that the United States is a Nation of Immigrants;

Whereas, the immigrants who entered the United States through Ellis Island settled throughout the United States;

Whereas, it would be most appropriate to have residents from all the States participating in the naturalization ceremony; and

Whereas, the Immigration and Nationality Act limits participation in the naturalization ceremony to individuals who reside only within the jurisdiction of a single district of a United States District Court: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DESIGNATION OF 2 RESIDENTS REPRESENTATIVE OF EACH STATE.

The Governor of each State is requested to and may designate (to the Attorney General, or his designee, by not later than June 1, 1986) 2 qualified persons (as defined in section 4(1)) for naturalization as citizens of the United States in an appropriate ceremony on Ellis Island on July 3 or 4, 1986.

SEC. 2. WAIVER OF CERTAIN PROVISIONS OF THE IMMIGRATION AND NATIONALITY ACT.

Notwithstanding any provision of title III of the Immigration and Nationality Act and notwithstanding any provision of chapter 87 of title 28, United States Code, to the contrary, each qualified person who is designated under section 1 may be naturalized on Ellis Island on July 3 or 4, 1986, before any judge or justice of the United States.

SEC. 3. NO AUTHORIZATION OF ADDITIONAL FUNDS.

This Act does not authorize the appropriation of any amounts for the transportation, lodging, or other expenses associated

with the naturalization of designated, qualified persons under section 2.

SEC. 4. DEFINITIONS.

In this Act:

(1) QUALIFIED PERSON.—The term "qualified person" means, with respect to a State, a person—

(A) who is a resident of the State, but not a citizen of the United States,

(B) who, except as provided in section 2, has completed all statutory and regulatory requirements for naturalization, and

(C) whose application to file a naturalization petition (Form N-400) on the person's own behalf has been approved before June 1, 1986.

(2) STATE AND GOVERNOR.—The term "State" means each of the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, and Guam, and the term "Governor" means, with respect to a State, the chief executive officer of the State.

The SPEAKER. Pursuant to the rule, a second is not required on this motion.

The gentleman from Kansas [Mr. GLICKMAN] will be recognized for 20 minutes and the gentleman from California [Mr. LUNGREN] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Kansas [Mr. GLICKMAN].

Mr. GLICKMAN. Mr. Speaker, I yield myself such time as I may consume.

As my colleagues know, there are numerous activities planned over Liberty weekend in New York City.

One of these activities to take place on July 3 is the swearing in of several hundred new U.S. citizens on Ellis Island.

Because of various venue and State residency requirements under Federal law, only residents of New York can now participate in the naturalization ceremony which will be presided over by the Chief Justice of the United States.

Because the Statue of Liberty and Ellis Island are important historical monuments for all Americans, it is indeed appropriate that people from the entire country should be involved in this particular aspect of the centennial celebration of the Statue of Liberty. In order to accomplish this objective, House Joint Resolution 613 would waive certain residency and venue requirements in order to allow residents from the 50 States and territories and the District of Columbia to be sworn in as citizens during the Ellis Island ceremony.

This legislation received unanimous approval of the Judiciary Committee and is strongly supported by the Department of Justice.

Mr. Speaker, I yield such time as he may consume to the gentleman from New Jersey [Mr. GUARINI].

Mr. GUARINI. Mr. Speaker, I thank the gentleman for yielding time to me.

Mr. Speaker, I rise today to urge my colleagues to join me in supporting the prompt passage of legislation that will enhance the celebrations scheduled in honor of the Statue of Liberty's centennial this summer. I urge your support for House Joint Resolution 613, a bill to allow two people from each of our States and territories to become naturalized citizens at special ceremonies scheduled on Ellis Island during the Fourth of July weekend.

As the Congressman from New Jersey's 14th Congressional District, I have a special interest in the statue's birthday, and in the plans to restore Ellis Island. The view from Liberty State Park in my district provides a magnificent panorama of the harbor. My constituents have an inspiring view of the statue, and of the island gateway through which millions of America's immigrants passed. Today, descendants of over 100 different nationalities continue to live in Hudson County, in the shadow of the statue's uplifted torch.

Liberty weekend is an excellent time for us to make a national recommitment to the precious American values of freedom, justice, and opportunity. Yet the Immigration and Naturalization Service [INS] said their hands were tied when we first suggested expanding the Ellis Island event. Current law requires petitioners for citizenship to be naturalized within the jurisdiction of the U.S. district court where they reside. INS said the law would have to be amended to allow people from across the country to participate in a single citizenship ceremony.

I believe that, to be fair, the citizenship ceremony scheduled on Ellis Island should include people from every State in the Union. The bill I introduced with my colleagues, Congressman PETER RODINO and Congressman DEAN GALLO, will allow this historic event to be truly national in scope. By including participants from across our great land, it will symbolize our country's unique character as a nation of immigrants.

The legislation before us today will make a one-time exception to provisions of the Immigration and Nationality Act. It was prepared in consultation with the Immigration and Naturalization Service [INS], and authorizes the Governors of each of the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, and Guam to designate two people to participate in the special naturalization ceremony scheduled on Ellis Island in conjunction with the Statue of Liberty centennial celebration.

The U.S. Department of Justice indicated that it "strongly recommends enactment of this resolution" in a letter from Assistant Attorney General John Bolton. Gov. Michael Castle, chairman of National Governors' Association's Committee on Human Resources, noted in a letter that "this is an appropriate activity to celebrate the centennial and the restoration of the Statue of Liberty." I am pleased by their support of this measure, and by the Judiciary Committee's prompt action on the bill.

America's unique character stems from the contributions of immigrants across the length and breadth of our great country. Passage of this bill will create a once-in-a-lifetime opportunity for some of the immigrants who've settled throughout our land. It will be a fitting tribute to our immigrant heritage to confer citizenship upon this representative group over the Fourth of July. The historic nature of the event certainly merits this special action. I urge your support.

The letters follow:

NATIONAL GOVERNOR'S ASSOCIATION,
Washington, DC, May 2, 1986.

Hon. PETER W. RODINO, Jr.,
Chairman, House Judiciary Committee, Rayburn House Office Building, Washington, DC.

DEAR MR. CHAIRMAN: I understand that the Judiciary Committee is scheduled to consider a proposed resolution (H.J. Res. 613) which requests that the Governors designate two qualified candidates to become naturalized citizens of the United States in a ceremony on Ellis Island on July 3 and 4, 1986.

While the National Governors' Association does not have a specific policy position on this issue, I feel that this is an appropriate activity to celebrate the centennial and the restoration of the Statue of Liberty.

I commend you and members of the Judiciary Committee in your effort to sponsor and support this initiative. Please let us know, if you need further assistance from the National Governors' Association on this matter.

Sincerely,
GOV. MICHAEL N. CASTLE,
Chairman,
Committee on Human Resources.

U.S. DEPARTMENT OF JUSTICE,
OFFICE OF LEGISLATIVE AND INTERGOVERNMENTAL AFFAIRS,
Washington, DC.

Hon. PETER W. RODINO, Jr.,
Chairman, Committee on the Judiciary, House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: This reponds to your request for this Department to review a draft of a House joint resolution to provide for naturalization of two persons from each state and territory at ceremonies for the rededication of the Statue of Liberty on July 3, 1986. For the reasons set forth below, this Department strongly recommends enactment of this resolution.

The Statue of Liberty is a national shrine of great importance to all the people in this country. Proud as it is of a long tradition of welcoming immigrants from the world over, the United States has in the Statue of Liberty a symbol of the greatness that can evolve from a mixture of so many cultures over the course of time. Because the Statue is a symbol for America, it is fitting that persons now enjoined by statute from naturalizing on Ellis Island, because of their places of residence, be given such an opportunity.

Because of space limitations, this Department supports the restriction to two persons from each State. The June 1, 1986 cut-off

date for submission of nominees to the Immigration and Naturalization Service is also satisfactory.

The Office of Management and Budget has advised this Department that there is no objection to the submission of this report from the standpoint of the Administration's program.

Sincerely,

JOHN R. BOLTON,
Assistant Attorney General.

□ 1210

Mr. LUNGREN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this resolution (H.J. Res. 613) will allow the naturalization of two persons from each State and territory at ceremonies for the rededication of the Statue of Liberty on July 3, 1986.

Currently, the Immigration and Nationality Act limits participation in this special naturalization ceremony to only those who currently reside within the jurisdiction of the U.S. district court in this region. This resolution will waive this requirement to allow 2 residents from all 50 States and territories to participate in this Ellis Island naturalization ceremony for this year's Fourth of July activities. This year, we will be celebrating the centennial of the Statue of Liberty.

I am happy to be a part of this special event by supporting this legislation we are considering today. Many of us have ancestors whose first contact with America was Ellis Island. Undoubtedly, the Statue of Liberty must have been an overwhelming sight to these new immigrants as it continues to be to millions each year.

As we celebrate this Fourth of July centennial of the Statue of Liberty, let us take this opportunity to remind ourselves of the great opportunities this country has given our ancestors and ultimately ourselves over the past 200 years. Let us also remember the great responsibility we have to our children in preserving the values this statue represents. Our dedicated service to these goals is critical if we are to preserve this Nation for future generations.

Mr. Speaker, I would be remiss if I did not mention, however, as we are celebrating this tremendous triumph of freedom, that, regrettably, this House has not seen fit to deal with the challenge that is presented to us as a result of the fact that this country is in fact the beacon of freedom. That is, we have many, many people who have not taken it upon themselves to go through the regular legal procedures to come to the United States. As much as I have tremendous respect for my colleagues on the east coast, as much as I support this bill because of what the Statue of Liberty represents, I think we would make a mistake if we did not realize that Ellis Island is not the first thing that most people see as they come to the United States today. If you were to believe the numbers, the first things they see happen to be things that are found in San Diego, CA.

I believe that we ought to recognize that national immigration is in fact a national challenge, a national problem, one this House has not seen fit to deal with and one that, regrettably, the House of Representatives has declined to work on for another month.

Maybe also we ought to remember the words of Bishop Fulton J. Sheen in one of the last great speeches he gave at the National Prayer Breakfast here in Washington, DC, a number of years ago, shortly before his death. At that time he talked about the great Statue of Liberty. He said, however, in the United States would it not be good if we had a statue of responsibility in San Francisco Bay so that people would recognize that there are twin principles involved here—yes, one of liberty, but also one of responsibility.

So as I support this legislation, I hope we will not forget some of the other principles involved, that of responsibility, as well as liberty. And one of the great responsibilities of this House is to get on with doing the work that we are required to do in terms of immigration policy.

I might just mention that I have just received word that we have broken the record once again in the San Diego sector of California. We set a new record for apprehensions in May. So the 6-month record we have set before, in which we have apprehended successfully 270,000 people in a 66-mile sector of our border, that is, the 66 miles that really stretches from San Diego inland, of 270,000 people in the last 6 months, I will soon be able to report a new 6-month record. And so as we are on the Fourth of July celebrating the process which we should all be proud of, we should also perhaps hang or heads in shame that this House of Representatives refuses to do the work that it should do in terms of getting immigration under control.

Mr. RODINO. Mr. Speaker, I rise in strong support of House Joint Resolution 613 which allows prospective U.S. citizens from around the country to be sworn in at a special naturalization ceremony on Ellis Island on Liberty Weekend. It is indeed fitting that residents from all of our States and territories participate in the centennial celebration of the Statue of Liberty.

Current law prohibits the naturalization of persons in a State unless they are residents of that State. Consequently, any person who does not live in New York cannot now participate in the Ellis Island ceremony.

Since the Statue of Liberty belongs to all Americans, the sponsors of this bill believe it is appropriate—indeed essential—to broaden the base for participation in the ceremony.

To accomplish this, my colleagues and I have introduced House Joint Resolution 613. In short, it authorizes the Governors of each of the 50 States, as well as Puerto Rico, the Virgin Islands and Guam and the Mayor of the District of Columbia to designate 2 persons from their jurisdiction to become naturalized in the unique ceremony to take place on Ellis Island during Liberty Weekend.

This legislation has been enthusiastically embraced by the Department of Justice. In fact, the departmental report was forthcoming even before the resolution was introduced.

In addition, I received a letter from Gov. Michael Castle, chairman of the National Governor's Association's Committee on Human Resources on May 2, 1986. In that letter Governor Castle states that this legislation "is an appropriate activity to celebrate the centennial and the restoration of the Statue of Liberty."

Between 1892 and 1954, more than 17 million immigrants—which include the fathers and mothers of many of you—sailed by our great symbol of freedom, hope, and opportunity—the Statue of Liberty—on their way to the immigration station at Ellis Island. Ellis Island was the gateway to their future and today, 40 percent of all Americans can trace their ancestry through Ellis Island.

In my mind, there is no better way on Liberty weekend to demonstrate our pride in our heritage and express our hope in the future of this country than by welcoming into our family new citizens from each of our States and territories.

I urge my colleagues' support and cooperation in enacting this measure expeditiously because the cutoff date for submission of nominees for the naturalization ceremony is June 1, 1986.

Because of time constraints related to the implementation of this legislation, it is expected that INS will submit a list of qualified naturalization applicants to each of the Governor's as soon as possible after the enactment of this legislation. In this regard, it is my understanding that the National Governor's Association could be utilized to play a coordinating role in the submission of the final selections to the Department of Justice prior to the June cutoff date.

Mr. FISH. Mr. Speaker, I am delighted that House Joint Resolution 613 is being considered today on the Suspension Calendar. This legislation will allow two individuals from each State to be naturalized on Ellis Island as part of the centennial celebration of the Statue of Liberty. I am a cosponsor of this legislation and a strong supporter of the renovation efforts of the Statue of Liberty on Ellis Island.

Mr. Speaker, a little over two centuries ago this Nation embarked on a great adventure in self-government which provided opportunities for individuals to pursue freely their social, economic, and religious goals. During these two centuries, many have come seeking protection from persecution from oppressive governments as well as personal freedom.

Many of our ancestors who came here entered the United States through Ellis Island, eventually settling throughout the Nation in all of the 50 States. Their first view of America was the Statue of Liberty. This statue became a symbol of the liberties and freedoms America promised to newcomers and continues to be so for millions of individuals each year.

As we celebrate these activities this year, I hope that we remind ourselves of the sacrifices our ancestors made to preserve this Nation and its values. Today, our challenge is to maintain these values with ever new threats of violence in the form of terrorism, continued civil strife throughout the world, and political and economic oppression. There is no assurance today of the continued success of this effort, just as there was none 200 years ago. To succeed, each generation of Americans must work at it. It is clearly the most difficult, demanding and challenging of any form of government.

Just as each of us benefits daily from the opportunities this country provides us, we must also recognize the great responsibility we have in preserving this Nation.

As we participate in this special July 4 centennial celebration of the Statue of Liberty, let us also remember this great responsibility we have to future generations in preserving the values this statue represents.

Mr. GALLO. Mr. Speaker, during the July 4 holiday this year the eyes of the world will be fixed on two islands in the Hudson River, as we celebrate the rededication of the Statue of Liberty. One of the highlights of this major national celebration of Liberty Weekend will be a citizenship ceremony on Ellis Island.

Today, we are asking Members of this House to approve legislation to make this citizenship ceremony truly national in scope by inviting two residents from each State to be sworn in as new citizens of the United States. In addition, planners for this weekend celebration are arranging video hookups with citizenship ceremonies in selected communities across the country.

Throughout the years, the Statue of Liberty has been the symbol of freedom and justice for immigrants entering the United States.

For more than half a century, immigrants from all over the world have entered this country through Ellis Island and carved out new lives in communities across our land. This national celebration of our immigrant heritage deserves a patriotic gesture that is equally national in character as a fitting tribute to these courageous pioneers.

As the sons and daughters of immigrants, we are especially sensitive to the accomplishments of the past. This event is symbolic of our heritage as one Nation that grew from many cultures. It should be celebrated that way.

Our legislation will allow the Governor of each State to choose the two representatives for this symbolic national Ellis Island ceremony.

In New Jersey, Morris County Clerk Joseph Bell is organizing the only State citizenship ceremony to be linked by satellite with the Liberty Weekend events. The Morris Township event will be held at the Mennen Sports Arena, Hanover Avenue, and will include 2,500 new citizens from Bergen, Passaic, Somerset, Morris, Warren, and Sussex Counties.

The idea for this "All American" citizenship ceremony began in February when Joe Bell contacted my office after we had heard early reports that only residents of the Eastern Federal District of New York would be invited to participate in the Ellis Island ceremony. This news was particularly troubling because of the continuing dispute between New York and New Jersey over these islands.

After further discussions with Congressman FRANK GUARINI, who has been actively involved in the question of the ownership of these islands, we came to the conclusion that a symbolic citizenship ceremony on this important day must be a national celebration.

We enlisted the invaluable support of House Judiciary Committee Chairman PETER RODINO, who has undertaken this project with us as a champion of immigration policy who understands the importance of this symbolic event. The result of this bipartisan cooperation is the development of this enabling legislation to create a national ceremony on Ellis Island.

With the continued cooperation of the Immigration and Naturalization Service and the Interior Department, we are confident that this national celebration will become a reality.

The regional ceremonies, including our State event in Morristown, will provide thousands of other new Americans with the opportunity to participate in this historic event.

I am very hopeful that the remaining plans can be finalized in the coming weeks.

We have a great deal to celebrate during Liberty Weekend. This symbolic citizenship ceremony is a reminder of our past and a rededication to the principles represented by our heritage.

Mr. GLICKMAN. Mr. Speaker, I yield back the balance of my time.

Mr. LUNGREN. Mr. Speaker, I yield back the balance of my time.

The SPEAKER. The question is on the motion offered by the gentleman from Kansas [Mr. GLICKMAN] that the House suspend the rules and pass the joint resolution, H.J. Res. 613.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the joint resolution was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GLICKMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous matter on the joint resolution just passed.

The SPEAKER. Is there objection to the request of the gentleman from Kansas?

There was no objection.

NATIONAL ANDREI SAKHAROV DAY

Mr. FASCELL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate joint resolution (S.J. Res. 323) to designate May 21, 1986, as "National Andrei Sakharov Day," and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

Mr. BROOMFIELD. Mr. Speaker, reserving the right to object, I do so to afford the chairman of the Committee on Foreign Affairs an opportunity to explain the Senate joint resolution.

Mr. FASCELL. Mr. Speaker, if the gentleman will yield, I rise in strong support of Senate Joint Resolution 323, designating May 21, 1986, National Andrei Sakharov Day.

Mr. Speaker, this resolution is identical to House Joint Resolution 596 which was introduced by our distinguished colleagues, Messrs. HOYER, KEMP, FRANK, and GILMAN. It has over 100 cosponsors in the House and passed the Senate unanimously on April 29, 1986.

Mr. Speaker, on May 21, 1986, Dr. Andrei Sakharov, the 1975 Nobel Peace Prize Winner, distinguished physicist and defender of human rights turns 65 years old. He will celebrate this milestone alone in the closed city of Gorky where Soviet authorities banished him in 1980 after he criticized the Soviet invasion of Afghanistan. Dr. Sakharov was never formally charged with a crime nor were judicial proceedings against him ever conducted. By designating his birthday as "National Andrei Sakharov Day" and requesting that the President issue a proclamation calling upon the American people to observe that day with appropriate ceremonies and activities, we in the Congress can send a message to Dr. Sakharov that he is not alone and, at the same time, let his Soviet captors know that we will not abandon one of the 20th century's greatest heroes.

When the gentleman from Michigan [Mr. BROOMFIELD] the distinguished ranking minority member of the Foreign Affairs Committee, and I visited the Soviet Union last month, we raised the case of Dr. Sakharov at every meeting we had with Soviet officials, including our session with General Secretary Gorbachev. Over and over again, we stressed the importance the American people and their government attach to respect for human rights. Dr. Sakharov, we said, symbolized to many around the world the best the Soviet Union had to offer and neither we, nor anyone else, could understand how he could be treated so shabbily. As was documented in the February 24, 1986 edition of U.S. News & World Report, he has endured nearly 6½ years of physical and mental torment at the hands of the KGB. As Dr. Sakharov's wife, Elena Bonner, herself a leading human rights activist, has pointed out, had Sakharov been charged with a crime, the maximum term of internal exile—5 years—would have expired a year ago.

Mr. Speaker, this resolution also requests the President to urge the Soviet Government to permit Dr. Sakharov and Mrs. Bonner to freely choose their place of residence. Mrs. Bonner, who has been in the United States for medical treatment, is due to return to the Soviet Union next month. It is our fervent hope that the Soviet authorities will end the forced isolation of the Sakharovs in Gorky and allow them to return to their home in Moscow or emigrate to the United States to live with their relatives here. This resolution calls upon the President to continue his efforts toward that end.

Mr. Speaker, among the ceremonies and activities commemorating Dr. Sakharov's 65th birthday, Mr. Broomfield and I will host a birthday party on May 21, 1986. Mrs. Bonner and the rest of the Sakharov family will join us as will, I hope, our colleagues from the House and Senate.

I can think of no better birthday present to give Dr. Sakharov than his freedom and it is my fervent hope that this resolution will contribute toward that goal. Mr. Speaker, I urge its immediate and unanimous adoption.

I thank the gentleman for yielding.

Mr. BROOMFIELD. Mr. Speaker, further reserving the right to object, I support the joint resolution before us making May 21 National Andrei Sakharov Day and urging the Soviets to allow Andrei Sakharov and his wife to live where they choose.

While the Soviet Union attempts to project a new and open image, Dr. Sakharov will spend his birthday in almost complete isolation in Gorky. He is being held even though no formal charges have been filed against him. The routine abuse of the human rights of Mr. Sakharov violates both the spirit and the letter of the Helsinki Final Act. That innocent human being is living without family and friends because he has urged the Soviet Government to comply with the Helsinki Final Act, a document which Soviet officials signed and agreed to comply with.

Congressman FASCELL and I recently returned from a trip to the Soviet Union. While there, we made a personal appeal to Secretary General Gorbachev and tried to visit Dr. Sakharov in Gorky, and it is regrettable that Soviet officials denied us permission to make the visit.

However, I was encouraged by recent Soviet Government decisions to free a number of prisoners of conscience and reunite members of divided families.

I can only hope that Mr. Gorbachev will see the futility of abusing a Soviet citizen who has done so much for that country. The Soviet Union's efforts to improve the image of the U.S.S.R. can only be helped by humanitarian gestures. Responding to the pleas of Dr. Sakharov and thousands of others is a step in the right direction if the Soviets really do want to change their image.

We, in the free world, must do all that we can to tell the story of Andrei Sakharov. We must keep the pressure on and never let up. We can do this, in part, by designating a special day in his honor. I urge my colleagues to join me in supporting this timely resolution.

Mr. HOYER. Mr. Speaker, I rise in strong support of Senate Joint Resolution 323 which authorizes and requests the President to designate May 21, 1986, "National Andrei Sakharov Day." It is fitting that the U.S. Congress commemorate the 65th birthday of Dr. Sakharov who has been exiled by the Soviet Government to Gorky for over 6 years. This exile has been a cruel form of imprisonment imposed to stop Dr. Sakharov's quest for justice and freedom.

The citation for the Nobel Peace Prize awarded 11 years ago to Dr. Sakharov read:

Sakharov's love of truth and strong belief in the inviolability of the human being, his fight against violence and brutality, his courageous defense of the freedom of the spirit, his unselfishness and strong humanitarian convictions have turned him into the spokesman for the conscience of man-kind • • •.

The Soviet Government has attempted to silence Sakharov and isolate him from the rest of the world. But it is too late. The record of Sakharov's sisyphean effort to prevail is one of the greatest triumphs of the 20th century. Sakharov has impacted upon the world with his noble and moral passion for simple humanity.

We, in the Congress, send to Dr. Andrei Sakharov our thoughts on his 65th birthday and wish him strength and health.

Mr. BROOMFIELD. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 323

Whereas Andrei Sakharov has earned world-wide admiration and respect for his courageous and energetic efforts to secure fundamental human freedoms for the peoples of the Soviet Union, including those rights guaranteed in the Final Act of the Conference on Security and Cooperation in Europe signed at Helsinki, Finland on August 1, 1975;

Whereas Andrei Sakharov has been awarded the 1975 Nobel Peace Prize for "his love of truth and strong belief in the inviolability of human beings . . . his courageous defense of the human spirit . . ." and for his life which has made him "the conscience of mankind";

Whereas Andrei Sakharov, due to his selfless work for human rights and world peace, has been illegally banished by the Government of the Union of Soviet Socialist Republics to the closed city of Gorky, where on May 21, 1986, he will spend his sixty-fifth birthday in almost total isolation;

Whereas Andrei Sakharov has been subjected to cruel and unusual medical procedures by the Soviet authorities when he conducted hunger strikes to protest repeated denials of his wife's, Elena Bonner's, request to be permitted to go to the West for medical treatment;

Whereas the Government of the Union of Soviet Socialist Republics has undertaken extraordinary measures, including confiscation of personal and professonal correspondence and intensive physical and electronic surveillance, to isolate Andrei Sakharov and Elena Bonner in Gorky;

Whereas the Soviet Union as signatory to the Universal Declaration of Human Rights has committed itself to respect the rights to freedom of movement and of residence within the borders of each state as well as the right to leave one's own country and return to it;

Whereas the Soviet Union and other signatories of the Helsinki Final Act stated their desire "to contribute to the strengthening of peace and understanding among peoples and to the spiritual enrichment of the human personality" and were "conscious that . . . contacts between people, and the solution of humanitarian problems will contribute to the attainment of these aims," further made it their objective "to facilitate freer movement and contacts, individually and collectively, whether privately or officially, among persons, institutions and organizations of the participating states, and to contribute to the solution of the humanitarian problems that arise in that connexion;"

Whereas the participating states of the Helsinki Final Act are convened in Bern, Switzerland, at the Human Contacts Experts Meeting inter alia to discuss implementation of those Helsinki Final Act provisions concerning the resolution in a positive and humanitarian spirit questions related to family visits, the reunification of families, binational marriage and promotion of other personal and professional contacts between people and between organizations; and

Whereas Andrei Sakharov continues to advocate full compliance by all signatory states with the provisions of the Helsinki Final Act and the Universal Declaration of Human Rights: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That May 21, 1986, is designated "National Andrei Sakharov Day" and that the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe that day with appropriate ceremonies and activities.

SEC. 2. The President of the United States is authorized and requested to urge the Government of the Union of Soviet Socialist Republics to permit Andrei Sakharov and Elena Bonner freely to choose their place of residence.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FASCELL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate joint resolution just passed.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

VIETNAM VETERANS OF AMERICA, INC.

Mr. GLICKMAN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 512) to grant a Federal charter to the Vietnam Veterans of America, Inc.

The Clerk read as follows:

H.R. 512

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

RECOGNITION AS CORPORATION AND GRANT OF FEDERAL CHARTER

SECTION 1. The Vietnam Veterans of America, Incorporated, a nonprofit corporation organized under the laws of the State of New York, is hereby recognized as such and is granted a charter.

CORPORATE POWERS

SEC. 2. The Vietnam Veterans of America, Incorporated (hereinafter in this Act referred to as the "corporation"), shall have only those powers granted to it through its articles of incorporation filed in the State in which it is incorporated and its constitution and bylaws, and subject to the laws of such State.

OBJECTS AND PURPOSES OF CORPORATION

SEC. 3. The objects and purposes of the corporation are those stated in its articles of incorporation, constitution, and bylaws and include a commitment to—

(1) uphold and defend the Constitution of the United States;

(2) foster the improvement of the condition of Vietnam-era veterans;

(3) promote the social welfare (including educational, economic, social, physical, and cultural improvement) in the United States by encouraging the growth and development, readjustment, self-respect, self-confidence, and usefulness of Vietnam-era veterans and other veterans;

(4) improve conditions for Vietnam-era veterans and develop channels of communication to assist Vietnam-era veterans;

(5) conduct and publish research, on a nonpartisan basis, pertaining to the relationship between Vietnam-era veterans and the American society, to the Vietnam war experience, to the role of the United States in securing peaceful coexistence for the world community, and to other matters which affect the educational, economic, social, physical, or cultural welfare of Vietnam-era veterans and other veterans and the families of such veterans;

(6) assist disabled Vietnam-era veterans and other veterans in need of assistance and the dependents and survivors of such veterans; and

(7) consecrate the efforts of the members of the corporation and Vietnam-era veterans generally to mutual helpfulness and service to their country.

SERVICE OF PROCESS

SEC. 4. With respect to service of process, the corporation shall comply with the laws of the State in which it is incorporated and those States in which it carries on its activities in furtherance of its corporate purposes.

MEMBERSHIP

SEC. 5. Except as provided in section 8, eligibility for membership in the corporation and the rights and privileges of members shall be as provided in the constitution and bylaws of the corporation.

BOARD OF DIRECTORS

SEC. 6. Except as provided in section 8, the board of directors of the corporation, and the responsibilities of the board, shall be as provided in the constitution and bylaws of the corporation and in conformity with the laws of the State in which it is incorporated.

OFFICERS

SEC. 7. Except as provided in section 8, the officers of the corporation, and the election of such officers, shall be as provided in the constitution and bylaws of the corporation and in conformity with the laws of the State in which it is incorporated.

NONDISCRIMINATION

SEC. 8. In establishing the conditions of membership in the corporation and in determining the requirements for serving on the board of directors or as an officer of the corporation, the corporation may not discriminate on the basis of race, color, religion, sex, handicap, age, or national origin.

RESTRICTIONS ON CORPORATE POWERS

SEC. 9. (a) No part of the income or assets of the corporation shall inure to any person who is a member, officer, or director of the corporation or be distributed to any such person during the life of this charter. Nothing in this subsection shall be construed to prevent the payment of reasonable compensation to the officers of the corporation or reimbursement for actual necessary expenses in amounts approved by the board of directors.

(b) The corporation shall not make any loan to any officer, director, or employee of the corporation.

(c) The corporation shall have no power to issue any shares of stock nor to declare or pay any dividends.

(d) The corporation shall not claim congressional approval or Federal Government authority by virtue of this Act or any of its activities.

LIABILITY FOR ACTS OF OFFICERS AND AGENTS

SEC. 10. The corporation shall be liable for the acts of its officers and agents when acting within the scope of their authority.

BOOKS AND RECORDS; INSPECTION

SEC. 11. The corporation shall keep correct and complete books and records of accounts and shall keep minutes of any proceeding of the corporation involving any of its members, the board of directors, or any committee having authority under the board of directors. The corporation shall keep at its principal office a record of the names and addresses of all members having the right to vote. All books and records of the corporation may be inspected by any member having the right to vote, or by any agent or attorney of such member, for any proper purpose, at any reasonable time. Nothing in this section shall be construed to contravene any applicable State law.

AUDIT OF FINANCIAL TRANSACTIONS

SEC. 12. The first section of the Act entitled "An act to provide for audit of accounts of private corporations established under Federal law", approved August 30, 1964 (36 U.S.C. 1101), is amended by inserting after paragraph (57) the following new paragraph:

"(68) The Vietnam Veterans of America, Inc.".

ANNUAL REPORT

SEC. 13. The corporation shall report annually to the Congress concerning the activities of the corporation during the preceding fiscal year. Such annual report shall be submitted at the same time as is the report of the audit of the corporation required by section 2 of the Act entitled "An Act to provide for audit of accounts of private corporations established under Federal law", approved August 30, 1964 (36 U.S.C. 1102). The report shall not be printed as a public document.

RESERVATION OF RIGHT TO ALTER, AMEND, OR REPEAL CHARTER

SEC. 14. The right to alter, amend, or repeal this charter is expressly reserved to the Congress.

DEFINITION OF "STATE"

SEC. 15. For purposes of this Act, the term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, and each of the territories and possessions of the United States.

TAX-EXEMPT STATUS

SEC. 16. The corporation shall maintain its status as an organization exempt from taxation as provided in the Internal Revenue Code of 1954.

EXCLUSIVE RIGHT TO NAMES

SEC. 17. The corporation shall have the sole and exclusive right to use the name "The Vietnam Veterans of America, Incorporated", "Vietnam Veterans of America, Incorporated", and "Vietnam Veterans of America", and such seals, emblems, and badges as the corporation may lawfully adopt. Nothing in this section shall be construed to interfere or conflict with established or vested rights.

FAILURE TO COMPLY WITH RESTRICTIONS OR PROVISIONS

SEC. 18. If the corporation shall fail to comply with any of the restrictions or provisions of this Act, the charter granted by this Act shall expire.

The SPEAKER. Pursuant to the rule, a second is not required on this motion.

The gentleman from Kansas [Mr. GLICKMAN] will be recognized for 20 minutes and the gentleman from North Carolina [Mr. COBLE] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Kansas [Mr. GLICKMAN].

Mr. GLICKMAN. Mr. Speaker, I yield such time as he may consume to the gentleman from Mississippi [Mr. MONTGOMERY], the distinguished chairman of the Committee on Veterans' Affairs.

Mr. MONTGOMERY. I thank the gentleman for yielding.

Mr. Speaker, I want to join my colleagues in the House in supporting H.R. 512, and I take this opportunity to commend the gentleman from Kansas [Mr. GLICKMAN] and the gentleman from North Carolina [Mr. COBLE], and other members of the Committee on the Judiciary, for bringing this bill to the House floor today.

Mr. Speaker, let me briefly explain what the bill would do. It would grant a Federal charter to the Vietnam Veterans of America, Inc. I was pleased to see that a similar measure passed the Senate on April 9 by an overwhelming vote of 94 to 3. You will recall, Mr.

Speaker, that the House passed a bill, H.R. 4772, on June 11, 1984, by a similar vote of 295 to 96.

Mr. Speaker, this organization does an excellent job of representing a segment of the Vietnam veteran population. It is a major organization whose primary purpose is to focus attention on issues relating specifically to Vietnam-era veterans. Representatives of the organization are invited to appear before the Committee on Veterans' Affairs on a regular basis and, although I sometimes disagree with the views of the VVA, the testimony of the organization is always well prepared.

Mr. Speaker, this is a young organization and because it is so young, it has made mistakes. I pointed this out in my remarks to the House in 1984. The VVA has taken some controversial positions; nonetheless, that is no reason to deny the organization a charter because one's views are not always consistent with those of the organization.

As I have previously stated, the granting of a Federal charter to the Vietnam Veterans of America should not be on the basis of whether we agree or disagree with some positions taken by the organization. The charter should be granted on the basis that the organization performs a valuable service to a large segment of our veteran population and their dependents. For that reason, I urge the adoption of H.R. 512 and I want to commend Mr. GLICKMAN and other members of the Judiciary Committee for moving the bill for speedy consideration in the House.

Mr. GLICKMAN. Mr. Speaker, I yield myself such time as I may consume, and I thank my colleague, the gentleman from Mississippi [Mr. MONTGOMERY]. I would just make a couple of quick comments. First of all, without the leadership of the distinguished gentleman from Mississippi, the chairman of the committee, we could not have gotten this bill to the floor so quickly, and without his leadership generally on veterans' matters, this country would be far worse off, and I think that we need to state that for the record.

Mr. Speaker, the bill, H.R. 512, would grant a Federal charter to the Vietnam Veterans of America, Inc.

The Vietnam Veterans of America, Inc. [VVA] is a national veteran's service organization dedicated to promoting and improving the condition of Vietnam-era veterans. The organization now has 250 chapters in more than 40 States. Membership in the VVA, which now totals approximately 32,000 nationwide, is open to any veteran who served on active duty during the period from August 5, 1964 to May 7, 1975 or in the Indochina theatre, regardless of time of service. The VVA was organized under the not-for-profit laws of the State of New York on March 1, 1978, and has been granted its tax-exempt status under section 501(c) of the Internal Revenue Code.

The Subcommittee on Administrative Law and Governmental Relations held a hearing on an identical bill, H.R. 4772, in the 98th Congress. The bill was favorably recommended by the subcommittee and the Full Committee on the Judiciary and reported to the House. It passed the House on June 11, 1984.

The Vietnam Veterans of America, Inc. has a strong commitment of service to all veterans, and particularly to those who served in Vietnam and disabled veterans. Recognized by the Veterans' Administration to represent claims of individual veterans since 1981, the VVA is recognized for the high quality of its claims assistance services to veterans.

In order to assure responsible and appropriate conduct on the part of the corporation, the legislation prohibits certain corporate acts and establishes specific requirements and standards for the corporation. The legislation prohibits the loan or transfer of corporate assets to officers, members, or other persons (except for expenses) or the issuance of stock or the payment of dividends. The legislation further prohibits the corporation from claiming congressional approval or Federal Government authority for any of its activities. The legislation requires the corporation to keep certain records, to perform an annual audit and to report to Congress annually. Should the corporation engage in any prohibited activity or fail to perform any of the requirements established by this legislation, or if the corporation fails to maintain its tax exempt status, the Federal charter granted by this legislation will expire automatically as a matter of law.

The Committee on the Judiciary considered this legislation in both the 98th Congress and the current Congress, and recommends favorable action on the bill.

I would finally add, Mr. Speaker, that no war in recent history, certainly this century, was as controversial as the Vietnam War. Thousands and thousands of Americans, hundreds of thousands, served in that war with great honor and with great dignity, and many thousands lost their lives and were injured. This organization was basically formed to represent the veterans of this country who served during that era of time. They were a distinguished group of human beings who did their fullest to preserve the integrity and the democracy and freedom that this country stands for. This charter would give their organization the same degree of credibility that the other veterans' organizations have. I think it is the least that we can do for the Vietnam veterans.

□ 1225

Mr. COBLE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to thank the gentleman from the Judiciary Committee, the gentleman from Kansas [Mr. GLICKMAN]. I would also like to reiterate what he said about the contributions submitted by the distinguished gentleman from Mississippi [Mr. MONTGOMERY].

Mr. Speaker, last I would like to note for the record that this is a charter that has support from both sides of the aisle.

Mr. Speaker, I yield such time as he any consume to the gentleman from New York [Mr. GILMAN].

Mr. GILMAN. I thank the gentleman for yielding time to me.

Mr. Speaker, I want to commend the gentleman from Mississsippi and the gentleman from North Carolina and all of the cosponsors of this measure for giving respectability and giving formal recognition to our veterans of the Vietnam conflict.

It is long overdue that we give them appropriate recognition by granting this Federal charter. I want to commend the gentlemen for their efforts in this direction.

Mr. Speaker, I rise in support of this legislation granting a Federal charter to the Vietnam Veterans of America, Inc.

In previous Congresses, this proposal provoked considerable controversy, apparently instigated in part by political activities by some members of the organization's leadership. It also had been alleged that the organization did not limit its membership to veterans who had been honorably discharged.

I personally had been disturbed by allegations that the organization did not support government-to-government negotiations as the most viable path to a full accounting of the 2,400 American heroes still unaccounted for from the Southeast Asian conflict. As vice chairman of our House Task Force on POW's and MIA's, I have been distressed by organizations, individuals, and activities which send a signal to the Government negotiators in Hanoi that we are not united on this crucial issue.

Mr. Speaker, I am pleased to report that the Vietnam veterans organization was responsive to our concerns. At the National Convention of the Vietnam Veterans of America last November, resolutions were approved by the membership placing new restrictions on political activities by the leadership of the group. At this same convention, the group voted to endorse government-to-government negotiations as the most realistic and viable means of achieving a full accounting of our missing Americans. In addition, I understand that the organization has now adopted more conventional re-

quirements for membership. The Vietnam Veterans of America has now been recognized by the Veterans' Administration as an accredited representative for veteran's claims.

Mr. Speaker, I believe that all of our colleagues would agree that any controversies with this organization which may have arisen in past years were controversies with certain individuals within the organization leadership, and never with the rank and file membership. It is apparent that the membership has adopted regulations binding their leadership to policies on the POW/MIA issue consistent with our own House Task Force, and with the National League of Families on POW's and MIA's. On political activities, the Vietnam Veterans of America are now in line with the mainstream of our older veterans organizations.

Mr. Speaker, it is now more than 13 years since the end of United States involvement in the Vietnam conflict. The time is long past due for Congress to act upon the chartering of this veterans organization, as we acted upon other veterans organizations promptly upon the conclusion of earlier conflicts. The other body has already approved this charter by a vote of 94–3, and we would be well advised to follow their lead.

Mr. DASCHLE, Mr. Speaker, I'm very pleased to rise in strong support of approval by the House today of legislation granting a Federal charter to the Vietnam Veterans of America, Inc. As a cosponsor of charter legislation, H.R. 512, I strongly encourage my colleagues to join me in the approval of this important measure.

The granting of a Federal charter to VVA recognizes the important services which VVA as a national service organization provides to Vietnam-era veterans. In addition, the granting of a Federal charter also recognizes the significant contributions which have been made by the members of the VVA through their organization.

Through its membership, the VVA has provided outstanding national leadership on issues of fundamental importance to Vietnam era veterans. The consequences of exposure to agent orange, judicial review, PTSD [posttraumatic stress disorder], readjustment counseling, employment opportunities and veterans' job training, veterans' health care and the readjustment process are but a few of the significant issues for our Vietnam-era veterans for which the VVA has provided recognized national leadership.

Witnesses representing the Vietnam Veterans of America have testified many times before the House Committee on Veterans' Affairs, of which I'm a member. VVA has consistently contributed significantly to the debate on veterans' issues. On those issues of particular interest and concern to Vietnam-era veterans, VVA has been a compelling force by effectively representing the unique and essential perspective, emphasis, and insight of our Nation's Vietnam-era veterans.

It is indeed appropriate and fitting for a Federal charter to be granted to the Vietnam Veterans of America, Inc. A charter will provide well deserved recognition and will also enable VVA to serve, even more effectively, Vietnam-era veterans in the future. The contributions which VVA has already made on behalf of Vietnam-era veterans are significant. VVA should be afforded the opportunity provided by a Federal charter to serve and accomplish more in the future.

Mr. COBLE. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. GLICKMAN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER. The question is on the motion offered by the gentleman from Kansas [Mr. GLICKMAN] that the House suspend the rules and pass the bill, H.R. 512.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GLICKMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The Speaker. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. GLICKMAN. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of the Senate bill (S. 8) to grant a Federal charter to the Vietnam Veterans of America, Inc., and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from Kansas?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 8

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

RECOGNITION AS CORPORATION AND GRANT OF FEDERAL CHARTER

SECTION 1. The Vietnam Veterans of America, Inc., a nonprofit corporation organized under the laws of the State of New York, is hereby recognized as such and is granted a charter.

CORPORATE POWERS

SEC. 2. The Vietnam Veterans of America, Inc. (hereinafter in this Act referred to as the "corporation"), shall have only those powers granted to it through its articles of incorporation filed in the State in which it is incorporated and its constitution and bylaws, and subject to the laws of such State.

OBJECTS AND PURPOSES OF CORPORATION

SEC. 3. The objects and purposes of the corporation are those stated in its articles of incorporation, constitution, and bylaws and include a commitment to—

(1) uphold and defend the Constitution of the United States;

(2) foster the improvement of the condition of Vietnam-era veterans;

(3) promote the social welfare (including educational, economic, social, physical, and cultural improvement) in the United States by encouraging the growth and development, readjustment, self-respect, self-confidence and usefulness of Vietnam-era veterans and other veterans;

(4) improve conditions for Vietnam-era veterans and develop channels of communication to assist Vietnam-era veterans;

(5) conduct and publish research, on a nonpartisan basis, pertaining to the relationship between Vietnam-era veterans and the American society, to the Vietnam war experience, to the role of the United States in securing peaceful coexistence for the world community, and to other matters which affect the educational, economic, social, physical, or cultural welfare of Vietnam-era veterans and other veterans and the families of such veterans;

(6) assist disabled Vietnam-era veterans and other veterans in need of assistance and the dependents and survivors of such veterans; and

(7) consecrate the efforts of the members of the corporation and Vietnam-era veterans generally to mutual helpfulness and service to their country.

SERVICE OF PROCESS

SEC. 4. With respect to service of process, the corporation shall comply with the laws of the State in which it is incorporated and those States in which it carries on its activities in furtherance of its corporate purposes.

MEMBERSHIP

SEC. 5. Except as provided in section 8, eligibility for membership in the corporation and the rights and privileges of members shall be as provided in the constitution and bylaws of the corporation.

BOARD OF DIRECTORS

SEC. 6. Except as provided in section 8, the board of directors of the corporation, and the responsibilities of the board, shall be as provided in the constitution and bylaws of the corporation and in conformity with the laws of the State in which it is incorporated.

OFFICERS

SEC. 7. Except as provided in section 8, the officers of the corporation, and the election of such officers, shall be as provided in the constitution and bylaws of the corporation and in conformity with the laws of the State in which it is incorporated.

NONDISCRIMINATION

SEC. 8. In establishing the conditions of membership in the corporation and in determining the requirements for serving on the board of directors or as an officer of the corporation, the corporation may not discriminate on the basis of race, color, religion, sex, national origin, handicap, or age.

RESTRICTIONS ON CORPORATE POWERS

SEC. 9. (a) No part of the income or assets of the corporation shall inure to any person who is a member, officer, or director of the corporation or be distributed to any such person during the life of this charter. Nothing in this subsection shall be construed to prevent the payment of reasonable compensation to the officers of the corporation or reimbursement for actual necessary ex-

penses in amounts approved by the board of directors.

(b) The corporation shall not make any loan to any officer, director, or employee of the corporation.

(c) The corporation shall have no power to issue any shares of stock nor to declare or pay any dividends.

(d) The corporation shall not claim congressional approval or Federal Government authority by virtue of this Act for any of its activities.

LIABILITY FOR ACTS OF OFFICERS AND AGENTS

SEC. 10. The corporation shall be liable for the acts of its officers and agents when acting within the scope of their authority.

BOOKS AND RECORDS; INSPECTION

SEC. 11. The corporation shall keep correct and complete books and records of accounts and shall keep minutes of any proceeding of the corporation involving any of its members, the board of directors, or any committee having authority under the board of directors. The corporation shall keep at its principal office a record of the names and addresses of all members having the right to vote. All books and records of the corporation may be inspected by any member having the right to vote, or by any agent or attorney of such member, for any proper purpose, at any reasonable time. Nothing in this section shall be construed to contravene any applicable State law.

AUDIT OF FINANCIAL TRANSACTIONS

SEC. 12. The first section of the Act entitled "An Act to provide for audit of accounts of private corporations established under Federal law", approved August 30, 1964 (36 U.S.C. 1101), is amended by inserting after paragraph (71) the following new paragraph:

"(72) The Vietnam Veterans of America, Inc.".

ANNUAL REPORT

SEC. 13. The corporation shall report annually to the Congress concerning the activities of the corporation during the preceding fiscal year. Such annual report shall be submitted at the same time as is the report of the audit of the corporation required by section 2 of the Act entitled "An Act to provide for audit of accounts of private corporations established under Federal law", approved August 30, 1964 (36 U.S.C. 1102). The report shall not be printed as a public document.

RESERVATION OF RIGHT TO ALTER, AMEND, OR REPEAL CHARTER

SEC. 14. The right to alter, amend, or repeal this charter is expressly reserved to the Congress.

DEFINITION OF "STATE"

SEC. 15. For purposes of this Act, the term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, and each of the territories and possessions of the United States.

TAX-EXEMPT STATUS

SEC. 16. The corporation shall maintain its status as an organization exempt from taxation as provided in the Internal Revenue Code of 1954.

EXCLUSIVE RIGHT TO NAMES

SEC. 17. The corporation shall have the sole and exclusive right to use the name "The Vietnam Veterans of America, Inc.", "Vietnam Veterans of America, Inc.", and "Vietnam Veterans of America", and such seals, emblems, and badges as the corporation may lawfully adopt. Nothing in this section shall be construed to interfere or conflict with established or vested rights.

FAILURE TO COMPLY WITH RESTRICTIONS OR PROVISIONS

SEC. 18. If the corporation shall fail to comply with any of the restrictions or provisions of this Act, the charter granted by this Act shall expire.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 512) was laid on the table.

TO PERMIT ALIEN FISHING VESSELS TO STOP TEMPORARILY IN GUAM

Mr. MAZZOLI. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2224) to amend the Immigration and Nationality Act to permit nonimmigrant alien crewmen on fishing vessels to stop temporarily at ports in Guam, as amended.

The Clerk read as follows:

H.R. 2224

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. NEW NONIMMIGRANT CREWMAN CLASSIFICATION.

Section 101(a)(15)(D) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(15)(D)) is amended by inserting "(i)" after "(D)" and by adding at the end the following new clause:

"(ii) an alien crewman serving in good faith as such in any capacity required for normal operations and service aboard a fishing vessel having its home port or an operating base in the United States who intends to land temporarily in Guam and solely in pursuit of his calling as a crewman and to depart from Guam with the vessel on which he arrived;".

SEC. 2. TREATMENT OF DEPARTURES FROM GUAM.

In the administration of section 101(a)(15)(D)(ii) of the Immigration and Nationality Act (added by the amendment made by section 1 of this Act), an alien crewman shall be considered to have departed from Guam after leaving the territorial waters of Guam, without regard to whether the alien arrives in a foreign state before returning to Guam.

The SPEAKER. Is a second demanded?

Mr. LUNGREN. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from Kentucky [Mr. MAZZOLI] will be recognized for 20 minutes and the gentleman from California [Mr. LUNGREN] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Kentucky [Mr. MAZZOLI].

Mr. MAZZOLI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of the bill now before us, H.R. 2224, which would grant alien crewmen on U.S.-based fishing vessels the same rights that are currently enjoyed by those on non-U.S.-based fishing vessels.

Currently, an alien employed on a U.S.-based fishing vessel cannot enter Guam under any circumstances. As a result, they must stay aboard the ship the entire time it is in Guam, whereas alien crewmen on foreign-flag fishing vessels may go ashore temporarily while the ship is in port in Guam.

There does not appear to be any current justification for denying shore leave to alien crewmen on U.S.-based fishing vessels. According to the Department of the Interior, this works a "severe hardship" on Guam by in effect, discouraging the use of an American port by American fishing vessels. The Department of the Interior in its bill report also notes that this legislation "would substantially enhance the attractiveness of Guam to commercial vessels based in the U.S."

This legislation affects only Guam. An alien crewman entering Guam would not, by virtue of that entry, gain any right to enter the United States.

The Departments of Justice and Interior have no objection to enactment of this bill which has been sponsored by our colleague from Guam, Congressman BLAZ.

This bill received the unanimous support of both the Immigration Subcommittee and Full Judiciary Committee and I know of no opposition to its enactment.

Mr. LUNGREN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, Guam is currently the home port for America's Western Pacific tuna fleet. The fleet supplies much of the American tuna which is consumed in this country. The fleet provides employment for many Americans as well as some alien crewmen. The economic impact of the fleet's presence on Guam's economy cannot be underestimated. Each ship provides wage income and taxes. Each ship also purchases large amounts of petroleum products, food and medical supplies and services. The fleet's continued presence is essential to Guam's growing private sector and increasing independence from Federal subsidies.

Under current Federal immigration law, designed primarily to cope with problems which arose in San Diego, alien crewmen on ships homeported or operating out of Guam cannot go on shore leave when their ships enter Guam's port. This resulted in the past in severe morale problems for the crews of the American tuna boats and in violence. The problems in San Diego resulted from alien crewmen residing in San Diego with their families. They would fish occasionally in international waters, but were primarily interested in living permanently in the United States. The alien crewmen in Guam do not have residences in

Guam nor do they have their families with them. They are generally from South America and Yugoslavia and return there when they have finished fishing.

The INS has recognized that this law does not fit Guam's unique circumstances and has paroled these alien fishermen into Guam for more than a year pending passage of this bill. In fact, an identical bill, H.R. 5118, addressing this same problem passed the House in the 98th Congress. The INS has indicated that it does not oppose H.R. 2224 nor did it oppose H.R. 5118. Both the Department of Justice and the Department of the Interior have no opposition to this legislation and have filed reports so indicating. H.R. 2224 will allow an American fishing industry to continue its operations in an American port with all the benefits which will result thereby.

This history of the current law originates from INS, who issued an operational instruction to prevent alien crewmen in San Diego from residing in the United States while posing as crewmen. This operational instruction prevented alien crewmen from obtaining successive crewmen visas by leaving the United States and sailing into international waters then return to a U.S. port. The alien crewmen would thenceforth have to enter a foreign country prior to returning to the United States. As I noted earlier, the differences between Guam and San Diego are many. In particular, the alien crewmen in Guam do not own homes there. They do not have their families with them and do return to their own country when they have finished fishing. The proposed bill will allow the alien crewmen in Guam to leave, fish in international waters and then return to Guam for shore leave without having first to enter a foreign country. This legislation will allow Guam to improve its private economy without posing any threat to the security of the United States' borders. For these reasons I support passage of this legislation so that the law will more closely respond to the reality in Guam.

I might say, Mr. Speaker, that the distinguished Member of Congress representing Guam, BEN BLAZ, had intended to be here; he was called home to Guam for some urgent business. Therefore, he is not able to be here.

He very strongly supports this legislation; he has introduced it and he has worked for it. I would say that it makes very good sense for us to pass this legislation unanimously at this time.

Mr. BLAZ. Mr. Speaker, Guam is currently the homeport for America's Western Pacific tuna fleet. The fleet supplies much of the tuna which is consumed in this country, and provides employment for many Americans as well as some alien crewmen. The economic impact of the fleet's presence on Guam's economy cannot be underestimated. Each ship provides wage income and taxes. Every vessel also purchases large amounts of petroleum products, food, medical supplies and services. The fleet's continued presence is essential to Guam's growing private sector and increasing independence from Federal subsidies. H.R. 2224 will allow an American fishing industry to continue its operations in an American port with all the benefits which will result thereby.

Under current Federal immigration law alien crewmen on ships homeported or operating out of Guam cannot go on shore leave when their ships enter Guam's port. This law has resulted in severe morale problems for the crews of the American tuna boats who sail into Guam's harbor after several months at sea. At times violence has occurred.

This provision of the law was designed primarily to cope with problems which arose in San Diego. The problems in San Diego resulted from an entirely different set of circumstances which do not exist in Guam. Alien crewmen were residing in San Diego with their families. They would fish occasionally in international waters, but were primarily interested in living permanently in the United States. The alien crewmen in Guam do not have residences in Guam nor do they have their families with them. They are generally from South America and Yugoslavia and return there when they have finished fishing.

The INS has recognized that this law does not fit Guam's unique circumstances and has paroled these alien fishermen into Guam for more than a year pending passage of this bill. In fact, an identical bill, H.R. 5118, addressing this same problem passed the House in the 98th Congress. The INS has indicated that it does not oppose H.R. 2224 nor did it oppose H.R. 5118. Both the Department of Justice and the Department of the Interior have no opposition to this legislation and have filed reports so indicating with the House Subcommittee on Immigration, Refugees and International Law. This legislation will allow Guam to improve its private economy without posing any threat to the security of the U.S. borders.

Gentleman, I call your attention to the fact that the Soviets continue to test our resolve in the Western Pacific. It is, therefore, important that America demonstrate its continued interest in that region. Since Guam is America's bridge to the Pacific and its finest symbol it is essential that the free enterprise system flourish there. This bill will serve that worthy cause. For these reasons I urge the House to suspend its rules and pass this legislation so that the law will more closely respond to the reality in Guam.

Mr. LUNGREN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. MAZZOLI. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER. The question is on the motion offered by the gentleman from Kentucky [Mr. MAZZOLI] that the House suspend the rules and pass the bill, H.R. 2224, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

□ 1235

GENERAL LEAVE

Mr. MAZZOLI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on H.R. 2224, the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

SEXUAL ABUSE ACT OF 1986

Mr. BRYANT. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4745) to amend title 18, United States Code, with respect to sexual abuse, as amended.

The Clerk read as follows:

H.R. 4745

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Sexual Abuse Act of 1986".

SEC. 2. DEFINITION OF SEXUAL ABUSE OFFENSES.

Title 18, United States Code, is amended by inserting after chapter 109 the following new chapter:

"CHAPTER 109A—SEXUAL ABUSE

"Sec.
"2241. Aggravated sexual abuse.
"2242. Sexual abuse.
"2243. Sexual abuse of a minor or ward.
"2244. Abusive sexual contact.
"2245. Definitions for chapter.

"§ 2241. Aggravated sexual abuse

"(a) BY FORCE OR THREAT.—Whoever, in the special maritime and territorial jurisdiction of the United States or in a Federal prison, knowingly causes another person to engage in a sexual act—

"(1) by using force against that other person; or

"(2) by threatening or placing that other person in fear that any person will be subjected to death, serious bodily injury, or kidnaping;

or attempts to do so, shall be fined under this title, imprisoned for any term of years or life, or both.

"(b) BY OTHER MEANS.—Whoever, in the special maritime and territorial jurisdiction of the United States or in a Federal prison, knowingly—

"(1) renders another person unconscious and thereby engages in a sexual act with that other person; or

"(2) administers to another person by force or threat of force, or without the knowledge or permission of that person, a drug, intoxicant, or other similar substance and thereby—

"(A) substantially impairs the ability of that other person to appraise or control conduct; and

"(B) engages in a sexual act with that other person;

or attempts to do so, shall be fined under this title, imprisoned for any term of years or life, or both.

"(c) WITH CHILDREN.—Whoever, in the special maritime and territorial jurisdiction of the United States or in a Federal prison, knowingly engages in a sexual act with another person who has not attained the age of 12 years, or attempts to do so, shall be fined under this title, imprisoned for any term of years or life, or both.

"(d) STATE OF MIND PROOF REQUIREMENT.—In a prosecution under subsection (c) of this section, the Government need not prove that the defendant knew that the other person engaging in the sexual act had not attained the age of 12 years.

"§ 2242. Sexual abuse

"Whoever, in the special maritime and territorial jurisdiction of the United States or in a Federal prison, knowingly—

"(1) causes another person to engage in a sexual act by threatening or placing that other person in fear (other than by threatening or placing that other person in fear that any person will be subjected to death, serious bodily injury, or kidnaping); or

"(2) engages in a sexual act with another person if that other person is—

"(A) incapable of appraising the nature of the conduct; or

"(B) physically incapable of declining participation in, or communicating unwillingness to engage in, that sexual act;

or attempts to do so, shall be fined under this title, imprisoned not more than 20 years, or both.

"§ 2243. Sexual abuse of a minor or ward

"(a) OF A MINOR.—Whoever, in the special maritime and territorial jurisdiction of the United States or in a Federal prison, knowingly engages in a sexual act with another person who—

"(1) has attained the age of 12 years but has not attained the age of 16 years; and

"(2) is at least four years younger than the person so engaging;

or attempts to do so, shall be fined under this title, imprisoned not more than five years, or both.

"(b) OF A WARD.—Whoever, in the special maritime and territorial jurisdiction of the United States or in a Federal prison, knowingly engages in a sexual act with another person who is—

"(1) in official detention; and

"(2) under the custodial, supervisory, or disciplinary authority of the person so engaging;

or attempts to do so, shall be fined under this title, imprisoned not more than one year, or both.

"(c) DEFENSES.—(1) In a prosecution under subsection (a) of this section, it is a defense, which the defendant must establish by a preponderance of the evidence, that the defendant reasonably believed that the other person had attained the age of 16 years.

"(2) In a prosecution under this section, it is a defense, which the defendant must establish by a preponderance of the evidence, that the persons engaging in the sexual act were at that time married to each other.

"(d) STATE OF MIND PROOF REQUIREMENT.—In a prosecution under subsection (a) of this section, the Government need not prove that the defendant knew—

"(1) the age of the other person engaging in the sexual act; or

"(2) that the requisite age difference existed between the persons so engaging.

"§ 2244. Abusive sexual contact

"(a) SEXUAL CONDUCT IN CIRCUMSTANCES WHERE SEXUAL ACTS ARE PUNISHED BY THIS CHAPTER.—Whoever, in the special maritime and territorial jurisdiction of the United States or in a Federal prison, knowingly engages in or causes sexual contact with or by another person, if so to do would violate—

"(1) section 2241 of this title had the sexual contact been a sexual act, shall be fined under this title, imprisoned not more than five years, or both;

"(2) section 2242 of this title had the sexual contact been a sexual act, shall be fined under this title, imprisoned not more than three years, or both;

"(3) subsection (a) of section 2243 of this title had the sexual contact been a sexual act, shall be fined under this title, imprisoned not more than one year, or both; or

"(4) subsection (b) of section 2243 of this title had the sexual contact been a sexual act, shall be fined not more than $5,000, imprisoned not more than six months, or both.

"(b) IN OTHER CIRCUMSTANCES.—Whoever, in the special maritime and territorial jurisdiction of the United States or in a Federal prison, knowingly engages in sexual contact with another person without that other person's permission shall be fined not more than $5,000, imprisoned not more than six months, or both.

"§ 2245. Definitions for chapter

"As used in this chapter—

"(1) the term 'prison' means a correctional, detention, or penal facility;

"(2) the term 'sexual act' means—

"(A) contact between the penis and the vulva or the penis and the anus, and for purposes of this subparagraph contact involving the penis occurs upon penetration, however slight;

"(B) contact between the mouth and the penis, the mouth and the vulva, or the mouth and the anus; or

"(C) the penetration, however slight, of the anal or genital opening of another by a hand or finger or by any object, with an intent to abuse, humiliate, harass, degrade, or arouse or gratify the sexual desire of any person; and

"(3) the term 'sexual contact' means the intentional touching, either directly or through the clothing, of the genitalia, anus, groin, breast, inner thigh, or buttocks of any person with an intent to abuse, humiliate, harass, degrade, or arouse or gratify the sexual desire of any person;

"(4) the term 'serious bodily injury' means bodily injury that involves a substantial risk of death, unconsciousness, extreme physical pain, protracted and obvious disfigurement, or protracted loss or impairment of the function of a bodily member, organ, or mental faculty.

"(5) the term 'official detention' means—

"(A) detention by a Federal officer or employee, or under the direction of a Federal officer or employee, following arrest for an offense; following surrender in lieu of arrest for an offense; following a charge or conviction of an offense; or an allegation or finding of juvenile delinquency; following commitment as a material witness; following civil commitment in lieu of criminal proceedings or pending resumption of criminal proceedings that are being held in abeyance, or pending extradition, deportation, or exclusion; or

"(B) custody by a Federal officer or employee, or under the direction of a Federal officer or employee, for purposes incident to any detention described in subparagraph (A) of this paragraph, including transportation, medical diagnosis or treatment, court appearance, work, and recreation;

but does not include supervision or other control (other than custody during specified hours or days) after release on bail, probation, or parole, or after release following a finding of juvenile delinquency.".

SEC. 3. CONFORMING AND RELATED AMENDMENTS.

(a) OTHER TITLE 18 AMENDMENTS.—Title 18, United States Code, is amended—

(1) by striking out chapter 99;

(2) in subsection (a) of section 113 by striking out "or rape";

(3) in subsection (b) of section 113 by striking out "rape" and inserting in lieu thereof "a felony under chapter 109A";

(4) in subsection (a) of section 1111 by striking out ", rape" and inserting in lieu thereof "aggravated sexual abuse or sexual abuse";

(5) in section 1153—

(A) in the first paragraph, by striking out "rape, involuntary sodomy, carnal knowledge of any female, not his wife, who has not attained the age of sixteen years, assault with intent to commit rape," and inserting in lieu thereof "a felony under chapter 109A,"; and

(B) in each of the second and third paragraphs, by striking out ", involuntary sodomy,";

(6) in paragraph (12) of section 3185 by striking out "Rape;" and inserting in lieu thereof "A felony under chapter 109A of this title;"; and

(7) in the table of chapters at the beginning of part I—

(A) by striking out the item relating to chapter 99; and

(B) by inserting after the item relating to chapter 109 the following new item:

"109A. Sexual Abuse ..... 2241".

(b) NON-TITLE 18 PROVISIONS.—The Public Health Service Act is amended—

(A) in section 1904(a)(1)(G) (42 U.S.C. 300w-3(a)(1)(G)) by striking out "rape victims and for rape prevention" and inserting in lieu thereof "victims of sex offenses and for prevention of sex offenses"; and

(B) in section 1905(c)(6) (42 U.S.C. 300w-4(c)(6)) by striking out "rape" and inserting "sex offense" in lieu thereof.

(2) The heading of title VI of the Mental Health Systems Act is amended by striking out "RAPE" and inserting "SEX OFFENSE" in lieu thereof.

(3) The heading for section 601 of the Mental Health Systems Act (42 U.S.C. 9511) is amended by striking out "RAPE" and inserting "SEX OFFENSE" in lieu thereof.

(4) Section 601(a) of the Mental Health Systems Act (42 U.S.C. 9511(a)) is amended by striking out "Rape" and inserting "Sex Offenses" in lieu thereof.

(5) Section 601(a)(1) of the Mental Health Systems Act (42 U.S.C. 9511(a)(1)) is amended—

(A) in subparagraph (B), by striking out "the act of rape" and inserting "sex offenses" in lieu thereof;

(B) in subparagraph (E), by striking out "rape" and inserting "a sex offense" in lieu thereof; and

(C) by striking out "rape" each place it appears other than in subparagraphs (B) and (E) and inserting "sex offenses" in lieu thereof.

(6) Section 601(a)(3) of the Mental Health Systems Act (42 U.S.C. 9511(a)(3)) is amended by striking out "rape" each place it appears and inserting "sex offenses" in lieu thereof.

(7) Section 601(e) of the Mental Health Systems Act (42 U.S.C. 9511(e)) is amended by striking out "rape" the first place it appears and inserting "sex offense" in lieu thereof.

(8) Section 902(k)(1) of the Federal Aviation Act of 1958, as amended (49 U.S.C. App. 1472(k)(1)), is amended by striking out "2031, 2032" and inserting in lieu thereof "chapter 109A".

SEC. 4. EFFECTIVE DATE.

This Act and the amendments made by this Act shall take effect 30 days after the date of the enactment of this Act.

The SPEAKER. Is a second demanded?

Mr. COBLE. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from Texas [Mr. BRYANT] will be recognized for 20 minutes and the gentleman from North Carolina [Mr. COBLE] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Texas [Mr. BRYANT].

Mr. BRYANT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 4745, the Sexual Abuse Act of 1986, will bring about much needed reform of the antiquated Federal rape statutes. The Committee on the Judiciary reported the bill unanimously, and the Justice Department strongly endorses it.

There are presently three Federal rape statutes. Two of them, which proscribe rape and assault with intent to commit rape, do not define what constitutes rape. The courts, however, have indicated that these offenses incorporate the common law definition that requires sexual intercourse with a woman "forcibly and against her will." The third Federal statute makes it an offense for a man to "carnally know a female, not his wife, who has not attained the age of 16 years"—commonly known as satutory rape.

There are a number of deficiencies in current Federal law. First, and most obvious, Federal law protects only women from sexual abuse; homosexual rape is not proscribed. Second, the Federal statutes proscribe only coerced sexual intercourse; other forms of sexual abuse are not made criminal. Third, the Federal statutes incorporate doctrines that are antivictim and serve to focus a trial on the conduct and state of mind of the victim rather than on the conduct and state of mind of the defendant.

Traditionally, the force requirement was considered necessary to show a lack of consent. As perhaps the best known treatise on criminal law puts it, if "great force was not needed to accomplish the act the necessary lack of consent has been disproved in other than exceptional situations." The resistance doctrine, in turn, was used to determine when the requisite "great force," and therefore the requisite lack of consent, was present. This doctrine, at its most stringent, required that a woman struggle with an intensity reflecting her physical capacity to resist and that her efforts not diminish during the course of the offense. This doctrine was directly in conflict with the safety and welfare of the victim. The law does not impose a resistance requirement upon the victims of other crimes of violence. Requiring a victim to become a martyr by testing the sincerity of an offender's threat is unfair, and H.R. 4745 does not carry forward the resistance doctrine.

In addition, H.R. 4745 does not carry forward the spousal exemption doctrine. This doctrine is probably a part of the Federal law, although there are no cases on the matter and a relatively recent case suggests that whether the Federal courts will recognize spousal exemption is an open question. The spousal exemption doctrine made rape unique; rape was the only crime of violence for which marriage was a defense. H.R. 4745 recognizes that marriage should not ipso facto shield a person from responsibility for a violent crime.

H.R. 4745 is the product of several years of work by the Committee on the Judiciary. Development of the bill has been a bipartisan effort that has benefited from the contributions of a number of interested persons and groups, including local police and prosecutors, persons who provide services and assistance to victims of sex crimes, and the National Coalition Against Domestic Violence. The committee has also worked closely with the Justice Department. The goal of these labors was to draft a bill that will offer all persons the maximum possible protection from sexual abuse. I believe, along with the Justice Department, that H.R. 4745 will do just that, and I urge my colleagues to support it.

Mr. Speaker, I reserve the balance of my time.

Mr. COBLE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 4745.

This bill accomplishes the long overdue task of reforming Federal statutes dealing with sexual assault. It expands the current provision on rape beyond the antiquated restrictions of common law so that other forms of deviate sexual conduct are covered. The bill is supported by the administration as a "rationally graded, comprehensive sex-neutral series of offenses in place of the inadequate laws now on the books."

Rape may be an infrequent Federal offense, but it is nonetheless a serious crime that must be addressed by the strongest and most effective series of statutes possible. The reforms contained in this bill have already been instituted in several of the States and will help not only law enforcement but also the victims of sexual abuse.

Mr. Speaker, this legislation is the product of a bipartisan effort. It deserves the support of this body and I urge its adoption under suspension here today.

Mr. CONYERS. Mr. Speaker, I support H.R. 4745 and urge my colleagues to do so as well.

The Federal statutes proscribing rape and assault with intent to commit rape incorporate a common law definition of rape that requires the prosecution to show that the defendant had sexual intercourse with a woman "forcibly and against her will." The Federal statutory rape provision makes it a crime for a person to have sexual intercourse with a woman, "not his wife, who has not attained the age of 16 years * * *."

The common-law tradition from which these statutes derive is not very inspiring. Rape laws ostensibly existed to protect women from having unwanted, coerced sexual intimacy, but the legal system frequently seemed to be more concerned with protecting males from conviction than with protecting females from injurious conduct. An exception to that, was where there was a racial factor, and the victim was white and the accused black.

H.R. 4745 completely modernizes and reforms the Federal rape statutes. It is drafted using gender neutral terms and in such a way that the focus of a trial will be on the defendant's conduct, and not on the victim's. It expands Federal rape law to reach homosexual rape and sexual abuse of another that goes beyond unwanted sexual intercourse, and it expands Federal jurisdiction to encompass all Federal prisons. Finally, the bill grades the offenses so that the more serious the conduct, the more serious the punishment.

H.R. 4745 is the product of close cooperation among several persons and groups. Their keen interest and support have helped greatly to fashion the bill and move it along. I want to thank them, especially the ranking minority member of the Subcommittee on Criminal Justice, the gentleman from Pennsylvania [Mr. GEKAS]; three of the bill's sponsors, the gentleman from Maryland [Mr. HOYER], the gentleman from Michigan [Mr. CARR], and the gentlelady from California [Ms. FIEDLER], all of whom testified in support of the legislation and helped in perfecting it; the National Coalition Against Domestic Violence, whose acting executive director, Kerry Lobel, testified on behalf of the legislation and helped draft parts of it; and the National Network for Victims of Sexual Assault, which submitted a statement in support of the legislation and also helped draft parts of the bill. Finally, I want to express my appreciation for the assistance and support of the Department of Justice.

H.R. 4745 was reported unanimously from committee, and it is strongly supported by the Justice Department. Once again, I urge my colleagues to support the bill.

Mr. HOYER. Mr. Speaker, I rise in strong support of H.R. 4745, the Sexual Assault Act of 1986. I want to commend the chairman of the House Subcommittee on Criminal Justice, Mr. JOHN CONYERS, for his strong and very capable leadership in the area of criminal jus-

tice particularly with regard to rape, one of the most unreported crimes in our society. Mr. CONYERS has crafted a bill which is a marked improvement over current Federal law. H.R. 4745 effectively abrogates a number of common-law principles and sets forth specific statutory guidelines that define criminal conduct. The proposed legislation modernizes and reforms Federal rape provisions by: First, defining the sexual offenses in gender neutral terms; second, defining a series of gradual sexual offenses; third, affirmatively abrogating the common-law marital exemption; and fourth, expanding the jurisdictional scope to cover offenses committed against any person in official detention and those in Federal prisons.

I also want to commend the ranking minority leader of the Subcommittee on Criminal Justice, Representative GEORGE GEKAS, without whose bipartisan cooperation and assistance the present bill would not be before the House today. The very capable leadership efforts of Mr. GEKAS are to be commended. Many of the substantive suggestions that were made by Mr. GEKAS during hearings on the proposed legislation were adopted and incorporated into H.R. 4745. Those suggestions contributed significantly to making H.R. 4745 as well-reasoned, comprehensive, and rational series of sexual offenses in place of the inadequate laws currently on the books.

Mr. Speaker, the proposed legislation is also the result of several years of hard work and commitment by other individuals such as Tom Hutchinson, counsel for the Subcommittee on Criminal Justice. Mr. Hutchinson has devoted a great deal of time and effort to the bill before the House today and the strengths of H.R. 4745 are in large part due to his expertise and commitment. I also want to mention the valuable and expert input of Vicky Portney of the Department of Justice in crafting this bipartisan bill. This bill also benefited by the legal expertise of Doug Bellis of the House legislative counsel office and special mention must be made of the bipartisan support of Raymond V. Smietanka, associate counsel of the Subcommittee on Criminal Justice.

H.R. 4745 is the result of strong bipartisan cooperation on several levels in an effort to modernize and reform current Federal rape laws. I am very pleased to have been a part of that effort and urge my colleagues to support the Sexual Assault Act of 1986.

Mr. COBLE. Mr. Speaker, I yield back the balance of my time.

Mr. BRYANT. Mr. Speaker, I have no requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. MONTGOMERY). The question is on the motion offered by the gentleman from Texas [Mr. BRYANT] that the House suspend the rules and pass the bill, H.R. 4745, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. BRYANT. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to extend their remarks on H.R. 4745, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

CONGRESSIONAL GOLD MEDALS TO ANATOLY AND AVITAL SHCHARANSKY

Mr. ANNUNZIO. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4186) to authorize the President of the United States to award congressional gold medals to Anatoly and Avital Shcharansky in recognition of their dedication of human rights, and to authorize the Secretary of the Treasury to sell bronze duplicates of those medals, as amended.

The Clerk read as follows:

H.R. 4186

Be it enacted by the Senate and House of Representatives of the United States of Amercia in Congress assembled,

SECTION 1. FINDINGS.

The Congress finds that—

(1) Avital Shcharansky and Natan (Anatoly) Shcharansky have displayed immense courage and commitment to the preservation of individual human rights, regarded as among the highest of ideals by the American people;

(2) Natan (Anatoly) Shcharansky, a prominent founding member of the Moscow Helsinki Monitoring Group and active spokesman for the human rights denied to Soviet Jews, was unjustly arrested by the Soviet Union in 1977 and imprisoned for almost nine years on the false charges of espionage and treason;

(3) Natan (Anatoly) Shcharansky, during his lengthy incarceration and isolation, was subjected to ongoing emotional and physical deprivation of the highest magnitude, yet continued to display raw courage and the noblest commitment to his rights as an individual, thereby setting an example for others whose individual freedoms are being denied.

(4) freedom is the ideal held most dear by the American people, and Natan (Anatoloy) Shcharansky has become a symbol of that love of freedom;

(5) Avital Shcharansky, while her husband was kept silent by Soviet prisons and labor camps, waged an indefatigable campaign around the world on behalf of her husband and others similarly treated;

(6) Avital Shcharansky's earnest presistence and dedication to the precepts of freedom of thought, word, and deed raised the consciousness of the world while she valiantly worked for her husband's release, thus elevating human rights to a global concern; and

(7) their reunion is evidence of the triumph of the human spirit against all adversities.

SEC. 2. CONGRESSIONAL GOLD MEDAL.

(a) AWARD.—The President of the United States is authorized and requested to present, on behalf of the Congress, gold medals to Natan (Anatoly) and Avital Shcharansky in recognition of their supreme dedication and total commitment to the cause of individual human rights and freedoms.

(b) DESIGN AND CONSTRUCTION.—For purposes of the presentation referred to in subsection (a), the Secretary of the Treasury (hereafter in this Act referred to as the "Secretary") shall cause to be struck two gold medals with suitable emblems, devices, and inscriptions, to be determined by the Secretary.

(c) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated not to exceed $30,000 to carry out the provisions of this section.

SEC. 3. DUPLICATE MEDALS.

(a) CONSTRUCTION AND SALE.—The Secretary may cause duplicates in bronze of the gold medals provided for in section 2 to be coined and sold under regulations prescribed by the Secretary, at a price sufficient to cover the cost of such duplicates and such gold medals, including labor, material, dies, use of machinery, and overhead expenses.

(b) REIMBURSEMENT OF APPROPRIATIONS.—Any appropriation made under section 2 shall be reimbursed out of the proceeds of the sales referred to in subsection (a).

SEC. 4. NATIONAL MEDALS.

The medals provided for in this Act shall be considered to be national medals for purposes of section 5111 of title 31, United States Code.

The SPEAKER pro tempore. Is a second demanded?

Mr. GILMAN. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois [Mr. ANNUNZIO] will be recognized for 20 minutes and the gentleman from New York [Mr. GILMAN] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Illinois [Mr. ANNUNZIO].

Mr. ANNUNZIO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 4186 would authorize the presentation of congressional gold medals to Anatoly and Avital Shcharansky in recognition of their dedication to human rights. The legislation is cosponsored by 232 Members of the House.

The Shcharanskys' dedication to human rights and their unrelenting efforts on behalf of those persecuted by the Soviet Union is a model for all who believe in freedom. The valor of their struggle in the face of Soviet tyranny stands as a shining symbol to all who cherish freedom.

Anatoly Shcharansky was imprisoned in 1977 for 9 years by the Soviet Union for his activities as a founder and member of the Moscow Helsinki Monitoring Group. Despite the lengthy period of incarceration and isolation, he displayed courage and commitment to his rights as an indi-

vidual. Ongoing emotional and physical deprivations could not break his spirit or his will.

Even though physically imprisoned in the Soviet gulag, Anatoly Shcharansky was free. His freedom was not physical, but spiritual and intellectual. His Soviet jailers had his body, but they could not control, nor break, his mind or will. He did not fear the harsh treatment and imprisonment given him for his beliefs. By not succumbing to this fear he transcended the Communist tyranny. By refusing to comply with the wishes of his Soviet captors, they lost their power over him.

For his acts as part of the Helsinki Monitoring Group, and the spirit of freedom showed by the acts, he represented a threat to the Soviet system. For that, he was imprisoned and harshly treated by his native land.

Throughout his imprisonment, his wife, Avital, waged a tireless campaign to free her husband and others similarly mistreated. She would not let the world forget that her husband was imprisoned on trumped-up charges, and that the real reason for his imprisonment was his commitment to the preservation of individual human rights.

The reunion of Anatoly and Avital Shcharansky in February was a victory for the human spirit's yearning for freedom.

Their concern for freedom, and the courage and steadfastness displayed over the long years of their separation, stand as a monument to the triumph of the human spirit against adversity. Their love of freedom, and their willingness to endure much to attain it, stand as a shining beacon to all who love and cherish freedom.

Our Nation is one that prides itself on supporting freedom, and those who struggle for freedom, throughout the world. We honor and salute those brave individuals who face adversity and tyranny with courage and grace, and refuse to submit to the jackboot of oppression.

The mighty Soviet Union, with millions of armed soldiers and thousands of atomic weapons, was defeated in its attempt to silence and subjugate two extraordinary people, armed with nothing more than faith and quiet courage. Thus it will be for all tyrants when faced with persons such as the Shcharanskys. They show us how to stand up to tyranny.

Anatoly Shcharansky will visit the Capitol tomorrow. It would be a small and modest tribute to the Shcharanskys for this legislation to be passed before he arrives.

Mr. Speaker, I urge passage of H.R. 4186.

□ 1245

Mr. GILMAN. Mr. Speaker, I yield myself as much time as I may consume.

Mr. Speaker, I want to commend the gentleman from Illinois, the distinguished chairman of the Subcommittee on Consumer Affairs and Coinage of the Banking Committee for his leadership and his assistance in bringing this measure to the floor at this appropriate time just a few days before we are to honor Avital and Anatoly Shcharansky here in the Capitol Building and before he meets with the President of the United States.

Mr. Speaker, the purpose of congressional gold medals is to recognize outstanding qualities and achievement. We do not often encounter such men and women, and we consider ourselves fortunate when indeed our paths cross. Two such outstanding individuals are Avital and Anatoly Shcharansky.

I introduced H.R. 4186 soon after Anatoly Shcharansky walked across the Gleinicke Bridge to freedom, a few short months ago, because of my deeply held conviction that the issue of human rights around the world would not be as prominent today were it not for Avital and Anatoly Shcharansky. Their commitment and their dedication to precepts which we Americans hold so dear is most deserving of congressional recognition. There are very few real heroes in the world today—yet Avital and Anatoly endured a decade of physical, emotional, and psychological deprivation that few could endure, emerging to what can only be described as a triumph of the human spirit. They personify the best of heroism, having surmounted overwhelming odds and adversity through their unique personalities and their supreme commitment to each other and to the issue of human rights.

Anatoly's prominence as a member of the Helsinki Watch Monitoring Group in Moscow was well deserved. As a human rights activist, Anatoly spoke out not only for the cultural and religious rights of Soviet Jews, but for all those in the Soviet Union whose fundamental human freedoms were being denied. Arrested on a false charge of being a U.S. agent engaged in espionage, charges denied by three American Presidents, Anatoly was sentenced to 13 years in prison. He waged hunger strikes as a form of protest, and many of us recall several occasions when we did not even know whether he was alive or dead. Throughout his 9-year ordeal, Anatoly's devoted and courageous wife, Avital, persisted with tenacity heretofore unmatched, in her efforts to free Anatoly and give human rights their proper prominence on the global agenda. Even the Soviet Union, with all its might, could not silence them.

Our Nation has always believed that the freedoms granted by our bill of rights are sacred. It is, therefore, our responsibility to work for the freedom of others, and to appropriately recognize such commitment and achievement. The Shcharanskys' dedication to the cause of freedom of thought, of word and deed, embodies the precepts which our Nation holds so dear.

Yesterday, at the U.N., in New York City, I took part in the Solidarity Sunday rally of Americans demonstrating their commitment to human rights. In addressing the 300,000 gathered at the Dag Hammerskjold Plaza, Anatoly Shcharansky said:

From this place, my wife, Avital, was every year speaking to you and trying to convince you that your efforts were not in vain. Today, the fact that I am speaking to you is the best proof that she was right.

Mr. Speaker, H.R. 4186 has been cosponsored by more than 230 Members of this body. Such overwhelming support underscores the esteem in which this body holds men and women who act on the principles of liberty and justice that are so dear to us. Avital and Anatoly Shcharansky have significantly enhanced our common goal of human rights for every man and woman on this Earth.

With his visit to Washington this week, Anatoly deserves to know how the American people feel about his capacity to survive oppression and bigotry. Congressional gold medals in recognition of Avital and Anatoly Shcharansky's efforts sends a strong signal to the Soviet Union that we are indeed deeply committed to the respect for human rights of the individual.

Accordingly, Mr. Speaker, I urge our colleagues to adopt H.R. 4186.

Mr. Speaker, I have no further requests for time and I yield back the balance of my time.

Mr. BOLAND. Mr. Speaker, I strongly support H.R. 4186, a bill to grant a congressional gold medal to Anatoly and Avital Shcharansky. As one of the bill's cosponsors, I urge its adoption by the House.

The Shcharansky's names have become synonymous with unwavering commitment and dedication to human rights. By enduring 8 long years of being harassed, interrogated, threatened, and separated, they have demonstrated the kind of strength and spirit of which heroes are born. Each day they were tested, each day they fought to be free, and they have prevailed.

It is a blessing that Mr. Shcharansky was released from the Soviet prison, and that he is here in the United States. However, we must not forget those Soviet refuseniks that are still being denied their right to emigrate. By awarding the congressional gold medal, we honor the Shcharansky's and their cause. We also affirm our commitment to those thousands of Jews in the Soviet Union for whom the promise of the Helsinki final act remains to be fulfilled.

Mr. ANNUNZIO. Mr. Speaker, I have no further requests for time and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois [Mr. AN-

NUNZIO] that the House suspend the rules and pass the bill, H.R. 4186, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The title of the bill was amended so as to read: "A bill to authorize the President of the United States to award congressional gold medals to Natan (Anatoly) and Avital Shcharansky in recognition of their dedication to human rights, and to authorize the Secretary of the Treasury to sell bronze duplicates of those medals."

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ANNUNZIO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the H.R. 4186, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ANNUNZIO. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 2308), to authorize the President of the United States to award congressional gold medals to Natan (Anatoly) and Avital Shcharansky in recognition of their dedication to human rights, and to authorize the Secretary of the Treasury to sell bronze duplicates of those medals, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 2308

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. FINDINGS.

The Congress finds that—

(1) Avital Shcharansky and Natan (Anatoly) Shcharansky have displayed immense courage and commitment to the preservation of individual human rights, regarded as among the highest of ideals by the American people;

(2) Natan (Anatoly) Shcharansky, a prominent founding member of the Moscow Helsinki Monitoring Group and active spokesman for the human rights denied to Soviet Jews, was unjustly arrested by the Soviet Union in 1977 and imprisoned for almost nine years on the false charges of espionage and treason;

(3) Natan (Anatoly) Shcharansky, during his lengthy incarceration and isolation, was subjected to ongoing emotional and physical deprivation of the highest magnitude, yet continued to display raw courage and the noblest commitment to his rights as an individual, thereby setting an example for others whose individual freedoms are being denied;

(4) freedom is the ideal held most dear by the American people, and Natan (Anatoly) Shcharansky has become a symbol of that love of freedom;

(5) Avital Shcharansky, while her husband was kept silent by Soviet prisons and labor camps, waged an indefatigable campaign around the world on behalf of her husband and others similarly treated;

(6) Avital Shcharansky's earnest persistence and dedication to the precepts of freedom of thought, word, and deed raised the consciousness of the world while she valiantly worked for her husband's release, thus elevating human rights to a global concern; and

(7) their reunion is evidence of the triumph of the human spirit against all adversities.

SEC. 2. CONGRESSIONAL GOLD MEDAL.

(a) AWARD.—The President of the United States is authorized and requested to present, on behalf of the Congress, gold medals to Natan (Anatoly) and Avital Shcharansky in recognition of their supreme dedication and total commitment to the cause of individual human rights and freedoms.

(b) DESIGN AND CONSTRUCTION.—For purposes of the presentation referred to in subsection (a), the Secretary of the Treasury (hereafter in this Act referred to as the "Secretary") shall cause to be struck two gold medals with suitable emblems, devices, and inscriptions, to be determined by the Secretary.

(c) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated not to exceed $30,000 to carry out the provisions of this section.

SEC. 3. DUPLICATE MEDALS.

(a) CONSTRUCTION AND SALE.—The Secretary may cause duplicates in bronze of the gold medals provided for in section 2 to be coined and sold under regulations prescribed by the Secretary, at a price sufficient to cover the cost of such duplicates and such gold medals, including labor, material, dies, use of machinery, and overhead expenses.

(b) REIMBURSEMENT OF APPRORPIATIONS.—Any appropriation made under section 2 shall be reimbursed out of the proceeds of the sales referred to in subsection (a).

SEC. 4. NATIONAL MEDALS.

The medals provided for in this Act shall be considered to be national medals for purposes of section 5111 of title 31, United States Code.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 4186) was laid on the table.

THE NEED FOR THE FAIR HOUSING INITIATIVE PROGRAM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Rhode Island [Mr. ST GERMAIN] is recognized for 5 minutes.

Mr. ST GERMAIN. Mr. Speaker, as the Members are aware, at long last we are moving a housing bill forward. The legislation, incorporated in a substitute put forward by our Housing Subcommittee chairman, HENRY GONZALEZ, and the subcommittee's ranking minority member, STEWART MCKINNEY, is scheduled to be on the floor this week.

While I regard the Gonzalez-McKinney substitute as essential to maintaining this Nation's commitment to providing decent and affordable housing for its citizens, I want to call attention today to an amendment which I will offer to implement the Fair Housing Initiative Program.

As much as I wish we could say racism has been eliminated in our country and no one seeking to buy or rent the housing of their choice faces discriminatory treatment because of their race or ethnic origin, I cannot. Five days of hearings held by our Housing Subcommittee have made it clear that we must be more aggressive and vigilant if the promise of the 1964 and 1968 Civil Rights Acts are to be fully fulfilled. Public enforcement by State fair housing agencies and private enforcement by nonprofit fair housing organizations must be increased if the problem is to be eliminated.

Fair Housing Initiative Program is a small but very necessary component in this battle. It would provide funds to support the enforcement activities of State and local fair housing agencies, to increase education and outreach to inform the public of the meaning of the fair housing laws and to expand the capacity of nongovernmental fair housing organizations to investigate complaints of discrimination. Key to the successful investigation of fair housing violations is to use testing to collect credible and objective evidence of discriminatory housing practices. Testers are pairs of individuals who are matched as to income, family composition, and other demographic profiles but differ in their race, sex, nationality, or other attributes which are the basis of the alleged discrimination. The evidence they collect as to their treatment when they apply to rent or purchase housing may be used to prove or disprove an allegation of discrimination.

I understand the Department of Housing and Urban Development supports fully the amendments I shall be offering.

AMENDMENT OFFERED BY MR. ST GERMAIN OF RHODE ISLAND TO THE AMENDMENT IN THE NATURE OF A SUBSTITUTE TO H.R. 1 (TEXT OF H.R. 4746)

Page 38, after the period on line 17, insert the following language:

"The regulations governing testing conducted by private organizations shall contain measures deemed by the Secretary necessary to ensure that all such testing is objective, reliable, and controlled. These regulations should guarantee the credibility and probative value of testing evidence and preclude, to the extent possible without infringing on rights and remedies provided by Federal fair housing law, the misuse of the funds provided under this section. No such testing shall be funded under this subsection unless proceeded by an allegation of a discriminatory housing practice made by a person not employed or affiliated with the organization conducting the test.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. LEWIS of Florida) to

revise and extend their remarks and include extraneous material:)

Mr. CRANE, for 60 minutes, on May 13.

Mr. REGULA, for 60 minutes, today.

Mr. CLINGER, for 5 minutes, on May 13.

Mr. DORNAN of California, for 5 minutes, on May 13.

Mr. LUNGREN, for 60 minutes, on May 13.

Mr. LUNGREN, for 60 minutes, on May 14.

(The following Members (at the request of Mr. ANNUNZIO) to revise and extend their remarks and include extraneous material:)

Mr. PEPPER, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. PERKINS, for 30 minutes, on May 13, 14, and 15.

Mr. MRAZEK, for 60 minutes, on June 5.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. LEWIS of Florida) and to include extraneous matter:)

Mr. ROBERT F. SMITH.

Mr. KOLBE.

Ms. SNOWE.

(The following Members (at the request of Mr. ANNUNZIO) and to include extraneous matter:)

Mr. RODINO.

Mr. ANDERSON in 10 instances.

Mr. GONZALEZ in 10 instances.

Mr. BROWN of California in 10 instances.

Mr. ANNUNZIO in six instances.

Mr. JONES of Tennessee in 10 instances.

Mr. BONER of Tennessee in five instances.

Mr. DORGAN of North Dakota.

Mr. MCHUGH.

Mr. YATES.

Mr. KOSTMAYER.

Mr. HERTEL of Michigan.

Mr. MATSUI.

Mr. ST GERMAIN.

ENROLLED BILLS SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 737. An act for the relief of Ms. Chang Ai Bae; and

H.R. 1207. An act to award a special gold medal to the family of Harry Chapin.

ADJOURNMENT

Mr. ANNUNZIO. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 58 minutes p.m.), the House adjourned until tomorrow, Tuesday, May 13, 1986, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

3472. A letter from the Director the Office of Management and Budget transmitting a report on the status as of May 1, 1986, of 83 rescission proposals and 66 deferrals contained in the six special messages of fiscal year 1986, pursuant to 2 U.S.C. 685(e) (H.Doc. 99-218); to the Committee on Appropriations and ordered to be printed.

3473. A letter from the Deputy Secretary of Defense, transmitting his certification that the Space Defense and Operations [Asat] Program is essential to the national security, has no alternative that would cost less, its new estimates are reasonable and its management structure is adequate, pursuant to 10 U.S.C. 139b(e)(1); to the Committee on Armed Services.

3474. A letter from the Deputy Secretary of Defense, transmitting his certification that the Pershing II Program is essential to the national security, has no alternative that would cost less, its new estimates are reasonable and its management structure is adequate, pursuant to 10 U.S.C. 139b(e)(1); to the Committee on Armed Services.

3475. A letter from the Secretary of Education, transmitting notification of proposed final funding priorities—auxiliary activities: inservice training—Handicapped Children's Early Education Program, pursuant to 20 U.S.C. 1232(d)(1); to the Committee on Education and Labor.

3476. A letter from the Assistant Secretary of the Interior for Indian Affairs, transmitting a proposed plan for the use and distribution of the Ak-Chin, Salt River Pima-Maricopa Indian communities judgment funds in docket 228 before the U.S. Claims Court, pursuant to 25 U.S.C. 1402(a), 1404; to the Committee on Interior and Insular Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. GLICKMAN:

Committee on the Judiciary. H.R. 4434. A bill to amend the act entitled "An Act granting a charter to the General Federation of Women's Clubs" without amendment (Rep. 99-595). Referred to the House Calendar.

Mr. GLICKMAN:

Committee on the Judiciary. H.R. 2971. A bill granting the consent of the Congress to the amendments to the Susquehanna River Basin Compact. (Rep. 99-596). Referred to the House Calendar.

Mr. HAWKINS:

Committee on Education and Labor. H.R. 4728. A bill to establish programs of education and training designed to improve the competitiveness of American workers in international trade, and for other purposes, with an amendment (Rep. 99-597). Referred to the Committee of the Whole House on the State of the Union.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 1066: Mr. GILMAN.

H.R. 3032: Mr. MCKINNEY.

H.R. 3099: Mr. BENNETT, Mr. PEPPER, Mr. SOLARZ, and Mr. DYMALLY.

H.R. 3664: Mr. GINGRICH.

H.R. 4057: Mr. ORTIZ, Mr. SWEENEY, Mr. PEPPER, Mr. MCCOLLUM, Mr. REID, Mr. BARNARD, Mr. GORDON, Mr. MCDADE, Mr. CHAPMAN, Mr. FUSTER, Mr. TALLON, and Mr. YOUNG of Florida.

H.R. 4194: Mr. FEIGHAN, Mrs. SCHROEDER, Mr. COUGHLIN, and Mr. KILDEE.

H.R. 4728: Mr. RODINO, Mr. MITCHELL, Mrs. LLOYD, Mr. MARKEY, Mr. GEPHARDT, Mr. PANETTA, Mr. FAZIO, Mr. LELAND, Mr. EVANS of Illinois, Mr. WHEAT, Mr. ROBINSON, and Mr. FAUNTROY.

H.J. Res. 498: Mr. KINDNESS.

H.J. Res. 531: Mr. SHAW, Mr. HARTNETT, Ms. SNOWE, Mr. EVANS of Iowa, Mrs. KENNELLY, Mr. LOTT, Mr. STUDDS, and Mr. FORD of Tennessee.

H.J. Res. 596: Mr. UDALL, Mr. STOKES, Mr. MRAZEK, Mr. LOWRY of Washington, Mr. RICHARDSON, Mr. MOODY, Mr. WIRTH, Mrs. COLLINS, Mrs. BOXER, Mr. DIXON, Mr. ROBINSON, Mr. DURBIN, Mr. SKELTON, Mr. EARLY, Mr. BARNES, Mr. DELAY, Mr. CONTE, Mr. CARPER, Mr. DORNAN of California, Mr. EDGAR, Mr. GREEN, Mr. O'BRIEN, Mrs. BENTLEY, Mr. FAUNTROY, Mr. HORTON, Mr. BLILEY, Mr. SIKORSKI, Mr. WOLF, Mr. MARTINEZ, Mrs. BURTON of California, Mr. CARNEY, Mr. CLINGER, Mr. CONYERS, Mr. ACKERMAN, Mr. DANIEL, Mr. KASICH, Mrs. KENNELLY, Mr. KOLTER, Mr. HUTTO, Mr. DYMALLY, Mr. FORD of Tennessee, Mr. FOWLER, Mr. GEKAS, Mr. GALLO, Mr. GRAY of Pennsylvania, Mr. GARCIA, Mr. RODINO, Mr. DORGAN of North Dakota, Mr. DOWNEY of New York, Mr. REID, Mr. CRANE, Mr. HARTNETT, Mrs. HOLT, Mr. HALL of Ohio, Mr. HUNTER, Mr. HEFNER, Mr. LEHMAN of Florida, Mr. LUKEN, Mr. MCCAIN, Mr. HENRY, Mr. LELAND, Mr. MCCOLLUM, Mr. MAVROULES, Mr. ORTIZ, Mr. PEPPER, Mr. ROEMER, Mr. SABO, Mr. MACKAY, Mr. CHENEY, Mr. DARDEN, Mr. MATSUI, Mr. BROOMFIELD, Mr. ANDREWS, Mr. DASCHLE, and Mr. LANTOS.

H. Con. Res. 292: Mr. NELSON of Florida, Mr. LEVIN of Michigan, Mr. ANDERSON, Mr. BOEHLERT, Mr. FAZIO, Mr. MCDADE, Mrs. BOXER, Mrs. BENTLEY, Mr. FISH, Mr. MATSUI, Mr. DORNAN of California, Mr. PACKARD, Mr. RALPH M. HALL, Mr. VALENTINE, Mr. KOLTER, and Mr. HAMILTON.

H. Con. Res. 310: Mr. BARTON of Texas, Mr. BONIOR of Michigan, Mr. COMBEST, Mr. DUNCAN, Mr. FAZIO, Mr. GEKAS, Mr. GORDON, Mr. GRAY of Pennsylvania, Mr. GUNDERSON, Mr. KASTENMEIER, Mr. LEHMAN of California, Mrs. LONG, Mr. MARTINEZ, Mr. STENHOLM, Mr. STUMP, Mr. SUNDQUIST, Mr. TAUKE, Mr. VISCLOSKY, Mr. WEAVER, Mr. WHITTEN, Mr. WILLIAMS, Mr. YOUNG of Alaska, Mr. GILMAN, Mr. COATS, Mr. RALPH M. HALL, Mr. KANJORSKI, Mr. WILSON, Mr. LUJAN, Mr. SHELBY, Mr. BUSTAMANTE, Mrs. MARTIN of Illinois, Mr. MONSON, Mr. PRICE, Mr. BRUCE, Mr. GALLO, Mr. MCDADE, Mr. BROWN of California, Mr. BRYANT, Mr. DE LA GARZA, Mr. DICKINSON, Mr. FRANKLIN, Mr. FUQUA, Mr. GRAY of Illinois, Mr. JACOBS, Mr. NICHOLS, Mr. NIELSON of Utah, Mr. O'BRIEN, Mr. PEASE, Mr. MONTGOMERY, Mr. RAHALL, Mr. MORRISON of Washington, Mr. STAGGERS, Mr. SWEENEY, Mr. REID, Mr. DANIEL, Mr. BARTLETT, Ms. OAKAR, Mr. DINGELL, Mrs.

SMITH of Nebraska, and Mr. MYERS of Indiana.

H. Con. Res. 328: Mr. ROE, Mr. FRANK, Mr. HENRY, and Mr. NOWAK.

H. Res. 388: Mr. PEPPER, Mr. FAZIO, and Mr. DORGAN of North Dakota.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

346. By the SPEAKER: A petition of the Council of the Borough of Brielle, County of Monmouth, NJ, relative to an amendment to the 16th amendment to the Constitution of the United States; to the Committee on the Judiciary.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 1

By Mr. KANJORSKI:

To the amendment in the nature of a substitute to H.R. 1 (Text of H.R. 4746).

—Page 27, after line 9, insert the following:

"(6) In determining the score to be awarded each of the criteria under subparagraphs (A) through (D) of paragraph (1) for applications for grants for urban counties, the Secretary shall compare such applications only with other applications for grants for urban counties.".

Page 27, line 9, strike the quotation mark and final period.

SENATE—*Monday, May 12, 1986*

The Senate met at 12 noon and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Bless the Lord O my soul, and all that is within me, bless His holy name. Bless the Lord O my soul, and forget not all His benefits.—Psalm 103:1-2.

Father in Heaven, we have so much for which to be grateful and we so easily take for granted common blessings. We slept in clean, comfortable beds last night. Many slept on the street. We awakened. Many did not. We were motivated to get out of bed. Many were not. We ate a good breakfast. Many had none. We have responsibility, family, friends, love—many are drifting, lonely, and forgotten. We can see and hear and speak. Many are blind and deaf and have no power of speech. We have so much more than we need of everything all of the time. Many never have enough of anything they need at any time. Loving God, forgive our thoughtless ingratitude—make us aware of those who endure unrelenting pain and keep us compassionate and giving toward all who suffer need. In the name of Him whose unconditional love covers all people. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The able majority leader, Senator DOLE, is recognized.

Mr. DOLE. Mr. President, I thank the distinguished President pro tempore, Senator THURMOND.

SCHEDULE

Mr. DOLE. Mr. President, the Senate will resume consideration of the drug export bill today at 1 o'clock. No rollcall votes will occur during today's session. If rollcall votes are ordered, they will occur sometime tomorrow.

On Tuesday, the Senate will resume consideration of the drug export bill at 10 a.m. There will be an 11 o'clock ceremony honoring Mr. Shcharansky, but that has not been reflected in our schedule. Votes will occur in the afternoon on Tuesday and the Senate could be in session well into the evening tomorrow, in order to make substantial progress on the drug export bill.

On Wednesday, the Senate resumes consideration of the drug export bill at an early hour—I am not certain just what time—depending how late we are in Tuesday evening. And by unanimous-consent agreement entered into last Thursday, final passage of the drug export bill will occur no later than 1 p.m. on Wednesday, May 14.

Following disposition of the drug export bill, it is my hope that we can then turn to S. 2395, the Uniformed Services Retirement Act of 1986—votes could be expected on that—and hopefully complete action on that Wednesday.

SUPERFUND

Mr. DOLE. Mr. President, the Superfund Program technically expired last September 30. Fortunately, the Environmental Protection Agency had sufficient resources to avoid shutting down hazardous waste cleanup operations up until April of this year: And we have provided, on an emergency basis, a special 60-day appropriation to keep the Superfund Program alive through the end of May.

That deadline is fast approaching, particularly in view of the fact that we are scheduled to recess for Memorial Day on May 21. Time is short, and this important legislation already has been put off for too long. I am not criticizing anyone for that—it is a very difficult, very sensitive area, and some of the issues are tough to resolve. Nevertheless, they have to be resolved—and I hope that will be done in an expeditious manner, without the necessity of another extension.

Mr. President, let me say at the outset that the Senate has an outstanding record on Superfund. Our conferees, led by the very able Senator from Vermont [Mr. STAFFORD] and the Senator from New Jersey [Mr. LAUTENBERG] have been working for many months on a possible compromise with our friends from the House of Representatives. And we should not forget that the Senate took the lead in moving to reauthorize Superfund. The Senate bill was approved before last year's September 30 expiration date, while the House did not follow suit until December. For that matter, our efforts on this side of the Capitol to expand and extend the Superfund Program date back to 1984. As Chairman STAFFORD will recall, he and I made a concerted effort at that time to reach agreement between the Finance Committee and the Environment and Public Works Committee on a Superfund bill. We fell a bit short, and it would be better for all concerned had we succeeded then—that is, in 1984.

But reviewing the record will not get the job done now. There are many sticky issues to be resolved before we can send a Superfund bill to the President, and I am prepared to assist in any way I can to reach that goal. The Senate is ready to move: Last week our distinguished assistant majority leader, AL SIMPSON, helped make major strides in moving the conference along. I urge my colleagues in the House to strike a bargain with our conferees. It is difficult enough to bridge the gap between the House and the Senate—without differences among House Members.

This is a matter of great interest. We are talking about spending a great deal of money—billions and billions of dollars. There is no doubt about a strong bipartisan consensus, and with the administration's assistance we believe that this matter can be resolved. So, I would urge my colleagues to do their best and to do it before we recess on May 21. There is a job to do: Let's get on with it.

STRONG CONSENSUS

Mr. President, let no one doubt that there is a strong consensus in the Congress for a strengthened Superfund Program. The administration's proposal for spending $5.3 billion over 5 years is 3½ times the funding level over the past 5 years. The Senate-passed bill provides $7.5 billion over 5 years, and the conference seems prepared to agree on a fund in the range of $8.5 billion. That is a big, big commitment to make to cleaning up hazardous wastes, particularly at a time of severe budget restraint. But we are prepared to do it, Republican and Democrat alike—because we know the severity of the problem, and because our people have told us they want action to reduce the danger of toxic wastes.

Again, I am prepared to assist our conferees in any way to help resolve this matter. I thank my colleagues for their attention.

TAX REFORM

Mr. DOLE. Mr. President, let me finally suggest that it would still be our intention to bring the real tax reform bill to the Senate floor following the Memorial Day recess. That time could be slipped if something should develop. But it would be my hope that we could keep that schedule so that we could clear the decks for appropriation bills and other matters that would be coming before the Senate very quickly.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

Obviously, there will be areas in this very comprehensive tax bill that need to be modified or changed or technical corrections made, and there will be a number of areas that Members will feel strongly about and wish to change. Since the vote in the committee was 20 to 0, every Democrat, every Republican voted to report the bill, I hope that all of us would keep our powder dry before we start choosing up sides on how we are going to make an assault on this provision, or how we are going to make an assault on that provision, or how we are going to add something that is not in the Senate Finance Committee bill. It would seem to me that the chairman, Senator PACKWOOD, and Senator LONG have provided leadership, as have others on the committee. And I think it would be their hope that we would not start getting set in concrete in certain areas until we finally know precisely what the Senate Finance Committee bill contains.

□ 1210

It is my understanding that a summary of the tax bill will be released today by the Senate Finance Committee. After Members have had a chance to view that carefully, I am certain that Senator PACKWOOD, the chairman of the committee, will be happy to discuss—personally or through staff—any area with which any Member might have a problem. And I think I can say the same with respect to the distinguished Senator from Louisiana [Mr. LONG], who will be a major factor in the floor debate.

RECOGNITION OF THE DEMOCRATIC LEADER

The PRESIDING OFFICER (Mr. CHAFEE). Under the previous order, the Democratic leader is recognized.

Mr. BYRD. I thank the Chair.

EDUCATION NEEDS OUR SUPPORT

Mr. BYRD. Mr. President, I have read several newspaper articles lately reporting the results of a new international study of mathematics. These reports indicate that American students lag behind those of most other industrialized nations in math skills. Because of my strong interest in supporting education excellence in America's schools, the appearance of these articles has aroused, once again, my deep concern.

Such reports—based on international data or national data—were common several years ago when "a nation at risk" and the other major studies of the crisis in education were published. But, the focus of attention in the national press lately seems to have shifted to more positive stories reporting the secondary education reform proposals being implemented at the State and local levels around the country. Where such proposals have not been fully implemented, however, the culprit often is the lack of funding—from the State and local levels, and, I will underscore, from the Federal level.

According to the most recent issue, released last week, of the highly regarded "estimates of school statistics, 1985-86" annual report by the National Education Association, Americans raised their spending for public education, grades K through 12, by an estimated $9.1 billion in 1985-86. This represents a growth of roughly 7 percent over spending for last year. But, according to the NEA, this amount is still inadequate because scholarly estimates indicate that comprehensive education reform requires a 20- to 25-percent spending increase.

Also, the report shows that the Federal share of these resources fell, once again. The Federal share for this spending last year—the 1984-85 school year—was a record low for the decade at 6.6 percent of total nationwide spending, but for 1985-86, it has fallen to 6.4 percent. The State share rose to an estimated 50.1 percent for the period, and the local share is at 43.5 percent.

Achieving educational excellence for America's students requires that the Federal Government share the financial responsibility with the States and localities. But, obviously, new Federal funds for education have not been forthcoming in recent years. Sadly, Federal support even for basic education programs has decreased in real terms over the past 5 years.

Unfortunately, these past few years have been a continuous effort to keep the Federal role in education from being emasculated. To say that there has not been support from this administration is an understatement. It has been this administration that has led the fight to cut each and every Federal program geared toward education. It is little wonder then, that the Federal Government has not contributed to any meaningful degree to the very important and necessary education reforms being undertaken nationwide.

Mr. President, the reports of the international math comparisons to which I referred earlier increase my concern over this administration's attitude about the appropriate Federal role in education. The study is the second international mathematics study, a 20-nation survey conducted in 1981-82 of 8th and 12th grade mathematics students. In the survey, U.S. 8th graders received an average score of 48 percent, ranking 12th among 14 industrialized nations. Japan, with an average score of 62 percent, ranked first.

For 12th graders, the survey showed that U.S. students received an average score of 52 percent in algebra and calculus, ranking 12th among 12 industrialized nations.

Japanese students—to their credit and to the credit of the Japanese people's emphasis on education—again ranked first, with an average score of 66 percent.

The results of this study were published last month, in only a most cursory graph form, in the Department of Education's new booklet, "What Works." There were no explanations accompanying the graphs to explain the data base or how the graphs might be best interpreted. On the contrary, there was only the stark presentation of the United States on the low end of the results. This presentation was sure to spark gloomy newspaper headlines—and it did.

Mr. President, it is not my intent here to gloss over the results of the study. The fact that U.S. students scored poorly vis-a-vis other industrialized nations is cause for real concern. I hope such concern is translated into more support for meaningful education assistance at the Federal, State, and local levels.

But, Mr. President, I cannot help but point out the extremely inadequate way—to my thinking—in which the Department of Education chose to publish these results. As I have already pointed out, the results appeared in graph form only, with no explanation whatsoever.

Graphs are a good, clear method for presenting data. But, in and of themselves, they are limited, because the completeness of results that can be pictured in any one graph is limited. For the whole story, one needs either many graphs or explanatory material. Neither was included in the Education Department booklet.

For example, a report issued earlier this month by the Congressional Budget Office, entitled "Trends in Educational Achievement," states:

> (The) recent international assessment of mathematics achievement suggests that select American students—in this case, those taking calculus while in high school—have improved in mathematics. This assessment, carried out in 1981-82 in a national sample of American schools, included testing seniors in calculus and pre-calculus classes together, about 10 percent to 12 percent of seniors. The performance of this group was slightly superior to that of comparable students in a similar international assessment 17 years earlier. . . . This improvement appears to have been far stronger among the students in the calculus classes.

Another important deficiency, I believe, is that the presentation of the study's results in the booklet was not put in context. This study was administered to students in 1981 and 1982. However, those were years just prior to implementation of reforms in high schools in virtually all corners of the Nation.

The Council of Chief State School Officers informs me that these reforms include the following:

Most States increased graduation requirements in 1983-84.

Efforts to enrich the course curriculum, not just require more course work, began occurring nationwide at about the same time.

According to the most recent data, 29 States now require competency tests in mathematics. Another 10 States are considering such requirements. These requirements have been instituted, for the most part, since 1981-82.

Since September 1981, 19 States have raised curriculum requirements, and another 10 States have such reform under consideration.

Since September 1981, 43 States have raised graduation requirements in math and science. Another five have such reform under consideration.

Since September 1981, 15 States have passed initiatives to require an exit test, or graduation examination, in mathematics, and another 4 States are considering such an examination.

Since September 1981, eight States have initiated a test to serve as a criterion for promotion from grade to grade, and another three are considering such a test.

Mr. President, the international study cited by the Department of Education's publication clearly was undertaken prior to some fundamental changes in American secondary education. I believe that understanding this context is important in giving value to the results. This context in no way negates the results of the study. The 1981-82 study is the most recent international comparison and therefore has value. But, because of the subsequent nationwide reforms, one could safely assume that the shelf life of this study is limited.

The readers of the "What Works" booklet should keep this in mind. Unfortunately, they will have to ferret out this information for themselves—the Department of Education provides no assistance.

The Department says its new booklet is geared primarily to the adult with a child—or grandchild, niece, stepchild, neighbor—in school or soon to enter school. The booklet says it was prepared in an attempt to demystify education research and present it to the American people in a way that is useful and understandable.

The Secretary of Education states in the foreword:

> I for one am confident that the American people are ready, willing, and able to improve their schools, and assist their children to learn. The principal contribution that the Federal Government can make is to supply good information to the American people as they embark on this endeaver. Armed with good information, the American people can be trusted to fix their own schools. As this report makes clear, there is also much they can do at home.

I, too, Mr. President, believe strongly that the American people are ready and willing to fix their schools. But, just as I believe in the efficacy of the efforts of American parents, I also believe that government, at all levels, must supply more than just raw information in order to assure a quality system of education in this country. To imply that it is up to the individual parent to assure quality educational opportunity for the children of America, absent the support that only can be provided by government, including the Federal Government, is ludicrous. And, it would be dismissible were it not the view held by this administration.

The fact that, in the most recent international comparisons, U.S. students fared badly vis-a-vis those of other nations greatly disheartens me. That the Department of Education, however, should issue a booklet which not only is incomplete in the information it provides, but also confuses the issue and ignores the responsibility of the Federal Government, is, perhaps, even more disturbing.

When the Senate considered the budget for fiscal 1987, it rejected the administration's budget priorities. We voted to add more funding for math and science programs and to add inflation adjustments to the Federal budget for major education programs. But more needs to be done. I have the very sad feeling that this administration is being extremely penny-wise and pound-foolish in its refusal to help American schools regain the strength and standard of excellence this Nation needs. I hope that the folly of such an approach is soon reversed, for our future national security and economic prosperity depend upon it.

□ 1220

SENATOR HAWKINS' SPECIAL ORDER

The PRESIDING OFFICER. Under the previous order, the Senator from Florida is recognized for not to exceed 5 minutes. It is my understanding that the Senator from Alaska will submit the statement for the Senator from Florida.

The Senator from Alaska.

Mr. STEVENS. Mr. President, as you have stated, I have been asked by the distinguished Senator from Florida to present a statement for her, and this time was set aside for her special order.

I shall read the statement.

The statement is entitled "Bulgaria, a New Ally in the War on Drugs or a Wolf in Sheep's Clothing." This is Mrs. HAWKINS' statement:

BULGARIA: A NEW ALLY IN THE WAR ON DRUGS OR A WOLF IN SHEEP'S CLOTHING

Mrs. HAWKINS. Mr. President, I read with appreciable interest a New York Times story last Tuesday which suggested that "Bulgaria has adopted a more cooperative attitude to American requests for help in the hunt for international narcotics dealers and couriers." The Times said the source of its story was the U.S. Ambassador to Bulgaria, Melvin Levitsky, who was quoted as saying, "We're pleased we're making some progress in terms of cooperation and information sharing."

I will have to be counted as one of the skeptics about a real change in Bulgarian policy toward the United States. A leopard does not easily change its spots. I am afraid that whatever mild gestures of cooperation in the war on drugs the Bulgarians have ladled out to us amount to trying to dress a wolf in sheep's clothing. We must not be deceived; we should not be taken in by these overtures.

One should be skeptical about the deeds and motives of Bulgaria. For one thing, Bulgaria is solidly in the Soviet bloc of nations, is a stalwart member of the Warsaw Pact and can be relied upon to support faithfully the Soviet Union in any of its objectives. Bulgaria is undoubtedly concerned about its international image and standing in the world community. It received a well-deserved black eye for the operations of the KINTEX trading organization which profited from narcotics smuggling and arms trafficking. In this connection Bulgaria showed either extraordinary tolerance toward drug smugglers or outright collusion with them. Bulgaria was also chagrined at Italian court charges of complicity in the assassination attempt on Pope John Paul II. And not the least of Bulgaria's concerns is the criticism it has received from other nations for its reported persecution of the Turkish minority in Bulgaria.

For some time many questions have been raised about some of the things that go on in Bulgaria. For instance, travelers have observed many young people in expensive hotels, lounging in the lobbies and mingling in the public rooms, apparently with little to do and no visible means of livelihood. These youths identify themselves as students of various Bulgarian colleges and universities, although judging from the amount of time they spend hobnobbing they could not be attending classes. It is more likely that they are involved in the drug trade. Western narcotics sources told the New York Times that the capital city of Sofia and Bulgarian seashore resorts frequented by foreigners are places where deals are regularly made for the sale and delivery of heroin and other narcotics from Asia and the Middle East to Western Europe. These sources said that Bulgaria, a country that keeps rather close watch over foreigners, cannot be ignorant of what is going on and must be profiting from narcotics transactions, such as payment in drugs for weapons it supplies to terrorist groups and so-called "liberation" movements.

I am not saying that the Bulgarians are incapable of dealing with democratic nations on a honorable basis. And I am not saying that their professed cooperation in the exchange of drug information is some devious plot, and the minute our backs are turned, they'll pounce on us or do us in somehow.

What I am saying is that given the Bulgarians' track record in international coop-

eration we should be wary. We should examine every facet of what we do and agree to. We should examine the Bulgarians' every overture. We should check, and recheck. We should be prudent. This could well be a situation where it is better to be safe than sorry.

Mr. President, that finishes the special order of the distinguished Senator from Florida.

I thank the Chair.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin is recognized for not to exceed 5 minutes.

WHAT'S WRONG WITH STAR WARS

Mr. PROXMIRE. Mr. President, what's wrong with star wars? Many, many things. First it constitutes a direct deliberate repudiation of an arms control treaty that the United States drafted and then negotiated for many years to secure. In the 1960's the Soviets initiated their star wars system. Our negotiators argued with them that the U.S.S.R. building of star wars would require the United States to greatly step up its accumulation of offensive missiles. We contended that we could and would build whatever number of missiles it would take to overwhelm their antimissile defense. We pointed out that we could do this at a far lower cost than the cost of building defensive systems. For years the Russians disagreed. Finally, they recognized we were right. So they agreed with us. In 1972, President Nixon signed the ABM Treaty—limiting star wars for each superpower to two sites. Then the 174 protocol limited both parties further to one site each. The Senate ratified the treaty by an 89 to 2 vote. Note that margin. The vote to ban star wars was overwhelming. It was bipartisan. It was 89 for. Exactly 2 against. Republicans agreed with Democrats. Conservatives agreed with liberals by a tremendous margin that we should outlaw star wars. Now the President of this country, the country that was champion of the antistar wars treaty has persuaded the Congress to begin the reversal of that 89 to 2 vote and to engage in a buildup that will repudiate the treaty. Was President Nixon wrong in 1972 to sign the ABM Treaty preventing a comprehensive star wars system? Were the 89 Senators who voted for the treaty wrong? Were the two lone Senators who voted against the treaty right? What has changed since 1972? Has there been any transformation in the world of physics and space science that now gives the defense an advantage over the offense in a nuclear confrontation?

The fact is, Mr. President, that nothing basically has changed.

The most competent scientists in this country, independent scientists, agree that star wars will not work. A recent poll of the Nation's physicists disclosed emphatic opposition to star wars based squarely on the belief that it will not work. Every former Secretary of Defense who has taken a position on the issue uniformly and emphatically opposes star wars. Former Secretary of Defense Brown—who is also an eminent physicist calls it an impossible dream. Former Secretary of Defense Schlesinger who served two Republican Presidents has been vigorous in his opposition. Even without adding to their present nuclear force the Soviets' present 10,000 strategic warheads could certainly achieve a 10 percent or 1,000 warhead penetration of the most successful conceivable star wars system. but if only 1 percent or 100 of the U.S.S.R.'s present nuclear arsenal penetrated to strike American cities, there would instantly be between 35 and 55 million dead Americans with tens of millions more terminally ill and with hospital facilities gone. This consequence is the conclusion of a study by the National Academy of Sciences, America's most prestigious scientific organization.

It gets worse. Here's why: star wars won't be deployed this year. It won't be deployed in this decade. It won't be deployed in this century. It won't be deployed before 2010 at the earlest. By then the Soviets would have an entirely different nuclear arsenal.

They would have an enormous array of cruise missiles. Here is a cruise missile, which I hold in my hand, It is small. It looks like a very, very small plane, and it is small compared to the kind of bombers that we had in the past, but this is a devastating weapon, believe me.

The cruise missile would launch from submarines along the thousands of miles of coastline. Those cruise missiles could strike every American city with each warhead of the thousand launched carrying the equivalent of 250,000 tons of TNT. The cruise missiles hug the ground. They carry a map in the brain. They would under fly, I repeat they would under fly any star wars defense. The Soviets would be able to swamp star wars defense with hundreds of thousands of decoys. The Soviets could and would by 2010 in fact adapt the very technology developed for star wars—laser beams, and so forth to overcome it. The basic principle that the advantage lies with the offense would apply as well in 2010 as it always has. The offense picks the time, the place, the intensity of attack. The defense must react under conditions chosen entirely by the offense. It is quite a disadvantage. Even in the one chance in a hundred that we could build an effective star wars defense for a trillion dollars and maintain and modernize it for say $300 billion annually. In time—a month, a year, 3 or 4 years—Soviet technology could find a way to penetrate it.

MYTH OF THE DAY

Mr. PROXMIRE. Mr. President, my myth of the day is that illiteracy is not a serious problem among adult Americans.

The sad, shocking, and embarrassing fact is that as many as 25 million Americans cannot read the warning label on this drug bottle or the help wanted section of this newspaper.

Recently, the Department of Education released the most comprehensive study ever done of illiteracy in our Nation, and found that 13 percent of adults could not show a clear understanding of simple written words and phrases such as "When can you return?" or "Enter your social security number here." Several other reports confirm the shameful pattern described by the Department of Education study. For example, in 1975 a study found that one-half of American adults were unable to proficiently perform everyday tasks such as read a letter from their child's teacher, or write a grocery list.

How many millions of dollars do we pay out in welfare costs and unemployment compensation because individuals cannot follow written instructions for performing a job or read the help wanted ads in seeking employment?

How many industrial accidents or faulty products are a result of workers being unable to understand written instructions?

Mr. President, many of us have traveled to foreign countries where we are not proficient in that nation's native language. How frustrating it is to be unable to read a menu in a restaurant, or follow the written instructions to assemble a simple product. While most illiterate Americans can converse in English, a large number cannot understand or speak English and therefore find themselves helpless in many situations.

We are appalled when we learn that illiterate college athletes are permitted to remain in school so that their athletic skills can bring glory and dollars to their college or university. Pathetically, this abuse is merely the top of the iceberg. With tens of millions of Americans functionally illiterate, we must ask educators and public officials at every level to re-examine the effectiveness of current education and training programs.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

□ 1300

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GORTON). Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business not to extend beyond the hour of 1 p.m., with statements therein limited to 5 minutes each.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

PRESIDENTIAL APPROVALS

A message from the President of the United States announced that he had approved and signed the following enrolled bills and joint resolutions:

On April 18, 1986:

S.J. Res. 136. Joint resolution to authorize and request the President to issue a proclamation designating the calendar week beginning with Sunday, April 13, 1986, as "National Garden Week."

On April 23, 1986:

S.J. Res. 315. Joint resolution designating May 1986 as "Older Americans Month."

On April 24, 1986:

S. 1282. An act to amend the Public Health Service Act to revise and extend the programs of assistance for primary health care.

S.J. Res. 286, Joint resolution to designate the week of April 20, 1986, through April 26, 1986, as "National Reading Is Fun Week."

S.J. Res. 303, Joint resolution to designate April 1986, as "Fair Housing Month".

On May 1, 1986:

S. 1684. An act to declare that the United States holds certain Chilocco Indian School lands in trust for the Kaw, Otoe-Missouria, Pawnee, Ponca, and Tonkawa Indian Tribes of Oklahoma.

S. 2319. An act to provide for the continuation of the Martin Luther King, Jr., Federal Holiday Commission until 1989, and for other purposes.

S.J. Res. 214. Joint resolution providing for reappointment of Carlisle H. Humelsine as a citizen regent of the Board of Regents of the Smithsonian Institution.

S.J. Res. 215. Joint resolution providing for reappointment of William G. Bowen as a citizen regent of the Board of Regents of the Smithsonian Institution.

S.J. Res. 275. Joint resolution designating May 11 through May 17, 1986, as "Jewish Heritage Week."

S.J. Res. 296. Joint resolution to designate October 16, 1986, as "World Food Day."

On May 8, 1986:

S.J. Res. 264. Joint resolution designating April 28, 1986, as "National Nursing Home Residents Day."

MESSAGES FROM THE HOUSE RECEIVED DURING ADJOURNMENT

ENROLLED JOINT RESOLUTIONS SIGNED

Under the authority of the order of the Senate of May 8, 1986, the Secretary of the Senate, on May 9, 1986, during the adjournment of the Senate, received a message from the House of Representatives announcing that the Speaker pro tempore [Mr. WRIGHT] had signed the following enrolled joint resolutions:

S.J. Res. 247. Joint resolution to designate the week of June 1 through June 7, 1986, as "National Theatre Week";

S.J. Res. 267. Joint resolution designating the week of May 26, 1986, through June 1, 1986, as "Older Americans Melanoma/Skin Cancer Detection and Prevention Week";

S.J. Res. 281. Joint resolution to designate the week of May 11 through May 17, 1986, as "Senior Center Week";

S.J. Res. 288. Joint resolution to designate the month of May 1986, as "National Birds of Prey Month";

S.J. Res. 316. Joint resolution prohibiting the sale to Saudi Arabia of certain defense articles and related defense services; and

S.J. Res. 324. Joint resolution to designate the week beginning May 18, 1986, as "National Digestive Diseases Awareness Week".

MESSAGES FROM THE HOUSE

At 12:18 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 4767. An act to deauthorize the project for improvements at Racine Harbor, WI.

ENROLLED BILLS SIGNED

H.R. 737. An act for the relief of Ms. Chang Ai Bae; and

H.R. 1207. An act to award a special gold medal to the family of Harry Chapin.

The enrolled bills were subsequently signed by the President pro tempore [Mr. THURMOND].

At 2:01 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following bills and joint resolution, without amendment:

S. 8. An act to grant a Federal charter to the Vietnam Veterans of America, Inc.;

S. 2308. An act to authorize the President of the United States to award congressional gold medals to Natan (Anatoly) and Avital Shchransky in recognition of their dedication to human rights, and to authorize the Secretary of the Treasury to sell bronze duplicates of those medals; and

S.J. Res. 323. Joint resolution to designate May 21, 1986, as "National Andrei Sakharov Day."

At 2:37 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 4021. An act to extend and improve the Rehabilitation Act of 1973; and

H.R. 4515. An act making urgent supplemental appropriations for the fiscal year ending September 30, 1986, and for other purposes.

ENROLLED BILL SIGNED

The message also announced that the Speaker has signed the following enrolled bill:

S. 2308. An act to authorize the President of the United States to award congressional gold medals to Natan (Anatoly) and Avital Shchransky in recognition of their dedication to human rights, and to authorize the Secretary of the Treasury to sell bronze duplicates of those medals.

The enrolled bill was subsequently signed by the President pro tempore [Mr. THURMOND].

ENROLLED JOINT RESOLUTIONS PRESENTED

The Secretary of the Senate reported that on May 9, 1986, she had presented to the President of the United States the following enrolled joint resolutions:

S.J. Res. 247. Joint resolution to designate the week of June 1 through June 7, 1986, as "National Theatre Week";

S.J. Res. 267. Joint resolution designating the week of May 26, 1986, through June 1, 1986, as "Older Americans Melanoma/Skin Cancer Detection and Prevention Week";

S.J. Res. 281. Joint resolution to designate the week of May 11 through May 17, 1986, as "Senior Center Week";

S.J. Res. 288. Joint resolution to designate the month of May 1986, as "National Birds of Prey Month";

S.J. Res. 316. Joint resolution prohibiting the sale to Saudi Arabia of certain defense articles and related defense services; and

S.J. Res. 324. Joint resolution to designate the week beginning May 18, 1986, as "National Digestive Diseases Awareness Week."

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, May 12, 1986, she had presented to the President of the United States the following enrolled bill:

S. 2308. An act to authorize the President of the United States to award congressional gold medals to Natan (Anatoly) and Avital Shcharansky in recognition of their dedication to human rights, and to authorize the

Secretary of the Treasury to sell bronze duplicates of those medals.

REPORTS OF COMMITTEES SUBMITTED DURING ADJOURNMENT

Under the authority of the order of the Senate of May 8, 1986, the following reports of committees were submitted on May 9, 1986, during the adjournment of the Senate:

By Mr. DANFORTH, from the Committee on Commerce, Science, and Transportation, with an amendment in the nature of a substitute:

S. 2129. A bill to facilitate the ability of organizations to establish risk retention groups, to facilitate the ability of such organizations to purchase liability insurance on a group basis, and for other purposes (with additional and minority views) (Rept. No. 99-294).

EXECUTIVE REPORTS OF COMMITTEES SUBMITTED DURING ADJOURNMENT

Under the authority of the order of the Senate of May 8, 1986, the following executive reports of committees were submitted on May 9, 1986, during the adjournment of the Senate:

By Mr. THURMOND, from the Committee on the Judiciary, without recommendation:

Daniel A. Manion, of Indiana, to be U.S. circuit judge for the seventh circuit.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. COHEN (for himself and Mr. LEVIN):

S. 2433. A bill to amend the Office of Federal Procurement Policy Act to provide a simplified competitive acquisition technique for certain Federal Government procurements; to amend the Federal Property and Administrative Services Act of 1949 to prescribe a preference for the procurement of commercial and commercial-type products to meet the needs of civilian agencies of the Federal Government; and to require a test program to determine the advisability of increasing the threshold amount for requiring certain notice of solicitations; to the Committee on Governmental Affairs.

By Mr. HATCH (for himself, Mr. KENNEDY, Mr. CHAFEE, and Mr. BRADLEY):

S. 2434. A bill to amend the Public Health Service Act to require the Secretary of Health and Human Services to prepare announcements for television on the health risks to women which result from cigarette smoking; to the Committee on Labor and Human Resources.

By Mr. WILSON (for himself and Mr. LAUTENBERG):

S. 2435. A bill to improve international intellectual property protection, to improve foreign market access for United States companies that rely on intellectual property protection, and for other purposes; to the Committee on Finance.

By Mr. STEVENS (by request):

S. 2436. A bill to preserve the rights of the United States as a mortgagee under title XI of the Merchant Marine Act, 1936; to the Committee on Commerce, Science, and Transportation.

By Mr. BENTSEN (for himself and Mr. HEINZ):

S. 2437. A bill to remove foreign policy controls on exports to the Soviet Union of oil and gas equipment and technology; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. HATCH (by request):

S. 2438. A bill to extend and amend programs under the Head Start Act, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. GARN (for himself, Mr. PROXMIRE, Mr. KERRY, Mr. HATCH, Mr. LUGAR, Mr. SARBANES, Mr. STAFFORD, Mr. LEVIN, Mr. CHAFEE, Mr. PELL, Mr. GRASSLEY, Mr. CHILES, Mr. MCCLURE, Mr. SIMON, Mr. NUNN, Mr. MOYNIHAN, Mr. LEAHY, Mr. LAUTENBERG, Mr. BAUCUS, Mr. DECONCINI, Mr. WEICKER, Mr. BOSCHWITZ, Mr. EAGLETON, Mr. BRADLEY, Mr. BENTSEN, Mr. KENNEDY, Mr. JOHNSTON, Mr. GORTON, Mr. CRANSTON, Mr. SYMMS, and Mrs. HAWKINS):

S.J. Res. 341. Joint resolution to designate the week beginning June 1, 1986, as "National Neighborhood Housing Services Week"; to the Committee on the Judiciary.

By Mr. DOLE (for Mrs. HAWKINS) (for herself, Mr. DURENBERGER, Mr. MITCHELL, Mr. ABDNOR, Mr. RIEGLE, Mr. DOLE, Mr. BRADLEY, Mr. SPECTER, Mr. TRIBLE, Mr. LONG, Mr. COCHRAN, Mr. NICKLES, Mr. LUGAR, Mr. NUNN, Mr. HATCH, Mr. HOLLINGS, Mr. KASTEN, Mr. ZORINSKY, Mr. GARN, Mr. KENNEDY, Mr. ANDREWS, and Mr. SIMON):

S.J. Res. 342. Joint resolution to designate May 25, 1986, as "Missing Children Day"; to the Committee on the Judiciary.

By Mr. D'AMATO:

S.J. Res. 343. Joint resolution designating the week of September 21, 1986, through September 27, 1986, as "Emergency Medical Services Week"; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HATCH (for himself, Mr. KENNEDY, Mr. CHAFEE, and Mr. BRADLEY):

S. 2434. A bill to amend the Public Health Service Act to require the Secretary of Health and Human Services to prepare announcements for television on the health risks to women which result from cigarette smoking; to the Committee on Labor and Human Resources.

CIGARETTE SMOKING PUBLIC SERVICE ANNOUNCEMENTS ACT

Mr. HATCH. Mr. President, a famous cigarette commercial tells the women of this country: "You've come a long way baby." Well, Mr. President, they have come a long way—in a deadly direction. In 1986, lung cancer will become the No. 1 cause of cancer death in women. More than 41,000 women will die from lung cancer, and if current trends continue, 1 of every 33 women in this country will succumb to this preventable disease. Yes, preventable—because most of these deaths, more than 30,000 of them, are directly caused by women smoking.

But, cigarette smoking's grim harvest doesn't end there. It is responsible for a number of other diseases besides lung cancer. Cigarette smoking doubles the risk of heart attack, accounting for over 150,000 deaths annually. Smoking also increases the risk of strokes and in fact, has been associated with all forms of vascular disease. Nearly 90 percent of the cases of emphysema and bronchitis are caused by cigarette use.

Women who smoke face special risks, especially during pregnancy. Smoking increases the risk of spontaneous abortion and neonatal deaths. Women who smoke are also more likely to have lower birth weight babies. In addition, women who smoke and are on birth control pills are much more likely to have complications. Most doctors recommend that women who smoke not use birth control pills.

If all that isn't bad enough, it's now becoming clear that smoking also presents risk to others. When parents smoke in the home, a child is more likely to have asthma, bronchitis, pneumonia, and strep throats. Many children have their asthma cured if the parents simply quit smoking. It is especially important that the parents not smoke during the first few months of life, while a child's lung are developing most rapidly.

Studies are now proving there is no safe level of exposure to cigarettes. That exposure to as few as two cigarettes a day can increase our risk of premature death.

We have made progress in our battle against cigarettes, but not enough. The good news is that per capita cigarette consumption has fallen to its lowest point since 1944 and the number of people who have quit smoking has doubled over the last 20 years. In the last 10 years the number of male adult smokers has fallen by 9 percent, from 42 percent of the population to 33 percent. The bad news is that we have only seen a 4-percent decrease for women over the same time.

The Federal Trade Commission has found that less than 50 percent of women are aware of the health risk of smoking during pregnancy.

Mr. President, the cigarette companies are spending an extraordinary amount of money advertising and developing brands of cigarettes aimed directly at women. Somehow, women have to hear the other side. We have to make sure women know that they face the same risks from smoking that men do, but also face special risks just because they are women.

To make sure that women hear both sides of the story, today I am introduc-

ing legislation to provide $1 million for public service announcements to inform women of the special health risks they face related to cigarette smoking. This money will come from the National Institute of Drug and Alcohol Abuse budget and the programs will be developed in consultation with the Office on Smoking and Health. This is a small investment compared to the estimated $38 to $95 billion that smoking drains from our economy each year.

I hope my colleagues will join with me and support this effort to inform women about the health risk of smoking so that the next time we say, "you've come a long way baby," we will mean a long way toward better health—not the morgue.

Mr. President, I ask unanimous consent that the text of the bill appear in its entirety following my remarks.

There being no objection, the bill was ordered to be printed in the Record, as follows:

S. 2434

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Cigarette Smoking Public Service Announcements Act of 1986".

FINDINGS

SEC. 2. The Congress finds that—

(1) many cigarette manufacturers have produced brands of cigarettes and cigarette advertising specifically directed toward women;

(2) lung cancer caused by cigarette smoking is the leading cause of death from cancer among women;

(3) if current trends continue, more than one out of every thirty-three women will die from lung cancer caused by cigarette smoking;

(4) cigarette smoking results in special health risks for women taking birth control pills; and

(5) cigarette smoking by pregnant women results in health risks for their unborn children.

PREPARATION OF PUBLIC SERVICE ANNOUNCEMENTS

SEC. 3. Section 503 of the Public Health Service Act is amended by adding at the end thereof the following new subsection:

"(e)(1) The Secretary, acting through the Institute and in consultation with the Director of the Office on Smoking and Health, shall prepare for distribution announcements for television to educate the public, particularly women, concerning the dangers resulting from cigarette smoking by women. In the preparation of such announcements, the Secretary shall, to the extent feasible, use appropriate private organizations and business concerns.

"(2) Of the amount appropriated under section 517 for any fiscal year, $1,000,000 shall be available to carry out paragraph (1) for such fiscal year.".

(b) Section 517 of such Act is amended by inserting "section 503(e) and" before "this subpart".

● Mr. BRADLEY. Mr. President, tobacco is the single biggest health hazard facing this country. We all know that the costs of tobacco, in terms of dollars and lives, are large, but we are now beginning to realize the special consequences of smoking for women. Thirty years ago, lung cancer was considered a man's disease, but smoking is now taking its toll on women. This year, lung cancer surpassed breast cancer as the leading cancer killer. If current trends continue, more than 1 out of 33 women will die from lung cancer caused by cigarette smoking.

And the risks do not end with cancer, Mr. President. Cigarette smoking has special health consequences for women. Women who smoke are 25 percent less fertile than nonsmokers. And a smoker's chance of miscarriage is vastly greater than for a nonsmoker. In addition, the newborns of smokers have a higher incidence of low birth weight, which is associated with a variety of serious medical problems.

Mr. President, in an effort to increase sales, tobacco manufacturers are increasingly targeting their cigarette ads to women. And they are succeeding. In the 1950's over half of men and less than a quarter of women were smokers. Now, about a third of both men and women smoke. I guess this is what the tobacco manufacturers mean when they say "You have come a long way, baby."

To counter these trends, we need to do whatever we can at the Federal level to dissuade people from smoking. And that is why I recently introduced legislation to deny tobacco manufacturers their tax deduction for tobacco advertising. But in addition to this, we need to educate women to the vary real dangers of smoking.

And it is to this end, Mr. President, that I join with my colleague from Utah [Mr. HATCH] in introducing the Cigarette Smoking Public Service Announcements Act of 1986. This bill directs the Secretary of HHS to develop public service announcements to be shown on television that address the unique health risks faced by women who smoke. Women need to realize the dangers of smoking—for themselves and their children.

Thirty years ago, the debate was over whether tobacco consumption represented a serious health hazard. Today, everyone agrees—everyone, that is, except the tobacco manufacturers—that tobacco is a killer. The debate has turned to how to further discourage the use of tobacco. This bill is one small step in that direction.●

● Mr. KENNEDY. Mr. President, I wish to introduce the Cigarette Smoking Public Service Announcement Act of 1986.

Cigarette smoking has been determined by the Surgeon General to be the most preventable cause of disease and death in the United States. It is the major cause of lung cancer and is associated with heart disease, periferal vascular disease, chronic bronchitis, emphysema and cancers of the oral cavity, esophagus, pancreas, and bladder. Each year over 300,000 Americans die of smoking related deaths and societal costs have been estimated to exceed $65 billion for health care expenses and lost productivity.

Subsequent to the Surgeon General's Report on Smoking and Health in 1964, a major decline in cigarette smoking has been seen. This report effectively promoted many successful prevention programs and catalyzed efforts to mandate warning labels and to limit broadcast advertising. A close look at this decline, however, shows a startling disparity between the smoking habits of men and women. While the percentage of regular adult male smokers has dropped from 50 to 33 percent. Females have only shown a modest decrease of 33 to 28 percent. Furthermore, in the 20- to 24-year-old female population smoking has actually increased in recent years and equals that of similarly aged males, 38 percent.

This disturbing trend of smoking in females—especially young women—is of particular importance. Lung cancer has now replaced breast cancer as the leading cause of cancer death in women, certainly a dubious distinction. In addition, apart from the diseases previously noted, cigarette smoking during pregnancy is associated with retarded fetal growth and an increased risk for spontaneous abortion and prenatal death. Even slight impairment of growth and development in childhood has been noted. Finally, use of the birth control pill can intensify certain smoking related health risks.

In view of the above, it is important to target women in media efforts to educate the public concerning the health hazards of smoking. The legislation introduced today recognizes this and can play a significant role in reducing smoking among women, especially pregnant women. I urge my colleagues to support us in this vital effort.●

By Mr. WILSON (for himself and Mr. LAUTENBERG):

S. 2435. A bill to improve international intellectual property protection, to improve foreign market access for U.S. companies that rely on intellectual property protection, and for other purposes; to the Committee on Finance.

INTERNATIONAL INTELLECTUAL PROPERTY AND MARKET ACCESS ACT

● Mr. WILSON. Mr. President, there appears to be a consensus that the three greatest national economic problems we are facing are the budget deficit, the trade deficit, and an unwieldy and unworkable tax system. It is therefore not surprising that each of these matters have recently been, or

soon will be, addressed by both Houses of the Congress.

This week, the Finance Committee begins a series of hearings on what Congress might do to counter the unfair practices of foreign countries with which we engage in trade—our so-called trading partners.

The focus of these hearings is on the bipartisan omnibus trade bill that was introduced last year. I am proud to be an original cosponsor of that bill, for it is primarily aimed toward creating expanded market opportunities for U.S. companies with goods and services to sell.

I am pleased that the committee is devoting one of its hearings to the problems of intellectual property protection and market access. S. 1860 contains a title specifically directed toward one aspect of the problem: The importation into the United States of goods that infringe the rights of domestic patent holders. While this title, separately introduced as S. 1869, is urgently needed—indeed, the administration included a similar provision in its recent intellectual property proposal—we ultimately need to provide a comprehensive approach to the problems faced by holders of intellectual property rights.

For this reason, I am introducing the International Intellectual Property Protection and Market Access Act of 1986. Using a little poetic license, I refer to it as the IPMA.

Mr. President, we can no longer allow foreign interests to unfairly undermine the ability of U.S. companies to do business both here and abroad. Through a combination of intellectual property piracy and protectionism, we are losing billions of dollars per year to foreign charlatans and thieves.

In the area of intellectual property protection, plainly stated, criminals around the world are costing American companies billions of dollars by cranking out millions of unauthorized copies of U.S. records and tapes, movies, books, toys, computer programs, as well as by expropriating patents and process patents, developed at great expense by U.S. companies, to make bootleg pharmaceuticals and chemicals.

What makes this illegal activity all the more outrageous is that it is often protected by governments we consider friendly to the United States. Indeed, in many cases we have provided special trade benefits in order to help them develop their economies.

Private and U.S. governmental studies have estimated that the cost of piracy to U.S. industries this year will exceed $3 billion, and perhaps be as high as $20 billion. That is somewhere between 2 percent and 13 percent of last years trade deficit.

Officially protected piracy is as much an unfair trading practice as are foreign subsidies and closed markets. Indeed, it is of little help to a U.S. company if it is granted access to a market to sell its copyrighted, patented, or trademarked goods, but then finds that the host government is allowing a flourishing market in illegal copies. Of course the pirated goods will be sold for less, for there is no need to make payments to an artist, designer, or scientist, or the company that paid for its original production and promotion.

With this in mind, last year with the majority leader, I traveled to two of the world's piracy centers. With a justified lack of tact, I told a meeting of the Taiwanese cabinet that it had the dubious distinction of being one of the piracy capitals of the world. They responded that they are trying to clean up their act, and preliminary reports suggest that they are—if a bit slowly.

Korea has not done so well. As a result, 11 of my Senate colleagues joined me in calling on United States Trade Representative Clayton Yeutter to end certain trade benefits to Korea unless it makes significant progress by the end of this year. Korea also has pending against it an administration-initiated action, brought under section 301 of the Trade Act of 1974, for its lack of intellectual property protection. And, if it does not greatly change the present system, it will likely lose its GSP designation, either by administration action under the GSP law—or, if necessary, by the Congress.

Unfortunately, these two countries represent only the proverbial tip of the iceberg. Singapore, Indonesia, Brazil, and others have booming piracy businesses, often with the involvement of present and former government officials that makes Tammany Hall look like a class picnic.

As I learned at a recent hearing of the Joint Economic Committee Subcommittee on Trade, Productivity, and Growth which I chaired in Los Angeles, Panama has allowed a company headed by former senior government officials to use intercepted United States television shows on its cable system. And even our friends to the north allow retransmission of U.S. TV signals without compensation to U.S. copyright holders.

I find it more than ironic that while Canada invokes the nonsensical phrase "cultural sovereignty" to force divestiture of United States printing interests and to prevent other United States businesses from operating within its borders, it condones the theft of our television shows for the benefit of Canadian audiences. The bottom line seems to be that the Canadians will admit our culture across its borders as long as they do not have to pay for it.

Mr. President, while the theft of broadcast signals by the Canadians is evidence of its disdain for the rights of copyright holders, its investment policies are an impediment to the marketing efforts of our industries that depend on intellectual property protection. And in this arena of unfair trading practices, Canada is not alone.

Not all forms of intellectual property are excluded by countries simply because they constitute intellectual property. For example, trademarked personal computers are not excluded from Korea because they are trademarked, but because Korea excludes all personal computers. However, Korea and other countries around the world do place unreasonable nontariff barriers around their markets designed to exclude such items as movies, books, records, patent drugs, and chemicals. The barriers come in various forms, from mandatory licensing agreements, royalty ceilings, joint production requirements, to straight quotas.

Mr. President, my bill would address the broad array of problems faced by companies that depend on intellectual property protection: From semiconductor manufacturers to book publishers, from chemical producers to filmmakers, and from pharmaceutical companies to recording artists.

While I will include at the end of my statement a full section-by-section analysis of my bill, I want to briefly outline what it contains.

Title I addresses the problems of intellectual property protection and title II is designed to aid the export of copyrighted and trademarked goods. Each establishes a similar mechanism designed first to identify priority problems. Negotiations with offending countries are then required. Finally, if after 2 years a settlement cannot be reached, the President is required to take retaliatory action.

Title III and title IV augment existing provisions aimed at intellectual property protection and market access contained in the Generalized System of Preferences and Caribbean Basin Initiative laws. Presently, the President must consider piracy and market access when deciding whether or not to designate a county as eligible for benefits under these concessionary trade laws. There is no mandate for him to revoke benefits. Furthermore, under CBI, the law only allows the President to revoke all benefits from offending countries; He is not given the ability to dole out punishments that are proportionate to the offense, thereby making sanctions less likely. While some countries are deserving of total removal from CBI, this bill would allow for less than complete termination of benefits for others depending on the severity of their actions. And for both CBI and GSP, the bill requires a cut in benefits.

Title V establishes a new Office of Enforcement within the Office of the U.S. Trade Representative. This office

is charged with coordinating our negotiating and retaliation initiatives taken pursuant to section 301 of the Trade Act of 1974 and the provisions of this bill.

Finally, in order to provide a comprehensive approach to the trade problems surrounding intellectual property, title VI incorporates changes to section 337 of the Tariff Act of 1930 as contained in S. 1869, which was introduced by Senator LAUTENBERG, Senator ROTH, myself, and others.

Mr. President, I ask unanimous consent that the text of the bill, and the accompanying section-by-section analysis, be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2435

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This act may be cited as the "International Intellectual Property Protection and Market Access Act of 1986."

SEC. 2. FINDINGS AND PURPOSES.

(a) FINDINGS.—The Congress finds that—

(1) international protection of intellectual property rights is vital to the international competitiveness of the United States and the lack of such protection and enforcement leads to trade distortions and loss of export markets;

(2) United States companies that rely on intellectual property protection are among the most advanced and competitive in the world;

(3) claims by foreign countries of "cultural sovereignty" are wholly inadequate to justify restrictions on trade;

(4) existing international agreements and institutions established to protect intellectual property rights and promote open international trade do not adequately protect the interests of the United States; and

(5) foreign barriers, including restrictions and conditions on investment, licensing, and various other regulatory restrictions on business operations, seriously impede the ability of United States companies that rely on intellectual property protection to operate overseas thereby harming the economic interests of the United States.

(b) PURPOSES.—The purposes of the Act are—

(1) to recognize that adequate protection of intellectual property, and fair and equitable market access for United States companies that rely on intellectual property protection, are major elements of United States foreign economic policy that have significant commercial importance;

(2) to provide for the development, with appropriate consultations, of an overall strategy to improve the protection of United States intellectual property abroad, and to foster open international markets for United States companies that rely on intellectual property protection, which will include continued and strengthened unilateral, bilateral, and multilateral efforts and will use all appropriate instruments to achieve the objectives set forth in this Act;

(3) to recognize the importance of using all appropriate multilateral institutions to improve the substantive norms and standards for intellectual property protection;

(4) to foster adequate and effective protection of intellectual property rights of United States persons; and

(5) to eliminate the broad array of unfair and discriminatory foreign trade practices now imposed on United States companies that rely on intellectual property protection.

TITLE I—ACTIONS TO INCREASE INTERNATIONAL INTELLECTUAL PROPERTY PROTECTION

SECTION 101. INVESTIGATIONS AND FINDINGS.

(a) ANALYSIS OF BARRIERS AND EXTENT OF MARKET ACCESS.—The Trade Representative shall, within three months after issuing the annual report to Congress made pursuant to section 181 of the Trade Act of 1974, publish in the *Federal Register*—

(1) a list of all foreign countries and instrumentalities, based upon the identification and analysis of foreign trade barriers conducted pursuant to section 181, that deny adequate and effective protection of intellectual property rights to United States persons; and

(2) a list of those countries listed pursuant to paragraph (1) that are identified by the Trade Representative as priority foreign countries.

(b) In making the identification of priority foreign countries under subsection (a), the Trade Representative shall take into account the following—

(1) the identification and analysis of acts, policies, and practices which constitute denial of adequate and effective intellectual property protection, and the estimate of the trade-distorting impact on United States commerce of such acts, policies, or practices contained in the annual report required under section 181 of the Trade Act of 1974;

(2) the potential size of markets for the relevant United States products and services; and

(3) the onerous nature and significance of acts, policies, or practices that deny fair and equitable market access to United States companies that rely upon intellectual property protection.

SECTION 102. NEGOTIATIONS TO ESTABLISH ADEQUATE AND EFFECTIVE PROTECTION OF INTELLECTUAL PROPERTY RIGHTS.

(a) INITIATION OF NEGOTIATIONS.—Upon identification of priority foreign countries under section 101(a), the President shall enter into negotiations with such priority foreign countries to establish adequate and effective protection of intellectual property rights for United States persons in those priority foreign countries.

(b) ADDITIONAL AUTHORITY.—Whenever the President determines that any existing intellectual property protections of any foreign country are inadequate and adversely affect the international competitiveness of United States persons and that the purposes of this Chapter will be promoted thereby, the President after enactment of this Act may enter into agreements with foreign countries or instrumentalities to provide for the harmonization, reduction, elimination or prohibition of restrictions, barriers, fees or other distortions of international trade and which provide adequate and effective protection of intellectual property.

(c) APPLICATION OF AGREEMENT BENEFIT.—Notwithstanding any other provision of law, any agreement entered into under this section may provide that the benefits and obligations of such agreement apply solely to the parties to such agreement. The President shall take into account any actions which may be necessary to reconcile such treatment with United States international obligations.

(d) COMPENSATION AUTHORITY.—If the President has taken action under section 103 with respect to any foreign country, the President may enter into trade agreements with such foreign country for the purpose of granting new concessions as compensation for such actions taken by the President in order to maintain the general level of reciprocal and mutually advantageous concessions.

(e) NEGOTIATING OBJECTIVES.—The objectives of negotiations conducted pursuant to subsections (a) and (ab) shall be—

(1) to improve the protection of intellectual property by trading partners of the United States;

(2) to develop internationally agreed rules, including dispute settlement procedures, which:

(A) are consistent with the commercial and intellectual property policies of the United States;

(B) will supplement, if necessary, the rules and approaches already found in the appropriate international intellectual property conventions; and

(C) will improve the protection afforded to U.S. intellectual property abroad; and

(3) to press for early conclusion of the Anti-Counterfeiting Code on trademarks and for concurrent development and enforcement of substantive norms and standards for the protection of all forms of intellectual property.

(f) EXCLUSION FROM NEGOTIATIONS.—Upon consultation with interested United States persons, the President may exclude a country from negotiations under subsection (a) and from the remedial provisions under section 103 upon a finding, to be published in the *Federal Register*, that such negotiations would be unlikely to significantly advance, or would be detrimental to, the economic interests of the United States.

(g) Any agreement entered into under this section must be submitted to the Congress for approval.

SECTION 103. REMEDIES

(a) If the United States is unable to enter into an agreement, pursuant to negotiations conducted according to section 102, with any priority foreign country, the President shall enter into consultations as required under section 104(b) and take no later than two years after designation of such priority foreign country, including but not limited to, any of the following actions to fully achieve the objectives of this Act:

(1) terminate, withdraw, or suspend any portion of any trade agreement entered into with such foreign country or instrumentality under—

(A) the Trade Act of 1974;

(B) section 201 of the Trade Expansion Act of 1962; or

(C) section 350 of the Tariff Act of 1930;

(2) proclaim an increase in, or the imposition of, any duty on any article imported from such foreign country or instrumentality;

(3) proclaim a tariff-rate quota on any article imported from such foreign country or instrumentality;

(4) proclaim the modification or imposition of any quantitative restriction on the importation of any article from such foreign country or instrumentality;

(5) suspend, in whole or in part, benefits accorded articles from such foreign countries or instrumentalities under title V of

the Trade Act of 1974 (19 U.S.C. 2461, et seq.); and

(6) take any other action pursuant to subsection (b) or (c) of section 301 of the Trade Act of 1974 with respect to any product or service of such foreign country or instrumentality.

(b) The President may exercise his authority under this section on a non-discriminatory basis or solely against the foreign country or instrumentality involved.

(c) In implementing this section, the President shall impose trade measures described in subsection (a) that have an economic impact substantially equivalent to the lost revenues of United States companies resulting from the lack of adequate and effective intellectual property protection in the foreign country or instrumentality in question.

(d) In implementing this section, the President may defer action for six months upon providing written certification to the Congress that negotiations are making substantial progress.

SECTION 104. CONSULTATIONS.

CONSULTATIONS WITH CONGRESS AND THE PRIVATE SECTOR.—For purposes of conducting negotiations under section 102, and determining the appropriate actions to be taken under section 103, the President shall provide an opportunity for the presentation of views by interested parties, including interested members of Congress, appropriate committees of the Congress, and the committees established pursuant to section 135 of the Trade Act of 1974, and shall keep such parties currently informed with respect to—

(1) the negotiating priorities and objectives for each country involved;

(2) the assessment of negotiating prospects, both bilateral and multilateral; and

(3) any United States concessions which might be included in negotiations to achieve the objectives described in section 102.

SECTION 105. DEFINITION.

"Adequate and effective protection of intellectual property" means that a country provides adequate and effective means under its law for foreign persons to secure, to exercise and to enforce exclusive rights in all forms of intellectual property, including patents, trademarks, copyrights, mask works, trade secrets and proprietary technical data.

TITLE II—ACTIONS TO OPEN FOREIGN MARKETS

SECTION 201. INVESTIGATIONS AND FINDINGS.

(a) ANALYSIS OF BARRIERS AND EXTENT OF MARKET ACCESS.—

The Trade Representative shall, within three months after issuing the annual report to Congress made pursuant to section 181 of the Trade Act of 1974, publish in the *Federal Register*—

(1) a list of all foreign countries and instrumentalities, based upon the identification and analysis of foreign trade barriers conducted pursuant to section 181, that deny fair and equitable market access to United States companies that rely on intellectual property protection; and

(2) a list of those countries listed pursuant to paragraph (1) that are identified by the Trade Representative as priority foreign countries.

(b) In making the indentification of priority foreign countries under subsection (a) the Trade Representative shall take into account the following—

(1) the identification and analysis of acts, policies, and practices which constitute significant barriers to, or distortion of, United States property protected by patents and copyrights exported or licensed by United States persons, and the estimate of the trade-distorting impact on United States commerce of such acts, policies, or practices contained in the annual report required under section 181 of the Trade Act of 1974;

(2) the potential size of markets for United States companies that rely on intellectual property protection; and

(3) the onerous nature and significance of acts, policies, or practices that deny fair and equitable market access to United States companies that rely on intellectual property protection.

(b) FACTORS TO BE TAKEN INTO ACCOUNT.—In making the findings required by subsection (a), the United States Trade Representative shall take into account the following factors—

(1) whether such foreign countries or instrumentalities place any restrictions or conditions upon investments by, or the establishment of, United States companies that rely upon intellectual property protection in their territories;

(2) whether such foreign countries or instrumentalities place licensing or certification restrictions upon United States companies that rely upon intellectual property protection, that inhibit the ability of these companies to function freely in the markets of those countries; and

(3) whether United States companies that rely upon intellectual property protection suffer from discriminatory or monopolistic practices of the private companies or other organizations of such foreign countries or instrumentalities.

SECTION 202. NEGOTIATIONS TO OPEN FOREIGN MARKETS.

(a) INITIATION OF NEGOTIATIONS.—Upon identification of priority foreign countries under section 201(a), the President shall enter into negotiations with such priority foreign countries in order to enter into agreements with such countries setting specific terms to provide United States companies that rely upon intellectual property protection with fair and equitable market access in such countries.

(b) ADDITIONAL AUTHORITY.—Beginning on the date of the enactment of this Act, the President may enter into trade agreements which meet the objectives described in this section with foreign countries or instrumentalities which provide for the harmonization, reduction, and elimination or prohibition of restrictions, barriers, fees, or other distortions of international trade.

(c) APPLICATION OF AGREEMENT BENEFIT.—Notwithstanding any other provision of law, any agreement entered into under this section may provide that the benefits and obligations of such agreement apply solely to the parties to such agreement. The President shall take into account any actions which may be necessary to reconcile such treatment with United States international obligations.

(d) COMPENSATION AUTHORITY.—If the President has taken action under section 203 with respect to any foreign country, the President may enter into trade agreements with such foreign country for the purpose of granting new concessions as compensation for such actions taken by the President in order to maintain the general level of reciprocal and mutually advantageous concessions.

(e) NEGOTIATING OBJECTIVES.—The general objectives of negotiations conducted pursuant to subsection (a) shall be—

(1) to obtain multilateral or bilateral agreements that provide to United States companies that rely upon intellectual property protection fair and equitable market access in all substantial foreign markets; and

(2) to prevent foreign barriers and restrictions on United States companies that rely upon intellectual property protection from causing continued harm to those companies.

(f) EXCLUSION FROM NEGOTIATIONS.—Upon consultation with interested United States companies, the Trade Representative may exclude a specific sector and/or country from negotiations under subsection (a) and from the remedial provisions under section 203 upon a finding, to be published in the *Federal Register*, that such negotiations would be detrimental to the interests of United States companies that rely upon intellectual property protection.

(g) Any agreement entered into under this section must be submitted to the Congress for approval.

SECTION 203. REMEDIES.

(a) If the United States Trade Representative is unable to enter into an agreement, pursuant to negotiations conducted according to section 202, with any priority foreign country, the President shall take no later than two years after designation of such priority foreign country, including but not limited to, any of the following actions to fully achieve the objectives of this Act:

(1) terminate, withdraw, or suspend any portion of any trade agreement entered into with such foreign country or instrumentality under—

(A) the Trade Act of 1974;

(B) section 201 of the Trade Expansion Act of 1962; or

(C) section 350 of the Tariff Act of 1930;

(2) proclaim an increase in, or the imposition of, any duty on any article imported from such foreign country or instrumentality;

(3) proclaim a tariff-rate quota on any article imported from such foreign country or instrumentality;

(4) proclaim the modification or imposition of any quantitative restriction on the importation of any article from such foreign country or instrumentality;

(5) suspend, in whole or in part, benefits accorded articles from such foreign countries or instrumentalities under title V of the Trade Act of 1974 (19 U.S.C. 2461, et seq.);

(6) take any other action pursuant to subsection (b) or (c) of section 301 of the Trade Act of 1974 with respect to any product or service of such foreign country or instrumentality;

(b) The President may exercise his authority under this section on a non-discriminatory basis or solely against the foreign country or instrumentality involved.

(c) In implementing this section, the President shall impose trade measures described in subsection (a) that have an economic impact substantially equivalent to the lost revenues of United States companies that rely upon intellectual property protection caused by the lack of fair and equitable market access in the foreign country or instrumentality in question.

(d) In implementing this section, the President may defer action for six months upon providing written certification to the Congress that negotiations with the country in question are making substantial progress.

SECTION 204. CONSULTATIONS.

CONSULTATIONS WITH CONGRESS AND THE PRIVATE SECTOR.—For purposes of conducting negotiations under section 202, and determining the appropriate actions to be taken under section 203, the President shall provide an opportunity for the presentation of views by interested parties, including interested members of Congress, appropriate committees of the Congress, and the committees established pursuant to section 135 of the Trade Act of 1974, and shall keep such parties currently informed with respect to—

(1) the negotiating priorities and objectives for each country involved;

(2) the assessment of negotiating prospects, both bilateral and multilateral; and

(3) any United States concessions which might be included in negotiations to achieve the objectives described in section 202.

SECTION 205. DEFINITION.

In general, "companies that rely upon intellectual property protection" are defined as companies, or divisions or subsidiaries of companies, whose principal line of business involves creation, production or licensing of literary or artistic works which are copyrighted or which manufacture products that are patented or for which there are process patents.

TITLE III—GENERALIZED SYSTEM OF PREFERENCES

SECTION 301. Section 502 of the Trade Act of 1974, as amended, is amended by adding at the end thereof the following new subsection:

"(e) No later than twelve months after enactment of this subsection, the President shall terminate benefits previously extended to a beneficiary developing country under this section if such country is identified in the 1985 Report to Congress pursuant to section 181 of the Trade Act of 1974 as having adequate protection of intellectual property or inadequate market access unless the President certifies to the Congress, and continues to certify at twelve month intervals, that such country has taken substantial action toward providing adequate and effective intellectual property protection and enforcement and fair and equitable market access for United States persons.".

SECTION 302. Subsection (c) of section 503 of the Trade Act of 1974 is amended by adding at the end thereof the following new paragraph:

"(3) the President may not designate as, or shall remove from designation, any eligible article under this section which has been determined by any Federal or State court or Federal agency of appropriate jurisdiction to infringe any patent, copyright, trademark, mask work or trade secret interest.".

TITLE IV—CARIBBEAN BASIN ECONOMIC RECOVERY ACT

SECTION 401. The Caribbean Basin Economic Recovery Act is amended—

(a) by designating section 218 (19 U.S.C. 2706) as section 219 (19 U.S.C. 2707); and

(b) by inserting the following new section (19 U.S.C. 2706):

"SECTION 218. MARKET ACCESS AND INTELLECTUAL PROPERTY PROTECTION.

"(a) The Trade Representative shall exclude from eligibility articles which would otherwise be eligible under this chapter, imported from beneficiary countries that do not provide adequate and effective intellectual property protection or fair and equitable market access to United States persons, unless the President certifies to the Congress, and continues to certify at twelve month intervals, that such country has taken substantial action to provide adequate and effective intellectual property protection and enforcement and fair and equitable market access for United States persons.

"(b) The value of benefits withdrawn by the Trade Representative under subsection (a) shall have an economic impact substantially equivalent to the lost revenues of United States persons resulting from the denial of adequate and effective intellectual property protection or fair and equitable market access.".

TITLE V—IMPROVEMENT OF ENFORCEMENT OF UNITED STATES RIGHTS

SECTION 501. ESTABLISHMENT OF ENFORCEMENT OFFICE.

An Office of Enforcement shall be established within the Office of the United States Trade Representative to administer section 301 of the Trade Act of 1974 and the provisions of this Act.

SECTION 502. AUTHORIZATION FOR ENFORCEMENT OFFICE.

Such funds necessary for the operation of the Office of Enforcement are authorized to be appropriated by the Congress as are necessary to carry out the purposes of this Act.

TITLE VI—UNFAIR PRACTICES IN IMPORT TRADE

SEC. 601. Subsection (a) of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337), is amended—

(a) by striking out "(a) Unfair" and inserting in lieu thereof "(a)(1) Unfair",

(b) by striking out "efficiently and economically operated",

(c) by striking out "prevent" and inserting in lieu thereof "impair or prevent", and

(d) by adding at the end thereof the following new paragraph:

"(2) For purposes of this section, the following acts in the importation of articles into the United States or in their sale are declared to be unfair and to have the effect or tendency to destroy or substantially injure an industry or to impair the establishment of an industry:

"(A) Unauthorized importation of an article which infringes a valid United States patent or the unauthorized sale of such an imported article.

"(B) Unauthorized importation of an article which—

"(i) was made, produced, processed, or mined under, or by means of, a process covered by a valid United States patent, and

"(ii) if made, produced, processed, or mined in the United States, would infringe a valid United States patent,

or the unauthorized sale of such an imported article.

"(C) Unauthorized importation of an article which infringes a valid United States copyright or the unauthorized sale of such an imported article.

"(D) Importation of an article which infringes a valid United States trademark, or the sale of such an imported article, if the manufacture or production of such imported article was unauthorized.

"(E) Unauthorized importation of an article which infringes a valid United States maskwork or the unauthorized sale of such an imported article.

"(F) Unauthorized importation of an article which infringes a valid trade secret in the United States or the unauthorized sale of such an imported article.".

SEC. 602. Section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) is amended—

(a) by striking out "subsection (d) or (e)" in subsection (c) and inserting in lieu thereof "subsection (d), (e), (f), or (g)",

(b) by striking out "subsection (d), (e), or (f)" in subsection (c) and inserting in lieu thereof "subsection (d), (e), (f), (g), or (h)",

(c) by striking out "subsections (d), (e), and (f)" in subsection (c) and inserting in lieu thereof "subsection (d), (e), (f), (g), or (h)",

(d) by striking out "If" in the first sentence of subsection (e) and inserting in lieu thereof "(1) If",

(e) by adding at the end of subsection (e) the following new paragraph:

"(2) Any person may petition the Commission for the issuance of an order under this subsection. The Commission shall make a determination with regard to such petition by no later than the date that is 90 days after the date that on which such petition is filed with the Commission. The Commission may require the petitioner to post a bond as a prerequisite to the issuance of an order under this subsection.",

(f) by striking out "In lieu of" in subsection (f)(1) and inserting in lieu thereof "In addition to, or in lieu of,",

(g) by inserting "twice" after "of $10,000 or" in subsection (f)(2),

(h) by redesignating subsections (g), (h), (i), and (j) as subsections (i), (j), (k), and (l), respectively,

(i) by inserting after subsection (f) the following new subsections:

"(g) FORFEITURE.—In addition to taking action under subsection (d) or (e), the Commission may issue an order providing that an article imported in violation of the provisions of this section be seized and forfeited to the United States. The Commission shall notify the Secretary of the Treasury of any order issued under this subsection and, upon receipt of such notice, the Secretary shall enforce such order in accordance with the provisions of this Act.

"(h) DEFAULT.—If—

"(1) a complaint is filed against a person under this section,

"(2) such complaint and a notice of investigation are served on such person,

"(3) such person fails to respond to the complaint and notice or otherwise fails to appear to answer the complaint and notice,

"(4) such person fails to show good cause why such person should not be found in default, and

"(5) the facts alleged in the petition establish a violation of the provisions of this section, and

"(6) the complainant seeks relief affecting solely such person the Commission shall presume the facts alleged in the complaint and shall, upon request, issue relief under this section affecting solely such person, unless, after considering the effect of such an order of relief upon the public health and welfare, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, and United States consumers, the Commission finds that such an order or relief should not be issued.",

(j) by striking out "subsection (d), (e), or (f)" each place it appears in subsection (i), as redesignated by paragraph (8) of this subsection, and inserting in lieu thereof "subsection (d), (e), (f), (g), or (h)",

(k) by inserting "and no seizure shall be made of any article under subsection (g) until such determination becomes final if

such a bond is posted" after "becomes final" in subsection (i)(3), as so redesignated,

(l) by striking out "and (g)" in subsection (j), as so redesignated, and inserting in lieu thereof "and (i)",

(m) by striking out "notifies" in subsection (j), as so redesignated, and inserting in lieu thereof ", or order to seize, notifies",

(n) by striking out "Except" in subsection (j), as so redesignated, and inserting in lieu thereof "(1) Except",

(o) by adding at the end of subsection (j), as so redesignated, the following new paragraph:

"(2) If any person who has previously been found by the Commission to be in violation of this section petitions the Commission for a determination that the petitioner is no longer in violation of this section or for a modification or recission of an order under subsection (d), (e), (f), (g), or (h)—

"(A) the burden of proof in any proceeding before the Commission regarding such petition shall be on the petitioner, and

"(B) relief may be granted by the Commission with respect to such petition only on the basis of new evidence or evidence that could not have been presented at the prior proceeding.",

(p) by striking out "subsection (d), (e), or (f)" in subsection (k), as so redesignated, and inserting in lieu thereof "subsection (d), (e), (f), (g), or (h)", and

(q) by striking out "patent" each place it appears in subsection (k) and inserting in lieu thereof "patent, copyright, or trademark".

SEC. 603. The Act of July 2, 1940 (54 Stat. 724, chapter 515; 19 U.S.C. 1337a) is hereby repealed.

INTERNATIONAL INTELLECTUAL PROPERTY PROTECTION AND MARKET ACCESS ACT OF 1986
SECTION-BY-SECTION SUMMARY

SEC. 1. SHORT TITLE.

SEC. 2. FINDINGS AND PURPOSE.

This section states Congressional findings that international protections of intellectual property rights, vital to U.S. competitiveness, are inadequate to protect U.S. economic interests; and that foreign trade and investment barriers seriously impede the ability of United States companies that rely on intellectual property protection to operate overseas resulting in a substantial loss of export markets.

The purpose of the legislation is to provide negotiating authority and to establish procedures to improve intellectual property protection abroad and to provide fair and equitable market access for U.S. companies relying on intellectual property protection.

TITLE I—ACTIONS TO INCREASE INTERNATIONAL INTELLECTUAL PROPERTY PROTECTION

This Title is intended to improve international intellectual property protection. It establishes a process in which the U.S. Trade Representative investigates whether foreign countries provide adequate and effective protection of intellectual property rights; USTR then negotiates with designated "priority foreign countries" that deny such intellectual property protection to Americans; and it requires a response by the President against "priority foreign countries" that do not agree to provide such intellectual property protection within two years.

Section 101. INVESTIGATIONS AND FINDINGS.

This section requires the United States Trade Representative ("USTR") to publish an annual list (based upon the annual report by USTR already required under the Trade Act of 1974) of those countries that deny adequate and effective intellectual property protection (*i.e.* patents, copyrights, trademarks and mask works) to U.S. companies. USTR is also directed to select "priority foreign countries" from this list based upon the potential export market in these countries and the onerous nature of their policies.

SEC. 102. NEGOTIATIONS TO ESTABLISH ADEQUATE AND EFFECTIVE PROTECTION OF INTELLECTUAL PROPERTY RIGHTS.

This section directs the President to enter into negotiations with the priority foreign countries to obtain greater intellectual property protection for U.S. companies. The President is granted additional authority to enter into similar agreements with other countries whenever he determines that their existing protections are inadequate and adversely affect U.S. competitiveness. The objectives of the negotiations are to improve intellectual property protection and to develop international rules for the protection of all forms of intellectual property. The President is granted the right to exclude a country or sector from negotiations after a public finding that such negotiations are unlikely to advance, or would be detrimental to, U.S. economc interests.

SEC. 103. REMEDIES.

If the USTR is unable to reach agreement with a priority foreign country within two years, the President must take some action, which may include but is not limited to the following:

(1) terminate, withdraw, or suspend trade agreements previously entered into;

(2) increase or impose a duty on any article imported from the foreign country;

(3) proclaim a tariff-rate quota;

(4) modify or impose quotas;

(5) suspend benefits under the Generalized System of Preferences; or

(6) take any other action under Section 301(b) or (c) of the 1974 Trade Act.

Presidential action may be nondiscriminatory or solely against the offending country. The President is required to impose trade measures that have an economic impact substantially equivalent to the lost revenues of U.S. companies caused by lack of intellectual property protection. The President may defer action for six months after certifying to Congress that substantial progress is being made in the negotiations.

SEC. 104. CONSULTATIONS.

This section requires the President to consult with interested members of Congress, the appropriate Congressional committees and other interested parties.

TITLE II—ACTIONS TO OPEN FOREIGN MARKETS

This title is intended to improve foreign market access for U.S. companies that rely upon intellectual property protection. The U.S. Trade Representative is directed to investigate foreign practices that deny fair and equitable market access to U.S. persons that rely upon intellectual property protection. USTR then negotiates with the "priority foreign countries" that deny such market access; and the President must respond.

SEC. 201. INVESTIGATIONS AND FINDINGS.

This section requires USTR to publish an annual list (based upon the annual report by USTR already required under the Trade Act of 1974) of these countries that deny fair and equitable market access (*e.g.*, through investment restrictions and trade barriers) to U.S. companies. USTR is also directed to select "priority foreign countries" from this list based upon the potential export market in these countries and the onerous nature of their policies.

SEC. 202. NEGOTIAITONS TO OPEN FOREIGN MARKETS.

This section directs the President to enter into negotiations with the priority foreign countries in order to reach specific agreements which will provide fair and equitable market access for U.S. companies that rely upon intellectual property protection. The President is given authority to enter into trade agreements with foreign countries to eliminate such trade barriers. Upon consultation, the USTR may exclude a specific sector or country from the negotiations upon published findings that such remedies would be detrimental to the interests of U.S. persons that rely upon intellectual property protection.

SEC. 203. REMEDIES.

If the USTR is unable to reach agreement with a priority foreign country within two years, the President must take some action, which may include but is not limited to the following:

(1) terminate, withdraw, or suspend prior trade agreements;

(2) increase or impose duties on any article imported from such foreign country;

(3) proclaim a tariff-rate quota on any article imported from such country;

(4) modify or impose quantitative restrictions;

(5) suspend benefits under the Generalized System of Preferences; or

(6) take other action pursuant to Section 301(b) or (c) of the 1974 Trade Act.

The President is granted authority to act on a nondiscriminatory basis or solely against the offending country. The President is required to impose trade measures that have an economic impact substantially equivalent to the lost revenues of U.S. companies caused by the lack of market access. The President may defer action for six months by certifying to Congress that negotiations are making substantial progress.

SEC. 204. CONSULTATIONS.

This section directs the President to consult with interested members of Congress, the appropriate Congressional committees and other interested parties.

SEC. 205.

This section defines "companies that rely upon intellectual property protection" as companies, or divisions or subsidiaries of companies, whose principal line of business involves creation, production or licensing of literary or artistic works which are copyrighted or which manufacture products that are patented or for which there are process patents.

TITLE III—GENERALIZED SYSTEM OF PREFERENCES

SECTION 301.

This Section amends the Generalized System of Preferences by adding a new subsection directing the President to terminate benefits previously extended to beneficiary developing countries if they are identified in the 1985 report under section 181 of the Trade Act of 1974 as providing inadequate intellectual property protection or inadequate market access unless the President certifies, at twelve month intervals, to Congress that such country has taken substantial action to rectify such inadequacies.

SEC. 302.

This section further amends the Generalized System of Preferences by adding a new paragraph which prohibits the President

from designating and requires removal from designation eligible articles which have been determined by any court or federal agency to infringe patent, copyright, trademark, mask work or trade secret interests.

TITLE IV—CARIBBEAN BASIN ECONOMIC RECOVERY ACT

This section amends the Caribbean Basin Initiative by creating a new section which grants USTR the right to exclude from eligibility those articles imported from beneficiary countries that provide inadequate intellectual property protection or inadequate market access to U.S. companies. USTR may defer action upon certification to the Congress that the offending country has taken substantial action to resolve such problems. This new section also provides that the value of the withdrawn benefits have an economic impact substantially equivalent to the lost revenues resulting from the denial of intellectual property protection and market access.

TITLE V—IMPROVEMENT OF ENFORCEMENT OF UNITED STATES RIGHTS

SEC. 501. ESTABLISHMENT OF ENFORCEMENT OFFICE.

This Section establishes an Office of Enforcement within the Office of the USTR to administer this Act and Section 301 of the Trade Act of 1974.

SEC. 502. AUTHORIZATION FOR ENFORCEMENT OFFICE.

This Section authorizes appropriations for the Office of Enforcement.

TITLE VI—UNFAIR PRACTICES IN IMPORT TRADE

This Section inserts the text of S. 1869 which amends Section 337 of the 1930 Tariff Act.●

● Mr. LAUTENBERG. Mr. President, I am pleased to join in introducing the International Intellectual Property Protection and Market Access Act of 1986. This legislation is designed to enhance the protection of intellectual property rights, and to gain access to markets for industries that rely upon such rights.

America's economic edge is its technology and innovation. But, if we're to enjoy the fruits of our labor—the jobs and growth that come from innovation—we need to stop the piracy of American intellectual property. I refer to U.S. patents, copyrights, trademarks, trade secrets, and semiconductor masks.

This bill would require the U.S. Trade Representative to establish negotiating priorities for increasing the level of intellectual property right protection abroad. It would force responsive action by the administration if negotiations proved unsuccessful.

Mr. President, often intellectual property owners face barriers to market access that are uniquely tailored to their industries. For example, copyright industries—motion picture producers, publishers, and the recording industry—are denied the ability to market their products on the basis of licensing requirements, barriers to distribution, and protectionist measures erected in the name of cultural sovereignty. The legislation would require the administration to make a special effort to break down these barriers to market access.

The legislation would also amend the law that ties benefits under the Generalized System of Preferences and the Caribbean Basin Initiative to intellectual property rights. It would mandate at least some restriction of benefits unless substantial improvement in protection is being secured.

The bill also includes the text of S. 1869, a bill that I introduced along with Senator ROTH, Senator WILSON, and others to reform section 227 of the Tariff Act.

Mr. President, the protection of intellectual property should be a major part of our Nation's trade policy. This legislation would help ensure that positive action is taken to ensure that Americans have the chance to market their ingenuity, their invention, and their creativity in trade around the world.

I urge my colleagues to support this legislation.●

By Mr. STEVENS (by request):

S. 2436. A bill to preserve the rights of the United States as a mortgagee under title XI of the Merchant Marine Act, 1936; to the Committee on Commerce, Science, and Transportation.

PRESERVATION OF UNITED STATES MORTGAGEE RIGHTS

● Mr. STEVENS. Mr. President, I am introducing legislation which was suggested to me at a March 21 hearing before the Senate Merchant Marine Subcommittee on the Title XI Vessel Loan Guarantee Program.

The Maritime Administration [MarAd] and the National Oceanic and Atmospheric Administration [NOAA] have requested a statutory exemption from the automatic stay provisions of section 362(b) of the Bankruptcy Code. In particular, MarAd is experiencing a series of defaults which has plagued the Vessel Guarantee Program. MarAd has had to borrow roughly $900 million from the Treasury within the last year to meet its obligations. However, MarAd and NOAA are treated as general creditors when a company in default of its title XI mortgage payments files for bankruptcy. The agencies have contended that the legal impediments to lifting the automatic stay imposed on creditors by the Bankruptcy Code are affecting the administration of the guarantee program.

Last year I introduced S. 1992 and S. 1993 on behalf of the administration which would provide both agencies with relief from the automatic stay. It was suggested at the hearing that the language in both bills did not limit the relief sought to the Federal Government, but expanded it to include the entire class of secured creditors. Alternative language was offered which would narrow the scope of the proposal to provide relief from the automatic stay for NOAA and MarAd only if a title XI guarantee was involved.

The legislation I am introducing today is identical to the language offered at the hearing. It is designed to clarify the issue before the Merchant Marine Subcommittee and provide interested parties with the alternative approach to consider.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD as follows:

S 2436

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Section 362(b) of title 11, United States Code, is amended by substituting "; or" for the period at the end of paragraph (11) thereof and adding new paragraphs (12) and (13) thereto reading as follows:

"(12) under subsection (a) of this section, of the commencement or continuation of an action by the Secretary of Transportation to foreclose a mortgage on a vessel under the Ship Mortgage Act, 1920 (46 App. U.S.C. 861 *et seq.*), held by the Secretary under section 207 or sections 1101 through 1110 of the Merchant Marine Act, 1936 (46 App. U.S.C. 1117 and 1271-1979e); or

"(13) under subsection (a) of this section, of the commencement or continuation of an action by the Secretary of Commerce to foreclose a mortgage on a vessel under the Ship Mortgage Act, 1920 (46 App. U.S.C. 861 *et seq.*), held by the Secretary under sections 1101 through 1110 of the Merchant Marine Act, 1936 (46 App. U.S.C. 1271-1279e). ".

SEC. 2. The amendments of section 362(b) set forth in section 1 above shall apply only to filings referred to in section 362(b) which are made after the effective date of this amendment.●

By Mr. BENTSEN (for himself and Mr. HEINZ):

S. 2437. A bill to remove foreign policy controls on exports to the Soviet Union of oil and gas equipment and technology; to the Committee on Banking, Housing, and Urban Affairs.

PETROLEUM EQUIPMENT EXPORT ACT

Mr. BENTSEN. Mr. President, I am pleased to be joined by my distinguished colleague from Pennsylvania [Mr. HEINZ] in introducing legislation to correct a grievous error in the application of the Export Administration Act. This bill will remove the present controls on the export of oil field equipment to the Soviet Union, except for those controls necessary for national security.

Our current policy is a classic mise of the foreign policy export controls under the Export Administration Act. We are now in exactly the kind of position that the 1985 amendments to the Export Administration Act were designed to prevent. We have restrictions on sales which no other country

in the world is imposing. As a result we are losing sales and jobs to foreign competitors without having any impact on the plans or behavior of the Soviet Union. The situation is made even worse by the fact that it comes at a time when the oil industry is in the depths of a deep, deep depression.

The futility of these controls have been documented by the Central Intelligence Agency in a study entitled "Soviet Needs for Western Petroleum Technology and Equipment." A sanitized and declassified copy of this report has been prepared and released by the CIA at my request. The report in its present form does not expose any classified U.S. information or intelligence sources. This CIA report does document the great need of the U.S.S.R. for Western petroleum technology, and more importantly the ability of the U.S.S.R. to get that technology and equipment from many non-United States sources. These non-United States sources do not have United States restrictions on sale to the U.S.S.R., and in the case of non-Cocom and Third World countries they do not even restrict sales of militarily sensitive items.

This study lists seven categories of petroleum technology where Communist bloc abilities are inadequate and where outside technology is or will be needed. Technology in all seven of these categories is available from non-U.S. sources at levels deemed by the CIA to be "adequate for most needs" or better. Further, all seven categories are available from non-Cocom European countries—countries that do not participate in or abide by the Cocom restrictions of militarily sensitive technology to the Communist bloc countries. Six of these seven categories are even available from Third World countries.

The study similarly lists 34 categories of equipment. Seventeen of these categories are available from non-Cocom countries, and 32 of the 34 available from other Cocom countries. These other Cocom countries limit exports only where they involve military sensitive technology. They do not, as we now do, restrict other sales of petroleum equipment.

Controls on the export of oil field equipment and technology to the Soviet Union were put in place by the Carter administration and have been extended by the Reagan administration. The United States has a well-deserved reputation for shooting itself in the foot, and unfortunately this administration is continuing in that tradition. The embargoes of grain and oil field equipment imposed after the Russian invasion of Afghanistan are classic examples of this problem. I strongly believe that we should not impose embargoes unless the target country is hurt worse than the United States is.

The Export Administration Act of 1985 directs that a number of factors be considered before renewing export controls. Included among those factors are the availability of the controlled items from other countries and whether the damage to the United States from the embargo exceeds the foreign policy benefit. The current controls on oil field equipment and technology clearly fail both of these tests.

Other countries can and do produce comparable equipment, and they have refused to join in this embargo. Over 2,000 different product lines of oil field equipment are produced in 38 other countries, including our NATO allies and Japan, which do not impose the export restrictions that we do.

Russia has thus been able to get the needed equipment. Worse yet, this unilateral U.S. embargo has in effect subsidized the foreign competition of major U.S. companies by giving them a major market. This has cost the United States hundreds of millions of dollars in sales and thousands of jobs, and it has also greatly damaged our image as a reliable supplier in a market where reliability is all-important.

The U.S. petroleum equipment industry is dependent on exports for about 35 percent of their annual sales. These exports have dropped from $5.3 billion in 1982 to only $3.2 billion in 1985. The U.S.S.R. is the largest petroleum equipment market outside of the United States. American oil and gas firms had about 25 percent of total Western exports to that huge market before the embargo. By 1983 they had only 0.4 percent. Had the U.S. market share only remained constant we would have had $1.8 billion in orders during 1979–83 instead of the actual $118 million. This is a loss of over 90 percent in potential sales and a loss of over 8,000 jobs.

Mr. President, my home State of Texas is the center of the world oil field equipment industry. Texas companies have borne an estimated 50 percent of these losses. However, the impact goes far beyond Texas. If we destroy the productive base of this country's oil industry we will be threatening any future hope of energy independence for this country. That is a very severe threat to our national security.

The administration's policy in this area has not only been wrong, it has been inconsistent. In September of 1983 the Commerce Department lifted restrictions on the sale of pipe-laying tractors to the Soviet Union, saying that they "do not represent high technology and are available from a number of other countries." No explanation was given as to why these tractors differ from most other oil and gas equipment, which is also freely available from other suppliers, and which is not generally considered "high technology" by anyone familiar with the industry. This embargo had cost the Caterpillar Tractor Co. its 85-percent share of the Russian market, with those orders going to a Japanese company instead. Caterpillar is just now getting back a few orders from the U.S.S.R. for this equipment.

On March 21, 1985, I wrote Secretaries Baldrige and Shultz concerning this problem. The response from the State Department said that "* * * because of our concerns that our allies not become unduly dependent on Soviet energy supplies, we do not officially promote sales of oil and gas equipment or joint venture arrangements in the energy field with the Soviets." Our allies do not share those concerns, and because of that they are making money selling oil field equipment of Russia without any competition allowed by United States companies. This is not good foreign policy or good economic policy for America.

That State Department letter further stated that "United States petroleum equipment suppliers report their reduced share of sales to the Soviet Union is due not just to instances where license applications may have delayed certain exports." Texas petroleum equipment suppliers tell me just the opposite—that licensing delays and refusals are the primary reason they are locked out of the Russian market.

The State Department letter then goes on to say, "Soviet purchasers, in many instances, give apparent preference to non-United States suppliers, pressure United States firms to make deliveries from plants abroad, and sometimes do not permit American firms to bid on oil and gas projects." This is exactly the point I am making. No amount of artful wording can hide the fact that past delays and refusals of licenses are costing the United States both sales and jobs. As a result, Russia is turning to other suppliers who do not have restrictions. Time is money in the drilling business. If a key part breaks anywhere on the globe a replacement is shipped by airplane that same day. If a government bureaucrat must issue an export license first then it does not matter whether the delay is 6 days or 6 months. The sale will be lost.

These complaints are backed up by actual examples. One United States company reported that it won a major Russian contract, and then lost it because the export license was denied. As a result 250 jobs were lost. Another United States company reports that it had 30 percent of the Russian market in its product lines, but now has none. Those sales now go to European firms, some of which are subsidiaries of United States companies.

As acknowledged by the State Department and shown in these exam-

ples, this equipment is freely available even from foreign subsidiaries of U.S. companies. There are few if any restrictions on shipment of technology to our allies. These unilateral U.S. export controls thus mean lost jobs for U.S. workers and encourage U.S. companies to move their research and production operations overseas. They also encourage foreign companies to engineer out U.S. products in favor of more assured sources of supply.

This policy is ridiculous. We should never impose export controls unless we hurt others worse than we hurt ourselves. We should never impose export controls unless other countries which produce the same products also agree to those controls. These are basic principles both of law and of common sense. The current unilateral restrictions on the sale of oilfield equipment to the Soviet Union violate both of those principles and should be lifted immediately before even more jobs and contracts are lost.

Mr. President, the current controls on the export of oilfield equipment to the U.S.S.R. are useless in terms of foreign policy impact and very damaging to a key U.S. industry that is in deep trouble. I regret the administration has forced us to take legislative action to implement what should have been a routine agency decision. However, it is vitally important to all U.S. industries that this country set and maintain a policy of not restricting exports unless it will hurt the target country worse than it hurts us. I urge my colleagues to join in passing this legislation.

● Mr. HEINZ. Mr. President, the enactment of the Export Administration Act Amendments of 1985 marked the end of one of the longest, most difficult legislative processes of recent years. The question of how we, as a nation, should monitor and control the export of goods and services is a controversial one, given the wide-ranging implications that these controls have for national security and foreign policy purposes.

The legislation passed by Congress incorporated reasonable compromises on most of the issues, but I suppose any time compromises are made, the result is likely to create some possible ambiguity and will not be as clear as one would always wish.

With regard to foreign policy exports controls, I have long been skeptical about their use to achieve policy objectives. We can and have stopped exports to countries with whom we have serious differences in order to make a statement about their policies. That may make us feel better, but others continue to supply the same equipment. The result is that foreign firms replace U.S. firms as suppliers. U.S. firms permanently lose overseas markets. Yet, the policies we oppose do not change. Frankly, without the cooperation of other countries, we gain nothing. We lose a great deal.

The case of petroleum equipment exports to the Soviet Union clearly illustrates the ineffectiveness of foreign policy controls. Even the modest change made by the administration this year, of moving oil and gas production technology from a presumption of denial policy to case-by-case review, offers U.S. suppliers little real headway. It entirely fails to address the complete ineffectiveness of this export control. The U.S. petroleum equipment industry agrues, accurately and effectively, that the foreign policy controls on their equipment have not changed Soviet human rights or foreign policies. Further, the controls do not impede Soviet energy development, given their access to the same equipment from other foreign suppliers.

Make no mistake. I support the goal being sought by the controls, namely to protest Soviet human rights abuses. But I have to wonder about the method chosen to pursue that goal when it has had no effect other than a loss of jobs and income to the United States, damage to United States firms' reputations as reliable suppliers and a dramatic decline in United States sales to the Soviet Union of nonstrategic items.

I am not suggesting national security controls on highly sophisticated petroleum equipment be removed. I am questioning the effectiveness of foreign controls in the face of foreign availability of the same equipment.

I do not know how the administration justifies renewing for another year the foreign policy control on exports to the Soviet Union of oil and gas equipment and technology, especially in light of the broad recognition within the administration that there is widespread foreign availability and that the control has caused substantial damage to the U.S. petroleum equipment and services industry.

The Commerce Department's own analysis on this equipment states:

> Foreign availability does exist for the majority of these items in the oil and gas equipment area. There are approximately 350 major U.S. and well over 60 major foreign firms producing this type of equipment. The United States is no longer the sole supplier of most types of oil and gas equipment.

Now, let's look at the foreign policy implications. These controls were originally imposed by the Carter administration in 1978 in response to the trial and conviction of two Soviet dissidents, Alexander Ginsburg and Anatoly Shcharansky, and in response to the Soviet arrest of an American journalist named Jay Profett. That is why we imposed those controls.

What has happened since then is that Mr. Ginsburg was freed and just recently Anatoly Shcharansky was freed. At no time has anybody, either in the Carter administration on whose watch Ginsburg was freed or in this administration when Shcharansky was freed, linked their being freed to the foreign policy controls that we still maintain.

So if there is no linkage, why are we continuing to impose the controls? Isn't that imposing so-called foreign policy controls without a policy?

For these reasons, I am joining Senator BENTSEN today in offering legislation to require the lifting of these controls. Their original purpose, so far as it can be determined, has disappeared, and any hope for any effectiveness of the controls is dashed by the fact that several other suppliers are willing to sell, and have been selling, to the Soviets the very same equipment. Mr. President, if we are not gaining anything by these export controls, then why are we penalizing our industries? I urge my colleagues to support this legislation.●

By Mr. HATCH:

S. 2438. A bill to extend and amend programs under the Head Start Act, and for other purposes; to the Committee on Labor and Human Resources.

HEAD START AMENDMENTS

Mr. HATCH. Mr. President, I am pleased to introduce today, by the administration's request a bill which reauthorizes the Head Start Program through fiscal year 1989. Although this bill is primarily a simple reauthorization of current policy, there are changes of a technical and perfecting nature designed to insure greater equality and balance in the program. It is my hope these provisions will receive the attention they deserve.

The Head Start Program has demonstrated over the past 21 years a level of effectiveness that has been well documented. There are numerous studies which show that money invested in this program pays great dividends. Head Start participant, armed with higher self-esteem and skills, ultimately are more likely to graduate from high school and thus will have a better chance of securing gainful employment. These are major factors in the development of a healthier and stronger person who is able to lead a happier and more productive life. Clearly this program has made the difference between success and failure for hundreds of thousands of disadvantaged youngsters.

I want to point out that I am also an original cosponsor of the Head Start reauthorization bill submitted by Senator HAWKINS, who chairs the Subcommittee on Children, Family, and Drugs and Alcoholism. Through the legislative process the committee will carefully consider Senator HAWKINS'

bill along with the administration's bill.

Mr. President, I urge my colleagues to join with me in supporting the Head Start Program and I ask unanimous consent that the text of this legislation be printed in the RECORD, along with a section-by-section analysis.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2438

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the Head Start Amendments of 1986".

AUTHORIZATION OF APPROPRIATIONS

SEC. 2. Section 639 of the Head Start Act (42 U.S.C. 9834) is amended—

(1) by striking out "and" after "fiscal year 1985"; and

(2) by inserting before the period at the end "$1,075,000,000 for fiscal year 1987, and such sums as may be necessary for each of fiscal years 1988 and 1989".

ELIMINATION OF COST-OF-LIVING INDEXING FOR INDIAN AND MIGRANT PROGRAMS; AMENDMENT OF FUNDING GUARANTEE

SEC. 3. Section 640(a)(2)(A) of the Head Start Act (42 U.S.C. 9835(a)(2)) is amended by striking out "except that—" and all that follows and inserting instead "except that there shall be made available for use by Indian and migrant Head Start programs for fiscal year 1987, or any subsequent fiscal year, on a nationwide basis, at least that amount which bears the same ratio to the total amount reserved under this paragraph (2) for such fiscal year, as the amount reserved hereunder for Indian and migrant Head Start programs for fiscal year 1985 bore to the total amount reserved under this paragraph for fiscal year 1985;".

ELIMINATION OF RESERVATION OF FUNDS FOR TRAINING AND TECHNICAL ASSISTANCE

SEC. 4. (a) Section 640(a)(2)(C) of the Head Start Act (42 U.S.C. 9835(a)(2)(C)) is amended by striking out all that follows "management improvement activities" and inserting a semicolon instead.

(b) Section 640(a)(2) of that Act is further amended by striking out all that follows subparagraph (D).

HEAD START EMPLOYEES INELIGIBLE FOR BETWEEN-TERM UNEMPLOYMENT COMPENSATION

SEC. 5. (a) The Head Start Act is amended by adding at the end the following new section:

"UNEMPLOYMENT COMPENSATION

"SEC. 658. For purposes of clauses (i), (ii), and (iii) of section 3304(a)(6)(A) of the Internal Revenue Code of 1954, and solely for purposes of application of that section to persons employed in a Head Start program assisted under this subchapter, any organization or governmental entity (to which reference is made in section 3309(a)(1) of the Internal Revenue Code of 1954) that employs any such person in any such Head Start program shall, if not an 'educational institution' as such term is used in such section 3304(a)(6)(A), be deemed to be such an educational institution.".

(b) Section 3304 of the Internal Revenue Code of 1954 (26 U.S.C. 3304) is amended by adding at the end the following new subsection:

"(g) For the special rule regarding application of this section to Head Start employees, see section 658 of the Head Start Act (42 U.S.C. 9853).".

EFFECTIVE DATE

SEC. 6. The amendments made by this Act shall become effective October 1, 1986.

HEAD START AMENDMENTS OF 1986: SECTION-BY-SECTION SUMMARY

SHORT TITLE

Section 1 of the draft bill provides the short title. When enacted, the bill would be cited as the "Head Start Amendments of 1986."

AUTHORIZATION OF APPROPRIATIONS

Section 2 authorizes appropriations, for activities under the Head Start Act, of $1,075,000,000 for FY 1987 and such sums as necessary for each of FYs 1988 and 1989.

ELIMINATION OF COST-OF-LIVING INDEXING FOR INDIAN AND MIGRANT PROGRAMS; AMENDMENT OF FUNDING GUARANTEE

Section 3 eliminates the requirement that annual cost-of-living adjustments, which would reduce the amounts available for other specified grantees and activities, be made with respect to Indian and migrant programs. However, the bill would substitute a provision assuring that Indian and migrant Head Start programs would receive, at a minimum, the same proportion of available funding in fiscal year 1987, or any subsequent fiscal year, as they received in fiscal year 1985.

ELIMINATION OF RESERVATION OF FUNDS FOR TRAINING AND TECHNICAL ASSISTANCE

Section 4 repeals the requirement, added by the 1984 amendments to the Head Start Act (P.L. 98-558), that the Secretary's discretionary expenditures for training and technical assistance for any fiscal year not be less than the total of such expenditures for FY 1982. This new requirement inappropriately restricts the Department's ability to shift funds within the Secretary's discretionary authority to best meet program needs.

HEAD START EMPLOYEES INELIGIBLE FOR BETWEEN-TERM UNEMPLOYMENT COMPENSATION

Section 5 defines all Head Start grantees as educational institutions within the meaning of section 3304(a)(6)(A) of the Federal Unemployment Tax Act, thus making all Head Start employees (including those employed by community action agencies and other nonprofit organizations other than schools) ineligible for unemployment compensation during between-term breaks in employment. This amendment would ensure that all Head Start staff are treated in the same way as Head Start employees in public school systems, who are already prohibited from collecting unemployment benefits between terms.

EFFECTIVE DATE

Section 6 provides that the amendments made by the draft bill become effective October 1, 1986.

By Mr. GARN (for himself, Mr. PROXMIRE, Mr. KERRY, Mr. HATCH, Mr. LUGAR, Mr. SARBANES, Mr. STAFFORD, Mr. LEVIN, Mr. CHAFEE, Mr. PELL, Mr. GRASSLEY, Mr. CHILES, Mr. MCCLURE, Mr. SIMON, Mr. NUNN, Mr. MOYNIHAN, Mr. LEAHY, Mr. LAUTENBERG, Mr. BAUCUS, Mr. DECONCINI, Mr. WEICKER, Mr. BOSCHWITZ, Mr. EAGLETON, Mr. BRADLEY, Mr. BENTSEN, Mr. KENNEDY, Mr. JOHNSTON, Mr. GORTON, Mr. CRANSTON, Mr. SYMMS, and Mrs. HAWKINS):

S.J. Res. 341. Joint resolution to designate the week beginning on June 1, 1986, as "National Neighborhood Housing Services Week"; to the Committee on the Judiciary.

NATIONAL NEIGHBORHOOD SERVICES WEEK

● Mr. GARN. Mr. President, today I am introducing S.J. Res. 341, calling for a Presidential proclamation of the week beginning June 1 as "National NHS Week." Neighborhood Housing Services—NHS, is the largest national, volunteer based, network of nonprofit corporations at work in our country revitalizing neighborhoods and preserving decent affordable housing for low- and moderate-income Americans. The purpose of this resolution is to strengthen the NHS network by increasing private sector awareness of, and support for their work, and to create a special opportunity to recognize the thousands of NHS volunteers who contribute so much to their local NHS programs, both in terms of their time and financial resources.

NHS has a 14-year track record of revitalizing neighborhoods and making them once again safe healthy neighborhoods where people can raise their families and do business. In 200 neighborhoods, 3 million Americans are being served by NHS programs; 1 out of every 100 homes in the country is in an NHS neighborhood. Through NHS, the residents of these neighborhoods are being given a chance to have a piece of the American dream—namely, a decent affordable home, in a safe healthy neighborhood. To date, over $3 billion has been reinvested in NHS neighborhoods; "neighborhoods once termed dangerous and deteriorated are today becoming "neighborhoods of choice." Additionally, this reinvestment figure does not capture the increased tax revenue generated through NHS, cities have seen returned many times over in tax revenue, what they have contributed to NHS and expended in public improvements.

Many of you may already be familiar with NHS through its work in your own State, or through the Neighborhood Reinvestment Corporation, created by Congress back in 1978 to help local communities develop NHS programs and to provide technical assistance to the existing network of NHS's. As a former mayor and member of the Housing Subcommittee, I have had the opportunity to witness their work first hand, and their track record of success is impressive. One of the keys to NHS's success is the working partnership of local business leaders, residents and government representatives

who form the heart of each NHS. These volunteers invest literally hundreds of hours each year managing the NHS's systematic neighborhood revitalization strategy. Further, the local business partners not only contribute the time of their local managers to serve on the NHS's Board of Directors, but also contribute thousands of dollars to the NHS's operations. Last year over 300,000 hours of volunteer time was invested in NHS and $14 million was contributed to local NHS operating budgets.

A further key to the NHS' success has been the NHS secondary market—the first national secondary market for housing rehabilitation loans which do not meet standard underwriting criteria. The NHS network has made over $100 million in loans to "nonbankable" residents for emergency home repairs, and with the creative leadership of insurance industry leaders, piloted and institutionalized a secondary market for these loans. With a 10-year track record of sound operations, this secondary market has become a national model and vital source of financing for neighborhood revitalization work across America.

The purpose of this joint resolution I am introducing today is to increase private sector awareness of, and support for NHS. Traditionally, the financial industries of banking and insurance have supported NHS's operations, but in today's economic environment there is a need to expand this base of support to other sectors of the business community. The Advertising Council's volunteer NHS campaign in conjunction with a National NHS Week will contribute significantly to these visibility efforts. Further, National NHS Week will provide a valuable opportunity to honor the thousands of NHS volunteers who are revitalizing our neighborhoods and providing decent affordable housing for low and moderate Americans—a priceless resource billions of dollars could not replace.●

By Mr. DOLE (for Mrs. HAWKINS), (for herself, Mr. DURENBERGER, Mr. MITCHELL, Mr. ABDNOR, Mr. RIEGLE, Mr. DOLE, Mr. BRADLEY, Mr. SPECTER, Mr. TRIBLE, Mr. LONG, Mr. COCHRAN, Mr. NICKLES, Mr. LUGAR, Mr. NUNN, Mr. HATCH, Mr. HOLLINGS, Mr. KASTEN, Mr. ZORINSKY, Mr. GARN, Mr. KENNEDY, Mr. ANDREWS, and Mr. SIMON):

S.J. Res. 342. Joint resolution to designate May 25, 1986, as "Missing Children Day"; to the Committee on the Judiciary.

MISSING CHILDREN DAY

(Mr. DOLE submitted the following statement on behalf of Mrs. HAWKINS).

● Mrs. HAWKINS. Mr. President, today I am introducing a joint resolution to authorize the President to declare May 25, 1986, as "Missing Children Day." Over the last 5 years we have been working to bring the tragic problem of missing children to the forefront of national attention. This joint resolution will expand awareness of the problem and will help the many groups and individuals working to locate missing children.

This date is of particular significance in the cause of missing children because on that day in 1979, 6-year-old Etan Patz disappeared on his way to school in New York City. Unfortunately, Etan has never been found. His case, however, sparked one of the most important Senate investigations since I have been a Member of this body. During our investigation into the problem of missing children, we discovered the true parameters of the missing children tragedy in this country, and we set about trying to resolve the terrible situation. Since the Senate Committee on Labor and Human Resources first explored this issue, supporters of the missing children movement have taken constructive steps to solve the problem.

One of the major accomplishments achieved has been the creation of the National Center for Missing and Exploited Children. The center was established June 13, 1984, as a national resource and technical assistance center to deal with the issues of child abduction and exploitation. The primary goals of the center have to reduce the incidence of crimes against children and to assist the criminal justice system in dealing more effectively with tragedies when they do occur.

In almost 2 years of operation, the National Center for Missing and Exploited Children has successfully met those goals. For example, the center's division for technical assistance, composed of former law enforcement and social services professionals, trained more than 12,000 of their peers in 37 States. In addition, assistance was provided families, law enforcement agencies and social services programs in all 50 States.

Another effective tool offered by the center has been its hotline, which was placed into operation October 19, 1984. Since its inception more than 156,000 calls have been received with callers giving information concerning the location of missing children, reported cases of children who were voluntarily missing, victims of parental kidnapping, and those abducted under unknown circumstances, as well as recording cases of child sexual exploitation. Further, there are at least 600 calls each day to the center's general number from persons seeking information or assistance.

These are but a few tools that have aided the center in processing more than 8,148 cases in the 2-year period since it opened. Fortunately, 4,418 children were located, but tragically, 43 were not found alive.

One story, in particular, demonstrates the successful impact that the drive for recognition of the missing children problem has had on our country. The story goes as follows.

On November 13, 1985, in a small Texas town near Dallas, a 2-month-old baby girl was kidnapped by an individual who answered an ad for a babysitter. The mother of little Mallory Elizabeth Sutton reported her disappearance to the National Center for Missing and Exploited Children, the baby's picture was immediately dispatched to various media across the country. A few hours after the baby's picture was shown on "Good Morning, America," a Houston woman reported having seen the child to the National Center's hotline. This resulted in the FBI searching in Houston, then Tampa, FL, where the child was found and reunited with her mother. This is clear evidence that illustrates how the combined contribution of individuals and organizations, properly coordinated, can bring about the safe recovery of a child.

At this time I would like to take a moment to make an announcement about an event that will take place next Saturday, May 17, 1986. On that day the Senate Sergeant at Arms Office is providing an opportunity for Senators and Senate staff to have their children fingerprinted. This is another step in what has become a national campaign to increase the awareness of missing and exploited children. This service will take place in the north servery of the Dirksen Cafeteria from 9 a.m. until 5 p.m. I commend the Office of the Sergeant at Arms for their participation in this very worthwhile exercise.

Mr. President, the purpose of this resolution is to increase public understanding and awareness of this national tragedy. The declaration of Missing Children Day will assist parents, law enforcement agencies, and concerned citizens around this country in bringing the true picture of this national tragedy to all our citizens. Since 1982 the Senate has demonstrated the foresight to declare May 25 Missing Children Day. Let us continue this very positive ritual in 1986.

I urge all my colleague to support the principles and purposes of this joint resolution to convince our Nation that we must not forget our missing children and their grieving families.

Mr. President, I ask unanimous consent that the text of this joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 342

Whereas on May 25, 1979, six-year old Etan Patz disappeared from his home in New York City and is still missing;

Whereas over one million eight hundred thousand children disappear from home annually;

Whereas children who are missing from home and are not living in a family environment are frequently the victims of sexual and physical exploitation;

Whereas an estimated 60 per centum of missing children are sexually abused while away from home;

Whereas the search for missing children is frequently a low-priority investigation in many law enforcement agencies;

Whereas efforts between Federal and local law enforcement agencies in child abduction cases are usually uncoordinated, haphazard, and ineffective; and

Whereas the problem of the missing child had been plagued by misinformation and there is a need to increase public understanding and awareness of this problem: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That May 25, 1986, is designated as "Missing Children Day", and the President is authorized and requested to issue a proclamation calling upon all Government agencies and the people of the United States to observe the day with appropriate ceremonies, programs, and activities.●

By Mr. D'AMATO:

S.J. Res. 343. Joint resolution designating the week of September 21, 1986, through September 27, 1986, as "Emergency Medical Services Week"; to the Committee on the Judiciary.

EMERGENCY MEDICAL SERVICES WEEK

● Mr. D'AMATO. Mr. President, the field of medicine is constantly evolving. Perhaps more than any other medical specialty, emergency medicine has experienced significant changes in the shortest period of time.

We are all familiar with the origins of emergency medicine. The battlefield medical systems and procedures employed in Korea and Vietnam taught us more about emergency medicine than anything prior to that time. It was said that, in the 1960's a man with a shotgun wound in Vietnam has a better chance of surviving than a critically injured person on a U.S. highway.

When emergency medical services [EMS] was formally established in the United States under the Highway Safety Act of 1966, 50 percent of the countries ambulance services were provided by 12,000 morticians, mainly because their vehicles could accommodate transportation on stretchers, and because no manufacturer produced an assembly line vehicle that could be termed an ambulance. However, with improved capabilities for emergency care, and with the enormous expansion of emergency medical services across the Nation, we have made tremendous strides in this field of medicine.

Today, with roughly 50,000 ambulances operating throughout the United States, and with highly advanced communications systems now in place that were absent in the 1960's, individuals involved in EMS are able to handle emergencies quickly and at a much greater level of efficiency.

From 1965 to 1983, the number of individuals per 100,000 who have died from auto accidents decreased from 25.4 to 19.1; from accidental falls, 10.3 to 5; from fires and burns, 3.8 to 2; from ingestion of foods or objects, from 0.8 to 0.6; and from drowning, 1.2 to 0.8. These reductions are, in large part, due to vastly improved emergency medical services.

Of course, no one really plans on having a medical emergency; many of us have an it-can't-happen-to-me attitude. Nevertheless, statistics show that you or someone you know will likely need emergency medical treatment sometime during the next year. When an emergency does arise, providers of emergency health care ensure that we receive the best possible treatment available.

Providers of emergency medical services include educators of emergency medical procedures, administrators, physicians, nurses, prehospital-care technicians, paramedics, and lay people who have learned CPR and other quick stabilization procedures. In some States, volunteer units, often working out of volunteer fire departments, play a significant role in providing EMS. In some States, nearly 80 percent of EMS involves volunteers. It is important that EMS providers be able to respond quickly to emergency calls. In most regions of the United States, one need only to dial 911, which enables us to locate EMS personnel quickly for medical emergencies.

Properly trained and equipped EMS personnel are especially important to our elderly. There is a higher death rate among our elderly as a result of injury than any other age group, and they are less likely to recover completely or even to survive once injured. Today, elderly patients, as well as every other American, in need of emergency medical care, can rest assured that they will receive high-quality care because of the advances that have occurred in the field of emergency medicine. This is evidenced by the ability of emergency departments to handle the ever-increasing influx of patients.

The incidence of patients visits to emergency departments across the country has increased dramatically. In 1960, there were 42 million patient visits. By 1977, this figure had grown to 76 million. This year, over 81 million patient visits will be recorded in emergency departments throughout the United States.

To recognize the countless dedicated men and women who provide us with quick, effective emergency medical care—and to elevate the public's awareness of the importance of knowing what steps to take in the event, or in the prevention, of an emergency—I am introducing today a joint resolution to designate the week beginning September 21, 1986, as Emergency Medical Services Week. My colleague from New York, Congressman MANTON, has introduced an identical resolution which already has 114 cosponsors.

In 1984, Congress passed legislation, Public Law 98-414, which designated the week of September 16 through 22, 1984, as Emergency Medicine Week. My resolution expands the coverage given Public Law 98-414 to include the educators and administrators involved in EMS, as well. It is necessary that we also recognize these men and women involved in the instructional and administrative aspects of emergency medical care.

In the State of New York, there are 16 regional councils, directed by the State health department, that oversee EMS operations. Recently, $2.4 million was authorized for EMS training throughout New York State, and legislation is currently being developed as an effort to improve such training to the greatest extent possible. These efforts are taking place across the country. As a result, emergency medical aid is growing exponentially.

I urge my colleagues to consider the importance of this resolution, as it relates to the health and well-being of all Americans. I urge my colleagues to lend this resolution their full support. I also ask unanimous consent that the text of this legislation be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 343

Whereas the members of emergency medical services teams devote their lives to saving the lives of others;

Whereas emergency medical services teams consist of emergency physicians, nurses, emergency medical technicians, paramedics, educators, and administrators;

Whereas the people of the United States benefit daily from the knowledge and skill of these trained individuals;

Whereas advances in emergency medical care increase the number of lives saved every year;

Whereas the professional organizations of providers of emergency medical services promote research to improve emergency medical care;

Whereas the members of emergency medical services teams work together to improve and adapt their skills as new methods of emergency treatment are developed;

Whereas the members of emergency medical services teams encourage national standardization of training and testing of emergency medical personnel, and reciprocal rec-

ognition of training and credentials by the States;

Whereas the designation of "Emergency Medical Services Week" will serve to educate the people of the United States about accident prevention and what to do when confronted with a medical emergency; and

Whereas it is appropriate to recognize the value and the accomplishments of emergency medical services teams by designating "Emergency Medical Services Week": Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of September 21, 1986, through September 27, 1986, is designated as "Emergency Medical Services Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate ceremonies and activities.●

ADDITIONAL COSPONSORS

S. 1446

At the request of Mr. ANDREWS, the name of the Senator from New Jersey [Mr. LAUTENBERG] was added as a cosponsor of S. 1446, a bill to amend title 38, United States Code, to improve veterans' benefits for former prisoners of wars.

S. 1801

At the request of Mr. EAST, the name of the Senator from Mississippi [Mr. STENNIS] was added as a cosponsor of S. 1801, a bill to amend the Trade Act of 1974 to promote expansion of international trade in furniture with Canada, and for other purposes.

S. 1938

At the request of Mr. METZENBAUM, the name of the Senator from Tennessee [Mr. GORE] was added as a cosponsor of S. 1938, a bill to make permanent the requirements of the manufacturing clause of the copyright law.

S. 2152

At the request of Mr. D'AMATO, his name was added as a cosponsor of S. 2152, a bill to amend title 10, United States Code, to require the Department of Defense to exclude from consideration for contracts those firms in which a hostile foreign government or a covered foreign national owns or controls a significant interest.

S. 2166

At the request of Mr. DURENBERGER, the names of the Senator from Nevada [Mr. HECHT], and the Senator from North Carolina [Mr. EAST] were added as cosponsors of S. 2166, a bill to amend the Internal Revenue Code of 1954 to modify the tax treatment of tax-exempt municipal bonds, and for other purposes.

S. 2181

At the request of Mr. D'AMATO, the name of the Senator from Montana [Mr. BAUCUS] was withdrawn as a cosponsor of S. 2181, a bill entitled the Construction Industry Labor Law Amendments of 1986.

S. 2186

At the request of Mr. MURKOWSKI, the name of the Senator from Georgia [Mr. MATTINGLY] was added as a cosponsor of S. 2186, a bill to exempt any amounts available to provide certain benefits to veterans with service-connected disabilities from any requirement for sequestration of funds under part C of the Balanced Budget and Emergency Deficit Control Act of 1985.

S. 2243

At the request of Mr. INOUYE, the name of the Senator from Hawaii [Mr. MATSUNAGA] was added as a cosponsor of S. 2243, a bill to improve the health status of native Hawaiians, and for other purposes.

S. 2398

At the request of Mr. ROTH, the names of the Senator from North Carolina [Mr. EAST], and the Senator from Pennsylvania [Mr. SPECTER] were added as cosponsors of S. 2398, a bill to amend title 18 of the United States Code to ban the production and use of advertisements for child pornography or solicitations for child pornography, and for other purposes.

S. 2417

At the request of Mr. BYRD, the name of the Senator from North Dakota [Mr. ANDREWS] was added as a cosponsor of S. 2417, a bill to establish the Aviation Safety Commission, and for other purposes.

SENATE JOINT RESOLUTION 326

At the request of Mr. WALLOP, the names of the Senator from Texas [Mr. BENTSEN], the Senator from Alaska [Mr. MURKOWSKI], the Senator from New Hampshire [Mr. HUMPHREY], and the Senator from Virginia [Mr. TRIBLE] were added as cosponsors of Senate Joint Resolution 326, a joint resolution to proclaim May 21, 1986, as "Andrei Sakharov Honor and Freedom Day."

SENATE JOINT RESOLUTION 333

At the request of Mr. ANDREWS, the names of the Senator from Arizona [Mr. DECONCINI], and the Senator from Rhode Island [Mr. CHAFEE] were added as cosponsors of Senate Joint Resolution 333, a joint resolution designating the week of May 18, 1986, through May 24, 1986, as "National Food Bank Week."

SENATE JOINT RESOLUTION 339

At the request of Mr. HATCH, the names of the Senator from Texas [Mr. BENTSEN], the Senator from Minnesota [Mr. DURENBERGER], the Senator from Connecticut [Mr. DODD], and the Senator from New Jersey [Mr. BRADLEY] were added as cosponsors of Senate Joint Resolution 339, a joint resolution to designate the week of November 30, 1986, through December 6, 1986, as "National Home Care Week."

SENATE RESOLUTION 369

At the request of Mr. MCCONNELL, the name of the Senator from Tennessee [Mr. SASSER] was added as a cosponsor of Senate Resolution 369, a resolution relating to trade between the United States and the Republic of Korea.

AMENDMENTS SUBMITTED

DRUG EXPORT LEGISLATION

METZENBAUM AMENDMENT NO. 1948 THROUGH 1950

Mr. METZENBAUM proposed three amendments to the bill (S. 1848) to amend the Federal Food, Drug, and Cosmetic Act to establish conditions for the export of drugs; as follows:

AMENDMENT No. 1948

At the end, add the following:

SEC. 9. Section 412 of the Federal Food, Drug, and Cosmetic Act is amended—

(1) by redesignating subsections (e), (f), and (g) as subsections (h), (i), and (j), respectively;

(2) by striking out the last sentence of paragraph (1) of subsection (h) (as redesignated by clause (1) of this section) and inserting in lieu thereof the following new sentence: "Such records shall be retained for at least one year after the expiration of the shelf life of the infant formula.";

(3) by striking out "subsection (a)(2)" in subsection (j) (as redesignated by clause (1) of this subsection) and inserting in lieu thereof "subsection (a)(3)"; and

(4) by striking out subsections (a) through (d) and inserting in lieu thereof the following:

"(a)(1) An infant formula (including infant formula powder) shall be deemed to be adulterated if—

"(A) such infant formula does not provide nutrients as required by subsection (j);

"(B) such infant formula does not meet the quality factor requirements prescribed by the Secretary under this section; or

"(C) the processing of such infant formula is not in compliance with the good manufacturing practices and the quality control procedures prescribed by the Secretary under this section.

"(2)(A) The Secretary shall by regulation—

"(i) establish requirements for quality factors for infant formulas, including requirements for the nutrients required by subsection (j);

"(ii) establish—

"(I) good manufacturing practices for infant formulas, including quality control procedures; and

"(II) requirements respecting the retention of records,

that the Secretary determines are necessary to assure that an infant formula provides nutrients in accordance with this section and will not cause harm; and

"(iii) establish requirements for the conduct by the manufacturer of an infant formula of regularly scheduled audits to determine that such manufacturer has complied with the regulations prescribed under clause (ii).

"(B) The good manufacturing practices and quality control procedures prescribed by the Secretary under subparagraph (A)(ii) shall include requirements for—

"(i) the testing of each batch of infant formula for each nutrient required pursuant to subsection (j) prior to the distribution of such batch in order to ensure that such formula is in compliance with this section and does not contain any deleterious or otherwise unsafe substance; and

"(ii) regularly scheduled testing of samples of infant formulas during the shelf life of such formulas in order to ensure that such formulas are in compliance with this section and do not contain any deleterious or otherwise unsafe substance.

"(C) The record retention requirements prescribed by the Secretary under subparagraph (A)(ii) shall include requirements for—

"(i) the retention of all records necessary to demonstrate compliance with the good manufacturing practices and quality control procedures prescribed by the Secretary under such subparagraph, including records containing the results of all testing required by subparagraph (B);

"(ii) the retention of copies of all records prepared by suppliers of raw materials and food packaging materials used in the processing of infant formula to demonstrate compliance by such suppliers with all regulations, guidelines, and action levels prescribed by the Secretary with respect to such raw materials and food packaging materials and with respect to infant formula;

"(iii) the retention of all records pertaining to the microbiological quality and purity of raw materials used in infant formula and of finished infant formula (including infant formula powder);

"(iv) the retention of all records of the results of regularly scheduled audits conducted pursuant to the requirements prescribed by the Secretary under subparagraph (A)(iii); and

"(v) the maintenance of files with respect to, and the review of, complaints concerning infant formulas.

Records required under this paragraph with respect to an infant formula shall be retained for at least one year after the expiration of the shelf life of such infant formula. Such records shall be made available to the Secretary for review and duplication upon request of the Secretary.

"(D) In prescribing requirements for audits under subparagraph (A)(iii), the Secretary shall provide that such audits be conducted by appropriately trained individuals who do not have any direct responsibility for ensuring that the manufacturer of an infant formula complies with the regulations prescribed by the Secretary under subparagraph (A)(ii).

"(3) The Secretary may by regulation—

"(A) revise the list of nutrients in the table in subsection (j); and

"(B) revise the required level for any nutrient required by subsection (j).

"(b) No person shall introduce or deliver for introduction into interstate commerce any new infant formula unless an application has been filed pursuant to subsection (c) with respect to such formula and such application has not been disapproved. For purposes of this section, the term 'new infant formula' includes any infant formula for which there has been a change in formulation or processing which may affect whether the formula is adulterated within the meaning of this section.

"(c) A person shall, with respect to any infant formula subject to the provisions of subsection (b), file with the Secretary an application. Each such application shall include—

"(1) full reports of testing demonstrating that such infant formula provides nutrients in accordance with subsection (j) and complies with the quality factor requirements prescribed by the Secretary under subsection (a)(2)(A)(i);

"(2) records demonstrating that the processing of such infant formula complies with the regulations prescribed by the Secretary under subsection (a)(2)(A)(ii); and

"(3) such additional information as the Secretary may by regulation prescribe.

"(d) Within ninety days after an application is filed under subsection (c), or prior to the end of such additional period as may be agreed upon by the Secretary and the applicant, the Secretary shall either—

"(1) approve the application if the Secretary finds that the infant formula complies with the requirements of this section and the regulations prescribed by the Secretary under subsection (a)(2)(A); or

"(2) deny the application.

"(e) An applicant whose application has been denied under subsection (d)(2) may appeal such denial pursuant to procedures specified in regulations prescribed by the Secretary. After the applicant has exhausted the remedies specified in such procedures, the applicant may appeal the denial of such application to the United States court of appeals for the circuit wherein such applicant resides or has his principal place of business, or in the United States Court of Appeals for the District of Columbia Circuit, within sixty days after the entry of the Secretary's final order denying such application.

"(f)(1) If the manufacturer of an infant formula has knowledge which reasonably supports the conclusion that an infant formula which has been processed by the manufacturer and which has left an establishment subject to the control of the manufacturer—

"(A) may not provide the nutrients required by subsection (j); or

"(B) may be otherwise adulterated of misbranded, the manufacturer shall promptly notify the Secretary of such knowledge and shall immediately take all actions necessary to recall shipments of such infant formula from all wholesale and retail establishments, and to assist such retail establishments in publicizing such recall in a manner reasonably designed to notify purchasers of such infant formula of such recall are the reasons for such recall.

"(2) For purposes of paragraph (1) the term 'knowledge' as applied to a manufacturer means (A) the actual knowledge that the manufacturer had, or (B) the knowledge which a reasonable person would have had under like circumstances or which would have been obtained upon the exercise of due care.

"(g)(1) If a recall of an infant formula is begun by a manufacturer, the recall shall be carried out in accordance with such requirements as the Secretary shall prescribe under paragraph (2), and—

"(A) the Secretary shall, not later than the 15th day after the beginning of such recall and at least once every 15 days thereafter until the recall is terminated, review the actions taken under the recall to determine whether the recall meets the requirements prescribed under paragraph (2); and

"(B) the manufacturer shall, not later than the 14th day after the beginning of such recall and at least once every 14 days thereafter until the recall is terminated, report to the Secretary the actions taken to implement the recall.

"(2) The Secretary shall by regulation—

"(A) prescribe the scope and extent of recalls of infant formulas necessary and appropriate for the degree of risk to human health presented by the formula subject to the recall; and

"(B) require the posting of a notice of any recall of an infant formula at each place where such formula is sold or was available for sale.".

AMENDMENT No. 1949

On page 37, between lines 20 and 21, insert the following:

"(9) For the purpose of implementing and monitoring compliance with the requirements of this subsection, the Secretary shall enter into agreements with or utilize the services of any foreign government or United States embassy in a foreign country to obtain drug labeling used in any foreign country or information available in a foreign country with respect to the safety and effectiveness of drugs.".

AMENDMENT No. 1950

On page 37, between lines 20 and 21, insert the following:

"(9) An antibiotic drug which is subject to certification by the Secretary under section 507 may be shipped for export only to a country described in paragraph (2) and only if the antibiotic drug meets the requirements of paragraph (3).

SEC. 4. (a)(1) The provisions of section 801(e) of the Federal Food, Drug, and Cosmetic Act, as added by section 3 of this Act, shall not apply, for a period of one year beginning on the date of enactment of this Act, to any antibiotic drug which—

(A) is subject to certification by the Secretary of Health and Human Services under section 507 of the Federal Food, Drug, and Cosmetic Act;

(B) has been exported prior to the date of enactment of this Act;

(C) does not comply with the provisions of section 801(e) of the Federal Food, Drug, and Cosmetic Act, as added by section 3 of this Act; and

(D) complies with the provisions of paragraph (2).

(2) An antibiotic drug to which paragraph (1) applies may be exported if—

(A) such antibiotic drug has not been the subject of final action by the Secretary of Health and Human Services denying, withdrawing, or suspending approval or certification of such antibiotic drug on the basis of safety and effectiveness, or otherwise banning such antibiotic drug on such basis; and

(B) such antibiotic drug is not the subject of a notice by the Secretary of Health and Human Services of a determination that the sale of such antibiotic drug in the foreign country to which such antibiotic drug is to be exported is contrary to the public health and safety of such country.

(b) The Secretary of Health and Human Services may extend the one-year period for which, pursuant to subsection (a)(1), the provisions of section 801(e) of the Federal Food, Drug, and Cosmetic Act do not apply to an antibiotic drug if the Secretary determines that the manufacturer of such antibiotic drug is making a good faith effort to comply with the provisions of section 801(e) of the Federal Food, Drug, and Cosmetic

Act, as added by section 3 of this Act, with respect to such antibiotic drug. Any extension under this subsection shall be for a period not in excess of one year.

PRODUCT LIABILITY VOLUNTARY CLAIMS AND UNIFORM STANDARD ACT

DANFORTH AMENDMENT NO. 1951

(Ordered referred to the Committee on Commerce, Science, and Transportation.)

Mr. DANFORTH submitted an amendment intended to be proposed by him to the bill (S. 1999) to regulate interstate commerce by providing for a uniform product liability law, and for other purposes; as follows:

Strike all after the enacting clause and insert in lieu thereof the following:

TITLE I

SHORT TITLE

SEC. 101. This Act may be cited as the "Product Liability Reform Act".

DEFINITIONS

SEC. 102. (a) As used in this Act, the term—

(1) "capital good" means any product, other than a motor vehicle, or a vessel, aircraft, or railroad used primarily to transport passengers for hire, or any component of any such product, if it is also of a character subject to allowance for depreciation under the Internal Revenue Code of 1954 and was—

(A) used in a trade or business;

(B) held for the production of income; or

(C) sold, leased, or donated to a governmental or private entity for the production of goods, for training, for demonstration, or other similar purposes;

(2) "claimant" means any person who submits an expedited settlement claim subject to title II of this Act or brings a civil action subject to title III of this Act, and any person on whose behalf such a claim is submitted or such an action is brought; if such a claim is submitted or such an action is brought through or on behalf of an estate, the term includes the claimant's decedent, or if it is brought through or on behalf of a minor or incompetent, the term includes the claimant's parent or guardian;

(3) "clear and convincing evidence" is that measure or degree of proof that will produce in the mind of the trier of fact a firm belief or conviction as to the truth of the allegations sought to be established; the level of proof required to satisfy such standard is more than that required under preponderance of the evidence, but less than that required for proof beyond a reasonable doubt;

(4) "collateral benefits" means all benefits and advantages received or entitled to be received (regardless of any right any other person has or is entitled to assert for recoupment through subrogation, trust agreement, lien, or otherwise) by any claimant harmed by a product or by any other person as reimbursement of loss because of harm to person or property payable or required to be paid to the claimant, under—

(A) any Federal law or the laws of any State (other than through a claim for breach of an obligation or duty); or

(B) any life, health or accident insurance or plan, wage or salary continuation plan, or disability income or replacement service insurance or any benefit received or to be received as a result of participation in any pre-paid medical plan or Health Maintenance Organization;

(5) "commerce" means trade, traffic, commerce, or transportation (A) between a place in a State and any place outside of that State; or (B) which affects trade, traffic, commerce, or transportation described in clause (A);

(6) "commercial loss" means economic injury, whether direct, incidental, or consequential, including property damage and damage to the product itself, incurred by persons regularly engaged in business activities consisting of providing goods or services for compensation;

(7) "dignitary loss" means non-economic loss resulting from harm caused by a product, compensable under State law, not in excess of $250,000, and consisting of pain and suffering or mental anguish associated with (A) the death of a parent, child or spouse, (B) permanent and gross disfigurement, (C) permanent loss of a limb or organ, or (D) serious and permanent impairment of a bodily function;

(8) "economic loss" means any pecuniary loss resulting from harm caused by a product which is compensable under State law;

(9) "exercise of reasonable care" means conduct of a person of ordinary prudence and intelligence using the attention, precaution and judgment that society expects of its members for the protection of their own interests and the interests of others;

(10) "harm" means (A) personal physical illness, injury, or death of the claimant; (B) mental anguish or emotional harm of the claimant caused by or causing the claimant's personal physical illness or injury; and (C) physical damage to property other than the product itself; the term does not include commercial loss;

(11) "manufacturer" means (A) any person who is engaged in a business to produce, create, make, or construct any product (or component part of a product) and who designs or formulates the product (or component part of the product) or has engaged another person to design or formulate the product (or component part of the product); (B) a product seller with respect to all aspects of a product (or component part of a product) which are created or affected when, before placing the product in the stream of commerce, the product seller produces, creates, makes, or constructs and designs or formulates, or has engaged another person to design or formulate, an aspect of a product (or component part of a product) made by another; or (C) any product seller not described in clause (B) which holds itself out as a manufacturer to the user of a product;

(12) "net economic loss" means, in accordance with subsection (b) of this section—

(A) reasonable expenses incurred for reasonably needed and used medical and rehabilitation care and services;

(B) lost income from work which the claimant would have performed if the claimant had not suffered harm, reduced by any income earned from substitute work actually performed by the claimant or by income the claimant would have earned in available appropriate work which the claimant was capable of performing but unreasonably failed to undertake;

(C) reasonable expenses incurred in obtaining ordinary and necessary services in lieu of those the claimant would have performed, not for income, but for the benefit of the claimant or the claimant's immediate family, if the claimant had not suffered the harm;

(D) lost earnings of a deceased person who suffered fatal harm caused by a product which, if the person had not died, would have been contributed to claimants who are entitled to receive benefits by reason of such person's death under the law of the place where the deceased person was domiciled; and

(E) reasonable expenses incurred by the claimant in preparation and submission of a expedited settlement claim prior to the date on which notice is given by the manufacturer pursuant to section 205(b) or 205(c) of title II of this Act, including a reasonable attorney's fee,

less the total amount of collateral benefits paid or payable to the claimant by reason of the same harm;

(13) "person" means any individual, corporation, company, association, firm, partnership, society, joint stock company, or any other entity (including any governmental entity);

(14) "preponderance of the evidence" is that measure or degree of proof which, by the weight, credit, and value of the aggregate evidence on either side, establishes that it is more probable than not that a fact occurred or did not occur;

(15) "product" means any object, substance, mixture, or raw material in a gaseous, liquid or solid state (A) which is capable of delivery itself or as an assembled whole, in a mixed or combined state or as a component part or ingredient, (B) which is produced for introduction into trade or commerce, (C) which has intrinsic economic value, and (D) which is intended for sale or lease to persons for commercial or personal use; for the purposes of this Act, the term does not include human tissue, blood and blood products, or organs unless specifically recognized as a product pursuant to State law;

(16) "product seller" means a person who, in the course of a business conducted for that purpose, sells, distributes, leases, prepares, blends, packages, labels, or otherwise is involved in placing a product in the stream of commerce, or who installs, repairs or maintains the harm-causing aspect of a product; the term does not include—

(A) a seller or lessor of real property;

(B) a provider of professional services in any case in which the sale or use of a product is incidental to the transaction and the essence of the transaction is the furnishing of judgment, skill, or services; or

(C) any person who—

(i) acts in only a financial capacity with respect to the sale of a product; and

(ii) leases a product under a lease arrangement in which the selection, possession, maintenance, and operation of the product are controlled by a person other than the lessor;

(17) "Secretary" means the Secretary of Commerce;

(18) "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and any other territory or possession of the United States, or any political subdivision thereof; and

(19) "toxic harm" means harm which is functional impairment, illness, or death of a

human being resulting from exposure to an object, substance, mixture, raw material or physical agent of particular chemical composition.

(b)(1) The lost income taken into account under subsection (a)(12)(B) of this section shall be reduced by the amount of all Federal, State, and local income taxes and any Social Security or other payroll taxes which would be applicable to such income, but which would not be applicable to compensation paid under this Act.

(2) For purposes of this Act, the net economic loss of a claimant is limited to those expenses and losses specified in subsection (a)(12) of this section that have accrued as of the date on which the settlement claim is filed, plus the present value of future losses reasonably expected to be incurred, unless payment of settlement is made pursuant to section 104 of this Act.

(3) Where harm occurs in circumstances that might entitle a claimant to benefits (including workers' compensation benefits) which would reduce the amount of the claimant's net economic loss in accordance with subsection (a)(12) of this section and it cannot reasonably, within the time provided for payment of net economic loss under section 205 or 302 of this Act or any reasonable extension of such time, be determined whether or in what amount such benefits will be payable, the manufacturer or product seller shall place in an interest-bearing escrow account that portion of the economic loss which the manufacturer reasonably anticipates the claimant will receive from such other sources, until the claimant's right to such benefits and the amount of such benefits finally has been determined under applicable law.

(4)(A) The total amount of compensation for economic loss paid or payable to a claimant from any other source shall, for purposes of subsection (a)(12) of this section, be reduced by the amount of legal fees and other costs incurred by the claimant in collecting such compensation.

(B) Attorney's fees may be on a contingent basis but, for the purposes of subsection (a)(12) of this section, shall be calculated solely on the basis of an hourly rate which should not exceed that which is considered acceptable in the community in which the attorney practices, considering the attorney's qualifications and experience and the complexity of the case.

(5) Except as otherwise provided by any provision of Federal law, no program of compensation, whether public or private, the benefits of which would be deducted from a claimant's economic loss in order to calculate net economic loss under subsection (a)(12) of this section, may make payment of benefits secondary to payment of net economic loss by a manufacturer under this Act.

PREEMPTION

SEC. 103. (a) This Act governs any civil action brought against a manufacturer or product seller, on any theory, for personal injury or property damage caused by a product. A civil action brought against a manufacturer or product seller for loss or damage to a product itself or for commercial loss is not subject to this Act and shall be governed by applicable commercial or contract law.

(b) No civil action may be brought in any Federal or State court against a manufacturer or product seller for personal injury or property damage caused by a product other than an action for recovery for harm brought pursuant to this Act.

(c) This Act supersedes any State law regarding recovery for any injury or damage caused by a product only to the extent that this Act establishes rule of law applicable to any such recovery. Any issue arising under this Act that is not governed by any such rule of law shall be governed by applicable State or Federal law.

(d) Nothing in this Act shall be construed to—

(1) waive or affect any defense of sovereign immunity asserted by any State under any provision of law;

(2) supersede any Federal law, except the Federal Employees Compensation Act;

(3) waive or affect any defense of sovereign immunity asserted by the United States;

(4) affect the applicability of any provision of the Foreign Sovereign Immunities Act of 1976 (28 U.S.C. 1602 et seq.);

(5) preempt State choice-of-law rules with respect to claims brought by a foreign nation or a citizen of a foreign nation;

(6) affect the right of any court to transfer venue or to apply the law of a foreign nation or to dismiss a claim of a foreign nation or of a citizen of a foreign nation on the ground of inconvenient forum; or

(7) supersede any statutory or common law, including an action to abate a nuisance, that authorizes a State or person to institute an action for civil damages or civil penalties, clean up costs, injunctions, restitution, cost recovery, punitive damages, or any other form of relief resulting from contamination or pollution of the environment, or the threat of such contamination or pollution.

(e) As used in this section, "environment" has the meaning given to such term in section 101(14) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9601(14)).

(f) This Act shall be construed and applied after consideration of its legislative history to promote uniformity of law in the various jurisdictions.

SETTLEMENT PAYMENTS

SEC. 104. Any tender of settlement under section 205 or 302 of this Act, or any settlement under the arbitration proceedings initiated under section 206 of this Act, may be made by—

(1) the payment of net economic loss previously incurred and any dignitary loss, and an enforceable promise to pay future otherwise uncompensated net economic loss as it is incurred,

(2) an agreement to pay net economic loss and any dignitary loss by means of an annuity, or

(3) payment of a lump sum,

except that, at the request of any party to such a settlement, payment shall be made in the manner prescribed in paragraph (1) of this section.

EFFECTIVE DATE

SEC. 105. (a) This Act shall take effect 90 days after the date of its enactment and shall apply to all expedited settlement claims submitted pursuant to title II of this Act on or after that date and all civil actions subject to title III of this Act commenced on or after that date, including any claim or action in which the harm or the conduct which caused the harm occurred before the effective date.

(b) If any provision of this Act would shorten the period during which a manufacturer or product seller would otherwise be exposed to liability, the claimant may, notwithstanding the otherwise applicable time period, submit an expedited claim to such a manufacturer or bring any civil action governed by this Act within one year after the effective date of this Act.

TITLE II

EXPEDITED PRODUCT LIABILITY SETTLEMENT PROCEDURE

SEC. 201. (a) A person who has suffered harm caused by a product, other than an employee of the product's manufacturer who suffers such harm in the course of his employment, may submit an expedited settlement claim under this title to the manufacturer or product seller.

(b) A person who submits such a claim under this title for harm caused by a product may not seek recovery for damages arising from the same harm in a civil action governed by title III of this Act, if the manufacturer or product seller—

(1) makes payment of net economic loss, or any dignitary loss, or both, to the claimant, pursuant to section 205(b) of this title; or

(2) declines to make full payment for such losses solely because of a dispute over the amount of settlement, pursuant to section 205(c) of this title.

(c) No person may submit an expedited settlement claim to a manufacturer or product seller under this title if there is pending a civil action brought by such person under any theory, under any law, to recover damages for the same harm.

(d) In the absence of a prior written agreement to the contrary, a manufacturer or product seller who makes payment under this title for damages caused by a product may not be made a defendant in any action brought by any other party for contribution, reimbursement, subrogation or indemnity for damages arising from the same harm, except as provided in section 205 of this title.

(e) Payment of an expedited settlement claim for harm under this title shall not bar an action governed by title III of this Act for associated harm which is physical damage to property other than the product itself.

SETTLEMENT CLAIMS

SEC. 202. A claimant seeking recovery for harm caused by a product under this title may submit an expedited settlement claim only for the claimant's net economic loss, or any dignitary loss, or both.

SUBMISSION OF AN EXPEDITED SETTLEMENT CLAIM

SEC. 203. (a) A person seeking to recover under this title from a manufacturer or a product seller for harm caused by a product shall submit an expedited claim by certified mail, return receipt requested, to the manufacturer or product seller.

(b) In order to be deemed a valid settlement claim for purposes of this title, notice of the claim submitted to the manufacturer or product seller pursuant to subsection (a) of this section must be accompanied by—

(1) except as provided in subsection (c) of this section, in the case of a manufacturer, reasonable proof that the manufacturer made or that the product seller sold the individual product unit that caused the harm;

(2) a detailed description of the product, including where appropriate and available the serial number of the product;

(3) full information regarding the date, place, and time of the harm's occurrence, the cause, nature and extent of the harm, and the nature and the amount of economic

loss caused by the harm, and any dignitary loss;

(4) copies of all bills for which payment is sought, including medical bills;

(5) copies of all medical reports or records within the possession or control of the claimant relating to the harm for which recovery is sought;

(6) a statement of lost income for which recovery is sought, together with evidence of the claimant's employment history and earnings;

(7) the names and addresses of all known witnesses to the occurrence of the harm, and (where practical) copies of the statements of such witnesses;

(8) the name and address of any other source of compensation paid or payable to the claimant for such economic loss, and the amount of any such compensation; and

(9) an affirmation or declaration, under penalties of perjury, that, to the best of the claimant's knowledge, the information provided with the claim is accurate and complete.

(c) Any person seeking to recover under this title for harm of a kind which manifests itself only many years after exposure may, where it is not possible for such person, despite every reasonable effort, to identify the manufacturer of the individual product unit that caused the harm, submit a product liability settlement claim in accordance with the provisions of this section to any manufacturer of a product that is identical or chemically indistinguishable from the product which caused the harm if that manufacturer's product was available at the time, when, and in the market in which, the product that caused the harm was purchased. In addition to the information required by subsection (b) of this section, the claimant shall provide the manufacturer with an adequate explanation of its inability to identify the manufacturer of the individual product unit which caused the harm.

(d) In any arbitration proceedings brought pursuant to this Act, no evidence may be admitted on behalf of the claimant which was not provided or made available to the manufacturer or product seller pursuant to this section, except upon a showing that such evidence could not have been discovered by the claimant in the exercise of due diligence prior to the date of the determination of the manufacturer or product seller pursuant to section 205 of this title or section 302(a) of this Act.

(e) An expedited settlement claim under this section must be submitted within two years of the time the claimant discovered or in the exercise of reasonable care should have discovered the harm and its cause, except that a claim of a person under legal disability may be submitted within two years after the disability ceases.

DUTY TO DISCLOSE INFORMATION

SEC. 204. (a) When a claimant has filed a valid settlement claim under section 203 of this title, the claimant shall—

(1) cooperate fully and expeditiously with the manufacturer or product seller in its reasonable investigation of the circumstances of the harm and of the loss claimed as a result of such harm; and

(2) promptly update during the course of the manufacturer's or product seller's investigation all medical information and information relevant to the calculation of net economic loss and any dignitary loss previously furnished pursuant to section 203(b) of this title.

(b) In addition to the information to be furnished pursuant to section 203(b) of this title, the claimant shall, upon request—

(1) deliver to the manufacturer or product seller a copy of every written report made before or after the date of request, which is available to the claimant and is not otherwise available to the person making the request, concerning any relevant medical treatment or examination of the claimant;

(2) deliver to the manufacturer or product seller the names and addresses of all physicians, hospitals and other persons examining, diagnosing, treating, or providing services to the claimant in connection with the harm or any other relevant past injury. The claimant shall authorize the person making such request to inspect all relevant records made by such persons;

(3) submit to a physical or medical examination, or both, by a health care provider specified and compensated by the manufacturer or product seller;

(4) deliver to the manufacturer or product seller the names and addresses of any experts upon whom the claimant relies, together with copies of the opinions of such experts; and

(5) where the product alleged to have caused the harm is in the possession or control of the claimant, provide the manufacturer with a reasonable opportunity to inspect, photograph or test such product.

(d) Any person (other than the claimant) providing information pursuant to this section shall be entitled to reimbursement from the requesting party for costs reasonably incurred in providing such information.

(e) If a claimant fails to comply with the provisions of subsection (a), (b) or (c) of this section, the claimant's expedited settlement claim shall be deemed to be invalid.

PAYMENT OR REJECTION OF A VALID SETTLEMENT CLAIM

SEC. 205. (a) Within ninety days of receipt of a valid settlement claim submitted under section 203 of this title (unless a longer period is agreed to by the claimant), a manufacturer or product seller shall determine whether to pay such claim, and shall give notice of its determination to the claimant by certified mail, return receipt requested, in accordance with this section. Any other person provided with notice by the manufacturer or product seller that a valid settlement claim has been submitted shall, within 180 days of receipt of such notice, determine whether to contribute its proportionate share of such claim.

(b) If a manufacturer or product seller decides to pay such claim, it shall notify the claimant that it will tender settlement of losses sought by the claimant and payable pursuant to section 202 of this title, and make payment to the claimant for any such losses pursuant to section 104 of this Act.

(c) If a manufacturer or product seller decides to pay such claim, but declines to make full payment of the claim because of a dispute over the amount of loss payable pursuant to section 202 of this title, the manufacturer or product seller shall notify the claimant of such determination. The manufacturer shall pay the undisputed portion of the claim and provide the claimant with a written explanation of the claimant's rights under section 206 of this title. Within one hundred and twenty days of the effective date of this Act, the Secretary shall make available a model explanation of such rights. A manufacturer who provides a claimant with copies of such explanation shall be deemed to have satisfied the requirements of this subsection.

(d) If the manufacturer or product seller determines that it will not pay such claim, it shall give the claimant written notice of rejection of the claim, together with a written explanation of the claimant's rights under section 207 of this title. Within one hundred and twenty days of the effective date of this Act, the Secretary shall make available a model explanation of such rights. A manufacturer who provides a claimant with copies of such explanation shall be deemed to have satisfied the requirements of this subsection.

RIGHTS UPON DENIAL OF FULL PAYMENT

SEC. 206. (a)(1) If a manufacturer or product seller has advised a claimant that it declines to make full payment of an expedited claim submitted under this title solely because of a dispute over the amount of loss payable pursuant to section 202 of this title, the claimant may, within ninety days of such notice, initiate binding arbitration proceedings by requesting the Federal Mediation and Conciliation Service to appoint an arbitrator from a roster of arbitrators maintained by the Service for such purpose. The manufacturer or product seller shall submit to such arbitration and shall be bound by any final determination of such proceedings.

(2) If a dispute regarding reimbursement arises pursuant to section 208 of this title, the parties to the dispute may, by mutual agreement, initiate binding arbitration proceedings by requesting the Federal Mediation and Conciliation Service to appoint an arbitrator from a roster of arbitrators maintained by the Service for such purpose. Such parties shall be bound by any final determination in such proceedings.

(b)(1) The Service shall adopt procedures and rules applicable to the selection of arbitrators and to the conduct of arbitration proceedings under this section. In order that such proceedings may be expeditious, informal, and reasonably inexpensive in cost, the Service's rules shall provide, among other provisions, that unless agreed otherwise by the parties—

(A) no prehearing discovery shall be permitted;

(B) any hearing shall be held in the community in which the claimant resides, except in the case of any arbitration proceedings arising from a dispute regarding reimbursement pursuant to section 208 of this title;

(C) the matter may, upon the request of the claimant, be submitted to the arbitrator for decision without written posthearing briefs;

(D) the arbitrator shall hear the case within 60 days after the date of the arbitrator's appointment and render a decision within 30 days after submission of the case for decision; and

(E) with respect to any dignitary loss, the arbitrator may award the claimant only either the amount sought by the claimant at the start of the hearing or the amount last offered by the manufacturer or product seller at the start of the hearing.

To the extent possible, similar awards shall be made for dignitary loss arising from similar injuries.

(2) The findings and determinations of the arbitrator shall be in writing and shall be final and conclusive. Such findings and determinations shall be enforceable in any court of competent jurisdiction. No official or court of the United States shall have power or jurisdiction to review any such findings and determinations except where

there is alleged fraud, misrepresentation, or similar misconduct by one of the parties to the arbitration or the arbitrator and where there is a verified complaint with supporting affidavits attesting to specific instances of fraud, misrepresentation, or other misconduct.

(c) If the arbitrator finds that the claimant was the prevailing party, the arbitrator shall increase the amount of the award payable to the claimant by reasonable attorney's fees and expenses incurred in connection with the arbitration proceeding.

(d) The manufacturer or product seller shall pay the fee and expenses of the arbitrator, except that if the arbitrator finds that the manufacturer was the prevailing party, the manufacturer or product seller shall be entitled to recover from the claimant or the claimant's attorney all such sums paid to the arbitrator, except that, in arbitration proceedings with respect to a dispute regarding reimbursement under subsection (a)(2) of this section, the parties shall contribute equal shares of the fee and expenses of the arbitrator.

(e) Arbitration under this section shall be a claimant's exclusive remedy where the manufacturer or product seller declines to make full payment of an expedited settlement claim under this title because of a dispute over the amount of claimant's loss.

RIGHTS UPON REJECTION OF CLAIM

SEC. 207. (a) If a manufacturer or product seller gives notice to a claimant pursuant to section 205(d) of this title that it will not pay a valid settlement claim, or if a manufacturer or product seller fails to respond to such a claim as required by section 205(a) of this title, the claimant may bring a civil action for damages arising from the same harm subject to the provisions of title III of this Act.

(b)(1) If the manufacturer or product seller is found liable in such civil action, the court shall award additional damages to the claimant in an amount equal to (A) 25 percent of the judgment, plus (B) 1 percent per month for each month after the date on which the manufacturer or product seller rejected the settlement claim or failed to respond pursuant to section 205 of this title until the date of entry of the claimant's judgment.

(2) In determining the amount of additional damages to be awarded under paragraph (1) of this subsection, the court may diminish the amount of additional damages in paragraph (1)(B) of this subsection if the action was delayed by causes not attributable to the manufacturer or product seller, including a congested court calendar, or if the action was prolonged because of novel or complex legal issues or complex factual issues.

(3) Such additional damages shall not be awarded in any action in which an expedited settlement claim was submitted pursuant to section 203(c) of this title, if the law of the State which governed such action did not provide, at the time such claim was submitted, for recovery in the absence of proof that the manufacturer made the individual product unit that caused the harm.

REIMBURSEMENT

SEC. 208. (a)(1) Subject to the provisions of this subsection, if any manufacturer or product seller has paid an expedited settlement claim pursuant to this title, the claimant is barred from bringing a civil action under any theory, under any law, against any person for damages arising from the same harm.

(2) A manufacturer or product seller which has offered to pay or agreed to pay the claimant's loss pursuant to section 205 of this title is subrogated to the claimant's right to recovery to the extent that the amount of loss paid or to be paid exceeds the comparative proportion of responsibility for such loss of such manufacturer or product seller.

(3)(A) If any person who is responsible for causing the claimant's harm refuses to contribute such person's proportionate share of such loss pursuant to this title, the manufacturer or product seller which has offered to pay or agreed to pay such loss may recover from such person a total amount equal to the amount of subrogation recovery pursuant to subsection (a)(2) of this section plus one-half of the amount of such subrogation recovery, in additon to reasonable attorney's fees and costs incurred in seeking such subrogation recovery.

(B) The court may waive the provisions of subparagraph (A) of this paragraph if—

(i) notice of the expedited settlement claim and opportunity to participate in the settlement were not provided to the person against whom the subrogation right is asserted pursuant to section 205 of this title; or

(ii) the person against whom the subrogation right is asserted has offered to submit the dispute to arbitration pursuant to section 206 of this title, and the person asserting the subrogation right has refused such offer.

(4) If an action is brought under this section against another person (other than the claimant's employer of fellow employee) for contribution, reimbursement or indemnity and the action is not a product liability action, as defined in this Act, such action shall be governed by applicable standards of liability under State or Federal law.

(b) A manufacturer or product seller may pursue its subrogation rights—

(1) where a claim was paid pursuant to section 205 of this title, either in the appropriate court of a State in which jurisdiction over the parties may be had or, if the requirements of section 1332 of title 28, United States Code, are satisfied, in an appropriate district court of the United States; or

(2) in the court which had jurisdiction over such civil action.

(c) Neither the claimant's employer nor any insurer shall have any right of subrogation, contribution, or indemnity against the manufacturer or product seller or any lien on the claimant's recovery from the manufacturer or product seller, nor shall the manufacturer or product seller have any right of contribution or indemnity against the claimant's employer or fellow employee.

TIME LIMITATION ON SETTLEMENT CLAIMS

SEC. 209. Any settlement claim submitted by a claimant under this title shall be barred, if a product which is a capital good is alleged to have caused harm which is not toxic harm, unless the settlement claim was submitted within twenty-five years after the date of delivery of the product to its first purchaser or lessee who was not engaged in the business of selling or leasing the product or using the product as a component in the manufacture of another product.

COLLECTIVE PROCESSING OF CLAIMS

SEC. 210. Nothing in this title or in the antitrust laws of the United States or of any State shall preclude manufacturers or product sellers from establishing and maintaining collective means of and facilities for processing claims which are submitted under this title.

TITLE III

CIVIL ACTIONS

SEC. 301. A person seeking to recover for harm caused by a product may bring a civil action against the product's manufacturer or product seller pursuant to applicable State or Federal law, except to the extent such law is superseded by this title.

SETTLEMENT PROCESS

SEC. 302. (a) If a claimant seeking to recover for harm caused by a product brings a civil action subject to the provisions of this title against a manufacturer or product seller and such claimant has not filed a valid settlement claim under title II of this Act, the manufacturer or product seller may tender settlement for the net economic loss and any dignitary loss sought by the claimant, pursuant to section 205 (b) or (c) of this Act. Such offer shall be made by certified mail, return receipt requested, within ninety days after service of the claimant's complaint, or within the time permitted pursuant to applicable State or Federal law for the responsive pleading, whichever is longer, except that if such pleading includes a motion to dismiss in accordance with applicable law, the manufacturer or product seller may make such an offer to the claimant within ten days after the court's determination regarding such motion.

(b) The claimant shall determine whether to accept or reject a tender of settlement made under subsection (a) of this section. The claimant shall provide to the manufacturer or product seller written notice of the claimant's acceptance or rejection of such tender by certified mail, return receipt requested, within ninety days after the date of receipt of such tender.

(c) Prior to and in lieu of filing its first responsive pleading in a civil action subject to this title, a manufacturer or product seller which is a defendant in such action and which has not rejected a valid settlement claim submitted by the claimant under title II of this Act may request the claimant to furnish the information specified in section 203(b) of this Act. If the claimant fails to furnish such information within thirty days after the date of such request, the claimant shall be deemed to have rejected the tender of settlement of the manufacturer or product seller, and the provisions of section 303 of this title shall apply.

(d) If a manufacturer or product seller has requested a claimant to furnish information pursuant to subsection (c) of this section, the provisions of section 303 of this title shall apply if evidence is admitted in the civil action on behalf of the claimant which was not provided or made available to the manufacturer or product seller pursuant to this section. The provisions of section 303 of this title shall not apply upon a showing that such evidence could not have been discovered by the claimant in the exercise of due diligence prior to the expiration of the period during which a tender of settlement may be made pursuant to subsection (a) of this section.

(e) Upon a tender of settlement by a manufacturer or product seller pursuant to subsection (a) of this section or a request for information pursuant to subsection (c) of this section, a civil action by a claimant under this title shall be stayed until (1) notification by the claimant pursuant to subsection (b) of this section, or (2) failure by the claimant to furnish information within the

time set forth in subsection (c) of this section, whichever is earlier.

(f) In any case in which a tender of settlement or a request for information is made pursuant to subsection (a) or (c) of this section, the court may, upon motion made at any time prior to the expiration of the appropriate period for response, enter an order extending such period. Any such order shall contain a schedule for discovery of evidence material to the issue of settlement or acceptance of a tender of settlement, and shall not extend such period for more than 30 days. Any such motion shall be accompanied by a supporting affidavit of the moving party setting forth the reasons why such extension is necessary to promote the interests of justice and stating that the information likely to be discovered is material, and is not, after reasonable inquiry, otherwise available to the moving party.

(g) If a claimant accepts a tender of settlement pursuant to subsection (a) of this section, the court shall dismiss the claimant's civil action, upon motion by any party to the settlement. Subject to the provisions of section 208 of this Act, upon acceptance of such tender of settlement, the claimant is barred from bringing a civil action against any person for damages arising from the same harm, and the manufacturer or product seller may seek reimbursement for the settlement.

RIGHTS UPON TENDER OF SETTLEMENT

SEC. 303. (a) In a civil action subject to this title, if a manufacturer or product seller tenders settlement pursuant to section 302 of this title and the claimant rejects such tender, the provisions of this section shall apply.

(b) If the manufacturer or product seller is found liable in such civil action for harm to the claimant, the damages awarded to the claimant for economic loss shall not exceed the net economic loss of the claimant, and the damages awarded for non-economic loss, other than punitive damages, shall not exceed $250,000. In any case where the law of the State provides that the liability of the manufacturer or product seller may be joint and several, such liability shall be joint and several only to the extent of the net economic loss of the claimant. With regard to all other loss, such a manufacturer or product seller shall not be liable to a claimant for an amount more than its prorate share based upon the comparative fault of all persons responsible for the claimant's harm.

(c) In any such action tried by a jury, the jury shall not be instructed regarding the limitations on damages specified in subsection (b) of this section. The award of damages in any such action shall be reduced by the court in accordance with such limitations.

UNIFORM STANDARDS OF PRODUCT SELLER LIABILITY

SEC. 304. (a) Notwithstanding the provisions of section 301 of this title, in any civil action for injury or damage caused by a product, a product seller other than a manufacturer is liable to a claimant, only if the claimant establishes by a preponderance of the evidence that—

(1)(A) the individual product unit which allegedly caused the harm complained of was sold by the defendant, (B) the product seller failed to exercise reasonable care with respect to the product, and (C) such failure to exercise reasonable care was a proximate cause of the claimant's harm; or

(2)(A) the product seller made an express warranty, independent of any express warranty made by a manufacturer as to the same product, (B) the product failed to conform to the warranty, and (C) the failure of the product to conform to the warranty caused the claimant's harm.

(b)(1) In determining whether a product seller is subject to liability under subsection (a)(1) of this section, the trier of fact may consider the effect of the conduct of the seller with respect to the construction, inspection, or condition of the product, and any failure of the seller to pass on adequate warnings or instructions from the product's manufacturer about the dangers and proper use of the product.

(2) A product seller shall not be liable in a civil action subject to the provisions of this title based upon an alleged failure to provide warnings or instructions unless the claimant establishes that, when the product left the possession and control of the product seller, the product seller failed—

(A) to provide to the person to whom the product seller relinquished possession and control of the product any pamphlets, booklets, labels, inserts, or other written warnings or instructions received while the product was in the product seller's possession and control; or

(B) to make reasonable efforts to provide users with those warnings and instructions which it received after the product left its possession and control.

(3) A product seller shall not be liable in a civil action subject to the provisions of this title except for breach of express warranty where there was no reasonable opportunity to inspect the product in a manner which would or should, in the exercise of reasonable care, have revealed the aspect of the product which allegedly caused the claimant's harm.

(c) A product seller shall be treated as the manufacturer of a product and shall be liable for harm to the claimant caused by a product as if it were the manufacturer of the product if—

(1) the manufacturer is not subject to service of process under the laws of any State in which the action might have been brought; or

(2) the court determines that the claimant would be unable to enforce a judgment against the manufacturer.

UNIFORM STANDARDS FOR OFFSET OF WORKERS' COMPENSATION BENEFITS

SEC. 305. (a) In any civil action subject to the provisions of this title in which damages are sought for harm for which the person injured is or would have been entitled to receive compensation under any State or Federal workers' compensation law, any damages awarded shall be reduced by the sum of the amount paid as workers' compensation benefits for that harm and the present value of all workers' compensation benefits to which the employee is or would be entitled for the harm. The determination of workers' compensation benefits by the trier of fact in a product liability action shall have no binding effect on and shall not be used as evidence in any other proceeding.

(b) In any civil action subject to the provisions of this title in which damages are sought for harm for which the person injured is entitled to receive compensation under any State or Federal workers' compensation law, the action shall, on application of the claimant made at claimant's sole discretion, be stayed until such time as the full amount payable as workers' compensation benefits has been finally determined under such workers' compensation law.

(c) Unless the manufacturer or product seller has expressly agreed to indemnify or hold an employer harmless for harm to an employee caused by a product, neither the employer nor the workers' compensation insurance carrier of the employer shall have a right of subrogation, contribution, or implied indemnity against the manufacturer or product seller or a lien against the claimant's recovery from the manufacturer or product seller if the harm is one for which a product liability action may be brought under this Act.

(d) In any civil action subject to the provisions of this title in which damages are sought for harm for which the person injured is or would have been entitled to receive compensation under any State or Federal workers' compensation law, no third-party tortfeasor may maintain any action for implied indemnity or conbribution against the employer, any co-employer or the exclusive representative of the person who was injured.

(e) Nothing in this Act shall be construed to affect any provision of a State or Federal workers' compensation law which prohibits a person who is or would have been entitled to receive compensation under any such law, or any other person whose claim is or would have been derivative from such a claim, from recovering for harm caused by a product in any action other than a workers' compensation claim against a present or former employer or workers' compensation insurer of the employer, any co-employee or the exclusive representative of the person who was injured. Any action other than such a workers' compensation claim shall be prohibited, except that nothing in this Act shall be construed to affect any State or Federal workers' compensation law which permits recovery based on a claim of an intentional tort by the employer or co-employee, where the claimant's harm was caused by such an intentional tort.

(f) Without regard to when the harm giving rise to the claim occurred, the provisions of this section shall not apply to any person subject to or covered by the Longshore and Harbor Workers' Compensation Act (33 U.S.C. 901 et seq.).

UNIFORM STANDARDS FOR AWARD OF PUNITIVE DAMAGES

SEC. 306. (a) Punitive damages may, if otherwise permitted by applicable law, be awarded in any civil action subject to this title to any claimant who establishes by clear and convincing evidence that the harm suffered was the result of conduct manifesting a manufacturer's or product seller's conscious, flagrant indifference to the safety of those persons who might be harmed by a product. A failure to exercise reasonable care in choosing among alternative product designs, formulations, instructions or warnings is not of itself such conduct. Except as provided in subsection (f) of this section, punitive damages may not be awarded in the absence of a compensatory award.

(b) The trier of fact shall first determine whether compensatory damages are to be awarded. After such determination has been made, the trier of fact shall, in a separate proceeding, determine whether punitive damages are to be awarded. In determining whether punitive damages are to be awarded, the trier of fact shall consider—

(1) the manufacturer's or product seller's awareness of the likelihood that the serious harm at issue would arise from manufacture or sale of the product;

(2) the conduct of the manufacturer or product seller upon learning that the product caused harm; and

(3) the duration of the conduct and any concealment of it by the manufacturer or product seller.

(c) Punitive damages may not be awarded where the unsafe aspect of the product which caused the claimant's harm complies in material respects with standards, conditions, or specifications established, adopted, or approved by the Congress or by an agency of the Federal Government responsible for the safety of the design, formulation, labeling or performance of a product.

(d) If the trier of fact determines under subsection (a) of this section that punitive damages should be awarded to a claimant, the court shall determine the amount of those damages. In making that determination, the court shall consider—

(1) all relevant evidence relating to the factors set forth in subsection (b) of this section;

(2) the profitability of the conduct to the manufacturer or product seller;

(3) the total effect of other punishment imposed upon the manufacturer or product seller as a result of the misconduct, including punitive damage awards to persons similarly situated to the claimant and the severity of other penalties to which the manufacturer or product seller has been or may be subjected; and

(4) the aggregate effect of such punishment upon the ability of the manufacturer or product seller to pay damages for economic and non-economic loss in pending or future claims involving persons similarly situated to the claimant.

(e) In considering the factors set forth in subsection (d) of this section, the court shall not make an individual award of punitive damages in excess of twice the amount of the claimant's compensatory award. For the purpose only of calculating punitive damages under this subsection, the limitations on the amount of damages specified in section 303(b) of this title shall not apply to the claimant's compensatory award.

(f) In any civil action in which the alleged harm to the claimant is death and the applicable State law provides, or has been construed to provide, for damages only punitive in nature, a defendant may be liable for any such damages regardless of whether a claim is asserted under this section. The recovery of any such damages shall not bar a claim under this section.

LIABILITY OF PARTIES

SEC. 307. (a) Any civil action subject to the provisions of this title shall be governed by the principles of comparative responsibility. The comparative responsibility attributed to the claimant shall not bar the claimant's recovery but shall reduce the amount of compensatory damages awarded to the claimant to the extent proportionate to the responsibility attributed to the claimant.

(b) In all such actions involving comparative responsibility, the court shall, unless otherwise agreed by all parties, instruct the jury to answer special interrogatories (or, if there is no jury, the court shall make specific findings) specifying—

(1) the amount of damages the claimant has suffered arising from the harm;

(2) the separate percentages of the total responsibility attributable to all parties, including the claimant, and any nonparties responsible to any extent for the harm; and

(3) those parties, if any, that are joint tort feasors.

(c)(1) The court shall determines the amount of compensatory damages to be awarded to each claimant in accordance with the findings and rulings made under subsection (b) of this section. The court shall enter judgment in accordance with such findings against each party determined to be liable, to the extent of such person's liability, as determined under subsection (b) of this section.

(2) Upon motion made by a claimant not more than one year after the date on which judgment is entered against a joint tortfeasor and appeals have been exhausted in any such action, the court may determine whether any part of the obligation of such joint tortfeasor for compensatory damages is not collectible. Any such part in excess of any collateral benefits which have been received by the claimant shall be reallocated as an obligation to be paid by the other joint tortfeasors in the action according to their respective percentages of responsibility, as determined under subsection (b) of this section.

(d) As used in this section, "joint tortfeasor" means a party to an action subject to this title (other than a claimant) whose conduct, together with that of at least one other party to such action (other than a claimant), resulted in an indivisible harm to the claimant for which there would be no reasonable basis of apportioning responsibility if principles of comparative responsibility did not apply.

UNIFORM STANDARDS OF LIMITATION AND REPOSE

SEC. 308. (a) Any civil action subject to the provisions of this title shall be barred unless the complaint is filed within two years of the time the claimant discovered or, in the exercise of reasonable care, should have discovered the harm and its cause, except that any such action of a person under legal disability may be commenced within two years after the disability ceases. If the commencement of such an action is stayed or enjoined, the running of the statute of limitations under this section shall be suspended for the period of the stay or injunction. If a claimant submits a valid settlement claim to a manufacturer or product seller pursuant to section 203 of this Act, the running of the statute of limitations under this section shall be suspended until notice is given by the manufacturer or product seller in accordance with section 205 of this Act.

(b) Any civil action subject to the provisions of this title shall be barred if a product which is a capital good is alleged to have caused harm which is not a toxic harm unless the complaint is served and filed within twenty-five years of the date of delivery of the product to its first purchaser or lessee who was not engaged in the business of selling or leasing the product or using the product as a component in the manufacture of another product.

(c) Nothing in this section shall affect the right of any person who is subject to liability for harm under this Act to seek and obtain contribution or indemnity from any other person who is responsible for that harm.

COUNSEL'S LIABILITY FOR EXCESSIVE COSTS

SEC. 309. (a) In the case of any civil action under this title, any attorney or other person who is admitted to conduct cases in any court of the State in which such civil action is pending and whose conduct in the course of such action is calculated to delay resolution of the action, or is determined by the court (after consideration of the circumstances) not to be in good faith, shall be subject to pecuniary sanctions to be imposed by the court. Any such sanction shall be equal to an amount not less than the total amount of court costs, fees, and expenses (including attorney's fees) reasonably attributable to the conduct.

(b) Notwithstanding any other provision of law, if the court finds that a civil action under this title was commenced without a good faith belief by the attorney representing the claimant in such action that there was a reasonable basis in law and in fact for recovery of the relief requested, or that such action was commenced merely for purposes of achieving a monetary settlement where there was no reasonable prospect for an award of damages, such attorney shall be liable for costs, fees, and expenses, including attorney's fees reasonably incurred to respond to or otherwise resist such action.

RECORD RETENTION

SEC. 310. (a) Any claimant and any person who is a party to a civil action under this title who anticipates bringing such an action, or who has notice that he or she may be made a party to such an action shall retain all material, documents and other data (including, in the case of the claimant, the product alleged to have caused the claimant's harm) within that person's possession, custody or control that are relevant or may lead to the discovery of evidence relevant to the claim or action.

(b) In any civil action under this title, if the court determines that a party has willfully disposed of, destroyed, concealed, altered or removed any material, document or data in violation of subsection (a) of this section or any State or federal rule, regulation or statute requiring the retention of such material, document or data, there shall be a rebuttable presumption that the facts to which the material, document or data relate are established in a manner adverse to the position of the party who has committed the violation. The court shall assess a civil penalty against such party in an appropriate amount not less than $1,000 and order such party to pay the other party's costs, including reasonable attorney's fees, incurred in proving the violation.

(c) In any other civil action under this title, in which the court determines that a party has nonwillfully violated subsection (a) of this section or any State or Federal rule, regulation or statute requiring the retention of such material, document or data, and that no other means are available to establish the facts to which the unavailable material, document or data relate, the court may, in the interest of justice, establish a rebuttable presumption that the facts to which the material, document or data relate are, for the purposes of such action, established in a manner adverse to the party who has committed the violation.

ADMISSIBILITY OF CERTAIN EVIDENCE

SEC. 311. Evidence that a manufacturer or product seller has made a settlement offer or payment to a claimant for harm caused by a product pursuant to this Act shall not be admissible in any civil action brought under or subject to this title or otherwise by any claimant.

SUBSEQUENT REMEDIAL MEASURES

SEC. 312. In any civil action under this title, evidence of any measure taken by a manufacturer or product seller after the occurrence of a claimant's harm which, if taken previously, would have made the harm less likely to occur is not admissible to

prove liability. Such evidence may be admitted when offered for another purpose, such as proving ownership, control, or feasibility of precautionary measures, if controverted, or impeachment.

Amend the title so as to read: A bill to regulate interstate commerce by providing for a uniform product liability law that affords persons harmed by products equitable and expeditious payment of their damages, and for other purposes.

● Mr. DANFORTH. Mr. President, last December S. 1999, the Product Liability Voluntary Claims and Uniform Standards Act, was introduced. Today, I rise to introduce an amendment in the nature of a substitute to that measure and ask unanimous consent that this amendment and the accompanying section-by-section analysis be printed in the RECORD immediately following these remarks.

This new proposal is a revision of S. 1999 that addresses concerns about the bill raised at 2 days of hearings on this product liability reform measure. S. 1999 attempted to combine uniform standards for liability with a new alternative claim system for swifter, more certain recovery of net economic loss by those injured by defective products. The overall objectives of S. 1999 were to provide an alternative to traditional litigation that would assure such recovery for those injured by defective products, reduce transaction costs for all those involved, and provide greater certainty with respect to the rights and responsibilities of product manufacturers, sellers, and consumers.

Let me say at the outset that this amendment is only a "draft." It is intended to be a framework on which to build a consensus. I fully expect further changes, and I invite ideas for changes from my colleagues.

This amendment to S. 1999 has the same objectives, but differs somewhat in approach. Instead of the expedited claim system of S. 1999, this proposal would establish a simpler alternative that would promote settlement of most product liability claims without extensive litigation. The overall goal is to promote such settlements by imposing limitations on recovery in cases where there is a legitimate and timely offer of net economic loss—those actual losses not reimbursed by other sources—plus any "dignitary loss" up to $250,000—that is, loss for pain and suffering in cases involving the most extreme and severe injuries.

Some of the general reforms of S. 1999 have been retained but the overall focus shifts from liability standards for claims and litigation to incentives for settlement. The basic idea remains to get as many people as possible out of the courts and into a simple alternative settlement system that makes injured persons whole on an expedited basis and without the costs associated with prolonged litigation.

This amendment creates incentives for both plaintiffs and defendants to settle product liability claims quickly either prior to or at the beginning of litigation. A victim of a product-related injury has a choice of utilizing an expedited settlement claim system under title II of this proposal or traditional litigation under title III. If the title II settlement system is utilized, the claimant may seek recovery for net economic loss and dignitary compensation for severe and permanent injuries; however, such dignitary or noneconomic loss may not exceed $250,000.

The manufacturer or product seller has 90 days to respond to such a claim. If the manufacturer pays the claim, no recovery for damages arising from the same harm may be sought in a civil action. If the manufacturer or product seller agrees to pay the claim but disputes the amount, the matter goes to binding arbitration. If the manufacturer or product seller rejects the claim, the claimant may seek recovery through litigation. If the claimant prevails, the manufacturer or product seller who rejected the claim is required to pay an additional percentage of the judgment as a penalty.

If a person chooses to litigate without using the title II expedited settlement system, the manufacturer or product seller defendant may offer to pay the net economic loss and dignitary loss sought by the claimant. A manufacturer or product seller who disputes the amount sought by the claimant may offer to pursue arbitration as to the amount to be paid. If the plaintiff accepts the offer of payment or agrees to arbitration, the case is dismissed and the claimant is barred from seeking recovery for damages arising from the same harm from any other person.

If an offer of settlement is rejected in these circumstances, the claimant's recovery would be limited in litigation to net economic loss plus up to $250,000 for any noneconomic losses excluding punitive damages. Joint and several liability could be applied only to the claimant's net economic loss. With regard to all other loss, the manufacturer or product seller would be liable only to the extent of its proportionate responsibility for the harm.

The expedited settlement procedures established by this amendment are designed to compensate the claimant—something that the tort system today rarely does. These procedures would permit the claimant to recover his net economic loss and dignitary loss.

Net economic loss includes reasonable expenses incurred for reasonably needed medical and rehabilitation care and services, lost income from work that the claimant would have performed, reasonable expenses incurred in obtaining ordinary and necessary family services that the claimant would have performed, lost earnings of a deceased person, and reasonable expenses incurred in preparation and submission of the claim, including an attorney's fee. Such economic loss is reduced by the total amount paid or payable by reason of the same harm from any other source, including workers' compensation and private insurance coverage.

Dignitary loss, which may not exceed $250,000, includes mental anguish associated with the death of a parent, child or spouse; permanent and gross disfigurement; permanent loss of a limb or organ; or serious and permanent impairment of a bodily function.

The amendment also includes uniform standards for the award of punitive damages. Punitive damages are limited to 2 times the plaintiff's compensatory damages, and may only be awarded if the plaintiff establishes by clear and convincing evidence that the harm suffered was the result of conduct manifesting a conscious flagrant indifference to the safety of those persons who might be harmed by a product. Such damages may not be awarded in the absence of compensatory damages. While a jury may determine whether compensatory and punitive damages are to be awarded, the court shall determine the amount of punitive damages. Punitive damages may not be awarded where the unsafe aspect of the product that caused the claimant's harm complies with Government specifications, standards, or conditions.

A comparative responsibility provision restricts joint and several liability to those few product liability cases where there is no other way of compensating the plaintiff for his loss. If, after the claimant attempts to collect proportionate shares of his loss from each joint tort-feasor, a defendant is found to be judgment-proof, his share of the damage will be divided among the other defendants according to their percentage of responsibility. However, before this sum is apportioned among the other defendants, it shall be reduced by the amount of any collateral benefits that have been received by the claimant. This provision will eliminate the need for costly contribution suits.

Both the title II claims system and title III traditional litigation are subject to a uniform statute of limitations that runs for 2 years from the discovery of the harm and its cause. In addition, both the title III claims system and title III are subject to a 25-year statute or repose for capital goods, except in cases involving toxic harm.

Mr. President, the virtue of this proposal is that it will reduce the high costs of litigation without depriving injured victims of their rights. Instead,

it provides victims with faster, more certain and more complete recovery while addressing defendants' ligitimate concerns about rising litigation and insurance costs.

I regard this proposal as a fair and viable framework for product liability reform; however, more work needs to be done and many of the provisions of this draft require further revision. It is my hope that in the weeks ahead, all those seeking product liability reform will be able to join together in this revision process and that we will be able to formulate a product liability reform bill along these lines that can be supported not only by the Senate Commerce Committee but by the Senate as a whole.

Mr. President, I ask unanimous consent that a section-by-section analysis of the amendment be printed in the RECORD.

There being no objection, the section-by-section analysis was ordered to be printed in the RECORD, as follows:

SECTION-BY-SECTION ANALYSIS OF AMENDMENT TO S. 1999

TITLE I

Section 101 sets out the short title of the Act as the "Product Liability Reform Act."

Section 102 sets out definitions of certain terms used in the Act. Most importantly, (1) "dignitary loss," which may not exceed $250,000, includes pain and suffering or mental anguish associated with the death of a parent, child or spouse; permanent and gross disfigurement; permanent loss of a limb or organ; or serious and permanent impairment of a bodily function; (2) "net economic loss" includes reasonable expenses incurred for reasonably needed medical and rehabilitation care and services, lost income from work that the claimant would have performed, reasonable expenses incurred in obtaining ordinary and necessary family services that the claimant would have performed, lost earnings of a deceased person, and reasonable expenses incurred in preparation and submission of the claim, including an attorney's fee. Such economic loss is reduced by the total amount paid or payable by reason of the same harm from any other source, including workers' compensation and private insurance coverage. Attorney's fees may be on a contingent basis but, for purposes of determining net economic loss, shall be calculated solely on the basis of a reasonable hourly rate. (3) "Product" means any object, substance, mixture, or raw material which is capable of delivery, which is produced for introduction into trade or commerce, which has intrinsic economic value, and which is intended for sale or lease to persons for commercial or personal use; for the purposes of this Act, the term does not include human tissue, blood and blood products, or organs unless specifically recognized as a product pursuant to State law. (4) "Harm" means personal physical illness, injury, or death of a claimant; mental anguish or emotional harm of the claimant caused by or causing the claimant's personal illness or injury; and physical damage to property other than the product itself. The term does not include commercial loss.

Section 103 states the extent to which the Act preempts state law. The Act governs any civil action brought against a manufacturer or product seller, on any theory, for personal injury or damage caused by a product. A civil action for commercial loss or for loss or damage to a product itself is not subject to this Act and shall be governed by applicable commercial or contract law.

Section 104 provides that in an expedited settlement, payment shall consist of payment of past losses and an enforceable promise to pay future net economic losses as incurred, if any party so requests. Otherwise, it may take the form of a lump sum or an agreement to pay by means of an annuity.

Section 105 provides that the Act shall take effect 90 days after its enactment.

TITLE II

Section 201 provides that a person who has suffered harm caused by a product may submit an expedited settlement claim to the manufacturer or product seller. A person who submits such a claim may not sue any other party for the same harm if the manufacturer or product seller agrees to pay the claim. No claim may be brought if any civil action is pending to recover damages for the same harm.

Section 202 specifies that an expedited settlement claim may be submitted only for the claimant's net economic loss, or any dignitary loss, or both.

Section 203 provides that an expedited settlement claim must be submitted by certified mail, return receipt requested. Such a claim must be accompanied by reasonable proof that the manufacturer made the product that caused the harm, as well as by full information about the circumstances in which the harm occurred, copies of all bills for which payment is sought, copies of medical records relating to the harm, a statement of lost income for which recovery is sought, the names and addresses of those who witnessed the farm, and information about other sources of compensation paid or payable to the claimant for the harm incurred.

Section 204 provides that a claimant must cooperate with the manufacturer or product seller in its investigation of the claim, update all medical information and other data relevant to net economic loss, allow the manufacturer to have access to all relevant medical records and information, submit to a physical or mental examination, provide the names of experts upon whom the claimant relies, and permit the manufacturer or product seller to inspect or test the product alleged to have caused the harm, if it is still within the control of the claimant.

Section 205 requires a manufacturer or product seller who has received a valid settlement claim to respond within 90 days. If it is willing to do so, the manufacturer or product seller may pay the claim in full. If the manufacturer or product seller disputes the amount of loss that is payable, it may pay the undisputed portion of the claim and notify the claimant of his rights under section 206. If the manufacturer or product seller decides that it will not pay, it shall notify the claimant of his rights under section 207. Any other person provided with notice by the manufacturer or product seller that a valid settlement claim has been submitted shall, within 180 days of receipt of such notice, determine whether to contribute its proportionate share of such claim.

Section 206 establishes binding arbitration proceedings for the resolution of disputes over the amount of payable loss. With respect to any dignitary loss, the arbitrator may award the claimant only either the amount sought by the claimant or the amount offered by the manufacturer of the product seller. Arbitration under this section shall be the claimant's sole Title II remedy where a manufacturer or product seller declines to make full payment of an expedited settlement claim because of a dispute over the amount of claimant's loss.

Section 207 provides that if a manufacturer or product seller refuses to pay a valid settlement claim or fails to respond, the claimant may bring a civil action subject to the provisions of Title III of the Act. If the claimant prevails, and the manufacturer or product seller who rejected the claim is found liable, the court shall award additional damages of 25 per cent of the judgement plus one per cent of the judgment per month for each month from the rejection until the entry of the claimant's judgement.

Section 208 provides for reimbursement of a manufacturer or product seller who has paid a settlement by other persons responsible for the claimant's harm. If such other persons refuse to participate in the settlement, the manufacturer or product seller who paid the claim may sue and recover one and a half times the amount of the subrogation recovery, unless the person against whom the subrogation right is asserted has offered to submit the dispute to arbitration.

Section 209 provides that, if the product is a capital good alleged to have caused harm which is not toxic harm, any settlement claim must be submitted within 25 years of the date of delivery of the product to its first purchaser.

Section 210 provides that no antitrust law shall preclude manufacturers or product sellers from establishing collective facilities for processing claims which are submitted under this title title.

TITLE III

Section 301 provides that civil actions for harm caused by a product shall be governed by applicable State or Federal law, except to the extent that such law is superseded by this title.

Section 302 provides that if a claimant brings suit without filing a valid settlement claim under Title II, the defendant manufacturer or product seller may tender settlement of the net economic loss and any dignitary loss sought by the claimant, or may offer to arbitrate any dispute over the amount of such loss. The claimant must respond to such tender within 90 days. In lieu of its first responsive pleading, a manufacturer or product seller who has not rejected a valid settlement claim may request the claimant to furnish the information specified in section 203. If the claimant fails to respond, or later introduces evidence which he knowingly failed to provide in response to the request, he shall be deemed to have rejected the settlement offer, and the provisions of section 303 shall apply. If the claimant accepts the settlement offer, his civil action shall be dismissed and he shall be barred from bringing a civil action against any person for the same harm. The manufacturer or product seller may seek reimbursement for the settlement.

Section 303 provides that if the claimant rejects the settlement offer, a $250,000 cap would be placed on the manufacturer's or product seller's liability for noneconomic losses (excluding punitive damages). The claimant's award for economic losses would be reduced in the amount of any insurance or other compensation he has received for the same harm. Joint and several liability would apply only to the extent of such net economic loss; with regard to all other loss,

the manufacturer or product seller would be liable only to the extent of its proportional responsibility for the harm.

Section 304 establishes a uniform standards of product seller liability. A product seller other than a manufacturer is liable only if the claimant's harm was proximately caused by either the seller's own lack of reasonable care or a breach of the seller's own express warranty. However, a product seller shall be liable as if it were the manufacturer of the product if the manufacturer is not subject to service of process or if the claimant would be unable to enforce a judgment against the manufacturer.

Section 305 establishes uniform standards for offset of workers' compensation benefits. Under current workers' compensation statutes, the employer pays workers' compensation benefits in every workplace injury case. This section does not affect workers' compensation statutes, but provides that the workers' compensation system and the tort system are kept separate. The workers' compensation recovery of a claimant would be subtracted from his tort recovery, and the employer would not be permitted to place any subrogation lien on the tort recovery. Likewise, no action for implied indemnity or contribution could be maintained against the employer of the person who was injured.

Section 306 establishes uniform standards for award of punitive damages. Punitive damages are limited to twice the plaintiff's compensatory damages, and may only be awarded if the plaintiff establishes by clear and convincing evidence that the harm suffered was the result of conduct manifesting a conscious, flagrant indifference to the safety of those persons who might be harmed by a product. Such damages may not be awarded in the absence of compensatory damages. While a jury may determine whether compensatory and punitive damages are to be awarded, the court shall determine the amount of punitive damages. Punitive damages may not be awarded where the unsafe aspect of the product that caused the claimant's harm complies with government specifications, standards, or conditions.

Section 307 establishes uniform standards of comparative responsibility in product liability actions. Application of joint and several liability is restricted to those few cases where there is no other way of compensating the plaintiff for his loss. If, after the claimant attempts to collect proportionate shares of his loss from each joint tortfeasor, a defendant is found to be truly judgement-proof, his share of the damages will be divided among the other defendants according to their percentage of responsibility. However, before this sum is apportioned among the other defendants, it shall be reduced by the amount of any collateral benefits that have been received by the claimant. This provision will eliminate the need for costly contribution suits.

Section 308 establishes uniform standards of limitation and repose. All product liability actions are subject to a uniform statute of limitations that runs for two years from the discovery of the harm and its cause. In addition, both the claim system and Title III are subject to a 25-year statute of repose for capital goods, except in cases involving toxic harm. "Capital goods" do not include motor vehicles, or aircraft and other conveyances used primarily to transport passengers for hire.

Section 309 imposes penalties on attorneys who act in bad faith, with intent to delay, or who file suit for purposes of achieving a monetary settlement where there was no reasonable basis for recovery. Such attorneys shall be liable for all the costs reasonably attributable to the conduct, including court costs, fees, expenses, and attorney's fees.

Section 310 establishes record retention requirements. Any party to a civil action who willfully destroys or conceals any relevant materials shall be fined not less than $1000 and ordered to pay the other party's costs, including attorney's fees, incurred in proving the violation, and there shall be a rebuttable presumption that the facts to which the record related are adverse to the position of the party who committed the violation. If a party nonwillfully destroys relevant materials, the court may, in the interest of justice, establish a rebuttable presumption that the facts to which the record related are adverse to the position of the party who destroyed the materials.

Section 311 provides that evidence that a manufacturer or product seller has made an expedited settlement offer or payment to a claimant shall be inadmissible in any other action.

Section 312 restricts the introduction into evidence of remedial measures taken after the claimant's harm. Such evidence is not admissible to prove liability, but may be used for another purpose, such as impeachment.●

NOTICES OF HEARINGS

SUBCOMMITTEE ON DEFENSE

Mr. STEVENS. Mr. President, I would like to announce a Defense Appropriations Subcommittee hearing on AIDS Policy, Testing, and Research in the Department of Defense. On Thursday, May 15, 1986, at 10 a.m., in room SD-192, we will receive testimony from Dr. William L. Mayer, the Assistant Secretary of Defense for Health Affairs, and Dr. Philip K. Russell, the Deputy Commander of the U.S. Army Medical Research and Development Command, on this very serious health problem.

This hearing will focus particularly on DOD's AIDS testing and research programs which address the threat of this devastating disease to our men and women in uniform and to our country's military readiness. The committee is very concerned about the unique problems to military personnel associated with HTLV-III infection. Our military members must deploy worldwide, often to areas with little or no medical support, and there is a critical need to protect blood supplies.

The committee looks forward to this opportunity to receive the most current information available regarding the Defense Department's efforts in this area, and invites all those interested to attend the hearing.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. ROTH. Mr. President, the Committee on Governmental Affairs will hold a hearing on Thursday, May 15, at 9:30 in SD-342 on S. 2197, the Federal Employees' Optional Early Retirement Act of 1986. For further information, contact Dick Schreitmueller of the committee staff at 224-4751.

SUBCOMMITTEE ON PUBLIC LANDS, RESERVED WATER AND RESOURCE CONSERVATION

Mr. WALLOP. Mr. President, I would like to announce for the information of the Senate and the public the rescheduling of a hearing before the Subcommittee on Public Lands, Reserved Water and Resource Conservation of the Committee on Energy and Natural Resources from June 12 to Monday, May 19, 1986, at 10 a.m. in room SD-366 of the Senate Dirksen Office Building, Washington, DC, 20510. Testimony will be received on S. 2204, to amend the Land and Water Conservation Fund Act of 1965, as amended, to permit the use of park entrance, admission and recreation use fees for the operation of the National Park System, and for other purposes.

Those wishing to testify should contact the Subcommittee on Public Lands, Reserved Water and Resource Conservation of the Committee on Energy and Natural Resources, room SD-308, Dirksen Senate Office Building, Washington, DC, 20510. Oral testimony may be limited to 3 minutes per witness. Written statements may be longer. Witnesses may be placed in panels, and are requested to submit 25 copies of their testimony 24 hours in advance of the hearing, and 50 copies of the day of the hearing.

For further information, please contact Patty Kennedy or Tony Bevinetto of the subcommittee staff at (202) 224-0613.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON LABOR AND HUMAN RESOURCES

Mr. LATCH. Mr. President, I ask unanimous consent that the Committee on Labor and Human Resources be authorized to meet during the session of the Senate on Monday, May 12, 1986, in order to conduct a hearing on the nomination of Lynne Chaney to be Chairman of the National Endowment for the Humanities.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

SOVIET EMIGRATION POLICY IS ABSURD

● Mr. WALLOP. Mr. President, for the past several weeks the United States has fielded a delegation to an international meeting of the states which signed the Helsinki Final Act. That meeting is taking place in Bern, Switzerland, and its purpose is to discuss the progress in human contacts between the Western democracies and the Soviet bloc states.

The United States delegation has had an uphill struggle at that meeting to obtain any Soviet cooperation in discussing its human rights record. The Soviets insisted on closing the meeting to the media and the public and then complained in the international press that the United States delegation was being aggressive when it pushed for open debate on Soviet compliance with the human contacts provisions of the Final Act of Helsinki, which the U.S.S.R. signed in 1975.

One reason, Mr. President, is that the Soviet Union and its clients absolutely refuse any open discussion of their emigration policies, even when they are obligated by treaty to do so, as they are at this CSCE Conference at Bern. And the Soviet Union ignores our exhortations concerning its emigration policy in every instance, including such cases as those of Dr. Andrei Sakharov, who still suffers in Gorky in KGB hands for his legitimate human rights activities under the Helsinki Final Act.

I ask that the following article from the May 6 edition of the New York City Tribune be reprinted in the RECORD as a reminder of the absurdity of Soviet emigration policy.

The article follows:

LOGIC BEHIND ABSURDITY IN U.S.S.R.'S EMIGRATION POLICY

(By Lev Alburt)

(A few days ago, my friend Boris Gulko, a former Soviet chess champion and a "refusenik" for the past seven years, phoned me from Moscow. He told me: "I'm very grateful to all who organized and publicized the recent chess tournament in Bern supporting my right to emigrate." Following is an update on remarks I gave March 19 at a press conference held jointly with Rep. Jack Kemp, Rep. Jim Courter and Edward Lazansky, director of the Sakharov Institute, for the purpose of questioning Soviet emigration policy and in particular to highlight the situation of the Gulko family.)

According to Comrade Michael Gorbachev, Andrei Sakharov must remain in Russia because he knows Soviet military secrets. These secrets somehow haven't become obsolete in 20 years.

Boris Gulko and his wive Anna, both former Soviet chess champions, never have had access to any secrets, including those of the mysterious game of chess. For more than seven years they have been trying desperately to receive permission to leave the Soviet Union—all in vain. The Gulkos have a 7-year old son, David, who was born a refusenik.

The brave struggle of the Gulkos, their protests, their hunger strikes, have produced a lot of sympathy in the West. Why, you may ask, wouldn't Soviet leaders, from Brezhnev to Gorbachev, let them go and do what they want to do, namely, play chess and raise their son as a free human being? After all, the USSR spends millions of dollars annually on chess for propaganda efforts, and cases such as Gulko's to a great extent negate these efforts. To answer this questions to understand the hidden sense behind the seemingly absurd emigration policy of the USST, we should take a brief look at the very basics of the Soviet system.

Believe it or not, Soviet "socialism" is simply a code word for state slavery, based almost entirely on terror or on a threat of terror. In order to survive, not to mention obtaining the simple pleasures of life, Soviet "citizens" must behave as if they were devoted servants of their beloved masters of the Politburo, or, in Soviet newspeak, as if they are "Soviet people" who, by definition, love their Communist Party and its general secretary—and have no other goals but to promote the interests of the Socialist Motherland.

To those who find this behavior strange, and who prefer to believe that these backward Russians have been brainwashed by communist propaganda, I would remind them how some hostages of Arab terrorists became aware of the merits of the Palestinian cause—only to return to a normal state of mind immediately after being released.

In order to worship what they hate and to betray what they love, Soviet people must always remember that they are destined to live and die in their country-prison, and thus must learn to adopt to this reality. Ergo, there must be no emigration, and by the way, no religion as well—in other words, no hopes for escape in this life or even in the life hereafter.

When, in the early 1970s, the Soviet rulers had to allow a small fraction of certain ethnic groups (Jews, Armenians, Germans) to emigrate in order to receive Western credits, technology, grain, unilateral disarmament—in short, detente—they were fully aware of the negative effects that this emigration, this minor leak, would have on their system and did their best to minimize these effects.

Haven't you ever asked yourself why a certain medical doctor or a Ph.D. in physics, has been allowed to leave Russia only three months after applying for an exit visa, when an old man or woman not productive any longer, indeed, almost a burden to the state, has been receiving "refuses" year after year? Illogical, you may say—not at all. If the Soviet government allows certain groups of its subjects to leave Russia as they please, these groups would inevitably become virtually independent, no longer forced to play according to the communist rules of the game—and thus a daring example for all.

To ask Gorbachev, for instance, to grant a free exit to all those over 60 is to ask him to put his already shaky empire in great jeopardy, in fact, to dismantle it.

So, under pressure from the West, the Soviet government allows some individuals to go free—and here I should pay a tribute to those Americans who made this wonder of the second Exodus possible, among them Congressman Jack Kemp and that great champion of Soviet people Sen. Henry Jackson of Jackson-Venik fame. But the rules were intentionally made such as to allow no rules, no predictability at all.

As a result, Dr. Edward Lozansky, a physicist and brilliant organizer, is now in America as a director of the Andrei Sakharov Institute, instead of working in some Moscow lab on a Soviet version of Star Wars—while chess players Boris and Anna are challenging the empire in a struggle for their lives.

Can we help Boris and Anna? Definitely yes, and indeed, by our very presence here we are already helping them, protecting them with a shield of public awareness.

Comrade Gorbachev can not let the Gulkos go without raising hopes to others who wish to emigrate—the 7-year-long ordeal of the Gulko family isn't an encouraging example. Just let's make it absolutely clear that Boris and Anna Gulko, their friend Vladimir Pimonov, and all other refuseniks and prisoners are not forgotten, and hopefully they will be released—as Anatoly Shcharansky was.

By the way, we planned to call our tournament "Salute to Gulko and Shcharansky"—Shcharansky is a chess master and probably he would now be a grandmaster if he had not chosen mathematics as his profession.

I hope Gulko, too, is freed soon. The Soviet government needs us—our grain, in particular—more than ever. We should ask Gorbachev to pay for it by getting out of Afghanistan and, yes, by releasing Sakharov and Gulko.

Helping those brave people in faraway Russia is more than a human rights act, more than caring for those in need. Our solidarity makes oppressed people stronger and more determined, and inevitably makes their rulers weaker, their society more open and thus less dangerous for us.

The people of Russia, the people of all nations enslaved by communism, are our natural allies.

Together we will win. Twentieth century slavery will not endure to the 21st century.

I believe that we'll be generous in our victory. The American government will give immunity and asylum to the Gorbachevs and even Congressman Solarz wouldn't ask nasty questions about how many billions in real estate this couple owns in New York City.●

HISTORIC PRESERVATION WEEK

● Mr. ABDNOR. Mr. President, this week is National Preservation Week and across America in large cities and small farm towns, Americans will join in celebrating the 20th anniversary of the National Historic Preservation Act.

The theme for 1986, is "Celebrate Historic Places—Our Past for Our Future." It is a time to look back with pride in the progress which the historic preservation movement has made over the past 20 years and to look to the future with unbridled optimism.

In my own State of South Dakota we are seeing even greater activity in discovering the past history of our State. I recently received a letter from Mr. L. Adrien Hannus, director of the Archeology Laboratory of the Center for Western Studies at Augustana College, bringing me up to date with the activities which are underway in the Badlands of South Dakota to preserve and protect an important archaeological site where people belonging to the "Clovis" culture killed and butchered Mammoths. Mr. Hannus reminded me that this important find could not have been developed without help from the Historic Preservation Fund.

I am proud of the contribution which the National Trust for Historic Preservation has made to our Nation over the past two decades. Under the able leadership of Mr. J. Jackson Walter, we are seeing a broad based movement to plan for the next two

decades as well. We must not rest on past accomplishments, but forge ahead to consolidate the gains which we have made and move toward an even more aggressive national preservation program.

Preservation mean more than preserving and rehabilitating old buildings. It means preserving our past. I salute the work of the trust and also the dedicated efforts of the Historic South Dakota Foundation, Inc. and the Historical Preservation Center at the University of South Dakota to preserve and protect "our past for our future."●

A BAD TRADEOFF IN CHINA: ESSAY BY JENNIFER ROBINSON OF CASPER, WY

● Mr. WALLOP. Mr. President, Jennifer Robinson of Casper, WY, a talented high school student, recently won a nationwide essay contest conducted by the Friends of Free China. The Friends of Free China sponsored the essay contest on the topic, "How Freedom Affects Progress."

I would like to share this thoughtful, prize-winning essay with my Senate colleagues. The essay is timely indeed and points out the advantages of the free, democratic system in Taiwan as compared with the Communist People's Republic of China.

Mr. President, I applaud Jennifer Robinson's fine analysis of what is at stake in China and I ask that her outstanding and praiseworthy essay be printed in the RECORD.

The essay follows:

A BAD TRADE-OFF

They were forced to flee from their homeland, threatened with invasion by neighboring countries, and de-recognized as a nation by most of the world. Yet the Republic of China has risen above these obstacles to form one of the most highly developed nations in the world. Paul Hsu was right when he said, "We have proof that we have a working system, one that other countries would like to imitate." And countries do try to imitate Taiwan's system but with limited success. What accounts for Taiwan's remarkable rise in progress which even their counterparts in Communist China cannot duplicate? It is the elements of freedom. Economic, personal, and political freedom creates a winning combination for progress.

In comparing the economic situations of Mainland China and Taiwan, the results are astounding. In Taiwan, "annual per capita income stands at $2,673.00, more than ten times that of the People's Republic of China."(1) Taiwan is at the forefront of the economic world, while Communist China, with its backward and ill-equipped factories, retains a low technological and quality level. As one of the "Four Tigers", known for the dynamic growth, the Republic of China has prospered by exporting to the U.S., becoming America's sixth-largest source of imports and her sixth-largest over-all trading partner.(2) In fact, Taiwan's industrial output has been so successful that they are now moving up into a higher-quality bracket and are building for themselves a reputation for producing maximum-qualtiy goods. New markets are being planned to boost the industry. Besides an already well-developed $400 million-a-year auto parts industry, Taiwan is this year producing its first wholly Taiwanese-designed automobile for exportation. It is freedom in the marketplace that triggers this individual initiative to produce new and better products.

Although falling exports to the U.S. markets, mainly in the high-tech sector, are curbing their technological growth rates, "Taiwan's economy is still expected to grow 6.3% this year, down from 11% last year. That would be a pretty healthy rate anywhere else in the world, but it's shocking to Asians who suffer from "growth mania", says economist D. K. Patel.(3) The current economic indicators are low by Taiwanese standards only because of its remarkable record over the past twenty-five years.(4) Taiwan's economic performance still ranks sixth among 119 nations and tops all other developing countries. "The indications are that the Republic of China's economy in 1986 is taking a turn for the better, and its exports are also expected to increase by 5.2 percent over last year's.(5)

Across the strait in the Communist People's Republic of China, they are casting envious glances toward the flourishing tiny island. Why is it that Communist China keeps watching Taiwan? The answer, according to Yu-ming Shaw, is clear: "Like them, we are Chinese, but we're a success and free. Our system works. Theirs is a failure. We make them look bad." And the Republic of China does make the Mainland look bad. This enterprising island far outshines what it left behind. The People's Republic of China has every right to be jealous of the great strides Taiwan has taken, which they cannot imitate. Communist China is still a developing country, limited by the absence of freedom. Agriculture is still old and out-dated in its methods, with yields that are insufficient to feed its population. The living standards of the two nations are similarly astonishing in contrast. Shoppers in the People's Republic of China find only sparse supplies on the store shelves.(6) In living standards it ranks 112th of the countries of the world. The Republic of China on Taiwan, on the other hand, boasting one of Asia's highest standards of living, offers a plenteous selection of food and goods.

Economic freedom is a necessity for the progress of a country, but even that cannot be accomplished without personal freedoms. "For economic progress to continue, everyone must have a chance to share in it."(7) The Taiwanese people strive to better themselves and are urged to do so without government restrictions. They are expected to try to succeed regardless of the circumstances and to reach higher social and economic positions and status in their careers. This is in sharp contrast to the people of Communist China who have no choice but to remain on the same socio-economic level throughout life. The government there interferes with the people's private lives. Families are forcibly limited to one or two children and abortions are mandatory for a third. Careers are picked for the individual by the government. As one young Chinese girl stated when asked what she would do upon completing her studies: "Teach of course. I don't have a choice."(9) To have an economy and a nation that works, people must be able to own their own homes, their own land, and their own means of production. They must be free to practice their religions and to observe their country's traditions.(10) This is what Taiwan has and more besides. They have strong family ties and a fierce feeling of patriotism and national pride.

Rapid economic growth, such as the Republic of China's, usually tears apart the political grounding of a society, but their one powerful party has been in control for over four decades—the Kuomintang. Ramon Meyers in *The Miracle of the ROC* on Taiwan said, "No leadership or political party, so defeated, has been able to pull itself up by its boot straps and progress from such lowly straits to develop a society of vitality and energy as has the Kuomintang on Taiwan." As the dominant Nationalist party, the Kuomintang controls most of the government, but there are other political groups as well. Groups of politicians who do not belong to the Nationalist party have still been elected to serve in the government. On the other hand, in Communist China there is only the Communist party ruling with no opposition allowed.

Taiwan's climb to the top has not been easy, but it has been a steady one. It's no wonder that Communist China has now set up a drive for the reunification of themselves with Taiwan. But the Republic of China on Taiwan isn't buying it. That is wise. "The belief that the People's Republic of China is in the process of renouncing communism permanently in favor of capitalism and Western life-styles may be popular in the West, but inside China the state media are saying just the opposite. They say that the "open-door" is necessary to acquire Western technology, but stress, "for cardinal principles": "keeping to the socialist road, upholding the people's democratic dictatorship, maintain the leadership of the Communist Party, and adhering to Marxism-Leninism and Mao Tse-Tung thought." (11) As James Shen said in referring to Communist China's declaration that its handling of Hong Kong would serve as a blueprint for the inevitable reunification with Taiwan, "We've fought communism so long it would illogical to give up now when we're better off than ever. Could any sensible person expect us to trade what we have for the mirage of a blueprint?" Certainly, after comparing the Republic of China on Taiwan with Communist China, it is clear to see that freedom and the progress it brings would indeed be a bad trade-off for a system that does not work.

A TAX REFORM BILL WORTHY OF THAT NAME

● Mr. QUAYLE. Mr. President, 4 years ago this month, I introduced the SELF tax plan of 1982, the first comprehensive tax reform proposal in the Senate. Last Wednesday, Chairman BOB PACKWOOD, with the unanimous support of the Finance Committee, completed drafting a sweeping comprehensive tax reform measure. I am proud to say that the bill reported by the Finance Committee has the same basic objectives of my SELF plan—simplicity, efficiency, low rates, and fairness—which I believe should, and must, guide the revision of our tax system that the American people deserve and demand and that the U.S. economy requires.

I believe that the Finance Committee's plan, which the majority leader has announced will be debated by the full Senate in June, is a major improvement over the earlier House-passed bill. Where the House bill has four rate brackets, with a top rate of 38 percent, the Finance Committee measure has two rate brackets, with a 27-percent top rate. While the House bill provides for a 36-percent corporate rate, the Senate version provides for a 33-percent rate. The House bill increases the tax burden on American business by $140 billion and discourages capital investment, but the Senate proposal provides a tax system that encourages economic efficiency and investment decisions based on business considerations rather than skews in the Tax Code. Although it may include certain specific provisions with which I do not totally agree, or that differ with those of my own SELF tax plan, I believe that the measure the Finance Committee has reported is a tax reform bill truly worthy of that name.

Under the Finance Committee bill, 6½ million low-income taxpayers would be eliminated from the tax rolls. Studies have indicated that the working poor often face exorbitantly high marginal tax rates which provide a disincentive to work. A Tax Code which penalizes those who work is bad welfare economics, and just plain unfair.

The Finance Committee bill represents substantial progress toward a fairer—and simpler—Tax Code in other ways, too. Our current Tax Code with its 14 rates, will be distilled down to just 2 rates, 15 and 27 percent, with nearly 80 percent of all taxpayers paying the 15-percent rate. To ensure that the very wealthy pay their fair share of taxes, this plan provides that certain upper income taxpayers will pay 27 percent on all income, rather than a 27-percent marginal rate. Furthermore, the $2,000 personal deduction, is phased out for those taxpayers earning between $100,000 and $200,000. It should come as no surprise that 30 percent of all itemized deductions are taken by 4 percent of the very richest taxpayers who pay less than 20 percent of taxes.

Prior to the 1981 Reagan tax cuts, our tax system was allowing two regrettable results: the upward creeping of marginal rates, and a constriction of the tax base. Despite the increased marginal rates, Federal revenues have remained relatively constant over the past 25 years. The economic growth that resulted from the 1981 tax cuts is proof that, although higher marginal tax rates do not increase the amount of Federal revenues collected, they certainly increase the economic burden on the economy. Giving further credence to the argument that high marginal tax rates are counterproductive are statistics released by the IRS which show that the share of income taxes paid by the wealthy immediately following the Reagan tax cuts actually increased despite the fact that the taxpayers in the highest rate bracket received the largest rate reduction. The way toward an equitable tax code is through lower rates and a broad tax base.

The American people deserve true and meaningful tax reform, such as that proposed by the Senate Finance Committee. The distortions and undue bias inherent in our current Tax Code must be eliminated in the name of both simplicity and fairness. Once again, Mr. President, I salute the chairman and the members of the Finance Committee for their work in crafting this proposal, which will restore equity, simplicity, and economic efficiency to our tax code.●

BUDGET SCOREKEEPING REPORT

● Mr. DOMENICI. Mr. President, I hereby submit to the Senate the Budget scorekeeping report for this week, prepared by the Congressional Budget Office in response to section 5 of the first budget resolution for fiscal year 1986. This report also serves as the scorekeeping report for the purposes of section 311 of the Congressional Budget Act, as amended.

I ask that the report be printed in the RECORD.

The report follows:

CONGRESSIONAL BUDGET OFFICE,
Washington, DC, May 12, 1986.

Hon. PETE V. DOMENICI,
Chairman, Committee on the Budget,
U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: The attached report shows the effects of Congressional action on the budget for fical year 1986. The estimated totals of budget authority, outlays, and revenues are compared to the appropriate or recommended levels contained in the most recent budget resolution, S. Con. Res. 32. This report meets the requirements for Senate scorekeeping of Section 5 of S. Con. Res. 32 and is current through May 9, 1986. The report is submitted under Section 308(b) and in aid of Section 311 of the Congressional Budget Act, as amended.

No changes have occurred since my last report.

With best wishes,
Sincerely,

RUDOLPH G. PENNER,
Director.

FISCAL YEAR 1986 CBO WEEKLY SCOREKEEPING REPORT FOR THE U.S. SENATE AS OF MAY 9, 1986

[In billions of dollars]

	Budget authority	Outlays	Revenues	Debt subject to limit
Current level [1]	1,057.1	980.3	778.6	2,004.6
Budget resolution, S. Con. Res. 32	1,069.7	967.6	795.7	[2] 2,078.7
Current Level is:				
Over resolution by		12.7		
Under resolution by	12.6		17.1	74.1

[1] The current level represents the estimated revenue and direct spending effects (budget authority and outlays) of all legislation that Congress has enacted in this or previous sessions or sent to the President for his approval. In addition, estimates are included of the direct spending effects for all entitlement or other programs requiring annual appropriations under current law even though the appropriations have not been made. The current level excludes the revenue and direct spending effects of legislation that is in earlier stages of completion, such as reported from a Senate Committee or passed by the Senate. The current level of debt subject to limit reflects the latest U.S. Treasury information on public debt transactions.

[2] The current statutory debt limit is $2,078.7 billion.

FISCAL YEAR 1986, SUPPORTING DETAIL FOR CBO WEEKLY SCOREKEEPING REPORT, U.S. SENATE, AS OF MAY 9, 1986

[In millions of dollars]

	Budget authority	Outlays	Revenues
I. Enacted in previous sessions:			
Revenues			777,794
Permanent appropriations and trust funds	723,461	629,772	
Other appropriations	525,778	544,947	
Offsetting receipts	−188,561	−188,561	
Total enacted in previous sessions	1,060,679	986,159	777,794
II. Enacted this session:			
Commodity Credit Corporation urgent supplemental appropriation, 1986 (P.L. 99–243)			
Federal Employees Benefits Improvement Act of 1986 (P.L. 99–251)		4	
VA Home loan guarantee amendments (P.L. 99–255)		−51	
Omnibus Budget Reconciliation Act of 1985 (P.L. 99–272)	4,259	−6,001	765
Department of Agriculture urgent supplemental, 1986 (P.L. 99–263)			
Advance to hazardous substance response trust fund (P.L. 99–270)			
FHA and GNMA Credit Commitment Assistance Act (P.L. 99–289)		−380	
Total	−4,259	−6,428	765
III. Continuing resolution authority			
IV. Conference agreements ratified by both Houses			
V. Entitlement authority and other mandatory items requiring further appropriation action:			
Veterans compensation	272	185	
Veterans readjustment benefits	91	91	
Compact of free association	205	205	
Special benefits (Federal employees)	14	14	
Family social services	100	75	
Guaranteed student loans	6		

FISCAL YEAR 1986, SUPPORTING DETAIL FOR CBO WEEKLY SCOREKEEPING REPORT, U.S. SENATE, AS OF MAY 9, 1986—Continued

[In millions of dollars]

	Budget authority	Outlays	Revenues
Payment to civil service retirement [1]	(37)	(37)	
Total entitlements	688	570	
Total current level as of May 9, 1986	1,057,108	980,302	778,559
1986 budget resolution (S. Con. Res. 32)	1,069,700	967,600	795,700
Amount remaining:			
Over budget resolution		12,702	
Under budget resolution.	12,592		17,141

[1] Interfund transactions do not add to budget totals.

Note.—Numbers may not add due to rounding.●

MORE THAN LIBYA WAS GROUND ZERO

● Mr. HATFIELD. Mr. President, my opposition to the April 14 bombing of Libya is no secret. Though I was morally outraged by the thought that the United States had sunk so low as to practice "an eye for an eye" diplomacy, I also opposed the bombing because it was just plain counterproductive to our foreign policy interests.

A column entitled, "More Than Libya was Ground Zero," appeared on May 8 in the New York Times. In it, John B. Oakes, the former senior editor of the New York Times, elaborates a point I made on this floor the day after the bombing. He argues that the "impetuous attack . . . put the [NATO] alliance under perhaps the most severe strain in its history." The rosy reports from the recent economic summit do little to diminish the fact that the bombing struck a harsh blow to the NATO alliance.

As we debate in the coming months the appropriate responses to terrorism, I urge my colleagues to consider carefully the long-term implications of the decisions we make. The points Mr. Oakes made are excellent examples of such implications, and I ask that his column be inserted in the RECORD.

The column follows:

MORE THAN LIBYA WAS GROUND ZERO

(By John B. Oakes)

LONDON.—President Reagan's bombing raid over Libya, endangered far more than the Libyans. It endangered the North Atlantic alliance, cornerstone of American foreign policy in the Western Hemisphere.

With his impetuous attack on Libya, Mr. Reagan put the alliance under perhaps the most severe strain in its history. He also put his friend Prime Minister Margaret Thatcher of Britain on the spot. As was reconfirmed only this week at the Tokyo summit by their refusal to endorse military action, not a single one of the alliance's other members approved this method of fighting terrorism.

When the President originally phoned her to say he needed to use American planes based in Britain to insure the raid's success, Mrs. Thatcher replied that she wanted to sleep overnight on his request. She had to weigh her grave political, legal and moral doubts about the raid against Mr. Reagan's arm-twisting and the consequences for Britain and the alliance of her saying "no."

In her eyes, the American military presence in Britain and the future of the alliance were essentially at risk. Her refusal would have immensely strengthened those Washington voices (some in the Administration) already arguing that the United States is militarily overcommitted in Europe, our allies are unreliable and if our bases cannot be used when we think we need them, we should pull back—or out.

This is exactly what a part—but only a part—of Mrs. Thatcher's Labor opposition (now enjoying a modest revival) would like to see. As it is, one unwelcome byproduct of the Reagan raid has been to bring the argument in Britain over the American bases from the fringes of political debate, raised mainly by leftists with little general appeal, into the mainstream, where it has suddenly become a legitimate political issue.

The French have no such problems. They have no American bases. In what one French official sardonically called "a masterpiece of Cartesian logic," the French people—unlike the British—overwhelmingly approved both Mr. Reagan's raid and the French Government's refusal to cooperate with it.

To a visitor in Paris a few days ago, Premier Jacques Chirac tried to explain why. "We are determined to fight terrorism," he said, "but at the same time we can't agree to take action without fully knowing what's going on. In this case, we were in effect confronted with a 'fait accompli.' " One of President Francois Mitterrand's close aides insisted that the President was even tougher on Libyan terrorism than Mr. Chirac; but on the overflight issue there was no difference between them.

Former President Valéry Giscard d'Estaing is one politician unequivocally in support of the raid. When French troops were flown to Chad to protect it from Libyan inroads, he noted, "We flew over some countries without ever asking permission." The implication was that the Americans could and should have done the same.

One major reason for the refusal to open French skies to American bombers en route to Libya is the almost fanatical determination to prove to the world that France is running its own totally independent foreign policy, beholden to no one. One almost gets the impression that even if the French had thought the raid was a good idea, they wouldn't have agreed to it because they weren't part of the planning process.

But hardly anyone in a responsible position seems to have thought it was a good idea. No matter how much they enjoyed seeing the Americans take it out on Muammar el-Qaddafi, few in Britain or France think a raid of this sort could be effective against terrorism originating in Libya or anywhere else.

The British and the French have their own hostages in Lebanon to worry about, as we do; but perhaps more important to them is the destabilizing effect they see on the relatively moderate Arab regimes now obliged to rally round in support of the one Arab leader whom they most distrust.

It might have been a different matter if one could have been sure that Colonel Qaddafi would be eliminated by the raid but chances of that were small. As one major political leader said: "On peut ture la bete; mas il ne faut pas la blesser." ("It's O.K. to kill the beast, but you mustn't wound him.")●

CONTRA AID

● Mr. HATFIELD. Mr. President, anyone who has studied the art of foreign policy knows that one of the greatest geopolitical minds of our century belongs to former President Richard M. Nixon. President Nixon's historic visit to the People's Republic of China gave the world insight into the then-ignored 1 billion people living on the edge of the Soviet Union. President Nixon's pursuit of détente with Moscow taught a suspicious world a lesson about mutual needs without mutual sympathy. The litany is long, and President Nixon's successes changed the dynamic of U.S. foreign policy.

No one in this body need be reminded that I do not always agree with President Nixon's conclusions. He has thoughtfully argued that United States aid to the Nicaraguan Contras is in our best interest and that the April 14 bombing of Libya was justified, for example. Despite his sound logic and artful reasoning, I cannot agree on either point. But no matter; whether or not we agree, I learn a lesson in geopolitical analysis from President Nixon each time he makes a statement on a given policy or action.

A copy of President Nixon's April 21 speech to an American Newspaper Publishers Association luncheon in San Francisco recently came to my attention. Though the primary aim of the speech is support for United States aid to the Contras, its secondary analysis of our appropriate role in such nations as South Korea and the Philippines is nothing short of brilliant. I do not commend this speech to my colleagues for its final conclusion, for I oppose that conclusion. Instead, I commend this speech to my colleagues because we would all do well to learn some of the geopolitical lessons President Nixon has to teach.

I ask that a copy of his speech be printed in the RECORD.

The material follows:

THE CASE FOR AID TO THE CONTRAS

(Address as Prepared for Delivery by Former President Richard Nixon Before the Annual Associated Press Luncheon for the American Newspaper Publishers Association)

The two major foreign policy issues in the news today are the action against Khadafy in Libya and aid to the contras in Nicaragua. Since seventy-five percent of your readers support the President's action in Libya and sixty-five percent oppose his request for aid to the contras, the safest course for me today would be to bash Khadafy. I have decided, however, to address the unpopular issue of aid to the contras. This is not because I want to add to my well-deserved reputation for being controversial but because I profoundly believe that while what happens

in Libya is important, from a strategic standpoint what happens in Nicaragua will have a far greater impact on America's future.

Before discussing the situation in Nicaragua, it is important to put the issue in perspective by analyzing what happened in the Philippines. The role of the United States in deposing Ferdinand Marcos and in recognizing Corazon Aquino as President of the Philippines has been widely applauded. Coupled with President Reagan's statement of March 14, "We believe in human rights and will oppose tyranny right or left," our action in the Philippines has been interpreted by many analysts as signaling a profound change in the Reagan Administration's policies toward friends and allies of the United States who do not measure up to our standards of democracy.

A number of pundits have editorialized that our action in the Philippines provides a formula for similar U.S. intervention to bring about a change of leaders in other countries which are allies of the United States such as Korea, Pakistan, and Turkey. Many of these same analysts, on the other hand, oppose aiding anti-communist rebels in Nicaragua on the gounds that intervention into the internal affairs of a sovereign country violates international law. We should not apply a double-standard in implementing the principle of opposing tyranny. But in applying the principle, it is necessary to make some pragmatic distinctions.

The British historian Paul Johnson has written, "The essence of geopolitics is to be able to distinguish between different degrees of evil." This is an uncomfortable concept for idealsitic Americans, but it is the way things work in the real world. We don't like dictatorships. But we must recognize the differences between communist dictatorships and non-communist dictatorships. A non-communist dictatorship allows some freedoms; a communist dictatorship none. A non-communist regime allows some opposition, and consequently there is a chance for peaceful change. A communist regime allows no opposition. Non-communist governments generally support U.S. foreign policy; communist governments do not. Soviet bloc communist regimes try to export their repression; non-communist regimes do not.

The fact that friendly non-communist dictatorships are the lesser of two evils does not mean that we should do nothing to bring about reform of governments which do not measure up to our standards of democracy. The interests of the people involved in getting better government demand our action. Our own interests are involved because a government which holds power as a result of a free election is a more reliable ally and is less vulnerable to communist subversion.

To qualify for our support, a friendly non-communist government which does not measure up to our standards of democracy should meet these conditions: (1) While we do not demand perfection or a government exactly in our image, we do insist that it must provide some human rights, including a process for peaceful change in a democratic election. (2) It must provide competent leadership and particularly economic policies which can lead to progress for the people. (3) It must have a competent military establishment which is able to maintain internal order and contain communist insurgencies. (4) There must not be a better option—a viable non-communist opposition leadership.

The Marcos government measured up reasonably well on the first requirement. It allowed freedom of religion, some freedom of the press, and flawed though it was, an electoral process which could bring about peaceful change. But its economic policies led to the lowest growth rate in non-communist Asia. Corruption exceeded the acceptable limits in a country where corruption had become a way of life. The armed forces were incompetently led and demoralized. There was a credible non-communist alternative in Corazon Aquino.

It should be noted, however, that what made peaceful change possible was that the United States had leverage with Marcos and influence with the opposition and that Marcos did not resort to force to retain power. This is an unusual confluence of circumstances, and before we try to apply the Philippine example elsewhere we should examine the situation in each country on a case-by-case basis.

Before withdrawing our support from a friendly, non-communist government, we should bear in mind three caveats:

Such an action makes other friendly leaders whose governments do not meet our standards lose confidence in us. They may conclude that being a friend of the United States—far from being beneficial—is dangerous.

Our action may result in a worse government than the one from which we withdrew support. No one can seriously contend that the Iranian people and our own security interests are better served under Khomeini than under the Shah. We should not forget that there were no boat people under Thieu and that the genocide of over two million Cambodians did not occur under Lon Nol.

When we help to depose a friendly, non-communist leader, we take responsibility for what happens under the new leadership. Haiti was ungovernable before the Duvaliers, and Marcos did not invent corruption in the Philippines. Three centuries ago, the English philosopher, Thomas Hobbes, observed: "Democracy is nothing more than an aristocracy of orators." Unfortunately, the Philippines at times resembles that unflattering description. Corazon Aquino is a talented political leader and we should provide generous economic aid to her government. But we could not make a greater mistake than to perpetuate the little-brown-brother paternalism which has contributed to the failure of the Philippines to develop mature, responsible, economic policies. More than political reform, the Philippines needs economic reform so that their progress can begin to match that of their neighbors on the Asian rimland—Korea, Hong Kong, Taiwan, Malaysia, Singapore, and Thailand. Our aid should be provided in a way that will encourage that kind of economic reform.

Korea is being nominated as a likely candidate for American intervention to bring about a change of leadership. But comparisons to the Philippines are superficial and inaccurate. Korea has one of the world's strongest economies with a growth rate of over eight percent projected for 1986. The Korean military is strong, disciplined and competent. Corruption is modest by Asian standards. There is not yet a viable alternative to the Chun government. Some media pundits have observed that since a Catholic cardinal in Korea has criticized the government as did Cardinal Sin in the Philippines, opposition to the government in Korea is similar in magnitude to the opposition which deposed Marcos in the Philippines. They overlook the fact that ninety-five percent of Philippinos are Catholic, compared to less than five percent in Korea.

There is substantial opposition to the government in Korea and President Chun should stay ahead of the curve by adopting reforms voluntarily before he is forced to do so. But before we join or encourage that opposition, we should recognize that instability in Korea could lead to an attack by North Korea and another Korean war in which we would inevitably be involved.

A well-intentioned head of a major U.S. book publishing firm has recently suggested that the United States should withhold economic aid from Liberia until it has free election. If any government needs reform, it is Liberia's. It was our quasi-colony in Africa and has suffered under atrocious government for generations. But if we are to adopt a general policy of withdrawing support from governments which do not meet our standards for free elections, we would have to end aid to every government in Africa—not a very wise, let alone humane policy.

We should use our influence to encourage democratic reform in friendly and allied governments. But we should disabuse ourselves of the naive notion that simply replacing a leader who does not meet our standards is a solution to the problem. We should make as sure as possible that his successor would not make things worse.

We should apply the same pragmatic case-by-case basis in determining when and where we should support freedom fighters against tyrannical communist dictatorships. Americans enthusiastically applauded this statement when it was made twenty-five years ago: "We shall. . .support any friend, oppose any foe to assure the survival and the success of liberty." This is good rhetoric but poor policy.

Most liberals and conservatives agree that the United States should aid freedom fighters in Afghanistan and non-communist Cambodians in Cambodia. The fact that in each case there was invasion across the border gives the justification of international law for such support.

Where we have sharp disagreement is in cases where non-communist rebels are fighting against non-elected, tyrannical communist regimes. Those who oppose aid invoke the principle of consistency. They ask how we can justify opposing rebels in El Salvador and supporting rebels in Nicaragua. The answer is that we should judge a revolution for what it stands for—does it extend freedom or tyranny? We should support our friends in governments like El Salvador who are threatened by rebels who would impose tyranny; and we should support anti-communist rebels fighting against tyranny in Nicaragua. To deny help to our friends fighting for freedom while accepting the fact that the Soviets are assisting their comrades fighting for tyranny is strategically stupid and morally indefensible.

With these principles in mind, we should insist on three conditions for aid to freedom fighters against communist dictatorships: 1) It must be in the interest of the people of the county involved. 2) It must be in our interest. 3) There must be a reasonable chance for success.

By itself, the fact that a country has a communist government does not justify our support of anti-communist freedom fighters. The most obvious example is China. The communist government of the P.R.C. denies many of the freedoms we cherish. Therefore, it meets out first condition but not the second and the third. China does

not threaten America, America's friends, or America's interests. On the contrary, it provides an indispensable counterweight to the Soviet Union which does threaten our interests. It would be a strategic and moral mistake to support a Chinese freedom fighters' movement which had no chance for success.

Poland meets the first and second conditions, but not the third. Replacing the communist regime with a democratic government would be in the interests of the brutally repressed Polish people and in our interests. But a freedom fighters' movement in Poland would have no chance for success. As we learned in Hungary in 1956, any counter-revolution in a country bordering on the Soviet Union would be brutally repressed by the Red Army. It would be a moral and strategic mistake to incite a revolution against a tyrannical communist regime and then stand helplessly by as it is crushed.

A case can be made that our support for freedom fighters in Angola would not be subject to this objection since it does not border on the Soviet Union. The failure of the Soviet Union to come to the aid of its North Vietnamese allies when we bombed and mined Haiphong in 1972, or to give military assistance to Khadafy last week, demonstrates the reluctance of Soviet leaders to commit their military forces in areas not bordering on the Soviet Union.

The clearest case for providing support for freedom fighters is in Nicaragua.

Support for the anti-communist contras is in the interest of the Nicaraguan people, who suffer under a repressive communist dictatorship which denies them any chance to bring about peaceful change.

It serves the interest of the United States. Nicaragua is more important to the United States strategically than the Philippines. It would provide the first Soviet base on the Latin American mainland. But even more dangerous strategically is the threat an avowedly expansionist Nicaragua would pose to its Central American neighbors—not of conventional aggression across borders but going under borders with subversion. Panama would be an obvious target; but there would be potentially a much more dangerous target.

Many years ago, Charles deGaulle remarked, "Central America is an incident on the road to Mexico." We have been fortunate to have a friendly government on our two thousand-mile southern border over so many years. But looking to the future, we must recognize that Mexico has enormous problems. It is plagued by autocratic one-party government, massive, pervasive corruption, a damaging decline in oil prices, a $97 billion foreign debt, high inflation, tragic poverty, and huge unemployment. It is the major source of heroin and marijuana for the United States.

Fortunately, while the Mexican press is overwhelmingly pro-Castro, there is not yet a significant communist subversive movement. Mexico is a country waiting for a revolution. While it is fashionable today to deride the domino theory, the suppression of the contras would free the hands of the Sandinistas to export their "revolution" without borders. This would send shock waves through Central America, which could eventually reach Mexico. We cannot tolerate that risk.

But can the contras satisfy the third condition for support? Is there a reasonable chance they can succeed? The answer is yes, provided we give adequate support and define success properly.

Soviet bloc countries have provided over $500 million in military aid to the Sandinista government the past five years. Iran and Libya alone have provided three times as much support to the Nicaraguan government as the United States has to the contras over the past two years. One hundred million dollars is absolutely essential, but it is not nearly enough. We must not make the mistake we made at the Bay of Pigs twenty-five years ago—to provide enough aid to be blamed for intervening but not enough to succeed.

What do we mean by success? Our goal is not to overthrow the communist government, but to provide the military leverage which, added to economic and diplomatic pressure, would force the Sandinistas to cut back on their armed forces, cease importing arms from the Soviet bloc, quit trying to export their revolution to their neighbors, and negotiate with their non-communist opposition—in effect to comply with the terms of the Contadora process.

Some critics argue that if Nicaragua is so important strategically why do we not send in American forces to drive the Sandinistas out of power? First we must recognize that while we could undoubtedly prevail, overwhelming six hundred lightly armed Cubans in Grenada is a lot different from fighting one hundred thousand Nicaraguans armed with Soviet heavy weapons. But more important, if we conquer Nicaragua, what do we do with it? An American-imposed regime could become as unpopular in Latin America as a communist regime.

The only viable policy is to provide for Nicaraguans willing to risk their lives for their country the means to force the communist government to negotiate with the opposition and to implement the very reasonable proposals of the Contadora nations.

Four major objections have been raised to providing aid to the contras.

(1) Some contend that they are not worthy of support because their armed forces include a number of officers who served in Somoza's army. This argument of guilt by association would lead us to deny aid to Mrs. Aquino's government because her secretary of defense was Marcos' right-hand man in imposing martial law in the Philippines in 1972. The contras are not saints, but their communist opponents are not angels. Guerrilla wars bring out the worst in men. But it should be noted that it is a violation of official contra policy for their troops to use terrorist tactics. When the Sandinistas resort to terror, they are carrying out official communist policy.

(2) Others content that there are not enough contras to give them any chance to succeed. They overlook the fact that there are three times as many contras today as there were in the Sandinista forces at the height of the revolution against Somoza.

(3) The argument used most often against providing aid to the contras is that we should use diplomacy rather than military pressure to convince the communists that they should restore democracy in Nicaragua. The critics overlook the fact that the communist regimes which gain power by force do not give up power peacefully. In any event, the Sandinistas have flatly rejected the peace proposals of the Contadora nations. We should support the Contadora process, but recognize that the only way to get the communists to give more than lip service to the idealistic goals of that process is to back up diplomacy with military pressure. The sad history of the United Nations since World War II and of the League of Nations during the 1920s and 1930s is eloquent proof that diplomacy without military power to back it up is impotent.

(4) The least credible argument against aid to the contras is that it will lead to another Vietnam. This is exactly one hundred eighty degrees wrong. The surest way to make it necessary to send Americans to fight in Nicaragua is to deny aid to the contras. The Nicaraguan communist regime poses a dangerous threat to its neighbors in Central America and inevitably to the United States. The only question is who will fight to remove that danger. If we provide arms to the anti-communist contras, Nicaraguans will do it. If we don't provide arms to the contras, Americans will have to do it. The way to avoid committing American forces is to provide aid to the contras now rather than to be faced by the necessity later of sending in American men to liquidate the Soviet base which will be built if the contra movement collapses.

The stakes are high. What happens in Nicaragua will have worldwide implications. If the contras, with our aid, can succeed, it would be the first time that a Soviet-supported communist government was forced to abandon its repressive and expansionist policies because of the success of a people's counterrevolution. That is why the Soviet bloc is pouring millions of dollars worth of arms into Nicaragua for their communist comrades. We must make sure that our anti-communist friends do not fail because we refused to provide an equal amount of arms for them.

Unfortunately, the battle over aid to the contras has been unusually acrimonious and divisive. What we must recognize is that the question as to whether we aid freedom fighters against communist regimes is a disagreement about policy. Anti-communism is not a policy, it is a faith—faith in freedom. Most Americans support the faith. They disagree as to what policy would best defend and extend the faith. We should debate the policy without questioning the faith of those who disagree with us.

I realize that polls show that most Americans are weary of bearing the burden of world leadership. Our failure in Vietnam, the fact that most nations to whom we provide billions in foreign aid consistently vote against us in the U.N., the failure of most of our European allies to help us in our efforts to punish and deter an international terrorist outlaw, the huge defense expenditures during a budget crunch which causes cutbacks in favorite domestic programs—all of these factors combine to create this attitude: "Why do we have to involve ourselves in places like Nicaragua, Angola, Ethiopia, Cambodia, and Afghanistan? Let us take care of our own problems and let other people take care of theirs."

I understand this frustration, but Winston Churchill gave us the answer in his Iron Curtain speech at Westminster College in 1946: "The United States stands at this time at the pinnacle of world power. It is a solemn moment for the American democracy. For with primacy in power is also joined an awe-inspiring accountability for the future."

Those words are as true today as when he spoke them forty years ago. I first addressed this organization thirty-three years ago at a white tie dinner at the Waldorf Astoria Hotel in New York City. Since that time, I have been around the world many times and have visited most of the countries of the world. I have met hundreds of leaders and thousands of ordinary people in those coun-

tries. Some like us; some envy us; some hate us. But in their hearts most of the people in the world know what every American should know—that without the United States playing a responsible role on the international stage, peace and freedom will not survive in the world. To meet that responsibility is not a burden to be borne grudgingly but an exciting challenge worthy of a great people.

There is enormous power in this room today. As America's leading newspaper publishers, you have the opportunity to help the American people develop the understanding, the wisdom, the maturity, and the will to play that great role which history has bestowed upon us.●

BROOKLYN CENTER IS NAMED ALL-AMERICAN

● Mr. DURENBERGER. Mr. President, each year the National Municipal League and USA Today honor a handful of communities as "All-American Cities."

I am proud that one of the nine cities honored this year is Brooklyn Center, MN.

Brooklyn Center is a first-ring suburb of Minneapolis with a current population of 31,000. Over the years, Brooklyn Center has become known, both nationally and in Minnesota, as a city which places a high priority on voluntarism and high quality local government.

I recall, in particular, holding a hearing of my Subcommittee on Intergovernmental Relations in 1981 at which we were exploring new ways of delivering public services. One of the subjects of that hearing was an innovative concept in housing which Brooklyn Center was launching at that time which provided housing alternatives for older city residents, freeing up their larger homes for new families.

That project, Brookwood, includes 170 apartment and townhouse units. Sixty-five of the units are occupied by former homeowners who were enticed into the project by its quality and its promise of an easier lifestyle. In the process, 65 single-family homes were made available to younger families, many of them at prices well-below the cost of building new homes in more distant suburbs. This innovative housing project was one of the items mentioned by "All-American Cities'" judges in selecting Brooklyn Center.

One of the secrets of Brooklyn Center's success has been its high quality of both elected and administrative leadership.

I am proud that one former Brooklyn Center mayor, Phil Cohen, has been on my Minnesota office staff as a legislative assistant since 1979. The current Brooklyn Center mayor, Dean Nyquist, has served without compensation since he was elected in 1978. Brooklyn Center's city manager Gerald Splinter figures that Mayor Nyquist's spirit of volunteerism and community service has saved the city about $57,000 in the past 8 years.

Mr. President, because of the high honor represented in the selection of Brooklyn Center as an "All-American City," I ask that the following articles on Brooklyn Center and Mayor Dean Nyquist be printed in the RECORD.

The articles follow:

BROOKLYN CENTER IS NAMED ALL-AMERICAN

(By Jim Parsons)

A city that claims it is run by volunteers and by a mayor who is officially paid what he is worth—nothing—became an All-American City Friday.

The volunteers were the key to Brooklyn Center being selected, along with eight other U.S. cities. The mayor's salary, or lack thereof, wasn't. At least, not directly.

The sponsors of the awards, USA Today and the National Municipal League, based their selections on citizen involvement in solving problems. For Brooklyn Center, that means its mediation service for settling disputes, its Peacemaker Center with counseling for individuals and families, and a housing project designed to bring young families into the community.

Mayor Dean Nyquist's salary indirectly reflects that. He considers the time spent on city business his contribution, and that's why he doesn't take any pay. Every year at salary-discussion time, he makes a motion that he be paid nothing. It has come to be known as the pay-him-what-he's-worth motion.

"Everyone laughs when it comes up," City Manager Gerald Splinter said, "but it has saved the city about $57,000."

Nyquist, an attorney and former state legislator, has been mayor since 1978.

Two of the projects that earned Brooklyn Center its award rely heavily on volunteers.

The mediation project, which assisted 350 people last year, is an all-volunteer operation except for its director, Ann Wallerstedt. "Our mediators not only work for nothing," she said, "but they also have to go through 25 hours of training before they start."

The mediators deal with a variety of neighborhood disputes—anything from barking dogs to trees dropping leaves in someone else's yard—as well as interpersonal conflicts, such as a stepfather and stepson disagreeing over disciplinary rules. The purpose is to solve problems before they escalate and end up in court.

The Peacemaker Center offers counseling for a variety of problems including marital difficulties, child and sex abuse and chemical dependence. The counselors are professionals; a church pays the salary of the head counselor. Lawyers, doctors and other volunteers are used when needed to help with some of problems.

The housing project was mentioned in the award because it was an idea that came from the Chamber of Commerce and others and was not hatched at city hall.

The city built 170 condo units, apartments and townhouses for older people. The idea was to attract older homeowners in the city to buy units in the Brookwood project and sell their homes to growing families.

That would help bring new people into the community of 31,000 and replenish the dwindling enrollment in the area's schools.

Singer said most of the units have been sold and there are 65 former homeowners now living in Brookwood. The financing arranged on the project stimulated other home sales.

"We are confident it has worked," he said, "because the kindergarten population (in the Brooklyn Center school district) has gone up."

Other cities receiving All-American status were Mililani Town, Hawaii; Normal Heights, Calif.; Kansas City, Mo.; Highland Park, Ill.; Jackson, Mich.; Grants Pass, Ore.; Cleveland, Ohio, and Lynchburg, Va.

Ninty-three cities entered the competition.

BROOKLYN CENTER VIES FOR ALL-AMERICAN CITY AWARD

(By Mary Jane Gustafson)

Brooklyn Center is among 20 cities in the United States—finalists competing for All-America City Awards for citizen action, effective organization and community improvement.

There were 600 entries in the contest cosponsored by Citizens Forum on Self Government/National Municipal League and USA Today. The field was narrowed to 93 cities, and last month, to the 20 finalists, who made oral presentations Saturday and Sunday at the Omni Netherland Plaza Hotel, Cincinnati, Ohio, at the 91st National Conference on Government.

Eight to 12 cities will be selected the final winners by the panel of 12 judges, who heard the oral presentations. Field verification will be made after the first of the year, and the winners will be announced in April. An awards dinner will be held in Washington, D.C.

The Rev. Dick Rabine, pastor at the Brookdale Covenant Church, presented the Brooklyn Center story, accompanied by a slide presentation. Rabine focused on three projects—the Brooklyn Center Mediation Project, the Brooklyn Peacemaker Center and Brookwood.

"We have thought of our community as an All-America City for a long time, and we welcome this opportunity to try to make it official," Rabine told the judges. He explained the city will celebrate its 75th anniversary in 1986, and added, "Our community has a strong industrial base and a goals-oriented value system that has given us stability in our seven-and-a-half decades of growth and change.

"Public/private partnerships have contributed significantly to our civic successes in Brooklyn Center," Rabine continued. "They have enabled us to develop a proactive sense of community—an ability to anticipate problems and to deal creatively with them."

"Today," Rabine said, "140 community volunteers serve as mediators, case developers, receptionists, child care providers for parents attending support groups, foster parents to college students in need of positive parenting, attorneys as legal advisors, physicians for medical services and pastors who actively support the Peacemaker Center with referrals."

The third major project is Brookwood. Rabine said a community concern arose over the number of aging residents still living in their original homes. "Few moderately-priced homes were available for young families. These conditions contributed to a potential for a deteriorating housing stock, and declining enrollments in two of the four school districts serving Brooklyn Center."

"A survey of 500 elderly Brooklyn Center residents indicated that most wanted to stay in the community, that generally they had resources to live in un-subsidized housing, and that they wanted to escape mainte-

nance costs associated with home ownership," Rabine explained.

Armed with survey results, the Brooklyn Center Chamber, the Community Emergency Assistance Program (CEAP) and city government joined together to explore the potential for a specialized housing project, and a 25-member citizens' committee was formed to work with local senior adults. A developer was selected, financial options explored, a site chosen, and a final development package was recommended to the city. The project includes 170 rental apartments and town homes made affordable, in part, through tax increment financing.

Rabine stressed that the city's administrative team, business community, various churches, civic groups, service clubs, school personnel and a host of citizen volunteers have built a strong tradition of working together for the good of the community. "This shared commitment has resulted in the establishment of numerous programs and community problems and meeting community needs," he said.

Explaining the Brooklyn Center Mediation Project, Rabine said concern development because of an increasing number of single-parent households, a rising need for elderly care, an increase in low-to-moderate income families in rental housing and juvenile problems. "This contributed to stressful family relationships and a dispute between neighbors—all requiring police attention. Ultimately, it led to the formation of a broad-based 35-member task force charged with the responsibility of identifying solutions."

The Brooklyn Center Mediation Project began in June of 1983, after a 15-member advisory board was charged with developing and promoting the project and volunteers were trained. Over 500 people have used services provided by the Mediation Project during its brief two-year history to resolve disputes between neighbors, family members, retailers and customers, employers and employees, and with first-time juvenile offenders, their parents and victims. Voluntary mediation is offered free of charge and is confidential.

"Our second noteworthy project is the Brooklyn Peacemaker Center," Rabine told the judges. "This project developed as a direct result of a need for office space by the Brooklyn Center Medication Project and affordable counseling service for individual and family problems."

Rabine explained how the vacant Brookdale Covenant parsonage, 5136 N. Lilac Drive, was transformed into the Brooklyn Peacemaker Center a year ago after a nonprofit corporation was established to serve as an umbrella structure for the two programs. In addition to mediation and counseling, the Peacemaker Center offers an extended range of human services including Parents Anonymous, personal and group counseling, and supervised visitation for non-custodial parents.

Rabine said that $2.225 million worth of mortgage bond financing was secured to help young families afford homes made available by seniors moving into Brookwood. "More than 120 new families have moved to Brooklyn Center in two years since the bond offering made home ownership possible for them. This healthy influx has begun to restore our housing stock, and inject significant vitality into our community." Rabine explained.

"And we aren't done yet—not by a long shot," he continued. "Last year, our city council appointed a 25-member Year 2000 Committee to analyze trends and concerns likely to affect our community in future decades, and to evaluate current efforts to meet future challenges.

"So, you can see why we in Brooklyn Center describe our community as The Something More City," he said. "The philosophy of our city leaders and residents reflect that there is always something more to be offered, and that there is always something more to be done to meet the needs of the community."

Brooklyn Center's "Volunteer Mayor" Has Donated $54,381 to His Community

(By Jack Tubert)

When he begins his fifth term and the subject of salary comes up, Brooklyn Center Mayor Dean Nyquist will introduce his well-known "Pay-Him-What-He's-Worth" resolution.

Since he was first elected in 1978, Nyquist hasn't taken a dime of the $540 monthly salary payable to the city's chief executive. Instead, by his motion, the money goes into the city's general fund.

A corporation and real estate attorney in a small firm, Nyquist said he makes a good living without the city's money.

This has saved Brooklyn Center about $54,381 through October, and has made Nyquist a rarity in mayoral circles. No other Minnesota city with a population exceeding 30,000 has an unpaid mayor, he said (Brooklyn Center's population is 31,230). The Minnesota League of Cities lists seven cities with populations between 30,000 and 36,000. Their annual mayoral salaries range from $5,200 in Coon Rapids to $10,188 in Moorhead.

And Nyquist points to a directory of U.S. mayors of cities Brooklyn Center's size that also shows no other volunteer mayors.

He doesn't decline the salary to be unique; he is simply a community volunteer.

City Manager Gerald Splinter said, "Coaches in the Little Leagues and people elsewhere across the city volunteer their time and their talents to the community. Since he hadn't had time to develop the skills needed to coach baseball, the mayor feels he has skills in government to offer. So he serves as mayor without salary; that's his volunteering."

Nyquist's government skills stem from his 1967-72 stint in the Legislature, where he once was listed as Minnesota's third most conservative state senator.

Volunteering is a key component of his conservative philosophy, and he promotes it every way he can.

"I like to get people involved in projects, like the current Year 2000 Committee. Already it is looking ahead to the city's needs," said Nyquist.

A task force of volunteers has been formed to decide what the city should do with the Earle Brown Farm complex, which the city recently bought.

Nyquist also boasts of the city's volunteer partnership of industry and parents caring for kids after school.

City public-private programs and volunteer projects for youth earned a salute last summer from the National Conference of Mayors. One such program, which helps redirect juvenile offenders, was started with $2,000 in "seed money" that in effect came from Nyquist's untapped salary. Today it is self-sufficient and quite successful, he said.

Such civic involvement has helped make Brooklyn Center one of 20 semifinalists in the 1985 All-America City competition. The final phase of the competition will be held Saturday in Cincinnati.

When his fifth term ends in 1987, Nyquist's total salary contribution to the city will be just shy of $65,000.

He declines to discuss seeking to tie or break Brooklyn Center's record of six consecutive terms by a mayor. That was set by his predecessor, Phil Cohen, now a member of U.S. Sen. Dave Durenberger's staff. Cohen remains active on civic committees and calls Nyquist "a very dedicated mayor; he's kept his conservative manner, but is very receptive to new creative ideas."

Nyquist will be 51 in January. He was born the son of a farmer in Brule, Wis. The family moved to Hoffman, Minn., when he was 8. He earned a degree in electrical engineering from North Dakota State University, and worked as a manager in an electrical department at Honeywell before embarking on a law career.

When he does leave politics, the mayor said, he might try his hand at the restaurant business. He recalled telling that to a friend, who asked if Nyquist was ready for an 80-hour work week. Nyquist's answer? "Why not? it's less than I work a week now!"

Brooklyn Center Looks Ahead to the Year 2000

(By Leonard Inskip)

Brooklyn Center hopes to shape its future rather than merely respond to events as they occur. Its plan for doing so is a useful model for other Minnesota cities, particularly maturing suburbs.

While day-to-day municipal problems are important, "there needs to be more time, energy and effort directed toward . . . a . . . strategic perspective for Brooklyn Center," said a committee that looked ahead to the year 2000. "If our community is to be vital in the coming decades, we must anticipate trends, problems and issues and attempt to mitigate or avoid their negative impacts and take advantage of the positives."

A key element in that strategy is a concise, simple chart that matches trends and issues with impact areas. The chart cuts through the complexity of trends and issues and presents them understandably. It also can help officials and citizens readily make comparisons and connections between issues.

The 13-member committee, drawn from government and the public, listed issues and trends vertically on the chart. It listed horizontally nine possible impact areas—for example, housing and planning.

James Barton, director of planning assistance for the Metropolitan Council, says Brooklyn Center is a planning leader. He hopes other communities will look at its "unique process." Phil Cohen, an aide to Sen. Dave Durenberger, says Brooklyn Center is identifying "what's needed by first-ring suburbs over the next decade." Cohen, a former Brooklyn Center mayor, was on the Year 2000 Committee.

Brooklyn Center's population and housing are aging. Single-parent households are increasing. Commerce and industry are expanding, helped by the opening of Interstate Hwy. 94 to downtown Minneapolis.

Although established in 1911, Brooklyn Center had most of its residential growth after World War II. By 2000, that housing will be 30 to 40 years old, a time when rejuvenation often is needed or decay sets in.

A middle-income community of 31,000 people, Brooklyn Center has more blue-

collar than white-collar workers. Much of the housing consists of three-bedroom ramblers of 900 to 1,000 square feet, with single-car garages. To encourage remodeling, so that houses attract future buyers, the city may need to revise codes governing setbacks for additions. It might offer advice on reinsulation, new heating systems and other home improvements. The Year 2000 chart shows housing affecting city council policy, city planning and city services. The committee suggested that the city's Housing Commission "recommended financial and informational mechanisms to assist homeowners in major maintenance and energy modernization projects."

The aging of residents produced a comment in all nine impact areas on the chart: The city may need to develop new services for the elderly and new housing options that encourage turnover of empty-nester homes to younger families.

Other issues raised by the committee ranged from recycling and storm drainage to historic preservation and schools.

Another was an increasing potential for city involvement in human services. Once, municipal governments dealt mainly with fire, police and physical development. New problems include battered women, single parents, the elderly, the handicapped. Suburbs usually lack much experience with social programs, says City Manager Gerald Splinter, but "the report tells us to start thinking." The report urged the city council to ask the city's Human Rights Commission to recommend "guidelines for evaluating new social and human-resource service needs."

Splinter notes how one new program may affect others. The Human Rights Commission's efforts for handicapped accessibility, including a booklet listing accessible businesses, attracted new handicapped residents. That created a need for better sidewalk snow removal. More handicapped residents also means more stalled wheelchairs to respond to.

A Target store planned in 1984 illustrated the problem of reacting rather than anticipating. Worried about traffic flows, the city declared a three-month moratorium on retail development while it studied traffic. Today, Brooklyn Center's traffic data is computerized for the first time.

"If the new process works, the city council will spend money to solve a problem before a crisis comes," Splinter says. But such decisions won't be easy. "It's tough to get money for a potential problem."

Splinter says another key to success will be joint biennial meetings of all city agencies and commissions to update the Year 2000 report, so that it evolves with city needs. The first meeting is proposed for 1987.

Brooklyn Center is a candidate for an All-America City award in 1986. No judgment is possible here on most Brooklyn Center programs. But an All-America City should be one that looks beyond today so that it can better manage tomorrow. In that sense, Brooklyn Center is a winner already.●

JOSEPH E. KELLER, COUNSEL EMERITUS FOR PRIVATE CARRIER CONFERENCE

● Mr. GLENN. Mr. President, as a Senator from Ohio and a member of the Senate truck caucus, it gives me a great deal of pleasure to note that Joseph E. Keller, founding partner in the Washington, DC-based law firm of Keller & Heckman, has been named counsel emeritus for the Private Carrier Conference, after a long and distinguished career in which he served as the group's general counsel.

The Private Carrier Conference is the largest of 11 conferences affiliated with the American Trucking Association. It represents manufacturers, distributors, shippers, and receivers who operate motor trucks as an extension of their primary business endeavors. Private carriers are the dominant sector of the trucking industry today, hauling nearly 60 percent of the Nation's intercity truck-ton mileage and operating 6 million vehicles.

Joe Keller was born in Dayton, OH, in 1907. He graduated from the University of Dayton in 1928 with an A.B. degree, and received his law degree there in 1930. He was admitted to the Ohio Bar and began practicing law in Dayton.

When the Federal Communications Commission was being organized in 1934, he was asked to go to Washington by James Cox, newspaper publisher, family friend, and former Ohio Governor. Ohio's loss was Washington's gain. Soon thereafter he joined the Washington law firm of Dow, Lohnes & Albertson where he began his work with the Private Carrier Conference. During World War II he served as a major in the U.S. Army, after which he returned to the law firm.

In 1962, he founded his own firm, Keller & Heckman, with Jerry Heckman, a former colleague. He has served as a law instructor and contributed numerous articles to leading law reviews. He has also served as legal editor of the Private Carrier.

I know that my colleagues join me in congratulating Joe Keller for his dedication, his many outstanding achievements and responsibilities in the motor carrier industry, and his effective contribution in the Nation's search for a responsible transportation policy.●

NAVY CELEBRATES 75TH ANNIVERSARY OF NAVAL AVIATION PROGRAM

● Mr. WILSON. Mr. President, on Thursday, May 8, I inserted in the RECORD a tribute for the Navy's 75th Anniversary of the Naval Aviation Program. Due to a clerical error, a letter I sent to Secretary of the Navy John Lehman was inadvertently omitted. I ask that the letter be printed in the RECORD at this point.

The letter follows:

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC, May 8, 1986.

Hon. JOHN F. LEHMAN, JR.,
Secretary, Department of the Navy,
The Pentagon, Washington, DC.

DEAR MR. SECRETARY: Last year, the Senate Armed Services Subcommittee on Sea Power and Force Projection strongly supported your request for nine P-3C aircraft to meet your Barbers Point squadron transition and the initial procurement of P-3C aircraft for the first Naval Reserve P-3C squadron in Fiscal Year 1988. We also approved an additional Update III retrofit kits that were added to your requested 15 kits in the FY '86 Appropriations Bill, to accelerate modernization of the fleet.

Recently, you announced the Navy's plan to procure 125 P-3D's beginning in Fiscal Year 1989. Because of growing Soviet submarine threat, I fully support the need for the P-3D. I applaud your efforts regarding the upgrading of the avionics system and planned incorporation of more fuel efficient engines which will provide a significant increase in this weapon system's capability. Your support, with respect to P-3C procurement through FY '88, is essential in maintaining an adequate force structure.

It is my understanding that nine P-3C's are needed in Fiscal Years '87 and '88 to complete procurement for the first P-3C reserve squadron, to continue the Barbers Point transition, and to support the critical ASW aircraft requirements of a key NATO ally. I am sure that you fully appreciate the need to maintain the current production line of this proven ASW asset as the program proceeds from the "C" and the "D" configuration.

Be assured of my strong support for the funds and program in the President's request and in the smooth orderly transition from the P-3C to the P-3D.

Thank you for your support and consideration on this important matter.

Sincerely,

PETE WILSON.●

INNA MEIMAN'S PAINFUL PLIGHT

● Mr. SIMON. Mr. President, Inna Meiman is a woman in pain. She is in physical pain and in mental anguish.

A member of my staff, Pamela Huey, visited Inna Meiman in her Moscow apartment May 9. Inna's husband, Naum Meiman, had gone to the country because the pressure on him had become unbearable.

The Meimans are seeking to emigrate to Israel. Inna Meiman is critically ill with cancer and holds out hope treatment she would receive in the West would cure her.

Soviet doctors have performed four operations on Mrs. Meiman's malignant tumor but they say there is nothing more they can do for her.

Inna Meiman said her pain is constant. Only occasionally, when she sits very still, does the pain subside somewhat. But she says she is also in pain watching her husband, knowing what he is going through.

I implore the Soviet Government to allow the Meimans to leave. Why the Soviets refuse to let this kind, wonder-

ful couple emigrate is beyond my imagination. They both deserve the best life has to offer and not the death that is sure to come for Inna if she is denied permission.●

THE STRATEGIC DEFENSE INITIATIVE INSTITUTE

● Mr. LEVIN. Mr. President, I would like to address the Senate today about the Strategic Defense Initiative Institute. The Department of Defense announced its intention to create this Institute on March 18, 1986, in the Federal Register. It is an important new research center which the Department of Defense has proposed to provide the Government with independent, objective scientific advice about the Strategic Defense Initiative Program, also known as star wars.

The SDI Program could use an objective research center. The program has so many technological questions that our best scientists cannot agree on the program's feasibility, much less its ultimate characteristics. Moreover, the country is making a huge investment in the program—over $2 billion this year with a pending budget request for almost $5 billion next year. So when I heard that DOD was proposing a new institute to evaluate ongoing SDI research, I wanted to find out more about it.

In an exchange of letters with the Defense Department, I learned a great deal about the proposed Institute. I want to share that information with the Senate, and copies of the correspondence will follow these remarks. Some of what I learned was also troubling, and I want to share my concerns with the Senate as well.

First, some background. I learned that, officially, the Institute would be a federally funded research and development center or FFRDC. FFRDC's formation and operation are controlled by executive directives designed to ensure these organizations' independence, competence and cost effectiveness. The directives require a Federal agency wishing to create a new FFRDC to assess the need for the research center. If the assessment is favorable, the directives permit the agency to contract with a private entity to manage the center for a maximum of 5 years. The directives caution the agency that it must establish a center which will maintain its independence from the Government to ensure its objectivity. They also require the agency to implement controls to assure the reasonableness of the center's expenses.

After reviewing these directives, I began to ask some questions about the SDI Institute. I asked the Defense Department for the names of those "certain prominent individuals in the science fields" whom Secretary Weinberger has invited to form the organization to run the Institute. The Defense Department has so far refused to identify these individuals—even though these individuals have agreed to submit a proposal to run the Institute, and even though the Department is not planning to invite anyone else to bid on the project.

Given the potential significance of the Institute in evaluating the SDI Program, the public and Congress have a right to know full details about the project and the people their Government is dealing with, on a sole-source basis, to manage the research. The Defense Department has, in some respects, been very forthcoming about the SDI Institute; I urge them not to shy away from the full public discussion that should and will attend any undertaking of this kind.

Another concern I have about the Institute arose when I asked the Defense Department about how the Institute's personnel would be selected. I was told, to my surprise, that the Strategic Defense Initiative Organization was planning to participate in the selection of the Institute's chief executive and about a dozen senior staff members. That wasn't the response I was expecting.

In most cases, the Government plays no role in an FFRDC's hiring decisions beyond expressing approval or disapproval of the person proposed by the contractor to be the chief executive. The chief executive of one DOD-sponsored think tank, the Center for Naval Analysis, has been selected and retained even in the face of express Government opposition. That's because one of the quickest ways to weaken an FFRDC's independence is to allow the sponsoring agency to influence its personnel decisions. The extensive role envisioned by SDIO is simply unprecedented in DOD-sponsored FFRDC's, and Congress should not sit still for it.

I was further surprised to learn that the Defense Department was not planning to ask any outside experts to review the management proposals it receives regarding to SDI Institute. The peer review process is our best means for ensuring high-quality scientific endeavors, and our Nation's scientific capability is built upon it. It is clearly appropriate here. In light of the millions of dollars that may be used to fund the Institute and the important work it would be doing, the need for a peer review to ensure a successful operation is too critical to ignore.

Finally, I learned that the Defense Department does not intend to address a revolving door problem that may attend the operations of the SDI Institute. Unlike many other research centers, the SDI Institute will be expected to spend a significant portion of its resources on reviewing research performed by other parties. Absent rules to the contrary, an Institute employee could advocate funding for a particular firm's proposals and, a few weeks later, take a job with that same firm. This possibility may taint the proposed Institute's objectivity and should be addressed.

The SDI Institute could make an important contribution to an objective assessment of the SDI Program—but only if it is a truly independent body. Independence is the critical requirement—otherwise the Institute may become the equivalent of scientific window-dressing.

The Defense Department has indicated its willingness to consider the issues I have raised. I am hopeful that most if not all of them can be promptly resolved administratively. If not, I will pursue legislative remedies, and I hope that my colleagues will join with me in this effort. The proposed Institute is too important not to take the steps we must to ensure its independence.

I ask that the attached letters be printed into the RECORD.

The letters follow:

U.S. SENATE, COMMITTEE ON GOVERNMENTAL AFFAIRS, SUBCOMMITTEE ON OVERSIGHT OF GOVERNMENT MANAGEMENT,
Washington, DC, April 9, 1986.

Hon. CASPAR WEINBERGER,
Secretary, Department of Defense, The Pentagon,
Washington, DC.

DEAR MR. SECRETARY: On March 18, 1986, the Department of Defense published in the Federal Register a notice of intent to establish a new Federally Funded Research and Development Center (FFRDC) designated the Strategic Defense Initiative Institute (SDII). Please provide the following information about this proposal:

1. In accordance with section 6(a) and (b)(1) of OFPP Policy Letter 84.1 (April 4, 1984), prior to announcing its intent to establish the SDII, the Department is required to assess the adequacy of existing alternative sources to accomplish the same objectives.

a. Please identify by name and job title the persons who performed this assessment and the date on which the assessment was completed.

b. Please identify each alternative source assessed and explain why each was found inadequate. In particular, please explain why the Department concluded that an existing FFRDC or national laboratory could not accomplish the same objectives at a lower cost.

c. Is the Department's assessment of existing alternative sources contained in a written report? If so, please submit a copy with your responses to these questions.

2. Please describe the expected organizational structure of the SDII.

a. Will the federal government or a private entity own the SDII?

b. Please indicate the type of organization expected to manage the SDII—will it be a university, consortium of universities, other nonprofit organization, or industrial firm?

c. Please identify by name and address any organization which is under consideration or has been selected to own or manage the SDII.

3. Will the SDII operate under a general charter from the government or pursuant to specific federal contracts? Please elaborate.

a. Will the SDII be capable of performing in-house scientific analysis and technical evaluations or will it contract with outside entities to perform these tasks?

b. Will the SDII perform primary research or be limited to reviewing research performed by others?

4. What will be the relationship between the SDII and the Strategic Defense Initiatives Office ("SDIO")? Will there be any overlap in personnel? Please describe how the SDII will differ in its operations and mission from the SDIO.

5. What will be the relationship between the SDII and existing FFRDCs and national laboratories performing research for the Strategic Defense Intiative Program? Will other FFRDCs and the national laboratories continue to perform research for the Strategic Defense Initiative Program? Will these other entities be subject to review by the SDII?

6. What will be the relationship between the SDII and privately-owned firms? Will the SDII be able to award or otherwise participate in the decisions to award federal research and development contracts to these firms? Please explain.

7. In accordance with section 6(c) of OFPP Policy Letter 84-1, has the Department executed a contract, legal instrument, and/or written agreement of sponsorship with any party concerning the SDII? Is the Department currently engaged in negotiating or drafting these documents? Please submit a copy of any executed document with your responses to these questions.

8. How many persons are expected to be employed by or otherwise funded by the SDII during calendar years 1986 and 1987?

9. Who will have input into the selection of personnel and how will this process work? Who will have final authority to select personnel?

10. Please identify by name, job title and address, the person, if any, who has been selected to head the SDII.

11. OFPP Policy Letter 84-1 indicates that FFRDCs are to "operate in the public interest free from organizational conflict of interest" and are to maintain their "objectivity and independence" from the sponsoring agency. Sections 5(C)(2)(e) and 6(C).

a. Will persons working for the SDII be federal employees subject to federal conflict of interest laws? If not, what measures will be taken to safeguard the SDII from conflicts of interest including the "revolving door"?

b. What measures will be taken to assure that the SDII will maintain its objectivity and independence from the Department of Defense and SDIO? In particular, what steps will be taken to assure that the SDII is staffed with persons holding a variety of viewpoints on the feasibility and cost effectiveness of the Strategic Defense Initiative Program?

12. What is the projected budget for the SDII during fiscal years 1986 and 1987?

a. What are the SDII's projected startup costs?

b. Will the SDII require the construction or rehabilitation of any facilities? Where is the SDII expected to be located physically?

c. What are the SDII's projected operating costs during fiscal years 1986 and 1987?

13. What will be the initial source of funds for the SDII? Will the Department request new budget authority or will it re-direct funds from existing programs? If it plans to redirect funds from existing programs, which programs will be affected?

14. Since the SDII will perform research in a noncompetitive environment, what controls has the Department established in compliance with section 6(b)(4) of OFPP Policy Letter 84-1 to ensure that the SDII will provide services at a reasonable cost?

Please provide this information as soon as possible, but no later than April 14, 1986. If you have any questions, please have your staff contact Elise J. Bean of the Subcommittee's staff at 224-3682. Thank you for your assistance in this important matter.

Sincerely,

CARL LEVIN,
Ranking Minority Member.

DEPARTMENT OF DEFENSE, STRATEGIC DEFENSE INITIATIVE ORGANIZATION,
Washington, DC, April 16, 1986.

Hon. CARL LEVIN,
U.S. Senate,
Washington, DC.

DEAR SENATOR LEVIN: Secretary Weinberger has asked me to respond to your letter dated April 9, 1986 requesting information about the Strategic Defense Initiative Institute (SDII). These responses correspond to the numbering in your letter.

1. (a) The assessment was an evolutionary process in which a number of individuals participated. The assessment was presented orally to the Secretary, and reviewed and approved by him, in early January of this year. It was dated in final written form March 1, 1986. The individual with present overall responsibility for the assessment is Mr. Richard Sybert, Special Assistant to the Secretary and Acting Project Officer for the SDII.

(b) The SDII will perform two basic functions: (i) ongoing, overall systems architecture work at the "macro" level, involving integration of research from an overall, cost-efficiency and tradeoff perspective; and (ii) evaluation and coordination of the research performed by private industry and other outside entities. The advice and recommendations of the SDII thus may affect the overall direction of research. Accordingly, in order to provide the SDIO with absolutely objective advice, the SDII will not be permitted to have any other SDI-related work, nor to serve other clients who themselves have such work. We judged it best, in order to meet this requirement and to provide the SDIO with objective, conflicts-free advice, to opt for a new organization. The purpose is precisely to avoid any bias, unintentional or otherwise, in evaluating SDI-related technology for a future national decision by the responsible authorities on a strategic defense program.

Specifically, we considered three basic categories of organizational forms that realistically might meet the technical support needs of the SDIO:

(i) Government organizations, including expansion of the present SDIO staff, a military organization, or a new DoD field agency;

(ii) For-profit firms, including large industrial firms, small-to-mid-size system engineering and technical assistant (SETA) contractors, or a new consortium of such firms or contractors, either U.S. or foreign;

(iii) Non-profit firms, including existing federally funded research and development centers (FFRDCs), a new division within an existing FFRDC, a new FFRDC, universities, and private not-for-profit laboratories/corporations, new or existing.

Our assessment of each category was as follows:

(i) The use of a government organization to provide the special technical support needs of the SDIO was found to be undesirable for two main reasons: it would be difficult to attract, retain, and manage the required number of highly qualified scientific and engineering personnel; and the needed personnel buildup could not occur sufficiently rapidly, nor respond sufficiently quickly to changing requirements.

(ii) The use of for-profit firms was found to be undesirable because of the conflicts of interest inherent in the for-profit organization approach; the probable inability to ensure total objectivity and independence of thought; and the negative business impact on such a firm through its necessary dedication to SDIO technical support alone.

(iii) Of the various not-for-profit alternatives examined, a new FFRDC ranked highest. The FFRDC mechanism was considered to offer quick, responsive handling of SDIO needs, while allowing considerable freedom in establishing salary structures and working environments conducive to attracting top scientific and engineering talent. While reliance on an existing FFRDC or other non-profit organization potentially would provide more readily or more quickly available capability and staff, none was found to have the breadth of specialized expertise to undertake major SDI technology program review and oversight. Any existing organization, including an existing FFRDC or national laboratory as identified in your April 9 letter, necessarily will have ongoing work, and a deeper background, in one technology or another. Nor would any organization already in existence be in a position to offer the desired degree of dedication to, and exclusive focus on, the SDI program. The establishment of a new FFRDC, specifically oriented to SDIO technical support needs, was found to be likely to result in materially greater responsiveness and support than trying to reorient an existing FFRDC.

(c) We respectfully decline to provide a copy of the written assessment. It is an internal, confidential working paper prepared pursuant to internal Executive Branch policy. Please note, however, that I and my staff are willing and available to discuss the substantive matters treated in the assessment with you and your staff.

2. The expected organizational structure of the SDII has not been finally determined. At this point, however, we expect that it will be structured to maximize effective liaison with the SDIO.

(a) An FFRDC is an independent, private, not-for-profit organization.

(b) See above.

(c) The Secretary has invited certain prominent individuals in the science fields to form an organization that will submit a proposal for the SDII. No commitment has been or will be made until such a proposal is received, reviewed, and evaluated.

3. It is presently anticipated that SDIO will enter into a contract with the SDII for an initial term of five years.

(a) It is presently anticipated that the SDII will perform in-house scientific analyses and technical evaluations at the macro or integration level, as discussed above. Other SDI work will continue to be performed, as now, by outside entities.

(b) As discussed above, the SDII would perform primary research at the macro or integration level. Other research will continue to be performed by other entities, and would be reviewed by the SDII.

4. The SDII will provide technical support to the SDIO in the basic two functions described above, ongoing systems architecture work at the macro or integration level, and evaluation of outside research. The SDII will be a purely technical support group. The SDIO will retain all management and decision responsibility for the SDI program.

5. In the source of its evaluation function, the SDII may undertake research audits of other entities, including other FFRDCs and national laboratories, that are performing research for the SDI program. It is not anticipated that there will be any direct contractual relationship between the SDII and such other entities.

6. It is expected that the SDII will provide advice, recommendations, and evaluations to the SDIO that as a practical matter may impact upon the latter's decisions to award federal research and development contracts to other entities. The SDII will have no formal or legal role in such awards, however, as all management and decision responsibility will continue to be exercised by the SDIO. It is possible that the SDII may subcontract in appropriate circumstances.

7. There is no such executed contract, legal instrument, and/or written agreement of sponsorship at present. The SDIO is currently engaged in drafting a sponsoring agreement.

8. The number of personnel for the SDII during calendar years 1986 and 1987 is presently uncertain. The proposal that we anticipate we will receive presumably will identify the level of personnel thought to be required to meet the stated functions of the SDII. We would expect to discuss the matter in subsequent negotiations and discussions.

9. As private organizations with independent management, FFRDCs themselves have final authority to select their personnel. However, the SDIO expects to work with the SDII in identifying needed personnel functions, and may review potential candidates for senior positions.

10. No such person has yet been selected.

11. Please see discussion above regarding the necessity for the SDII to be objective and conflicts-free.

(a) SDII personnel will not be federal employees. The OFPP letter to which you refer speaks to organizational conflicts. We expect to incorporate appropriate provisions in the sponsoring agreement under the which SDII employees would safeguard information owned by other contractors.

(b) As a private organization with independent management, the SDII will be expected to maintain the necessary objectivity and independence from other entities. Naturally there will be close liaison between the SDII and SDIO, since the purpose of the SDII is to provide the SDIO with needed technical support. The SDIO will give the SDII direction and input regarding missions and activities. With regard to your inquiry as to "what steps will be taken to assure that the SDII is staffed with persons holding a variety of viewpoints on the feasibility and cost-effectiveness of the strategic defense initiative program," the mission of both the SDII and its personnel will be to provide objective evaluation and advice. No particular "viewpoint" on feasibility or cost-effectiveness is being sought; technical expertise and objectivity are being sought.

12. There is no projected budget at present for the SDII during fiscal years 1986 and 1987. We anticipate that the proposal we expect to receive will contain detailed cost estimates, which will then serve as the basis for subsequent discussion and negotiations.

(a) Please see above.

(b) The SDII will be required to be physically located within the metropolitan Washington, D.C. area, to facilitate effective liaison between it and the SDIO. It is expected that the SDII will arrange for necessary physical space in the normal course.

(c) Please see above.

13. The initial source of funds for the SDII is expected to be existing appropriated funds for the SDII. We are presently examining the programs from which the funds might be reprogrammed.

14. We intend to include provisions in the sponsoring agreement that will provide for the indicated controls.

I hope that this answers your questions in a satisfactory manner. My staff and I remain ready and willing to answer your further questions.

Yours truly,

JAMES. A. ABRAHAMSON,
Lieutenant General, USAF,
Director, Strategic Defense Initiative Organization.

U.S. SENATE, COMMITTEE ON GOVERNMENTAL AFFAIRS, SUBCOMMITTEE ON OVERSIGHT OF GOVERNMENT MANAGEMENT,
Washington, DC, May 9, 1986.

Hon. JAMES A. ABRAHAMSON,
Director, Strategic Defense Initiative Organization, Department of Defense, The Pentagon, Washington, DC.

DEAR GENERAL ABRAHAMSON: Thank you for the prompt response to my letter of April 9, 1986, regarding the expected structure and operation of the proposed Strategic Defense Initiative Institute (SDII). I appreciate the information you and your staff have provided to my office about this project. I do, however, have several specific concerns about the Defense Department's proposed handling of the Institute.

First, I object to the Defense Department's refusal to provide a copy of the assessment report required by OFPP Policy Letter 84-1 (April 4, 1984). This report is not an informal "working paper" of the Defense Department, but a formal document required under an existing, government-wide procedure to justify creating another Federally-Funded Research and Development Center (FFRDC). *See* OFPP Policy Letter 84-1, Sections 6 (a) and (b)(1). A federal agency may not sponsor a new FFRDC absent this assessment. Since a copy of the assessment report is essential to a review of the Department's compliance with the applicable executive directives, I urge you to supply a copy.

Second, I object to the Defense Department's refusal to identify "certain prominent individuals in the science fields" whom Secretary Weinberger "has invited . . . to form an organization that will submit a proposal for the SDII." I understand that these individuals have agreed to submit a proposal. Moreover, I am told they will be the only ones invited to submit a proposal to operate the SDII. If so, the public and the Congress have a right to know who has been extended the privilege of dealing with the federal government on a sole-source basis concerning a long-term contract.

If my information is incorrect and the Defense Department intends to consider a number of proposals to operate the SDII, please so state. In addition, please identify those persons and organizations which have already contacted the Department and indicated their interest in operating the SDII as well as those persons and organizations from which the Department is soliciting or has solicited SDII proposals or with whom the Department has conferred concerning the possibility of managing an FFRDC devoted to the Strategic Defense Initiative Program.

Third, I object to the type of involvement in the SDII's personnel decisions which SDIO is contemplating. Your letter states that SDIO plans to "work with the SDII in identifying needed personnel functions, and may review potential candidates for senior positions." I am told SDIO plans to participate in the selection of the SDII's chief executive officer, senior deputy and the "directors" of various technology groups—approximately a dozen senior staff persons in all. This proposed course of action, according to the Congressional Research Service, is unprecedented in the Department's relationships with the FFRDCs it sponsors.

Federally-Funded Research and Development Centers are designed to provide independent, objective scientific advice to the government. The Executive Branch directives state that they are to maintain independence even from their sponsoring agencies. *See* OFPP Policy Letter 84-1, section 6(c). The justification for this rule is central to the purpose of funding an FFRDC—such centers have to be able to deliver objective scientific advice, even findings which may be politically unpopular with their sponsors.

Scientific objectivity and independence from political considerations are particularly important for the Strategic Defense Initiative Program. This program has aroused serious academic debate as to its technological feasibility. Reputable scientists differ on even the most basic scientific issues, and an independent, objective body is needed to address the technological questions. A traditionally independent FFRDC could meet this need.

The foundation for an independent and objective research center is a director and staff well-insulated from political pressures. The quickest way to weaken an FFRDC's independence is to permit the sponsoring agency undue influence over the selection of the center's staff.

For these reasons, SDIO should reconsider its role in the hiring decisions to be made by the SDII. The Defense Department's participation should be confined to confirming or objecting to the single person proposed by the contractor to be the Institute's chief executive. It should not participate in the search for this candidate. Further, it should not participate in the selection of any other person to be employed by the SDII or in the identification of the Institute's personnel functions. These are matters best left to the contractor's independent judgment. In this way, the Department can help insulate the SDII from the politics surrounding the SDI Program.

Fourth, I am surprised by the Defense Department's tentative decision not to use outside experts to review the proposal(s) to operate the SDII. Our country's scientific capability is built upon the peer review process. It is our best means for ensuring high-quality scientific endeavors and is clearly appropriate in this context. An expert third-party review of the SDII's management proposal(s) will help ensure that the Institute is run in a way calculated to foster its independence, competence and cost effectiveness. In light of the millions of dollars that will be used to fund this Institute and the important work it will be doing, the

need for a peer review to ensure a successful operation is too critical to ignore. I urge you to reconsider the Department's position on this matter.

Finally, I would like to express my concern over the Defense Department's tentative decision not to include any provisions in the sponsoring agreement to prevent a "revolving door" situation from developing. Unlike many other FFRDCs, the SDII will spend a significant portion of its resources on reviewing research proposals and reports produced by third parties. This review function creates an enormous potential for abuse. Absent contractual prohibitions, for example, an SDII employee could advocate additional funding for a particular technological proposal from a private firm and, six weeks later, accept a job with the firm that submitted the "winning" proposal. Contractual safeguards can be developed to stop such abuses. I urge you to consider doing so.

Establishing a new FFRDC devoted solely to the Strategic Defense Initiative Program is a sensitive, expensive and complex undertaking. Its success will depend upon the Institute's ability to gain the confidence of Congress and the public, and that confidence will depend upon the SDII's independence, integrity and quality of work. The Defense Department's unwillingness to share important, relevant information with Congress about the project, its unprecedented plans to affect the SDII's personnel, and its reluctance to obtain a peer review of the Institute's management proposal(s) or to address potential "revolving door" problems jeopardize the support and confidence the Institute needs. While I intend to pursue legislative remedies to some of these problems, I would welcome an effort by the Department to resolve them administratively.

I would appreciate your response to these concerns as soon as possible. If you have any questions, please have your staff contact Elise J. Bean of the Subcommittee's staff at 224-3682. Thank you for your assistance in this important matter.

Sincerely,

CARL LEVIN,
Ranking Minority Member.●

COSPONSORSHIP OF S. 1654

● Mr. D'AMATO. Mr. President, I rise today to cosponsor legislation introduced by my good friend and distinguished colleague, the senior Senator from Alaska. His legislation, S. 1654, will address a problem that compromises the security of our Nation.

S. 1654 amends title 18 of the United States Code to provide for criminal forfeiture of proceeds derived from espionage activities and offers rewards for information leading to arrests in espionage cases. Specifically, this bill provides for the forfeiture of all proceeds resulting from the commission of any espionage felony. It also extends forfeiture to any proceeds resulting from publication of the stories of convicted spies or productions based upon their crimes. Equally important, S. 1654 establishes a $100,000 maximum reward for information leading to the arrest and conviction of spies.

Mr. President, over the past year we have witnessed an unprecedented amount of espionage cases that have been very damaging to our national security. Indeed, 1985 was the year of the spy. The John Walker case, the Larry Wu-Tai Chin case, and the Ronald Pelton case involved serious breaches of security from which it will take some time to recover. It is unclear whether our efforts to apprehend spies have improved or whether there are simply more spies to catch. Although there has been a bevy of reasons for each case, a common theme has been money. It is imperative, therefore, to do all that we can to eliminate this incentive for spying.

The United States spends upward of $300 billion a year on defense, a major portion of which is devoted toward research and development. We pride ourselves on the technological advantage we have over the Soviet Union. It is this espionage, however, that emasculates our technological advantage. Our retaliatory strike against Colonel Qadhafi's Libya was an incredible display of our highly advanced weaponry. Such high-technology equipment, no doubt, saved the lives of many of our servicemen.

The transfer of such highly classified equipment to our adversaries not only could cost billions of dollars, but also could cost countless lives. I am also very concerned that our strategic defense initiative research may be subject to espionage. I have no doubt that, as we continue this research, the Soviet Union will press hard to obtain this information. It is legislation such as S. 1654 that will help thwart efforts to jeopardize our national security.

It is time that the "E" in the Soviet version of RDT&E stop standing for espionage. Let's stop giving away our edge as the result of greed of traitors.

Mr. President, this legislation should not be pushed aside. S. 1654 addresses one of the most serious national security issues facing this Nation. I urge quick action on this bill, and I urge my colleagues to join me as cosponsors on S. 1654.●

FOREIGN OWNERSHIP IN DEFENSE PROCUREMENT ACT

● Mr. D'AMATO. Mr. President, I rise today to cosponsor legislation introduced by my good friend, the senior Senator from Illinois. This legislation, S. 2152, the Foreign Ownership in Defense Procurement Act, prohibits any defense contract from being awarded to any firm owned or partly owned by a hostile nation.

Mr. President, this is legislation which makes a great deal of sense. In so many different ways, the United States continues to help adversary nations economically. Whether it is through the extension of bank credits to Eastern bloc nations or by allowing most-favored-nation trading status for terrorist-sponsoring nations, such as Iran and Syria, the United States directly or indirectly supports the regimes of these hostile nations. The senior Senator from Illinois has brought to the attention of the Senate another way which the United States supports unfriendly nations: by giving lucrative defense contracts to business firms which are owned by nations hostile to the United States.

Specifically, S. 2152 amends title 10 of the United States Code to require the Department of Defense to exclude from consideration for contracts those firms in which a hostile foreign government or a covered foreign national owns or controls a significant interest. Under this legislation, corporations bidding on U.S. military contracts would be required to disclose significant foreign ownership.

Mr. President, last month, the President courageously retaliated against Libya for its systematic terrorist activities against the United States. This move was in addition to the United States economic sanctions imposed upon Colonel Qadhafi's Libya earlier in the year. The Pentagon, however, has unwittingly allowed the Libyan Government to profit from United States defense contracts. Fiat-Allis, a wholly-owned subsidiary of Fiat of Italy, has been awarded millions of dollars worth of United States defense contracts, including a recent contract for 187 bulldozers for the U.S. Marine Corps. Fiat is expected to be awarded many more lucrative contracts in the future, including work on the strategic defense initiative. Fifteen percent of this company is owned by Qadhafi's Libya.

Although Fiat is trying to rid itself of its Libyan involvement, it is important, nonetheless, that our procurement policies better reflect our foreign policies. The United States cannot allow taxpayers' money to be directed in any way toward the coffers of our adversaries. We should be especially vigilant to prevent terrorist-sponsoring nations from reaping profits from any U.S. contracts. Directly or indirectly, we will only be fueling the flames of terrorism by financing it.

So many times, Mr. President, our economic policy seems to conflict with our foreign policy. Enactment of S. 2152 will correct one of these inconsistencies. With nations such as Libya, Iran, and Syria becoming much more bold with their use of terrorism, the United States should not be sending mixed signals. We must be resolute in our condemnation of such activities. The least painful way is to apply economic pressure. S. 2152 is a great start.

Mr. President, I call for quick action on this important legislation, and I urge my colleagues to join with me as cosponsors.●

TENTH ANNIVERSARY OF THE MOSCOW HELSINKI GROUP

● Mr. D'AMATO. Mr. President, I rise today to pay tribute to the brave men and women who, 10 years ago today, joined to form the Public Group to Promote Observance of the Helsinki accords in the U.S.S.R. This voluntary, unofficial group, commonly referred to as the Moscow Helsinki Group, was established with the goal of monitoring and improving Soviet compliance with the Helsinki Final Act.

As chairman of the Commission on Security and Cooperation in Europe, I am pleased to announce that, in conjunction with this, the 10th anniversary of the founding of the Moscow Helsinki Group, the Commission will release a compilation of the group's documents. Many of these papers, smuggled out of the U.S.S.R. and translated by the Commission's staff, have never before appeared in the West.

The Helsinki Final Act, signed in 1975 by the United States and the Soviet Union, along with Canada and 32 European countries, contains provisions on human rights, trade, and security. The complete text of the act was published in the Soviet Communist Party newspaper, Pravada, on August 2, 1975.

The group, under the leadership of Soviet physicist Yuri Orlov, stressed its loyalty to the Soviet Union, and its desire to cooperate with the authorities in order to ensure that the provisions of the act were implemented in the U.S.S.R. Orlov was joined by other human rights advocates, including: Elena Bonner, Lyudmila Alekseeva, Aleksandr Ginzburg, Petro Grigorenko, Malva Landa, Anatoly Marchenko, Vitaly Rubin, and Anatoly Shcharansky. Following its establishment, Sofya Kalistratova, Ivan Kovalev, Naum Meiman, Yuri Mnyukh, Viktor Nekipelov, Tatiana Osipova, Feliks Serebrov, Vladimir Slepak, Leonard Ternovsky and Yuri Yarym-Agaev became active in the group.

The Moscow Helsinki Group's primary objective was to disseminate information regarding Soviet human rights violations and other actions made in contravention to the agreement signed in Helsinki. The Kremlin responded to the group's efforts with an increasingly repressive campaign designed to intimidate group members and prevent them from exposing flagrant human rights violations in their own country. The primary tool used by group members was samizdat, or underground publications. In total, more than 200 such documents were issued by the Moscow Helsinki Group. These documents, based upon statements from Soviet citizens, were initially circulated to Soviet officials and the embassies of the signatory nations.

The documents concentrated on humanitarian themes consistent with the Final Act: self-determination, free choice of a place of residence, freedom of conscience, the right to know one's rights, socioeconomic rights, the right to a fair trial, and human contacts. In addition, the group attempted to focus particular attention on the plight of prisoners of conscience and those subjected to psychiatric abuse as a tool of official repression. The Moscow Helsinki Group also offered a series of proposals on ways to improve Soviet compliance with the Final Act.

The work of the Moscow Group led to the establishment of other groups within the Soviet Union by citizens in Ukraine, Lithuania, Armenia, Georgia, and Estonia. Specialized groups were organized by and for religious believers, invalids, and victims of psychiatric abuse.

Members of the Moscow Group became the subject of increasingly harsh reprisals, including house searches, threats, detentions, arrests, and trials. Those convicted of such crimes as "anti-Soviet agitation and propaganda" in connection with their group activities were sent off to labor camps, political prisons, and internal exile.

Of the 21 brave men and women who joined the group, 7, including Orlov, Bonner, Marchenko, Kovalev, Nekipelov, Serebrov, and Osipova, remain imprisoned or in internal exile. Two, Ginzburg and Shcharansky, were released after long periods of imprisonment. Three have already served their terms and four have had to leave the U.S.S.R. Only two members, Naum Meiman and Sofya Kalistratova, both elderly and in poor health, have never been arrested for their group activities.

With the impending arrest of Kalistratova, the Moscow Helsinki Group was forced to disband on September 8, 1982. Despite this fact, many of the group's members continue to champion the cause of human rights.

Their steadfast commitment to individual human rights is a shining example of human courage and dedication to the highest principles of human civilization. During the course of the coming days, I will focus on the fate of the seven members who remain in the Soviet gulag. Their cases highlight the repressive nature of the Soviet regime. Furthermore, their treatment underscores the Kremlin's blatant disregard for human rights and lack of commitment to those provisions of the Final Act dealing with this important area.

The Soviet Union voluntarily accepted the responsibility to promote human rights when they signed the Helsinki accords in 1975. Their record since then has been miserable at best. The United States, as a signatory to the agreement, has a moral commitment to speak out in opposition to continued Soviet human rights abuses.

The documents produced by the Moscow Helsinki Group, and other similar groups, provide a clear picture of Soviet behavior in the area of human rights. They are also a testament to the brave men and women who are willing to defend their rights and those of the fellow citizens, often at great personal risk.

Mr. President, I commend the brave men and women who were members of the Moscow Group for their dedication to human rights.●

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

□ 1350

Mr. HATCH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

PHARMACEUTICAL EXPORT AMENDMENTS OF 1986

The PRESIDING OFFICER. Under the previous order, the Senate will now resume consideration of the unfinished business (S. 1848), which the clerk will report.

The legislative clerk read as follows:

A bill (S. 1848) to amend the Federal Food, Drug, and Cosmetic Act to establish conditions for the export of drugs.

The Senate resumed consideration of the bill.

Mr. HATCH addressed the Chair.

The PRESIDING OFFICER. The Senator from Utah.

Mr. HATCH. Mr. President, last week we began the debate on the drug export bill, S. 1848, which I think is a very important bill.

As I spoke in support of the bill, I brought out that this legislation will not only save American jobs but that it will create somewhere between 8,000 and 10,000—maybe as many as 50,000—American jobs, and these are high paid jobs. And it will prevent export of American biotechnology from this country.

Two of the three top pharmaceutical companies in the world today are non-United States. I believe that there is a tremendous export of American biotechnology because of some of the laws that we have. This bill will help prevent that. It will keep the United States preeminent in the field of pharmaceutical development—preeminent in the world where we should be, and where we have on obligation to be because of the wealth and the opportunities that this society and its tremen-

dous enterprise capitalistic system provides.

It will decrease our balance of payments deficit we estimate $500 million to $600 million a year, and it might be more than that. It will not increase the health risks to foreign consumers. It will not erect trade barriers that invite retaliation, and it will not cost taxpayers any money.

There are very few bills that could make those type of claims. But this is one of them. Under our current policy, the Food, Drug, and Cosmetic Act forbids the export of most pharmaceuticals until they receive approval from our own Food and Drug Administration or the USDA, even though the destination is a country where the drugs have already been approved. Sometimes it takes up to 10 years to go through the FDA's safety and efficacy process. It may cost $7 million to $8 million to develop a new drug which has already been tested as safe and effective by the FDA equivalent countries—I mean by that, countries that have as good a scientific food and drug system as our country has.

One of the problems that we have is that our pharmaceutical companies, in order to receive approval from the Food and Drug Administration, have to go through a very long, involved detailed process. They inform us that for some reason some of these foreign lands across the world are a little bit more efficient than ours, and some of these very good, lifesaving, health-promoting drugs get on the market overseas before they get on the market here. We have seen that time after time.

Well, it is arrogant for us to say that the Food and Drug Administration of the Government of the United States of America, or the USDA, are the only people who can handle these problems. Let us get to the real bottom line on this bill. I think the real issue is ignored by the critics of this bill. The real issue is the impact of this legislation, this bill, when compared to the results of current policy on the foreign consumer and others.

Under current policy, every drug which may be exportable under these amendments can be manufactured at foreign plants under few, if any, controls and supplied anywhere in the world. That is current law.

Thus, all of the potential problems the few critics of this bill claim can happen if these amendments are passed are happening right now because all an American company has to do is move offshore. And in moving offshore they can manufacture any drugs they want, and disseminate them worldwide without any regulation.

This bill will place some constraints on that. There is, in short, no evidence that this bill will affect the types of drugs available to foreign consumers at all with the exception of possible tropical disease drugs, while the bill, through its requirements, insures greater quality and imposes much greater FDA control on those drugs produced in the United States and exported.

Is there any evidence that the current ban on the export of unimproved drugs by our FDA, but approved by other nations, actually saves any lives? The answer is a resounding no.

Is there any evidence that the defeat of S. 1848 will prevent any injury to foreign consumers? The answer is a resounding no.

Will S. 1848 improve the situation for foreign consumers? The answer is just as firmly yes.

This bill is a net improvement for foreign consumers. It will save American jobs and it will lower our balance-of-payments deficit.

I say let us cut through the rhetoric and let us get this bill passed. I am prepared to proceed with amendments. As I understand it, the distinguished Senator from Ohio has a number of amendments that he feels are essential. I would be more than happy to proceed with those amendments at this time, with the understanding that votes will occur tomorrow, and we can stack those votes or consider them as the distinguished Senator from Ohio, the majority leader, and the minority leader desire.

So with that, I yield the floor.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, when the debate on S. 1848 commenced last Thursday, I described the bill as the worst piece of special interest legislation to pass the Labor Committee this year. I stick by that assessment. There is simply no justification for exporting drugs which we have not cleared for safe and effective use in our own country; no justification whatsoever.

There is no effective means of restricting the re-export of transshipment of these drugs to the Third World. In other words, there is no way of preventing the drugs from being shipped to one country and than being shipped immediately thereafter from that country to another country.

The FDA has said publicly that they are in no position to provide any protection in that event. This bill will only add to the problem of dumping unsafe and ineffective drugs on the Third World. This bill, as I said before, will make "Made in America" a dirty word throughout the world. When this proposal to allow the export of unapproved drugs was first brought before Congress, editorial opinion was scathing. The Philadelphia Inquirer said:

"THE COST OF EXPORTING TROUBLE."

It has been labeled as a jobs bill but in fact it's a greed bill. It's legislation that could cause injury, illness or death. It's a bill that places private profits ahead of public responsibility. It would confirm in many minds that the United States cares less for their well-being than for a fast buck.

The legislation would allow U.S. drug companies to produce new drugs for sale in foreign nations even if those drugs have not been approved for use at home. Current law requires that drugs manufactured in the United States for export meet domestic safety and efficacy standards.

Senator Hatch and others, led mainly by American drug makers, argue that the existing law forces U.S. companies to open foreign production facilities to get around the safety restriction. (Current law allows U.S. drug firms operating outside the United States to manufacture and sell products abroad that do not meet domestic safety and labeling requirements.)

□ 1400

Supporters claim that if the Hatch bill is enacted, it could create as many as 50,000 jobs and increase drug-export sales by $1.76 billion in five years. Other studies indicate those estimates are vastly inflated. Regardless of the actual numbers, what's the price of changing the law?

Critics claim that the bill would allow American drug makers to flood the markets with products that are untested and would be used inappropriately. These products would be dispensed by untrained personnel whose only source of information would come from drug company salespeople. Few Third World nations have any type of effective drug regulation and most rely on U.S. data.

Jean M. Halloran, director of Consumer Union's Institute for Consumer Policy Research, which opposes the bill, notes that it would allow U.S. drug companies "to use people in other countries as guinea pigs."

"If a drug is not good enough for us, we shouldn't inflict it on our brothers and sisters abroad," she told the House subcommittee. "That may not be the motto of a successful drug company executive, but it's the credo of a good world citizen."

Mr. President, I ask unanimous consent that the entire editorial be printed in the RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Philadelphia Inquirer, Aug. 6, 1984]

THE COST OF EXPORTING TROUBLE

It has been labeled as a jobs bill but in fact it's a greed bill. It's legislation that could cause injury, illness or death. It's a bill that places private profits ahead of public responsibility. It would confirm in many minds that the United States cares less for their well-being than for a fast buck.

The legislation would allow U.S. drug companies to produce new drugs for sale in foreign nations even if those drugs have not been approved for use at home. Current law requires that drugs manufactured in the United States for export meet domestic safety and efficacy standards.

The U.S. Food and Drug Administration and the World Health Organization have endorsed the legislation. "We believe the governments of other nations are in the

best position to assess their own health needs," Dr. Mark Novitch, acting FDA commissioner, recently told a House subcommittee considering the bill, which is being sponsored in the Senate by Orrin Hatch (R. Utah).

Sen. Hatch and others, led mainly by American drug makers, argue that the existing law forces U.S. companies to open foreign production facilities to get around the safety restriction. (Current law allows U.S. drug firms operating outside the United States to manufacture and sell products abroad that do not meet domestic safety and labeling requirements.)

Supporters claim that if the Hatch bill is enacted, it could create as many as 50,000 jobs and increase drug-export sales by $1.76 billion in five years. Other studies indicate those estimates are vastly inflated. Regardless of the actual numbers, what's the price of changing the law?

Critics claim that the bill would allow American drug makers to flood the markets with products that are untested and would be used inappropriately. These products would be dispensed by untrained personnel whose only source of information would come from drug company salespeople. Few Third World nations have any type of effective drug regulation and most rely on United States data.

Supporters of the change argue that they have included some safety provisions to protect against abuses, but those provisions are vague and ridden with loopholes.

For example, the FDA will be required to prepare lists of foreign countries deemed to have "adequate" drug regulation systems. If one of those countries approves a U.S.-made drug for a particular use then that approval carries the same weight as an FDA endorsement and gives the manufacturer carte blanche to distribute it anywhere in the world, regardless of the quality of the testing standards in the approving nation.

Jean M. Halloran, director of Consumer Union's Institute for Consumer Policy Research, which opposes the bill, notes that it would allow U.S. drug companies "to use people in other countries as guinea pigs."

"If a drug is not good enough for us, we shouldn't inflict it on our brothers and sisters abroad," she told the House subcommittee. That may not be the motto of a successful drug company executive, but it's the credo of a good world citizen."

Mr. METZENBAUM. Mr. President, as a matter of fact, it is interesting that what the Philadelphia Inquirer said about this legislation is very similar to that which many other citizens of the world have stated in writing in to us on this subject. They have questioned the Hatch-Kennedy bill. They have said, "Why are you going to do this? Why do you permit drugs to be sold and sent throughout the world that are not good enough for your own people? Yet you want our people to use them."

I agree with them. I do not believe that any time since I have been in the Senate have I heard such an outcry of opposition from all over the world as that which I have received in connection with this particular piece of legislation.

Mr. President, the proponents of this legislation claim that it is a jobs bill. The export legislation will not create a bonanza of new jobs in the U.S. pharmaceutical industry.

It is interesting to note that today I sat in a Judiciary Committee hearing and I am told that it is a new jobs bill because they are going to change the definition. Then we have various pieces of legislation around here and all claim to be jobs bills.

Then we are told if we pass this legislation, it will make it possible to have the jobs here in America rather than overseas for the drug companies. The facts are that the drug companies have their overseas operations even at this moment. If they thought they could do that and it was in their best economic interest to do so, they would manufacture those products overseas.

They want this legislation because they need it in order to be able to sell their products made in this country overseas.

When the Philadelphia Inquirer calls it a greed bill, it uses appropriate language.

Let me tell you what the Los Angeles Times said about this bill.

EXPORTING TROUBLE

New drugs must pass the toughest approval process in the world before doctors can prescribe them in this country. The tests can take years and delay the availability of some new medicines but they provide a margin of safety for patients.

The Reagan Administration says the delays are bad for the pharmaceutical business and ultimately drive American jobs to foreign countries. It is backing a bill that would allow business to export medicine that has not yet been approved for American consumption.

That is a bad idea, a positon that says that it is all right for foreigners to face health risks that Americans do not face, a position that would turn the rest of the world into guinea pigs.

A bill that would repeal the current ban on such exports, sponsored by Sen. Orrin G. Hatch (R-Utah), is tentatively scheduled for a vote Wednesday by the Senate Labor and Human Relations Committee. Although the bill does have some safeguards. It should be rejected.

Under Hatch's proposal, which the Administration supports, medicine that has passed the first level of toxicity testing by the Food and Drug Administration could be exported. But it is often in subsequent tests that unexpected side effects or other problems are discovered.

Hatch's bill would also require that a country with respective drug-testing standards, such as West Germany or England, approve the new American drug before it is exported.

Mr. President, I should point out to you that the bill that is before us today has 15 countries that are included in it, countries to which the drug may be exported. It is my understanding that there is going to be an effort made to even increase that number of countries and there will be no safe way of prohibiting the transshipment from those countries to other nations throughout the world.

The Los Angeles Times continues:

If a country with relatively high standards disapproved a drug, the Food and Drug Administration would cancel its license. One or more of those countries would have to approve a drug for its own use before the drug could be exported to countries with weak standards or none at all. That is not a good substitute for making the drug pass the most stringent standards—those of the United States.

The economic argument cannot be used to justify health risks at home or abroad. Lawmakers should not allow the export of medicine until it has been proven good enough for Americans.

Mr. President, I ask unanimous consent that the entire Los Angeles Times editorial be included in the RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Los Angeles Times, Sept. 11, 1984]

EXPORTING TROUBLE

New drugs must pass the toughest approval process in the world before doctors can prescribe them in this country. The tests can take years and delay the availability of some new medicine but they provide a margin of safety for patients.

The Reagan Administration says the delays are bad for the pharmaceutical business and ultimately drive American jobs to foreign countries. It is backing a bill that would allow businesses to export medicine that has not yet been approved for American consumption.

That is a bad idea, a position that says that it is all right for foreigners to face health risks that Americans do not face, a position that would turn the rest of the world into guinea pigs.

A bill that would repeal the current ban on such exports, sponsored by Sen. Orrin G. Hatch (R-Utah), is tentatively scheduled for a vote Wednesday by the Senate Labor and Human Relations Committee. Although the bill does have some safeguards, it should be rejected.

Under Hatch's proposal, which the Administration supports, medicine that has passed the first level of toxicity testing by the Food and Drug Administration could be exported. But it is often in subsequent tests that unexpected side effects or other problems are discovered.

Hatch's bill would also require that a country with respectable drug-testing standards, such as West Germany or England, approve the new American drug before it is exported. If a country with relatively high standards disapproved a drug, the Food and Drug Administration would cancel its license. One or more of those countries would have to approve a drug for its own use before the drug could be exported to countries with weak standards or none at all. That is not a good substitute for making the drug pass the most stringent standards—those of the United States.

The Administration backers, including representatives of the Food and Drug Administration, also argue economics. Some U.S. pharmaceutical companies have located plants abroad because drugs manufactured abroad are not subjected to such intense scrutiny and can often reach international markets years ahead of American products. That costs American businesses dollars and American workers jobs, according to the Ad-

ministration. But if the new drug export is allowed, will those jobs be relocated in the United States despite the lower wages and other advantages in foreign countries?

The economic argument cannot be used to justify health risks at home or abroad. Lawmakers should not allow the export of medicine until it has been proven good enough for Americans.

Mr. METZENBAUM. Mr. President, initially, the drug industry claimed that up to 50,000 jobs could be created over the next few years by allowing the export of unapproved drugs. After the reliability of that estimate was discredited, the industry came back this year with a new estimate. Instead of 50,000 jobs, they now say it is 8,000.

The Labor Institute of New York says the figure is actually 3,000 jobs.

As I pointed out the other day, that union, which has the most number of employees in the pharmaceutical industry, has itself come out against the legislation saying it is not worth it to pass bad legislation or to cause harm to peoples throughout the world by claiming that it will create new jobs.

Any job increase resulting from drug export legislation would very likely be only in the production area since most companies' research, management, financial and marketing operations remain in the United States regardless of production locations. At the same time, pharmaceutical production is not at all labor-intensive. As David B. Sharrock, president of Merrell-Dow U.S.A., told the committee in its drug export hearings this year, it is customary for companies exporting drugs to produce only the active ingredient in bulk form in U.S. plants and then ship the product to finishing plants at overseas locations at or near the market for which the drug is ultimately destined.

Clearly, S. 1848 is not a massive jobs bill. And there is more than jobs at stake with this legislation as can be gathered from the following quotation from the International Chemical Workers Union, which represents, 5,600 members in 19 pharmaceutical plants around the country.

In commenting on this legislation, it said:

> Even if a few jobs would be created through this legislation, ICWU does not agree that this advantage outweighs the tremendous ethical disadvantages of the bill.

Mr. President, yet another claim offered by the proponents of this legislation is that the industry desperately needs this bill to remain competitive with foreign competition. But the American pharmaceutical industry does not need this bill to compete with foreign firms.

In December 1984, the Department of Commerce released a report entitled "A Competitive Assessment of the U.S. Pharmaceutical Industry." If you look at that report, you will arrive at the same conclusion. That is that no assistance is needed.

Far from decrying supposedly restrictive regulations on the export of unapproved drugs, the Commerce report stated:

> With respect to regulation, the U.S. drug regulatory system enjoys a worldwide reputation for the highest standards of drug efficacy and safety and helps to ensure that U.S. Government-approved pharmaceuticals have a favorable image abroad.

□ 1410

> Thus, while the stringent United States drug approval process may be costly and time consuming, it also functions as a competitive advantage for the United States industry.

So the American pharmaceutical industry should be trying to protect the quality and integrity of the "Made in America" label rather than attempting to tarnish that label while lobbying for the export of unapproved drugs.

Mr. President, I want to be very candid with my colleagues. The pharmaceutical industry has been extremely effective in lining up support for this bill. But that does not make it right. I do not know when I have seen a more effective lobbying job done than that which has been done in connection with this particular piece of legislation. Some have said to me, "Why are you going to the floor to fight it? The other side has the votes."

I am not in a position to count the votes and I do not know whether they do or do not, but I am willing to accept that on the basis of their representation. But it is my strong belief that the issue must be made with respect to this bill, that the opposition must be heard, that the American people have a right at least to be alerted to what the pharmaceutical manufacturers of this country are doing to make "Made in America" a dirty word thoughout the world.

There is not any logic or reason to pass this bill other than the fact that the lobbyists have apparently lined up the votes. But lining up the votes does not make it right. It is as wrong as it could possibly be to pass this legislation and whether we will rue the day in a year or 2 years or 5 years is not the question. There is no doubt about it: that day will come when some pharmaceuticals, some drugs made in this country, will be used in some other nation of the world, a Third World nation, and hundreds and perhaps thousands of children or senior citizens or people generally will pay the price, either with their lives or long-lasting illness.

Why? Why are we handling this bill on the floor of the Senate today other than to satisfy the greed of the pharmaceutical industry?

Mr. President, one of the other claims that those who support this legislation make is that we need a bill to circumvent the FDA approval process. Mr. President, we should allow the export of unapproved drugs because the FDA supposedly takes too long? Now, come on. Does anybody really believe that that makes sense? If that is the case, why not eliminate the FDA and let the drug companies determine what the American people should ingest or should use?

For our own people, we say, "Oh, no. We do not want that. We do not want to change the laws with respect to the approval process for drugs in this country. But let us not worry about the people in this Third World country; they are not really that important. If a few of them die, what difference does it really make?"

I think it makes a lot of difference, a tremendous amount of difference. I think every child has a right to live, every human being has a right to live, every person has a right to be treated well and be able to take drugs from this country without being uncertain whether they may be harmful to their bodies.

Yet we are saying that little baby over in Thailand or Taiwan or Bangladesh or Pakistan or some other part of the world, that little child who is every bit as precious to its mother as the little baby here, in this country, is not going to get the same amount of protection. Why? Because the pharmaceutical industry wants to be able to sell their drugs over there without the proper clearance.

They will say, "Oh, but, Mr. Senator, you are wrong about that. Mr. Senator, you do not understand. We are only going to sell these drugs in countries where they are going to check through them themselves."

Mr. President, the facts are that most of those other countries, with some exceptions, do not have the same kind of processes that we do and that our Food and Drug Administration, with all its shortcomings, still does a better job than almost any other nation in the world.

I am told there is a proposal that will come to us before consideration of this bill is concluded to add seven more countries to the list already in the bill. We know that the Secretary of Health and Human Services has the right under the bill before us to name a number of other countries in addition to those that are specified in the legislation. I suppose, in the world in which we live around here in Washington, if they hire the highest priced lobbyists and the best lobbyists and the ones who know their way around Washington, it will not be hard to get some little country in some far-off place in the world to get their products approved as long as they can hire the right lobbyist.

In February 1985, the Secretary of HHS announced changes in the FDA-approved process which she said "will dramatically speed the Federal Government's approval of new drugs." If

that is the answer to moving forward the process and making it a shorter period of time, I have no problem with that. The Secretary hailed these changes as the "most important in 20 years."

The Secretary also said these new procedures would cut 20 percent off the approval time for new drugs. So according to the administration, the problem has been solved. If the industry still has difficulty with the approval process, let them come forward with a proposal for further change in that process instead of proposals to circumvent the FDA process by exporting unapproved drugs.

I have seen this bill wrapped in the mantle of trade legislation. That is an important issue in Congress. Believe me, the attempt to portray this bill as a trade bill is a ruse, nothing more, nothing less. Drug export legislation will not prompt American companies to relocate existing overseas operations in the United States or to establish new operations in the United States.

Proponents claim that S. 1848 is reform legislation that will curb the practice of American drug companies locating their production facilities abroad as they currently do to circumvent the prohibition against unapproved drugs. They imply that enactment will induce firms to repatriate some of their facilities in these countries. These claims are wholly unfounded. There is not a word in the bill to that effect and there is not a company that I know of who has come forward and said that upon passage of this bill, we are going to bring back to the United States our manufacturing operations.

There is nothing in the bill to keep them from maintaining overseas the facilities they presently have nor from building new ones. Indeed, since these countries allow the export of unapproved drugs, particularly to the Third World, the incentive remains strong for U.S. companies to continue to operate from overseas locations.

In his testimony before the committee's June 5 hearings, David B. Sharrock, president of Merrell Dow Pharmaceuticals U.S.A., stated:

> As foreign countries fiercely compete with the United States for capital investments and new jobs, these countries are prepared to create favorable economic incentives to secure such investments.
>
> Consequently, once a commitment to supply an active ingredient from a specific country is made, the approval of the drug in the U.S. will not bring the production of this active ingredient to our country.

For those companies seeking to establish new plants, general business considerations rather than the issue of export restrictions dictate the decision about plant location. At hearings on tax reform before the House Ways and Means Committee on July 11, 1985, Richard M. Furland, chairman and chief executive officer of Squibb said:

> Almost every country has its own version of a food and drug administration, which all but forces pharmaceutical companies to do business "in-country". Exorbitant tariffs also requires us to operate abroad if we are to compete for foreign markets with the large European and Japanese drug firms. In other words, if Squibb is to tap British, French, German and other European markets, it must be inside common market tariff barriers and subject to local food and drug rules.

□ 1420

In fact, American drug companies that sell their products in foreign markets have adopted methods of operation that rely on overseas plants regardless of what U.S. export policy may be. According to Mr. Sharrock, the president of Merill Dow:

> It is customary of multinational pharmaceutical companies to have facilities in major foreign countries where their drugs are sold, to carry out tableting, encapsulating, and other operations to make finished drug dosage forms. The active ingredients, however, that go into making these finished dosage forms are typically produced at a small number of separate plants dedicated to manufacturing active ingredients of specific types. The active ingredients are then shipped to the local plants producing finished dosage forms.

Mr. President, proponents also claim that this legislation will solve all the woes of the biotechnology industry. But in reality, S. 1848 will not end overseas technology transfers in the biotechnology industry.

Proponents argue that the ban on export of unapproved drugs forces biotechnology companies to enter into partnerships with foreign companies to produce their drugs overseas. In reality, foreign partnerships have become an integral component of the way American biotechnology industry does business and these partnerships will continue irrespective of U.S. export restrictions.

In an extensive analysis of the biotechnology industry in the Washington Post of December 17, 1984, and May 19, 1985, analysts and industry spokespersons had the following to say:

> For most companies, at the present stage of development, relationships between corporations that cut across national lines are beneficial to both parties. The technology transfer goes both ways.

Mr. Harvey Price of the Industrial Biotechnology Association stated:

> You need a Japanese partner to be successful in Japan—it's just the nature of the marketplace.

According to the Post, Genentech's foreign partners have spent $47 million for overseas clinical tests on just one of Genentech's products alone. According to the company's vice president, Thomas Kiley: "These arrangements are vital to our growth."

The overseas transfer of technology is, according to the Post series:

> An inevitable part of doing business overseas and most companies agree that the clear short-term benefits of cooperation outweigh the fuzzy long-term risks.

Clearly, economic and research concerns far outweigh the laws regulating drug exports in determining technology transfer in the biotechnology industry.

S. 1848 is not reform legislation. S. 1848 will prove an embarrassment to us over the years if it passes. It does not even include antibiotics under its provision as is strongly recommended by experts in the field. Last year this proposal was accurately pegged a greed bill. But, this year proponents are back knocking on Congress' door. They believe that the health and safety of foreign consumers is not as important to Congress as the bottom line on the profit sheet of America's most profitable industry.

We may have the strictest standards for safety among all but I do not hear anyone advocating less tough standards for the FDA. What I do hear people saying is "let's circumvent the process for drug exports. After all, as long as we don't have to risk using the drugs, who cares?" I think many of us do care.

We are told that there are safeguards. The best safeguard is the one we have right now—if a drug is not proven safe and effective for use in the United States, do not export it.

Mr. President, I will address myself further to the issues in connection with this bill and will be prepared to offer amendments thereto at a subsequent point. I yield the floor.

Mr. HATCH. Mr. President, I have listened, again with intriguing interest, to the distinguished Senator from Ohio make basically the same arguments he made last Thursday evening and I would refer those who are interested in what this bill really is about to the transcript of that date and my remarks made at that time. Also to the remarks of Senator KENNEDY because virtually everything that the distinguished Senator from Ohio has said, virtually every sentence could be refuted. That would take too much time and I think would be a waste of everybody's time. But let me just mention a couple of things and make that blunt statement; that we disagree with basically everything the distinguished Senator from Ohio said, although we respect his right to say the things that he has said.

With regard to the international opposition, the Senator is armed with communications from an impressive array of foreign groups opposing the bill, but let us not be misled. These communications are the result and are in essence the product of a letter-writing campaign. It is coordinated by a

European-based social activist organization, Health Action International and its sister organization, the International Organization of Consumers Unions.

Now, I note here that the foreign consumers unions tend to be more political and radical than their U.S. counterparts.

The letters all are similar in their rhetoric and misstatements that this legislation will somehow worsen the problem of dangerous drugs on today's world markets, and especially Third World markets. With few exceptions they imply an ignorance of the bill itself. The people who wrote the letters either have not read the bill or do not understand it.

These organizations are well-meaning and I am sure that they do good work on other issues. However, I think it is important and useful for us to recognize the HAI network's broader agenda so that we understand their real reasons for opposing this bill. That agenda grows out of the class-oriented exploiter-exploited view of events that Marxism has been teaching for the last 100 or more years. They want to undermine patent protections, to greatly restrict the types of pharmaceuticals available in the developing world, thereby condemning many Third World inhabitants to needless pain, suffering, and death; to block the free enterprise system in key industries such as health care; to curtail at any cost the activities of Western multinational corporations; and, most importantly, to establish a global welfare state by the massive but shortsighted shift of resources from the developed to the developing countries. The passage of this bill would be a step backward in achieving this broader agenda, and this is the reason I believe we have not received a single constructive letter from any of these groups. It is always total, irrevocable opposition to any change in our current pointless, counterproductive law. It is just that simple.

Now, this bill has been criticized as drug export legislation which will not create a bonanza of new jobs in the pharmaceutical industry. The distinguished Senator from Ohio has made that point here again today although there have been estimates ranging from 8,000 to 10,000 to 50,000 jobs. Now, the bill's proponents have never claimed that S. 1848 will create a bonanza of new jobs in the U.S. pharmaceutical industry. The pharmaceutical industry is not as labor intensive as many and the committee's expectations I think have been realistic. It will, however, create an additional 8,000 to 9,000 to possibly 10,000 jobs by reasonable estimates. This is a very significant number whether or not it consitututes a bonanza. Now, some have estimated as high as 50,000. I think that is possible. But to be more conservative we have said 8,000 to 10,000 and we stand by that. The biotechnology industry alone estimates 5,000 jobs and that is only part of this industry. As the committee report points out, any needless loss of jobs and loss of export payments is unacceptable. It really is bad.

Another criticism by the distinguished Senator from Ohio is that S. 1848 will not end U.S. overseas transfers in the biotechnology industry. Technology transfer is a problem for biotechnology firms.

□ 1450

True, foreign partners are often necessary to conduct clinical trials abroad, steering the drug through foreign regulatory agencies and their foreign marketing systems in the process. Technology transfers on a basic level are common and nonobjectionable. But none of these contemplates a transfer of secret techniques for production which are not—and I emphasize are not—willingly transferred and which sap the competitive advantage of American innovators.

I would like to refer back to my comments of Thursday for a refutation of most of the Senator's points. I would, however, like to reemphasize the reason why this is not a bill which will dump unsafe drugs abroad and why it is better policy than the current law.

We want to allow the export of not-yet-approved drugs to a limited set of developed countries under restrictions and safeguards designed to ensure that unsafe drugs will not be dumped on undeveloped nations ill-equipped to deal with them. I hasten to add that in no case could drugs be exported if they have been rejected by FDA or USDA—we are only talking here about drugs which have not yet been approved by the U.S. agency. Chief among the bill's protections are the requirements that each drug have been approved for safety and efficacy by a foreign regulatory agency comparable to our FDA and that each be produced in conformity with the same quality as domestically approved drugs.

Opponents for changing our current policy attack the bill on health grounds, claiming that it will permit unsafe unapproved drugs to be sold in undeveloped countries. Senator KENNEDY and I have been sensitive to these charges and have built into the bill protections that will assure that no U.S. company is involved in unauthorized shipments, and that the drugs exported under these amendments have first passed muster before responsible foreign officials.

That is a tremendous improvement over current law. All these criticisms that the distinguished Senator from Ohio seems to be raising also apply to current law. We are trying to resolve those problems while at the same time preserving jobs, preserving our own preeminence in biotechnology, rather than have it transferred and exported from our country. At the same time having a better balance of payments—not only because today our companies move offshore to get around these laws, but also because once the drug is approved by FDA, we have to import a drug that could have been manufactured here, probably at much less cost. We have to import them in order to have them in our country.

But the fundamental response to critics is that, when judged by its impact on foreign consumers, this bill will have no negative effects compared to the situation under current law. This is a point the critics never address, although, for the first time, I have heard them say that there are some good things about the bill.

Under current law, any drug approved or unapproved, may be made overseas and shipped to any country in the world where it is permitted. Thus drugs not approved by the FDA, under current law, are circulating freely abroad and are available right now to foreign consumers. It follows that, to the extent drugs exported from the United States under these amendments find their way to unauthorized countries, the situation is no different than it would have had this bill not passed. We have made a pretty good case as to ills that this bill does correct and that this bill does work on.

I suspect that, in this area, no bill will do everything it would take to satisfy the Senator from Ohio, and no bill, in this country or elsewhere, will satisfy the critics he has cited.

With regard to some of the editorials he has cited thus far, the editorial writers have not called my staff or Senator KENNEDY's staff, to my knowledge. They have just written what they think the bill means, without fully understanding it. They have an agenda, and that agenda is anti-United States, anti-U.S. multinational corporations, anti the U.S. ability to sell drugs overseas.

They have a zero-risk mentality with regard to pharmaceuticals. There is not a pharmaceutical today, not one, not even aspirin, that has zero risk. All have a down side. We all need to know that and understand that.

There are risks and there are benefits for drugs. We want to make sure the benefits always exceed the risks. I think this country has been the world leader in that regard.

On the other hand, it is arrogant to think that this is the only country in the world that has a safety-in-efficacy process, when there are many countries just as good as we are. We have named them in the bill.

Mr. President, I ask unanimous consent to have printed in the RECORD, an interesting and, I believe, accurate article published in Private Practice, in

February 1986, by Armistead M. Lee and C. Joseph Stetler, entitled, "Should the FDA Regulate the Rest of the World?"

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Private Practice, February 1986]

(By Armistead M. Lee and C. Joseph Stetler)

SHOULD THE FDA REGULATE THE REST OF THE WORLD?

For several years efforts have been made to remove the statutory ban on the export of medicines not approved for use in the United States. The present law is unmatched in any other industrialized country and, in effect, imposes Food and Drug Administration regulatory decisions on the rest of the world.

It now appears that Sens. Orrin Hatch and Edward Kennedy may agree on appropriate legislative language. If they do, chances for favorable action in the Senate are good, but action in the House is still in doubt.

Hearings last year in both houses of Congress supported the reform in principle, and the bill sponsored by Hatch was endorsed by the pharmaceutical industry and the FDA. There seemed a consensus that it was illogical, at a time of mounting deficits in our balance of trade, that we should continue to hobble an important exporting industry with self-imposed restrictions.

Foreign governments have not asked to be protected by this export ban. Mark Novitch, MD, speaking in support of the bill in his capacity as acting commissioner of the FDA, said, "We believe the governments of other nations are in the best position to assess their own health needs."

Many officials and physicians in other countries have expressed irritation at the arrogance of Americans who presume to make risk-benefit judgments on their behalf. Finally, Dr. John Dunne supported the repeal of the American export ban in testimony before a House subcommittee chaired by Rep. Henry Waxman, D-Calif. Dr. Dunne is with the World Health Organization, an agency which claims to speak for the consumers and patients of the world.

DETERMINED TO BE HEARD

But the consensus was not quite total; radical consumer activists, a diminutive but very vocal group, were determined to be heard. The International Chemical Workers Union expressed in opposition to the bill. Unimpressed by the evidence of manufacturers, who explained that the export ban had forced them to make certain products abroad which they would have preferred to produce in the United States, the union declared that "the jobs that would be created are outweighed by the tremendous ethical disadvantages of the bill."

Dr. Sidney Wolfe of Public Citizen's Health Research Group spelled it out. Citing drugs that were approved in the United Kingdom, but not the United States, and later withdrawn because of adverse reactions.

The activists seize upon a kernel of truth, which they proceed to amplify, through extrapolation, to a grotesque generality. It is quite true that the manufacturers of drugs, like those of other commodities, seek to differentiate their products. But it does not follow that they can succeed by the same tactics as the makers of cosmetics or costume jewelry, who use the mass media to appeal to the whimsy of the consumer.

Pharmaceutical manufacturers first must persuade a stern regulatory agency that their products are safe and effective for a sizable portion of the relevant patient population. Such persuasion requires solid evidence, which can be obtained only through many years of controlled studies of animals and humans. If this hurdle can be surmounted, manufacturers must then persuade an audience of conservative and skeptical physicians and pharmacists that the new drug is safer or more effective than the one they have been using. Moreover, the manufacturer's promotional message must, in most countries, meet the standards set by the regulatory agency and provide relevant warnings of side effects and contraindications.

Similarly, it is quite true that some of the observed differences in prescribing and dispensing practices, nationally and internationally, are not entirely rational. It may be true, as Medawar maintains, that the Spaniards use too many appetite stimulants and that in many countries some combinations of drugs are recommended for conditions where single entity medicines might be preferable and cheaper.

But Medawar and his colleagues attempt to erect too elaborate a structure of dogma on too narrow a foundation. Like the other apologists for the highly restrictive national formulary of Bangladesh, he sees the "proliferation" of drug products as a major impediment to public health and economic development in the Third World. Implicit in this criticism is the assumption that, in all countries, there is a single "drug of choice" for all patients with the same disease. This is typically an older drug, available generically, and one to be included in the limited national formulary of "essential" drugs. All others are "me-too" drugs, artifically differentiated, and imposed on gullible prescribers and dispensers by unscrupulous multinational manufacturers. Not only are these products needlessly expensive but, according to the script of the activists, they are frequently toxic and ineffective. They may not even be approved in the United States, which means that they are being "dumped" on defenseless Third World consumers.

The ideologues of HAI see such anti-social behavior as a natural consequence of competitive market forces. Those of us who have observed the scene from the inside acknowledge the vigor of competition, but see its effect quite differently. We believe it impels manufacturers to achieve an advantage by developing more effective drugs with fewer side effects. And we are puzzled by the perverse logic of the activists who argue that consumer costs will be lowered by reducing the number of drugs on the market.

It is not necessary to depend on the lessons of freshman economics, where we were told that curtailing supply tends to raise prices. We can look at Norway, hailed by Medawar as a model which he believes his own country, Great Britain, should follow. He notes that the national list of preparations available in Norway is about one-third of the number available in the United Kingdom. But he fails to note that per capita expenditure for medicines in Norway has been almost twice that in Britain.

If a preference for ideology over careful observation is one characteristic of the true believers, another is their tendency toward what might be described as "semantic shift." For example, when a death is reported as having been "associated with" the ingestion of a particular drug, they take it as fact that the death was "caused by" the drug. Also, despite the reminder, in the preamble to the WHO's Essential Drug List, that "exclusion does not imply rejection," the activists tend to assume that products not included have been found to be either ineffective or less effective than those on the list.

We saw an example of this tendency in the well-orchestrated campaign against removing the current U.S. ban on the export of drugs not yet approved by the FDA. "Unapproved" was widely interpreted as meaning "disapproved." The stage was set for this gambit by the differences in the approval standards of various regulatory agencies and the consequent differences in the prescribing information on individual products as listed in the various national compendia. The fact that foreign reference guides are more abbreviated than our own Physician's Desk Reference invites the production of sensational books such as "Prescription for Death; The Drugging of the Third World."

* * * * * *

Similarly, it is hard to reconcile a preoccupation with the cost of drug therapy with an attempt to impose on the rest of the world the prevalent American distaste for fixed combinations—which comprise a substantial share of Dr. Wolfe's "Pills That Don't Work." All would agree that where a single entity drug would suffice, it makes little sense to use a mixture. But when the doctor decides that concomitant therapy is needed, and the patient needs both an antihypertensive and a diuretic, or an antibiotic and a fungicide, it is almost invariably cheaper and more convenient to use a combination.

THORNY PROBLEM

None of the contradictions of the international consumerists is quite as thorny as the problem of reconciling their other complaints and objectives with their efforts to fit into the overall concept of a New International Economic Order. This goal has been pursued in the halls of the U.N. General Assembly, ECOSOC, UNIDO and UNCTAD by delegates from most of the less developed countries, who complain of adverse terms of trade and seek emancipation from the alleged exploitation of multinational corporations. While a great many non-Communist regimes have joined the crusade, they nevertheless have taken ideological sustenance from the teachings of Marx and Lenin, who preached that as competition erodes profit margins in the markets of the industrialized countries, capitalists will seek investments in the lesser developed countries, where labor—the base of all value according to the "true faith"—is relatively cheap.

But the ideology of IOCU and HAI is not pure Marxism. Although it seeks to expand the public sector, particularly in the field of regulation, the movement also seeks to encourage indigenous entrepreneurs and capitalists in the lesser developed countries. They are the "good guys" in white hats, with the welfare of the masses at heart. It is the multinational manufacturer who allegedly "dumps" ineffective and poisonous drugs and subverts the local medical and pharmaceutical professions with gaudy ads and tempting gifts.

The problem with this scenario is that it is contradicted by the daily observations of the Third-world consumer. He notices that

the products which fail most are generally made by indigenous companies, and that the exaggerated claims are more likely to come from local firms. If chloramphenicol is being used too freely, then most of the blame should go to the native firms which produce the vast bulk of this antibiotic. Certainly Parke-Davis cannot be blamed for the fact that it is the most widely used antibiotic in mainland China.

And if clioquinol (Enterovio-form) should not be used at all, as the consumerists insist, then the message should go not to Ciba-Geigy, which has discontinued its production and distribution, but to the many indigenous producers, as well as the national governments in many Third-world countries which persist in believing that the drug is relatively safe and extremely effective.

The priority which HAI assigns to the replacement of multinationals by local firms is evidenced by the prominence this issue has been given in the organization's draft of an International Marketing Code, which it hopes to persuade WHO to accept. It is also demonstrated by the pronouncements, in HAI bulletins, that the restrictive and confiscatory new drug policy adopted in 1982 by Bangladesh is a proven success. Where is the proof? It could hardly be demonstrated that there has been greater accessibility and lower prices for the drugs needed to keep cholera in check. The crowning proof of success is the undisputed fact that the market share of the multinationals has declined and that of the local manufacturers, particularly the producers of traditional medicines such as Ayurvedic and Unani, has risen.

POSITIVELY FRIENDLY

Will the professional consumerists succeed in pushing their marketing code through next year's World Health Assembly? Clearly, they feel less confident than in the old days, when they found it easy to capture other specialized agencies of the United Nations. In 1982, the Assembly decided to defer action on the Code and to give IFPMA a chance to demonstrate its own newly approved voluntary code.

Moreover, Director-General Halfdan Mahler can no longer be counted on to denounce the pharmaceutical industry. Indeed, he appears to have grown positively friendly to the multinationals recently. HAI luminaries were audibly indignant when they learned that Dr. Dunne, the WHO chief of pharmacy, actually had testified in Washington in favor of repealing the American export ban on unapproved drugs.

Mr. HATCH. Mr. President, we could go on and on debating these nuances in the law.

I do not think we have to spend the whole day today on this. I think we can do, if the Senator finds it satisfactory, is for him to lay down some of his amendments and begin voting at 2 o'clock tomorrow. At least, that is what the majority leader has indicated to me. We could have some stacked amendments ready to go—at least one, if not more than one—and we could debate those here today.

The Senator might lay down a few amendments today. If the Senator would prefer to wait until tomorrow, there is not much more we can do today. We could lay down at least one amendment and have 15 minutes to debate it tomorrow, from 2 to 2:15, and have a vote.

Mr. METZENBAUM. Mr. President, we do intend to lay down one or more amendments this afternoon. We will decide which one we want first. I know that the majority leader would like us to have at least a couple of amendments for tomorrow. The Senator from Ohio is considering laying down an amendment, and possibly a second one, providing for an hour debate between the first and the second.

I suggest that at this moment we put in a quorum call, and then we will decide.

Mr. HATCH. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

□ 1440

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

□ 1450

AMENDMENT NO. 1948

(Purpose: To amend section 412 of the Federal Food, Drug, and Cosmetic Act, relating to requirements for infant formulas)

Mr. METZENBAUM. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Ohio [Mr. METZENBAUM] proposes an amendment numbered 1948.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment reads as follows:

At the end, add the following:

SEC. 9. Section 412 of the Federal Food, Drug, and Cosmetic Act is amended—

(1) by redesignating subsections (e), (f), and (g) as subsections (h), (i), and (j), respectively;

(2) by striking out the last sentence of paragraph (1) of subsection (h) (as redesignated by clause (1) of this section) and inserting in lieu thereof the following new sentence: "Such records shall be retained for at least one year after the expiration of the shelf life of the infant formula.";

(3) by striking out "subsection (a)(2)" in subsection (j) (as redesignated by clause (1) of this subsection) and inserting in lieu thereof "subsection (a)(3)"; and

(4) by striking out subsections (a) through (d) and inserting in lieu thereof the following:

"(a)(1) An infant formula (including infant formula powder) shall be deemed to be adulterated if—

"(A) such infant formula does not provide nutrients as required by subsection (j);

"(B) such infant formula does not meet the quality factor requirements prescribed by the Secretary under this section; or

"(C) the processing of such infant formula is not in compliance with the good manufacturing practices and the quality control procedures prescribed by the Secretary under this section.

"(2)(A) The Secretary shall by regulation—

"(i) establish requirements for quality factors for infant formulas, including requirements for the nutrients required by subsection (j);

"(ii) establish—

"(I) good manufacturing practices for infant formulas, including quality control procedures; and

"(II) requirements respecting the retention of records,

that the Secretary determines are necessary to assure that an infant formula provides nutrients in accordance with this section and will not cause harm; and

"(iii) establish requirements for the conduct by the manufacturer of an infant formula of regularly scheduled audits to determine that such manufacturer has complied with the regulations prescribed under clause (ii).

"(B) The good manufacturing practices and quality control procedures prescribed by the Secretary under subparagraph (A)(ii) shall include requirements for—

"(i) the testing of each batch of infant formula for each nutrient required pursuant to subsection (j) prior to the distribution of such batch in order to ensure the such formula is in compliance with this section and does not contain any deleterious or otherwise unsafe substance; and

"(ii) regularly scheduled testing of samples of infant formulas during the shelf life of such formulas in order to ensure that such a formulas are in compliance with this section and do not contain any deletrious or otherwise unsafe substance.

"(C) The record retention requirements prescribed by the Secretary under paragraph (A)(ii) shall include requirements for—

"(i) the retention of all records necessary to demonstrate compliance with the good manufacturing practices and quality control procedures prescribed by the Secretary under such subparagraph, including records containing the results of all testing required by subparagraph (B);

"(ii) the retention of copies of all records prepared by suppliers of raw materials and food packaging materials used in the processing of infant formula to demonstrate compliance by such suppliers with all regulations, guidelines, and action levels prescribed by the Secretary with respect to such raw materials and food packaging materials and with respect to infant formula;

"(iii) the retention of all records pertaining to the microbiological quality and purity of raw materials used in infant formula and of finished infant formula (including infant formula powder);

"(iv) the retention of all records of the results of regularly scheduled audits conducted pursuant to the requirements prescribed by the Secretary under subparagraph (A)(iii); and

"(v) the maintenance of files with respect to, and the review of, complaints concerning infant formulas.

Records required under this paragraph with respect to an infant formula shall be retained for at least one year after the expira-

tion of the shelf life of such infant formula. Such records shall be made available to the Secretary for review and duplication upon request of the Secretary.

"(D) In prescribing requirements for audits under subparagraph (A)(iii), the Secretary shall provide that such audits be conducted by appropriately trained individuals who do not have any direct responsibility for ensuring that the manufacturer of an infant formula complies with the regulations prescribed by the Secretary under subparagraph (A)(ii).

"(3) The Secretary may by regulation—

"(A) revise the list of nutrients in the table in subsection (j); and

"(B) revise the required level for any nutrient required by subsection (j).

"(b) No person shall introduce or deliver for introduction into interstate commerce any new infant formula unless an application has been filed pursuant to subsection (c) with respect to such formula and such application has not been disapproved. For purposes of this section, the term 'new infant formula' includes any infant formula for which there has been a change in formulation or processing which may affect whether the formula is adulterated within the meaning of this section.

"(c) A person shall, with respect to any infant formula subject to the provisions of subsection (b), file with the Secretary an application. Each such application shall include—

"(1) full reports of testing demonstrating that such infant formula provides nutrients in accordance with subsection (j) and complies with the quality factor requirements prescribed by the Secretary under subsection (a)(2)(A)(i);

"(2) records demonstrating that the processing of such infant formula complies with the regulations prescribed by the Secretary under subsection (a)(2)(A)(ii); and

"(3) such additional information as the Secretary may by regulation prescribe.

"(d) Within ninety days after an application is filed under subsection (c), or prior to the end of such additional period as may be agreed upon by the Secretary and the applicant, the Secretary shall either—

"(1) approve the application if the Secretary finds that the infant formula complies with the requirements of this section and the regulations prescribed by the Secretary under subsection (a)(2)(A); or

"(2) deny the application.

"(e) An applicant whose application has been denied under subsection (d)(2) may appeal such denial pursuant to procedures specified in regulations prescribed by the Secretary. After the applicant has exhausted the remedies specified in such procedures, the applicant may appeal the denial of such application to the United States court of appeals for the circuit wherein such applicant resides or has his principal place of business, or in the United States Court of Appeals for the District of Columbia Circuit, within sixty days after the entry of the Secretary's final order denying such application.

"(f)(1) If the manufacturer of an infant formula has knowledge which reasonably supports the conclusion that an infant formula which has been processed by the manufacturer and which has left an establishment subject to the control of the manufacturer—

"(A) may not provide the nutrients required by subsection (j); or

"(B) may be otherwise adulterated or misbranded, the manufacturer shall promptly notify the Secretary of such knowledge and shall immediately take all actions necessary to recall shipments of such infant formula from all wholesale and retail establishments, and to assist such retail establishments in publicizing such recall in a manner reasonably designed to notify purchasers of such infant formula of such recall and the reasons for such recall.

"(2) For purposes of paragraph (1), the term 'knowledge' as applied to a manufacturer means (A) the actual knowledge that the manufacturer had, or (B) the knowledge which a reasonable person would have had under like circumstances or which would have been obtained upon the exercise of due care.

"(g)(1) If a recall of an infant formula is begun by a manufacturer, the recall shall be carried out in accordance with such requirements as the Secretary shall prescribe under paragraph (2), and—

"(A) the Secretary shall, not later than the 15th day after the beginning of such recall and at least once every 15 days thereafter until the recall is terminated, review the actions taken under the recall to determine whether the recall meets the requirements prescribed under paragraph (2); and

"(B) the manufacturer shall, not later than the 14th day after the beginning of such recall and at least once every 14 days thereafter until the recall is terminated, report to the Secretary the actions taken to implement the recall.

"(2) The Secretary shall by regulation—

"(A) prescribe the scope and extent of recalls of infant formulas necessary and appropriate for the degree of risk to human health presented by the formula subject to the recall; and

"(B) require the posting of a notice of any recall of an infant formula at each place where such formula is sold or was available for sale.".

Mr. METZENBAUM. Mr. President, this is an amendment that I am offering in connection with the interest of a group called "Formula." "Formula" is a national nonprofit parent's organization that was created 7 years ago by Carol Laskin and Lynne Pilot when their two children became seriously ill after consuming the defective infant formula Neo-Mull-Soy. Since then, more than 70,000 parents have been in touch with Carol Laskin and Lynne Pilot.

They have urged us to adopt this amendment in a letter which reads as follows:

DEAR SENATOR: We need your support of the proposed amendments to section 412 of the Food, Drug, and Cosmetic Act, relating to the requirements for infant formulas:

They go on to say I intend to offer their amendments to the drug export bill.

The letter further reads:

When the Infant Formula Act was signed into law in 1980, it set nutrient standards for all infant formulas, and gave the FDA authority to promulgate quality control regulations.

Why does this law need to be amended now?

The answer is very simple. Defective infant formula can still reach consumers because *manufacturers are not required to test each batch of infant formula for all of the nutrients specified in the law before it leaves the factory. (See attached list.)*

And I will come back to the attached list. Said they:

The need to correct this problem was pinpointed by Judge Kenneth H. Starr in his recent opinion before the U.S. Court of Appeals for the District of Columbia Circuit in which he acknowledged that "deficient formula * * * could be on grocery store shelves for three months before the required periodic analysis would detect the deficiency". (No. 84-5747, Dec. 31, 1985, p. 32.)

The proposed amendments will:

1. Require manufacturers to test each batch of infant formula for each legally mandated nutrient before the formula leaves the factory.

2. Provide that nutrient levels be routinely tested throughout the product's shelf-life.

3. Require manufacturers to test each batch of formula for hazardous extraneous materials (e.g., heavy metals, carcinogens, pesticides, and other industrial contaminants).

4. Ensure that record retention requirements apply to infant formula powders.

5. Provide for point-of-purchase recall notification.

We believe these amendments will provide protection for our Nation's most precious resource—our children.

Mr. President, I remember when we passed the first infant formula bill. It was during the administration of President Carter. I remember going down to the White House for the signing of the bill as one of the cosponsors of that legislation. There was such a sense of excitement by these women and children and other women because finally we had done something to see to it that our Government protects infants from formula that truly should not be ingested by those babies. We thought that we had won that battle. It was an exciting day.

But, unfortunately, the Food and Drug Administration did not provide the kind of protection which they were expected to provide. Instead, they made it possible for infant formula manufacturers to set their own standards as to what is and is not safe. And, as a consequence of their failure to do that which they should have done, the list, which is attached to the letter from the group called Formula headed up by these two women, reads as follows:

PROBLEMS WITH INFANT FORMULAS SINCE 1982

1. *Wyeth.* More than 3 million cans of SMA and Nursoy recalled because they lacked vitamin B6. (1982)

2. *Abbott-Ross.* Similac and Isomil found to contain carcinogens trichlorethylene (TCE) and perchlorethylene (PCE) due to contaminated well water. FDA considers these "weak carcinogens" and does not order a recall. (Food & Chemical News, Nov. 28, 1983). In July 1985, American Academy of Pediatrics asks for sampling of groundwater, a testing procedure which FORMULA proposed back in 1982.

3. *Loma Linda.* Soyalac Powder (16 oz. cans) recalled because of a loss of vitamin A activity (August 1983).

4. *Filmore Foods.* Naturlac (distributed by Sunshine & Rainbow and sold in health food stores) recalled because of a lack of thiamine copper, and vitamin B6. (Food & Chemical News, Sept. 12, 1983)

5. *Scott Treadway (Kama Nutritional).* Kama-Mil Powder recalled by Wishing Well Distributing Co. and Threshold Enterprises because product deficient in folacin, zinc, and vitamin D. Class I recall. Product never registered with FDA. Someone notified FDA anonymously. FDA has had difficulty in locating manufacturer. (Food & Chemical News, April 22, 1985)

6. *Scott Treadway (Kama Nutritional).* Nutra-Milk Powder recalled by Wishing Well Distributing Co., Threshold Enterprises, and Stowe Mills. Class I recall. Nutrient deficiencies and lack of registration. Manufactured from 1980–1985 without FDA's knowledge. FDA has had difficulty in locating manufacturer. (1985)

7. *Gerber Foods.* Gerber Meat Base Formula (MBF) recalled because some lots contained excess vitamin A. Gerber had purchased the vitamin premix from Watson Food Company. (Food & Chemical News, Feb. 25, 1985)

8. *Ross-Abbott.* Three reformulations made without notifying FDA: (a) revision in the concentation of total solids, fat, and protein for Similac with Whey ready-to-feed, (b) revision of the mineral premix used in Similac with Iron and Similac with Whey Plus Iron, and (c) reduction of the protein levels and change in the mineral source for calcium and phosphorus for Isomil ready-to-feed and concentrate. (Food & Chemical News, July 29, 1985)

9. *Loma Linda.* Soyalac Powder (1.2 oz. foil pouches provided to physicians as samples) recalled because of progressive vitamin A degradation. (FDA Enforcement Report, Feb. 12, 1986)

10. *Powdered Formulas.* There are no provisions for the FDA to examine quality control and production records of powdered formulas. Unlike liquid infant formulas, powdered formulas are not covered by existing low acid canned food regulations. According to a Michigan FDA investigator, this situation could result in "serious food borne disease in infant formula powders." (Food & Chemical News, July 9, 1984)

11. *Watson Foods Company.* The U.S. Department of Justice filed a motion for a preliminary injuction because "as a result of inadequate quality control, numerous Watson vitamin and mineral mixes [used in infant formulas] have been misbranded and adulterated." (Department of Justice statement, Jan. 2, 1986)

Mr. President, I recited all of those because I wanted to make it clear—not that somebody was going to understand the specifics of that which I was reciting—but to make it very clear that the problem with respect to infant formulas being sold in the marketplace today is not an isolated instance. It is not just one company. It is not some off-brand company. It is a fact that the babies of this Nation who are taking infant formula are constantly exposed to infant formula that is not safe for them to ingest into their little tummies.

□ 1500

Mr. President, it is my strong feeling that we need to add to this bill that has to do with drug exports some prohibition in order to provide for the protection of the infant formula being sold in this country. We thought we had achieved that objective some years ago during the Carter administration. Obviously the Food and Drug Administration emasculated the original intent of the drafters of the bill.

Now I think it is necessary that we go back with legislation in order that we can make it unequivocally clear that we expect protection for babies as far as it pertains to the infant formula that they are using and their mothers are feeding them.

Mr. President, I ask unanimous consent that the vote in connection with this amendment occur at 2:30 tomorrow after half-hour of debate on the bill.

The PRESIDING OFFICER. Is there objection?

Mr. METZENBAUM. I withhold that temporarily.

Mr. President, in order that this matter may be cleared with the appropriate parties responsible for action on the floor of the Senate, I withdraw my unanimous-consent request at this moment. But let me explain what the Senator from Ohio expects to do as far as tomorrow's activities are concerned.

I was prepared in accordance with my understanding with the majority leader to come in early tomorrow morning and start action in connection with a number of amendments that the Senator from Ohio has. I was prepared to come in at 9, 9:30, or whatever the case my be in accordance with the discussion I previously had with the majority leader.

I am now advised that the majority leader and those who are responsible for handling the floor on the other side of the aisle have indicated that they would prefer there not be any votes in the morning, and that there would be votes in the afternoon. I am prepared to move forward in connection with the various amendments that I have. But I do want to have some assurance from the manager of the bill who I assume would be speaking for the majority leader that I will not be precluded—by reason of that fact or by reason of some other Senator calling up one of his amendments that is permitted by the original unanimous-consent request—from offering a number of other amendments the Senator from Ohio has, and not find myself squeezed in toward a 1 o'clock final vote time on this bill.

Mr. HATCH. Let me just say that I cannot speak for the majority leader. But I can assure the Senator from Ohio that I am willing to stay late tomorrow night and allow adequate time for him to bring up his amendments. I do believe the majority leader will expect us to have a final up or down vote on passage at 1 o'clock on Wednesday. But I believe there will be adequate time for the distinguished Senator from Ohio to present his amendments. I do not know of anyone who would try to prohibit him or interfere with his right to present those amendments and allow whatever time he desires between now and 1 o'clock Wednesday.

I am willing to stay as manager of the bill tomorrow evening so that he will have adequate time.

Mr. METZENBAUM. I would like to get that assurance so I may be certain.

Mr. HATCH. I cannot give the Senator that assurance. I think 1 o'clock is by unanimous consent.

Mr. METZENBAUM. I believe that is the case. I think I would like to explore the matter with the majority leader before placing a unanimous-consent request because otherwise I think I would like to work starting at 9 or 9:30.

Mr. HATCH. I have no objection to that. But I understand the morning is clouded by the fact they have an executive session, a number of special orders, and then they have the ceremony for Anatoly Shcharansky, to which almost everybody wants to go.

Mr. METZENBAUM. I expect to go to the Shcharansky ceremony.

Mr. HATCH. We also have, as the Senator knows, the caucuses for both parties tomorrow between 12:30 and 2. So 2 is about the earliest we can get started.

Mr. METZENBAUM. We could start at 8:30 or 9 o'clock as far as the Senator from Ohio is concerned, and have one or two votes early in the morning, if that is convenient with the majority leader.

Mr. HATCH. As far as I know, neither side wants to have votes before 10:30. That is when the Shcharansky ceremony starts.

Mr. METZENBAUM. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. COHEN). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HATCH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATCH. Mr. President, with regard to the distinguished Senator's pending amendment, I just saw the amendment today. So I would state that we will develop answers that more fully address this amendment. But first, this particular subject—that is, infant formula—has nothing to do with the pharmaceutical export amendments, the bill before us. It is certainly a nongermane amendment. It has nothing to do with this particular bill, and would not only cloud the issue but could be very detrimental to the bill. These proposals have not been examined nor have they been voted upon by our committee.

Its adoption at this time would be premature, although the Senator does raise issues that we have to look at and address. Second, there is no evidence, not any, not anywhere, that the current infant formula law is not working. It is working. The Senator has noted a series of recalls but, to the best of my knowledge, they fall into two categories: First, people who produce infant formula are already covered by existing law. No law will restrain the unlawful. Those who ignore the laws are going to do it anyway; second, deficiencies in formula that were discovered before they came to market show that the current law is working. These examples fall is one of these categories: Those who are breaking the current law, or examples where the law has worked, found the deficiencies, and caught them before they came to the market.

So none of these examples justify the amendment the Senator is proposing. I might add that in my judgment, these amendments are impractical, and will be opposed by the Food and Drug Administration. One of the problems with the proposal to every nutrient in every batch is that some of these tests take months, and the decrease in shelf life would be significant as would be the increase in expense.

There is no way I can support this amendment, and I not think anybody who really understands pharmaceutical law or really understands what goes on in FDA and in the pharmaceutical industry or in the infant formula industry would really support this particular amendment at this time. There may be some issues raised that may deserve hearings, and the committee in the future wil certainly look at that.

That is about all I would care to say about the distinguished Senator's amendment today. I will add some more tomorrow. I hope this amendment will be defeated because this has nothing to do with this legislation. I think there are plenty of answers to what the distinguished Senator has brought forth.

With that, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

1510

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1949

(Purpose: To require the Secretary to enter into agreements to obtain information about the export of drugs)

Mr. METZENBAUM. Mr. President, I ask unanimous consent that, for purposes of my offering a second amendment, the first amendment be temporarily laid aside and that I be permitted to send an amendment to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The legislative clerk read as follows:

The Senator from Ohio [Mr. METZENBAUM] proposes an amendment numbered 1949.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 37, between lines 20 and 21, insert the following:

"(9) For the purpose of implementing and monitoring compliance with the requirements of this subsection, the Secretary shall enter into agreements with or utilize the services of any foreign government or United States embassy in a foreign country to obtain drug labeling used in any foreign country or information available in a foreign country with respect to the safety and effectiveness of drugs.".

AMENDMENT NO. 1950

(Purpose: To require that the same conditions apply to the export of antibiotic drugs as apply to other drugs)

Mr. METZENBAUM. Mr. President, I ask unanimous consent that for the purpose of my offering a third amendment, the first two amendments be temporarily laid aside and that I be permitted to offer an amendment at this point.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The legislative clerk read as follows:

The Senator from Ohio [Mr. METZENBAUM] proposes an amendment numbered 1950.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 37, between lines 20 and 21, insert the following:

"(9) An antibiotic drug which is subject to certification by the Secretary under section 507 may be shipped for export only to a country described in paragraph (2) and only if the antibiotic drug meets the requirements of paragraph (3).

SEC. 4. (a)(1) The provisions of section 801(e) of the Federal Food, Drug, and Cosmetic Act, as added by section 3 of this Act, shall not apply, for a period of one year beginning on the date of enactment of this Act, to any antibiotic drug which—

(A) is subject to certification by the Secretary of Health and Human Services under section 507 of the Federal Food, Drug, and Cosmetic Act;

(B) has been exported prior to the date of enactment of this Act;

(C) does not comply with the provisions of section 801(e) of the Federal Food, Drug, and Cosmetic Act, as added by section 3 of this Act; and

(D) complies with the provisions of paragraph (2).

(2) An antibiotic drug to which paragraph (1) applies may be exported if—

(A) such antibiotic drug has not been the subject of final action by the Secretary of Health and Human Services denying, withdrawing, or suspending approval or certification of such antibiotic drug on the basis of safety and effectiveness, or otherwise banning such antibiotic drug on such basis; and

(B) such antibiotic drug is not the subject of a notice by the Secretary of Health and Human Services of a determination that the sale of such antibiotic drug in the foreign country to which such antibiotic drug is to be exported is contrary to the public health and safety of such country

(b) The Secretary of Health and Human Services may extend the one-year period for which, pursuant to subsection (a)(1), the provisions of section 801(e) of the Federal Food, Drug, and Cosmetic Act do not apply to an antibiotic drug if the Secretary determines that the manufacturer of such antibiotic drug is making a good faith effort to comply with the provisions of section 801(e) of the Federal Food, Drug, and Cosmetic Act, as added by section 3 of this Act, with respect to such antibiotic drug. Any extension under this subsection shall be for a period not in excess of one year.

Mr. METZENBAUM. Mr. President, in order that there may be an understanding of what has transpired on the floor at the moment, the Senator from Utah and the Senator from Ohio are not in disagreement as to our being able to call these amendments up shortly after the respective caucuses conclude at 2 o'clock tomorrow and proceeding to a vote in connection with each of them. However, it has been suggested that the majority leader and the minority leader have to be consulted. For that reason, Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, the Senator from Utah and the Senator from Ohio have been talking about a unanimous-consent agreement as to when these amendments will be voted upon with time limits. We both agree that there is really no necessity for doing that. Members of the Senate should be advised shortly after the respective caucuses occur there will be a short period of debate, probably about a half hour equally divided, on the first amendment, and then there will be a short period of debate in connection with the second amendment, and a relatively short period of debate in connection with the third amendment.

There should be three amendments that will come up for a vote in the early afternoon tomorrow.

The Senator from Ohio has some additional amendments that he will be offering during the remainder of the day. I make these statements in order that all Members may be apprised of that which is going to come. Other Senators may have amendments to offer also.

Mr. HATCH. Mr. President, with that, I suggest the absence of a quorum, and I suggest that since there will be no further debate on these amendments, there will be no further debate on the bill the rest of the day.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HATCH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATCH. Mr. President, the distinguished Senator from Ohio has called up three amendments, I ask unanimous consent that those three amendments be voted upon in the order in which they were called up after reasonable periods of time for debate, which has already been expressed by the distinguished Senator from Ohio.

The PRESIDING OFFICER. Is there objection?

Mr. METZENBAUM. Mr. President, reserving the right to object, and I certainly do not intend to object, I assume that the unanimous-consent agreement heretofore entered into will not be displaced by this particular unanimous-consent request,

Mr. HATCH. Mr. President, there was no prior unanimous-consent agreement.

□ 1520

The PRESIDING OFFICER. The Chair will recall that the Senator withdrew his unanimous-consent request before it was acted upon by the Chair.

Mr. METZENBAUM. The one that the Senator from Ohio is referring to is the one that was entered into before we went out last week.

The PRESIDING OFFICER. This will not displace that unanimous-consent agreement.

Mr. HATCH. All this will do is set the order in which the amendments will be voted upon with reasonable time for debate in between.

The PRESIDING OFFICER. Without objection, it is so ordered,

Mr. HATCH. Mr. President, I suggest the absence of a quorim.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

The HATCH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATCH. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. HATCH. As I understand it, the three votes tomorrow will occur in relation to the three amendments in the order that they were called up. I ask unanimous consent that the votes with relation to the three amendments be in the order that they were called up.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The PRESIDING OFFICER. (Mr. COHEN). The Chair, in his capacity as the Senator from Maine, suggests the absence of a quorum. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

□ 1540

Mr. SIMPSON addressed the Chair.

The PRESIDING OFFICER. the Senator from Wyoming is now recognized. The Chair was going to suggest something else.

Mr. SIMPSON. The Chair was going to say Montana. I know how easterners are.

Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SIMPSON. We have the same difficulty in the West, mixing up New Hampshire, Vermont, and Maine, you see. What happens in the Senator's area, they mix up Montana, Colorado, and Wyoming, but not the occupant of the chair, my old friend from Maine, who came here when I did.

RACINE HARBOR, WISCONSIN, IMPROVEMENTS

Mr. SIMPSON. Mr. President, I have conferred with the Democratic leader. I appreciate his consideration of my scheduling. With that, I ask unanimous consent the Senate now turn to the consideration of H.R. 4767, dealing with Racine Harbor, WI.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report.

The legislative clerk read as follows:

A bill (H.R. 4767) to deauthorize the project for improvements at Racine Harbor, WI.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendments to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 4767) was ordered to a third reading, was read the third time, and passed.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to table the motion.

The motion to lay on the table was agreed to.

ORDER FOR RECORD TO REMAIN OPEN

Mr. SIMPSON. Mr. President, I ask unanimous consent that the RECORD remain open until 5 p.m. today, Monday, May 12, for the introduction of bills, resolutions, and the submission of statements.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR TOMORROW

Mr. SIMPSON. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 10 a.m. on Tuesday, May 13, 1986.

I further ask unanimous consent that following the recognition of the two leaders under the standing orders, there be special orders in favor of the following Senators for not to exceed 5 minutes each: HAWKINS, CRANSTON, PROXMIRE, WEICKER, and MCCONNELL.

I also ask unanimous consent that following the special orders just identified, there be a period for the transaction of routine morning business not to extend beyond 10:45 a.m., with Senators permitted to speak therein for not more than 5 minutes each.

I ask unanimous consent that the Senate stand in recess between the hours of 10:45 a.m. and 2 p.m. in order for the Senate to attend the ceremony in the rotunda for Natan (Anatoly) Shcharansky and for the weekly party caucuses to then meet.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

PROGRAM

Mr. SIMPSON. Mr. President, when the Senate reconvenes at 2 p.m., pending will be the unfinished business, S. 1848, the drug export bill. Votes can be expected during the day of Tuesday. There were three Metzenbaum amendments offered today. The Senate could be in session into the evening in order to make certain progress on the drug export bill.

RECESS UNTIL 10 A.M. TOMORROW

Mr. SIMPSON. Therefore, Mr. President, in accordance with the previous order, I move the Senate stand in

recess until 10 a.m. Tuesday, May 13, 1986.

The motion was agreed to, and, at 3:37 p.m., the Senate recessed until Tuesday, May 13, 1986, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate May 12, 1986:

DEPARTMENT OF STATE

EXTENSIONS OF REMARKS

GRAZING FEE REVIEW AND EVALUATION

HON. ROBERT F. (BOB) SMITH

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Monday, May 12, 1986

Mr. ROBERT F. SMITH. Mr. Speaker, I rise today to share with my colleagues a report prepared by three national industry groups: the Public Lands Council, the National Cattlemen's Association and the National Wool Growers Association in response to the recently released report from the Secretarys of Agriculture and Interior on Grazing fees as required under the Public Rangelands Improvements Act of 1978. I commend the report to my House colleagues.

DRAFT LIVESTOCK INDUSTRY COMMENTS ON THE GRAZING FEE REVIEW AND EVALUATION: A REPORT FROM THE SECRETARY OF AGRICULTURE AND THE SECRETARY OF THE INTERIOR

INTRODUCTION

The final "Grazing Fee Review and Evaluation" report from the Secretaries of the Interior and Agriculture is a grave disappointment to the National cattlemen's Association, the National Wool Growers Association, and the Public Lands Council—the three national organizations which represent livestock operators who utilize the federal rangelands for grazing purposes.

None of the five alternative fee systems examined in the final report are an improvement over the current fee system that is embodied in the Public Rangelands Improvements Act of 1978 (PRIA). Therefore, we believe the PRIA formula should be retained as the best method of determining the fair market value of grazing on these lands and as the best method of fostering good management of these land for multiple-use values.

In this paper we examine what is wrong with these five alternatives and with some of the changes suggested in the Report for the PRIA formula.

Three of the five alternatives are flawed because they are based on a study that is invalid. The study—an "appraisal" of private rents paid for western grazing pastures—violates standard rules of statistics and economics. We discuss below why this appraisal study cannot be used to determine the fair market value of public grazing forage.

The three alternatives utilizing figures based on, or derived from, the appraisal are: (1) the Modified PRIA Fee System, (2) the Combined Value Fee System, and (3) the Modified Market Value Fee System.

A fourth alternative in the Final Report is the Competitive Bid Fee System which, for reasons discussed below, would require a drastic and unwise departure from the current multiple-use and sustained yield approach to public land management. In addition, bidding would destabilize the Western livestock industry, as we explain below. (This alternative would also establish "a minimum acceptable bid." Whether that minimum would be based on an amount from the appraisal study or some other source is not made clear.)

The fifth alternative is the PRIA-Updated Base Value Fee System. The problem that we have with this alternative is with the two ways a new index invented in this report—called an Input Cost Index (ICI)—is used: (1) to change or "update" the base value in the PRIA formula, and (2) as a substitute for the current Prices Paid Index. We also question the proposal to *divide* the Beef Cattle Price Index by the ICI (rather than subtract).

Since the ICI is also used in the Modified PRIA Fee System and in the Combined Value Fee System (and is another reason we disagree with those two systems), we will show why the ICI is not what the Final Report purports it is. We disagree with the assertion in chapter 3 of the Final Report that the ICI is superior to the PPI or that it is simply a "technical modification" of the PRIA formula.

ACKNOWLEDGEMENT

We wish to acknowledge and thank the following economists for their help to us in analyzing the technical aspects of the Final Report: John Fowler, New Mexico State University; Frederic W. Obermiller, Oregon State University; and Darwin B. Neilson, Utah State University. However, the statements and conclusions in this paper are solely the responsibility of the National Cattlemen's Association, the National Wool Growers Association, and the Public Lands Council. This paper does not necessarily represent—nor does it purport to represent—the views of these economists.

HIGHER FEES BASED ON MYTHS

The final report by the Secretaries contains five alternatives to the existing PRIA formula fee system. All alternatives to the existing system would result in higher grazing fees, with the magnitude of the fee increase varying among alternatives. Nowhere in the report is a rational given for considering only those alternatives which would lead to higher fees. The question "why should grazing fees be increased?" can be answered only by supposition.

We suspect that pressure to increase grazing fees on public lands administered by the USDA Forest Service (FS) and USDI Bureau of Land Management (BLM) is the result of two popular misconceptions. First, fee receipts do not cover the costs of administering FS and BLM range management programs. Thus, for purposes of cost-recovery grazing fees should be increased. Second, the existing system results in fees that are not consistent with private grazing land rental rates. Thus, fees should be increased because those ranchers who graze livestock on public rangelands have an undue financial advantage and unfairly profit from their grazing privileges.

DISPELLING THE MYTHS

Like most popular misconceptions, these two myths have deep roots and continue to persist even though both logic and available data prove them to be invalid. Why do they persist? The answer lies in the "hidden" benefits and costs associated with livestock grazing on federally managed rangelands.

By law, those rangelands are managed for a number of beneficial uses besides livestock grazing. Congress has declared those uses to be beneficial and Congress has required that rangeland program budgets of the Forest Service and Bureau of Land Management be used, at least in part, to achieve these multiple-use objectives. However, when it comes to justify agency range program costs, the values associated with these nonlivestock grazing benefits often are overlooked, and seldom are counted in the budget justification process. Instead, unnecessary and unfair weight is placed on livestock grazing receipts as the source of funds to pay for nonlivestock range program objectives.

The same sort of naiveté applies to some people's perception and representation of costs incurred by ranchers who graze their cattle and sheep on public rangelands. Many people view the grazing fee as the sole cost incurred by permittees. Nothing could be further from the truth. A 1984 study by the Oregon State University Extension Service shows that grazing fees represent only 15 to 20 percent of the total costs to ranchers of grazing livestock on public rangelands. Nonfee costs are four to five times higher than fee costs. Livestock must be managed and it is the permittees who bear such management costs and the associated risks. Many of the management costs are imposed by government on the private rancher and exist only to satisfy other multiple-use objectives. Some of those imposed costs would not, and do not, exist in private rangeland operations.

THE COST-RECOVERY MYTH

The push for cost recovery is based on two fundamentally erroneous assumptions. It often is assumed that federal agency range management programs exist for only one purpose: to provide forage and habitat for domestic livestock. If this were true, grazing fees would be the appropriate "price" for the sole output produced by the range management program and it would be reasonable to expect fee receipts to cover full costs of administering range programs. The second assumption relates to cost efficiency. It is assumed that the federal agency produces forage and habitat in a cost-efficient manner, i.e., as cheaply as possible. Both assumptions are false.

In the March 1985 draft of the Secretaries Grazing Fee Review and Evaluation Report, it was stated that, in 1983, BLM range management costs per AUM were $3.17 while Forest Service costs per AUM were $3.76. These estimates were slightly changed in the Final Report, but neither report reflects the fact that certain range management costs would remain, even if livestock grazing were to be totally for a number of reasons, including remote location, rugged topography, poisonous weeds, predators, etc, and even if one disregards the cost of the permit itself—the price paid by the rancher for the right to graze his livestock on the public rangelands. The higher nonfee cost load on public rangelands has been extensively doc-

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

umented (see for example Obermiller and Lambert, "Costs Incurred by Permittees in Grazing Cattle on Public Lands in Various Western States," EM 8283, Oregon State University Extensions Service, 1984).

If the total costs of permittees really were lower, then on the average, financial returns for permittee operations should be higher than financial returns for private rangeland operations. However, there are no available data to suggest that this is the case. In fact, USDA Economic Research Service budgets show financial returns for permittees and nonpermittees to be nearly identical. This is acknowledged in the final report: "The differences in means [averages] shown for the permittee's [sic] and the Western Livestock Industry's [receipts and costs] . . . one not statistically different" (p. 62).

Myths die hard. Perhaps the myth of low federal grazing fees that are unfair and inefficient will never die. Be that as it may, it is irresponsible to base national public policy decisions on myths.

MAJOR DEFICIENCIES IN THE FINAL REPORT

The Final Report is better documented than the March 1985 draft report and addresses some of the criticisms we raised in our comments on the draft report last year. However, several substantive problems remain unsolved, partly because faulty decisions were made in the course of the BLM/FS grazing fee review process leading to results that are unalterable and uncorrectable.

For example, the mass appraisal of private grazing land rental transactions in the western states led to a set of data that is incorporated in most of the declared alternatives to the PRIA formula fee system. Other data—specifically, data on the returns and costs incurred by permittees—were not collected even though it is now apparent that such information should have been collected. The agencies were left with a difficult and unresolved dilemma because of their early decision; and regardless of the criticism raised about the mass appraisal, that appraisal data are incorporated in the final report. The western livestock industry remains opposed to any fee system incorporating the results of the defective mass appraisal study.

The other problems previously noted by the western livestock industry still plague the Final Report. These include: (1) development and use of a Proposed "Input Cost Index" (ICI) which substitutes for the PRIA formula "Prices Paid Index" (PPI); and (2) lack of a description of the impacts of competitive bidding, if adopted as an alternative to setting the fee by formula.

THE MASS APPRAISAL: BIG GUN, WRONG TARGET

Suppose that you are the manager of an export business. You are interested in selling bicycles to China. You ask one of your staff members what bicycles sell for in China. The staff member doesn't have any idea, but he knows people use bicycles for transportation. So he goes to various automobile dealers in your neighborhood and gets quotes on new cars. He takes the average from those quotes and tells you that bicycles, in China, are worth $12,000 apiece. You get very excited, order 1,000 bicycles, ship them to China, and go broke. Sounds like a tall tale, doesn't it? Unfortunately, the parable has a real-life counterpart. Its counterpart is the FS/BLM mass appraisal study.

Decisions are only as good as the information on which they are based. Any decision based, in part or whole, on the results of the mass appraisal of private grazing land rental transactions is found to be misguided. Why? For starters, virtually no representative information was collected on the value of public land grazing (bicycles in China). And why was that? The response is that, early in the game, a policy decision was made to go another route. Private grazing land rentals were to be appraised instead (automobile prices in the U.S.).

Not only was the appraisal information irrelevant to the question at hand (i.e., what is the value of public lands used for livestock grazing?), the reported appraisal values have little or no scientific creditability. These concerns were voiced in the joint comments of the National Cattlemen's Association, the National Wool Growers Association, and the National Public Lands Council on the "1985 Grazing Fee Review and Evaluation: Draft Report" (April 25, 1985, pages 3-4):

1. No attempt was made to gather information on the actual value (cost) of services provided by lessors and lessees in appraised rental transactions.

2. No attempt was made to appraise the Federal grazing allotments, except for a small number of unrepresentative transactions.

3. Accepted scientific and statistical procedures were not followed in sampling from a defined population.

4. Once the data were collected, portions were thrown out, either by clipping or by relegating to essentially unused subfiles.

5. No attempt was made to verify "comparable-sales" appraisal values using alternative appraisal methods.

6. Many factors affecting the value of Federal permits and public land grazing were "assumed away," such as permit value (debt servicing requirements) and permittee costs for construction and maintenance of improvements on allotments. No attempt were made to gather data on the amount of range improvement investments and maintenance costs that permittees have.

The industry is not alone in its concerns about the merits of the mass appraisal study. Three western university economists, for example, published a formal critique of the government's appraisal report [Nielson et al., "An Evaluation of the Forest Service and Bureau of Land Management Grazing Appraisal Report," Research Report 104, Utah Agricultural Experiment Station, August 1985]. They found the appraisal results to be deficient in three major respects: (1) no information was collected on the differential values of services provided on public versus private grazing lands; (2) no creditable statistical evaluation of private or public grazing land values was conducted; and (3) the government substituted the value judgments of the appraisers themselves for real-world data. Thus, ". . . the forage values that were estimated in the appraisal report are not valid when judged against the use of scientific methods" (ibid., p. 36).

In short, the appraisal "values" are both useless and irrelevant to the federal grazing fee issue. Any fee alternative incorporating those results is meaningless. Therefore, three of the six fee systems presented in the 1986 Final Report of the Secretaries are not worthy of consideration. These are: (1) Modified PRIA Fee System; (2) Combined Value Fee System; and (3) Modified Market Value Fee System.

THE INDEX QUESTION: MORE THAN MEETS THE EYE

Index numbers are used to measure changes in the general level of prices over time. Usually, some base period is chosen to compare with current prices. As an hypothetical example, 1967 could be chosen as the base period for beef cattle prices. If the average price received by ranchers for beef cattle in 1967 was $25.50 per hundredweight, and the price received in 1978 was $39.25 per hundredweight, the index of prices for 1978 with a 1967 base could be figured as follows:

$$\$39.25 \div \$25.50 = 1.539$$

Thus, in this hypothetical situation, indexing the value of a 1967 steer (priced at $255) to determine a 1978 value would be done as follows: $\$255 \times 1.539 = \$392.45$.

One must be careful in using index numbers. They only reflect the relative changes in prices and do not reflect changes in the quantity or quality of the item being updated.

The choice of the base period is also extremely important. If prices in the base period chosen are extremely high or low, then any subsequent indexing will be misleading. For example, the 1980-1984 period suggested in the Secretaries' Final Report as a new base period for updating the indices was a time when beef prices (the basis of the Beef Cattle Price Index) were abnormally low and production costs (the basis of the Prices Paid Index) were high. In contrast, the 1964-1968 period used in the PRIA formula was a time when prices and costs were more stable and normal for the western livestock industry.

Significant changes in the "PPI index" are suggested in the final grazing fee report. Therefore, a detailed discussion of this cost index is in order. It appears there is some confusion or difference of opinion as to what this index is or is intended to be. For example, should the prices-paid index represent the cost of doing business on public lands only or the total cost situation on a ranch enterprise?

If the index is intended to reflect the general economic conditions of the ranch business, then one should use as many price items in the index as are applicable to the overall cost of ranching. On the other hand, if the purpose of the index is to reflect the cost (prices paid) of doing business on BLM and Forest Service allotments, then one needs to use those price items that reflect the costs incurred by permittees in utilizing their allotments.

It is our opinion that the inclusion of the cost of production index in the current PRIA formula was intended to reflect the overall, or more general, cost-of-production situation in the ranching industry. The ICI index as proposed in the grazing fee report does not reflect these general costs of production (Figure 3.10 on p. 28). To be consistent with PRIA, an index that covers a broad range of cost items should be used in the fee formula. The National Index of Prices Paid shown in Figure 3.10 of the Final Report is broader in scope than either the "PPI" or the "ICI" and the use of the National Index of Prices Paid could be defended, except perhaps for the inclusion of the Consumer Price Index in this index.

The ICI is also used to update the nonfee cost items derived from the 1966 fee study. We do not believe that the cost index items and their respective weights adequately reflect the changes in the nonfee cost (price) items considered in 1966. For example, we

believe that, with some judgment, indices could be applied to each of the 13 nonfee cost items of 1966 so as to more accurately reflect their changes over time.

Implicit in the concept of updating the nonfee costs and/or the 1966 base fee is the assumption that the nonfee items remain the same today as in 1966, i.e., the same items are applicable today. Also, the concept assumes that the relative magnitude of each item remains the same as in 1966. For example, proper indexing would bring the cost of maintaining 20 miles of fence required to graze a particular allotment up to the present; but indexing would not take into account that the land managing agency now requires maintenance on 35 miles of fence on the same allotment. One should be reminded that those indexes only attempt to keep the prices (cost of wire, posts, labor) at current levels; they do not reflect changes in the quantities (miles of fence) of each cost item.

Let's assume that the Forage Value Index accurately reflects changes in the private grazing market (rents paid for private grazing lands). If this is the case, then each year we re-establish a new fee that keeps the total cost of public and private forage equal. Since the FVI is supposedly influenced by a multitude of market factors that affect the value of grazing, this system could be validly used for many years. The average fee and nonfee cost changes in the private grazing market would be taken care of in the FVI.

But what about the public grazing cost changes? Does indexing of the FVI account for changes in the nonfee costs of grazing permittees on public lands? It is doubtful that relative weight of each of the nonfee items on the public side of the equation have remained constant since 1966. Given the impacts since 1966 of increased environmental requirements, lower agency budgets for range management, changes in the average size of permits, increased maintenance requirements imposed on permittees, and changing industry economics, one would expect that there has been increases in the nonfee costs of grazing permittees. The $1.23 base (that establishes the nonfee cost differences between grazing permittees and private grazing lessees) probably needs to be updated to get rid of the "old data" image.

However, the method employed in the Secretaries' Final Report (Appendix A, p. 69) to update the $1.23 base is afflicted with many problems. In addition to those already described above, there is a problem in the use of two different indices to "update" the private lease rate and private nonfee costs.

The Forage Value Index (FVI) is used in the Final Report to update the private lease rate. Thus, the weighted average private lease rate from the 1966 study ($1.78/AUM) is indexed to a 1980-1984 base period by using the FVI as follows: $1.78/AUM × 2.16=$3.84/AUM.

However, a different index, the Input Cost Index (ICI), is used in the Final Report to update nonfee costs for both public and private lessees. In this manner, the Final Report manages to achieve an updated (to a 1980-1984 base period) nonfee cost difference between public and private lessees of only $1.50/AUM. By subtracting that $1.50 from the $3.85 private lease rate that was arrived at as described above, the Final Report comes up with a new base fee of $2.34/AUM.

The process is illustrated in the figure below.

	Cattle	Sheep
Difference	$1.44	$1.75
Weighted for numbers	× .8	× .2
Total	1.15	0.35

Note—Cattle: Public nonfee costs—$3.28 × 2.73 = $8.95/AUM; Private nonfee costs—$2.78 × 2.73 = 7.51.
Note.—Sheep: $4.53 × 2.73 = $12.37/AUM; 3.89 × 2.73 = 10.62.

Difference	$1.75
Weighted for numbers	.35
Nonfee costs weighted difference	1.50
1980-84 private least rate (per AUM)	$3.84
1980-84 difference in nonfee costs	1.50
Base fee	$2.34

However, indexing the private lease rate by the FVI and the private nonfee costs by the ICI appears to be double counting. Changes in private nonfee costs should have been reflected in the forage value index.

Also, this illustrates that the choice of the appropriate cost index is a critical decision. If an updated (to the 1980-1984 period) PPI index were used in the above calculation instead of the ICI (3.68 instead of 2.78), the weighted nonfee cost difference would be $1.94 and the base fee would be $1.90 instead of $2.34. Of course, increases in the nonfee costs of permittees since 1966, (which were mentioned above) would have to be deducted from such a $1.90 base fee, if that base were to be conceptually equal to the $1.23 base fee in the current PRIA formula.

COMPETITIVE BID FEE SYSTEM

Competitive bidding and free market operation as a fee option has a great appeal to economists, the livestock industry, and the general citizenry alike. This method would circumvent the need for indices, appraisal studies, and other proxies which make vain attempts to estimate market value. In bidding, the private market would establish the going rate for each individual parcel as a function of each parcel's advantages and disadvantages and this would lead to revenue maximization from grazing on federal ranges. However, the competitive bid options presented in the "Grazing Fee Review and Evaluation" are not true competitive bid situations. The report states that if there existed an absence of bidding competition, then a minimum acceptable bid would be imposed. This violates all of the assumptions of the auction bid system and, in essence says that the agencies would like to capture potential economic rent in situations where there is healthy competition but they don't want the flip side of the coin to exist where allotments are scattered, isolated or otherwise have characteristics which diminish the properties' utility.

In economic theory, maximum revenue is obtained by a bidding system. However, there is no basis to assure that revenue maximization for one use is consistent with the goals of multiple use and sustained yield under which the public lands are currently managed. The real world does not lend itself well to such naivete. Market imperfections exist which virtually destroy any merit of the competitive market.

The intermingled nature of western land areas promotes situations where the assumptions of the competitive market are invalid. Problems with controlled access, location of improvements on adjacent deeded or State lands, economics of size and strategic position result in potential monopolistic situations (where only one individual can effectively utilize the allotment) which could impose drastic deviations from the competitive market price.

Economic ramifications resulting from short-run nature of the competitive lease are many and complicated. The competitive bid could put increased pressure on the lessee to capure short-run revenue from the resource. The competitive price would stimulate little if any incentive for private investment in the long-run productivity of the resource. Lessee responsibility for maintenance would have to be clearly defined. Additional agency manpower would be necessary to assure that short-run liquidity crunches of lessees are not satisfied at the expense of the basic range resource.

There are many bidding possible scenarios which don't favor either the lessee, the lessor, or the resource. For example, that could happen if a current lessee highly dependent upon federal AUMs is outbid for the federal forage, and thereby forced out of business. If the new lessee has overbid for the resource, he, therefore, may eventually be unable to pay the fee and allow the allotment to go unused in subsequent years. The end result would be loss of primary revenue to the U.S. Treasury and losses to the local community of secondary expenditures. However, the federal costs of administering the grazing program would remain basically constant. Such losses, of course, would be in addition to the initial permittee's losses of his equity derived from permit value and his investments in range improvements on the federal lands.

Besides resulting in unused or so-called "vacant" allotments, an equally destabilizing effect of a competitive bidding system would be large fluctuations in transaction prices. Large swings in bid prices would not promote industry stability and would eliminate permit value, thus further reducing the already tenuous financial position of the range livestock industry.

That competitive bidding would result in wide price fluctuations is evident in the record of the bidding system that is used to set the prices for the grazing administered by BLM on the Department of Defense's McGregor Range.

Of course, the sizes of those bids are not directly comparable with the fees or value of the grazing on other public lands, since services and benefits are provided to graziers on the McGregor Range that are not available to graziers on BLM and Forest Service allotments. (The government has a full-time workforce performing maintenance on all water devices, pipelines, traps, fences and corrals on the McGregor Range. The allotments are a constant size and are annually monitored at government expense; and McGregor Range graziers are not required to accommodate other multiple uses or make the investments common on other public grazing lands.)

But while these advantages or values explain why bids for grazing on the McGregor Range should be—and are—generally higher than administered fees, they do not explain why the bids go up and down so drastically each year. Such fluctuations are a tipoff to what could be expected if all parcels or allotments of public lands in the West were put up for bid.

In the 10-year period of 1977-1986, there were six annual increases in bids for grazing on the Mcgregor Range, with the increases ranging from 10 percent to 38 percent or an average of 24 percent. There were three decreases during the period, ranging from 35 percent to 58 percent, with the average decrease being 43 percent. These figures do

not reflect the allotments that went unused due to lack of bids.

This fiscal year, not only did the annual fee drop from $8.11/AUM to $3.46/AUM but there were unused allotments. If these idle AUMs were accounted for, the decrease would be from $8.11 to $2.78—a 65 percent decrease in a single year.

Such price variations do little to promote stability in ranching or sound land stewardship. Forward planning by lessees through pro forma cash flow and income statements are virtually impossible when lease prices are so volatile.

There may be another lesson in the McGregor Range situation. The high $8.11 bid occurred when desperate ranchers in a drought area outbid local ranchers. Today, grazing allotments on BLM and Forest Service allotments are tied to private base property (land or water) and the two form an integral ranching unit (each is dependent upon the other). This is what encourages ranchers to make investments on public lands and to provide wise stewardship of such lands. Even in a 3-year or 10-year bidding system (as discussed in the Final Report), the local rancher would have no assurance that he couldn't be outbid for reasons extrinsic to the value of the forage itself.

CONCLUSION

The revisions of expansions of the original draft which are included in the Final Report do not correct the major conceptual and methodological shortcomings of the draft. The Final Report does not present any changes or fee systems that would result in a more equitable grazing fee. Therefore, the PRIA formula should be continued as the preferred method of annually adjusting federal grazing fees.

BURKINA FASO: AN EMERGING AFRICAN SUCCESS STORY

HON. MATTHEW F. McHUGH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 12, 1986

Mr. McHUGH. Mr. Speaker, all of us are familiar with the desperate problems of underdevelopment in Africa, and also with the failure of many African governments in dealing with them effectively. Sometimes the causes of failure are related to conditions over which African governments have little control. However, oftentimes they can be traced to those governments, because of corruption, mismanagement, or ill-conceived policies.

Whatever the reasons, we have come to expect failure when we think of Africa. In one corner of the continent, however, there appears to be an emerging success story. Over the last several years, the Government of Burkina Faso has shown that an African government in a poor country with few resources can successfully address some of the most basic needs of its people.

One of the initial successes of the government has been Operation Vaccination Commando, an effort to immunize children against three frequently fatal diseases. At the conclusion of my remarks, I will insert into the RECORD a brief article describing this effort that appeared in "The State of the World's Children 1986," which is published annually by UNICEF.

It does appear that the Government of Burkina Faso is different from many we find throughout the world. Its leaders are not corrupt. They adopted a national plan for development only after extensive discussions with the people. The government sees its role as one of liberating the energies and talents of its people.

Yet, for all of its successes to date, Burkina Faso will receive only $1 million in United States development aid during the current fiscal year. Admittedly, the United States and Burkina Faso do not always see eye to eye on some of the major political issues debated at the United Nations. It is also true that the Government of Burkina Faso has, at times, displayed excessive zeal in what it conceives to be its revolutionary project.

However, on a continent where failure is endemic, the United States should be more helpful when a government demonstrates that it is not only committed to human development, but is effective in implementing programs that promote it.

[From The State of the World's Children 1986]

BURKINA FASO: A VACCINATION COMMANDO

In one three-week period, starting on 25 November 1984, Burkina Faso has vaccinated over a million of its children against measles, yellow fever and meningitis. In the whole of 1981, the health services had immunized only 25,000 of the country's half a million children under two.

No expert would have considered Burkina Faso, formerly Upper Volta, a likely candidate for such an achievement. Desperately poor, beset by fifteen years of drought, it has one of the highest infant mortality rates in the world—150 deaths per 1,000 live births. Less than half of the largely rural population lives within reach of a health centre. Over a third of young children are chronically malnourished, leaving them easy prey to the epidemics which sweep the country during the dry season from February to June. The death rate in meningitis outbreaks averages 11%. Measles causes half of all deaths of children between one and four, and in a bad year the tally can go as high as 43,000 cases.

These problems inspired the country's new government to 'Vaccination Commando'—a massive catch-up immunization drive designed to give the health services a respite from the epidemic season, and a breathing-space in which to plan for expanding their regular vaccination coverage.

To spur people's awareness of the value of immunization, Vaccination Commando tackled the diseases best known as killers in Burkina Faso. Vaccines were chosen that are both easy to give and require only one shot for full protection.

On 19 September the Council of Ministers set the date. The National Vaccination Committee, headed by the Director of Public Health, marshalled support from the ministries of education, information, agriculture and defence, and from the vaccination committees set up in every province, district, village and town. UNICEF, the Red Cross and other international agencies, together with other governments, notably China and the Republic of Korea, supplied technical assistance.

The Committees for the Defence of the Revolution (CDRs)—political volunteer groups active in every village, town and work-place—took on the most crucial task of all: mobilizing their communities.

As 25 November neared, CDR members went door to door explaining the benefits of vaccination to parents. They put up posters in schools, bars, and public places all over the country. Roadside billboards announced the campaign; plays about immunization were performed in the villages. The national radio service issued communiqués in all the local languages, urging attendance and broadcasting results as they came in.

When the vaccination posts opened up for business, they were besieged. In some villages the line of parents and children stretched for kilometres, patiently waiting through the day. Families came over the border from neighbouring countries, alerted by their relatives in Burkina Faso. Children came who were over age, under age, and already immunized. Many vaccination posts had to request extra vaccine because far more children turned up than expected: families have been on the move in Burkina Faso, as in all the countries of the drought-stricken Sahel.

The result: in a population of just under 7 million, 62% of children under fifteen are immunized against yellow fever and 64% against meningitis, while the number of under-sixes protected against measles has leapt from 7% to 60%.

Whether this level of coverage can be sustained in the face of all the country's difficulties remains to be seen. But Vaccination Commando has made an impressive beginning. The alliances have been forged to make children's health the concern of everyone. Parents are more aware of what their children gain from vaccination. And Burkina Faso has drawn up plans for introducing primary health care to all its 30 provinces, and immunizing all its under-fives by 1990.

U.S. TRADE AND THE AGRICULTURAL COMMUNITY

HON. MARK D. SILJANDER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, May 12, 1986

Mr. SILJANDER. Mr. Speaker, recently I testified before the House Subcommittee on Department Operations, Research, and Foreign Agriculture of the Committee on Agriculture.

Due to the importance of this issue to U.S. trade and the long-term health of the agricultural community, I am submitting a copy of my testimony for my colleagues consideration:

STATEMENT OF THE HONORABLE MARK D. SILJANDER BEFORE THE DEPARTMENT OPERATIONS, RESEARCH AND FOREIGN AGRICULTURE SUBCOMMITTEE

Mr. Chairman, thank you for allowing me to testify before the Department Operations, Research and Foreign Agriculture Subcommittee. I appreciate the opportunity to call my colleagues' attention to the export promotion provisions of the 1985 omnibus farm bill, which was signed into law on December 23.

A LOOK AT THE EXPORT ENHANCEMENT PROGRAM'S BEGINNINGS

I am deeply gratified to witness the implementation of export bonus concepts I introduced two years ago. After meeting with members of the European Parliament in January 1984, I was convinced of the need for new direction in U.S. agricultural export

policy. Soon after, I introduced the Agricultural Export Trade Equity Act, which:

Targeted commodities and products that have been adversely affected by foreign export subsidies;

Authorized an export payment-in-kind program that would allow American producers to match the deals offered by the foreign competition;

Encouraged the use of processed and protein-fortified agricultural, value-added products in Public Law 480;

Advocated the use of barter as a means of reducing agricultural surpluses in the U.S.; therefore tying into new markets for U.S. farm products;

Called for the Secretary to ensure that the program did not hurt those American commodities already being sold abroad; and

Sought to prevent buyers from reselling their commodities to other countries.

A LOOK AT CURRENT PROMOTION ACTIVITIES

These provisions, for the most part, have been incorporated into the new farm bill. With pressure from Congress and with continual declines in agricultural exports, Secretary Block announced the implementation of an export bonus program, otherwise known as the Export Enhancement Program (EEP). It established as a 3 year program involving $2 billion worth of surplus agricultural commodities. These are to be targeted toward those markets where the United States has lost its competitiveness due to unfair trade practices of other agricultural exporting countries. Recent revisions have mandated that at least $1 billion be spent on export enhancement projects. Under the program, surplus CCC commodities supplement commercially sold commodities going to specified countries. The most recent count has 6.2 million metric tons announced as being offered in the export bonus program. Eleven countries qualify to participate—Algeria, Egypt, Yemen, Tunisia, Morocco, Turkey, Zaire, Jordan, Philippines, Iraq, and Nigeria. See Table 1 for a status report of the program as of April 8, 1986.

SAVINGS ASSOCIATED WITH THE PROGRAM

With storage and handling costs accumulating at the rate of $12.40 per metric ton per month for stored CCC grain, the savings realized by the completion of current export enhancement offerings could approach $100 million. This is a significant savings, given the early stage of the program. I am sure that we'll all look forward to the savings that will be realized by marketing surplus stored grain to develop U.S. agricultural exports.

BARTER INITIATIVES—NEW VISTAS

Pilot barter projects mandated by the new farm bill will provide a launching pad for what I believe to be a new vista in U.S. agricultural trade. Up to this time we have overlooked the vast markets existing within developing countries rich in natural resources we buy. Given the sufficient support by government and the private sector, farm products could become an important aspect in strategic mineral and raw material purchases.

RESPONSE FROM THE EUROPEAN COMMUNITY

The Export Enhancement Program has been highly criticized by the European Community. While the program's primary purpose has been for the United States to become more competitive in foreign markets eroded by European agricultural exporting practices, EC officials contend that in doing so, the U.S. has been guilty of unfair trade practices.

A NEW SENSE OF DIRECTION

However, between the export enhancement program and the lowered ASCS loan rates, a very strong message has been sent to the EC. The Common Agricultural Policy (CAP) has become very costly since the U.S. markedly reduced ASCS loan rates, which have functioned as a floor for world grain prices. Europeans are now facing strong pressure to negotiate new agreements in regard to agricultural trade. The relations with former trading partners are being rebuilt. Predatory attacks against our markets are no longer being passively overlooked.

Already, we have seen that EC Commission has announced a proposal calling for a freeze in 1986-87 farm support prices. The strict price proposals reflect the Commission's determination to make the EC's Common Agricultural Policy more market-oriented.

It is encouraging to see how the new farm bill has brought about significant movements toward more freedom in the world agricultural market.

We are facing a new era in the agricultural sector. Competition is keen. Markets are challenging. Technological innovations offer substantial improvements in productivity. With a consistant, reasonable export promotion policy, the U.S. will continue to be the most remarkable producer of food the world has ever known.

TABLE 1. STATUS OF THE EXPORT ENHANCEMENT PROGRAM OF APR. 8, 1986

Country and date announced	Commodity	Amount offered (MT)	Amount purchased under bids accepted through Feb. 28 (MT)
Algeria:			
June 4	Wheat	1,000,000	[1] 300,000
	xl		[2] 200,000
Total			500,000
Feb. 11	Semolina	250,000	
Feb. 25	Wheat flour	100,000	
Apr. 3	Eggs	[3] 500	
Egypt:			
Mar. 21	Poultry	15,000	
July 2	Wheat flour	600,000	[4] 175,000
July 26	Wheat	500,000	[2] 500,000
Oct. 30	Wheat	500,000	
Yemen:			
Aug. 20	Wheat flour	50,000	30,000
Sept. 6	Wheat	100,000	
Morocco:			
Sept. 30	Wheat	1,500,000	[1] 260,000
	xl		[2]500,000
Total			760,000
Turkey: Oct. 16	Wheat	500,000	[2] 500,000
Jordan:			
Mar. 19	Wheat	75,000	
Nov. 8	Rice	40,000	
Philippines: Nov. 15	Wheat flour	100,000	[4] 50,000
Zaire: Nov. 18	Wheat flour	64,000	[4] 30,000
Iraq:			
Apr. 2	Dairy cattle	[5] 6,500	
Dec. 9	Wheat flour	150,000	[4] 37,500
Nigeria: Dec. 10	Barley malt	100,000	
Zaire: Dec. 27	Wheat	40,000	
Philippines: Jan. 6	Wheat	150,000	
Tunisia: Mar. 18	Wheat	300,000	

[1] Soft red winter wheat.
[2] Hard red winter wheat.
[3] Millins.
[4] Flour not in grain equivalent.
[5] Heads.

INSIDERS

HON. BYRON L. DORGAN

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 12, 1986

Mr. DORGAN of North Dakota. Mr. Speaker, the golden fleece for flaunting Government service has two deserving winners: David Stockman and Michael Deaver.

They are not the first to trade on former Government service to advance new careers outside of Government. Plenty of Democrats and Republicans alike have done that in recent years.

What sets Deaver and Stockman apart is the verve, aplomb, and sheer arrogance with which they have cashiered high level Government positions into seven-figure wealth.

I believe that a recent article by Robert Samuelson clearly exposed the folly and shame of "Insider Status and Insider Stories." (The article from the May 7, 1986, Washington Post follows.)

[From the Washington Post, May 7, 1986]

INSIDER STATUS AND INSIDER STORIES

(By Robert J. Samuelson)

In the Reagan administration, few people seemed less alike than David Stockman and Michael Deaver. Stockman, head of the Office of Management and Budget, was the proverbial whiz kid who mastered the intricacies of government programs. Deaver was the president's public relations maestro, who couldn't have cared less about government policy. But when they left government, they acted alike: They turned their years in government into mounds of money. Stockman published an insider's account of the White House, and Deaver opened his own lobbying firm.

What happened to public service? There is something here beyond greed. The common denominator between Stockman and Deaver is an attitude that their time in government is properly exploited for personal gain. You detect no sense of embarrassment. The idea that people go into government—or ought to—for some broader good was absent. Nor did they apparently expect anyone to think otherwise. It's this obliviousness that's most troubling, for it embodies a cynicism that may reflect popular attitudes.

Government—everything from caring for the national parks to regulating nuclear reactors to collecting taxes—is ultimately about public service. Government can't compete for talented, motivated workers entirely on the basis of money; private companies almost always will be able to pay more. What brings and keeps good people in government is the sense that what they're doing is important for society. Once we lose that core concept, we condemn ourselves to mediocre government.

If what Deaver and Stockman did were isolated incidents, they could be dismissed. But they aren't. Government—and, by extension, the people who work for it—increasingly invites popular ridicule. In 1976 and 1980, Jimmy Carter and Ronald Reagan campaigned in part against Washington bureaucrats. Government workers received no pay increase for 1985, and the 1980s budget debates have made it more difficult for many agencies to do their jobs well. Congress doesn't approve final spending levels

well into the budget year; the uncertainty bedevils planning.

These actions betray an undercurrent of contempt for competent government. A friend in government—a career official who could make two or three times on the outside what he now does—warns against overgeneralizing. "It's hard to tell whether working for the government doesn't have the status it used to," he said. "It differs so much from office to office, from department to department. My sense is that a lot of people still go into government because they really like the work."

The point is well taken. Anyone who has lived in Washington even a few months knows that the quality—and usefulness—of government varies enormously. Some agencies deserve all the pejorative labels of bureaucracy. They're rigid, inefficient, complacent and insensitive. But elsewhere, you find islands of energy, dedication, talent and hard work. A lot of maligned bureaucrats regularly work 9- and 10-hour days.

It's also true that government is going through a period of inevitable trauma. Even competent government may not be good government if it's unwanted. The debates over budget deficits symbolize a reexamination of what we want government to do. Our desire for government has collided with our tolerance to be taxed, and something will have to give. Just because programs once appeared worthwhile doesn't mean they are today. Government is like a depressed industry facing pressures for change; the effect is demoralizing.

One other qualification is warranted: What Deaver and Stockman did was not unique. Government's revolving door has revolved for decades. The current National Journal—a magazine devoted to government—lists dozens of former top officials in Democratic and Republican administration who stayed in Washington to lobby. And similar problems exist at less rarefied levels. Tax attorneys learn their trade working for the government, then leave for more lucrative private practice. Many other specialists do the same. The ethical issues are slippery. What else does a tax attorney do but practice tax law?

But, accepting these qualifications, the Deaver-Stockman performance is still troubling. It is not just that they used government service for personal gain. They flaunted it. There was no sense of self-restraint. Our top government officials ought to set a higher standard of behavior. But Deaver and Stockman provided a lower standard. Their idea of public service, apparently, is something that can be taken to the bank.

Stockman's case is particularly curious. As budget director, he labored tirelessly and honorably. Whether or not you agreed with him, he had an obvious interest in better government. But his message now is: If you're smart and can make more on the outside, you're a fool to stay in government. The parallel with Deaver may seem strained, but it isn't. Each used what he had—insider status for Deaver and insider stories for Stockman—and rushed to maximize its value. Would Stockman's book have fetched an advance exceeding $2 million if published in, say, 1988?

We cannot expect to attract good people into government unless the people who head government create a climate of dignity and respect. In the private economy, companies survive or fail on profits. In government, the ultimate motive to do well is a sense of a larger social usefulness. The worthiness of public service is a concept that must be conveyed from the top. If Ronald Reagan and those around him have been sending that message, it's been easy to miss.

LEGAL SERVICES AND EDGAR AND JEAN CAHN

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, May 12, 1986

Mr. RODINO. Mr. Speaker, what makes our Nation unique is that we are a government of laws, not men. Our Constitution promises that every American—whether rich or poor, privileged or powerless—stands equal before the law. We look to the law to mediate our conflicts, to be impartial. It is the vehicle for American justice.

Unfortunately, not everyone in our country has equal access to our judicial system. Too often the poor and the needy and the uninformed do not have the available resources to exercise their legal rights. For them the American model of justice is little more than an abstract right.

That is why Legal Services Corporation is so important to our Nation. Legal Services was created to provide funds for the delivery of civil legal services for the poor. By providing access to our judicial system, it helps make our national promise of equal justice for all a reality. Today, the Legal Services Corporation lives on, despite this administration's annual attempts to eliminate it.

Recently, the Legal Services Corporation observed its 10th anniversary, which was commemorated at a conference last December of the National Legal Aid and Defender Association. One of the speakers at the conference was Edgar S. Cahn, a long-time leader in the legal services movement and a cofounder of Antioch Law School. He and his wife Jean wrote the original paper published in the Yale Law Journal which gave rise to the idea of a legal services program for the poor.

I would like to share what Mr. Cahn had to say at that conference. His words are moving and eloquent, from a poem he and his wife wrote. Mr. Cahn's words remind us of the spirit that created the Legal Services program, and the spirit that has kept it alive ever since:

FOR THE RECORD

The Dream—The Dream that started it all—
was *not* about lawyers.
It was about Justice.
This I affirm.
And the Justice of which we dreamed—you, I, all of us—that Justice was larger than the law, larger than legal wrongs and legal remedies.
It was about this Land and the Promise of this Land.
This too I can affirm.
And that promise—it was not something afar off—vague and abstract. No. In the words of Deuteronomy, "it was very close at hand."
Covenant That Bound Each of Us:
To Protect the Weak
To Make Whole the Injured
To Respect the Dreams of Others
And the Right of Others to Dream In Their Own Way
This too I affirm.
These are not fashionable sentiments.
They are not adequately Darwinian.
They do not even state quantifiable outputs.
But they are what I would affirm today—
As Historical Past
As an Obligatory Future.
And above all, tonight, as a collective destiny in which you and I have been privileged to share
We Few, We Happy Few—
And—in the generic sense—
We Band of Brothers.

—Edgar S. and Jean Camper Cahn

NATIONAL OSTEOPOROSIS AWARENESS WEEK

HON. OLYMPIA J. SNOWE

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Monday, May 12, 1986

Ms. SNOWE. Mr. Speaker, I am pleased to note that this week, May 11–17, has been designated as "National Osteoporosis Awareness Week." It is fitting that we begin this important week with Mother's Day in an effort to encourage grandmothers, mothers, and daughters to pay special attention to this serious problem which afflicts so many women. We have the opportunity to bring to national awareness information on a disease that disables and kills thousands each year.

During this week, activities are underway all across the country to educate men and women about this devastating disease. Let me give you a few examples.

At the National Institutes of Health, Dr. Lawrence E. Shulman, the Director of the Division of Arthritis, Musculoskeletal and Skin Diseases has prepared a public service announcement which will be aired on numerous radio stations throughout the country. This will be done in conjunction with the release of an important 32-page booklet on osteoporosis entitled, "Osteoporosis: Cause, Treatment, Prevention." At the same time, the National Dairy Board will produce a videotape on calcium and osteoporosis to be shown in May at the convention of Women in Radio and Television.

In San Francisco, Los Angeles, Dallas, Oklahoma City, and several other major cities, forums will be held on osteoporosis, its detection and prevention. Denver is offering a citywide screening for osteoporosis using a densotometer, a machine which measures bone density. In Wisconsin, a massive educational effort has been launched in 71 counties throughout the State to develop information and awareness of osteoporosis. Oklahoma City is sponsoring public service announcements, while in Seattle a newly formed 60-member osteoporosis support group is planning a public service announcement for television.

In Dallas, physicians have asked dairy producers in their area to print risk factors for osteoporosis on milk cartons and they have also convinced a pharmacy chain to distribute a list of risk factors to its patrons. On May 12, the New York chapter of the National Osteoporosis Foundation will be hosting a luncheon seminar for prominent women in that region.

Throughout the Washington metropolitan area, buses will display ads about osteoporosis and the commemorative week. Georgetown University is planning a conference the morning of May 17, entitled "Inside Look at Osteoporosis," which will include a risk factor evaluation. And on the Washington Mall, a 1 to 5 mile "Fun Walk" is scheduled for the same day at 8 a.m. in order to underscore the importance of weight-bearing exercise in the prevention and control of this disease. In addition to all these activities, the National Osteoporosis Foundation will be celebrating its first anniversary. This foundation promises to develop into a major presence in the field of osteoporosis.

While osteoporosis affects between 15 and 20 million individuals in the United States alone, relatively few American women know about this disease. For that reason, by designating "National Osteoporosis Awareness Week," we can focus attention on this serious problem.

Through an active education program we can reduce the incidence of pain, deformity, disability, and expenditures associated with osteoporosis. Let this week be the beginning of an educational campaign that will ultimately add osteoporosis to the list of those diseases which no longer are a threat to our society.

DRINKING AND DRIVING

HON. PETER H. KOSTMAYER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 12, 1986

Mr. KOSTMAYER. Mr. Speaker, on Monday, May 5, 1986, I had the privilege of addressing the entire student body of the Log College Junior High School in Warminster, Bucks County, PA.

Mr. Speaker, as I told the students at Log College, Americans between the ages of 5 and 34 are more likely to be killed in a traffic accident than any other single cause. Alcoholism is involved in at least half of those fatal crashes. For the young person who is driving a light truck or van, their chance of death as a result of drinking while driving is even higher.

In fact, in 1982 over 70 percent of fatally injured drivers of light trucks and vans had been drinking, 62 percent of these drivers were at legally intoxicated levels. While death from drinking while driving is obviously not limited to young people, they suffer disproportionately. It is the leading cause of death for teenagers accounting for 45 percent of all their deaths.

Not all of those young people killed in highway accidents were drinking, but 60 percent of the fatally injured teenage drivers were found to have been drinking prior to the crash and 43 percent were at legally intoxicated levels.

The students at Log College Junior High School, Mr. Speaker, are determined in their own way to do something about this national tragedy. They have joined with other students from across America in forming a chapter of SADD—Students Against Driving Drunk.

As many of my colleagues know, Mr. Speaker, SADD began in 1981 in Massachusetts. Since then, over 7,000 chapters in junior high schools and high schools across America have been formed to face one of the Nation's most serious problems. If schools throughout our congressional districts and across our country would follow the example set this week by the students at Log College Junior High School, we could save the lives of countless young men and women before it is too late.

In my State, Mr. Speaker, we have taken a step in that direction. The General Assembly of the Commonwealth has passed and the Governor has signed a tough, new law aimed at those who drive while drinking. The new law went into effect in January 1983 and requires a mandatory 48-hour, 30-day or 90-day jail sentence and up to a 12-month license suspension for those convicted of first, second and third time drunk driving offenses, respectively.

Furthermore, Mr. Speaker, Pennsylvania law now calls for an automatic 1-year suspension of one's driving license for refusing to take a test to determine the presence of alcohol and the admission of such refusals in evidence in court. This tough new law signed by Governor Dick Thornburgh is making a difference on the highways of the Commonwealth. Preliminary estimates indicate an 11.8 percent decline in the number of alcohol-related traffic fatalities during the first year of Pennsylvania's new law—saving the lives of 96 citizens, 17 of them teenagers.

Mr. Speaker, I want to commend Dr. Harry L. Clark, the principal of Log College Junior High School and Ms. Judith Michael, the faculty adviser to SADD.

Let me pay a special tribute to the young people who founded the chapter as well. Its officers are: president, Marc Bailkin; vice president, Kelly Candrella; secretary, Tracey Bittner; treasurer, Chris Mooney; and coordinator, Jen Fassbender.

A TRIBUTE TO THE COW NECK PENINSULA HISTORICAL SOCIETY

HON. ROBERT J. MRAZEK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 12, 1986

Mr. MRAZEK. Mr. Speaker, I would like to pay tribute to the Cow Neck Peninsula Historical Society as they celebrate the inclusion of their headquarters, the Sands-Willets Homestead, on the State and National Registry of Historic Places.

The Sands-Willets house has long played an important role in the history and development of Port Washington, NY. Until its purchase by the Cow Neck Peninsula Historical Society the house has been continuously occupied for approximately 250 years by two prominent civic minded families.

In the late 1600's, John Sands bought the land on which the Sands-Willets house was built. This acreage was given to his eldest son, John Sands II, who lived there from 1712 on. The earliest portion of the house dates from this period. Revolutionary War hero John Sands IV and his six brothers were born in the house. All went on to make major contributions to the Revolutionary War effort and to the growth of our young country.

In 1846, members of the Sands family sold the homestead to Edmund Willets, a New York merchant and prominent Quaker. The homestead remained a working farm well into the 20th century. In 1967, the estate of Eliza Willets, Edmund's granddaughter, sold the House to the Cow Neck Peninsula Historical Society.

The house remains today a textbook example of the development of architecture in this area of Long Island over a long period of time. It features both an early Dutch influence and a Greek revival style making the structure a living example to be studied by students of historical architecture.

The old homestead serves as a constant reminder of the rich history of this part of Long Island as well as the important role played by two prominent Port Washington families in that history. It gives me great pleasure to be able to share the history of the Sands-Willets house with my colleagues on this occasion, and I congratulate the Cow Neck Peninsula Historical Society for its efforts to preserve an important facet of the history of Long Island.

THREE ARIZONA SCHOOLS WIN HIGH HONORS

HON. JIM KOLBE

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 12, 1986

Mr. KOLBE. Mr. Speaker, I rise to call to the attention of my colleagues three schools in the Fifth District of Arizona which have recently received honorable awards.

I am very proud to announce the victory of the University High School chess team of Tucson, AZ, in the 1986 National Chess Team Championships in King of Prussia, PA. It was during the final round of play that the team pulled away from their competition to take first place honors. The five-member team—senior Liz Neely, junior Clark Allen, sophomore Adam Colby, freshman Robby Adamson, and freshman Ross Colby—scored a total of 22 points during the 3-day competition—a large two-point margin above the second place team. Placing fourth nationally last year and first in Arizona, I am sure we'll be seeing more of the University High School chess team in the years to come. Congratulations.

Following the theme "We Can Make a Difference," Flowing Wells High School was named the best high school in the State of Arizona for 1986. In the junior high and middle school competition, Amphitheater Junior High proudly accepted the second place honor. A 33-member citizen team, the Arizona Secondary Recognition Program, chose Flowing Wells and Amphitheater based on the schools' student achievement, academic, and behavorial goals, curriculum, and community and parent support and involvement. These schools are representative of the best in Arizona education. As the representative from District Five, I am extremely proud to send a warm congratu-

lations to the students, faculty, staff, and parents of both Flowing Wells and Amphitheater.

SIBENIK, YUGOSLAVIA, HOSPITAL'S "BREAD OF LIFE"—A FUNDRAISER FOR AN INFANT RESPIRATOR

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 12, 1986

Mr. ANDERSON. Mr. Speaker, on May 17 a one-time dinner-dance will be held at the Yugoslav American Club of San Pedro, CA, in order to raise funds for the purchase of a badly-needed infant respirator for Yugoslavia's Sibenik Hospital. This affair, which has my full support, is appropriately referred to as Sibenik's "Breath of Life."

Sibenik, which is located on the beautiful Adriatic coastline, is formerly the home of many Yugoslav-Americans who now reside in and around San Pedro.

Today, when a premature baby is born in Sibenik, he or she must be transported to a larger hospital in Split or Zagreb because Sibenik's hospital simply does not have the technology and equipment necessary to help them breathe. Needless-to-say, premature babies would be given a much better chance of survival if Sibenik's hospital acquired and utilized the appropriate equipment, that is respirators, necessary to sustain life.

Mr. Speaker, as you can well understand, the birth of a baby is truly a special moment. A premature baby, however, must fight for every breath and struggle to stay alive. And, unfortunately, if the necessary medical equipment is unavailable, this baby's chance of survival is severely diminished. This is why it is vital that all hospitals acquire these very special respirator machines which allow premature babies to breathe until they are capable of breathing on their own.

My wife, Lee, joins me in commending those who will participate in this special event which will give babies in Sibenik a real fighting chance of survival.

ANTI-ASIAN SENTIMENT AND VIOLENCE IN OUR COUNTRY

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 12, 1986

Mr. MATSUI. Mr. Speaker, my colleague, the Honorable NORMAN Y. MINETA, and I have distributed among the membership of the House of Representatives, copies of a report, prepared by the Japanese American Citizens League, which identifies and analyzes the unfortunate and alarming rise in anti-Asian sentiment and violence in our country. We believe that it is a story that must be told.

Few people are aware of the heritage of Americans of Asian ancestry. Until the 1950's, Asian immigrants were subject to discriminatory laws, excluding them from citizenship, land ownership, and intermarriage. Not many people know that the 100th/442d Regimental Combat Team, a segregated unit of Japanese-Americans, was the most decorated unit in American military history for its size and length of service.

It is our belief that the recent rise of anti-Asian sentiment and violence is at least in part rooted in ignorance.

As the JACL report documents, this ignorance has frequently tainted public debate and public perceptions. In many instances, the debate over an economic issue, such as the deficit between the United States and her trading partners, becomes characterized as a racial issue.

Sometimes this ignorance leads to violence. The extreme example is the instance of workers who blamed the loss of their jobs on our foreign trading partners, then transferred their rage to a young American of Chinese ancestry and bludgeoned him to death.

Mr. Speaker, as Members of Congress, we can make a positive and lasting contribution to increasing public understanding of Americans of Asian ancestry and all of America's new citizens. By remaining thoughtful and vigilant during the coming deliberations over trade matters, we can ensure that an economic problem does not become a racial problem.

IN HONOR OF THE TROY TEACHERS OF THE YEAR

HON. DENNIS M. HERTEL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, May 12, 1986

Mr. HERTEL of Michigan. Mr. Speaker, today I am proud to honor the Troy School District in Troy, MI, and the teachers in that district who have been selected as "Teacher of the Year."

On Wednesday evening, 12 outstanding professionals will be honored for the excellent work they do each and every day. Three will be honored as "Teacher of the Year" and nine will be honored as "Honor Roll Candidates," or finalists. The teachers of the year are: Cynthia Kolesar, who teaches kindergarten at Wattles Elementary School; Hedy Blatt, who teaches vocal, drama, and speech at Baker Middle School; and Heston Bates, who teaches science at Troy High School. The honor roll candidates are: Vivian Dunn, Susan McMacken, Diane Russell, Roy K. Downie, Mary Ann Pontiatowski, Eileen Schmidt, Joseph Brandonisio, Chuck Griffith, and Sharon Myers.

Knowing of the great number of talented and caring teachers in the Troy School District who help students to learn and grow, I am sure the selection of these few was not easy. That they were selected, however, indicates their outstanding dedication to our children. These teachers face the constant challenge of inquiring minds with the knowledge that each child is unique, and each situation demands a different approach. We are truly fortunate to have these remarkable men and women devote their energies and talents to the enrichment of our community.

I ask that my colleagues join me in recognizing the importance of education by honoring these richly deserving teachers of the Troy School District.

THE 98TH BIRTHDAY OF IRVING BERLIN

HON. SIDNEY R. YATES

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 12, 1986

Mr. YATES. Mr. Speaker, on May 11 an authentic American genius, Mr. Irving Berlin, celebrated his 98th birthday. I want to take a moment to extend my warmest congratulations to this wonderful man and to thank him for the magnificent contributions he has made to our musical heritage.

Irving Berlin wrote some of the most popular songs in the country for three different generations of Americans and many of these are absolutely great songs that will last forever.

His first song, "Marie From Sunny Italy," was written in 1907 and by 1911, with "Alexander's Ragtime Band," Irving Berlin was an international celebrity. In 1916 he collaborated with Victor Herbert on his first Broadway musical. He wrote a number of musical reviews in the 1920's, including the music for the Marx Brothers production, "The Coconuts." Beginning in the 1930's Irving Berlin set the standard for movie musicals. His film "Top Hat," with Ginger Rogers and Fred Astaire, gave us the song "Isn't This a Lovely Day." "White Christmas," another Berlin classic, came from the movie "Holiday Inn."

On Broadway, "Annie Get Your Gun" and "Call Me Madam" were written by Irving Berlin in the 1940's and are among the best of our musical plays.

All of this was accomplished by a man who grew up on New York's lower East Side in a desperately poor family. His father died when he was 8 and his formal education was limited to only 2 years. He has never learned to read music but what a talent he has. His music has enriched the lives of millions, and it is apparent from everything he has done that he has tremendous love and respect for this country. Everyone knows that he wrote "God Bless America" but most probably do not know that he gave the royalties from this extremely popular song to the Boy Scouts and Girls Scouts. Irving Berlin is a truly remarkable man and I am delighted to be able to wish him a very happy birthday.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily

Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, May 13, 1986, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

MAY 14

9:00 a.m.
Appropriations
Labor, Health and Human Services, Education, and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1987 for the Health Resources and Services Administration, Department of Health and Human Services.

SD-366

2:30 p.m.
Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1987 for fossil energy and clean coal technology.
SD-192

SENATE—*Tuesday, May 13, 1986*

(Legislative day of Monday, May 12, 1986)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the Honorable MARK O. HATFIELD, a Senator from the State of Oregon.

The PRESIDING OFFICER. This morning, the prayer will be offered by the Reverend Ronald Cadmus, of the Fort Washington Collegiate Church in New York, sponsored by Senator BOB KASTEN.

PRAYER

The Reverend Ronald Cadmus, Fort Washington Collegiate Church, New York, NY, offered the following prayer:

Lift our heads in prayer together.

Lord, as I walked down Fifth Avenue this week and I saw across the street from St. Patrick's Cathedral the form of Atlas with the weight of the world pressing in against him, I was reminded of something more powerful. I went inside that great cathedral and saw, in one of the chapels lining that great nave, the small child we call Jesus, and in his hand he was holding the world.

O, God, too many people in this world bear the weight of this Nation and the world in their hearts and in their consciences. We turn to You today in a way of acknowledging to You that we place our life, our care, our wisdom, and our will into Your keeping.

So today we come closer to You than yesterday, that we might be near to You, with our uncertain tomorrows, for certainly the world is in a precarious state.

We pray that You speak to all of the leaders of our country and all the people whom they serve; speak to their hearts softly, that they might hear You in the farthest corners of their minds.

We pray that You touch all of us gently in Your being, that we might feel Your caress more deeply in our souls, a caress that sustains and leads us and makes us wise.

We pray that You lift up each of our leaders high above themselves, that they might see beyond the fulfillment of their own hope; and we pray that You take us into Your embrace, that we might feel the strength of Your comfort, the power of Your encouragement, the insistence of Your being that will guide us through many troubled storms, that we meet the needs of the people of this country.

Above all, we pray for our President, Vice President, and all those who serve all of the children of this world, so that we might be people who are humble to the point that we seek not only that which is stronger than ourselves but we seek Your wisdom that will make us wise and people of justice.

In Your name we pray. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. THURMOND).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, May 13, 1986.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable MARK O. HATFIELD, a Senator from the State of Oregon, to perform the duties of the Chair.

STROM THURMOND,
President pro tempore.

Mr. HATFIELD thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE ACTING MAJORITY LEADER

The ACTING PRESIDENT pro tempore. Under the previous order, the acting majority leader is recognized.

Mr. McCONNELL. Mr. President, I yield 3 minutes to the distinguished Senator from Wisconsin.

Mr. KASTEN. I thank the acting majority leader.

THE GUEST CHAPLAIN

Mr. KASTEN. Mr. President, I wish to say how pleased and proud I am to have my friend, Ron Cadmus, deliver the opening prayer.

Ron is from the Fort Washington Collegiate Church. He and Dr. Norman Vincent Peale officiated at my wedding a few months ago, and I am particularly pleased and proud to have the opportunity to be in the Senate and to have him deliver the opening prayer, to thank him for his kind and most thoughtful words, and for his continuing leadership not only of the Fort Washington Collegiate Church, but also of a number of us who are beyond the geographical borders of that church; but yet, in a very real way, we continue to look to him for guidance, for inspiration, and for leadership.

SCHEDULE

Mr. McCONNELL. Mr. President, after the two leaders are recognized under the standing order for 10 minutes each, there will be special orders in favor of the following Senators for not to exceed 5 minutes each: the Senator from Florida [Mrs. HAWKINS], the Senator from California [Mr. CRANSTON], the Senator from Wisconsin [Mr. PROXMIRE], the Senator from Connecticut [Mr. WEICKER], and the Senator from Kentucky [Mr. McCONNELL].

There will be a period for routine morning business, not to extend beyond 10:45 a.m., with Senators permitted to speak therein for not more than 15 minutes each.

The Senate will stand in recess between 10:45 a.m. and 2 p.m. in order to hear an address by Anatoly Shcharansky and to meet for the weekly party caucuses.

At 2 p.m., the Senate will resume consideration of S. 1848, the drug export bill. Rollcall votes can be expected throughout the day, and the Senate can be expected to continue into the evening, in order to make progress on S. 1848.

CONGRESSIONAL WELCOME FOR NATAN (ANATOLY) SHCHARANSKY

Mr. McCONNELL. Mr. President, I would like to remind all my colleagues that this morning, at 11 a.m., in the rotunda, the leadership of the House and the Senate will be hosting a welcome for Natan (Anatoly) Shcharansky. All Members are invited to attend the event, and I encourage them to do so, in tribute to this man of courage, an authentic hero to all who believe in the sanctity of human dignity and religious freedom.

In addition to the welcome this morning, tomorrow afternoon, at 2:30 in the Mike Mansfield Room, S. 207, the Senate leadership and Senate Foreign Relations Committee will be hosting a reception for Mr. Shcharansky. The reception will end at 3:30. Senators only are invited.

□ 1010

SENATOR HAWKIN'S SPECIAL ORDER

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Florida is recognized for not to exceed 5 minutes.

The Senator from Kentucky is recognized to read Senator HAWKINS' statement.

Mr. MCCONNELL. Mr. President, Senator PAULA HAWKINS has a statement once again this morning. I will read her statement in her absence and on her behalf.

Her statement this morning is regarding "Mexico Out Front as the United States Major Narcotics Supplier."

Her statement reads as follows:

MEXICO OUT FRONT AS THE UNITED STATES MAJOR NARCOTICS SUPPLIER

Mrs. HAWKINS. Mr. President, the illicit narcotics industry is booming in Mexico, our neighbor to the south. In the past year Mexico has replaced Colombia as the largest supplier of marijuana consumed in the United States. In recent months Mexico has climbed ahead of the "Golden Crescent" countries of Pakistan, Afghanistan and Iran as the largest source of heroin used in the U.S. Mexico produces one-third of the heroin used in the U.S. and is the transit point for another third. As if those statistics were not startling enough, Mexico is the sole source for an unusually potent new kind of heroin called "black tar" which is responsible for the first general increase in heroin consumption in the U.S. in the last five years. And the State Department, in its annual narcotics strategy report for 1986, says that Mexican traffickers are the largest suppliers of illegal amphetamines.

John C. Lawn, administrator of the Drug Enforcement Administration, disclosed in a New York Times interview (May 12, 1986) that his agency had identified 70 "Class One" drug traffickers in Mexico, probably more than in any other single country and a sharp increase over recent years. A "Class One" trafficker is defined as one who runs a network capable of acquiring and distributing many pounds of cocaine and heroin in the U.S. and many tons of marijuana on a regular basis.

I suppose one of the reasons that Mexico's new status as the leading drug supplier disappoints us is that for so many years it was the model of a country trying to do something about its drug problem. As recently as two years ago, Mexican drug enforcement was adjudged "an enormous success" and "the best program in the world." But all that has changed now. Cocaine smuggling, for one example, has escalated to a $1 billion a year business in Mexico. American authorities seized 10,700 pounds of cocaine at the Mexican-California border between October 1 of last year and March 30 of this year. In this six months, drug seizures were three times greater than they had been in the past five years along the entire Mexican border. This is but one statistic in a situation where drug production and trafficking have worsened and enforcement has become lax, in many cases riddled with corruption.

The focal point of the Mexican drug enforcement program had been the crop eradication program where police and special drug fighting teams sprayed herbicides on marijuana and opium poppy fields. The U.S. supplied 60 helicopters and more than a dozen planes of other types for the purpose. And they were being used effectively, with a corresponding cutback in marijuana and opiate production. That too has changed.

DEA Administrator John Lawn told the New York Times that reports reaching his office suggest that "the air fleet is not flying in the areas where cultivation is occurring. They say they are spraying when they are not, or they are spraying water instead of herbicides." Another official made an even more serious charge. He told Times reporter Joel Brinkley that "in some cases they have been spraying fertilizer instead of herbicides." If this is true, that would indicate that bribery and corruption of strategically placed officials surpass anything that we have previously suspected.

The State Department annual survey describes Mexico's record of drug prosecutions as "a dismal picture." And a senior State Department official says narcotics trafficking in Mexico has increased so sharply in the past year and a half that it has "popped off the charts."

Customs Commissioner William von Raab describes the Mexican drug situation as a "horror story, increasing logarithmically" and asserts they are "doing nothing about it." Von Raab blames Mexican government officials, calling them "inept and corrupt."

Law enforcement officials cite as an example of the arrogance of Mexican drug traffickers the terrorism unleashed last November near Vera Cruz when 17 Mexican policemen, including five federal judicial policemen, were tortured and killed. That incident suggests that the traffickers believe they are above the law, and perhaps they have good reason to believe they are. When an American drug agent, such as Enrique Camarena Salazar, can be tortured and brutally murdered by drug traffickers and his killers not be brought to trial, we all have reason to be concerned about the quality of Mexican justice.

Mr. MCCONNELL. Mr. President, I reserve the remainder of my time.

RECOGNITION OF THE MINORITY LEADER

The ACTING PRESIDENT pro tempore. Under the previous order, the Democratic leader is recognized.

Mr. BYRD. Mr. President, I thank the Chair.

THE LIBYAN RAID: THE ADMINISTRATION IGNORES THE PRINCIPLES OF SECRECY AND SURPRISE

Mr. BYRD. Mr. President, the administration's military action against Libya on April 14, 1986, in retaliation against Libyan state-sponsored terrorism, has been widely supported in Congress and across the United States. It was a necessary and defensible action. The professionalism of our fighting forces was laudatory. Furthermore, the action has apparently now galvanized our allies into working more closely with us in combating the challenging phenomenon of state-sponsored terrorism. This is apparent in the results of the just-concluded summit meeting in Tokyo.

While I have supported this military action, and while I praise and admire the valor and professionalism, of our fighting forces, I deplore the hemorrhaging of vital military information and planning by various elements of the administration that dominated the news for a full week prior to the raid. The military action was undertaken only after a full week of news reports that quoted administration officials revealing the nature of the mission, against whom the raid would take place, roughly when it would occur, what targets would probably be struck, and which countries might or might not assist in it. Reports indicate that the leaks were so damaging to our planned action that the raid had to be postponed at least once.

This kind of undisciplined chatter might be dismissed as a clever series of trial balloons, designed to affect Qadhafi or our allies, or both, in various ways. However, the paramount goals in any operation must be the safety of our own fighting men and women and the success of the mission itself. We are fortunate that Qadhafi did not act, apparently on the information or at least sufficiently on the information that was readily available to him to complicate the raid, or even to cause us to abort it.

Mr. President, I think it is very important that the historical record concerning this episode in our foreign relations fully show and accurately show the way in which, and the degree to which, the administration through statements by its various spokesmen contributed to the spreading of advance notice of the anticipated Libyan raid literally around the world via the news media, allied governments, and other means during the week preceding the raid.

I ask unanimous consent that a detailed chronology of what the administration spokesmen said to and through these various channels during those several days be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

["The understanding now is that a strike against Libya is in the works. If it comes to that, seldom will U.S. military action have been so widely and publicly advertised in advance."—Sam Donaldson, ABC "World News Tonight" April 9, 1986 (5 days before the raid).]

["By Friday [April 11], says a top intelligence official, 'we knew that we were doomed. Too many people were talking freely about the operation and too many operational details were already out. We had to postpone.' About noon on Friday NSC hastily convened again in the Oval Office and got the President's agreement for a postponement of indefinite duration. Reagan, says one participant, 'was furious. He realized that the operation had to be put off but wanted to make sure that in the future no more leaks will get around.' "—Time, April 21, 1986.]

THE NOT-SO-SECRET RAID AGAINST LIBYA

On April 14, 1986, the United States retaliated against Libyan state-sponsored terrorism by bombing military and terrorist activity support targets in the Tripoli and Benghazi areas.

This military action was undertaken after a full week of news reports that quoted Ad-

ministration officials revealing the nature of the mission, against whom the raid would take place, roughly when it would occur, what targets would probably be struck, and which countries would and would not assist in it, and after our allies had been told of the planned military raid.

The military strike against Libya has been widely supported in the Congress and the United States as a necessary and defensible action.

But the Administration's inability to contain the Nation's most vital military secrets—secrets upon which the lives of the men and women in our armed forces depend and upon which the success of the mission depends—is a different matter.

What follows is a chronology of what the Administration told the news media and allied governments during the week before the raid.

CHRONOLOGY OF EVENTS

Saturday, April 5

1:49 a.m. Berlin Time: A bomb exploded in the La Belle discotheque in West Berlin killing a U.S. soldier and a Turkish woman and injuring 204 people, including 64 Americans.

Sunday, April 6

New York Times: "President Reagan was asked before boarding Air Force One for the return trip to Washington if he would 'hit' Libya and responded, 'No comment.' " (New York Times, April 7.)

Secretary of Defense Caspar Weinberger: "We don't have the hard evidence [against Qaddafi] * * * but when there is evidence, we wouldn't hesitate to act for a moment." (NBC "Nightly News," April 6.)

Monday, April 7

U.S. Ambassador to West Germany Richard Burt: "There are very clear indications that there was Libyan involvement [in the Berlin bombing] * * *" When asked whether he would like to see the President take military action against Qaddafi, Burt replied: "I'm not going to close the President's options. * * * He's studying this issue right now. * * *" (NBC "Today Show," April 7.)

Washington Post: "The White House yesterday [April 7] privately rebuked Richard Burt, U.S. Ambassador to West Germany, for saying in a television interview that the United States has clear indications of Libya's involvement in the weekend bombing of a West Berlin nightclub. U.S. officials confirmed, however, that Burt's statements were correct. * * * The officials, who declined to be identified, said Burt had been warned to be more circumspect in public statements, not because he had spoken incorrectly but because, as one official put it, 'he got too far out in front of what the administration wants to say publicly at this point.' " (Washington Post April 8.)

CBS "Evening News": "Reagan Administration officials say they have intelligence reports strongly linking the Libyan People's Bureau in East Berlin with the bombing of the La Belle discotheque in West Berlin. The evidence includes intercepted messages dispatched from Libya to its operatives in East Berlin. Top U.S. officials acknowledge that detailed military contingency plans for retaliation already exist. Said one source, they involve five targets in Libya." (White House Correspondent Lesley Stahl, CBS "Evening News," April 7.)

ABC "World News Tonight"; "U.S. intelligence sources say that after the [Berlin] bombing, there were messages from Libya to its embassy in East Berlin which indicated clear knowledge of details of the terrorist attack and which in essence offered praise for a job well done." (National Security Correspondent John McWethy, ABC "World News Tonight," April 7.)

Wall Street Journal: "U.S. officials are putting out the word that they are laying the groundwork for possible retaliatory actions against Libya for its suspected involvement in the bombing of a West Berlin discotheque. * * * U.S. officials said they won't decide on any of several possible retaliatory measures now being studied by President Reagan until investigators in Berlin make more progress * * * Options that U.S. officials have discussed include striking unmanned planes on an airfield, Libya's two SAM-5 missile sites, or missile-storage area * * * Other retaliatory options are aimed at striking at the heart of Libya's economy, by bombing oil lines or transportation." (Wall Street Journal, April 8.)

Tuesday, April 8

White House Press Briefing: "Q: So, just to reiterate, you have not now at this time made a conclusion as to the extent of Libyan involvement in either the two incidents of last week? [White House deputy press secretary Larry Speakes]: That's right." (White House afternoon press briefing, April 8.)

Wall Street Journal: "Reagan and his advisers are united in wanting to respond militarily against Qadhafi * * * but haven't agreed on a time or place to strike back, a senior Administration official said." (Wall Street Journal, April 9.)

New York Times: "One State Department official, who was openly skeptical about the evidence used to link Libya to last December's Rome and Vienna airport attacks, said today [April 8] that 'I have absolutely no doubt this time. We have the goods.' " (New York Times, April 9.)

CBS "Evening News": "Forty-eight hours after the bombing in West Berlin the Reagan Administration had reached a consensus for military retaliation against Libya. But, officials are still trying to decide exactly what to do and when. Sources tell CBS that the evidence, most of it from communications intercepts, seems to implicate Libya beyond much doubt * * * What are the options? The easy targets are on the coast—the Libyan missile battery already hit during the operation in the Gulf of Sidra, a submarine base, other port facilities and artillery positions. More risky: terrorist training camps. Military planners say daylight action inland would probably mean the loss of some pilots and aircraft. But the White House believes there is public support as do many in Congress. (White House Correspondent Bill Plante, CBS "Evening News," April 8.)

Wednesday, April 9

Events of the Day That Were Known at the Time

USA Today: "By 3 p.m., two U.S. aircraft carrier battle groups were ordered to remain in the Mediterranean." (USA Today, April 10.)

New York Times: "Several of the [Administration] officials said sensitive information was being shared with West Germany, Britain, France, Italy and a few others, but that not all were being shown the same raw evidence." (New York Times, April 10.)

CBS "Evening News": "According to a highly-placed source President Reagan has approved another possible military strike against Libya. * * * The White House denied rumors today that a military response was already underway, but a well-placed intelligence source said that a military response has been approved." (White House Correspondent Lesley Stahl, CBS "Evening News," April 9, and USA Today, April 10.)

ABC "World News Tonight": "The understanding now is that a strike against Libya is in the works. If it comes to that, seldom will US military action have been so widely and publicly advertised in advance." (Sam Donaldson, ABC "World News Tonight," April 9.)

Asked directly whether he had already authorized military retaliation against Libya, the President said: "This is a question that, as I say, is like talking about battle plans or something." Stating that the Administration was still looking for proof, he concluded that "if there's identification enough to respond, then I think we'd respond." (President Reagan, News Conference of April 9. Transcript in Washington Post, April 10.)

Events of the Day That Were Subsequently Reported

Washington Post: "At about the middle of last week [April 6-12], officials from Reagan's National Security Council contacted their counterparts in Thatcher's Cabinet Office. The Americans said that the Administration had decided to take military measures against Libya, and wanted both British backing and approval for use of Royal Air Force bases where U.S. Air Force F111s and some aerial refueling tankers are stationed. * * * Her staff requested that the NSC provide specific information on the types of bombers that were to be used, and on the intended targets." (Washington Post, April 16.)

New York Times: "The discussions [with the British] began late on Tuesday [April 8], almost a week before the raid. * * *" (New York Times, April 16.)

On Wednesday, April 9, five days before the raid, the President was authoritatively reported to have approved in principle the decision to retaliate militarily against Libya.

Washington Post: "Sources said that a formal national security decision directive was signed last Wednesday [April 9] in which Reagan approved an attack on Libya 'in principle'. * * * By Wednesday [April 9]. * * * Shultz and Poindexter were ready with their recommendation for a military strike. Reagan approved the decision in principle at a National Security Council meeting in the Oval Office after hearing a recommendation from Adm. William J. Crowe, Jr., chairman of the Joint Chiefs of Staff, who called for adding firepower to U.S. forces before any strike was made." [Washington Post, April 15.]

Sam Donaldson on ABC "Nightline," April 14: "Officials here [Washington, D.C.] say the President decided on a military option at the middle of last week, say Wednesday, Wednesday morning, and from that moment on, they insist there was never any doubt that it would be used." (ABC "Nightline," April 14.)

Thursday, April 10

Events of the Day That Were Known at the Time

NBC "Today Show": "Administration officials say that intense planning is under way for retaliation against Libya. At his news conference the President only hinted at it. * * * And when given the facts the President did not deny that he has already ordered military retaliation. Afterwards officials said that omission was very significant and said pointedly that when the time is right the United States will respond."

(White House correspondent Andrea Mitchell, NBC "Today Show," April 10.)

Washington Post: "The United States, * * * now has 'indisputable evidence' that Libyan leader Muammar Qaddafi was behind the [Berlin discotheque] attack, according to NATO commander Bernard W. Rogers. * * * Gen. Rogers, speaking in Atlanta Wednesday [April 9], said, 'We have indisputable evidence. * * * I can't tell you how we get it. But it's there.' " (Washington Post, April 11.)

At the White House, deputy press secretary Larry Speakes was asked if reporters could assume that Rogers "knows what he is talking about." Speakes replied: "I'm sure you can." (White House afternoon press briefing, April 10.)

New York Times: "An Administration official said that Libyan military sites are the prime options under consideration for retaliation, and that among the key possibilities are Libyan air bases near the coast. * * * The official said that coastal electronic listening posts, including early-warning radar sites as well as units that pick up airplane and ship traffic, are also targets. * * * Although oil fields and oil depots are also under construction, one United States official said that destruction of such sites could create problems for the United States because friendly nations, particularly Italy and West Germany, buy oil from Libya. Moreover, a number of Americans are believed working in or near these sites, despite Mr. Reagan's recent order for Americans to leave Libya." (New York Times, April 11.)

New York Times: "Administration officials conceded that, if President Reagan orders a military strike, 'clearly the surprise won't be there.' The official added * * * 'The Libyans know as well as we do what the major targets are.' " (New York Times, April 11.)

NBC "Nightly News": "At the President's direction the Pentagon is making final plans for a retaliatory strike against Libyan military bases and perhaps industrial sites. That according to defense officials who told NBC News that the President has approved in principle an attack of short duration which would destroy many targets. The sources said the carriers *Coral Sea* and the *America*, currently within 24 hours of the Libyan coast, would not be ordered into action until the President reviews the battle plan with his top advisers. They would include Vice President Bush, who is due back from the Middle East late Saturday, and Defense Secretary Weinberger who returns from Asia Sunday.

* * * Defense officials said the President's military options are all keyed to the four main air defense missile sites along the Libyan coast. Those batteries would have to be destroyed first. Only then would bombers be sent to attack three large military airfields. The F-111 bomber is one of the weapons the President could use together with carrier jets. The F-111 is based in Britain and it is not known if the British government would go along with that use of its territory. But the largest burden of the airstrike would go to the attack jets on the two carriers. Pentagon sources said they would be used against Libyan naval facilities and military bases along the Libyan coast. * * *

* * * It is not clear tonight whether the attack plan to be presented to the President will include a strike against Libyan oil facilities. One Pentagon source said that would expose attack jets to more ground fire than is acceptable, and there is that same concern with striking Libya's many terrorist camps—the majority of which are in the Libyan interior out of safe bomber range. But one official said there are several near shore which could be attacked.

* * * Those are most of the options for the President and according to defense officials, it is no longer a question of whether he will employ one or all of them, but when." (Fred Francis at the Pentagon, NBC "Nightly News," April 10.)

Friday April 11

Events of the Day That Were Known at the Time

NBC "Today Show": "The issue isn't if the U.S. will strike, but when." (Bryant Gumbel, NBC "Today Show", April 11.)

NBC "Today Show": "Defense department sources say the plan would be for a quick strike that could hit the following targets. Military bases near the coast to knock out missile sites and missile storage areas. Military airfields near Tripoli, to hit unmanned jet fighters on the ground. * * * The goal is to strike as many targets as possible as close to the coast to reduce the danger to American aircraft." (Correspondent Jamie Gangel, NBC "Today Show," April 11.)

Reuters: "Pentagon officials said yesterday [April 11] the *Coral Sea* and *America*, carrying 170 planes and escorted by battle fleets of more than 10 ships each, had edged closer to Libya." (Reuters, April 12.)

New York Times: "[White House chief of staff Donald Regan] was asked by reporters * * * whether there now was 'indisputable' evidence linking Libya to the West Berlin disco attack. 'As far as most people are concerned, yes,' Mr. Regan replied * * * 'We haven't reached a final conclusion, but we're coming close.' " (New York Times, April 12.)

Events of the Day That Were Subsequently Reported

AP: "On Friday, when the ships were still about a day's sail from the Gulf of Sidra * * * one Pentagon source said, 'There doesn't seem to be anything imminent at this point.' " (AP, April 13.)

Washington Post: "According to French and American sources, the United States first broached the question of overflight rights with France on Friday, April 11, via the military attache's office in the U.S. Embassy here [in Paris]." (Washington Post, April 24.)

Washington Post: "[Paris daily] Le Monde said that Reagan sent a second private message to Mitterrand on April 11, announcing his intention of using the F111s to attack 'terrorist camps' in Libya and requesting overflight rights." (Washington Post, April 29.)

Saturday, April 12

Events of the Day That Were Known at the Time

UPI: " 'As part of our continuing consultations on the threat of terrorism, Ambassador Vernon Walters, the U.S. representative to the United Nations, has undertaken a mission to Europe,' said State Department spokesman Deborah Cavin. 'He is now in the United Kingdom, where he has met with Prime Minister Margaret Thatcher and he will be visiting several other countries in the next few days.' " (UPI, April 12.)

New York Times: "Administration officials speculated that the Walters trip placed in abeyance, at least for the moment, a retaliatory strike against Libya, but officials declined to rule out a raid even in the next 48 hours." (New York Times, April 13.)

AP: "The [British] Mail on Sunday newspaper said Mrs. Thatcher had 'cleared the way for President Reagan to use British bases to launch a massive new air attack on Libya.' " (AP, April 13.)

AP: "Speculation * * * that the United States might be planning to use its F-111 fighter-bombers based in eastern England for a punitive strike against Libya * * * was heightened by the arrival Saturday [April 12] of several KC-10 tanker planes at the U.S. Air Force base in Mildenhall, eastern England. The KC-10, a military version of the DC-10, is capable of in-flight refueling and could be used to enable up to 40 F-111s to make roundtrip flights between Britain and Libya." (AP, April 13.)

AP: "Italian Premier Bettino Craxi told reporters Saturday [April 12] in Milan * * * 'I don't believe there will be a military intervention there [Libya] before Monday,' the day of the Common Market meeting." (AP, April 12,)

NBC "Nightly News": "By Monday, the diplomatic lobbying tour will be complete, and Administration sources indicate that means a strike could come as early as Tuesday. * * * Administration sources say the president is committed to a retaliatory strike, but might be willing to hold off if European allies agree to strong political and economic sanctions. Short of that, said one official, it's just a matter of time until the president picks a plan and gives the go-ahead." (Correspondent Jamie Gangel at the White House, NBC "Nightly News," April 12.)

Events of the Day That Were Subsequently Reported

Washington Post: "After consulting conservative Prime Minister Jacques Chirac by telephone, Mitterrand decided to reject the U.S. request [for overflight rights], and the French refusal was communicated to Washington the following morning [Saturday, April 12]." (Washington Post citing Le Monde, April 29.)

ABC "Nightline": "Officials here [Washington, DC] say * * * General Walters * * * was not sent to try to solicit allied support for this * * * but had been sent to inform the allies that a military option would be used." (Sam Donaldson, ABC "Nightline," April 14.)

Washington Post: "By the time Walters arrived Saturday, most of these details had been ironed out. His meeting with Thatcher, along with [Foreign Secretary Geoffrey] Howe and Defense Secretary George Younger, sources said, concentrated primarily on the 'public presentation' of the attack after the fact, including the extent to which evidence could be publicly revealed and the legal justification for it." (Washington Post, April 16.)

New York Times: "According to Spanish sources here [Washington, DC] and in Madrid, Mr. Walters, at a previously undisclosed meeting with Mr. Gonzalez on Saturday [April 12], hinted at the possibility of overflights or use of the bases in the event of a hypothetical American military action against Libya. Mr. Gonzalez, the sources said, gave a thoroughly discouraging response about both." (New York Times, April 16.)

Sunday, April 13

Events of the Day That Were Known at the Time

Deputy Secretary of State John Whitehead said: "* * * prospective military action is something that only the President will

decide on. He has not yet made that decision. * * *" "No, there really isn't a time table, but * * * the time is getting short." (CBS "Face the Nation," April 13, and New York Times, April 14.)

Director of the State Department's Office of Counter-Terrorism Robert Oakley said: "I can't tell you exactly what General Walters is talking about, but he is indeed consulting our allies." (ABC "This Week With David Brinkley," April 13.)

Walters met with West German Chancellor Kohl and Foreign Minister Genscher Sunday morning and that evening with French Prime Minister Chirac. (Washington Post, April 14.)

Jiji (Tokyo) Press Service: "When they met at the Presidential Retreat of Camp David * * * last Sunday, Reagan hinted the possibility of attacking Libya, [Japanese Prime Minister] Nakasone said at a plenary session of the House of Councillors. Reagan said that the United States has firm evidence linking Libya to the recent bombing of a West Berlin nightclub * * * On Wednesday [April 16] Deputy White House press secretary Larry Speakes said Japan expressed its support for U.S. attacks against Libya prior to * * * [the] air raids on Tripoli and Benghazi. But this was denied by Nakasone Thursday." (Jiji [Tokyo] Press Ticker Service, April 18)

NBC "Nightly News": "Administration officials say the President is moving toward a decision about whether to make a retaliatory strike agains Libya; and White House officials confirm the President will have a special National Security meeting tomorrow to evaluate the situation. * * * Today, the President conferred with Vice President Bush and Secretary of State Shultz, both of whom are believed to favor a military strike. Noticeably absent from the Camp David meeting was Defense Secretary Weinberger, who is believed to oppose such action." (Jamie Gangel at the White House, NBC "Nightly News," April 13.)

Events of the Day That Were Subsequently Reported

Washington Post: "The [Le Mondel] newspaper said the White House then sent another urgent message to Mitterrand asking him to reconsider [France's decision made Saturday, April 12, to refuse American overflight rights]. The French refusal was confirmed at a meeting on the morning of April 13 between Mitterrand, Chirac, and Foreign Minister Jean-Bernard Raimond." (Washington Post, April 29.)

New York Times: "Mr Walters said the United States was ready to act," said a ranking aide of the American envoy, and Kohl told him, "Force is not our method." * * * A senior adviser to the Chancellor said Mr. Kohl was "furious" when he read that Reagan Administration officials had described him as willing to condone military action against Libya in private while publicly opposing such a step. "He said nothing like this," the adviser insisted. (New York Times, April 25.)

New York Times: "Mr. Craxi's aides, too, were shocked to hear him described by Washington officials as having privately endorsed the American raid." (New York Times, April 25.)

The April 21 issue of Newsweek, which was available on newsstands before the raid, contained a lengthy lead article on the possibility of military action against Libya. Using accumulated leaks from Administration officials, it offered a detailed and remarkably accurate analysis not only of what had happened, but also of what would happen.

This time the casus belli was the La Belle discotheque bombing in West Berlin. The President's counselors said they had worked up an "indisputable" trail of evidence connection Libyan agents to the murderous blast. Two U.S aircraft carriers took up positions within striking distance of Libya. Reagan suggested he was only waiting for clear battle conditions and a complete dossier on the Berlin case before striking.* * *

With the USS *Coral Sea* and the USS *America* both in the Mediterranean, one plausible scenario was that Reagan would send Navy jets from the carriers to bomb airfields, missile batteries, radar towers or other military targets along the Libyan coast. * * * United Nations Ambassador Vernon Walters also left on a trip to London, feeding speculation that Washington might try to launch a raid with U.S. Air Force FB-111 bombers based in Britain. The President's advisers were leaning against two other options: trying to take out Libya's oilfields or hitting suspected terrorist training camps.* * *

* * * This time, senior U.S. officials said, the Joint Chiefs of Staff laid out a full range of military options for Reagan and the National Security Council immediately after the Berlin bombing. Over the next three days new reconnaissance photos were reviewed and the list of targets was narrowed; then Reagan approved an attack "in principle."

* * * Pentagon officials were determined to stick to the criterion of "proportionality"—and they read that as meaning an attack on limited targets such as the radar array around Tripoli. Then, according to Defense Department officials, the President and his other advisers decided to consider larger targets such as Libya's airfields. The military brass went back to the drawing board.* * *

Of all the options, the most likely to meet Reagan's guidelines was sending jets from the carriers to hit Libyan military positions.* * * The Administration had also not ruled out a longer range hit. From the start the Pentagon had liked the option of dispatching the British-based FB-111s, which can move fast, fly low and carry a heavy bomb-load. At first, according to British officials, Prime Minister Margaret Thatcher was cool toward the proposal. But the sources said she warmed up after U.S. official let the British see their full file on Kaddafi's links to the La Belle blast.* * * In another sign the Administration might be leaning toward the Britain scenario, several U.S. tanker aircraft, which could be used for inflight refueling, took wing for American air bases in the United Kingdom.

The President's advisers rejected other possibilities as too dangerous. The CIA had identified some three dozen camps where it suspected the Libyans of training terrorists. But top U.S. officials argued that strikes on those targets might also hit civilians. Senior planners pointed out that an attack on Libyan oilfields, pumping stations and loading docks could endanger innocent oil workers, including Americans and Europeans.* * *

* * * Senior officials in Washington echoed reports that U.S. intelligence had intercepted messages between Tripoli and the Libyan People's Bureau in East Berlin. In late March, they said, Tripoli instructed the bureau to carry out an undisclosed "plan." On April 4 the bureau informed its capital that the operation would take place soon. Hours later—after the attack on the discotheque—the Libyans in East Berlin reported that they had executed the plan. Then on April 6 Tripoli exhorted other People's Bureaus to follow East Berlin's example. * * *

In the campaign to rally allied support, the State Department sent cables on Kaddafi's links to terrorism to major West European capitals. But only the British were shown raw transcripts of the intercepted Libyan messages. The other allies saw paraphrases. That appeared to explain why the West Germans sounded circumspect about the evidence in the La Belle case, even though they verified the thrust of Washington's allegations. * * *" ("Targeting a 'Mad Dog,'" Newsweek, April 21, 1986—released April 13, 1986.)

Monday, April 14

The Day of the Raid

NBC "Today Show": "A high official said in Moscow this morning the Soviet government is in contact with Washington in efforts to prevent a U.S. attack on Libya. * * * At the White House, President Reagan meets today with his top advisers in what could be a crucial meeting on the Libyan crisis." (News Anchor John Palmer.) "Many observers believe—even those who originally thought that a military response would be a mistake—that the President has now talked so tough that he almost has to do something, in order to preserve American credibility on this issue." (White House Correspondent Andrea Mitchell, NBC "Today Show," April 14.)

12:13 p.m., EST: 18 US F-111s depart from Britain.

4 p.m., EST: The President consults with Congress for the first time as top congressional leaders are told of the military operation which is already in progress. (Washington Post, April 15.)

Representative Robert Michel, who attended the briefing, said: "* * * we got a complete briefing on the nature of the strike and how it was to be deployed and the purpose for taking that kind of action. * * * There certainly were some serious questions asked by members, and I think rightfully so, particularly for those of us who, while hearing reverberations that there might be some kind of strike of this nature but not knowing for use and having not been counseled or asked for our comments before that meeting * * *" (ABC "Nightline," April 14.)

Asked whether this constituted proper consultation with Congress under the War Powers Act, Representative Dante Fascell, who also attended the briefing, responded: "Well, we were informed of a decision." (ABC "Nightline," April 14.)

6:30 p.m. ABC "World News Tonight": "A debate at the highest level of the Reagan Administration raged right through the weekend about how best to deal with Qadhafi. Officials say arguments were so intense that the President late last week was unwilling to order a military strike until differences among his top advisers could be narrowed. They now have, officials say, and plans have been set into motion to order a military strike.

One major reservation expressed late last week was the need to more fully consult with America's allies. Over the last two days, U.N. Ambassador Vernon Walters has done that consulting. * * * There were other concerns about not having enough military muscle on the scene. Two aircraft carrier task forces with 160 planes on board are standing by just north of Sicily—a quick run

from Libya. Additional KC-10 tankers, used in air-to-air refueling, have been flown to bases in Britain—available for duty should the Administration decide to use Air Force F-111s in a strike.

Another concern was the lack of secrecy. Today Defense Secretary Caspar Weinberger issued a tough new order for no one to talk about details of ship or plane movements. Other reservations, many of them said to be raised by Weinberger, include concern that civilian casualties—Libyan, European, and American—be minimized and that American pilots be exposed to the lowest possible risk. Though differences among high-level advisers still exist, officials say once the President signed off on a plan for action the debate stopped. Now all attention is focused on making sure the plan works." (National Security Correspondent John McWethy, ABC "World News Tonight," April 14.)

7:00 p.m. EST: American planes bomb Libya.

9:00 p.m. EST: President Reagan discusses the attack on Libya in nationally televised address.

11:30 p.m. EST: On ABC "Nightline," Ted Koppel declared: "It has been in the wind for days. For a time, in fact, the move toward military action was so blatant that it looked like a bluff." (ABC "Nightline," April 14.)

The Aftermath

A statement released by the office of Canadian Prime Minister Mulroney: "The government of Canada has been fully consulted by the United States all along and was notified in advance of its intentions with respect to Libya." (NEWSCAN [newsletter of the Canadian Embassy], week of April 18, datelined Ottawa, April 15, 1986.)

White House morning press briefing:

Question: "Was his [President Reagan's] decision [made Wednesday, April 9] at all contingent on diplomatic and congressional consultations? Or was the military option, once chosen at mid-week, to go toward irrespective* * *?"

White House deputy press secretary Larry Speakes: "It was to go forward, because we sent General Walters on Saturday and Sunday and Monday to visit with the allies. They were told that the President had decided on the military option, and we'd go from there." (White House morning press briefing, April 15.)

ORDER OF PROCEDURE

Mr. BYRD. Mr. President, how much time do I have remaining?

The ACTING PRESIDENT pro tempore. The Democratic leader has 6 minutes remaining.

Mr. BYRD. Mr. President, I yield to the distinguished Senator from Arkansas. How much time would he like to have?

Mr. BUMPERS. The leader has 6 minutes remaining?

Mr. BYRD. I have 6 minutes.

Mr. BUMPERS. I would like as much as possible. I do not want to infringe on the leader's time.

Mr. BYRD. Mr. President, I shall have an opportunity later in the day to make the comments that I had intended to make at this time.

I yield to the distinguished Senator from Arkansas the remainder of my time.

The PRESIDING OFFICER. The leader now has 5 minutes remaining.

Mr. BUMPERS. I am not sure the Chair is being entirely partial in this little dialog.

Mr. President, I thank the leader for yielding the time to me.

S. 2439—COMPETITIVE LEASING ON FEDERAL LANDS FOR OIL AND GAS

Mr. BUMPERS. Mr. President, the purpose of my rising this morning is to say that I am introducing another bill dealing with competitive leasing on Federal lands for oil and gas. I introduced a bill last year to try to change the lottery system that we now use to an all-competitive systems. I have been fighting this battle for 7 years.

The permanent scar on the body politic remains. At a time when we are trying to deal with deficits, GAO has said we are losing in the vicinity of $200 million a year under an anachronistic system which, if it ever served any purpose at all, has long outlived that purpose.

Mr. President, I want to describe the system that I am trying to correct. Right now there are well over 500 million acres of Federal lands in this country. The Bureau of Land Management leases this land on behalf of every agency, whether it is the Forest Service or BLM land. Unless this land is under what is known as a known geological structure, the BLM puts it in a lottery. Anybody who wants to, can pay $75 to put his name in the lottery, and once a month, they turn the squirrel cage and pick somebody's name out and, say, it is a 1,000-acre tract of land that they are bidding on, whoever's name is pulled out of the squirrel cage gets that 1,000 for $1 an acre.

That land may be almost certain to be productive of oil and gas or it may be wildcat land.

They have three systems. That is one system.

Another system is called "over-the-counter system." You walk into the Bureau of Land Management and you say to them, "There is a 1,000-acre tract of land out here in which I have an interest. Has anybody else demonstrated an interest in it?" They say, "No, we have no record that anybody else is interested in leasing that land." If nobody else has demonstrated an interest in it, and that potential lessee can get the U.S. Geological Survey to say that is not a known geological structure, he can give them a $1,000 check or $1 an acre and walk out with a lease on 1,000 acres.

What is a known geological structure? The U.S. Geological Survey, in hearings we held in 1980, said a known geological structure is anything that has a producing oil or gas well within a mile of it.

What if you had two gas wells 5 miles apart and it was almost certain that everything in between them was full of gas, too? Well, anything outside the 1-mile limit of the two producing wells could be leased for $1 an acre by the first person who walks in and asks for it.

Now, if two or three people ask for it at the same time, then the tract of land goes into the lottery system and the applicants take their chances.

I have said on this floor a dozen times that I am absolutely convinced that this lottery system we use to lease Federal lands is a violation of the criminal laws of this Nation.

I have written to the Attorney General time and again asking him for a ruling whether or not this lottery is a violation of our criminal laws. I never have been able to get a ruling on it.

I can tell you that under the laws of Arkansas it is a violation of the law but simply as long as the Federal Government operates the lottery, Federal law supersedes State law and there is very little we can do about it.

The third system we use is, if there is a tract of 1,000 acres and that 1,000 acres is within 1 mile of a producing well, then the BLM does what it ought to do in every instance: It advertises it on a competitive basis and everybody submits sealed bids.

□ 1020

How did I get interested in this issue from a State like Arkansas, rather than Wyoming or Idaho? We have about 4 or 5 million acres of Federal lands in my State and 75,000 of it is a military reservation called Fort Chaffee.

The ACTING PRESIDENT pro tempore. The Senator's time has expired.

Mr. BUMPERS. Mr. President, I am reluctant to do this, but I do not see anybody else wishing to speak, so I ask unanimous consent that I be granted an additional 4 minutes.

The ACTING PRESIDENT pro tempore. Without objection, the Senator from Arkansas is granted an additional 4 minutes.

Mr. BUMPERS. Mr. President, Fort Chaffee, AR, is 75,000 acres surrounded roughly by 500 producing gas wells. The only reason there were no gas wells in Fort Chaffee was because, until 1976, it was against the law to lease a military reservation. So here you had this 75,000 acres blocked out, surrounded by 500 gas wells. And what did BLM do? Why, Texas Oil & Gas walked in there and said, "We will give you $1 an acre for 33,000 acres of this land." They said, "Pay us." And they got the land for $33,000 or $1 per acre.

I squealed like a pig under a gate. Some people in Arkansas took it upon themselves to appeal the decision and

went all the way to the Supreme Court. Last year, fortuitously, the Supreme Court declared that sale illegal and outside the authority of BLM and told BLM to release the land.

But here is the real clincher: Because I made so much noise about the sale—and why would I be interested? Because the State of Arkansas gets half the money—but because I raised so much cain about it, they leased another 24,000 acres at Fort Chaffee adjoining the 33,000 acres.

They leased that the following year on a competitive basis. What do you think it brought? $1,705 an acre. And if I had not squealed like a banshee, it would have gone for $1 an acre. And right now, they are proposing to lease thousands of acres of land in the Ouachita National Forest, Elgin Air Force Base, and Lord knows where else, for $1 an acre, land that ought to be bringing much, much more than that.

Not only are we losing money—that is really not my primary motivation for trying to change this anachronistic law—the reason I am trying to change it is because this system is absolutley open for rife fraud and it is being defrauded constantly by 250 leasing corporations or filing services that have sprung up in this country in the last 10 years. They get people to send them money to submit a bid for them. They say, "send us $125 and we will bid for you." So they send them the bid for $75 and put $50 in their pocket and say, "this is red hot land." And it may be and it may not be.

But the point is the only sensible way for Government to operate is the way everybody else operates, and that is on a competitive bid basis.

I wish I had more time, Mr. President, because I would like to describe some of the other abuses. When I first got into this, they had names in that squirrel cage of the lottery of people who were dead and people who did not exist.

I called the U.S. attorney in Denver. He told me he had so many plea bargainers in his office that he had to bring in more chairs. We have had to stop this system time and again because of fraud. And they say, "oh, we have got it fixed now." It used to be you could bid for $10. They say, "we have got it fixed now. We have moved that up to $35." More fraud, and they moved it up to $75.

The amount it takes to bid has nothing to do with whether you can defraud the system or not. But I will tell you something else: In this day and time when we are cutting revenue sharing, when we have cut State turnbacks from $63 billion a year to $17 billion a year, State and local governments need this money. They do not get anything of the $75 application fee. But if it is bid on a competitive basis, they get half of the bonus bid.

The National League of Cities, the National Association of Counties, and everybody ought to be up here lobbying for this bill.

Mr. President, now that I have described the current system and its problems, let me turn to the bill I am introducing today. This is a competitive oil and gas leasing bill drafted by the Department of the Interior. As every Member of this body knows, I have long been a proponent of the need to change the current leasing system, which I believe is outmoded, susceptible to fraud and manipulation, and not designed to provide the Government with a fair return. I referred earlier to the legislation I introduced at the beginning of this Congress, S. 373, which would establish an all-competitive system. In the interest of advancing the debate on this issue, I am today introducing legislation that would create a two-tiered system of onshore oil and gas leasing. This legislation was drafted by the Department of the Interior and is virtually identical to an Interior Department draft which has been available to interested Senators and industry representatives for several months.

The Interior draft would create a two-tiered system for onshore oil and gas leasing which can be summarized as follows: All Federal lands subject to oil and gas leasing would be offered first under a competitive system which would require minimum bids or $35 per acre. Parcels receiving at least one bid of $35 or higher would be leased to the highest bidder. Parcels receiving no bids or bids below the minimum would then be available for leasing in the second—noncompetitive—Tier for 1 year. If these parcels are not leased within the year they again become available only under the competitive system

The primary virtue of this legislation, in my view, is that it eliminates the use of the KGS [known geological structure] as the determinant of eligibility for competitive leasing and substitutes a market-based test. The lottery system—or the over-the-counter system for lands which have not been leased previously—is preserved for lands which the market has determined to be worth less than $35 an acre.

The royalty payment under this proposal would be fixed at 12½ percent, and the lease term would be extended to 10 years. Rental payments would be handled as under existing law. These lease terms would be the same for both competitive and noncompetitive leases.

The Government's authority to combat fraudulent practices involving the onshore oil and gas leasing system would be enhanced under this legislation. The Secretary would have new authority to disapprove lease assignments of less than 640 acres in order to prevent "40 acre merchants" from marketing small parts of leases to the public. Specific authority to combat fraud, including civil and criminal penalties, is provided for regulatory and enforcement agencies.

Mr. President, this draft legislation does not represent the ideal oil and gas leasing system—obviously I would prefer to do away with the lottery system altogether—but I think that it is a responsible proposal and a good starting point for debate. Many of the problems which the oil and gas industry has raised regarding earlier proposals are addressed in this legislation. I stand ready to listen to and work with any and all interested parties to achieve agreement on a leasing bill. It is clear that support for a more competitive system is growing. The House Interior Committee is interested in working on leasing legislation, as is the Department of the Interior. Now, at a time when leasing activity is relatively slow, we have an excellent opportunity to make some changes in the existing system which will be of benefit to all in the future. I urge my fellow Senators to take a close look at this legislation and to lend competitive leasing their full support. We cannot allow the current abominable system to continue.

I ask unanimous consent that the text of the bill and a section-by-section analysis, both drafted by the Department of the Interior, be printed in the RECORD following my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2439

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Onshore Competitive Oil and Gas Leasing Act of 1986".

SEC. 2. (a) Section 17(b)(1) of the Act of February 25, 1920 (30 U.S.C. 226(b)(1), is amended to read as follows:

"(b)(1) All lands to be leased which are not subject to leasing under paragraph (2) of this subsection shall be leased as provided in this paragraph to the highest responsible qualified bidder by competitive bidding under general regulations in units of not more than 5,120 acres, which shall be as nearly compact as possible. A lease shall be conditioned upon the payment of a royality of 12½ per centum in amount or value of the production removed or sold from the lease. The Secretary shall accept the highest bid from a responsible qualified bidder which is $35 or greater per acre, without evaluation of the value of the lands proposed for lease. All bids for less than $35 per acre shall be rejected. Lands for which no bids are received or for which the highest bid is less than $35 per acre shall become available for leasing under subsection (c) of this section for a period set by the Secretary not to exceed one year after the lease sale.".

(b) The first sentence of section 17(c) of the Act of February 25, 1920 (30 U.S.C. 226(c)), is amended to read as follows:

"(c)(1) If the lands to be leased are not leased under subsection (b)(1) of this section or are not subject to competitive leasing under subsection (b)(2) of this section, the person first making application for the lease who is qualified to hold a lease under this Act shall be entitled to a lease of such lands without competitive bidding.".

(c) Section 17(c) of the Act of February 25, 1920 (30 U.S.C. 226(c)), is amended by adding a subsection to read as follows:

"(c)(2)(A) Lands (i) which were posted for sale under subsection (b)(1) of this section but for which no bids were received or for which the highest bid was less than $35 per acre, and (ii) for which, at the end of the period prescribed by the Secretary under subsection (b)(1) of this section no lease has been issued and no lease application is pending under paragraph (1) of this subsection, shall again be available for leasing only in accordance with subsection (b)(1) of this section.

(B) The land in any lease which is issued under paragraph (1) of this subsection or under subsection (b)(1) of this section which lease terminates, expires, is cancelled or is relinquished shall again be available for leasing only in accordance with subsection (b)(1) of this section.".

(d) The third sentence of section 17(d) of the Act of February 25, 1920 (30 U.S.C. 226(d)), is amended by inserting "not less than" after "minimum royalty of" and before "$1 per acre".

(e) The first sentence of section 17(e) of the Act of February 25, 1920 (30 U.S.C. 226(e)) is amended to read as follows: "(e) Leases issued under this section shall be for primary term of ten years.".

SEC. 3. The third sentence of section 30(a) of the Act of February 25, 1920 (30 U.S.C. 187a) is amended to read as follows: "The Secretary shall disapprove the assignment or sublease only for lack of qualification of the assignee or sublessee or for lack of sufficient bond: *Provided, however,* That the Secretary may, in his discretion, disapprove an assignment—(1) of a separate zone or deposit under any lease, (2) of a part of a legal subdivision, or (3) of less than 640 acres outside Alaska or of less than 2,560 acres within Alaska.".

SEC. 4. The first sentence of section 31(b) of the Act of February 25, 1920 (30 U.S.C. 188(b)) is amended to read as follows:

"(b) Any lease issued after August 21, 1935, under the provisions of section 17 of this Act shall be subject to cancellation by the Secretary of the Interior after 30 days notice upon the failure of the lessee to comply with any of the provisions of the lease, unless or until the leasehold contains a well capable of production of oil or gas in paying quantities, or the lease is committed to an approved cooperative or unit plan or communization agreement under section 17(j) of this Act which contains a well capable of production of unitized substances in paying quantities.".

SEC. 5. The Act of February 25, 1920 (30 U.S.C. 181 *et seq.*) is amended by adding at the end thereof the following new section:

"SEC. 43. Actions taken by the Secretary of the Interior to develop regulations and procedures for a competitive oil and gas leasing program or to hold particular lease sales shall not be subject to the requirements of section 102(2)(c) of the National Environmental Policy Act. Nothing in this section shall be considered as affecting the application of section 102 of the National Environmental Policy Act to the proposed inclusion of any lands in a lease parcel or subsequent phases of oil and gas development.

SEC. 6. Section 1008 of the Alaska National Interest Lands Conservation Act (16 U.S.C. 3148) is amended as follows:

(a) Subsections (c) and (e) (16 U.S.C. 3148(c) and (e)) are deleted in their entirety;

(b) The second sentence of section 1008(d) (16 U.S.C. 3148(d)) is deleted; and

(c) Subsection (d) and (f) through (i) (16 U.S.C. 3148(d) and (f) through (i)) are renumbered subsections (c) througfh (g) respectively.

SEC. 7. (a) Notwithstanding any other provision of this Act and except as provided in paragraph (d) of this section, all noncompetitive oil and gas lease applications filed pursuant to regulations governing the simultaneous oil and gas leasing system (43 C.F.R. Subpart 3112) and pending on the date of enactment of this Act shall be processed, and leases shall be issued, if appropriate, under the Act of February 25, 1920 (30 U.S.C. 181 *et seq.*), as it was in effect before its amendment by this Act. If the date of enactment of this Act occurs during a simultaneous filing period prescribed by the regulations of the Department of the Interior, all applications filed during that period shall be considered filed prior to the date of enactment.

(b) Notwithstanding any other provision of this Act and except as provided in paragraph (d) of this section, all noncompetitive oil and gas lease offers filed pursuant to the regulations governing the over-the-counter leasing system (43 C.F.R. Subpart 3111) prior to July 1, 1986, shall be processed, and leases shall be issued, if appropriate, under the Act of February 25, 1920 (30 U.S.C. 181 *et seq.*), as it was in effect before its amendment by this Act. If the Secretary posts tracts for competitive sale continuing lands in an over-the-counter noncompetitive lease offers filed between July 1, 1986, and the date of enactment of this Act, and if any such tracts do not receive bids of $35 or greater per acre at the sale, the Secretary shall reinstate the noncompetitive lease offers for these tracts and shall issue leases in accordance with section 17(c) of the Act of February 25, 1920 (30 U.S.C. 226(c)).

(c) Notwithstanding any other provision of this Act, all competitive oil and gas lease bids filed pursuant to applicable regulations (43 C.F.R. Subpart 3120) pending on the date of enactment of this Act shall be processed, the high bid for each tract shall be accepted without further evaluation of the value of the tract, and leases shall be issued if otherwise appropriate under the Act of February 25, 1920 (30 U.S.C. 181 *et seq.*), as it was in effect before its amendment by this Act.

(d) No noncompetitive lease applications or offers pending on the date of enactment of this Act for lands within the Shawnee National Forest, Illinois, the Ouachita National Forest, Arkansas, the Overthrust Belt area of Wyoming as defined by the Director, Bureau of Land Management, by memorandum dated February 24, 1986, Fort Chaffee, Arkansas, or Eglin Air Force Base, Florida, shall be processed until these lands are posted for competitive bidding in accordance with section 2 of this Act. If any such tract receives no bid of $35 or greater per acre, then the noncompetitive applications or offers pending for such a tract shall be reinstated and noncompetitive leases issued, if appropriate. If competitive leases are issued for any such tract, then the pending noncompetitive application or offer shall be rejected.

SEC. 8. (a) Except as provided in section 6 of this Act, all oil and gas leasing pursuant to the Act of February 25, 1920 (30 U.S.C. 181 *et seq.*), after the date of enactment of this Act shall be conducted in accordance with the provisions of this Act.

(b) The Secretary shall issue final regulations within 180 days after the date of enactment of this Act. The regulations shall be effective when published in the Federal Register. The environmental and economic impacts of this Act having been fully considered by the Congress, the Secretary shall not prepare any environmental, economic or small business impact analyses, which may otherwise be required by law or executive order, when he prepares proposed regulations or adopts final regulations implementing this Act.

(c)(1) Prior to issuing regulations implementing this Act, the Secretary shall hold at lease one competitive lease sale pursuant to section 2 of this Act. Sale procedures shall be established in the notice of sale. This sale shall include tracts which, but for the enactment of this Act, would have been posted for the filing of simultaneous oil and gas lease applications pursuant to applicable regulations (43 C.F.R. Subpart 3112). The Secretary may also include in the sale tracts which would otherwise have been posted for competitive sale pursuant to applicable regulations (43 C.F.R. Subpart 3120) and tracts which received over-the-counter noncompetitive oil and gas lease offers pursuant to applicable regulations (43 C.F.R. Subpart 3111) between July 1, 1986, and the date of enactment of this Act. The Secretary may hold additional sales if he considers it necessary prior to the issuance of final regulations pursuant to subsection (b) of this section.

(2) If tracts which would, but for the enactment of this Act, have been posted for the filing of simultaneous applications do not receive bids of $35 or greater per acre at a competitive sale held under this section, they shall subsequently be posted for the filing of simultaneous applications provided the Secretary has not yet issued regulations under subsection (b) of this section.

(3) If no competitive or noncompetitive leases are issued for lands posted for sale as provided in paragraph (c) of this section, the Secretary shall lease such tracts in accordance with the regulations issued pursuant to paragraph (b) of this section.

SEC. 9. The Act of February 25, 1920 (30 U.S.C. 181 *et seq.*) is amended by inserting after section 40 the following new section:

"SEC. 41. (a) Any person shall be liable under the provisions of this section if that person knowingly and willfully misrepresents to the public the provisions of this Act and its implementing regulations, by any means of communication, in the following respects:

(1) the value or potential value of any lease issued under this Act or portion thereof;

(2) the value or potential value of any lease to be issued under this Act or portion thereof;

(3) the value or potential value of any land available for leasing under this Act;

(4) the availability of any land for leasing under this Act; or

(5) the ability of the person to obtain leases under this Act on his or her own behalf or on behalf of any other person.

(b) Any person who organizes, or participates in, any scheme, arrangement, plan or agreement to circumvent the provisions of this Act or its implementing regulations

shall be liable under the provisions of this section.

(c) The Attorney General shall institute, against any person who, given the nature of the intended recipient of the communication, knew or should have known he or she was violating subsection (a) or (b) of this section, a civil action, in the District Court of the United States for the judicial district in which the defendant resides or in which the violation occurred or in which the lease or land involved is located, for a temporary restraining order, injunction, civil penalty of not more than $100,000 for each violation, or other appropriate remedy, including but not limited to a prohibition from participation in exploration, leasing, or development of any Federal mineral, or both.

(d) Any person who knowingly and willfully violates the provisions of this section shall, upon conviction, be punished by a fine of not more than $500,000 for each violation or by imprisonment for not more than five years, or both.

(e)(1) Whenever a corporation or other entity is subject to civil or criminal action under this section, any officer, employee or agent of such corporation or entity who authorized, ordered, or carried out the proscribed activity shall be subject to the same action.

(2) Whenever any officer, employee or agent of a corporation or other entity is subject to civil or criminal action under this section for activity conducted on behalf of the corporation or other entity, the corporation or other entity shall be subject to the same action.

(f) The remedies, penalties, fines and imprisonment prescribed in this section shall be concurrent and cumulative and the exercise of one shall not preclude the exercise of the others. Further, the remedies, penalties, fines and imprisonment prescribed in this section shall be in addition to any other remedies, penalties, fines and imprisonment afforded by any other law or regulation.

(g)(1) A State may commence a civil action under subsection (c) of this section against any person conducting activity within the State in violation of this section. Civil actions brought by a State shall only be brought in the United States District Court for the judicial district in which the defendant resides or in which the violation occurred or in which the lease or land involved is located. The district court shall have jurisdiction, without regard to the amount in controversy or the citizenship of the parties, to order appropriate remedies and penalties as described in subsection (c) of this section.

(2) The State shall notify the Attorney General of the United States of any civil action filed by the State under this subsection within 30 days of filing of the action.

(3) Any civil penalties recovered by a State under this subsection shall be retained by the State and may be expended in such manner and for such purposes as the State deems appropriate. If a civil action is jointly brought by the Attorney General and a State, by more than one State or by the Attorney General and more than one State, any civil penalties recovered as a result of the joint action shall be shared by the parties bringing the action in accordance with a written agreement entered into prior to the filing of the action.

(4) Nothing in this section shall deprive a State of jurisdiction to enforce its own civil and criminal laws against any person who may also be subject to civil and criminal action under this section.

SECTION-BY-SECTION ANALYSIS OF A PROPOSAL TO AMEND THE ACT OF FEBRUARY 25, 1920, TO PROVIDE FOR COMPETITIVE LEASING OF OIL AND GAS FOR ONSHORE FEDERAL LANDS, AND FOR OTHER PURPOSES

Section 2 directs the Secretary of the Interior to lease all lands to the highest responsible, qualified bidder by competitive bidding as long as the highest bid equals or exceeds $35 per acre. This section specifically directs that no tract evaluations shall be conducted. All land receiving no bid or bids below $35 per acre will be rejected and leased to the person first making application within a period not to exceed one year, without competitive bidding. Currently, only those lands located within a "known geologic structure of a producing oil or gas field" (KGS) are eligible for competitive bidding. All other lands, regardless of perceived value, must be leased noncompetitively to the first qualified applicant. This section eliminates the use of KGS as the competitive-noncompetitive arbiter and replaces it with the market value of $35 per acre criterion. No change is made to the Secretary's discretion to establish reasonable procedures for determining the first qualified applicant. However, the $35 per acre criterion does establish the fact that lands leased noncompetitively are worth less than $35 per acre. Following the Secretarial set period not to exceed one year, any lands again available for leasing shall be leased to the highest responsible, qualified bidder by competitive bidding as described above.

Section 2 also directs that leases should contain no more than 5,120 acres. Currently, competitively leased tracts are limited to a statutory maximum of 640 acres while noncompetitive leases are limited to a regulatory maximum of 10,240 acres. Most leases are between 1,000 and 1,500 acres. This provision would prevent the need for reducing the size of relinquished, canceled, terminated, or expired leases before reoffering.

Section 2 also directs that leases should have royalty rates of 12½ percent and have a primary term of 10 years regardless of whether they were leased competitively or not. Currently, competitive leases have sliding scale royalties varying between 12½ and 25 percent depending upon production. Noncompetitive leases have a fixed 12½ percent royalty rate. The purpose for the change is consistency between the two forms of leasing and to eliminate the uncertainty introduced in competitive bidding by the sliding scale. Further, competitive leases currently have 5 year lease terms while noncompetitive leases have 10 years. The lease term is lengthened to 10 years because it takes more than 5 years in many instances to put an economically feasible drilling area together and for consistency between the two forms of leasing. Finally, section 2 provides for a minimum royalty of "not less than" $1 per acre. This would eliminate the possibility of the minimum royalty being less than the rental rate on a lease.

Section 3 allows the Secretary to disapprove assignments if they involve a separate zone or deposit, are less than 640 acres, or contain an overriding royalty above the regulatory maximum. This section is aimed at preventing the "40 acre" merchant from leasing large tracts of land and then breaking that lease into many small parts which can be marketed to an unsuspecting public.

Section 4 provides for the cancellation of any lease by the Secretary unless the lease contains a well capable of production or is part of a unit plan or commutization agreement. Currently, only lands in a KGS are not subject to Secretarial cancellation. Since section 2 removes the need for KGS classification, the cancellation provisions are adjusted by this section to be consistent.

Section 5 provides that actions taken as a result of this Act are not "major Federal actions" for the purposes of implementing section 102 of the National Environmental Policy Act (NEPA). Lease issuance will continue to be subject to NEPA. Section 5 obviates the need to write a programmatic environmental impact statement, as well as impact statements for particular lease sales or for future regulation changes.

Section 6 amends the Alaska National Interest Lands Conservation Act to make leasing in Alaska consistent with that of the lower 48 States. Specifically, the favorable producing geological province (FPGP) is eliminated and replaced with the provisions of section 2. This does not affect in any way the current leasing program in the National Petroleum Reserve-Alaska (42 U.S.C. 6508) nor does it have any effect on the Alaska National Wildlife Refuge (16 U.S.C. 3141).

Section 7 describes "grandfather" provisions for lease applications pending at the time this Act is enacted. Paragraph (a) grandfathers pending simultaneous, noncompetitive applications and provides an orderly transition if the Department is conducting a simultaneous filing at the time this Act is enacted. Paragraph (b) grandfathers over-the-counter noncompetitive applications filed prior to July 1, 1986. The July 1 cut-off date will avoid a last-minute rush of lease applications. Paragraph (c) grandfathers pending competitive applications. Paragraph (d) grandfathers pending, noncompetitive applications in certain controversial areas only if the land are not leased competitively under section 2.

Section 8 requires issuance of regulations within 180 days of enactment of this Act. It releases the Secretary from preparing any environmental, economic, or small business impact analyses associated with the regulatory process. Finally, this section requires the Secretary to hold at least one lease sale under the provisions of this Act without having implemented regulations.

Section 9 of the proposed bill is intended to provide specific authority to regulatory and enforcement agencies to combat fraudulent practices involving the onshore oil and gas leasing system. These practices generally result from a company attempting to entice the public into using its services to file lease offers or trying to sell the public partial assignments of existing leases.

Paragraph (a) establishes that those who knowingly and willfully misrepresent the provisions of the Act to the *public* incur liability under the section. The types of misrepresentation which are listed are the most pervasive. Because the paragraph is written broadly, the misrepresentation must be made to the public. Private business dealings are not covered by this section. Paragraph (b) establishes liability for schemes organized to circumvent the provisions of the Act.

Paragraphs (c) and (d) contain the penalty provisions. Paragraph (c) establishes a civil penalty of not more than $100,000 for each violation and of other appropriate remedies such as a ban on participation in the onshore leasing program. The paragraph has the general civil penalty standard of "knew or should have known", but also bases liability on the level of knowledge of the recipient of the alleged misrepresentation. For example, an oil company would appreciate the high degree of uncertainty in

predicting oil potential and therefore misrepresentation to such a company would be extremely difficult to prove. The paragraph authorizes the Attorney General to bring the action, but this is not intended to prevent enforcement by other Federal agencies such as the Federal Trade Commission.

Paragraph (d) provides for criminal penalties of not more the $500,000 or five years in jail, or both.

Paragraph (e) provides joint liability between employer and employee, corporation and officers and principal and agent. Paragraph (f) provides all remedies are both concurrent and cumulative, and are in addition to any other remedies provided by law.

Paragraph (g) authorizes States to bring civil penalty actions under paragraph (c) in Federal court. A State is required to notify the United States of any enforcement action in order to facilitate coordination. The State keeps all fines collected. The paragraph also provides for coordinated enforcement action between States, or between a State and the United States, with sharing of fines collected.

RECOGNITION OF SENATOR PROXMIRE

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Wisconsin, Mr. PROXMIRE, is recognized for not to exceed 5 minutes.

Mr. PROXMIRE. Mr. President, I understand that, for technical reasons, it would be desirable to determine whether or not the electronic system is working and the quorum buzzers and so forth are in operation. So, for that reason, I ask unanimous consent, without losing my time, that I may suggest a very short quorum call for the purpose of testing the system.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The Senator from Wisconsin is recognized.

IS CURRENT DEFENSE FUNDING ADEQUATE TO MEET TODAY'S MILITARY THREAT?

Mr. PROXMIRE. Mr. President, over the past several weeks this Senator has spoken out here in the Senate many times on the clear superiority the United States enjoys militarily against the Soviet Union. Let's quickly review that lead. We have a decisive technology advantage. We have an overwhelming economic advantage. We have a huge geographic advantage. We have a large and growing advantage in the survivability of our nuclear deterrent. We have an unquestioned advantage in the quality of our weapon systems, both strategic and conventional. We have a major advantage in the military strength of our NATO allies as compared to the Warsaw Pact allies of the Soviet Union, and we have a well-documented advantage in the education, the skill, the training and the readiness of our military personnel.

There is not one single significant area of military power where a Soviet advantage is not more than offset by a closely related and corresponding advantage or series of advantages by the United States. What are the implications of this for the resources the Congress provides for our military forces this year? Can the United States continue to maintain a sufficient superiority over the Soviet Union without the massive increase in spending the President has called for? Mr. President, the answer is an emphatic "Yes."

How can we be sure the Soviet's won't take advantage of a letup in the military buildup by America to step up their own military spending? The answer is that we have the record. The Central Intelligence Agency and the Defense Intelligence Agency together testified before a panel of the Joint Economic Committee last month. I chaired that panel. For the first time in many years the two prime military intelligence agencies of our Government agreed. They agreed that during the past 10 years, a time when the United States has been increasing its military spending at an average annual rate of 3½ percent, the Soviet Union has increased its overall military spending only about half that fast, that is, by about 2 percent, and its procurement spending almost not at all.

Mr. President, I have a chart here that shows the enormous discrepancy in the last 10 years between the increase in procurement spending by the United States and the very, very slight increase by the Soviet Union. It is an enormous discrepancy. We have gained immensely in procurement compared to the Soviet Union in military procurement over the last 10 years.

Now, Mr. President, this funding is particularly noteworthy because the Soviet Union has been fighting a war in Afghanistan during the past 6 years that surely accounts for far more than the 2-percent Soviet military spending increase estimated by both our intelligence agencies. This suggests that the Soviet Union has actually been decreasing, not increasing, its military buildup versus the United States if we take the Afghanistan expenditures into account. So what does all this mean? It means that if the Congress follows the suggestions of the Senate Budget Committee, if it holds funding of the Nation's military forces this year to the increase in inflation, we will be able to maintain our current advantage over the Soviets.

For many years and through many administrations the prime argument used by Presidents and Secretaries of Defense to persuade the Congress to increase military funding has been that good old perennial, the Russians are coming. The Soviets are building up. We have to spend more to match the Soviets. Now as a former President used to say: "That dog won't hunt." All of us are aware that we live in a more dangerous world. The military threat has changed. The Soviet Union still plays a part, but the Soviet Union at the moment is not front and center. At the moment our eyes are focused on two areas: Central America is one serious military problem. Libya and international terrorism constitute the other. Do we need to increase military spending by billions of dollars to meet either of these newer threats? Let us consider each of them. In Central America the President has been emphatic and consistent. He has told the Nation and he has told the Congress repeatedly that he will not send American troops into Central America. Some Members of the Congress disagree with the President's judgment.

Some of our colleagues believe we will require American troops in Central America. Should the Congress appropriate more military funds to prepare for the possibility of a requirement of substantial United States military forces in Nicaragua or elsewhere in Central America? No. The President has not asked for such funding. If he does, the Congress should make that decision when the time comes and on the basis of the facts at that time. If necessary the Congress can pass funding legislation for Central American activities when the President calls for it. We should debate the wisdom of taking such an action only when the situation may require it and only if the Congress judges the situation does require it. There is no case for increasing military funding to meet the Central American situation unless the President specifically requires it.

How about more military funding to cope with the exploding threat of terrorism as posed by Libya and others? Again, the Defense Department and the President should make their case, if there is one, for increasing military spending to meet the terrorist crisis. To date the Defense Department has acted twice, vigorously and with very substantial force with respect to Libya. If the action cost significant additional military funding, the Congress has not been told about it. This country's elaborate and costly intelligence apparatus and its massive Army, Navy, Air Force, and Marines would certainly seem to have the resources to cope with the challenge of terrorism. If not, a more effective use of these huge resources, not a multibil-

lion dollar additional appropriation, should be our answer.

So can the Congress responsibly limit funding for the military to the rise in inflation in 1987? Mr. President, we can, indeed. We have a substantial military advantage over the Soviet Union now. It has been increasing dramatically in recent years. We can easily meet our newest military threats, in Central America and from worldwide terrorism, within the present military budget.

MYTH OF THE DAY: WHOLE HERD BUYOUT PROGRAM WILL COST TAXPAYERS ALMOST $2 BILLION

Mr. PROXMIRE. Mr. President, the myth of the day is that the dairy whole herd buyout program will cost American taxpayers almost $2 billion. You talk about a myth—this is really a whopper!

Where did the $2 billion figure come from in the first place? Total costs of the whole herd buyout program over its 5-year life will be $1.827 billion. This is the total sum required to compensate dairy farmers who agree to stop being dairy farmers for 5 years and ship their dairy cows and replacement heifers and calves off to slaughter.

But there is one big point that is being missed by the mythmakers, Mr. President. Assessments are being levied on each hundredweight of milk marketed by dairy farmers who remain in business, and this means that dairy farmers themselves are going to pay for about $700 million of the whole herd buyout program costs, thereby reducing the taxpayers' share to approximately $1.1 billion.

This fact alone demolishes the myth, but there is more to the story. Reliable estimates indicate that Commodity Credit Corporation [CCC] dairy product purchases over the 5-year term of the whole herd buyout program will amount to 33 billion pounds milk equivalent. What would happen in the absence of this program? Estimates are that CCC purchases in this same 5-year period would be around 80 billion pounds milk equivalent.

In other words, Mr. President, the whole herd buyout program will end up cutting CCC dairy product purchases to the tune of about 47 billion pounds milk equivalent. And what kind of dollar savings are we talking about here? With a total of about $15 per hundredweight of milk equivalent purchased to cover initial costs, reprocessing, storage, and interest, the total savings add up to over $7 billion.

Engaging in some simple arithmetic, if we subtract what it will cost the taxpayers to fund the whole herd buyout program—namely, $1.1 billion—from the $7 billion savings in CCC dairy product purchases resulting from the program's operation, we see that this program is going to save American taxpayers something in the neighborhood of $5.9 billion!

Just to add icing to the cake, Mr. President, we must add to these savings the amount in Federal income taxes attributable to the buyout program. Since many buyout participants will have income from livestock sales and buyout payments not offset by deductions, their Federal income tax payments will increase.

Where does this all lead? The dairy whole herd buyout program means a savings to U.S. taxpayers that exceeds $6 billion. Those who hang a price tag of almost $2 billion for this program around the necks of the taxpayers are truly perpetrators of a grand and glorious myth.

Mr. President, this is a picture of a beautiful Wisconsin dairy herd at this lovely time of year.

Mr. President, I yield the floor.

RECOGNITION OF SENATOR WEICKER

The ACTING PRESIDENT pro tempore. Under a previous order, the Senator from Connecticut [Mr. WEICKER] is recognized for not to exceed 5 minutes.

The Senator from Connecticut.

THE DEDICATION OF THE UNDERSEA HABITAT, HYDROLAB, TO THE SMITHSONIAN MUSEUM

Mr. WEICKER. Mr. President, I rise to remind my colleagues of an invitation each of them has received to attend a reception at the Smithsonian's Museum of Natural History to mark the opening of a fascinating and informative exhibit.

Hydrolab, the underwater laboratory that revolutionized oceanographic research by permitting scientists to live and work in the sea for lengthy periods of time, will go on public display on May 15 at the Museum of Natural History. This unique laboratory supported research efforts by marine scientists in waters off Florida and Grand Bahama Island for 11 years beginning in 1976.

The National Oceanic and Atmospheric Administration acquired Hyrolab in 1976 for its National Undersea Research Program, which is responsible for providing manned and unmanned vehicles for marine scientific research. The NOAA-owned Hydrolab operated for 9 years as an undersea habitat at a depth of 50 feet on the seafloor off St. Croix, U.S. Virgin Islands.

During two decades of work, Hydrolab served as the base for nearly 200 scientific missions involving more than 400 scientists from 10 countries, without a single mishap. During this time, more aquanauts were trained and more underwater hours were logged in Hydrolab than all other working habitats in the world combined. The scientists on Hydrolab missions lived on the sea floor for as long as 7 days without returning to the surface, entering and leaving the lab through a hatch located underneath the habitat. Wearing scuba gear, the aquanauts could then conduct research excursions to depths as great as 150 feet.

Some of the many research missions using Hydrolab included studies on the importance of seagrass beds as fish nurseries, the behavior of fish toward commercial traps, and the extraction of medicinal compounds from marine animals.

Research missions using Hydrolab ended in 1985. NOAA is now developing a more advanced undersea laboratory where scientists can work in the ocean environment. The new habitat is designed to be moved anywhere in the Caribbean, and provides three times the interior living and laboratory space of Hydrolab. It can be placed at depths up to 120 feet, and should be operational by the beginning of 1987. This habitat marks the beginning of what I trust will be a new era of advanced undersea research and exploration capabilities.

But what we have in the Hydrolab exhibit at the Smithsonian is the opportunity to see an actual habitat, and when you see it you will believe that this 16-feet-long, 8-feet-wide cylinder was the underwater laboratory that allowed scientists to perform important marine research. The information that those scientists collected from it gave the world tremendous insights into our undersea world.

So I hope my colleagues can take the time tomorrow evening to attend the reception and opening of the Hydrolab exhibit from 7 to 9 p.m. at the Smithsonian.

I yield the floor.

RECOGNITION OF SENATOR McCONNELL

The ACTING PRESIDENT pro tempore. Under a previous order, the Senator from Kentucky [Mr. MCCONNELL] is recognized for not to exceed 5 minutes.

The Senator from Kentucky is recognized.

THE FEDERAL TORT CLAIMS REFORM ACT AND THE GOVERNMENT CONTRACTOR LIABILITY REFORM ACT

Mr. McCONNELL. Mr. President, I am pleased and proud to introduce today, on behalf of the administration and President Reagan, two separate bills that address the continuing crisis

in our civil justice and liability insurance systems. These bills, drafted by the administration and endorsed by President Reagan, are parallel in many important respects to the bill I introduced in February to bring some much-needed and long-term relief to the availability and affordability crisis in the liability insurance systems. Both bills, like S. 2046, which I introduced earlier this session, impart a degree of predictability and fairness to the award of damages in tort litigation.

To that extent, both bills address in a fundamental way what is arguably one of the most serious problems facing most Americans today—the lack of affordable insurance to cover the risks of day to day life in our modern society.

Mr. President, I pointed out in February that we are facing a crisis of confidence in our court system, a system that no longer seems to balance the need for compensation for accidents and injury with the need for restraint in imposing liability for such accidents out of all proportion to the damage incurred or to the degree of fault of the defendant. Then as now, we run the risk that this crisis will become not only a crisis for our legal system, but also a crisis of confidence in our Government.

Worse, we run the risk that our civil justice system will become little more than a national lottery, with the winners being the lawyers and a few plaintiffs, with the rest of us, including the millions of American consumers who are priced out of the insurance market, the ultimate losers.

This is a problem that we cannot afford to ignore, Mr. President, and I have been quite vocal about it. I am pleased that the need for fundamental tort reform, in addition to possible changes in the insurance industry, is now generally recognized. Several weeks ago two former Attorneys General of the United States, Griffin B. Bell and Benjamin Civiletti, joined in the call for fundamental tort reform. Speaking at the national symposium on civil justice issues, sponsored by the Fordham University School of Law and the Insurance Information Institute, both of these distinguished former representatives of the Carter administration urged substantial reforms of our current system. In Mr. Civiletti's words, "we ought to have a lot of reform, not a little reform."

I agree wholeheartedly, Mr. President, and am gratified that such distinguished lawyers as these have put their influence behind the tort reform movement, as has President Reagan. Importantly, Mr. President, what this demonstrates is that tort reform is not a Republican issue, nor an insurance industry issue. On the contrary, as the thousands of people who have contacted my office over the past months have demonstrated, tort reform is for all Americans. Without it, what I and many others perceive as a fundamental imbalance in the civil justice system will continue to worsen until the system can no longer cope.

As I mentioned, I am introducing today two separate bills. The first deals with tort claims against the Federal Government under the Federal Tort Claims Act. The second deals with claims against Government contractors. Both bills, like the Litigation Abuse Reform Act that I introduced in February, seek to impose rational restrictions on the award of damages in tort actions in which the Federal Government has an interest. They do this by putting a cap of $100,000 on the award of noneconomic damages, including punitive damages. These awards are inherently unpredictable, and are limited only by the whim of the jury. Like my earlier bill, these limitations will not deprive any injured plaintiff of actual economic damages, such as past or future medical expenses, or loss of earnings.

Mr. President, both bills are explained at some length in separate section-by-section analyses, and I ask unanimous consent that they appear, along with the text of the bills, at the conclusion of my remarks.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

(See exhibit No. 1.)

Mr. McCONNELL. Let me point out two other aspects of the bills that are unlike my earlier legislation. First, both bills would eliminate the application of joint and several liability for those actions covered by the bills. Under current law, a defendent who is only minimally responsible for an injury can be held liable for the entire award of damages, while a defendent who is 99 percent responsible may pay nothing. This doctrine must be changed if we are to return to a sensible approach to tort law, and I am pleased that the administration has included this provision in its bills.

Second, both bills revitalize the concept of fault-based liability, which is perhaps the cornerstone of the administration's tort policy working group report issued earlier this spring. Fault has historically been the basis for liability in our civil justice system, and it is only recently that we have abandoned it in favor of universal recovery. Yet if the court system is to administer a comprehensive compensation system, as tort law has become, then it is appropriate that the Congress establish the reasonable parameters for that system. The return to fault based liability that these bills propose in the connection of Federal tort claims and Government contractor liability will do just that.

Mr. President, I am committed to bringing the liability crisis under control. The bills I am introducing today put us much closer to that goal, for they signal, for the first time, a united effort by the administration and the Congress. These bills are similar in most substantive respects to the administration's product liability reform recently introduced, and they are conceptually quite similar to my earlier legislation. Consequently, we will now see both the administration and the principal Senate committees with jurisdiction in the tort and insurance fields working on a common approach.

Mr. President, the distinguished chairman of the Judiciary Committee, Senator THURMOND, is an original cosponsor of this legislation, and I ask unanimous consent that a statement that he may wish to submit appear in the RECORD immediately after my remarks. I would urge my colleagues to join me in supporting these important measures, and to lend their support as well to the larger problem we face of solving the liability crisis.

The ACTING PRESIDENT pro tempore. Without objection, the request of the Senator from Kentucky is so ordered.

S. 2440

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Tort Claims Reform Act of 1986".

FINDINGS AND PURPOSE

SEC. 2. (a) The Congress finds and declares that—

(1) tort liability awards against the United States in recent years have become increasingly unreasonable and unfair;

(2) a reason for this development is the "deep pocket" of the United States, resulting in the United States being liable for damages attributable to the fault or responsibility of others;

(3) the sharply varying damage awards under the provisions of law commonly known as the Federal Tort Claims Act for similar injuries are arbitrary and fundamentally unfair to both the United States and to persons compensated under such Act;

(4) persons compensated under the Federal Tort Claims Act should not obtain double recovery from both the Government and collateral sources of compensation;

(5) it is in the public interest to ensure that damages paid by the United States to compensate for future economic loss be paid periodically to ensure that such money is not depleted before it is needed;

(6) plaintiffs' attorneys should receive reasonable compensation from their clients, but should not be permitted to reap a windfall at the expense of their clients and the American taxpayer from high awards or settlements paid by the United States; and

(7) the liability of the United States for claims filed in admiralty should be determined under the same standards and procedures as are established in the Federal Tort Claims Act in order to ensure that all persons seeking tort damages against the United States are treated uniformly.

(b) The purposes of this Act are to—

(1) place reasonable limitations on the tort liability of the United States to ensure

that damages awarded against the United States remain within reasonable bounds,

(2) prevent the United States from being held liable for the wrongdoing of others,

(3) prohibit double recovery of benefits at the expense of the United States,

(4) ensure that compensation for future economic losses is not prematurely depleted,

(5) limit the windfall of plaintiffs' attorneys from high damage awards or settlements, and

(6) make the standards and procedures for determining the liability of the United States in admiralty uniform with the standards and procedures of the provisions of law commonly referred to as the Federal Tort Claims Act.

LIMITATIONS ON LIABILITY

SEC. 3. Section 2674 of title 28, United States Code, is amended by—

(1) inserting "(a)" before "The United States", and

(2) adding at the end thereof the following:

"(b)(1) Except as provided in paragraph (2), the United States shall not be found jointly and severally liable, but shall be liable, if at all, only for those damages directly attributable to its pro rata share of fault or responsibility for an injury, and not for damages attributable to the pro rata share of fault or responsibility of any other person, without regard to whether such person is a party to the action, for the injury, including any person bringing the action.

"(2) This subsection shall not apply between the United States and any person with which it is acting in concert if the concerted action proximately caused the injury for which either the United States or such person is found liable.

"(3) For purposes of this subsection, 'concerted action' or 'acting in concert' means two or more persons consciously acting together in a common scheme or plan, resulting in a tortious act.

"(c)(1) An award of damages for personal injury or death to a person shall be reduced by the amount of any past or future payment or benefit covered by this subsection which such person has received or which such person is eligible to receive for the same personal injury or death.

"(2) As used in this subsection, 'payment or benefit covered by this subsection' means—

"(A) any payment or benefit by or paid for in whole or in part by any agency or instrumentality of the United States, a State, or a local government, or

"(B) any payment or benefit by a workers' compensation system or a health insurance program funded in whole or in part by an employer;

but does not include such payment or benefit that is, or by law is required to be, the subject of a reasonably founded claim of subrogation, reimbursement, or lien.

"(3) This subsection shall not affect the application under this chapter or section 1346(b) of this title of any State law which provides that damage awards shall be reduced by payments or benefits other than those covered by this subsection, or which reduces such damage awards by payments or benefits by an agency or instrumentality of the United States, a State, or a local government, or by a workers' compensation system or health insurance program even when such payments or benefits are, or by law are required to be, the subject of a reasonably founded claim of subrogation, reimbursement, or lien.

"(d)(1) No damages, other than damages for economic loss, shall be awarded in any action for damages against the United States which in the aggregate exceed $100,000.

"(2) For purposes of this subsection, 'any action for damages' includes any action or claim, including multiple actions or claims, for damages, and includes all plaintiffs and all defendants in any such action or claim, which arises out of or was caused by the same personal injury or death.

"(3) For purposes of this subsection, 'economic loss' means damages for past or future (A) expenses of health or other care; (B) expenses of rehabilitation; (C) loss of earnings; (D) loss of homemaker services; or (E) burial expenses.".

PERIODIC PAYMENTS OF JUDGMENTS

SEC. 4. (a) Chapter 171 of title 28, United States Code, is amended by adding at the end thereof the following:

"§ 2681. Periodic payments of judgments

"In any action subject to this chapter in which the damages awarded for future economic loss exceed $100,000, the court shall, at the request of the United States, enter an order providing that damages for future economic loss be paid in whole or in part by periodic payments based on when the damages are found likely to occur rather than by a single lump-sum payment. The court shall make findings of fact as to the dollar amount of plaintiff's future economic loss, and the amount, frequency, and duration of such periodic payments. The United States at its discretion may pay the judgment periodically or purchase an annuity for the same purpose. The judgment of the court shall be final, and, in the absence of fraud, shall not be reopened at any time to contest, amend, or modify the schedule or amount of such payments.".

(b) The table of sections for chapter 171 of title 28, United States Code, is amended by adding at the end thereof the following new item:

"2681. Periodic payments of judgment.".

ATTORNEY FEES

SEC. 5. Section 2678 of title 28, United States Code, is amended by—

(1) inserting in the first paragraph, after "25 per centum", the following: "of the first $100,000 (or portion thereof) recovered, plus 20 per centum of the next $100,000 (or portion thereof) recovered, plus 15 per centum of the next $100,000 (or portion thereof) recovered, plus 10 per centum of any amount in excess of $300,000";

(2) inserting in the first paragraph, after "20 per centum", the following: "of the first $100,000 (or portion thereof) recovered, plus 15 per centum of the next $100,000 (or portion thereof) recovered, plus 10 per centum of any amount in excess of $200,000"; and

(3) adding at the end of the first paragraph the following: "If the settlement or award of damages includes periodic payments, the amount recovered attributable to such periodic payments means the cost of the annuity or other monetary cost of the United States of the settlement or award, or, if the monetary cost cannot be determined, the present value of the periodic payments.".

LIABILITY IN ADMIRALTY

SEC. 6. (a) Chapter 171 of title 28, United States Code, as amended by section 4, is further amended by adding at the end thereof the following:

"§ 2682. Liability in admiralty

"Notwithstanding section 2680(d), the provisions of this chapter (with the exception of section 2680(k)), including the administrative claims procedures, the attorney fees limitations, and the exceptions and all conditions on the liability of the United States, shall apply to and be controlling over any claim or suit against the United States filed under the provisions of the Suits in Admiralty Act (46 U.S.C. 741 et seq.), the Public Vessels Act (46 U.S.C. 781 et seq.), and the Act entitled 'An Act for the extension of admiralty jurisdiction' (46 U.S.C. 740).".

(b) The table of sections for chapter 171 of title 28, United States Code, is amended by adding at the end thereof the following new item:

"2682. Liability in admiralty.".

SEVERABILITY

SEC. 7. If any provision of this Act or the amendments made by this Act or the application of any such provision to any person or circumstance is held invalid, the remainder of this Act and such amendments and the application of any provision to any other person or circumstance shall not be affected thereby.

APPLICABILITY OF AMENDMENTS

SEC. 8. The amendments made by this Act shall apply to all actions filed on or after, and all administrative claims pending on or filed on or after, the date of enactment of this Act.

EFFECTIVE DATE

SEC. 9. This Act and the amendments made by this Act shall become effective upon the date of enactment.

THE FEDERAL TORT CLAIMS REFORM ACT OF 1986: SECTION-BY-SECTION ANALYSIS

Section 1 sets out the short title of the Act as the "Federal Tort Claims Reform Act of 1986."

Section 2 sets out the findings and purposes of the Act.

Section 3 of the Act amends title 28 of the United States Code by adding several new subsections to section 2674.

Paragraph (b)(1) of section 3 states that except as provided in paragraph (b)(2), the United States may not be found jointly and severally liable. Rather, the United States may be found liable only for that portion of the damages directly attributable to its proportionate share of fault or responsibility for the injury.

Paragraph (b)(2) of the subsection provides that the prohibition against such joint and several liability does not apply in those cases where the United States and another person were acting in concert and where that concerted action was the proximate cause of the injury for which the United States or the other person was found liable.

Paragraph (b)(3) of the subsection defines "concerted action" and "acting in concert."

A new subsection (c) provides that any award for damages under the Federal Tort Claims Act is to be reduced by the amount of past or future compensation which the person has received, or is eligible to receive, from certain collateral sources. The subsection specifies the types of collateral sources covered by the subsection to be: (1) any benefit or payment provided by any agency or instrumentality of the United States, a State or a local government; and (2) any payment or benefit by a workers' compensation system or an employer-funded health insurance program. The subsection does not

apply to such benefits, however, to the extent that the provider of such payments pursues (or by law is required to pursue) a right to subrogation.

Paragraph (c)(3) clarifies that the subsection is not intended to affect the application under the Federal Tort Claims Act of any State law which allows for the reduction of damage awards for collateral sources other than those specified in the subsection, or which allows for such reductions even where a right of subrogation is pursued.

A new subsection (d) places a cap of $100,000 on the amount of non-economic damages (e.g., pain and suffering, and similar damages) that can be awarded against the United States. The subsection provides that the cap applies to all actions and claims which arise out of or were caused by the same personal injury or death. Under the subsection, non-economic damages consist of all damages other than damages meant to compensate for past and future health care or other expenses, the cost of rehabilitation, lost earnings, loss of homemaker services, and burial expenses. These specified damages, defined as "economic loss," are unaffected by the subsection.

Section 4 amends the United States Code by adding a new section on periodic payments.

The new section provides that where the damages awarded against the United States exceeds $100,000 in future economic loss, the United States may pay the future damages in periodic payments over the period of time and damages are found likely to occur. The court would make the determination as to the amount, frequency and duration of the payments, and the United States could then make the payments periodically, either by periodic payments directly out of the Judgment Fund or by purchasing an annuity to make the payments. The judgment would be final and could not be reopened or modified without a showing of fraud.

Section 5 of the Act would amend section 2678 of title 28 to establish a "sliding scale" for the attorneys' fees paid out of awards and settlements under the Federal Tort Claims Act. The percentage of the award paid out in attorneys' fees would decrease as the amount of the award or settlement increases.

Section 5 also would add a new sentence to section 2678 providing that where damages are to be paid periodically, the limitation on the attorneys' fees will be based on the cost of the annuity or the monetary cost of the payments to the United States or, where the monetary cost cannot be determined, on the present value of the periodic payments.

Section 6 of the Act amends title 28 by adding a new section 2682 to chapter 171. The new section makes the provisions of that chapter, as amended by this Act, applicable to all claims and suits filed against the United States under the following Admiralty statutes: the Suits in Admiralty Act, the Public Vessels Act and the Admiralty Extension Act. The section does not, however, apply the foreign nation exception (28 U.S.C. § 2680(k)) of the Federal Tort Claims Act to the liability of the United States in Admiralty, since such would be inconsistent with the international character of Admiralty liability.

Section 7 is a severability clause which preserves the balance of the Act if any portion of it is held to be invalid.

Section 8 provides that the Act is intended to apply to all actions filed on or after, and all administrative claims pending on or after, the enactment of the Act.

Section 9 provides that the Act will become effective on the date of enactment.

S. 2441

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Government Contractor Liability Reform Act of 1986".

FINDINGS AND PURPOSES

SEC. 2. (a) The Congress finds and declares that—

(1) the United States has a compelling interest in ensuring that its contractors are held to fair and reasonable standards of tort liability;

(2) Government contractors in recent years have encountered a rapid expansion in their tort liability which seriously interferes with their ability to provide many of the goods and services required by the United States;

(3) as a result, many Government agencies are encountering growing difficulties in obtaining goods and services essential to their responsibilities;

(4) where such goods and services are available, they often are only available at a far higher cost to the United States;

(5) among the programs most seriously affected are programs designed to protect public health and safety, and programs involving the national security;

(6) where liability of Government contractors is not based on fault or wrongdoing, such liability often impedes contractors from providing goods and services which the United States has determined to be in the public interest;

(7) the increasing unpredictability of tort law has made it difficult for Government contractors to assess their liability risks, and has made many contractors particularly reluctant to undertake activities that pose unlimited or indeterminable liability;

(8) the high transaction costs of the civil justice system, in which almost twice as much money goes to attorneys' fees and litigation expenses as to compensate victims, places an intolerable burden on the American taxpayer to whom much of such costs are ultimately passed; and

(9) these and other excesses in the civil justice system can and should be remedied through appropriate limitations on contractor liability.

(b) The purposes of this Act are—

(1) to place reasonable limitations on the civil liability of Government contractors to ensure that the United States is able to obtain the goods and services necessary to further the public welfare,

(2) to protect the American taxpayer from inordinate and unreasonable costs, and

(3) to limit many of the excesses of the civil justice system which subject contractors of the United States to unacceptable and unreasonable liability risks.

DEFINITIONS

SEC. 3. As used in this Act the term—

(1) "action" means a contractor product liability action, a contractor service action, or a combination of such actions;

(2) "contractor" means any person who has contracted with an agency or instrumentality of the United States to supply a product or service, and includes a subcontractor under such a contract;

(3) "contractor product liability action" means any action or claim, including a wrongful death action, involving the design, production, distribution or sale of a product, filed in Federal or State court seeking damages from a contractor for a personal injury or death attributable to the product;

(4) "contractor service action" means any action or claim, including a wrongful death action, filed in Federal or State court seeking damages from a contractor for a personal injury or death attributable to the provision of a service;

(5) "economic loss" means past or future (A) expenses of health or other care, (B) expenses of rehabilitation, (c) loss of earnings, (d) loss of homemaker services, or (E) burial expenses;

(6) "non-economic damages" means all damages other than damages for economic loss, and includes punitive or exemplary damages;

(7) "person" means any individual, corporation, company, association, firm, partnership, society, joint stock company, or any other entity, including any governmental entity;

(8) "product" means any object, substance, mixture, or raw material, including any part or combination of parts thereof, or an ingredient, which is intended for sale or lease to any agency or instrumentality of the United States;

(9) "service" means any work by a contractor performed for or on behalf of any agency or instrumentality of the United States, but does not include the design, production, distribution, or sale of a product; and

(10) "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, the Trust Territories of the Pacific Islands, and any other territory or possession of the United States, or any political subdivision thereof.

SCOPE

SEC. 4. (a) The provisions of this Act shall apply to all actions filed in Federal or State court on or after the date of enactment of this Act.

(b) The provisions of this Act shall preempt and supersede any State law to the extent such law is inconsistent with any provision of this Act. Any State law that provides for defenses or places limitations on a person's liability in addition to those contained in this Act is not inconsistent and shall not be preempted or superseded.

(c) Nothing in this Act shall be construed to create or vest jurisdiction in the district courts of the United States over any action subject to his Act.

(d) The provisions of this Act shall not apply to liability subject to section 170 of the Atomic Energy Act of 1953 (42 U.S.C. 2210).

FAULT-BASED LIABILITY

SEC. 5. (a) A contractor shall not be found liable for damages in a contractor product liability action subject to this Act—

(1) for any injury unless either (A) the contractor was negligent in the design, production, distribution, or sale of such product, or (B) the product was defective, and such defect rendered the product unreasonably dangerous;

(2) for any injury related to an unreasonable or unforseeable use or alteration of the product;

(3) for any injury related to the failure to provide an adequate warning or instruction as to any danger associated with the use of the product if such danger would be apparent to a reasonable person, or the danger is a matter of common knowledge; and

(4) for any injury related to a defect in the design of the product, or to a failure to provide an adequate warning or instruction as to any danger associated with the use of the product, unless at the time the product was made the ability to discover and to eliminate the defect or danger was available and capable of use according to engineering and manufacturing practices which were reasonably feasible in light of existing technology.

(b)(1) In addition to any other applicable defense or limitation provided in any provision of the applicable State law—

(A) a defective product may not be found unreasonably dangerous if the defect is the subject of an adequate warning, is apparent to a reasonable person, or is a matter of common knowledge; and

(B) any alteration of the product which is specifically prohibited or warned against, and any use of the product which fails to apply required safeguards or maintenance, shall be deemed unreasonable.

(2) Such contractor may not be found liable for any injury related to the failure to provide an adequate warning or instruction as to any danger associated with the use of the product if the use is unreasonable or unforseeable.

(C) A contractor may not be found liable for damages in a contractor service action subject to this Act unless the contractor is found to have been negligent in providing such service.

JOINT AND SEVERAL LIABILITY

SEC. 6. (a) Except as provided in subsection (b) of this section, joint and several liability may not be applied to any action subject to this Act. A contractor found liable for damages in any such action may be found liable, if at all, only for those damages directly attributable to the contractor's pro rata share of fault or responsibility for the injury, and may not be found liable for damages attributable to the pro rata share of fault or responsibility of any other person (without regard to whether such person is a party to the action) for the injury, including any person bringing the action.

(b) This section shall not apply between persons acting in concert where the concerted action proximately caused the injury for which one or more of such persons are found liable for damages. As used in this section, "concerted action" or "acting in concert" means two or more persons consciously acting together in a common scheme or plan, resulting in a tortious act.

LIMITATION ON NON-ECONOMIC DAMAGES

SEC. 7. (a) In any action subject to this Act, noneconomic damages may not be awarded in excess of $100,000.

(b) For purposes of this section, "any action" means all actions, including multiple actions, for damages which arise out of or were caused by the same personal injury or death, and includes all plaintiffs and all defendants in such action.

PERIODIC PAYMENT OF JUDGMENTS

SEC. 8. (a) In any action subject to this Act in which the award of damages for future economic loss exceeds $100,000, no contractor may be required to pay such damages in a single, lump-sum payment, but shall be permitted to make such payments periodically, based on a determination by the court as to when the damages are found likely to occur.

(b) The court may require such contractor to purchase an annuity making such periodic payments if the court finds a reasonable basis for concluding that the contractor may not make the periodic payments.

(c) The judgment of the court awarding such periodic payments may not be reopened at any time to contest, amend, or modify the schedule or amount of the payments, in the absence of fraud.

(d) This section shall not be construed to preclude a settlement providing for a single, lump-sum payment.

COLLATERAL SOURCES OF COMPENSATION

SEC. 9. (a) Any damages for personal injury or death awarded to a person in an action subject to this Act shall be reduced by the court by the amount of any past or future payment or benefit covered by this section which the person has received or for which the person is eligible to receive based on the same personal injury or death.

(b) As used in this section, "payment or benefit covered by this section" means—

(1) any payment or benefit by or paid for in whole or in part by any agency or instrumentality of the United States, a State, or a local government, or

(2) any payment or benefit by a workers' compensation system or a health insurance program funded in whole or in part by any employer;

but does not include such payment or benefit that is (or by law is required to be) the subject of a reasonably founded claim of subrogation, reimbursement, or lien.

(c) This section shall not preempt or supersede any State law which provides that damage awards may be reduced by payments or benefits other than those covered by this section, or which reduces such damage awards by payments or benefits by an agency or instrumentality of the United States, a State, or a local government, or by a workers' compensation system or a health insurance program even when such payments or benefits are (or by law required to be) the subject of a reasonably founded claim of subrogation, reimbursement, or lien.

(d) This section shall not apply to any payments or benefits received prior to judgment if such application would reduce the amount of income that would otherwise be considered under section 402(a)(17) of the Social Security Act.

ATTORNEY CONTINGENCY FEE AGREEMENTS

SEC. 10. (a) An attorney who represents, on a contingency fee basis, a person bringing an action subject to this Act may not charge, remand, receive, or collect for services rendered in connection with such action, an amount in excess of 25 per centum of the first $100,000 (or portion thereof) recovered, plus 20 per centum of the next $100,000 (or portion thereof) recovered, plus 15 per centum of the next $100,000 (or portion thereof) recovered, plus 10 per centum of any amount in excess of $300,000 recovered by judgment or settlement in such action.

(b) As used in this section, "contingency fee" means any fee for professional legal services which is in whole or in part contingent upon the recovery of any amount of damages, whether through judgment or settlement.

(c) In the event that such judgment or settlement includes periodic or future payments of damages, the amount recovered for purposes of computing the limitation on the attorney contingency fee shall be based on the cost of the annuity or trust established to make the payments. In any case in which such an annuity or trust is not established to make such payments, such amount shall be based on the present value of the payments.

ALTERNATIVE DISPUTE RESOLUTION

SEC. 11. (a) It is declared to be the policy of the United States to encourage—

(1) the creation, adoption, and use of alternative dispute resolution techniques to achieve the efficient, cost-effective, and expeditious disposition of civil disputes; and

(2) the modification of procedural and evidentiary rules to the extent feasible to accommodate such alternative dispute resolution techniques.

(b) In order to further the policies set forth in this section, the Attorney General shall provide to the Congress, within one year after the date of enactment of this Act, recommendations to implement such policies with regard to civil disputes filed in Federal court.

SEVERABILITY

SEC. 12. If any provision of this Act or the application of any such provision to any person or circumstance is held invalid, the remainder of this Act and the application of any provision to any other person or circumstance shall not be affected thereby.

EFFECTIVE DATE

SEC. 13. This Act shall become effective on its date of enactment.

THE GOVERNMENT CONTRACTOR LIABILITY REFORM ACT OF 1986:

SECTION-BY-SECTION ANALYSIS

Section 1 sets out the short title of the Act as the "Government Contractor Liability Reform Act of 1986."

Section 2 sets out the findings and purposes of the Act.

Section 3 sets out definitions of certain terms used in the Act. Among the terms defined are: "contractor," "contractor product liability action," "contractor service action," "economic loss," "non-economic damages," "product," and "service."

Section 4 establishes the scope of the legislation. The Act applies to all contractor product or service liability actions filed in Federal or State courts. The provisions of the Act supersede only those portions of State law which are inconsistent with the limitations imposed by the Act, and do not preempt or supersede State law providing for defenses or limitations on liability in addition to those contained in the Act. The section further provides that the Act does not create federal jurisdiction over actions not otherwise in Federal court. The section also provides that the Act does not apply to liability subject to the Price-Anderson Act.

Section 5, paragraph (a)(1), limits the liability of a contractor in a contractor product liability action to those cases where a contractor was either (1) negligent in the design, production, distribution or sale of a product, or (2) the product was defective, and that defect rendered the product unreasonably dangerous.

Paragraph (a)(1) specifies that a product cannot be found to be unreasonably dangerous if the defect is the subject of an adequate warning, is apparent to a reasonable person, or is a matter of common knowledge.

Paragraph (a)(2) provides that a contractor will not be liable where the injury caused by the product resulted from an unreasonable or unforeseeable use or alteration of the product. Any alteration of a product which is prohibited or warned against, or any use of the product without

the required safeguards, would be considered unreasonable.

Paragraph (a)(3) precludes liability for failure to warn of a danger where the danger is apparent to a reasonable person or is a matter of common knowledge. The paragraph also prohibits liability based on a failure to warn of a danger associated with an unreasonable or unforeseeable use of a product.

Paragraph (a)(4) of the section provides that a contractor may not be held liable for a defect in design or for a failure to warn of a danger associated with a product, unless at the time the product was made the ability to discover and to eliminate the defect or danger was available and capable of use according to engineering and manufacturing practices reasonably feasible in light of existing technology.

Subsection (b) of Section 5 provides that a contractor is not liable for damages arising from a service performed for the government unless the contractor was negligent in providing the service.

Section 6 bars the application of joint and several liability in a contractor product liability or service action, except in those cases where the injury was proximately caused by two or more persons acting in concert. Instead, a contractor may be found liable only for that portion of the damages directly attributable to the contractor's proportionate share of fault or responsibility for the injury.

Section 7, subsection (a), imposes a $100,000 cap on all noneconomic damages, including pain and suffering, emotinal distress, and punitive damages. The Act imposes no limitation on the amount of economic damages, such as medical and rehabilitation expenses and lost wages.

Subsection (b) specifies that the $100,000 cap applies to all actions for damages which arise out of or were caused by the same personal injury or death.

Section 8 provides that no contractor shall be required to pay damages for future economic loss in a single, lump-sum payment where the amount of economic damages awarded is in excess of $100,000. Instead, payments may be made periodically over the period over which the loss is found likely to occur.

If the court has a reasonable basis for believing that the contractor may not make the periodic payments, subsection (b) authorizes the court to require the contractor to purchase an annuity to make such payments.

The section also provides that the court order making such periodic payments is final and may not be reopened in the absence of fraud.

Section 9, subsection (a), requires that any award of damages under the Act shall be reduced by the amount of compensation received from certain collateral sources of income received for the same injury or death.

Subsection (b) specifies the types of collateral sources which are taken into account in reducing damage awards under the Act: (1) any payment or benefit provided directly or indirectly by any Federal, State or local agency or instrumentality; and (2) any payment or benefit under a workers' compensation system or employer-funded health insurance program. Awarded damages are not, however, reduced by these collateral sources of compensation where the provider of the collateral benefits pursues (or by law is required to pursue) a right to subrogation.

Subsection (c) clarifies that the section is not intended to preempt or supersede any State law which allows for the reduction of damage awards for collateral sources other than those specified in the section, or which allows for the reduction of damages for the collateral sources specified in the section even where a right of subrogation is pursued.

Subsection (d) provides that where a person has received certain benefits under the Social Security Act prior to the judgment, the section will not threat those benefits as a covered collateral source if by doing so the section would result in that person's income being reduced for purposes of determining the period of ineligibility for those benefits.

Section 10 establishes a schedule for the size of a contingency fee an attorney may charge under the Act. The amount of the contingency fee that may be charged decreases on a "sliding scale" as the size of the damage award increases. Under the section, no attorney may receive in excess of 25% of the first $100,000 recovered, plus 20% of the next $100,000, plus 15% of the third 100,000, plus 10% of any amount in excess of $300,000.

The section also provides that where a contingeny fee is based in part on an award of damages to be paid in future periodic payments, that portion of the fee shall be based on the cost of the annuity or, in the absence of an annuity, the present value of the payments.

Section 11 declares that it is the policy of the United States to encourage (1) the use of alternative dispute resolution techniques to reduce transaction costs and prevent delay in the civil justice system, and (2) the modification of rules of evidence and the rules of civil procedure to accommodate alternative dispute resolution.

The section provides that the Attorney General shall provide to the Congress within a year of the date of enactment recommendations to implement these policies for cases filed in Federal court.

Section 12 is a severability clause which would preserve the balance of the Act if any portion of it is held to be invalid.

Section 13 provides that the Act shall become effective on the date of enactment.

Mr. THURMOND. Mr. President, I rise in support of the civil justice reform legislation introduced by the distinguished Senator from Kentucky, Senator MCCONNELL. The two bills introduced today represent an important step in recognition of the need for reform in response to the explosion of tort liability in the United States. In the last decade, we have witnessed an erosion of the traditional concepts of fault-based liability, which have been gradually replaced by no-fault and strict liability theories. These developments have significantly increased the number of lawsuits that are clogging our court system and have contributed to the dramatic increase in the number and size of monetary awards.

While the underlying causes of these developments may be debatable, no one disputes the dramatic impact that expanded tort liability has on our lives. Liability, or the fear of liability, affects the price and types of products we buy, the manner in which we conduct business, and the price and availability of insurance. These legislative proposals provide a starting point for our consideration of much-needed reform of our civil justice system.

The Government Contractor Liability Reform Act limits the liability of government contractors to ensure that the United States can obtain necessary goods and services. The Federal Tort Claims Reform Act will place reasonable limitations on government liability. Since judgments against the United States must be satisfied with revenues obtained from the American taxpayer, this bill provides an important limitation. These proposals are based on the recommendations of the administration's Tort Policy Working Group, contained in their February 1986 report. I commend the distinguished Senator from Kentucky for taking the lead in introducing these proposals and his own tort reform bills. I look forward to reviewing these bills in the Judiciary Committee and further refining these proposals to ensure fair and meaningful reform.

□ 1040

ROUTINE MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of routine morning business until the hour of 10:45 a.m., with statements limited therein to 5 minutes each.

The Senator from Tennessee.

STRATEGIC DEFENSE INITIATIVE

Mr. GORE. Mr. President, I rise to begin a series of speeches, one each day, on the subject of the strategic defense initiative. Many people might think that the time for this is not yet ripe. But I am acting out of a sense of urgency, for, in my opinion, time is on the side of those who favor SDI. And that is not because the merits of their case are improving with time: quite the contrary.

Rather, it is because we are becoming ever more enmeshed in details, while the fundamental debate we need over the wisdom of this enterprise is postponed. My great fear is that our freedom to decide what shall ultimately be done about SDI will have quietly evaporated by the time we come to the point of exercizing it.

My comments in this first speech today will be directed toward what ought to be a simple matter: the problem of defining what SDI means. All of us, of course, are familiar with what has become the classic exposition of SDI, given in the President's very first speech about it, 3 years ago. We needed, he said, to find in our technology the means to render nuclear weapons "impotent and obsolete."

That phrase may have amused some experts, but without question it cap-

tured the imagination of millions of Americans. Their belief in the brilliance of our scientists and engineers and their trust in the President have amounted to a political mandate for SDI, which, I venture to say, everyone of us in the Senate has experienced in one degree or another through our contacts with the electorate.

But, as all of us know, a mandate involves an expectation that a certain thing, having been promised, will be produced. And that is the rub. What the President promised not once, but many times, is the enormously appealing notion of sanctuary from nuclear destruction—not just for ourselves, nor even just for ourselves and our allies, but even for the Soviets—and not just from ballistic missiles, but from nuclear weapons of virtually any kind.

It was a promise that we could abandon the balance of terror; that we could base our security in the future on the ability to defend ourselves from attack, rather than on our ability to threaten others with retaliation. No President has ever expressed a more sweeping agenda for escaping the nuclear threat since the days when it was still our policy to speak about general and complete disarmament.

Unfortunately, science and engineering—though no strangers to opportunism—do not, in the end, respect such commitments if the facts just are not there. And, to be fair, we were often told during the early days of debate about the SDI, that its sole purpose was to find out precisely whether a perfected defense was in the cards.

That was certainly the spirit of the so-called "Nitze criteria." While the President spoke to the man-in-the-street, Paul Nitze appealed to the experts: he said to them that they ought not to be alarmed at the scope of SDI. The strategic defense initiative would not only uncover whether the laws of physics would support the President's dream, but whether the laws of economics would as well.

In a memorable speech, he gave assurances that—even if scientifically feasible—SDI would never be erected, unless it also proved to be cost effective; that is, less expensive for us to expand our defenses than for the Soviets to expand their nuclear arsenal.

For many students of this subject, the Nitze criteria became an integral part of what SDI was all about. More than anything else, it helped to create a more specialized, but vital, mandate from those whose skepticism might have destroyed star wars' credibility had it been expressed promptly, rather than deferred.

With time, however, it has become increasingly clear that the odds against realizing the President's goals in the near future are nil, and that the Nitze criteria are an embarassment because they are too concrete. Unfortunately, unlike any other scientific exploration, SDI is under political orders to succeed: to find, at any cost, and at any stretch of the imagination, some set of technologies which will serve to bear the name, though not fulfill any of the hopes, of what the President promised.

And so, we have entered a strange dialog with many of those working on SDI. In unison, they tell us that their objective is to determine whether it is possible to realize the President's conceptions. But the viewgraphs they show us, and the studies they submit, are all pitched to something quite different: a difference not in degree but in kind.

What we see rapidly emerging is a version of SDI—let us call it "SDI II"—comprising near-term technologies. Bear in mind that these are technologies which admittedly cannot come close to defending the population. All they might do, if they work at all, is to complicate a Soviet first-strike against United States strategic assets. Which brings us, in effect, right back to where we were in the great ABM debate of the late 1960's: asking whether taking such a step would be more likely to stimulate, rather than calm, the strategic arms race.

Now, if this shift in emphasis had been communicated by the technicians to the President, and by him to the people, that would be fair enough. But the President in fact continues to talk about his version of SDI, while, with a knowing wink and a shrug, the specialists are saying in so many words: "That's for never-never-land; pay it no mind; star wars is what we say it is, because we understand what we are talking about, and the President doesn't." It is as if they hold the President's view of SDI in intellectual contempt.

The same thing holds true for the Nitze criteria, except there the SDI managers and technocrats do not have to worry about contradicting a President. They merely come before Congress, as Secretary Weinberger has already done, and declare that the concept of cost-effectiveness has no application where SDI is concerned: that the only choice for us is something called "affordability," which means, "If you want it bad enough, you buy it, even if you can't really afford it."

Now, there is nothing new about such tactics. In another context they are well known by the term "bait and switch." You advertise one model, and when the customer shows up he has a choice of something else that costs him more for less value. It is bad enough in the show-room; it is disastrous in the conduct of the political life of a democracy. It is the American people, the source of all legitimate power in our Nation, who are being deceived.

What the President sold the public was the notion of investing some money to see if science could pull off a near miracle. He is still offering the same promise. But what others have been forced to concede is that they can only offer something of much lesser importance.

Nonetheless, it is their intention to commit this Nation to their alternative irrevocably, while the present administration is still in office. And, if, in order to succeed in their purpose, they must destroy all other alternative courses of action for the country—be they in arms control or in the development of more stable strategic forces—they are zealous to do it.

Mr. President, we must recognize that the crisis of national decison concerning SDI is therefore upon us now, rather than a decade away, and that the need to debate this question at the level of first principles is therefore of the greatest urgency.

WALTER SHEFFER: A TRIBUTE TO THE RESILIENCY OF OLDER AMERICANS

Mr. KASTEN. Mr. President, the American population is aging. More than 16 percent of our citizens in 1980 were 65 years old or older. It is estimated that that percentage will expand to more than 27 percent by the year 2050.

And that segment of our population is itself aging. The 75-plus group currently is the fastest growing group of Americans. It is increasingly likely that many of our older Americans will have surviving parents * * * four generation families are becoming more and more common * * * almost half of all persons 65 or older have great-grandchildren.

In my home State of Wisconsin, almost 13 percent of the population is 65 or older.

Mr. President, statistics like these bring two thoughts to mind.

First of all, as a society we must be prepared to deal with the physical and emotional problems of aging. Not just through increased funding for Medicare and Medicaid, and not just by protecting Social Security benefits for older Americans, but through a heightened awareness of aging and all that aging means, both to the individual and to that person's family, loved ones, and colleagues.

Second, those statistics point to an increasingly large segment of the population that is underutilized by our society.

Granted, the last two decades have witnessed a growing sensitivity to the rights of elders. Organizations such as the American Association of Retired Persons, the Gray Panthers, the National Council of Senior Citizens, National Council on Aging, and others

have heightened public awareness both of the challenges facing older Americans and what older Americans have to offer.

And, yes, the Federal Government, recognizing the strength of elderly Americans, has developed several programs that enable seniors to help others. The Service Corps of Retired Executives [SCORE] attracts many retired business people who serve as advisors for community organizations and small businesses; Retired Senior Volunteer Programs [RSVP] provides assistance in hospitals, libraries, and schools.

But, most Americans over 65 no longer work. And while some 20 percent of elderly men and 8 percent of elderly women are employed, many others might choose to work had they good health and if potential employers recognized their talents.

Surveys indicate that older employees are as productive and efficient as younger workers and that they actually miss fewer days of work and have fewer accidents on the job.

When I say underutilized, Mr. President, I mean a segment of our population that too often is cast aside as being "too old to work."

But I also mean those elderly Americans who are packed off to a hospital, or nursing home, or retirement community and forgotten by "productive" society. Many of these citizens can, through rehabilitation, overcome physical or mental disabilities, fight through diseases and illness, and once again take control of their lives and interact with their fellows.

America's older citizens are one of our greatest untapped natural resources who with proper physical care, emotional guidance, and spirited encouragement, can continue to be highly productive.

So, today I also am thinking about how we can ease the process of aging, and of how we can collectively draw on the talents, the experience, and the knowledge of this increasingly large segment of our society.

Mr. President, May is Older Americans' Month and this is National Nursing Homes Week. While we should never lose sight of the significant contributions and special talents of the elderly, this is a good time to take notice of the accomplishments of these Americans and these special care facilities.

I offer as a tribute to the resiliency of older Americans the story of Mr. Walter Sheffer.

Walter Sheffer, now 67 years old, was a household name in my hometown of Milwaukee in the fifties, sixties and seventies. He was one of the preeminent portrait photographers in that Great Lakes community, and nationally and internationally. He counted among his clients and friends such famous Americans as James Stewart, Talulah Bankhead, and Henny Youngman.

He captured on black and white film the political and social leaders of his time. His creativity and expertise in the darkroom was the source of inspiration for a younger generation of photographers, many of whom he personally instructed at Milwaukee's Layton School of Art, and for those fortunate enough to see those portraits.

In his prime, Walter Sheffer's name was frequently in the papers. He was, in the words of a fellow Milwaukean, "a successful photographer in the world of the social elite."

But that was when he was in his prime. Walter Sheffer, like so many talented, gifted individuals, suffered a setback. His came in the form of severe arthritis when he was in his late fifties.

His doctors told him he would never walk again, that the best he could look forward to was life in a wheelchair. Seven years ago, ailing and desolute, he became a resident of the River Hills East Nursing Home in Milwaukee and abandoned any thought of ever again practicing his craft.

But Mr. Sheffer's story did not end in a wheelchair in the River Hills East home. For the overriding emphasis at River Hills East, as it is in so many nursing homes, is the rehabilitation of its residents. For many residents, it may mean simply learning again how to feed oneself, or how to bathe oneself, or how to keep a room clean.

For Walter Sheffer, it meant reopening the door he had closed to a talent Milwaukeans had enjoyed for years.

About 2 years ago, Mr. President, a Milwaukee artist by the name of Sue Bartfield went to River Hills East to do a project for Jewish Vocational Services, a group that works with the disabled by getting them involved in the arts. Among the River Hills East residents that she interviewed for this project was Walter Sheffer.

Sue Bartfield recognized who he was, and, with the guidance and encouragement of the nursing home staff, began to pull Walter Sheffer out of his shell and back into a productive life.

She worked with Walter daily, bringing him new clothes, driving him around town, talking to him about his craft and her interest in learning photography. Perhaps it was the teacher in Walter, perhaps it was the emotional union with a fellow artist, perhaps it was the special sharing between the generations, whatever it was, Walter responded.

One afternoon when Sue came to visit, Walter had his camera equipment out of storage. Another day, he had some of his old photographs there for her to see. Finally, he set up his dark room equipment and began in earnest to create again the stunning, emotion-packed photographs for which he had been so famous.

And suddenly what had been, what was only past glory, became a new reality for Walter Sheffer.

With the help of River Hills East, he worked through the pain of arthritis, determined not to be wheelchair-bound.

With Sue Bartfield, he embarked on a new photographic essay on older Americans. That essay, called "The Faces of Aging," premiered in Milwaukee in 1985 and since then has been shown in Illinois and California.

Tonight, Walter Sheffer and "The Faces of Aging" will be honored at a reception at the National Council on Aging's Art Gallery at 600 Maryland Avenue. I urge my colleagues to attend and see this critically acclaimed photographic essay.

His coming to Washington is especially meaningful to me, because Walter Sheffer photographed me with my brother and two sisters when I was in high school in Milwaukee. That photograph is in my office here on Capitol Hill.

Mr. President, Walter Sheffer's journey back to a productive life has been dramatic. He now plays organ for his fellow River Hills East residents at breakfast each day. He is the president of the home's gardening club. He takes pictures for the in-house newsletter.

And he has brought to the residents of this Milwaukee nursing home a new dignity as these men and women enjoy the anonymous acclaim of having their faces seen by countless Americans who are learning through them of the pain, the joys, the dignity of growing old.

The story of Walter Sheffer is a story repeated countless times in many nursing homes throughout America. Every day, men and women considered too old or too debilitated or too ill to care for themselves are becoming self-sufficient. Many even leave the nursing home to return to their families.

As one nursing home official told me, "The misconception about nursing homes is that people never get better; people just get old, go there and die. But our home is like a revolving door. They come, and they go back out again. And many of those who can't leave, for physical or emotional reasons, still can realize tremendous growth. They run the gift shop; they help serve the lunches * * * they become extremely active and they have responsibilities."

Mr. President, that is the fundamental lesson of the Walter Sheffer story. The acclaim his rehabilitation is receiving may not be typical for other older Americans, but it is an example of their resiliency, and of their ability

to find new avenues of expression and vitality.

I applaud Walter Sheffer and his successful struggle to return to a productive life. And in this national Older Americans' Month, I congratulate all elderly Americans for their contributions—past, and present, and future—to the strength of our society.

DEATH OF MARY GOHLKE

Mr. DECONCINI. Mr. President, I was saddened to learn of the death of Mary Gohlke. On March 9, 1981, Mary Gohlke became only the fourth person in history to receive a heart-lung transplant.

Transplant operations are commonplace today, but that was not the case 5 years ago. Mary, of Scottsdale, AZ, contacted my office when she was diagnosed as having cardiopulmonary hypertension. With the assistance of a then-new medication, the experimental operation could be done. That experimental operation added 5 years to Mary's life.

Doctors were skeptical and, previous to Mary, the longest living recipient of a heart-lung transplant survived only 23 days—the odds were not exactly in Mary's favor. But Mary wanted to live more than she wanted to die and she defied those odds. After her operation she became an outspoken advocate for organ donation.

Over 140 heart-lung transplant operations have been done since Mary's surgery. She has given more to this world than she could possibly take. Her bravery serves as a beacon to those in similar situations who face certain death, and has proven that with determination and strength, almost anything is possible. Mary's message was simple, "Don't quit!" Mary didn't quit; she fought until the very end.

OBANDO Y BRAVO SPEAKS OUT

Mr. DENTON. Mr. President, yesterday's Washington Post carried an article by the courageous archbishop of Managua, Cardinal Obando Y Bravo. Having met with the cardinal on several occasions, both here in Washington and in Managua, I wish to bring his writing to my colleagues' attention. I know him to be a humble man, a man of great courage, and a man of great faith, faith not only in God but in his people.

Furthermore, notwithstanding the naked efforts of the Sandinista regime to discredit and isolate him from his flock, Cardinal Obando Y Bravo has remained a hero to the repressed and abused majority in Nicaragua. His stalwart defense of freedom and his unwillingness to be manipulated by the political forces at work in Nicaragua has made with a true shepherd and a beacon of hope for the Nicaraguan people.

In his article, the cardinal clearly describes the precarious situation of the Catholic Church in Nicaragua. I am deeply moved by his statement:

I felt then that I ought to tell the truth and speak as a prophet speaks, even at the risk of being a "voice that crieth in the wilderness." I would explain to those that have ears to hear the sensitive situation of our Church and the serious danger we place ourselves in simply (by) speaking out.

He then does not hesitate to explain the reality of Nicaragua today, where thousands flee from Sandinista tyranny and those who remain suffer under, and I quote, "The most terrible violation of freedom of the press and of speech in the history of our country." In eloquent words, which become almost a plea, he calls our attention to "the progressive and suffocating restriction of public liberties of an interminable national emergency law and the continual violation of human rights."

Cardinal Obando y Bravo's call is for reconciliation, for the genuine dialog that has been categorically and repeatedly rejected by the Sandinista regime. Our task, in guiding United States policy toward Nicaragua, must be to help bring about that dialog.

The carginal carefully explains that he cannot comment on the content of U.S. policy, and why he cannot do so. We cannot use him to sanction our decision. Whichever side we are on, he will justify us. But the courageous cardinal has made sure that we will have the facts upon which to base our decision.

I only hope that my colleagues will choose to act for freedom in Nicaragua rather than to acquiesce in the further and permanent enslavement of the Nicaraguan people.

Mr. President, I ask unanimous consent that the text of Cardinal Miguel Obando y Bravo's article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

NICARAGUA: THE SANDINISTAS HAVE GAGGED AND BOUND US

(In an effort to illuminate the internal Nicaraguan scene while Congress is considering whether to resume military aid to the Nicaraguan contras, we invited Cardinal Miguel Obando y Bravo, archbishop of Managua, to give his views)

Your message asking me for an article arrived on Sunday, April 13, just as I finished celebrating Mass, and my first decision was not to grant your request. I must not confuse my pastoral mission with others, however worthy, such as politics or journalism, which are different from the mission that our Lord has entrusted to me. But, I am not obligated to keep silent either. As a man, as a citizen, as a Christian and even as a bishop, I have certain duties that I must fulfill, and these duties compel me to grant your request.

In the Mass I just celebrated, I had to announce, with great sorrow, that some of the offices of the Curia, occupied by the State Security Police since October 1985, had been confiscated by government order, despite the fact that they were built on land occupied by the Apostolic Nunciature.

In these offices there was a small printing press donated by the German Bishops' Conference, which was used to print our bulletin "Iglesia," a strictly intra-ecclesiastical publication. Both the press and the bulletin were seized by the State Security Police, along with all the files, including baptismal records and my own personal seal.

During the Mass, I read the pastoral letter which we, the bishops of Nicaragua, had written for Holy Week. The pulpit was now our only means of disseminating information, because the letter was totally censored and pulled from the pages of the newspaper La Prensa, the only private newspaper in the country, which attempted to publish it, but in vain. We believe that the reason for the censorship was that for the second time we called all Nicaraguans to reconciliation and dialogue as the only way to peace.

It was also announced that the Sunday bulletin with the prayers and texts for the day would not be available because it was confiscated and that my Sunday address would not appear in La Prensa, which, under the heading "The Voice of Our Pastor," had been published for many years in that newspaper, because it too had been censored, despite the special care taken to exclude from it anything that could serve as the remotest excuse for censorship.

"Radio Catolico," the only Catholic radio station, had been closed by the State several months earlier. It was at this point, when the Church was gagged and bound, that your request arrived.

The reading for the day, taken from the Acts of the Apostles, was about an incident that pricked my conscience. The Sanhedrin sent for Peter and John, intending to force them into silence. "But Peter and John said to them in reply: 'Is it right in God's eyes for us to obey you rather than God? Judge for yourselves. We cannot possibly give up speaking of things we have seen and heard' " (Acts 4:18-20).

I felt then that I ought to tell the truth and speak as a prophet speaks, even at the risk of being a "voice that crieth in the wilderness." I would explain to those that have ears to hear the sensitive situation of our Church and the serious danger we place ourselves in simply by speaking out.

I am reminded of the incident related in the 22nd chapter of Matthew: "Then the Pharisees went away and agreed on a plan to trap him in his own words." The method they chose was to appeal hypocritically to His spiritual authority, saying: "Master, you are an honest man, we know; you teach in all honesty the way of life that God requires. . . . Give us your ruling on this: are we or are we not permitted to pay taxes to the Roman emperor?" Jesus was aware of their malicious intention and said to them: "You hypocrites! Why are you trying to catch me out?"

History repeats itself, and this is the situation of the Nicaraguan Bishops, a situation that we denounced in our recent pastoral letter. An appeal is made to our moral authority and to our position as spiritual leaders of the people. We are asked to make a statement on an extremely sensitive political matter, but the real objective is not to seek moral guidance, but rather to use our statement to manipulate opinion.

If Jesus had answered that taxes should be paid to Caesar, He would have become a collaborator of the occupying Roman imperialists. If He had answered no, He would have become a criminal and an agitator who violated the laws of the land. If He had not answered at all, He would have lost His authority in the eyes of the people.

We are asked to issue a statement against U.S. aid to the insurgents. The state-controlled communications media, the organizations of the masses in the service of the system and their allies in the so-called People's Church and the minister of Foreign Affairs, Father Miguel d'Escoto, are all clamoring for our statement. But, as I mentioned, it is not moral guidance that is sought, since on several occasions our Conference of Bishops has already stated that it was against any outside interference, whether by the United States or the Soviet Union. (Pastoral letter of April 22, 1984). The intention is to use the statement to manipulate.

While no effort was spared in suppressing our earlier statements, this statement would be given international publicity. Not for the faithful—but for the U.S. Congress. But we are not pastors to the Congress of the United States.

If we were to support military aid to the insurgents, we would be persecuted as traitors. If we opposed aid, we would be accused of taking sides, which would automatically disqualify us as pastors to all of the people. If we remain silent, our silence would be considered guilty, the silence of complicity.

It can be argued that the U.S. Conference of Bishops has more than once issued statements on political matters. But there is one big difference: the U.S. bishops' statements are made freely, they are addressed to their own people and their purpose is to provide moral guidance. They can make such statements in complete freedom, and they can give their reasons, with full access to the communications media. Their words are not censored, twisted or distorted. But above all, their statements do not make them criminals and traitors to their country.

In Nicaragua any dissident from the Sandinista cause can be placed outside the law through an ingenious distortion of the truth:

The government, with all the media under its control, has taken great pains to convince the outside world that what is happening is essentially a direct attack by the United States on our country. That there is a war, open or covert, between the two countries, and, consequently, any form of assistance to the enemy, whether material or moral, is punishable by law.

Along the same lines, and with equal insistence, it rejects both the idea that an East-West conflict has made of our country a disposable card, a pawn in the game between the superpowers, and the reality of a civil war: an enormous number of Nicaraguans oppose with all their might the turn taken by a revolution that has betrayed the hopes of the Nicaraguan people and even its own promises.

To accept the reality of an East-West conflict would be to admit that the Sandinistas are just as much the tools of Soviet interests as the insurgent forces are of the United States. If this is accepted, aid from the one is equally as deplorable as aid from the other. It would necessitate the withdrawal of the Soviet and Cuban advisors, as well as the withdrawal of all U.S. Military aid.

If the reality of an internal conflict between Nicaraguans is admitted, the conclusion could not be avoided that the insurgent dissidents are now in the same position that the Sandinistas themselves once occupied, and, consequently that they have the same right that the Sandinistas had to seek aid from other nations, which they in fact did request and obtain in order to fight a terrible dictatorship.

To accept this would mean giving the insurgents the title of "rebels," a title that the Sandinistas proudly gave to themselves in former days.

The only possible argument against this is that unlike the Somozan dictatorship, which the Nicaraguan people fought almost unanimously, this is a democratic government, legitimately constituted, which places the interests of the Nicaraguan people above any ideological struggle or international cause, seeks the welfare and peace of the people and enjoys the support of an overwhelming majority.

Unfortunately, this is not true either. To accept this as the indisputable truth is to ignore the mass exodus of the Miskito Indians, who, on numerous occasions, fled in the thousands, accompanied by their bishop, Salvador Schlaeffer. It is also to ignore the departure of tens of thousands of Nicaraguan men and women of every age, profession, economic status and political persuation. It is to ignore that many of those who are leaders or participants in the counterrevolution were once leaders or members of the Sandinista front or were ministers in the Sandinista government. It is to ignore the lack of any justification for the most terrible violation of freedom of the press and of speech in the history of our country. It is to ignore the progressive and suffocating restriction of public liberties, under the cover of aninterminable national emergency law and the continual violation of human rights. It is to ignore the expulsion of priests and the mass exodus of young people eligible for military service. * * * None of this is true of a government that has the sympathy and general support of the people.

And this is what the Nicaraguan bishops wish to state:

"It is urgent and essential that the Nicaraguan people, free of foreign interference or ideologies, find a way out of the situation of conflict that our country is experiencing.

"We reaffirm today, with renewed emphasis, what we said in our patoral letter on Easter Sunday, April 22, 1984:

"Foreign powers are taking advantage of our situation to promote economic and ideological exploitation. They view us as adjuncts to their own power, without respect for our persons, our history, our culture and our right to determine our own destiny.

"Consequently, most of the Nicarguan people live in fear and are uncertain about the future. They feel deeply frustrated. They cry out for peace and freedom, but their voices go unheard, drowned out by militaristic propaganda on every side.

"We feel that any form of assistance, regardless of the source, which causes the destruction, suffering and death of our families, or which sows hatred and discord among the Nicaraguan people is reprehensible. To choose annihilation of the enemy as the only possible way to peace is inevitably to choose war."

The Church proposes reconciliation through dialogue as the only real solution, the only way to peace, and maintains, in the words of His Holiness John Paul II, in his visit to El Salvador in March 1983, that this dialogue ". . . is not a delaying tactic to strengthen positions prior to continuing a fight, but rather a sincere effort to respond, by seeking appropriate solutions to the anxiety, the pain, the weariness and the fatigue of the many who yearn for peace. The many who wish to live, to rise again from the ashes, to seek warmth in the smiles of children, free from terror and in a climate of democratic cooperation."

This is the text that was censored by the Sandinista government.

We are asked to issue a statement against aid, the Church and the position of our Conference of Bishops, which is trying to guide the Church through turbulent waters, more by the spirit than by the natural sciences and politics of man, which do not seem to hold any solution for such difficult problems. We are in a difficult situation, but we place our faith and trust in the Lord Jesus, the Prince of Peace and the Lord of History.

FINANCIAL DISCLOSURE OF SENATOR SIMON

Mr. SIMON. Mr. President, it has been my practice during my service in Congress and in previous public service to make available a detailed accounting of my income, assets, and liabilities. I ask unanimous consent that my financial statement for 1985 be printed in the RECORD for this purpose.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SENATOR SIMON DISCLOSES FINANCES

WASHINGTON.—For the 31st consecutive year that he has held public office, U.S. Sen. Paul Simon, D-ILL., has released a detailed description of his income, assets and liabilities.

Simon has been making the voluntary annual statements since he entered public service as a state representative in 1955. He followed the practice during eight years in the Illinois House of Representatives, six years in the Illinois Senate, four years as lieutenant governor and ten years in the U.S. House of Representatives. The listing predates disclosure requirements of state and federal law and continues to exceed those requirements.

Simon also made public the detailed financial disclosure report of his administrative assistant, former Congressman Floyd Fithian, available upon request.

The Illinois senator lists 1985 gross income for himself and his wife, Jeanne, totaling $162,416.67—up from the Simons' income of $112,770.35 in 1984. The figure includes his House and Senate salary, reimbursement for travel and other expenses, rental income, honoraria for appearances, and other items.

The Simons had assets of $398,673 and liabilties of $287,597 for a net worth of $111,076.

Income and net worth statement of Paul and Jeanne Simon—1985

Income:	*Amount*
Salary, U.S. Senate	$74,683.00

Gifts received of more than $25 value outside of immediate family members:

Steak knives from the United Transportation Union, value not known.,

Book, *Building a National Image*, from Robert Daniell of Hartford, Ct., value not known.

Four-volume *History of Illinois Democrats* from Stan Glass of Chicago, value not known.

Suitcase from Simon Senate staff and friends, value not known.

FOUR LITTLE PAGES

Mr. EAGLETON. Mr. President, the State of Missouri has a longstanding and diverse theatrical tradition. Each year, Missourians are treated to many outstanding new productions and revivals.

I rise today to extend to my colleagues a chance to sample some of that wonderful Missouri creativeness. Next week, in Washington, DC, there will be a presentation of the musical "Four Little Pages," a 25-minute celebration of our approaching constitutional bicentennial. A native St. Louisan, David Chambers, is the coauthor and lyricist of this work. "Four Little Pages," is sponsored by the National Park Service and is the first national program to inform and involve the public in the upcoming bicentennial.

St. Louisans and Washingtonians both are familiar with Mr. Chambers' work: He is currently producing director at the Repertory Theatre of St.

Louis, and from 1979 to 1981, he served as producer at Washington's Arena Stage.

I encourage my colleagues to add this production to their schedules. As the bicentennial of our Constitution draws nearer, it is appropriate that we pause for a moment to reflect on its meanings and to join in a public reaffirmation of its tenets.

NATIONAL SCIENCE WEEK

Mr. HATCH. Mr. President, yesterday at 1:30 e.s.t., 175,000 helium balloons filled with weather tracking cards were launched all over the country to kick off the celebration of National Science Week. Hundreds of schools, scientific associations, civic organizations, and corporations participated with the National Science Foundation in this balloon launch. These groups will also be sponsoring and participating in many other activities during the week to draw attention to the key role science, mathematics, and engineering play in advancing our quality of life and economic prosperity.

In my own State of Utah, a number of events to promote National Science Week have been organized. The School of Natural Science at Weber State College in Odgen, UT, is hosting a number of guest lectures, seminars, and tours for the public. The Hansen Planetarium is sponsoring a series of science demonstrations. Schools throughout the State are holding science fairs, inviting panels, and guest speakers, and having poster-design contests to emphasize the use of science in our everyday lives.

National Science Week encourages us, especially our young people, to become aware of and involved in science, mathematics, engineering, and technological fields. Although we as a nation have a strong scientific and technological base, as Mr. Erich Bloch, Director of the National Science Foundation, points out, "our future depends on our continuing progress in science and technology." As the world becomes more dependent on advanced technology, science, and engineering become more vital to our Nation's welfare and competitiveness. It is important to encourage our young students to study and pursue careers in the science and technology fields because they will be the scientists, researchers, teachers, and engineers of the future.

I want to thank my colleagues who have joined me in sponsoring this resolution. I would also like to congratulate the National Science Foundation, the various scientific and civic organizations, and the corporate sponsors, including the Amoco Foundation, Atlantic Richfield Foundation, the Dow Chemical Co. Foundation, Du Pont Co., Eastman Kodak Co., the General Electric Foundation, and IBM, for their excellent efforts in organizing the festivities and disseminating information about National Science Week. This will be an exciting and eventful week.

WILLARD MARCHING TIGER BAND

Mr. EAGLETON. Mr. President, I am pleased to rise today to honor a group of Missourians soon to embark on a trip to Great Britain. On Saturday, June 7, the Willard Marching Tiger Band will compete in the 43d Annual Hornchurch Competition held in Havering, England. They will be accompanied to the competition by some 200 of their friends and relatives from their hometown.

I can think of no one to better represent our country than this wonderful group. Willard is a small town in the southwest corner of Missouri. It has been a privilege to serve as their Senator. Their school system is recognized as one of the best in the State, and so too is their band program which is the recipient of numerous awards.

I invite my colleagues to join me in wishing the Willard Marching Tiger Band, its directors, parents, and friends every success at the upcoming Hornchurch competition. May their travels be safe and enjoyable.

SENATOR BYRD: ENERGY LEADER

Mr. MATSUNAGA. Mr. President, I rise to bring to the attention of my colleagues a singular recognition which our distinguished minority leader, Senator BYRD, received here in Washington last week. Along with a number of colleagues from this body and the House and several hundred business executives from throughout the country, I was most privileged to witness the presentation.

The senior Senator from West Virginia was the recipient of the 1986 Energy Leadership Award presented by the organization Americans for Energy Independence at a dinner last Wednesday evening. Former majority and minority leader of the Senate, Senator Howard Baker of Tennessee, serving as honorary chairman for the occasion, presented the coveted award to his former counterpart, whom he described as one "who more than anyone alive embodies the traditional and true spirit of the U.S. Senate."

The award is one which the minority leader richly deserves, for, as the award citation noted, Senator BYRD has seen our Nation's energy situation change "from innocent bliss to mindless panic to skeptical neglect" and through it all he has "maintained a steadfast belief in basic principles about the U.S. energy picture that would have served this country well, had they been heeded."

The citation further read, in part:

A country dependent on energy sources which may not be available in a crisis is a country with one hand tied behind its back. Senator BYRD has always supported a strong national defense that relies on adequate domestic energy resources that are benign and economic. For his steadfast support of this eminently sensible policy, Americans for Energy Independence is proud to honor Senator ROBERT C. BYRD with the Energy Leadership Award for 1986.

Mr. President, as the author of the Clean Coal Technology Program, recently enacted into law, the distinguished minority leader, the senior Senator from West Virginia, is indeed a champion of energy resources "benign and economic," and this Senator from the Aloha State, which serves as our Nation's energy laboratory of the Pacific, is proud to be his friend and colleague and to be under his leadership.

In accepting the award, Senator BYRD struck a very optimistic note about America's capability to meet its energy needs of the future. Mr. President I ask unanimous consent that Senator BYRD's remarks be printed at this point in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS OF U.S. SENATOR ROBERT C. BYRD UPON ACCEPTING THE 1986 ENERGY LEADERSHIP AWARD PRESENTED BY AMERICANS FOR ENERGY INDEPENDENCE

Mr. BYRD. Amidst all the media attention to the various aspects of the current oil situation, another event of far greater long-term signficance received little or no media attention. On April 18th, the U.S. Synthetic Fuels Corporation quietly closed its doors.

The establishment of a National Synthetic Fuels Program was an investment in an insurance policy for the next decade and beyond—to develop alternative energy sources from coal, oil shale, and tar sands. But the SFC was a victim of the allure of falling oil prices and of the same kind of mindless budget slashing that has cut other investments in America's future—such as education. The concern for the long-term energy situation was dissipated by falling oil prices and the disarray in OPEC, and near-term imperatives prevailed.

What about other energy alternatives for the future? The nuclear disaster at the Chernobyl powerplant in the Soviet Union may not be particularly reassuring to those pondering the fate of civilian nuclear power in the United States.

What about the use of coal, our most abundant fossil energy resource? The outlook for the use of coal in the United States may be very uncertain in part because of the pressures in the Congress to enact acid rain legislation. Congress would be most unwise to enact legislation which will not only devastate the economies of coal-producing States, but which may lead to a decline in the production of America's number one energy resource.

There is, however, hope for the use of coal. Congress has enacted the Clean Coal Technology Program which I introduced last year. This program could become the cornerstone of a far more prudent, less disruptive approach to the use of coal. The

Clean Coal Technology Program provides the basis for the commercial acceptance of new and advanced technologies to use coal in an environmentally acceptable manner. The use of such technologies will not disrupt traditional markets for coal, or force coal-mining communities to become ghost towns. Indeed, the Clean Coal Program will produce jobs, cleaner air, and energy for the future.

In Shakespeare's "Macbeth," the three weird sisters forecast Macbeths' downfall with the engimatic lines:

"Macbeth shall never vanquish'd be until great Birnam Wood to High Dunsinane Hill shall come against him."

Certainly, the potential dangers of today's energy situation are far more evident than were the dangers to Macbeth. I hope that, unlike Macbeth, we can better perceive the future—that we will use our past experience to force long-range energy policies on tomorrow's realities instead of on today's fantasies. Let us continue our efforts for America's self-sufficiency, so that we do not again fall victim to a crippling addiction to doubtful foreign energy supplies.

This is a national goal of considerable significance for the future of this Nation. And in that regard, I wish to commend Americans for Energy Independence for their efforts to educate Americans about the Nation's energy situation, and the importance of energy independence. Over the years, Americans for Energy Independence has been performing a public service worthy of note. You are to be applauded for your efforts on behalf of the energy security of the United States.

PRESIDENT MUBARAK AND CAMP DAVID

Mr. DECONCINI. Mr. President, John F. Kennedy remarked that the courage of life is often a less dramatic spectacle than the courage of a final moment; but it is no less a magnificent mixture of triumph and tragedy. He went on to say:

For without belittling the courage with which men have died, we should not forget those acts of courage with which men have lived.

There is no better description capturing the passing of the torch in leadership from Anwar Sadat to Hosni Mubarak. We were all aware of President Sadat's genuine commitment and diligent dedication to the Camp David accords and Middle East peace. He sacrificed his life for it. Recently, President Mubarak commented on the collapsed Arab summit talks, mocking the efforts of Syria and Libya to invoke a collective Arab defense pact when they supported Iran in its war against Iraq. He also criticized the Arab League for excluding Egypt since it made peace with Israel in 1978.

President Mubarak went on to defend the Camp David accords, saying:

God knows that deep in their hearts, the other Arab countries wished they had Egypt's courage to make peace instead of living in a vicious and impotent circle for the past 7 years.

I commend his determination and style. While we criticize Saudi Arabia for its invisible contribution to Middle East peace and label the Saudis a "moderate Arab state," President Mubarak explicitly conveys, articulates, and demonstrates Egypt's friendship to the United States and deserves our applause. In the most politically sensitive and volatile region in the world, President Mubarak epitomizes Hemingway's definition of guts—grace under pressure.

I would also like to share with my colleagues some comments made on an Egyptian radio station in Cairo. These specifically address Libya and Syria. I ask unanimous consent that the comments be printed in the RECORD.

There being no objection, the comments were ordered to be printed in the RECORD, as follows:

CAIRO RADIO STATION COMMENTS: LIBYA, SYRIA CRITICIZED

Even if there were heated foreign schemes aimed at weakening and paralyzing the Arab homeland, the cancer that infects the Arab world and burrows into its body, its flesh, and bones, is more destructive and devastating than any foreign plot. This cancer is Arab regimes such as Syria and Libya, who have fragmented and exhausted the Arab body.

The conspiratorial Syrian regime is turning fraternal Arab Lebanon into a feeding ground to satiate its narrow, regional hungers and desires. This regime is trying to achieve these things at the expense of Lebanon's unity, security, and independence, and also at the expense of the supreme interests of the Arab homeland and its vital issues.

The Lebanese and Syrian people are not the only Arabs living in a nightmare because of the policy adopted by the ruling regime in Damascus. The Libyan Arab people also are living under a grotesque regime, which is fond of terrorism and the color of blood. This regime is not only practicing terrorism against neighboring Arab states and peoples, but also against fraternal and friendly states throughout the world, and against the Libyan people as well. The Libyan people are not living with the most serious tragedy they have ever witnessed in their history. Qaddafi's regime has become a symbol of terrorism, of which he is fond and which he is practicing. This terrorism was the reason for the confrontation between the United States and Libya, in which many innocent Libyans fell victim. This confrontation was a serious escalation of the situation in the Mediterranean and it added more heat to the already serious and active fires in the region.

TRIBUTE TO CONGRESSMAN SILVIO CONTE

Mr. KENNEDY. Mr. President, on May 3, 1986, the Boston College Law School Alumni Association bestowed the St. Thomas More Award for 1986 on Congressman SILVIO CONTE—one of its most distinguished alumni. SIL CONTE is a man of rare talent and spirit whom I will always cherish as a friend and respect as one of the finest legislators and statesmen of our time.

SIL CONTE has truly distinguished himself throughout his long and brilliant career in public service. For 28 years, he has served the First District of Massachusetts with a dedication and diligence that is without equal.

His years at Boston College and Boston College Law School, which make him a distinguished "Double Eagle," fostered his tireless devotion to the cause of law and humanity.

Without question, SIL CONTE holds a very special place in the hearts of those of us who are fortunate enough to know him. He richly deserved this tribute from his alma mater.

In his honor, I ask unanimous consent that his remarks upon receiving the St. Thomas More Award be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS OF HON. SILVIO O. CONTE AT PRESENTATION OF SIR THOMAS MORE AWARD FROM BOSTON COLLEGE LAW SCHOOL, BOSTON, MASSACHUSETTS

Friends, alumni, distinguished guests—I humbly thank you for bringing me back here today to my beloved alma mater for this truly special award.

When I first learned that Boston College Law School had chosen me to receive the Saint Thomas More Award, its highest honor, I paused not only to reflect on this great gesture but on the man in whose name the award was given.

What I found in Thomas More's actions and writings brought the award very close to home and gave me pause to consider elements of myself, this institution and the Congress—my great love—that I had not considered before.

Sir Thomas More was first and foremost a man of fervent spirituality.

Thomas More believed in his God, he believed in moral righteousness, he believed in his heritage and, perhaps most importantly, he believed in himself.

These beliefs enabled him to relinquish a life of material wealth and accept a death sentence from the king he had nobly served.

When Thomas More refused to take the oath for the Act of Succession and Supremacy, he relinquished career achievement and material gain for a higher cause—his Catholic church and his Christian God.

It is this belief in a higher presence, a greater good, that enables us all to achieve notable things in life.

Bestowing upon me an award named for Saint Thomas More is the greatest honor I can conceive. To be mentioned in the same breath with this saint, scholar and truly great human being is overwhelming.

Like Thomas More, I too have searched many times deep within myself—during 28 years in the U.S. Congress—for answers to seemingly unanswerable questions.

It was my belief in the goodness within others and a confidence in my own abilities that helped me rise to the challenges of political office.

And it was a belief in God that made the toughest times bearable.

The inner cry for good is not always easy to answer and, as Sir Thomas More demonstrated, can exact a heavy price.

As a national legislator, I am often called on to make decisions that affect literally millions of people.

Those decisions, and there have been so many over the past 28 years, don't always come from experience or position papers or

from staff experts—or even from common sense.

Most times those decisions come straight from the heart.

I remember many long walks alone through the empty halls of the Capitol in the early hours of the morning searching for answers.

There was one particularly tough dilemma, in my second term, during President Kennedy's first year as President. The Rules Committee was controlled by conservative Southern Democrats and Republicans who were bottling up President Kennedy's legislative agenda.

He wanted to enlarge the Rules Committee so he could get his legislation to the House floor. It became a party issue with the coalition of Southern Democrats and Republicans against the expansion.

In those days, young Congressmen kept their mouths shut and did what they were told to do. Taking a stand on this particular issue—voting my conscience—would cost dearly.

I went to bed very late that evening, genuinely perplexed about what I would do on the House floor the next morning. I hardly slept at all and I got up very early, still tossing the issue over and over in my mind.

But on the walk from my office to the Capitol, that morning, I stopped for some reason at the reflecting pool near the west entrance. The morning sun was bright, the air still, and I could see my reflection clearly in the shallow waters of the pool.

What I saw went beyond the reflection in that pool to the very essence of my being. And I could see, at that moment, the answer to my quandary.

Something about that moment—something spiritual brought a new understanding, unleashed that inner strength that I had searched for. And I knew what I had to do—vote my conscience. I, and a handful of Republicans, voted to enlarge the Rules Committee and the rules were changed.

Thomas More showed us all that there is no accomplishment, no success, no achievement without undying belief and inner strength.

During an outstanding career which included positions as Henry VIII's Lord Chancellor and Speaker of the House of Commons, Thomas More maintained a spiritual devotion above all else.

That devotion guided him in his decision to turn from his king rather than compromise what he believed was just. Faced with a choice between allegiance to his king or his God, the choice was clear.

Thomas More's final words on the scaffold July 6, 1535 were "the king's good servant, but God's first."

I have to say that in spite of all the stories we know about Thomas More's spiritual integrity, what sticks in my mind is one almost insignificant little tale. As a young man, Thomas More fell in love with a beautiful woman. The problem was that she had an older sister who had not yet married and, as was the custom of the time, it was an embarrassment for the older sister not to marry first.

Because Thomas More didn't want to embarrass the older sister, he steered his affections toward her instead and later took her as his wife.

This act didn't change history and, isn't the stuff legends are made of, but it demonstrates what was in this man's heart. He was a kind man—always thinking about how his actions would affect the lives of others.

When I came to Boston College from the South Pacific, where I was stationed during World War II, I thought I had seen it all. But my years at BC and Boston College Law School taught me different.

During my years here, I learned about justice, teamwork, enterprise and gained the all-important ability to believe in myself. I learned how to seek good in bad situations, and how to find strength when I felt weakness.

I owe a special debt not only to the school but to three wonderful men who guided me along while I was here. And believe me, they had their work cut out for them.

Father Stephen Mulcahey, Dean of the College at the time, gave me my first big chance. He really took a gamble accepting me from a vocational school with experience as a machinist and a tour of military duty under my belt.

But during my years here he became a confident, friend and advisor to whom I turned in many times of indecision.

And there was Father JFX Murphy. Without his help, I just couldn't have made it.

One of the preconditions of my acceptance at Boston College, you see, was that I take four months of tutorial studies.

Father Murphy and I burned a lot of midnight oil over the Latin texts those four months but those long hours we toiled in St. Mary's Hall went far beyond Classics. The lessons he taught lasted a lifetime.

And I'll never forget the chance Father William J. Kennely gave me during my first year at the law school.

I had injured myself playing football and the class work and jobs just never seemed to end.

Those classes at 18 Tremont Street—with no air conditioning, sirens screaming, James Michael Curly yelling at the top of his lungs from the streets outside—seemed to go on forever.

Well, I ended up with a "D" in Professor O'Reilly's Future Interests course and Father Kennely took me aside one day.

"Silvio," he said, "I think you ought to consider another law school."

I looked him in the eye and told him that if I couldn't graduate from Boston College Law School, I didn't want to go on to any other.

I had been living in a ratty, roach-infested old boarding house for $5 a week down at 7 Bullfinch Place behind the Old Howard and hitchhiking home to Pittsfield on weekends to be with my wife Corinne and two children.

I had tended bar in Pittsfield on weekends, sold Christmas cards, and painted houses just to scrape by. I had forgotten what sleep was.

The work load, the responsibility and the pressure—everything—came to a head that afternoon in Father Kennely's office and I knew, then, that if he would just give me one more chance I could achieve anything.

I told him that if he let me stay I would make the school proud of me one day.

Father Kennely must have believed me because he gave me that second chance. I ended up graduating in the top third of my class and, as you have shown me today, I made good on my pledge.

Father Kennely and I became such good friends I even sold him on the idea of adopting a Boston College Law School class ring and ended up designing the shank for the ring, myself.

Boston College Law School educated me in matters of jurisprudence, but more important, it taught me to be a good, strong person.

As I stand here today, I can't help but think of Thomas More in his Tower of London cell 452 years ago looking out the window as spring breathed new life into the countryside.

Sir Thomas More was just a man that sunny May afternoon four-and-a-half centuries ago when he made the decision to die for what he knew was right.

He was just a man when he denied his King, he was just a man when the axeman spilled his blood, but he is a noble spirit today—a martyr to the Catholic Church and our Christian God—a rare example of belief in a greater good.

I have tried to be an example of what is good in government and what is good in the American legal system.

Decisions have not always been easy and I'd be lying if I said I wouldn't like to make some over again.

But what I can say in all truthfulness, is that I believed in what I was doing then as I believe in what I am doing today.

As the lone Republican in the Massachusetts delegation, I think you all understand the unique pressures I face on a daily basis as a party leader.

Boston College Law School helped me find strength within myself and helped define my belief in a greater good. And for that I will always be grateful.

Thomas More once wrote, "Only God beholdeth the heart." That may be true, but I'll tell you, Boston College Law School will always hold a special part of mine.

Honoring me here today in the name of a man made saint by my Church—a spirit that has transcended time as a symbol of glorious devotion and inner good—is a gesture I will treasure until the day I, too, pass to God's grace.

It is with humble, sincere thanks and great honor that I accept this award today. I owe a great debt to this institution and feel so very proud that you feel I have served your heritage well.

Your gesture is one I shall never forget.

Thank you all—from the bottom of my heart.

CONCLUSION OF MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Morning business is closed.

RECESS UNTIL 2 P.M.

The ACTING PRESIDENT pro tempore. Under the previous order, the hour of 10:45 having arrived, the Senate will now stand in recess until 2 p.m.

Thereupon, at 10:45 a.m., the Senate recessed until 2 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer [Mr. WALLOP].

□ 1400

PHARMACEUTICAL EXPORT AMENDMENTS OF 1986

The PRESIDING OFFICER. Under the previous order, the hour of 2 p.m. having arrived, the Senate will now resume consideration of S. 1848, which the clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 1848) to amend the Federal Food, Drug, and Cosmetic Act to establish conditions for the export of drugs.

The Senate resumed consideration of the bill.

Pending:

(1) Metzenbaum Amendment No. 1948, to amend section 412, of the Federal Food, Drug, and Cosmetic Act, relating to requirements for infant formulas.

(2) Metzenbaum Amendment No. 1949, to require the Secretary to enter into agreements to obtain information about the export of drugs.

(2) Metzenbaum Amendment No. 1950, to require that the same conditions apply to the export of antibiotic drugs as apply to other drugs.

AMENDMENT NO. 1948

Mr. METZENBAUM. Mr. President, I have an amendment pending at the desk, and that amendment has absolutely nothing to do with the U.S. export of unapproved drugs. But this is an issue which, for too long, has badly needed the attention of the Senate—the safety and the purity and effectiveness of the baby formula consumed by this Nation's infants.

The amendment I have offered, I am pleased to say, is cosponsored by Senator GORE and Senator SARBANES. Senator GORE, it will be recalled, was a leader in the House when that body first passed legislation in connection with the whole issue of infant formula.

The amendment now pending before us strengthens the Infant Formula Act of 1980, a law which was supposed to ensure that defective and, indeed, life-threatening infant formula would never again reach the grocery shelves.

Many Members of this body will recall that the Infant Formula Act was a bipartisan congressional response to a tragic incident, which jolted us into the awareness that we were not doing everything that we could to protect the lives and health of newborn babies.

It is with great disappointment, therefore, that I stand here today and say that the Infant Formula Act of 1980 is crippled—crippled, Mr. President, by weak regulations which allow baby formula to leave the factory without adequate testing for the safety and wholesomeness of the product. How can anybody justify that kind of situation? These regulations, Mr. President, leave this country's children vulnerable to the same type of tragedy that was experienced in 1979.

In 1979, the Syntex Corp., at that time a major manufacturer of baby formula, produced and sold a formula which subjected infants to what was later described as "a unique form of malnutrition."

There were 20,000 babies exposed to this defective formula. Some died. Some will suffer the formula's harmful effects for the rest of their lives.

So we responded with the Infant Formula Act.

What a wonderful day it was when we were at the White House and the little children were there with us. I am sorry to say that some of those little children were the very ones that had been adversely affected by the use of those infant formulas. But the fact is that they were there.

President Carter, I recall, took one child on his lap and said, "Here's the red phone. You can call Mr. Brezhnev."

It was a day of excitement, because we knew we were doing something right.

During the last days of the Carter administration, FDA wrote regulations to accompany this new law. The regulations were carefully crafted and quite detailed.

Problem solved—case closed, right? Wrong. Wrong, I am sorry to say, because those regulations were never put into effect. A new draft was produced. When those regulations were unveiled, it was quite apparent that the effectiveness of the Infant Formula Act had been gutted—totally reversed in its impact.

Let me quote from an internal memo by an FDA attorney which was uncovered by congressional investigators:

The FDA official called the rewritten regulations "hardly recognizable" and he stated that if a court challenge of the regs were made, "the agency [FDA] would probably lose." Those are his words, not mine.

The FDA lawyer went on to add that the new regulation "incorporates most changes desired by the industry * * * It seems very unlikely that any industry group will complain about the current draft * * *." And he was right.

That is not all. He continued:

Substituting general standards for specific rules has so altered the proposed regulation that the two drafts cannot be meaningfully compared section by section.

So now the new FDA had new regulations that met a curious criterion: Industry groups would not complain.

FDA's redrafted regulations said:

Each manufacturer may establish a (quality control) system that best suits its own needs.

Can you believe it? Can you believe that each manufacturer was to be permitted to establish its own quality control system that best suits the needs of the child? Oh, no. That best suits its needs.

But what about meeting the needs of infants? FDA Commissioner Arthur Hull Hayes, Jr., dismissed those concerns by saying:

We do not believe that the slight additional public health benefit that may be gained by adopting a very detailed rule can ge justified in view of the significant additional costs of such a rule.

I would say to Arthur Hayes, who is no longer at the FDA: "Mr. Hayes, I don't know if you have any grandchildren; but if you had grandchildren, you would be concerned about what the little babies are ingesting, and you would not be so ready to talk about the slight additional public health benefit that may be gained by adopting a very detailed rule if it were your grandchild who was involved and possibly put in danger of its life or the kind of future life it might have, assuming that it lives."

There you have it. The FDA Commissioner came up with some half-baked cost/benefit analysis and the babies lost out to the lobbyists. That is all this amendment is about.

Where does all this leave us today in terms of the safety of baby formula? In spite of a law which could have kept even a single defective can of formula from reaching consumers, well over 3 million cans of dangerous formula have had to be recalled. Why? Because inadequate testing allowed bad formula to leave the manufacturing facility and end up in our homes.

Do you hear that? Three million cans of dangerous formula have had to be recalled.

The amendment offered by Senator SARBANES, Senator GORE, and myself simply sets up the kind of quality control system that we voted for in 1980. It plugs the holes in the current regulations and will make parents secure in the knowledge that the formula they give their babies has been tested and is safe.

This amendment is quite similar to a bill which I introduced on January 24, 1985.

The provisions of the amendment are as follows. I want to repeat that this amendment, in all candor, is not directly in point with respect to the drug export bill. But we needed an opportunity to present this issue on the floor of the U.S. Senate, and it has nothing to do, actually, with the drug export issue. However, it is important enough and it is related enough, when we are talking about health concerns of children, that it belongs in this bill. But it is not directly in point with respect to the drug export bill.

What does the amendment provide? It provides:

First, each batch of infant formula must be tested for each essential nutrient before distribution to make certain the formula is free of harmful or unsafe substances.

Second, infant formula samples would be periodically tested throughout the formula's shelf life.

Third, each manufacturer must retain the records pertaining to the production of infant formula for 1 year after the expiration date, so that FDA investigators can act quickly in the event of an accident.

Fourth, each manufacturer must maintain a file of complaints concern-

ing their products and make that file available to the FDA.

Fifth, new infant formulas would not be introduced on the market unless an application has been submitted to FDA and approved by the Secretary of Health and Human Services.

That is the guts of the amendment. You could not introduce a new infant formula on the market unless you made an application to the FDA and it has been approved by the Secretary of Health and Human Services.

Sixth, FDA would be given a stronger role in a recall of a defective formula because, even though it had been tested, it is very possible it could go into the marketplace and be found to be defective. Today, FDA must convince the manufacturer to voluntarily recall the product.

The children are ill. They are suffering. They are getting sick. Some may be dying. And under today's regulations the FDA must go to the manufacture and say, "Please, Mr. Manufacturer, won't you voluntarily recall the product," because FDA has no authority to recall an infant formula no matter how dangerous.

Last, in the event of a recall, a notice would have to be posted at the point of sale in order to better warn parents.

Mr. President, that is the totality of the amendment. It simply requires manufacturers to test the infant formula they produce before they ship it for distribution. That is not much to ask, considering what we are risking today.

I wish to point out to my colleagues that the provisions of this amendment are much less detailed than the FDA's original proposal. But if adopted, at least we would know that every batch of formula has been checked for nutritional content and is free of contaminants.

Each Member of the Senate yesterday received a letter from a group called Formula.

The founders of this group, Lynn Pilot and Carol Laskin, know about the dangers of unsafe baby formula through their own tragic personal experience—their two boys were harmed by a defective formula.

They stated in that letter:

> We believe these amendments will provide protection for our nation's most precious resource—our children.

And they say:

> On behalf of all parents, we strongly urge you to support these infant formula amendments.

Let me demonstrate exactly the kind of risks we are taking, Mr. President. In January and February of 1982, Wyeth Laboratories produced an infant formula that contained absolutely no vitiamin B-6. A mistake was made in the mixture of the formula, but the company's quality control system did not catch it.

According to the FDA:

> Wyeth failed to exercise reasonable supervision to ensure proper handling of raw materials * * * Wyeth allowed poor raw material handling practices to develop and continue without adequate controls thereby creating an environment conducive to errors * * *.

That is the language of the FDA.

So 4 million bottles of baby formula were produced without vitamin B-6—a situation that threatened to cause serious health consequences or death.

FDA said.

> The total absence of vitamin B-6 in the diet of an infant for more than a few weeks may cause convulsions and, in more serious instances, brain damage. A vitamin B-6 deficiency represents a severe hazard to infants who receive formula as a sole source nutrition.

By accident, Wyeth discovered the B-6 problem but not before 2½ million bottles were distributed nationwide. According to FDA investigators, if Wyeth had not made this fortuitous discovery, its infant formula products could have had catastrophic consequences.

Mr. President, Wyeth has not been the only manufacturer to produce defective formula since 1980. Companies like Mead Johnson, Abbott Ross, and Gerber have also failed to catch harmful baby formula before it hit the stores.

Yesterday, I read part of the letter from the formula group that I just mentioned a few moments ago, and I listed about 12 separate instances where defective formula had been put into the marketplace by a large number of companies, and I am sure the CONGRESSIONAL RECORD will speak for itself as to each of the instances and the amount of defective formula that has been put into the marketplace.

Mr. President, we worry so much today about tampering of consumer products, and yet we are not doing everything we can to make sure that baby formula is wholesome when it leaves the plant. That is absurd.

In a 1983 incident, another manufacturer of infant formula had private laboratory results confirming that its product was defective. Listen to this. But the company went ahead and authorized the sale of the formula anyway.

And despite the fact that FDA had information that the formula was defective on August 5, 1983, the recall did not get started for over 2 months! Why? Because FDA recall regulations are completely inadequate.

Mr. President, I am certainly not the only one concerned with the current situation. At a conference on infant formula last year, an FDA official noted that a total of five infant formulas had to be recalled in the preceding year, and explained that "poor quality control resulted in the marketing of a hazardous infant formula."

He went on to say that FDA is worried because "some quality control plans seemed to be poorly organized in an overall sense. This, of course, makes it more difficult for us to make accurate assessments of the job that manufacturers are doing to assure that nutrient requirements are being met."

That statement alone ought to be enough to convince us that we are walking a tightrope with respect to the lives and health of America's infants. The fact that we allow baby formula manufacturers to get away with sloppy safety procedures is absolutely unacceptable.

If we do not do something more to strengthen the regulations of the Infant Formula Act, we will see another infant formula disaster. It is as simple as that.

Why should we wait for another disaster before we are compelled to act? Too often, Mr. President, we find ourselves reacting to a tragedy, rather than acting to prevent a tragedy.

Mr. President, there is simply no margin for error in the production of baby formula. An infant relies on the formula to sustain life and provide the proper nourishment at a time of rapid physical and mental development.

It is time to end FDA's policy of "let the baby beware" and instead to institute the safeguards our children deserve.

I want to repeat to my colleagues that this amendment is not directly in point with respect to the drug export bill. But I believe it to be so urgent and so much a matter of an emergency that I deemed it appropriate to offer it on this bill.

I say to my colleagues in the Senate that if you have any children, or if you have grandchildren, and if you are concerned about their health, if you are concerned about what is going in their little bodies, then I cannot see any reason that anybody can justify voting against this bill.

I would hope, frankly, that my colleague who is managing the bill, from the State of Utah, Senator HATCH, would see fit to accept this amendment. This amendment is right. To vote against this amendment is to vote against the infants born today and tomorrow and in our future. Please do not let them down.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

□ 1420

Mr. METZENBAUM. Mr. President, I wish to say to my colleague from Utah, just as soon as he has concluded his remarks I am prepared to vote.

Mr. HATCH. Mr. President, as I indicated in my remarks yesterday, the first problem I have with this amendment is that it has nothing to do with pharmaceutical export amendments of 1986. It relates to an entirely different subject area, that of infant formula, and would require the Members of this body make judgments on matters for which they cannot have been well briefed. It seems to me that we have our hands full with the 20 or more amendments by the Senator from Ohio which do relate to the subject matter of the bill, without trying to shift our attention to another portion of the Food, Drug and Cosmetic Act.

More importantly, this amendment is the subject of legislation, S. 265, which has not been heard in committee and has not received a vote by committee members. As chairman of that committee, I object to its being considered as an amendment on this bill. This is not merely a matter of form. As my comments will being out, the issues raised by this piece of legislation are complex and important, and involve scientific evidence and judgment on that evidence which should not be made in the first instance on the floor of the Senate looking at final passage.

For reasons which I will spell out, the Food and Drug Administration will not support this proposal.

There is no reason to change current law. FDA feels the Infant Formula Act of 1980 is working well and has been no evidence that supports change.

Since the passage of the Infant Formula Act of 1980, there have been no known cases of infants in the United States who have been adversely affected by nutrient deficiencies in infant formula. Unlike the preenactment era, problems that have occurred have been resolved quickly with no harm.

Since 1980, there have been eight infant formula recalls. Three involved established manufacturers of infant formulas. The first of these, which occurred before the quality majority of cans of infant formula that have been recalled since the passage of the Infant Formula Act of 1980. This recall involved a quality control failure that presumably would have been detected and corrected under the testing requirements in the current regulations. The second recall involved a reduction in shelf-life potency that was detected and dealt with by the manufacturer before the nutrient levels fell below the minimum levels allowed by the Infant Formula Act. The third involved a deficiency in a permix that had been certified as being free from any defects by the premix supplier. The deficiency was caught quickly enough to prevent undue exposure to any infant.

The remaining five recalls involved aspiring manufacturers of infant formula or foreign manufacturers whose products recently appeared in U.S. territory in the Virgin Islands without prior notification to FDA. The aspiring manufacturers generally disregarded the requirements of the Infant Formula Act and presumably these recalls would have been necessary under the Senator's amendment as well as under current law. The foreign products may have reached U.S. territory from another island in the area without the knowledge of the manufacturer.

In addition, to these product recalls, there has also been an unusual recall of literature involving a Japanese soy-based product that was not labeled as being an infant formula. Literature associated with the product suggested that it could be useful as an infant formula for infants who had feeding problems with milk. A child in Canada reportedly developed rickets and other nutritional deficiency problems as a consequence of these representations: FDA was able to obtain a recall of the literature. But again, it is doubtful this kind of occurrence could be prevented by new legislation.

In summary, the Federal regulation of infant formula appears to be working. FDA has not been able to identify any systemic problems in the existing regulatory framework that would require the substantial modifications proposed by the Senator's amendment.

PREMARKET APPROVAL

The current system under the Infant Formula Act is one of notification by manufacturers to FDA. This amendment would replace that system with a premarket approval requirement. Make no mistake—this is a major legislative change. This premarket approval system is much more time consuming and burdensome and consumes much more agency and industry resources. FDA does not feel that it would be able to live up to the time lines set forth in the amendment, and based on its record in the new drug area I would have to agree.

More importantly, we recognized the potential impact of such a system when we specifically rejected the Federal pre-clearance of infant formula, in favor of the current notification requirement, during our consideration of the Infant Formula Act of 1980. The Labor and Human Resources Committee report on that act concluded that:

> The notification requirement . . . will go far to assure consumers a reasonable standard of safety while not unreasonably burdening the industry through a potentially cumbersome system of marketing clearances.

We are now asked to take the step that we rejected then. To justify such a change, there should be some compelling reason, but FDA has stated:

> Our experience so far, however, has not revealed any deficiencies in the existing notification system that would require a premarket approval system to correct.

Let me just take a few minutes to talk about the requirement of testing every batch in its finished form for every nutrient. FDA's current testing regulations are grounded in reason and common sense. They recognize that there is no virtue in testing for testing's sake. They require that each batch of infant formula be analyed for all but 6 of the 29 statutorily required nutrients, either at the raw material stage, the in-process stage, or the finished product stage. The other 6 nutrients must be tested for only at 3-month intervals.

However, there have been no documented cases—ever—of deficiencies in normal infants of biotin, choline, and inositol, three of the nutrients. And vitamins D, and K, two of the others, are well-retained in the human body. Finally, the vegetable oils now used as fat sources are rich in linoleic acid, the final nutrient. This, combined with the lack of product deficiencies with these nutrients over the past few years, convinces FDA that current 3-month testing requirement for these nutrients is adequate. On the other side of the coin, analyses for these nutrients are unusually time consuming and expensive, and would increase the price of the infant formula, and that would be very, very tragic for millions of low-income people all over the world, especially since there is no reason to put them through this and there is no reason to have this type of added expense.

Further, testing the formula at the finished product stage would require the manufacturer to warehouse the entire product batch during testing at considerable expense, since some of these tests take months, and that expense would inevitably be passed on to the consumer.

QUALITY FACTORS

The amendment would require the Secretary to issue regulations establishing quality factors for all the required nutrients. This amounts to a mandatory setting of standards for bioavailability. Bioavailability of nutrients in infants is a far different and more variable matter from bioavailability in new drugs, for example. The scientific community has never accepted standards for bioavailability of these nutrients, with the sole exception of protein. And FDA has issued a quality factor for protein. In short, the Infant Formula Act of 1980 gives the Secretary discretion to establish quality factors, and the Food and Drug Administration has remained sensitive to that authority, using it when it became appropriate. But there is no sense in forcing the Government to set standards which are still matters of scientific uncertainty. The important thing is that it is known that some forms of nutrients are more bioavailable than others, and that all infant formula

manufacturers are using the most bioavailable forms available. Thus I don't see what improvement the adoption of this amendment would bring for our children.

What we do not need at this time is new legislation that has not been tested by the committee process for products that literally have been covered by legislation passed just 5 years ago, legislation that is working very, very well, legislation that is protecting infants all over the world, and legislation which protects them at the most reasonable cost.

Now, the Senator, of course, feels very deeply about these type of amendments and I think he does feel deeply about labeling and many things that he argues about. Sometimes he is right. In this particular case, he is not right. We should not have to amend the 1980 act at this time on this bill when there have not been hearings and there is no evidence that it needs to be amended, other than the Senator's feelings.

To be frank with you, this is not the thing to do on this particular bill. So, with that, I move to table the amendment and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HATCH. Wait just a second. Let me withdraw that.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The motion to table is not debatable.

Mr. METZENBAUM. Mr. President, I understand that. But I am going to ask my colleague to not go forward with the motion to table. He has just spoken and I want to respond to his remarks.

Mr. HATCH. Of course. I withdraw my motion to table.

The PRESIDING OFFICER. The motion is withdrawn.

Mr. METZENBAUM. Mr. President, the chairman of our committee, Senator HATCH, made the point that there have been no hearings and because there have been no hearings it is inappropriate that we go forward with an amendment of this kind. But let me point out to my chairman that on July 20, 1983, I, Senator KENNEDY, Senator JENNINGS RANDOLPH, Senator CLAIBORNE PELL, Senator DONALD RIEGLE, Senator SPARK MATSUNAGA, and Senator CHRISTOPHER DODD wrote to him asking for hearings. At that time, we said:

> As members of the Labor and Human Resources Committee, we urge you to convene oversight hearings on these regulations as a matter of urgency.

That was in July of 1983.

If that were not enough, in August of 1983, I wrote again to the chairman of the committee in which I said:

> I would like to inform you that there is yet another recall of adulterated infant formula underway of vitamin-deficient Soyalac powder, milk-free fortified formula for infants.

I went on to say:

> This incident makes my recent request for congressional hearings on all the regulations established under the infant formula bill even more urgent.

That was in July of 1983 and one in August of 1983. Two years passed and we still did not get a hearing. On April 19, 1985, I addressed a letter to the Honorable ORRIN HATCH, chairman of the Committee on Labor and Human Resources, and the Honorable PAULA HAWKINS, chairman of the Subcommittee on Children, Family, Alcoholism, and Drug Abuse.

At that point I said:

> Last Sunday, the Food and Drug Administration announced that an infant formula known as "Kama-mil" was being called off the market. FDA, which only became aware of the existence of this formula through an anonymous source, found that "Kama-mil" was marketed without proper notification and that it contained life threatening nutrient deficiencies.

My letter goes on to say:

> I am again requesting that a hearing be scheduled on the current infant formula regulations and on my proposed amendments as soon as possible. More immediately, I urge you to schedule a hearing—either at full Committee or before the Subcommittee on Children, Families, Alcoholism, and Drug Abuse—on the current recall situation, in order to explore the reasons FDA officials have been unable to act swiftly in this matter. As you may know, this is not the first recall of defective formula since passage of the Act. Prior to the current "Kama-mil" recall, three million cans of formula had to be seized.

Certainly we have been pressing the chairman for a hearing on this issue. Certainly he can make no argument that we have not requested a hearing. We not only requested a hearing, but we have gone back to him time and time again but to no avail. So I have no alternative but to offer this amendment to this pending piece of legislation.

Let me summarize in one sentence. If you are concerned about the babies of your children and grandchildren, and all the babies that are being born every day of the week in this country, then you cannot afford not to vote for my amendment.

I believe the issue is are you concerned about the health of children, or babies, or are you not? I believe the Members of this body are concerned and are not going to play twiddle-dee, twiddle-dum as to whether or not there was or was not a hearing. We sought a hearing. We could not get a hearing. We sought a hearing three separate times and could not get a hearing.

Think about the babies and quit worrying about the process. I think that is all the issue is about.

Having said that, let me say to my colleague from Utah, I have indicated a willingness to proceed forward promptly with respect to a number of amendments that I have offered today. I would hope that he would see fit not to offer motions to table, and that we might have an up or down vote. I do not intend to drag out the debate.

I am prepared to vote immediately.

Mr. HATCH. I say to my distinguished friend from Ohio I will have to move to table most of these amendments, however, at the request of a number of Senators.

Let us be honest about it. There has been basically no reason whatsoever to hold hearings on this issue because there have not been any problems or any injuries. In the Kama-mil case, the distinguished Senator from Ohio says Kama-mil was marketed in defiance of the 1980 law. That would have happened if the Senator's amendments were passed. If current law had been followed by the Kama-mil manufacturers, there would have been no problem. If this amendment had been law, it would have made no difference. It would not have protected any infants.

The fact of the matter is this amendment is another attempt by somebody who desires overregulation by the Fedeal Government.

That is why we saw no need for a hearing on this legislation. It would not have corrected the problem.

If the Senator can bring up good illustrations which the FDA agrees with—and they have investigated and are investigating every one of these things—of course we will hold hearings on it. But he has not been able to do that so far. The FDA has been opposed to this type of overregulatory conduct.

So again, this comes down to are we going to regulate people into the ground or are we not? Are we going to escalate the costs, or are we not? I think it is time to get to what this bill is all about and not bring up red herrings that really have no reason to be here on the floor of the Senate at this time.

The fact of the matter is I do not know of any case—other than a couple which as the Senator has explained the FDA is investigating—and neither does FDA know of any case where infants have suffered as a result of formulas except those where current law was ignored, and those eight infant formula recalls since 1980.

Mr. METZENBAUM. Mr. President, will the Senator yield? Do we have to wait until the children suffer?

Mr. HATCH. I think we have to have more than the Senator's visceral instincts before we start regulating, and adding to the cost of infant formula.

Mr. METZENBAUM. Is the Senator aware that Mead Johnson had two recalls of over 300,000 cans; that Wyeth Labs, Inc., had two recalls of over 3.3 millions cans; that Sunrise & Rainbow had a recall of 6,935 cans; that Loma Linda Foods had recalls of 272,768 cans; that Ross Labs had 5,184 cans recalled; that Gerber Products—the famous Gerber Co.—had 74,000 cans recalled?

Mr. HATCH. Each one of those examples are examples of how the current law works to protect infants. We have had eight recalls since 1980, and every one of those has been recalled pursuant to this law of 1980. Does the Senator want to add to the overregulatory infrastructure of that law?

Mr. METZENBAUM. These were on the market and being sold.

Mr. HATCH. I described each one of those eight recalls accurately.

Mr. METZENBAUM. Fortunately, no children suffered by reason of using those formulas.

Mr. HATCH. That is right. Not a one.

Mr. METZENBAUM. But the fact is they could have, and I am saying what we ought to do is have testing of the product before it goes into the marketplace.

I have difficulty in understanding my colleague and my friend as to why he would be opposed to that. I cannot believe that I am standing here debating the question of whether or not infant formula ought to be tested before it is sold in the marketplace.

I am prepared to vote.

Mr. KENNEDY. Mr. President, will the Senator yield?

The PRESIDING OFFICER. The Senator from Utah has the floor.

Mr. HATCH. I am happy to yield to the distinguished Senator from Massachusetts.

Mr. KENNEDY. Mr. President, is the Senator reserving the right to move to table?

Mr. HATCH. Yes. I am reserving the right to make a motion to table.

Mr. KENNEDY. Mr. President, as Members know, I am a cosponsor of this legislation with my good friend from Utah. But I must say on this particular issue of the infant formula I have to part company with him. What has happened both here in the United States and around the world has been a subject matter which has been before the health committees of this body over a period of probably some 15 years.

Senator METZENBAUM makes a strong case of support for action going back to 1980, and a very clear indication that the membership of this body, and also over in the House, felt that there should be strong remedial action. That legislation was really never implemented in ways that it was intended I believe by the House and the Senate, particularly those that follow this issue with great interest.

Now we have some dozen different examples since 1981 where there have been problems. Those have been referred to in the earlier debate and discussion. The response is made, well, that really shows that the legislation is working since we have found these particular instances where there have been difficulties and there have been problems. I will submit the list of marketing of defective formulas despite the passage of infant formula law, and the various occasions or dates when the problem has been detected.

The purpose of this amendment is to avoid these kinds of instances. One can say the law is working because we have been able to detect it. The Metzenbaum amendment is to avoid these kinds of occasions in the future. It is his best judgment, and one with which I agree, that the proposal and the regulation would address certainly the kinds of problems that have been outlined and have been identified since 1981.

I know the point is made that it is effectively overkill because there will be testing of various nutrients in these various programs. But I believe that is an essential aspect of the protection for the consumer, and particularly the most vulnerable consumer in our society; that is, the infant. Therefore, in this instance we certainly want to err in terms of protection of those individuals.

So this amendment has merit. I think we are talking about providing important protection for individuals who are really the most vulnerable. Many of us are aware of a number of industries in the profession that are using the kinds of standards which are basically included in the Metzenbaum amendment to ensure that their products are not going to be subject to any type of abuse.

□ 1440

Mr. President, I hope that this amendment is not tabled and that it will be accepted. It strengthens the entire legislation.

I thank the Senator from Utah.

Mr. HATCH. Mr. President, I will reiterate that since 1980, and I appreciate the feelings of my colleagues about this, there have been eight infant formula recalls. Three involved the manufacturers of infant formula. The Senator from Ohio has listed them.

As I say, the first of those occurred before the FDA issued its quality control regulations, which accounts for the overwhelming number of cans of infant formula that were recalled since the passage of the Infant Formula Act of 1980. That recall involved a quality control failure that would have been detected and corrected under current testing and regulatory requirements in the current regulation. There is no question about that.

The second recall involved the reduction of shelf life potency. That was detected by the manufacturer, itself, and it was detected before the nutrient levels fell below those allowed by the Infant Formula Act.

So the infants were protected and would have been protected under that act itself.

The third involved a deficiency in a premix. That premix had been certified as being free from any defects by the premix supplier. The premix difficulty was caught quickly enough to prevent any undue exposure to any infant and caught under the law of 1980.

The remaining five involved new, domestic manufacturers or foreign manufacturers whose products recently appeared in our U.S. territory in the Virgin Islands without prior notification of the FDA. These manufacturers disregarded the requirements of the Infant Formula Act.

Those recalls would have been necessary under current law, but they also would have been necessary under the Senator's amendment.

Foreign products may have reached U.S. territory from some other island in the area without the knowledge of the manufacturer. There was an unusual recall involving Japanese soy-based product. It was not labeled as being an infant formula. The literature said that it could be used as an infant formula as a substitute for milk products if infants were having feeding problems with milk.

A child did develop rickets under the nutrient deficiency problems, but FDA was able to recall the literature under existing law. Again, it is doubtful if that kind of occurrence could have been prevented by the new legislation, certainly by the amendment of the distinguished Senator from Ohio.

So this amendment would not add anything to any of these instances which are the only instance which, to the knowledge of FDA, have occurred. FDA does not feel that it needs this added regulatory burden that the distinguished Senator from Ohio, and I take it the distinguished Senator from Massachusetts, would like to have. The FDA has not been able to identify any real systemic problems in the existing regulatory framework that would require the substantial modifications that the Senator is asking for in his amendment today.

We could ask for more and more regulations on anything. But the question we need to ask ourselves is how necessary the additional regulations would be. I agree, if the system is not working, if it has not been working well, if there are indications that it is not working well, we need to correct the situation. But to add another regula-

tory burden which the FDA says it does not need at this time does not contribute anything.

Mr. METZENBAUM. Mr. President, I am prepared to vote. Is there some reason that the Senator is not prepared to vote at this point?

Mr. HATCH. I understand there are a number of Senators at the White House right now. The Secretary of the Senate has asked me to wait a few more minutes.

Mr. METZENBAUM. I have no objection to doing that, but I want to say to my colleague I tried to be cooperative. I did not bring up any amendments this morning, as I wanted to do. I have tried to move this matter forward promptly. I have a number of additional amendments that I want to bring up. I do not want to be crowded for time on the basis that somebody wants to get away.

Mr. HATCH. I share the viewpoint of the Senator from Ohio. He has been very cooperative. We do want to accommodate him on these amendments. Can we temporarily set it aside and wait for Senators to return from the White House and move to the next amendment? Why not go to the second amendment?

Mr. METZENBAUM. Does my colleague think if we start the rollcall they might not be back before we finish?

Mr. HATCH. I would prefer not to start the rollcall. Why not temporarily lay this one aside?

Mr. METZENBAUM. The Senator from Tennessee has just entered the Chamber. He has been involved in this very actively. I yield to him.

Mr. GORE. Mr. President, I appreciate this time to speak on the Metzenbaum amendment. I want to express my strong and unequivocal support for this amendment. As the principal sponsor of the Infant Formula Act in the other body during the last Congress, I spent many hours looking at the nature of this problem we are trying to remedy.

Along with the Senator from Ohio, Senator METZENBAUM, I took some pride in the bill itself and had some hope that its provisions would protect some of our most vulnerable citizens against a problem that had arisen far too many times in the past. That is, poor quality infant formula being made available on a mass distribution basis and then severely hurting the health of thousands and thousands of infants throughout the country.

We passed this legislation and expected that the administration would implement it in good faith. Unfortunately, those hopes were not justified because after the law went into effect, the administration, for a long time, refused to implement the law.

A long time after it passed, about a year, it had still not been implemented, and another incident took place of thousands of cans of defective infant formula distributed widely throughout the country. In this particular instance, the defect involved was one identical to a defect which had occurred some 20 years earlier affecting the same company.

As a result of that earlier episode, there are many, many young people in their 20's in this country who have severe problems in speaking, in moving, severe brain damage. We know the results of the particular deficiency that was involved.

The Commissioner of the Food and Drug Administration at that time came before the Congress and testified under oath that if the Infant Formula Act had been implemented, then this incident would never have occurred. The law would have prevented it from taking place and those infants would have been protected.

Well, the day after the hearing at which that testimony took place, the FDA finally signed off on regulations implementing the law. Some people again breathed a sigh of relief. But once again, Mr. President, hopes invested in those regulations did not proved to be justified because upon closer examination it became apparent that the regulations promulgated changed the intent and thrust of the law very significantly, and deprived the law of its intended impact. It made it very difficult for those enforcing the law to really accomplish the purposes of the act, namely, to protect infants consuming formula in this country.

□ 1450

So what does the Congress do? It is a classic problem. If the Congress passes a law and the administration charged with faithfully executing that law refuses to implement it and then belatedly implements it in a fashion which frustrates the intent of Congress and removes from the law its real effectiveness, what remedy is there?

Where, there is only one effective remedy, and that is for the Congress to come back, amend the law, and make it work the way it was originally intended to work.

There are some problems with that because ideally in our system the legislative branch and executive branch should work in partnership, each bringing its own unique strengths to that partnership and allowing our laws to work not only with effectiveness but with sensible flexibility as well.

Where the administration failed in the discharge of its duties, the Congress must be more specific in spelling out exactly what needs to be done. The amendment offered by the Senator from Ohio accomplishes this purpose. It would fix the law and make sure that it serves the purposes it was originally intended to serve. This amendment would require manufacturers to test formula for each required nutrient prior to distribution.

What is wrong with that? In the wake of this record which has been built up over the years and in the wake of the administration's failure to administrator a more flexible version of this, this is essential.

The amendment would require periodic testing of formula throughout the shelflife of the product. What is wrong with that? It should be done. Mothers and fathers of infants relying on formula want this action to be taken.

The amendment would also require manufacturers to retain production records for 1 year after the expiration date in order to aid FDA investigators in the event of an accident.

Again, Mr. President, what is wrong with that? If we have a massive defect involving a mass-produced product affecting the health and lives and safety of infants throughout this country, why not allow the food and drug investigators to have a good chance to fix it?

It would require the manufacturers to maintain a file of complaints regarding their product and make that product available to the FDA.

What is wrong with that? That is something that obviously should be done, and under this amendment the FDA would have an enhanced recall authority. We know from experience that it needs that enhanced recall authority, and new formulas would require approval, as they should require approval.

So, Mr. President, I urge my colleagues on both sides of the aisle to support this amendment strongly. It is unfortunate that the original law was implemented in a fashion which really did not reflect a good faith discharge of the duties of the executive branch, in my opinion, but regardless of what you think was the cause of the current deficiencies in the law that is on the books, you should support this amendment which would remedy those deficiencies and make the law work as it was originally intended to work. So I urge all my colleagues to vote aye on the Metzenbaum amendment.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the names of Senators KENNEDY and MATSUNAGA be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, I yield the floor to the Senator from Hawaii, one of the cosponsors.

The PRESIDING OFFICER. The Senator from Hawaii.

Mr. MATSUNAGA. Mr. President, as a cosponsor of the original law which the FDA has failed to implement and as a cosponsor of the Metz-

enbaum amendment now being considered, I rise in strong support of the amendment. What is wrong with the amendment which merely, one, requires manufacturers to test each batch of infant formula for a level of required nutrients and also to ensure that the formula does not contain any hazardous extraneous materials before the formula leaves the factory?

Two. The amendment provides for routine testing of nutrient levels during the formula's shelf life.

Three. The amendment requires all testing records for liquid and dry infant formulas to be retained for 1 year after expiration of the formula's shelf life.

And, four, the amendment establishes recall procedures for any formula which does not meet nutrient requirements or is otherwise adulterated.

Now, what is wrong with this amendment? No one can speak against the full provisions of it, and so I strongly urge my colleagues to support the amendment now pending.

Mr. METZENBAUM. Mr. President, I thank the Senator from Tennessee as well as the Senator from Hawaii for their supportive remarks. I have indicated previously that I am prepared to vote. Is the Senator from Utah prepared at this point? If not, I will offer to move this amendment aside. Is the Senator prepared to vote?

Mr. HATCH. I believe, with our colleagues still at the White House, we should temporarily set this aside and move to the next amendment. The minute we get notice that they have left the White House, we will be happy to move to table.

AMENDMENT NO. 1950

(Purpose: To require that the same conditions apply to the export of antibiotic drugs as apply to other drugs)

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM Mr. President, I have three amendments pending at the desk. I ask unanimous consent that the first and second amendments be set aside and the third amendment be called up for immediate consideration.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Ohio [Mr. METZENBAUM] proposes an amendment numbered 1950.

Mr. METZENBAUM Mr. President, I ask unanimous consent that further reading of the amendment be disposed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 37, between lines 20 and 21, insert the following:

"(9) An antibiotic drug which is subject to certification by the Secretary under section 507 may be shipped for export only to a country described in paragraph (2) and only if the antibiotic drug meets the requirements of paragraph (3).

SEC. 4. (a)(1) The provisions of section 801(e) of the Federal Food Drug, and Cosmetic Act, as added by section 3 of this Act, shall not apply, for a period of one year beginning on the date of enactment of this Act, to any antibiotic drug which—

(A) is subject to certification by the Secretary of Health and Human Services under section 507 of the Federal Food, Drug, and Cosmetic Act;

(B) has been exported prior to the date of enactment of this Act;

(C) does not comply with the provisions of section 801(e) of the Federal Food, Drug, and Cosmetic Act, as added by section 3 of this Act; and

(D) complies with the provisions of paragraph (2).

(2) An antibiotic drug to which paragraph (1) applies may be exported if—

(A) such antibiotic drug has not been the subject of final action by the Secretary of Health and Human Services denying, withdrawing, or suspending approval or certification of such antibiotic drug on the basis of safety and effectiveness, or otherwise banning such antibiotic drug on such basis; and

(B) such antibiotic drug is not the subject of a notice by the Secretary of Health and Human Services of a determination that the sale of such antibiotic drug in the foreign country to which such antibiotic drug is to be exported is contrary to the public health and safety of such country.

(b) The Secretary of Health and Human Services may extend the one-year period for which, pursuant to subsection (a)(1), the provisions of section 801(e) of the Federal Food, Drug, and Cosmetic Act do not apply to an antibiotic drug if the Secretary determines that the manufacturer of such antibiotic drug is making a good faith effort to comply with the provisions of section 801(e) of the Federal Food, Drug, and Cosmetic Act, as added by section 3 of this Act, with respect to such antibiotic drug. Any extension under this subsection shall be for a period not in excess of one year.

Mr. METZENBAUM. Mr. President, the amendment which I have sent to the desk would include antibiotics under the provisions of this legislation. Now, currently antibiotics which have not completed the FDA approval process can be exported. This amendment would simply bring antibiotics under the protections which the sponsors of this legislation contend the present bill contains.

Mr. President, there is absolutely no reason to treat antibiotics any differently in this legislation than we treat nonantibiotic drugs. After all, we require both kinds of drugs to go through elaborate and extensive testing prior to approval in this country to determine their safety and effectiveness.

As I have said, the sponsors of the legislation before the Senate contend that the bill provides foreign consumers with protection. Why should not that protection about which they speak be offered to foreign consumers who now use unapproved antibiotic drugs?

Mr. President, there is certainly a need for protection in this area. Listen to the response of the FDA when asked how many staff are assigned to monitoring the export of unapproved antibiotics to ensure that they at least meet our code for good manufacturing practices.

Let me quote from that response:

No resources are assigned specifically to determine whether unapproved antibiotics that are exported are in conformity with the current requirements of the good manufacturing practices or to determine if a particular firm may be engaged in exporting unapproved antibiotics.

Mr. President, the FDA cannot tell us which unapproved antibiotics are being exported, which drug companies are exporting, or even whether these products meet the most basic of FDA standards—those involved in the proper manufacture of the product. We are not even discussing whether these antibiotics are safe or whether they are effective. The only current requirement is that they are manufactured according to basic standards. And the FDA has no way of knowing if this is the case.

Mr. President, the Senate is not in order, including the Presiding Officer. May I have order in the Senate, please?

The PRESIDING OFFICER. The Senate is in order.

Mr. METZENBAUM. Mr. President, although there is a dearth of information on which companies are actually exporting the unapproved antibiotics, I have been able to document one case which should give the Senate ample cause for alarm. I refer to a Bristol-Myers product with the export brand name "Uropol." It is a combination antibiotic with tetracycline, a phosphate complex with sulfonamide, and an analgesic.

□ 1500

In August of 1983, the product was ordered off the domestic market place because the FDA had decided these combinations are ineffective. According to the world health organization, "their spectrum of activity is often so wide that they have undesirable effects on the body."

But Mr. President, even though this particular antibiotic, Uropol, was ordered off the domestic market in August 1983, the manufacturer continued to export it until December of 1984.

Please understand what I am saying. We ordered it off the domestic market in August of 1983. The manufacturer continued to export it until December of 1984, more than a year after it had been removed from the domestic market.

At least the proposed legislation would halt this practice of exporting drugs which are banned in the United States.

We should ensure that this type of practice is halted. A minimal step is to bring the export of unapproved antibiotics under the provisions of this legislation. I say to my colleagues, what reason exists not to do that?

Mr. President, antibiotic use, particularly in the Third World, has become so widespread that diseases are rapidly becoming immune.

According to Health Action International, the following is an accurate profile of antibiotic use in the Third World.

When antibiotics were first developed, they were seen as a "magic bullet" that would radically change the treatment of infectious disease. Now, however, experts are worried that the golden age of antibiotics is over.

One hundred and fifty scientists from more than 25 countries claimed in 1981 that "these antimicrobial agents are losing their effectiveness because of the spread and persistence of drug-resistant organisms. Moreover, unless steps are taken to curtail the present situation, we may find a time when such agents are no longer useful to combat diseases."

Some bacteria are naturally resistant to certain antibiotics, but often resistance is acquired. Bacteria become resistant by incorporating a "resistance factor" into their genes to render the antibiotic ineffective. This can pass quickly to other bacteria. Multiple resistance, where bacteria are resistant to several antibiotics, can also be transferred from one species to another.

The inability to treat infections with the usual antibiotic of choice—or any other drug—can be disastrous. Between 1968 and 1972, an outbreak of bacillary dysentery caused by an antibiotic resistant strain led to thousands of deaths in Central America. A similar outbreak in Bangladesh, in 1973, affected 33 percent of the population of an island in Bay of Bengal over a 3-month period.

According to the World Health Organization [WHO]:

> The problem is global and is the result of widespread and indiscriminate use of antimicrobial drugs in man and animals.

The threat of infection in the Third World through poverty, malnutrition, poor sanitation, and poor housing conditions means that antibiotics have potentially a large role to play in improving health care. In underdeveloped countries, a larger proportion of the drug budget is spent on antibiotics and antiparasitic drugs than in industrialized countries: 24 percent in India and nearly 50 percent in Tanzania, compared to 15 percent in the United Kingdom, 5.2 percent in Switzerland or 4.6 percent in West Germany. However, as in industrialized countries, antibiotics are only effective if they are properly used. The reality is very different.

In Peru during 1983, the Italian firm Carlo Erba marketed a drug containing chloramphenicol and tetracycline in a special pediatric formulation with chocolate flavoring, as a treatment for diarrhea. The drug—Quemiciclina—was so popular and its use so widespread that it became known as Erba, after its manufacturer. Some children called it sweeties for diarrhea. The BNF advises that tetracyclines should not be given to children under 12 and describes chloramphenicol as a "potent, potentially toxic antibiotic which should be reserved for the treatment of life-threatening infection." Despite Carlo Erba's intention to withdraw the drug in Peru, it was still available in Africa during May 1985. Many other antidiarrheal preparations containing antibiotics are also on the Third World market.

The massive market for antibiotics, estimated in U.S. dollars at $15 billion annually, is a major factor behind the misuse:

> Since the drug industry is profit oriented, it tries to increase the sales of antibiotics. This occurs either by increasing the volume—which leads to unnecessary prescribing—or increasing the relative proportion of expensive antibiotics, which usually are not drugs of choice. It is, therefore, questionable whether optimal prescribing of antibiotics can be attained in this context.

The WHO essential drugs list contains 16 antibiotics. In Sweden there are 90. In one British hospital, six antibiotics covered 98 percent of requirements over a 2-year period. However, about 200 antibiotics are on the market in Central America. Adequate information about adverse drug effects were frequently not provided to doctors in manufacturers' drug descriptions. Furthermore, compounds could be obtained without a prescription. Thus, there is a high potential for misuse.

Mr. President, clearly the use of antibiotics throughout the world carries many opportunities for abuse.

Let us limit these abuses by adopting this amendment and bringing antibiotics under the bill.

Mr. President, it is fair to point out that I do not believe that this is a good bill. In fact, I think this is a very bad bill. But at least it would be a step in the right direction if we brought antibiotics within the terms of the bill.

Let me address myself for a moment to the entire subject of the bill.

When this matter was about to come to the Senate, I indicated to the leadership that I had a number of amendments that I wished to be considered by this body. I indicated, in very clear terms, that I would not delay the matter of bringing it to the floor of the Senate; that, so far as I was concerned, the motion to proceed could be agreed to without any problem from the Senator from Ohio, but that when we got on the bill, I wanted to have an adequate opportunity to debate the issues, in order to offer a number of amendments.

I was on the floor on Monday, and we had an understanding on Monday that any amendments could be offered but that there would be no votes in connection with them.

I then indicated that I was prepared to go forward with respect to voting on amendments early this morning, but I was prevailed upon not to do that because it might inconvenience some Members of this body.

Then I was told that we would start at 2 o'clock, and I have indicated since about 2:30 that I was prepared to vote, and it is now 3:10.

□ 1510

It is my understanding some Members of the body are at the White House, and I do not fault them for that. But the fact is that the Senator from Ohio feels as deeply about this bill as any bill about which I have spoken on the floor of the Senate.

I am totally convinced this is bad legislation. I am totally convinced that children and adults and seniors throughout the world will suffer if we pass this legislation today.

The Senator from Ohio can count. The Senator from Ohio knows that in all probability I do not have the votes, that the pharmaceutical lobby has done a great job. But that is not the issue. I do not really care whether I get 1 vote or 5 votes or 10 or whatever.

I believe that the people of this country ought to have an opportunity to understand that this bill is bad. It will make us embarrassed not tomorrow, not next week, but a month from now, a year from now, 2 years from now.

Have we not suffered enough embarrassment as a Nation already by reason of our conduct throughout the world? Were we not embarrassed by the Bhopal incident? Did we not have a concern when they found products in Peru that should not be there that came from this country? Is it not a concern for us when we read about farmers in this country who are protesting the quality of the wheat that we are sending overseas? That only has to do with sales and whether or not you affect the sales that the farmers may make.

The legislation we have before us today is legislation that affects the lives of peoples throughout the world.

Over 20 nations have been heard from saying "Do not pass the Hatch bill."

As I said the other day on the floor of the Senate, my colleague is known nationally in this country but I had no

idea before that he was so well known internationally. To hear from little parts of India about not passing the Hatch bill, to hear from Taiwan, "Don't pass the Hatch bill," to have the issue of the Hatch bill debated on the floor of the Australian Parliament, with the Secretary of Health from Australia addressing himself to the issue.

You may have the votes to pass this legislation but that will not make it right. And this Senator wants an opportunity to offer the additional amendments that I have and does not want to be crowded in connection with that subject.

I will not delay, but I am trying to go forward now and I am not given an opportunity to do so. I am not complaining about that. I am willing to wait. But I am saying to the leadership of the Senate, I am saying to the manager of the bill, do not come back to me later and ask me to accelerate the process. Do not tell me that somebody has to go away somewhere because they have a fundraiser or because they have a party or because they have a plane to catch.

I believe this legislation is so almighty important that we ought to have a chance to adequately debate it.

I agreed to vote finally on it tomorrow at 1 o'clock, but it was my understanding we would be able to proceed forward and proceed forward in a regular order.

So I am saying to my colleague and I am not saying this in putting the responsibility on him, but I am saying I am ready, I am ready now to vote on the third amendment. I will be ready to vote after that on additional amendments. Let us proceed forward.

If you have the votes beat me, but at least I ought to have the opportunity to make the point that I wish to make.

The PRESIDING OFFICER (Mr. ARMSTRONG). The Senator from Utah.

Mr. HATCH. Mr. President, I think the distinguished Senator from Ohio is right. He has been very cooperative, and there has been a consent agreement. However, I believe we are basically on schedule.

We have temporarily set the first amendment aside to accommodate Senators who are at the White House in an important meeting, we are on the second amendment, and the distinguished Senator has had the time he needs to argue the second amendment.

But I want to take issue with my friend and colleague from Ohio with his statement that 20 nations have decried the so-called Hatch bill.

This is a lot more than a Hatch bill. Of course, I am the principal sponsor, along with Senator KENNEDY, but there are many others who are on this bill as well.

There are not 20 nations. There are people within 20 nations, most of whom are activists and many of whom are radical activists, who in some cases just hate our country and hate our corporations and who want a zero-risk pharmaceutical environment, and there is no pharmaceutical that is risk free.

Let me just say this. I want to emphasize this is a very good bill, a bill I am proud to sponsor and a bill that will help our country and will improve the situation for foreign consumers.

The Senator from Ohio has in some ways turned the debate into a battle of editorials and endorsements. But I prefer to rest on the strength and the reasonableness of the points that we are making. I would like to point out there are opinions and then there are opinions.

For depth of experience and understanding, both of the law and the realities of the marketplace, few can compare with our present and former FDA Commissioners. These are Republicans and Democrats, people with high expertise in this area. Dr. Frank Young, our current Commissioner, spoke in favor of drug export reform this past June at our committee hearing, as did Dr. Mark Novitch in 1984 as Acting Commissioner.

I have also received a letter of vigorous support for S. 1848 from Dr. Donald Kennedy, former FDA Commissioner, now president of Stanford University. And I would like to read into the RECORD a communication I received yesterday from Dr. Alexander M. Schmidt, another former Commissioner, now vice chancellor for health affairs at the University of Illinois:

> I join other former commissioners of food and drugs in strongly supporting the pharmaceutical export amendments (S. 1848) allowing U.S. manufacturers to export medicines approved in other nations. Most developed countries can and should decide what medicines they need. To think that U.S. bureaucrats can decide what medicines are safe and effective for the entire world is foolish. To force FDA into that posture is unwarranted. S. 1848 has sufficient safeguards to prevent abuse of the export provisions.
>
> To prohibit export of any drug unapproved in the U.S. will impede the development of new biotechnology in the U.S. and overseas and prevent the benefits of our scientific advances from reaching other populations.

That is pretty strong language coming from a number of former FDA Commissioners, people who have run this agency, who understand it, people who have taken safety and efficacy to heart and who have done a tremendous job of doing so.

I have also received a telegram of support from former Commissioner Herbert Lee.

Now, whatever else you may think of S. 1848, when you look at the caliber of these men you cannot believe that it is immoral, rapacious, or harmful to defenseless foreigners.

I make this observation, Mr. President, just to reinforce my contention that S. 1848 is a good, responsible piece of legislation. It will help our country and I do not feel any need to apologize for it. I am proud to offer it before this group.

UNITED NATIONS' POLICY

Much has been said about the reaction of foreign consumer activists to S. 1848. But let us take a look at the policy followed by other representative governments in the area of pharmaceutical export. Perhaps the most interesting policy statement is that contained in United Nations General Resolution 37-137, March 3, 1983. This resolution addresses policy on the export of both unapproved and banned materials. It states:

> Products that have been banned from domestic consumption and/or sale because they have been judged to endanger health and the environment should be sold abroad by companies, corporations, or individuals only when a request for such product is received from an importing country or when the consumption of such products is officially permitted in the importing country.

I note here that under S. 1848 products addressed by this sentence—that is banned products—would not be exportable at all. They would not be exportable at all under my bill. S. 1848 is therefore considerably more conservative than this part of the United Nations statement. It continues the statement:

> All countries; that have severely restricted or have not approved the domestic consumption and/or sale of specific products, in particular pharmaceuticals and pesticides, should make available full information on these products with a view of safeguarding the health and environment of the importing country, including clear labeling in a language which is acceptable to the importing country.

Thus, under this United Nations policy, the export of unapproved drugs would be handled under an information sharing system much less stringent than the protections in S. 1848. This resolution was overwhelmingly adopted by the United Nations General Assembly, including by a large majority of Third World nations. Are we to say that this is an unreasonable policy, that it is immoral, or that it is contemptuous of the safety of consumers? Of course not.

Further, Senator METZENBAUM has referred to organizations based in various countries; Belgium, Sweden, India, and so forth, and has cited us excerpts from parliamentary proceedings in Australia. But how is the judgment of a nation of these issues expressed? Through the legislation it passes, of course. And none of these nations—indeed, no other nation in the world—has imposed restrictions on the export of unapproved pharmaceuticals from its borders. I do not point this out to argue that the right position is defined by the number of countries which adhere to it. Senator METZ-

ENBAUM is quite right in saying that we must follow our wisdom regardless of what other countries do.

However, when the rhetoric gets as inflated as it has on the part of some of these activist organizations, it becomes useful as a sort of reference point, to look at what other nations have done, many of whom see themselves as champions of the Third World in the international forum. Is the reality of the situation closer to the view of the world presented by Senator METZENBAUM or the view of things which I am presenting? Each Senator must make his own judgment, but we should note that this rhetoric, these arguments, these scare tactics have persuaded no other government on earth, not even the most radical of them. Now, are we to assume that officials, Members of Parliament, and health ministers in all of these countries are corrupt, incompetent, or have out of improper motives refused to adopt what Senator METZENBAUM feels is so obviously the correct and moral policy? Of course such a conclusion is absurd. I would hope, then, that these conclusions would make us cautious in evaluating the strident calls of those who claim to speak for the foreign community.

□ 1520

The Senator has noted that efforts are underway in some of these countries and at the World Health Organization to impose some restrictions—though fewer than imposed by S. 1848—on the international trade and pharmaceutical. However, these efforts have been unsuccessful, and will continue to be unsuccessful because they are without merit. We should hardly arrange our national policy for their convenience.

In this amendment the Senator provides that unapproved antibiotics may only be exported to countries listed, and under the conditions prescribed, in S. 1848. The amendment does not apply for one year if the unapproved antibiotic is currently being exported.

We have to oppose this because antibiotics have for 40 years been readily exportable with little restriction. While there may have been some problem in the early seventies, even critics of the system acknowledge that in response to studies of the market, the industry—and particularly the U.S. drug companies—cleaned up its act. They now have an actively monitored set of industry standards, and the situation has improved drastically. FDA has testified that the current system has produced no problems. Why then should we change it? The burden of change is on those who propose it. "If it ain't broke, don't fix it."

In reliance on the current policy permitting the export of unapproved antibiotics to countries in which they are legal, many of the largest antibiotics manufacturers have located most, if not all, of their antibiotic fermentation capacity in the United States. This amendment would not only force some of these plants to close, it would for the first time lead to the export of plants and jobs to foreign countries. This is exactly the opposite reason for which this bill was conceived. Granted, the Senator's proposal would delay action for 1 year in the case of antibiotics already in production, but thereafter, the result would be just as onerous and unfair and just as costly to Americans. These facilities were built in reliance on current United States policy and on the soundness and responsibility of an industry. It would be unfair to jeopardize them for no good reason.

In the development of S. 1848, we considered nonantibiotic drugs for several years. We fashioned a reasonable bill which deserves to be enacted because it much improves the situation for nonantibiotic unapproved drugs. The question of antibiotic drugs was not investigated, nor was it considered until it was raised briefly at the mark up on this bill, and the Senator from Ohio did not propose this amendment at that time because he knew that it would have been defeated overwhelmingly in the committee.

Likewise, in the committee report, at page 38, we stated:

> Some have suggested that S. 1848 should be expanded to govern the export of antibiotics. However, the committee feels that this is not the proper time nor the proper vehicle for the consideration of such an action.

Mr. METZENBAUM. Will the Senator from Utah yield for a question?

Mr. HATCH. I am delighted to yield.

Mr. METZENBAUM. It is my understanding that the leadership on your side of the aisle is prepared to vote on this matter.

Mr. HATCH. They are. I though I would finish this and have back-to-back votes, if you would like.

Mr. METZENBAUM. I just wanted you to know that I am anxious to proceed.

Mr. HATCH. Of course. I am trying to get through the explanation on our side before we have back-to-back votes.

Mr. President, I quoted the committee report.

We did not have antibiotics in mind during the negotiation of this bill, and I would point out that they carry differing implications from nonantibiotic drugs. This is because of the particular range and severity of diseases to which they are directed, because of the unusual expense of their production, and because of their unique safety profile, among other factors. For example, humans can ingest many times the therapeutic dose of antibiotic without any harm at all, and antibiotic side effects are rare. Thus many of the safety considerations which motivated the particular provisions in S. 1848 would not likely apply to antibiotics.

Further, we do not know what the effect of this amendment will be on the industry or on the Third World if antibiotics are included. Antibiotics are the frontline of defense against the infectious diseases prevalent in developing countries, and are in essential, a vital public health tool in the Third World. This amendment would prevent the prompt delivery of new generation antibiotics to the Third World. In the last 5 years, 15 of 17 new antibiotics were approved abroad before they were approved in this country. Given that experience, the effect of Senator METZENBAUM'S amendment will be to force manufacturers to construct new antibiotics plants overseas. Antibiotics fermentation plants are among the most complex and expensive in the industry. The effect of his amendment is again to waste needlessly scarce resources of the pharmaceutical industry which could be spent on research. And it also shifts American jobs overseas.

Finally, the fact is that there is just no evidence anything needs fixing with respect to antibiotics. Some advocates of change looked forward to the NIH sponsored symposium on antibiotics use in the developing world which took place this past March. They hoped that the various task forces of renowned scientists chosen to carry out surveys of potential problem areas in antibiotics usage would provide evidence to support restriction on the international trade in antibiotics.

These advocates have not been heard from since the NIH conference. The reason is simple. The consensus was that too little is now known about potential problems from antibiotics usage under the current system and too much is known about their wonder-drug benefit and their vital place in health care to radically change the system at this point. And certainly it would be detrimental to Third World countries to change the system, to all other countries, as well. Further studies were called for, and I have no problem with that. But the need for caution was underscored by quotes like the following from the report of the task force No. 1 (p. 37):

> There are large differences in the pattern of antibiotic utilization among countries. However, the absence of data on usage that is linked to patient profile, diagnosis, duration and dosage of therapy, emergence of resistant strains, drug prices, and consumer access to drugs preclude any definitive evaluation of the effectiveness of antibiotic use in these countries. There may be as much under use as over use.

Or this one from the report of task force No. 6 (p. 111):

> The reduction in real dollar terms of the amount of illness and disability worldwide resulting from the use of antibiotics far out-

weighs the cost of any adverse effects, including bacterial resistance.

Or this quote from task force report No. 4 (p. 4):

From the data available on global morbidity and mortality, it appears that over five million deaths from viral and bacterial diarrheal disease and over three million from pneumonia occur each year. These surpass as direct causes of mortality all of the major parasitical diseases, including malaria, schistosomiasis and amebiasis. The bacterial infectious diseases also produce more death than noninfectious diseases, including accidents, heart and cerebral vascular diseases, and malignancies. Most importantly, the infectious diseases exert their greatest impact on young children.

Throughout these deliberations, the message is one of caution. These drugs are the best hope of the developing world for making significant strides against the killers of their children and adults. The available evidence points to lack of availability of the newest generation antibiotics as a significant weakness of developing nations health systems. They, even more than we in the developed world, need the very latest, most effective, broadest range antibiotic drugs. They do not need the U.S. Congress further delaying the arrival of those drugs by making them subject to this bill. The experts say the situation is not well understood, and that traditional assumptions are not supported by credible evidence. While I understand the appeal of the Senator's rhetoric, I cannot believe the greatest deliberative body in the world will move to restrict the international trade in antibiotics when we have not considered the situation in committee, and when the data we need to make a just and right decision is by scientific consensus, not even available when the vast majority of opinion is that this would be detrimental to people in the Third World.

□ 1530

It is a surprise for me to hear the Senator argue so strongly on infant formula and then turn around and bring up an amendment that truly has the potential to cause deaths.

The Senator has charged that the development of diseases with resistance to antibiotics is a problem, and rightly so. He has then stated the hypothesis that the main problem with therapy in developing countries is overuse of antibiotics and that this is the cause of resistance development. And then he has moved to the recommendation that the way to avoid overuse at the local level is to restrict the flow of antibiotics into countries by constraining the international trade in antibiotics. And from there he moves to the proposition that antibiotics should be added to S. 1848. I must admit, that after his first statement, I do not follow the chain of logic.

First of all, resistance is a very complex process which we have only recently begun to understand. An initial hypothesis was that the development of resistance would increase as the usage of the antibiotic increased. However, one of the conclusions reported at the recent NIH-sponsored conference on the use of antibiotics in the Third World is the following:

Resistance to antibacterial agents thus appears not as fixed a function of the usage of the agents but as a series of functions derived from long chains of biological opportunity. This is set in the context of a recognition of how little we know about broad patterns of evolution among bacteria and other diseases.

In contrast to the assumption that overuse is the main problem, we find the following statement from Task Force Report No. 4: "In contrast the situation in developing countries is underuse and poor usage due to the lack of availability of effective agents and self-prescribing of over-the-counter drugs." The problems identified with the use of antibiotics were not safety problems inherent in the drugs themselves, they were "proper use" problems. These issues are local and they depend on local efforts to solve them.

They are quite beyond solution by the U.S. Congress regardless of what it does with this bill. Restricting the movement of antibiotics internationally, even if it were possible, would have no positive impact on these problems, and might indeed have a negative one if the latest antibiotics were delayed through those efforts. And caution must be exercised even at the local level. No one knows better than health professionals in the Third World how scarce, for example, trained nurses and physicians are.

Thus in the face of chronic disease conditions, restricting access to antibiotics unless the patient goes through not readily available physicians, becomes a death sentence. In those cases, it may well be more humane to make antibiotics available more freely than to restrict them according to our own somewhat rarefied practice patterns.

The consensus at the NIH conference was that answers to these problems are not apparent, and that further study is needed. The report of Task Force No. 2, entitled "Resistance of Bacteria to Antibacterial Agents" carried this as its first recommendation:

1. The available data on global prevalence of resistance to antibacterials were barely adequate to sketch ranges and suggest trends. More systematic surveillance on a much larger scale is needed to provide explanations or remedies. The World Health Organization has developed detailed recommendations for such surveillance and is now beginning integrated surveillance programs in several regions of the world. This initiative should be supported and expanded.

2. Antibiotic resistance of gene products, genes, transpoons, and plasmids have been studied for their own biological interest and as tools for recombinant DNA technology. Information about their clinical significance can also be derived from some manufacturer supported studies of individual antibacterials. What are particularly needed now are broadly based studies of the deployment of these genetics elements in natural populations of bacteria in order to explain the phenomena observed in surveillance and to suggest practical strategies for containment and reduction of resistance.

The bottom line is that there was no suggestion that the solution to these problems was known, much less that it lay in restricting the international flow of antibiotics.

Thus, the resistance issue can contribute nothing to our discussion this afternoon. We simply don't know enough about it, about its causes, or about how to manage it, in order to adopt a course of action, and then decide whether or not the current policy on antibiotics advances or retards that course of action.

Mr. METZENBAUM. Is the Senator now prepared to move?

Mr. HATCH. If it is all right, I will move to table the first amendment, and then should we ask for a unanimous consent to have a second amendment back to back?

Mr. METZENBAUM. Mr. President, if I may be recognized.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the pending amendment be set aside in order that we may immediately proceed to vote in connection with amendment No. 1948, and that at the conclusion of that vote the pending business will be amendment No. 1950, the present amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

MOTIONS TO TABLE

Mr. HATCH. Mr. President, I move to table the first amendment, and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HATCH. I also move to table the second amendment, so they can go back to back. I ask for the yeas and nays.

The PRESIDING OFFICER. Will the Senator restate the request?

Mr. HATCH. I ask unanimous consent I be permitted to also move to table the second amendment so that we can have the votes back to back.

Mr. METZENBAUM. I have to object to that on behalf of the minority leader.

The PRESIDING OFFICER. Objection is heard.

VOTE ON MOTION TO TABLE AMENDMENT NO. 1948

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Utah to lay on the table the amendment of the Sena-

tor from Ohio. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Florida [Mrs. HAWKINS], the Senator from New Hampshire [Mr. HUMPHREY], the Senator from Maryland [Mr. MATHIAS], and the Senator from Oregon [Mr. PACKWOOD] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Vermont [Mr. LEAHY] is absent because of death in family.

I further announce that, if present and voting, the Senator from Vermont [Mr. LEAHY] would vote "nay."

The PRESIDING OFFICER (Mr. EVANS). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 29, nays 66, as follows:

[Rollcall Vote No. 94 Leg.]

YEAS—29

Armstrong	Hatch	Simpson
Cochran	Hecht	Stafford
Danforth	Helms	Stennis
Domenici	Laxalt	Symms
East	Long	Thurmond
Evans	Lugar	Wallop
Garn	McClure	Warner
Goldwater	McConnell	Weicker
Gorton	Quayle	Zorinsky
Gramm	Roth	

NAYS—66

Abdnor	Durenberger	Mattingly
Andrews	Eagleton	Melcher
Baucus	Exon	Metzenbaum
Bentsen	Ford	Mitchell
Biden	Glenn	Moynihan
Bingaman	Gore	Murkowski
Boren	Grassley	Nickles
Boschwitz	Harkin	Nunn
Bradley	Hart	Pell
Bumpers	Hatfield	Pressler
Burdick	Heflin	Proxmire
Byrd	Heinz	Pryor
Chafee	Hollings	Riegle
Chiles	Inouye	Rockefeller
Cohen	Johnston	Rudman
Cranston	Kassebaum	Sarbanes
D'Amato	Kasten	Sasser
DeConcini	Kennedy	Simon
Denton	Kerry	Specter
Dixon	Lautenberg	Stevens
Dodd	Levin	Trible
Dole	Matsunaga	Wilson

NOT VOTING—5

Hawkins	Leahy	Packwood
Humphrey	Mathias	

So the motion to lay on the table amendment No. 1948 was rejected.

□ 1540

Mr. METZENBAUM. Mr. President, I move to reconsider the vote by which the motion was rejected.

Mr. RIEGLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question recurs on amendment No. 1948.

Mr. HATCH. Mr. President, I will be happy to accept the amendment at this point. The vote was overwhelming in favor of the amendment. I do have to say this to all my colleagues.

The PRESIDING OFFICER. If the Senator will withhold, the Senate is not in order. Will those talking in the aisles please retire to their seats or the cloakroom.

□ 1600

Mr. HATCH. Mr. President, I have to say this to my colleagues: It is an easier vote to vote for this, but the correct vote would have been to vote to table; because now every batch—which now is tested every 3 months under FDA, and adequately so—will have to be tested for every ingredient. So I expect that the formula will be very costly—it will cost more than it does now. It will be a detriment to people in poverty and low-income people.

Be that as it may, we will be happy, without voting on the amendment to take the amendment at this time.

The PRESIDING OFFICER. The yeas and nays have been ordered.

Mr. HATCH. Mr. President, I ask unanimous consent that the order for the yeas and nays on this amendment be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

Is there further debate on the amendment? If not, the question is on agreeing to the amendment.

The amendment (No. 1948) was agreed to.

Mr. METZENBAUM. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HATCH. I move to lay that motion on the table.

The motion to lay on the table was agreed do.

AMENDMENT NO. 1950

Mr. HATCH. Mr. President, as I understand it, we will now move to the antibiotics amendment.

Mr. METZENBAUM. That is correct.

The PRESIDING OFFICER. Amendment No. 1950.

Mr. HATCH. Mr. President, I believe the distinguished Senator from Ohio would like a few minutes to express his viewpoint with regard to the antibiotics amendment. I would like a few minutes to respond, and then I think we can tell our colleagues that we are ready to vote on that amendment.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I will not be long.

This amendment is very simple. It says that antibiotics should be included within provisions of the bill. At the present time, there are no limitations at all with respect to exporting antibiotics overseas.

As Members of this body know, I do not support the basic bill, but I do believe that the basic bill is better than no bill at all. I believe there is no logic or reason why antibiotics should not be included within the terms and provisions of the legislation. That is all that is involved in connection with this amendment. It does not do anything more or less.

Mr. KENNEDY. Mr. President, I will just take a moment of the Senate's time on this issue.

May we have order, Mr. President?

The PRESIDING OFFICER. The Senator from Massachusetts is correct. The Senate is not in order. Senators conversing will retire to the cloakrooms or to their desks.

Mr. KENNEDY. Mr. President, I just want to review very briefly for the Senate why this amendment is needed, and I will support it when the rollcall occurs.

About 15 or 18 years ago, before we had a mass movement of the major drug companies overseas, we had the distribution of a number of antibiotics around the world, and there was the export of chlorphorminol to Mexico and to South America. It was abused in those countries. It was an over-the-counter antibiotic and was abused, and it was the direct cause of hundreds of deaths among infants and children in those countries.

The fact is that many of the major drug companies have moved overseas. Many of the drug companies today, because there is no restriction in exporting antibiotics, continue to do so, and they do not have to go through the rigor of FDA approval. If those antibiotics are related in a chemical way to existing antibiotics, that existed before the FDA, they still do not have to be approved, so they can be exported around the world.

Mr. President, I believe that if we are going to follow the rationale for this legislation, we ought to insist that the antibiotics that are going to be exported meet the same kinds of tests that we have included in terms of the export of prescription drugs. So I will support that position. It has been my position for a number of years.

Having said that, Mr. President, I am troubled by the fact that our good friend from Ohio is saying—I think he said—that the basic bill is better than no bill at all, that he recognizes the importance of including any antibiotics in this kind of regime. There is a logic to that, for those of us who support it, and yet he is in the position that he does not believe that the existing regime is going to be effective.

You cannot have it both ways. It either makes some sense or it does not. It is going to ensure that we have a greater reliability. It is going to ensure that here in the United States, when various drugs or antibiotics are going to be exported overseas, the FDA will have a greater power to control these various elements in terms of quality and in terms of the potential danger to host countries.

So I hope, first of all, that this amendment will be accepted. But I also hope that if the Senator is prepared to believe that this is a valuable amendment and is worthwhile—and I know he does, because I have heard him speak to it—he will give consideration to supporting the legislation. Otherwise, I think there will be those who will rise and say that they are sympathetic to this idea, but this kind of amendment at this time is not appropriate. I think it is appropriate, and I will support it. But I hope that all those who followed the arguments of the Senator from Ohio for the past days about the whole regime and the whole structure that has been developed over a long period of time, with very careful negotiation, will support the legislation.

Obviously, it could be strengthened and changed and approved, as I believe we have just done on the issue of the infant formula. At this time, this makes the legislation more important and more significant, and I hope it will gain the support of those in this body who have any hesitancy in supporting the legislation.

Mr. HATCH. Mr. President, I find it somewhat inconsistent that the Senator from Ohio is so concerned about Third World countries with the infant formula.

When, at the same time, the distinguished Senator from Ohio is arguing that we should bring antibiotics under the purview of this bill. The purpose of this bill is to end this business of American companies going offshore and taking jobs with them, then selling any drug they want anywhere in the world, whether or not it is approved by anybody. That is current law, and it is terrible. This bill would end that.

This bill invites them back and gives them incentive to come back to this country. It says that even if FDA has not approved, if an FDA equivalent country—meaning a country that has a process as good as FDA, and there are 12 we list in this bill—approves a pharmaceutical, it can be manufactured in America and sold to first- and second-tier countries.

They are basically developed countries, totally capable of protecting themselves and taking care of themselves.

Our system does take about $80 million and 10 years to develop a product. The distinguished Senator from Ohio now wants to bring antibiotics within the purview of this bill.

There is no evidence that antibiotics have been misused in the world, even in Third World countries. If this amendment is adopted, these antibiotics are not going to become available, as they are developed, to Third World and other countries, without FDA approval, without approval by many people. That means that Third World countries, which need them the most, are going to be deprived of them.

Next, I might add that most U.S. antibiotics plants are located domestically. If the Senator from Ohio's amendment is accepted, U.S. companies are no longer going to invest the type of capital needed to develop antibiotic drugs in this country.

So one of the very things we are trying to do in this bill—to prevent the loss of biotechnology, the loss of innovativeness, the loss of science offshore, the loss of our companies, and the loss of jobs—would be defeated by this amendment. This amendment will amount to all those, while at the same time doing a disservice to the millions who are dying, or who will die, because they cannot get new forms of antibiotics. It seems inconsistent, but that is the way it is.

□ 1610

There is a lot that can be said. Antibiotics have for 40 years been readily exportable with little or no restrictions.

There were some problems in the 1970's but those problems have been resolved by a responsible industry. Even critics of the system acknowledge that in response to studies of the market, the industry and particularly the U.S. drug companies have done what is right; they have actively monitored industry standards, and they have solved the problems.

FDA has testified that currently there are no problems and that the current system has produced no problems.

Antibiotics have not been considered in committee. They are different from regular drugs. They are considerably safer. You can take many times the dosage without fear and without problems. Everyone but the Third World, in particular, depends on them and must depend on them.

Scientific experts say that the evidence simply is not there to change the current patterns of antibiotics trade and usage. The system has worked for 40 years. It really does not need changing.

It would undermine this bill tremendously if this amendment were to pass.

So I hope that my colleagues will keep that in mind.

This is landmark legislation. It improves current law. It protects people all over the world. It keeps jobs here and, frankly, causes us to not have to import the very drugs we could have manufactured here as a result of companies moving offshore. That is what is going to happen. That is what has happened under current law with regard to other pharmaceuticals.

Mr. KENNEDY. Mr. President, will the Senator yield for a question?

Mr. HATCH. I am delighted to yield.

Mr. KENNEDY. As I understand, when the FDA was established in 1938, it excluded many of the preexisting drugs that had been used or antibiotics that had been in use in our country; is that correct?

Mr. HATCH. That is correct.

Mr. KENNEDY. As a result, the drugs that were used prior to 1938 have been used for their derivative or their chemical derivative or equivalent. So many of even the new antibiotics that are on line now are very close in terms of chemical content to those that were at least accepted prior to 1938.

Those could be exported without any kind of review or without any kind of oversight.

That is what we found in the tragedies in Central and South America in the last 15 or 20 years.

Our former colleague, Senator Nelson, did a very extensive set of hearings on this for the Senate and provided extraordinary documentation of what had actually developed.

We have talked about this with the Senator from Utah. I do think that perhaps a strong case or even a stronger case could be made with regard to these particular items than the drugs themselves. I know we are on opposite sides on this issue. But it does seem to me that this amendment is justified if we are going to follow logic and the rationale of the legislation.

I know the Senator reaches a different conclusion, but I would hope that Senator METZENBAUM'S amendment would be accepted.

Mr. HATCH. Mr. President, any drug since 1938 would be covered by this. The new technology and drugs will be developed through DNA, and the amendment is going to exclude all those antibiotics for use throughout the world.

The current treatment of antibiotics is consistent with U.N. policy, which dictates that antibiotics should be accessible to people in Third World countries; U.N. policy sees this as vital. Under Senator METZENBAUM'S proposed amendment, only those antibiotics identical to those developed before 1938 would escape this heavy regulation.

This amendment will cost lives all over the world. Much of the future of new drug development is going to come through DNA, and these new drugs will all be covered by this amendment should this amendment be adopted.

This amendment will lead to a loss of jobs around the world and certainly from this country. And it will serve to further increase the balance-of-trade deficit.

Thus, I encourage colleagues to vote this amendment down.

If the distinguished Senator from Ohio wants to make further comment, I yield the floor to him.

Mr. METZENBAUM. Mr. President, let me address myself to this amendment. I appreciate very much the support of Senator KENNEDY who certainly had a great deal of experience in this entire area. I had said that bringing the antibiotics under the bill is better than not at all. The reason for that is that antibiotics now can be exported with no limitation. Regular drugs cannot be exported.

What this bill proposes to do is to provide a procedure for them to be exported, but in doing so it fails to provide the necessary protection that I believe is so important. But my amendment now would provide that antibiotics would come under the bill which, as I said, is better than nothing as pertains to antibiotics.

But as far as drugs are concerned, the bill still makes no sense. In fact, it is bad legislation. I believe that those who support this legislation—I do not happen to be one of them—would want to see to it that it is sufficiently all encompassing to include all drugs that are exported, antibiotics or otherwise. Under the legislation as it is before us on the floor, all drugs will be covered by the bill. My amendment, which has been supported by Senator KENNEDY, is an amendment that would provide that antibiotics would be covered by the same provisions as those that are presently in this legislation.

So I would hope that those who support the bill as well as those who may oppose the bill would recognize that we ought to treat all drugs equally, antibiotics as well as those that are in that category.

Therefore, I would hope that you would see fit to defeat the motion to table which I understand my colleague from Utah is about to make.

I say to the Senator form Utah I am prepared to vote.

The PRESIDING OFFICER. Is there further debate on the amendment?

Mr. HATCH. Mr. President, I move to table the amendment, and ask for the yeas and nays.

THE PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

THE PRESIDING OFFICER. The motion to table is not debatable.

The question is on agreeing to the motion of the Senator from Utah to lay on the table the amendment of the Senator from Ohio.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

□ 1620

Mr. EXON (when his name was called). Mr. President, on this vote I have a pair with the Senator from Vermont [Mr. LEAHY]. If he were present and voting, he would vote "nay." Therefore, I withhold my "aye" vote.

Mr. SIMPSON. I announce that the Senator from Florida [Mrs. HAWKINS], the Senator from New Hampshire [Mr. HUMPHREY], the Senator from Maryland [Mr. MATHIAS], and the Senator from Oregon [Mr. PACKWOOD] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Vermont [Mr. LEAHY] is absent because of death in the family.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 76, nays 18, as follows:

[Rollcall Vote No. 95]

YEAS—76

Abdnor	Evans	Murkowski
Andrews	Ford	Nickles
Armstrong	Garn	Nunn

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Exon, for.

NOT VOTING—5

Hawkins	Leahy	Packwood
Humphrey	Mathias	

So the motion to lay on the table amendment No. 1950 was agreed to.

□ 1640

Mr. HATCH. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. METZENBAUM. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1952

(Purpose: To require that, to be exported, any unapproved drug must be subject to a new drug application)

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the amendment pending at the desk, which I believe to be No. 1949, be temporarily laid aside in order that the Senator from Ohio may send an amendment to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Ohio [Mr. METZENBAUM] proposes an amendment numbered 1952.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 27, beginning with line 27, strike out through line 7 on page 28 and insert the following:

"(D) in the case of a drug to be shipped to a country on a list established under clause (i) or (ii) of paragraph (2)(A)—

"(i) an application for approval or licensing has been submitted or approved for the drug and the drug has not been the subject of any action by the Secretary or the Secretary of Agriculture denying, withdrawing, or suspending approval or licensing on the basis of safety or effectiveness or otherwise banning the drug; and

"(ii) such application has not lapsed or has not been withdrawn;

Mr. METZENBAUM. Mr. President, the amendment which I have sent to the desk is very basic. All it does is ensures that before an unapproved drug can be exported from the United States it at least has finished some basic clinical trials and is the subject of a new drug application before the Food and Drug Administration. We want to be certain that that which is possible under the pending bill not become the law. Under the pending bill, if you file the application, you are in a position to export. In other words, nothing has been done by the Food and Drug Administration. Nothing is in the pipeline moving it. It is just at the very earliest stages.

All we are suggesting with this amendment is a change at the point in the pipeline where you are permitted to make the exports that are provided for in the bill.

The purpose of this is to ensure that these drugs are in that pipeline moving along in the approval process, not merely having just been filed.

I strongly believe that any approved drug for export should have reached at least this stage of the process before it can be sent abroad.

The measure before us only requires that the unapproved drug have an IND, investigational new drug exemption, in order to be exported.

The problem is this: 90 percent of the drugs drop out of the FDA approval process after the IND state, which

is really the first step on the road to approval by our own Food and Drug Administration.

Let me be certain that those within hearing of my voice understand that we are talking about IND as an investigational new drug exemption.

Recently, I asked the Food and Drug Commissioner whether this IND provision really offers any realistic protection at all.

His response was the following:

The premise of the question is correct. Requiring that the exported drugs have an existing IND provides no assurance that the drugs in question will ever be approved in the United States. It is also true that no IND can give an absolute assurance of a drug's safety. It is understood that, for any drugs, adverse reactions may appear in a large postmarketing population that do not appear during clinical trials. Therefore, while the existence of an IND under which patients are being treated for the drug clearly provides some information about the safety of the drug, the amount of information is limited. It is also important to recognize that the bulk of the data collected under an IND is seen by the FDA only when a new drug application is submitted, except for severe adverse reactions that must be reported promptly to the agency.

The existence of an IND only means that there have been adequate studies conducted on animals to demonstrate that the drug is reasonably safe to test in humans and under carefully controlled conditions.

He concluded by saying:

Preliminary testing may then provide at least some information regarding the appropriateness of considering further use of the drug in humans.

Mr. President, I want to reemphasize an IND only means that the drug has been tested on animals. No human testing has been done.

My amendment simply moves the unapproved drug further along the approval process so that at least we know that clinical tests have been performed. I should point out that according to the FDA, the agency has to date approved only 62 percent of all original NDA applications, which means the existence of a NDA, or New Drug Application, is also no guarantee that the drug will eventually be approved in this country.

But at least, Mr. President, we will be providing more protection by moving the drug further along our own approval process. I believe the amendment is a reasonable one. I believe it provides only minimal protection. It does not say that you have to go all the way through the process and get the approval. It says that you have to go further along the process than merely filing it after you have conducted some tests on some animals. It requires some clinical testing on humans.

We must keep in mind that under any version of this legislation, transshipment or reexport cannot be prevented. We must assume that these drugs can and will end up in the Third World. Why should we not provide some minimal protection by requiring that the unapproved drug pass at least some basic clinical test before it can be exported from our shores?

The Senate should know just how easy it is for a company to keep a drug in a pipeline at the IND stage and really do nothing to move it along.

Let me quote again from the FDA and their response to a question asking for the distinction between an active and an inactive IND. "In general," said they, "a lack of activity in an IND does not provoke any FDA action, and we do not routinely monitor such activity with a view to taking regulatory action in the event of finding low activity." They went on to say:

An active IND is one that has not been discontinued or terminated. Studies do not have to be ongoing for an IND to be active. For example, the investigation may have been completed, but the sponsor may anticipate future studies under the IND. In order to keep the IND on active status, the sponsor need only report in the annual progress report of its intentions to resume the studies or that no clinical studies are being conducted. In general, if annual reports are received, FDA takes no further action. Under the law, however, the clinical investigation of a new drug may not be unduly prolonged. Therefore, failure to conduct investigations under the IND for several years could lead FDA to conclude that the investigation is being unduly prolonged and the sponsor might be requested to either discontinue the IND or develop a new drug application.

They concluded by saying:

While this is possible, such action is rarely taken. We prefer to let sponsors take their own decisions as to the pace of investigation.

Clearly, a drug could languish in the IND limbo for a long period of time. The bill has no time limit on how long the drug can stay at this most preliminary stage of FDA approval. This just reemphasizes the point that the IND provides no real protection for consumers in this legislation.

I say to my colleagues, let us at least require that the drug has clinical tests behind it. Let us give people some measure of protection. This is a minimal amendment. It does not kill the bill. It simply provides a little more protection for the people around the world who will be using these unapproved drugs.

I want to say to my colleagues, I am a realist. I said it before. I understand that many of these amendments will not be accepted because one Senator after another comes up to me and says, "Oh, you know, we have these drug companies or these pharmaceutical companies in my State." But I want to impress upon you that although they may make the argument that it in some way is going to affect their companies, think a little beyond that and think about the peoples of the Third World who may indeed be harmed by these drugs. They are the ones who have been writing to us. They are the ones, 20 nations throughout the world, that have written in and indicated their concern. Let me recite for my colleagues the countries from which we have already heard: Australia, in which the Minister of Health is engaged in debate and a Member of Parliament who indicated their concern about the Hatch bill; Nigeria, Malaysia, the European Economic Community Consultative Committee, England, Greece, Netherlands, Israel, several communications from India, Belgium, Thailand, and China. We have not debated a bill on the floor of the Senate in a long time, certainly one having to do with that which ostensibly would pertain only to domestic issues, that would have as much impact on America's image throughout the world as does this bill.

Now, my colleagues may decide to vote against this amendment and other amendments as well because for some reason there is an "engine" going—we have to pass this bill for the pharmaceutical companies.

We do not have to pass this bill for the pharmaceutical companies. There is no particular argument that can be made that they need it. The pharmaceutical companies in this country, the drug manufacturers, are doing exceptionally well. Look at their earnings record. The real issue, is, are we going to stand up and indicate our concern and our convictions? Are we willing to stand up and vote against this special interest lobby that has done such an effective job?

I knew as I came out on the floor of the Senate that it was going to be rough go. I was told that it would be a rough go and it would be hard to get votes. But the fact is, it is wrong, it is as wrong as it can be, to pass a bill to let a pharmaceutical company merely make a filing with the Food and Drug Administration and then send their products throughout the world. If we truly have concern, if we have compassion, if we have the intelligence which I am sure we do, to understand what this is all about, my colleagues will accept this amendment.

Mr. HATCH addressed the Chair.

The PRESIDING OFFICER. The Senator from Utah.

Mr. HATCH. Mr. President, this provision requires drug manufacturers to seek approval in this country at the same time that they are seeking approval abroad. Now, many small pharmaceutical companies, such as the biotechnology concerns, which we all have to be concerned about because that is the source of new innovations in pharmaceuticals, will be unable to afford the expense of seeking approval simultaneously in this country and overseas. Imposing the requirement in the Senator's amendment will force those companies, including biotechnology concerns, to license their tech-

nology to foreign manufacturers, precisely what this bill is trying to stop. We want to stop the erosion of our innovation and our engineering in our scientific community to foreign countries. We want to stop the emigration of jobs, especially since we have a way of doing it in a reasonable way that literally protects lives.

For the life of me, I cannot understand why anybody would not understand that this bill is such an improvement over current law which facilitates American companies moving offshore, manufacturing anything they want and selling it anywhere they want without restriction, without regulation. We propose to bring them back on shore restrict them to regulatory approval by at least an FDA equivalent country, and name the 12 major countries of the world with a drug regulatory agency capable of that task.

The amendment would undercut the intent of the bill to keep jobs in this country. Companies which are able to pursue approvals in different countries at the same time generally do not start the different processes on the same date. And given FDA's drug review lag, they often find themselves years away from being able to even file an NDA application in this country when they are nearing approval elsewhere. The necessity of gearing up to meet the foreign market would make it impossible for them to wait for export authority under this bill. They would simply be forced to build production capacity overseas, as they do now. In short, this amendment would destroy much of the incentive the bill offers.

The IND clinical investigative time period, which lasts until the NDA application is filed, is almost always much longer than the NDA final review period itself. Under the committee approach a manufacturer with a foreign approval would be able to build his plant and produce here at the beginning of the IND period, typically some 5–6 years before approval. Under the proposed amendment, he would have to forgo production for 3 years or more unless he builds overseas, since the NDA filing generally precedes approval by 18 months to 3 years.

Finally, the bill as written would permit biotechnology companies to export to tier I countries intermediates of biological products. These small biotechnology companies perform only one of the several processing steps such as cell replication, necessary to produce a drug utilizing biotechnology methods. Generally, they produce a crude form of the drug which must be refined before it is suitable for testing or use in humans. This intermediate work is performed on a contract basis for another company, often a foreign pharmaceutical house. But these contract companies cannot file an application for approval in the United States because they have no licensing rights from the manufacturer and no access to the safety and effectiveness data regarding the drug. Thus this amendment would bar export of the unfinished products and preclude our U.S. biotechnology firms from competing for these foreign contracts.

Mr. President, I move to table the amendment.

Mr. METZENBAUM. addressed the chair.

Mr. HATCH. I withdraw that request.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. The argument has been made by the distinguished Senator from Utah that companies could move offshore and do the same thing. Let them. They can do it now. But it is not satisfactory with them. If they could do it, why would they be mounting this massive lobbying effort to pass this bill? The reason they want this bill is not because they are such wonderfully patriotic citizens that they want to bring their operations back to this country. There is nothing in this bill that talks about bringing any operations back. What they want to do is ship overseas the products that they are manufacturing in their plants in this country without there being adequate protection. They can still do it after the Hatch bill. They can still send their products overseas to be manufactured. That is a specious argument. If there were one line in the bill that said a company which does this may not operate overseas, I would understand that. But there is nothing in the bill that even suggests that. No one came before our committee and said, "If you pass this bill, we are going to bring back the operations to this country." That does not exist. That is a world of make believe. That is not what the facts are.

□ 1700

They want this bill so that they can manufacture in this country, in the plants they presently have operating, and send their products throughout the world, without adequate protection.

The argument is made that we are going to send them to other countries that have facilities as good as ours. The Senator from Utah knows that there already have been discussions in the House about adding seven more countries, besides the 15 listed here. In addition, the Secretary of Health and Human Services has the right to designate the second-tier countries, and the second-tier countries can be anybody that the Secretary of HHS decides upon.

Mark my word: With the heavy-hitting lobbyists we have around this community, there are many countries that will be added to the list by the Secretary of HHS. Go out and hire your hired hand, your loaded gun, and he will be able to go over to HHS, and maybe he will have been the former Secretary of HHS. That is the way it works around here. Or a Deputy Secretary, or special counsel for him.

No, this bill is not going to provide protection for the people in the third world, and that is why they have been sending in so much mail. Can you believe it? Twenty countries have been heard from—well over a hundred communications. These have not been from a single individual. This has been from large-based community organizations, medical people.

I had a man call upon me the other day, a very able individual, from Bangladesh, literally pleading, saying: "I'm in the pharmaceutical business. We have great respect for American pharmaceuticals, but don't send us that which you are not willing to use on your own people. If you are not willing to use it, don't send it to us."

People throughout the world believe that when it says "Made in America," they can count on it, that it has been checked. But it will not have been checked under this legislation.

All we are saying with this amendment is that you have to take the process a little further along the pipeline than at the present. The way the bill presently reads, all you have to do is file, and then you can start exporting. We are saying: "No, you ought to go further along the pipeline, to provide some element of protection, to have some clinical testing with respect to humans, at least to indicate you are doing that."

Mr. President, I think this amendment makes good sense. If the Senator from Utah wishes an up-or-down vote, that is fine with me. If he wishes to table it, that is fine with me. My guess is that he will have the votes, but he will not have right on his side.

Mr. HATCH. Mr. President, I enjoy listening to the Senator from Ohio more than any other Senator. Maybe that is one reason why I have such a migraine headache today.

Mr. METZENBAUM. Use exported drugs.

Mr. HATCH. Maybe I had better import some headache pills to take care of it.

Mr. President, I think it is very apparent that this amendment would undermine the whole intent of this bill. The intent of this bill is to solve problems that presently exist. Everything the Senator talks about exists under current law, and people literally are suffering all over the world because of it. What this bill does is that it runs into the process American companies by giving them incentive to stay here, create jobs here, solve the balance of payments problem, keep our technolo-

gy here, and keep us preeminent in the world in the field of pharmaceuticals. If the Senator's amendment is adopted, then basically it would negate the purpose of this bill.

We could go on and on, and many arguments could be made. Virtually everything the Senator says is rebuttable. At least, it has been cleared up that there are not 20 countries against this bill, but that people in 20 countries, and mostly radical organizations who do not believe in any company, are against what we are trying to do.

With that, Mr. President, I move to table the amendment, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk called the roll.

□ 1710

Mr. EAGLETON (when his name was called). Mr. President, on this vote I have a live pair with the Senator from Vermont [Mr. LEAHY]. If he were present, he would vote "no." I have previously voted "yea." I withhold my vote.

Mr. SIMPSON. I announce that the Senator from Colorado [Mr. ARMSTRONG], the Senator from Florida [Mrs. HAWKINS], the Senator from New Hampshire [Mr. HUMPHREY], the Senator from Oregon [Mr. PACKWOOD], and the Senator from Idaho [Mr. SYMMS], are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Vermont [Mr. LEAHY], is absent because of death in the family.

□ 1720

The PRESIDING OFFICER (Mr. BOSCHWITZ). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 83, nays 10, as follows:

NOT VOTING—6

Armstrong	Humphrey	Packwood
Hawkins	Leahy	Symms

So the motion to lay on the table amendment No. 1952 was agreed to.

□ 1730

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, is the Senator from Ohio correct that his amendment No. 1949 is the pending business?

The PRESIDING OFFICER. That is correct.

Mr. METZENBAUM. Mr. President, this amendment provides for notification to the various embassies throughout the world when products are shipped into those countries.

It is my understanding after conversation with my distinguished colleague from my own State, Senator GLENN, the senior Senator from our State, that he has an amendment that he would like to offer as a substitute for my amendment which, as I understand it, would actually provide for a broader coverage than even the amendment that I have offered.

I wonder if the senior Senator from Ohio would care to be heard at this point.

Mr. GLENN. Yes. I appreciate that very much.

AMENDMENT NO. 1953

(Purpose: To reform certain regulatory procedures governing the export of banned and severely restricted substances)

Mr. GLENN. Mr. President, my amendment covers a broader spectrum than that covered by my distinguished colleague from Ohio. I would like, if it meets with his approval, to substitute this amendment for his, if he has no objection.

Mr. METZENBAUM. I have no objection. If the Senator is moving to substitute the amendment, I am prepared to accept the substitute.

Mr. GLENN. Mr. President, I submit the amendment as a substitute for the pending amendment, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Ohio [Mr. GLENN] for himself and Mr. PROXMIRE, proposes an amendment numbered 1953 to amendment No. 1949.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the matter proposed, insert the following:

SEC. 9. (a) Not later than December 31 of each year, the Director of the Office of Management and Budget shall prepare for the Department of State which, in turn shall provide and inform the public and foreign governments, through their embassies in the United States or other appropriate means, an annual report which summarizes—

(1) all final agency actions taken during the preceding fiscal year with respect to banned or severely restricted substances, and

(2) any additional action taken during the preceding fiscal year with respect to banned or severely restricted substances which were first banned or severely restricted during a fiscal year prior to the fiscal year covered by the report.

(b)(1) No banned or severely restricted substance may be exported from the United States unless—

(A) the person intending to export the substance from the United States provides written notice to the agency responsible for carrying out the provision of law specified in subsection (c) which is applicable to the substance, prior to the first shipment to a country after regulatory action, stating such person's intent to export the substance and the intended country of destination; and (d) in addition notice be made to foreign embassies of all final regulatory actions at the time they are taken.

(B) the agency provides the Secretary of State with a statement concerning the substance which contains—

(i) the name of the substance;

(ii) a summary of any action taken by the agency with respect to the substance, including a description of the grounds for such action and a citation of the statutory authority for such action;

(iii) a description of the determined risks to human health or safety or to the environment that may result from the use of the substance; and

(iv) a specification of the officer or employee of the agency who may be contacted by the government of any foreign country to which the substance is intended to be exported in order to obtain additional information about the substance; and

(C) the Secretary of State delivers a copy of the statement submitted under subparagraph (B) to an appropriate official in the embassy of the country of destination or transmits it to such country by other appropriate means.

(2)(A) The provisions of paragraph (1) shall supersede any other provision of the law to the extent such provision is inconsistent with paragraph (1).

(B) No law enacted after the date of the enactment of this Act shall supersede this subsection unless it does so in specific terms, referring to this Act and declaring that the new law supersedes the provisions of this subsection.

(C) Nothing in this subsection authorizes the disclosure to the public of bona fide

trade secrets or other confidential business information.

(c) For the purpose of this section, the term "banned or severely restricted substance" means—

(1) a food or class of food which—

(A) is adulterated, as defined by rules or orders issued under section 402 (a) or (c) (21 U.S.C. 342 (a) or (c)), or

(B) is in violation of emergency permit controls issued under section 404 (21 U.S.C. 344),

of the Federal Food, Drug, and Cosmetic Act;

(2) a drug which is—

(A) adulterated as defined by rules or orders issued under section 501 (a), (b), (c), or (d) (21 U.S.C. 351 (a), (b), (c), or (d)),

(B) misbranded, as defined by rules or orders issued under section 502(j), (21 U.S.C. 352(j)), or

(C) a new drug or new animal drug for which an approval is not in effect under section 505 (21 U.S.C. 355) or section 512 (21 U.S.C. 360), respectively,

of the Federal Food, Drug, and Cosmetic Act;

(3) an antibiotic drug which has not been certified under section 507 (21 U.S.C. 357) of the Federal Food, Drug, and Cosmetic Act;

(4) a drug containing insulin which has not been certified under section 506 (21 U.S.C. 356) of the Federal Food, Drug, and Cosmetic Act;

(5) a device which—

(A) is adulterated, as defined by rules or orders issued under section 501(a) (21 U.S.C. 351(a)),

(B) is misbranded, as defined by rules or orders issued under section 502(j) (21 U.S.C. 352(j)),

(C) does not conform with a performance standard issued under section 514 (21 U.S.C. 360d),

(D) has not received premarket approval under section 515 (21 U.S.C. 360e), or

(e) is banned under section 516 (21 U.S.C. 360f), of the Federal Food, Drug, and Cosmetic Act;

(6) a cosmetic which is adulterated, as defined by rules or orders issued under section 601 (21 U.S.C. 361) of the Federal Food, Drug, and Cosmetic Act;

(7) a food additive or color additive which is deemed unsafe within the meaning of section 409 (21 U.S.C. 348) or section 706 (21 U.S.C. 376), respectively, of the Federal Food, Drug, and Cosmetic Act;

(8) a biological product which has been propagated or manufactured and prepared at an establishment which does not hold a license as required by section 351 (42 U.S.C. 262) of the Public Health Service Act;

(9) an electronic product which does not comply with a performance standard issued under section 358 (42 U.S.C. 263f) of the Public Health Service Act;

(10) a consumer product which—

(A) does not comply with a consumer product safety standard adopted under sections 7 and 9 (15 U.S.C. 2056 and 2058) other than one relating solely to labeling,

(B) has been declared to be a banned hazardous product under sections 8 and 9 (15 U.S.C. 2057) and 2058),

(C) presents a substantial product hazard under section 15 (15 U.S.C. 2064), or

(D) is an imminently hazardous consumer product under section 12 (15 U.S.C. 2061),

of the Consumer Product Safety Act;

(11) a fabric, related material, or product which does not comply with a flammability standard (other than one related to labeling) adopted under section 4 (15 U.S.C. 1193) of the Flammable Fabrics Act;

(12) a product which is a banned hazardous substance (including a children's article) under sections 2 and 3 (15 U.S.C. 1261 and 1262) of the Federal Hazardous Substances Act;

(13)(A) a pesticide which, on the basis of potential risks to human health or safety or to the environment,

(i) has been denied registration for all or most significant uses under section 3(c)(6) (7 U.S.C. 136a(c)(6)),

(ii) has been classified for restricted use under section 3(d)(1)(C) (7 U.S.C. 136a(d)(1)(C)),

(iii) has had its registration cancelled or suspended for all or most significant uses under section 6 (7 U.S.C. 136d),

(iv) has been proceeded against and seized under section 13(b)(3) (7 U.S.C. 136k), or

(v) has not had its registration cancelled, but requires an acknowledgement statement under section 17(a)(2) (7 U.S.C. 136o(a)(2)), of the Federal Insecticide, Fungicide, and Rodenticide Act, or

(B) a pesticide chemical for which a tolerance has been denied or repealed under section 408 (21 U.S.C. 346(a)) of the Federal Food, Drug, and Cosmetic Act; and

(14) a chemical substance or mixture—

(A) which is subject to an order or injunction issued under section 5(f)(3) (15 U.S.C. 2604(f)(3)),

(B) which is subject to a requirement issued under section 6(a)(1), 6(a)(2), 6(a)(5), or 6(a)(7) (15 U.S.C. 2605(a)(1), 2605(a)(2), 2605(a)(5), or 2605(a)(7)), or

(C) for which a civil action has been brought and relief granted under section 7 (15 U.S.C. 2606),

of the Toxic Substances Control Act.

Mr. GLENN. Mr. President, I rise to offer an amendment to S. 1848. This amendment is identical to S. 1380, the Hazardous Substance Export Notification Act of 1985. This legislation regularizes notification procedures currently required by law for the export of a hazardous product or substance. It also mandates prior notification of foreign officials, and provides a common format containing minimum information about the nature of the product and why it was banned or restricted in the United States. The second portion of the initiative requires the compilation of an annual compendium listing all final affirmative actions by U.S. agencies banning or severely restricting substances. Mr. President, before I proceed to discuss my amendment, I want to stress that I support the passage of S. 1848 and do not intend to obstruct its progress with this amendment or in any other way. My amendment adds no new regulation; it has no budgetary impact; and it does not affect the objectives or the implementation of S. 1848.

Exporting banned or severely restricted substances has often forced the Federal Government to consider the roles they play protecting health, safety, and the environment, and the promotion of U.S. trade and products. U.S. exports of these materials in 1984 were $22.3 billion while world chemical exports were estimated at over $150 billion. However, as the chemical manufacturing market has grown, U.N. statistics indicate that approximately 2 million persons in developing countries suffer acute pesticide poisoning annually. Thus, concern has increased that hazardous substances are exported to developing countries which lack the technical expertise, environmental infrastructure, and safety standards present in the industrialized, exporting nations.

The use or misuse of toxic materials poses serious environmental and health hazards which impair the long-term sustainability of resources, and can result in the deaths of thousands of people. The tragedy at Bhopal, India, where approximately 3,000 people died is a case in point of a situation that might have been avoided by providing good, sound, government-to-government information.

While both manufacturers and environmentalists have cooperated in their efforts to protect the reputation of the "Made in U.S.A." label throughout the world, and in some cases, have gone beyond statutory requirements, procedures must be established which alleviate the potential disasters which could occur without this information.

I want to point out that the problems cited above are not new. Several House committees have been following this issue for more than 10 years; and, in 1980, after 2½ years of very careful consideration, comment, and debate, the Carter administration signed an Executive order establishing a Federal policy on this issue designed to strengthen the position of the United States as a trading partner and to streamline and regularize existing regulations. The Carter order was rescinded 31 days after Ronald Reagan became President. He directed the Departments of Commerce and State to assess existing procedures and make recommendations. Their report was submitted to the Interagency Trade Policy Committee, chaired by the U.S. Trade Representative, which approved its implementation nearly 4 years ago. This amendment basically mirrors their recommendations.

Each of the six statutes regulating banned or severely restricted substances, as legislated by TSCA, FIFRA, FDA, and CPSC, provide an export notification scheme although they differ in manner of implementation and content. For example, under FIFRA, if there is an export of an unregistered pesticide the exporter must first receive an acknowledgment from the importer stating that the importer is aware of the product's unregistered status. After receiving the acknowledgment, the exporter provides it to EPA. EPA then notifies the State Department which in turn notifies a designated individual in the foreign government. This procedure completely differs from that of TSCA which EPA also administers. But, in contrast to

FIFRA, EPA notifies directly the foreign embassy located in the United States. Other agencies have entirely different notification procedures which they follow although the ends are the same—to provide information.

Mr. President, let me quote from a joint report which was sent from then Secretaries Baldridge and Haig to the U.S.T.R. Bill Brock, published in the International Environment Reporter. "The laws," the report said, "lack consistency with respect to the timing of notices, the information to be provided, and the method of transmission." And further, "there should be a consistent, uniform notification procedure." The report goes on to say that the United States should commit itself to providing information in a timely fashion to other nations when substances are severely restricted here or do not comply with specific safety requirements.

I believe, as do my colleagues Senators BUMPERS, INOUYE, and GORTON, that the United States has an obligation to inform the governments of those countries which lack sophisticated, technical knowledge about the potentially dangerous nature of these substances. A uniform and prior notification scheme, coupled with a compendium of U.S. banned or severely restricted substances, will be a first step in the direction of balancing trade considerations against environmental protection abroad.

Mr. President, under current law, export notification varies according to statute. For example, under FIFRA, the current law requires that the Department of State be notified of any hazardous shipment. Under TSCA, EPA notifies the importing country and the Department of State as well. Under those items covered by CPSC, the importing country is notified directly.

So what we have under these different regulatory bodies that control exports out of the United States is indeed four different reporting procedures.

This amendment is very simple. This amendment says that the manufacturers and members of industry will keep right on submitting their required paperwork to whatever the applicable regulatory agency. But at that point that Government agency would report directly to the Department of State, and the Department of State would represent and inform our Government to the foreign embassy located in the United States.

We also would have a further requirement for reporting any final regulatory actions taken on a banned or severely restricted substance goes through exactly the same channels.

So this amendment straightens out what right now is a morass of misunderstanding and curcuitous routes of reporting which foreign nations may find very confusing. The amendment makes one stop shopping, in other words, and simplifies the whole procedure.

We have a draft of a letter from the Commerce Department that basically approves of what I am doing here. We have addressed the proposals that they made in that draft letter. I think we have taken care of everyone's concerns. If this is acceptable to the floor managers of the bill, I do not think we need a record rollcall vote unless they would so desire.

Mr. President, I move the amendment as a substitute to what has been the pending amendment, and hope it can be accepted.

Mr. HATCH addressed the Chair.

The PRESIDING OFFICER. The Senator from Utah.

Mr. HATCH. Mr. President, I have to admit that the amendment is a very broad amendment. In the eyes of the distinguished Senator from Ohio, it is an important amendment. I know what he is trying to do. He is trying to consolidate the reporting, and make it more consistent. However, I have a feeling that there are a number of branches of Government which are going to be very upset with this amendment. I have not had nearly enough time to study it as I should have had. I am not finding fault with the distinguished Senator from Ohio. He has always been cooperative and we all know what a decent man he is.

I am inclined to accept the amendment but with this caveat: there may be some real hue and cry against this amendment from other sources. If we have to work on it in conference, perhaps I will be able to have the distinguished Senator work with me to try to accommodate his concerns of which I just presently do not have enough knowledge.

All I can do is ask him to exercise his good faith in working with us in conference to resolve any problems that may exist. I do know that this is a broadly drafted amendment. I know there is some concern by some agency people who would not like to have the amendment. But I am inclined to accept it, and go from there if the distinguished Senator will continue to work with me on it, as I need his help.

Mr. GLENN. Certainly. I appreciate very much the consideration of the distinguished floor manager. I would be glad to have it accepted on that basis because from what my staff has done we have found no objection to it. Some of the concerns of the Department of Commerce we have addressed. Some of the concerns of the senior Senator from Utah, Senator GARN, we have addressed.

Mr. HATCH. The Senator spoke with me, and told me that ordinarily he would probably oppose this, but knowing the senior Senator from Ohio he felt he wanted to go with the Senator. I feel the same way.

I might add that the Senator has tried to accommodate our concerns, and he made some changes in the amendment.

I have to be honest in expressing myself, and I do not know the ramifications of this amendment well enough to know whether it is going to cause a lot of problems or not.

I am inclined to accept it. The distinguished Senator has moved that it be accepted. I am inclined to go along with it.

□ 1740

Mr. President, I would be glad to have it accepted on the basis that we will continue to work together if there are complaints about this. I do not believe there will be, but I will be glad to work with the Senator from Utah if there are complaints.

Mr. METZENBAUM. Mr. President, I am very happy about the amendment of the senior Senator from Ohio. I think there are strong feelings. I believe he has provided a broader base for emphasis. In handling it through the State Department, my concern was that the embassies be notified in order that they would provide some protection or at least have knowledge about the subject that the products had been sent to those countries. I think this is a good amendment. I am happy to see that the Senator from Utah is prepared to accept it. Under those circumstances, Mr. President, I suggest we proceed.

Mr. GLENN. Mr. President, I ask unanimous consent that the distinguished Senator from Wisconsin [Mr. PROXMIRE] be added as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GLENN. Mr. President, I move adoption of the amendment.

The PRESIDING OFFICER. Is there further debate? If not, without objection, the amendment is agreed to.

The amendment (No. 1953), to amendment No. 1949, was agreed to.

Mr. GLENN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HATCH. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as amended.

Without objection, the amendment, as amended, is agreed to.

The amendment (No. 1949), as amended, was agreed to.

Mr. METZENBAUM. Mr. President, since the amendment of the distinguished senior Senator from Ohio was a substitute amendment, was that not

previously accepted to the amendment of this Senator from Ohio?

The PRESIDING OFFICER. The amendment of the distinguished Senator from Ohio was a substitute amendment for amendment No. 1949. The Senate still had to vote on amendment No. 1949 as amended by the substitute.

Mr. METZENBAUM. The question is whether the amendment, as amended, will be agreed to. Is that correct?

The PRESIDING OFFICER. The amendment, as amended, has been agreed to.

Mr. METZENBAUM. Mr. President, I move to reconsider the vote by which the amendment, as amended, was agreed to.

Mr. GLENN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1954

(Purpose: To prohibit the shipment of a drug from the United States if the drug is found to be present in a country to which shipment is not authorized)

Mr. METZENBAUM. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Ohio [Mr. METZENBAUM] proposes an amendment numbered 1954.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 35, beginning with line 4, strike out through line 17 on page 37 and insert in lieu thereof the following:

"(8)(A) If at any time the Secretary or the Secretary of Agriculture determines, with respect to a drug which is authorized to be shipped under this subsection, that such drug is present in a country to which shipment is not authorized under this subsection, the Secretary or the Secretary of Agriculture, as the case may be, shall—

"(i) immediately prohibit the shipment of such drug from the United States to any country;

"(ii) give the person shipping the drug from the United States prompt notice of such determination and prohibition; and

"(iii) afford such person an opportunity for an expedited hearing.

Mr. METZENBAUM. Mr. President, this amendment simply states that if an unapproved drug is found in a Third World country the Secretary shall immediately halt the export of that drug. If the drug is in that Third World country and the Secretary learns about it, then he must immediately stop the further export of that drug.

This is the minimum that should occur if we are serious about enforcing any of the transshipment provisions of the bill.

The procedure proposed in the bill actually provides no real protection. The Secretary can immediately suspend export of an unapproved drug found in a Third World country only if the drug is found to pose an imminent hazard as defined under our food and drug laws. But, Mr. President, the imminent hazard standard is the most difficult to apply. It has only been used once in 20 years to pull a drug off the market in the United States.

Yet, since 1971, there have been over 7,000 drug recalls in this country. If this provision is used so rarely to recall a drug in the United States, how effective will it be in recalling a drug from a country thousands of miles away?

The proponents can argue there are other procedures in the bill to stop transshipment once it is discovered. The Secretary notifies the country as well as the U.S. company shipping the drug from our shores. Then the U.S. company has 14 days to issue a report to the Secretary on what it knows, if anything, about how their unapproved drug ended up in some far-off Third World country.

Then after 60 days if the drug is still being shipped to the Third World, the Secretary can prohibit export, but only if the drug falls under the rarely used imminent hazard criteria or if the U.S. company ships the drug to an importer knowing that the importer continues to ship the drug to a Third World country.

Mr. President, I want to say to the manager of the bill on the other side and to all others who may be interested that at the conclusion of my remarks in connection with this amendment, or at the conclusion of the remarks of the Senator from Utah, in case he wishes to be heard in connection with this matter, I will suggest that we enter into a unanimous-consent agreement that we vote tomorrow at 10 a.m. on this amendment.

Since I understand the procedure is to hotline this to the Members of both sides, I am advising those who are responsible for this kind of matter that it is my intent to make that suggestion.

Mr. HATCH. Will the Senator yield at that point?

Mr. METZENBAUM. I certainly will.

Mr. HATCH. As I understand the request, it is to vote at 10 a.m. tomorrow on this amendment.

Mr. METZENBAUM. I have not made that request at the moment because I believe the people on both sides of the aisles would probably want to clear that with the majority leader and the minority leader. I am not making it as a unanimous-consent request at the moment. I am merely indicating that when I conclude my remarks I intend to do that.

Mr. HATCH. The Labor Committee has a markup at 10 a.m. tomorrow morning.

Mr. METZENBAUM. I understood the chairman came to the floor to advise me that if it was necessary to do so, he would be prepared to set that hearing over to another day.

Mr. HATCH. We would rather not do that because there is a large agenda which the distinguished Senator from Ohio as well as others are concerned about, some of which he will oppose and some of which others will oppose.

Mr. METZENBAUM. We can discuss that further. A number of people have indicated that they wanted to get away this evening. I was trying to be accommodating in that connection. The Senator from Ohio has no great demands on his time in order to leave at a particular point, so we will just proceed and perhaps have a vote yet this evening.

You do not have to be a Philadelphia lawyer to know that the provisions which are presently in the law are unenforceable. Our own FDA has testified that such restrictions are illusory. In testimony before the Labor Committee on June 5, the Food and Drug Administrator stated, "I think that will be very difficult. Transshipment would be the responsibility of the country to which the first shipment is made."

In other words, we send the product to some other country and then the worry is what will happen when it gets to that other country. Will it be shipped to some Third World country?

So we asked the Food and Drug Administration were they in a position to give us assurances along that line and I just cited that they said it would be very difficult, and indeed it would be.

□ 1750

Mr. President, many European countries including France, England, Germany, Switzerland, et cetera, permit the export of unapproved drugs to the Third World. Now, that is a reality. Those countries and others as well do permit the export of unapproved drugs to the Third World.

Now, is there somebody who really believes that if they permit those drugs to be exported from their countries, they are somehow going to protect the drugs that we send over there? If they allow the practice, what interest will they have in ensuring that the United States unapproved drugs are not reexported? The problem is really one of enforcement as our own FDA again made clear in its June 5 testimony. Said they, "You include some kind of a provision in the legislation against transshipment, but I think once the exportation is made and the product is in the foreign country, you lose your ability to make the

requirement stick and you lose your ability to police."

What could be clearer? "Once the exportation is made and the product is in the foreign country," says the FDA, "you lose your ability to make the requirement stick and you lose your ability to police."

Now, the Pharmaceutical Association, which is the great supporter of this bill, stated that they agree it would be difficult to enforce a prohibition against the transshipment of drugs." The GAO has documented our failure to control the reexport of computer and nuclear technology. If we cannot control the reexport of such vital technology, how can we hope to exert any real control over those unapproved drugs?

Mr. President, this whole issue of transshipment points to the weakness of the so-called protections in this bill. The real issue is that this bill is going to make it possible to export drugs and transship them throughout the world. This amendment will not keep that from happening but it will say that once we learn about it, there will be no further exports.

Oh, the pharmaceutical manufacturers, even though they recognize there is no way of protecting the transshipment of those drugs, will not support this amendment. So if you are voting with the Pharmaceutical Manufacturers Association, vote this amendment down, because they do not want it. We are supposed to believe that if we have 15 countries in a bill declare they have adequate FDA's, oh, we are as we sit here this afternoon that each of those countries has an adequate FDA. Come on. Who are you kidding? We do not know that at all. We know they have nice names and we like those names, and they are respected countries and they speak the language well and they are cultured. But that does not mean they have adequate FDA's. But we are saying we can go ahead and export drugs not approved for use by our own citizens and send them to those countries which do not prohibit the exporting of their own drugs, we can be confident they are going to protect us and see to it that our drugs are not transshipped. I believe we better think again. There are a lot of countries to which unapproved drugs can be exported, and we are not going to know what we shipped over and where it finally wound up.

Oh, yes, we will know sometime. I forgot. We will know when there is a tragedy. We will know when there is an outbreak of illness. We will know when there are some deaths and they say "We thought it was all right because it says here that it is made in America. And if it is made in America, it is supposed to be safe." But it will not be safe because there will not be one American in 230 million who will know whether it is safe or not safe.

Now, in addition to the 15 countries that are listed, the Secretary of Health and Human Services has the right under this legislation to add some more countries. Let me give you the names of some major lobbyists that can probably help you get your country listed. The countries of the world ought to understand who has influence and who works for what fee. And I am certain that if this bill becomes law some of those major lobbyists will be back here saying to HHS "Add this country, add that country." Can you really believe the Secretary of HHS is going to say no?

There were seven countries that were proposed as part of a suggested agreement over in the House already, and I say on the floor of the Senate that I do not believe those seven countries can provide that kind of protection, nor do I believe their FDA's can be compared to ours. But a drug cannot be exported to these second-tier countries unless they have first been approved by 1 of the 15 tier 1 countries. OK, big deal. One of the 15 tier 1 countries says OK. Then the Secretary of HHS permits the sale to go to any one of a number of other countries.

This approach of saying that if 1 of those other 15 countries says it is OK really permits one country to decide our drug export standards. Mr. President, that is risky business.

On October 11, 1985, the French Government pulled the arthritis drug Isoxicam off the market. It was linked to five deaths and an undetermined number of injuries. The drug was not approved by the FDA for use in our country. We have our own strict standards to thank for that. However, under S. 1848, the Hatch-Kennedy bill, this drug could have been manufactured in the United States and shipped all over the world with a "Made in America" label.

England, another country on the approved list, has pulled six drugs off the market over the last 2 years which it had earlier approved. These six drugs were approved in the United Kingdom and withdrawn outright. These are drugs which have been linked to severe reactions and deaths. Osmosin was linked to 15 deaths and Flenac was linked to 15,000 adverse reactions and an undetermined number of deaths. None of these drugs were approved for use in the United States. However, under S. 1848, these killer drugs could have been shipped all over the world and we could stand so proud that we would have the "Made in America" label.

Mr. President, it is absurd for Congress to list 15 countries in this bill and claim that we know they have adequate drug approval authority. Is there anybody in the Senate who is in a position to say whether 1 or all of those 15 countries have adequate drug approval authority? But if one of them approves the drug, then under this bill the drugs can be exported to the second-tier countries.

I asked the FDA Commissioner if he could list such countries, and his reply was:

> As stated in prior testimony, we would be most uncomfortable to be put in the position of having to make difficult, if not impossible, subjective judgments on the relative quality of drug regulatory authorities of other sovereign States.

In response to questions from the House side, the agency was even more adamant. Said they:

> Such a list cannot be provided because of difficulties in evaluating the stated criteria such as attempting to determine whether prescription drug labeling information is accurately conveyed to physicians and pharmacists in various countries.

(Mr. HECHT assumed the chair.)

□ 1800

Mr. METEZENBAUM. Mr. President, I read a response to a question on the House side that the FDA gave in connection with this issue:

> Such a list cannot be provided because of difficulties in evaluating the stated criteria such as attempting to determine whether prescription drug labeling information is accurately conveyed to physicians and pharmacists in various countries. Whether prescription drug information is also conveyed to patients depends on various countries' complex policies and practices regarding labeling for patients. With respect to adverse drug reactions, we do not have definitive information on most countries' formal requirements or agreements to obtain such data.
>
> Finally, to access a country's effectiveness in administering and enforcing its drug policies, a knowledge of actual daily operating procedures, as well as information on the qualifications, training, enthusiasm, skill, and knowledge the staff of the governmental authorities would be required. In short, no matter what legislative requirements are in place concerning approval or withdrawal of drugs, it is extremely difficult to access foreign regulatory decisions in the absence of information on how the regulatory system performs in practice.

So, Mr. President, our own FDA, with all the experience, with all the scientific expertise, with all the contact they would have with foreign drug regulatory authorities, says it is impossible to draw up a list of countries with adequate FDA. But we in the Senate are so wise, we have so many answers, that we are willing to list them; we are going to say which ones are going to protect the people of the world.

The supporters of this legislation say: "Yes, sir; wave that magic wand, and 15 countries appear on the adequate list."

I ask my colleagues in this body: If you knew that some drug had been approved by 1 of the 15 countries—I will not name them, but take any one; take the one that you think the least of, not the best of—and you knew it had

been approved by the FDA, or whatever they call it in that country, are you really sure you would be prepared to have your child or grandchild or wife use that drug? I doubt it very much. I know that I would not. There are some countries, yes. But from all those 15 countries? No. Loudly and clearly, no.

□ 1810

I again repeat that before this bill is concluded, there will be more than 15 countries on the list.

Is it not marvelous what we are saying here on the floor of the Senate in this legislation? Not only marvelous, I think it is mysterious. Not really. We know it is all a ruse. There is no science or safety concerns that are evident behind this list of 15 countries.

We think of those countries and we have some respect for them and we do business with them. So we say if their FDA approves it, that is good enough for us; then we can ship those drugs to all of those second tier countries.

There is only one, and only one, concern as to why we are passing this bill, why we are naming the 15 countries. Nobody in Congress made it up. The list came from the Pharmaceutical Manufacturers Association. It is their list, not the list of Congress. Let us not call it tier 1. Let us call it the PMA-approved list for unapproved drug exports.

It is a very dangerous game we are playing here, Mr. President. We are trying to create a legislative illusion. Let us pretend these 15 countries have FDA's just like our own. Let us pretend further that once the drug goes to England or France it will not end up in the Third World.

Mr. President, the Senate should not be under the illusion that the problem we face is a drug lag and that the drugs approved by the countries on the list will eventually be approved in the United States.

I have before me an analysis of the FDA study entitled "Compendium of New Drug Approvals in 11 Industrialized Countries, 1970 to 1983." The U.S. Food and Drug Administration put together the compendium in February of 1985.

The analysis details the percentage of drugs first approved in industrialized countries and then later approved in the United States.

Take Italy. It is now on the list of approved countries. But only 10 percent of the drugs first approved in Italy are later approved by the FDA for use in the United States.

Take Japan. Japan is supposed to be doing such a magnificent job in so many areas. But only 7 percent of the drugs first approved in Japan are later approved in the United States.

West Germany, with all of its scientific knowledge, only 20 percent of the drugs they approved first are cleared by our own FDA.

In France only 12 percent of the drugs first approved in France end up being approved in the United States.

Australia and Canada are in the 50 percent range; England and Sweden, 40 percent; and Switzerland, 29 percent.

So let us not kid ourselves. We have the strictest standards in the world and the standards of other countries vary widely. To throw them into a bill and say they have adequate FDA's is legislation by fantasy, not reality.

These drugs will end up in the Third World, and we would have allowed them to be made in America, simply because Italy, Japan, or France approved them first.

What I am saying is simple: The drugs that they are approving in other countries are not being approved in this country—7 percent of them, 12 percent of them, 20 percent of them. And yet what we are doing here in this bill is we are saying that if 1 of those 15 countries, and the countries I have already mentioned are part of that group of 15, if 1 of those group of 15 countries approved the drug, then it may be transshipped to one of the tier two countries.

Who cares if they are unlikely ever to be used in this country. Let us get them out on the market. Let us send them all over the world.

The best safeguard we could possibly offer the world is the one that is in place right now: If the drug is not safe enough or effective enough for the American people then do not export it.

Mr. President, that is the long and short of it. If a drug is not safe enough for the people of America, why in the world are we standing here today pushing legislation to make it possible to export it?

We not only will have mud on our face, I am afraid we will have blood on our face. I am afraid we will suffer the greatest embarrassment that this Nation has suffered in a long time.

Other nations are writing to us and saying "Please don't do that. Please don't, don't send us drugs that you won't use for your own people."

And we are saying "Don't tell us what to do. We are the strong and mighty and arrogant United States, and we are going to send you what we want, and if you don't like it, that's your tough luck."

We provide no real protection with the list of 15 countries. Once transshipment is accepted as a reality, then we are only opening the door to the dumping of potentially unsafe and ineffective drugs on the Third World.

Mr. President, my amendment is simple: It simply requires the Secretary to act, once the U.S.-unapproved drug export is discovered in the Third World. That is all there is in my amendment, nothing more, nothing less. He slams the door down and says no more of that drug will be exported once it is found to be transshipped to a Third World.

It is really the minimum we should do to protect people when these drugs are dumped in their countries.

Mr. HATCH. Mr. President, here again the Senator, through the imposition of an unreasonable restriction, wants to make this bill unusable. The amendment makes the mere presence of a drug in an unauthorized country a serious violation of the law, regardless of whether the exporter or his importer had any involvement at all in the movement of the drug to the unauthorized country. This is unfair. And no businessman in his right mind would subject himself to these penalties and the possible loss of the ability to export for events which are simply not under his control.

Instead, S. 1848, if so amended, would be used by no one. Drug companies would continue to build their facilities abroad and export their drugs free of such impractical restrictions as S. 1848 explicitly hinges civil and criminal penalties which we put in the bill upon the involvement of the manufacturer or its importer in unauthorized activities. It recognizes that it is impracticable for the U.S. Congress to try to govern independent downchain distribution of any drug.

I remind the Senator as he well knows that under S. 1848 the presence of an unapproved drug in an unauthorized country is a relatively unlikely, though not impossible, situation.

However, under current law, which he so oddly prefers, much to my consternation, the presence of unapproved drugs in developing countries is an everyday occurrence. That would stop.

Further, I remind him that drugs exported under this bill and finding their way to developing countries are unlikely to be unsafe drugs. This is because any drug exported under this bill will have first been approved for safety and effectiveness by the regulatory agency of a first-rank, developed country which has a drug approval process, equivalent to that of FDA.

Now, Mr. President, the thrust of S. 1848 really would be to penalize those who ship these products to unauthorized nations when they are subject to U.S. law. This bill does that. It is not the policy of the bill to penalize exporters who are not responsible for the shipment to an unauthorized nation or nations or more importantly to penalize patients. Yet that is the effect of the Senator's amendment. It would halt export shipments personally even though the exporter, the persons under the control of the exporter and the importer had committed no wrong.

If someone at the fourth or fifth level in the chain of distribution, perhaps even the patient, ships the drug in a substantial quantity to an unauthorized country, the Senator's amendment would penalize the exporter and patients, not the wrongdoer.

In some cases the Senator's amendment would prohibit the export of the drug if the drug was found in an unauthorized country, even though the drug was available from several sources. In fact, a drug which is found in an unauthorized country could have been made by a pharmaceutical manufacturer in that country, yet the Senator's amendment would still halt exports from the United States.

I think we would all agree with the intent of the Senator's amendment which is to punish those who ship these products to unauthorized countries. S. 1848 punishes those persons when they are subject to U.S. law and requires the exporter to change importers if the importer is not subject to U.S. law. We must be mindful, however, that these products may be lifesaving medications. When the exporter is not at fault, cutting off the supply of these drugs punishes the patients.

□ 1820

For this reason, I do not believe that Senator METZENBAUM's amendment protects public health, as is his intent. In fact, I know it does not. Rather, it may harm public health and place the Secretary in the untenable and possibly unethical position of having to deny life-saving medications to foreign patients.

The bottom line is really this: If production can be shut down because of the acts of a third person not under the manufacturer's control, no manufacturer will locate a plant here under this bill.

S. 1848 contains finely crafted provisions addressing transshipment. It does not proport to block any possible presence in unauthorized countries. It is simply not practical to try to control those drugs once they have left the control of the importer. However, this in no way detracts from the merit of this bill.

That is because if this bill does not pass, a particular unapproved drug may be manufactured overseas and exported to any country where it is legal. If the bill passes, the same unapproved drug may or may not find its way to the same countries, depending on the acts of subsequent actors in the purchase chain. However, the situation is not different under this scenario from that under current law. Current law is unable to prevent the presence in any country of any drug, since it simply leads to the production of unapproved drugs overseas. Therefore it makes no sense to criticize this bill because under some scenarios, the same thing could happen as happens now on a daily basis under current law.

Nor is the problem one of enforcement, as the Senator states. Statements of the Food and Drug Administration and the Pharmaceutical Manufacturers Association reflect the impracticality of our trying to control the trade in pharmaceuticals among downstream independent purchasers in foreign countries. Such a task would consume enormous resources and would not succeed, even if it were permitted by foreign governments. The Labor and Human Resources Committee recognized this, and instead imposed duties—and corresponding penalties—on exporters to take all measures on their control to ensure that neither they nor their importer are engaged in improper transshipment. However, we realized that it would be unfair, and would gutt the bill, if we attempted to impose these heavy penalties on manufacturers for conduct which was not beyond their control, all in a fruitless attempt to prevent a situation that occurs right now under the current law. I really cannot understand why the Senator prefers current law to the improvements of S. 1848. Certainly it is not because current law affords foreign consumers any protection.

Additional restrictions under S. 1848 occur in an imminent hazard situation. While it can normally be expected that drugs exported under these amendments and found in unauthorized countries will cause no harm there, having been already approved as safe and effective by at least one competent foreign agency. Additional export restriction may be imposed if the drug poses an imminent hazard to health in those countries.

These duties and restrictions were carefully considered by the committee and are enforcable by the appropriate agencies in contrast with the across-the-board prohibition which the Senator seems to feel appropriate, the responsibilities this bill would place upon the Department of Health and Human Services and the Department of Agriculture are quite managable. They are fully consistent with the statement by the Food and Drug Administration quoted in the Senator's minority views.

● Mr. LEVIN. Mr. President, I understand the intent of this amendment, and I sympathize with it.

However, the language of the amendment is overly broad. If we could identify the authorized country from which the drugs were transshipped to the unauthorized country, and if the drugs were found in the unauthorized country in significant quantities, and then I agree that we should halt the shipment of that drug to the authorized country itself.

However, under the language of this amendment, none of this drug could be shipped to any authorized country, even those authorized countries for which there was no proof that they were the source of the drugs transshipped to the unauthorized country, if the drugs were found in an unauthorized country. Further, according to this amendment, shipment to an authorized country would be halted if the drug was found in an unauthorized country, apparently regardless of the amount. These possible results under this amendment are too broad for me to be able to support it. ●

Mr. HATCH. Mr. President, adoption of this amendment would gut the bill, I do not think there is any question about that.

Mr. President, I move to table the amendment and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to table. The yeas and nays have been ordered and the clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Colorado [Mr. ARMSTRONG], the Senator from Arizona [Mr. GOLDWATER], the Senator from Florida [Mrs. HAWKINS], the Senator from New Hampshire [Mr. HUMPHREY], the Senator from Oregon [Mr. PACKWOOD], the Senator from Pennsylvania [Mr. SPECTER], the Senator from Vermont [Mr. STAFFORD] and the Senator from Idaho [Mr. SYMMS] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Mississippi [Mr. STENNIS] is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 83, nays 8, as follows:

[Rollcall Vote No. 97 Leg.]

YEAS—83

Abdnor	Ford	McClure
Andrews	Garn	McConnell
Baucus	Glenn	Melcher
Bentsen	Gore	Mitchell
Bingaman	Gorton	Moynihan
Boren	Gramm	Murkowski
Boschwitz	Grassley	Nickles
Bradley	Hatch	Nunn
Bumpers	Hatfield	Pell
Burdick	Hecht	Pressler
Byrd	Heflin	Pryor
Chafee	Heinz	Quayle
Cochran	Helms	Riegle
Cohen	Hollings	Rockefeller
Cranston	Johnston	Roth
D'Amato	Kassebaum	Rudman
Danforth	Kasten	Sasser
DeConcini	Kennedy	Simon
Denton	Kerry	Simpson
Dixon	Lautenberg	Stevens
Dodd	Laxalt	Thurmond
Dole	Leahy	Trible
Domenici	Levin	Wallop
Durenberger	Long	Warner
Eagleton	Lugar	Weicker
East	Mathias	Wilson
Evans	Matsunaga	Zorinsky
Exon	Mattingly	

NAYS—8

Biden	Hart	Proxmire
Chiles	Inouye	Sarbanes
Harkin	Metzenbaum	

NOT VOTING—9

Armstrong	Humphrey	Stafford
Goldwater	Packwood	Stennis
Hawkins	Specter	Symms

So the motion to lay on the table amendment No. 1954 was agreed to.

□ 1840

Mr. HATCH. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. KENNEDY. Mr. President, I move to lay that on the table.

The motion to lay on the table was agreed to.

(The following occurred earlier and is printed at this point by unanimous consent:)

Mr. HATCH. Mr. President, will the distinguished Senator from Ohio yield?

Mr. METZENBAUM. I yield.

Mr. HATCH. To accommodate our colleagues, my arguments will be relatively short with respect to this amendment, even though it is a very important amendment. I suggest that we have one more vote tonight and then lay down another amendment and debate it and vote tomorrow morning at 10 o'clock, if that is what the Senator would like to do. That way, we would let our colleagues know where we are. It also would protect the Senator for one more amendment tonight.

Mr. METZENBAUM. One of the Senators on the other side of the aisle asked whether he could leave, whether there would be more votes, and I indicated that I might ask unanimous consent that the vote on this amendment be at 10 o'clock tomorrow.

Mr. HATCH. How many more amendments does the Senator have, after this one?

Mr. METZENBAUM. Maybe three or four.

Mr. HATCH. There is an objection on our side. I also feel badly because of the distinguished Senator on our side. I think he wanted to make sure when the vote would be tomorrow, although he would not like to miss votes tonight.

Mr. METZENBAUM. The Senator from Ohio is prepared to vote tonight, and he will stay here as long as the leadership wishes.

Mr. HATCH. Why do we not vote on this one tonight and lay down the next one?

Mr. METZENBAUM. Let me ask the majority leader: If there is an objection to voting, I suppose we could come in at 10 or earlier and get on the bill at 10 o'clock.

Mr. HATCH. I believe I understand why the objection occurred on our side. Why do we not vote tonight on this amendment, come in at 10 tomorrow, and start the next amendment?

Mr. METZENBAUM. If we come in at 10, we have morning business.

I say to the manager of the bill and the majority leader that Senator GORE has an amendment. I am not sure whether Senator SIMON has an amendment. The Senator from Ohio has three or four amendments. I am trying to be cooperative and have attempted to be all day. I am willing to work tonight, if the Senator wishes.

Since we have agreed to vote at 1 o'clock tomorrow, I do not want to get myself in a position where I am squeezed with respect to time.

Mr. HATCH. I am willing to make sure that the debates on our part are short and succinct. I believe we can get those amendments done if we start at 10 tomorrow and have this one amendment tonight.

Mr. METZENBAUM. I ask the majority leader a question: If it appears that the Senator from Ohio, who has attempted to be cooperative on Monday and Tuesday, is squeezed for time and it is necessary to get short additional time beyond 1 o'clock, would the majority leader have strong objection? At this moment I do not believe it would be necessary, but I want to have an opportunity to have my amendments voted upon after reasonable debate.

Mr. DOLE. I would be willing to extend the time until 2 o'clock instead of 1 o'clock.

Mr. METZENBAUM. I think that would be fine.

Mr. HATCH. Can the Senator let us know how many more amendments he has?

Mr. METZENBAUM. As the Senator from Utah knows, I intended to have an amendment having to do with giving notification to the embassies. The senior Senator from Ohio had an amendment that was found acceptable by the Senator from Utah, and I was willing to accept it as a substitute, and we did not have to take that to a rollcall vote.

Mr. HATCH. This is correct.

Mr. METZENBAUM. At this moment, I say that we probably do not have more than three, maybe four—but I do not think more than three—and I do not see any need for what I would call lengthy debate.

Mr. DOLE. I suggest that we come in early and be on the bill at 10 in the morning. We could have one additional rollcall vote this evening on the pending amendment, and we could alert our colleagues that this would be the last rollcall vote this evening. We could be back on the bill at 10 tomorrow.

I do not know whether any of these amendments will be acceptable. I do not know what the Gore amendment is or what the amendment of the Senator from Ohio are.

If that is satisfactory, we could alert our colleagues on both sides that there will be one additional vote this evening.

Mr. METZENBAUM. That is perfectly agreeable to the Senator from Ohio.

I say to the majority leader that if the majority leader is inclined to do so, to change the time for final passage to 2 p.m., or if he wants to wait until tomorrow, to see if we need that time, with the assumption that the majority leader will be able to get clearance, that would be satisfactory.

Mr. DOLE. I would be willing to make that request right now.

Mr. METZENBAUM. I think it would be helpful.

Mr. HATCH. I think so, too.

Mr. METZENBAUM. Would the majority leader want to make it not later than 2 p.m.? If we get done earlier, we can vote.

Mr. HATCH. How much longer will the Senator from Ohio be on this amendment? Then we can let our colleagues know.

Mr. METZENBAUM. I would need another 5 to 10 minutes for my remarks.

I say to the majority leader that I must clear the question of the change of time to vote with the minority leader. I ask the majority leader to withhold any action until I have had a chance to run that by the minority leader.

Mr. DOLE. I am perfectly willing to make that request, if the minority leader has cleared it, that the vote occur not later than 2 o'clock.

Is it safe for the majority leader and the minority leader to advise our colleagues that there will be one more vote this evening?

Mr. METZENBAUM. I think so.

Mr. DOLE. I thank the Senator from Ohio.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the colloquy which just occurred be placed in the RECORD after the discussion in connection with this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

(Conclusion of earlier proceedings.)

Mr. HATCH. Mr. President, I do want to thank my colleagues for putting up with all of this debate today. I appreciate the support we have had on the floor thus far on this very important bill.

I also want to express my appreciation with regard to my colleague from Ohio. I know he is very sincere. I have always felt very deeply about people who feel so sincerely about matters such as he does. He is a very formidable opponent. There is no question about that. I feel very honored to be able to debate him from time to time. I have a deep friendship and regard for him.

As soon as Senator BYRD comes to the Chamber, we will wrap up the session for today.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

□ 1850

Mr. HATCH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

COSPONSORSHIP OF S. 2434

Mr. HATCH. Mr. President, yesterday I introduced the Cigarette Smoking Public Service Announcements Act of 1986, S. 2434. Unfortunately, Senator NICKLES' name did not appear as a cosponsor. I ask unanimous consent that Senator NICKLES be added to S. 2434 as an original cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE HOUSE

At 10:07 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following joint resolution, in which it requests the concurrence of the Senate:

H.J. Res. 613. Joint resolution allowing qualified persons representing all the States to be naturalized on Ellis Island on July 3 or 4, 1986.

At 4:57 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the Houses has passed the following bill, without amendment:

S. 2329. An act to make technical corrections in the higher education title of the Consolidated Omnibus Budget Reconciliation Act of 1985.

The message also announced that the House agrees to the amendment of the Senate to the bill (H.R. 1349) to reduce the costs of operating Presidential libraries, and for other purposes.

The message further announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 124) entitled the "Safe Drinking Water Amendments of 1985."

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 974) to provide for protection and advocacy for mentally ill persons.

The message further announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 2224. An act to amend the Immigration and Nationality Act to permit nonimmigrant alien crewmen on fishing vessels to stop temporarily at ports in Guam; and

H.R. 4745. An act to amend title 18, United States Code, with respect to sexual abuse.

MEASURES REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 2224. An act to amend the Immigration and Nationality Act to permit nonimmigrant alien crewmen on fishing vessels to stop temporarily at ports in Guam; to the Committee on the Judiciary.

H.R. 4745. An act to amend title 18, United States Code, with respect to sexual abuse; to the Committee on the Judiciary.

MEASURES PLACED ON THE CALENDAR

The Committee on Commerce, Science, and Transportation was discharged from the further consideration of the following bill, which was placed on the calendar:

S. 1813. A bill to amend and extend the Atlantic Striped Bass Conservation Act, and for other purposes.

The following joint resolution was read the first and second times by unanimous consent, and referred as indicated:

H.J. Res. 613. Joint resolution allowing qualified persons representing all the States to be naturalized on Ellis Island on July 3 or 4, 1986.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-3127. A communication from the Assistant Secretary of the Interior (Indian Affairs), transmitting, pursuant to law, the report on Indian education for fiscal years 1983 and 1984; to the Select Committee on Indian Affairs.

EC-3128. A communication from the Assistant Secretary of the Interior (Indian Affairs), transmitting, pursuant to law, a report on donations received and allocations made from the fund "Funds Contributed for the Advancement of the Indian Race"; to the Select Committee on Indian Affairs.

EC-3129. A communication from the Chairman of the Federal Maritime Commission, transmitting, pursuant to law, the annual report of the Commission under the Freedom of Information Act for calendar years 1984 and 1985; to the Committee on the Judiciary.

EC-3130. A communication from the Secretary of Commerce and the Attorney General of the United States, transmitting jointly, a draft of proposed legislation to encourage innovation, promote research and development, and stimulate trade by strengthening the protection given intellectual property rights by making necessary and appropriate amendments to the intellectual property rights laws; to the Committee on the Judiciary.

EC-3131. A communication from the Executive Director of the Pennsylvania Avenue Development Corporation, transmitting, pursuant to law, the annual report of the Corporation under the Freedom of Information Act for calendar year 1985; to the Committee on the Judiciary.

EC-3132. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, the annual report of the National Cancer Advisory Board for fiscal year 1985; to the Committee on Labor and Human Resources.

EC-3133. A communication from the Acting Archivist of the United States, transmitting, pursuant to law, a report on a plan for improving the management, maintenance, storage, and preservation of military records and improving public access to such records; to the Committee on Armed Services.

EC-3134. A communication from the Assistant Secretary of Energy (Conservation and Renewable Energy), transmitting, pursuant to law, a report on the first year activities of the Federal Methanol Fleet Program, dated March 1986; to the Committee on Energy and Natural Resources.

EC-3135. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, a report on the status of the Social Health Maintenance Organization Demonstration; to the Committee on Finance.

EC-3136. A communication from the Comptroller of the General Services Administration, transmitting, pursuant to law, the annual report on the Presidents Retirement System for fiscal year 1985; to the Committee on Governmental Affairs.

EC-3137. A communication from the Director of the Office of Management and Budget, Executive Office of the President, transmitting, pursuant to law, a report on the reapportionment of certain funds for Radio Free Europe/Radio Liberty Inc.; to the Committee on Appropriations.

EC-3138. A communication from the Secretary of Commerce, transmitting, a draft of proposed legislation to repeal section 4 of the Fish and Wildlife Act of 1956, as amended, and for other purposes; to the Committee on Commerce, Science, and Transportation.

EC-3139. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on certain funds proposed for recission but for which the Congress did not pass a rescission bill; pursuant to the order of January 30, 1975, referred jointly to the Committee on Agriculture, Nutrition, and Forestry, the Committee on Appropriations, the Committee on Banking, Housing, and Urban Affairs, the Committee on the Budget, the Committee on Commerce, Science, and Transportation, the Committee on Energy and Natural Resources, the Committee on Environment and Public Works, the Committee on Finance, the Committee on Foreign Relations, the Committee on Governmental Affairs, the Committee on the Judiciary, the Committee on Labor and Human Resources, and the Select Committee on Indian Affairs.

EC-3140. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Technical Risk Assessment—The Status of Current DOD Efforts"; to the Committee on Armed Services.

EC-3141. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "ADP Systems—Concerns About the

Acquisition Plan for DOD's Composite Health Care System"; to the Committee on Armed Services.

EC-3142. A communication from the Deputy Secretary of Defense, transmitting, pursuant to law, certain certifications with respect to the Space Defense and Operations (ASAT) program; to the Committee on Armed Services.

EC-3143. A communication from the Deputy Assistant Secretary of the Air Force (Logistics and Communications, transmitting, pursuant to law, a report on the conversion of the commissary shelf-stocking and custodial function at Scott Air Force Base, Illinois, to performance by contractor; to the Committee on Armed Service.

EC-3144. A communication from the Secretary of the Interior, transmitting, pursuant to law, the fourth biennial report on maximum attainable rates of production from significant fields on the Outer Continental Shelf; to the Committee on Energy and Natural Resources.

EC-3145. A communication from the Chairman of the Pennsylvania Avenue Development Corporation, transmitting, pursuant to law, the 1985 annual report of the Corporation; to the Committee on Energy and Natural Resources.

EC-3146. A communication from the Secretary of the Interior, transmitting, pursuant to law, a report on the current status of the helium program; to the Committee on Energy and Natural Resources.

EC-3147. A communication from the Administrator of General Services, transmitting, pursuant to law, a report on a proposed revision to a Privacy Act system of records; to the Committee on Governmental Affairs.

EC-3148. A communication from the Assistant Secretary of the Interior, transmitting, pursuant to law, a proposed plan for the use and distribution of the AK-Chin, Salt River Pima-Maricopa, and Gila River Pima-Maricopa Indian communities judgement funds; to the Select Committee on Indian Affairs.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-680. A resolution adopted by the Senate of the Commonwealth of Puerto Rico, relating to the position of the President on the budget cuts of funds appropriated to the Land Grant Colleges; to the Committee on Appropriations.

"RESOLUTION

"To request the President of the United States, the Honorable Ronald Reagan to reconsider his position on the budget cuts, of funds appropriated to the Land Grant Colleges.

"STATEMENT OF MOTIVES

"On February 5, 1986, President Ronald Reagan sent the budget for the 1987 fiscal year to the Congress. In said budget, the appropriations for government programs of various agencies were cut. The Agricultural Programs Budget of the Land Grant Colleges in Teaching, Investigation and Extension Services was cut 59%. In Puerto Rico, this cut has a devastating effect on the funds and programs of the Agricultural Experiment Station and the Agricultural Extension Service. The local experiment station will lose 3.7 million dollars, which is equal to 49% of its federal budget.

"The Agricultural Extension Service of Puerto Rico is an agency where some 700 professional and clerical staff workers are employed. In addition, it has an unpaid volunteer corps of around 7,507 persons who serve actively.

"The proposed budget cuts would have a devastating effect on the nutrition, economy and education of the Puerto Rican people.

"The Agricultural Extension Service states four basic principles:

"1. the individual is supreme in democracy

"2. the home is the fundamental unit in civilization

"3. the family is the prime educational group of the human race

"4. the base of any permanent civilization must rest on man's relationship with the land

"These principles or objectives can be attained by implementing and developing a diverse educational program of great impact on Puerto Rican Society.

"*Be it resolved by the Senate of Puerto Rico:*

"Section 1. The President of the United States, the Honorable Ronald Reagan, is hereby requested to reconsider his position on the budget cuts of funds appropriated to Land Grant Colleges.

"Section 2. A copy of this Resolution, duly translated into English shall be sent to the President of the United States, to the Congress of the United States and to the news media for its diffusion and publication."

POM-681. A joint resolution adopted by the Legislature of the State of Illinois; to the Committee on Armed Services:

"SENATE JOINT RESOLUTION NO. 74

"Whereas, The Secretary of State of the United States recently released a list of twenty-two military bases which are slated for closure; and

"Whereas, Illinois appears to be the largest potential loser with the O'Hare Air Reserve Forces Facility and the Great Lakes Naval Training Complex as two installations selected; and

"Whereas, The economic impact on Illinois would be devastating and would involve 25,000 military personnel; a $250,000,000 payroll loss and installations with a book value exceeding two billion dollars; and

"Whereas, The elimination of these facilities would weaken the National defense system and would require years to rebuild to their present state of efficiency; and

"Whereas, The Secretary of Defense indicates that it will cost more than $1.11 billion to close Great Lakes alone, and 23 years to emortise this cost; and

"Whereas, The outlook for O'Hare presents the same problem with multiple 10,000-foot heavy duty runways which would be difficult at best to duplicate; and

"Whereas, This unreasonable assault on the treasury and the resultant injustice to the military units positioned in Illinois must be brought to a stop; therefore, be it

"Resolved, by the Senate of the eighty-fourth General Assembly of the State of Illinois, That we urge the Congress of the United States to take such steps as are necessary to maintain those military bases now present in the State of Illinois; and be it further

"Resolved, That a suitable copy of this preamble and resolution be presented to the Speaker of the House of Representatives and the President of the Senate of the United States Congress and to each member of the Illinois Congressional Delegation."

POM-682. A resolution adopted by the legislature of the State of Utah; to the Committee on Commerce, Science, and Transportation:

"TOBACCO-FREE SOCIETY RESOLUTION

"Be it resolved by the Legislature of the State of Utah

"Whereas, the Utah State Medical Association and the American Medical Association recently established the goal of creating a tobacco-free society by the year 2000;

"Whereas, the Utah State Medical Association and American Medical Association has called upon Congress to ban the advertising and promotion of cigarettes and smokeless tobacco;

"Whereas, a number of factors make it appropriate and even advisable for Congress to impose a ban on tobacco advertising;

"Whereas, smoking is the number one cause of preventable death in America;

"Whereas, even when used as intended, tobacco causes physical damage to the user;

"Whereas, there is substantial evidence that tobacco advertising is intended to create an atmosphere which makes children and teenagers want to start using tobacco; that is, the use of tobacco is made to appear glamorous and adult through advertising;

"Whereas, most smokers today begin smoking during their teens; 60% start smoking by the age of 13, and a total of 90% have begun smoking by the time they are 20;

"Whereas, it is obvious that many people start using tobacco even before they are old enough to buy it legally;

"Whereas, inasmuch as tobacco advertising encourages behavior that is contrary to the interest of public health, it is clearly in the interest of the Federal Government to prohibit it;

"Whereas, although the tobacco industry denies that their advertising is designed to induce people to use tobacco, it is unthinkable that the industry would spend billions of dollars a year on advertising and promotion merely to entice current users to change brands;

"Whereas, the combined effect on the tobacco market of smokers who die yearly from smoking-related causes (about 350,000 a year) and those who quit smoking (about 34 million in the last 20 years) requires that the tobacco industry recruit new smokers in order to remain a viable industry;

"Whereas, the use of smokeless tobacco is dangerous and can cause oral cancer; and

"Whereas, it is clearly imperative to protect impressionable teenagers from the hazards of smoking and other tobacco use by banning advertising which encourages it.

"Now, therefore, be it resolved, That the Legislature calls upon the Congress of the United States to ban tobacco advertising and promotion in order to achieve a tobacco-free society by the year 2000.

"Be it further resolved, That a copy of this resolution be prepared and sent to the President of the United States Senate, the Speaker of the United States House of Representatives, the chairman of the House Committee on Energy and Commerce, the chairman of the Senate Committee on Labor and Human Resources, the Surgeon General of the United States, the Secretary of Health and Human Services, the members of Utah's congressional delegation, and to the American Medical Association."

POM-683. A resolution adopted by the Legislature of the State of Utah; to the Committee on Energy and Natural Resources:

"URANIUM INDUSTRY RESOLUTION

"Be it resolved by the Legislature of the State of Utah, the Governor concurring therein:

"Whereas, uranium is used in the manufacture of weapons and in the generation of power through nuclear power plants;

"Whereas, the United States uranium mining and milling industry plays an indispensable role in guaranteeing the national security and energy independence of the United States;

"Whereas, the uranium industry in America has been devastated by the increased world mining of uranium and a complete halt in the building of nuclear power plants in America, to the point that the number of jobs in the industry has fallen from 22,000 to 2,000 in the last five years;

"Whereas, the uranium industry in the United States is in such terrible condition that U.S. Department of Energy Secretary John S. Herrington, in response to a charge from Congress to determine whether or not the industry remains viable, has issued a determination that the industry is no longer a viable one;

"Whereas, the uranium used in the United States today comes almost exclusively from foreign mines and mills; and

"Whereas, certain Utah communities that grew rapidly when uranium was a valuable commodity are now suffering terribly from the effects of the industry's crash.

"Now, therefore, be it resolved, That the Legislature of the State of Utah, the Governor concurring therein, supports action by the federal government to reestablish the viability of the domestic uranium industry in the United States.

"Be it further resolved, That the national security and energy independence of the United States be protected by legislation limiting the "dumping" of uranium by South Africa and Canada, which sell it to the United States at prices below those charged to domestic customers.

"Be it further resolved, That the uranium enrichment policies pursued by the United States Department of Energy be revised so that they do not detrimentally impact demand for United States uranium.

"Be it further resolved, That the United States Government fulfill its obligation to share the costs of reclamation of uranium tailings generated under old Atomic Energy Commission defense contracts, which costs were not reimbursed at the time solely because they were not recognized.

"Be it further resolved, That the stockpile of uranium concentrate now being held by the United States Department of Energy be retained to guarantee national security, or, if there is more than needed for that purpose, the stockpile be sold at no less than current fair market value.

"Be it further resolved, That the Congress of the United States provide an equitable financing mechanism which will insure an appropriate contribution by nuclear utilities for remaining clean-up costs.

"Be it further resolved, That a copy of this resolution be prepared and forwarded to the President of the United States, the Secretary of the United States Department of Energy, the members of Utah's congressional delegation, the presiding officers of each house of the United States Congress, and other members of Congress as designated by the sponsor."

POM-684. Joint resolution adopted by the Legislature of the State of California; to the Committee on Energy and Natural Resources:

"Whereas, On February 12, 1986, Secretary of the Interior Donald Hodel fired Lee Iacocca from his position as Chairman of the Statue of Liberty-Ellis Island Centennial Commission; and

"Whereas, Mr. Iacocca, who is the chief executive officer of the Chrysler Corporation, has headed the private fundraising effort for the restoration of the Statue of Liberty and Ellis Island, two of America's most significant shrines; and

"Whereas, Under Mr. Iacocca's leadership, a private foundation has raised more than $233,000,000 for the restoration project, already exceeding the goal which it had set; and

"Whereas, The firing of Mr. Iacocca comes just a few months before the Fourth of July Weekend, 1986, when four days of ceremonies will mark the 100th anniversary of the Statue of Liberty; and

"Whereas, Mr. Iacocca has stated he opposes a proposal, favored by certain officials in the Department of Interior, to commercialize Ellis Island through the construction of a conference center and hotel complex; and

"Whereas, Secretary Hodel has offered no convincing justification for the firing of Mr. Iacocca; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California requests that the Secretary of Interior immediately reinstate Lee Iacocca to the position of Chairman of the Statue of Liberty-Ellis Island Centennial Commission; and be it further

"Resolved, That the Legislature opposes any development project which would commercialize Ellis Island; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, the Secretary of the United States Department of Interior, the Speaker of the United States House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-684. Resolutions adopted by the Legislature of the Palau National Congress; to the Committee on Energy and Natural Resources:

"RESOLUTION No. 2-0031-6

"Whereas, negotiation for the Compact of Free Association between the United States and the Republic of Palau has been going on for almost sixteen years now; and

"Whereas, on January 10, 1986, President Lazarus E. Salii of the Republic of Palau and Ambassador Fred M. Zeder of the United States signed the Compact of Free Association between the United States and the Republic of Palau signaling the beginning of a new political relationship; and

"Whereas, on January 23, 1986, the Second Olbiil Era Kelulau (Palau National Congress) overwhelmingly passed a legislation approving and ratifying the said Compact and setting February 21, 1986, as the Plebiscite day for all Palauan voters to freely choose their political status through election; and

"Whereas, prior to February 21, 1986, referendum, Ambassador Zeder and his staff officially announced the deeply desired exemption of the level of funds under the Compact of Free Association from the Gramm-Rudman-Hollings deficit reduction act; and

"Whereas, on February 21, 1986, a record of seventy-two percent (72%) of the Palauan voters approved the said Compact of Free Association; and

"Whereas, the voters of the Republic of Palau, realizing such exemption of Compact funding from Gramm-Rudman-Hollings deficit reduction act, voted among other positive reasons to overwhelmingly approve the Compact document; and

"Whereas, President Lazarus E. Salii certified the Plebiscite result on February 24, 1986, and has sent the approved Compact to President Ronald Reagan and the U.S. Congress for their respective approval; and

"Whereas, the House of Delegates of the Second Olbiil Era Kelulau is extremely concerned with the Gramm-Rudman-Hollings deficit reduction law as it may possibly reduce the Compact funds for the Republic of Palau; now, therefore, be it.

"Resolved that the House of Delegates of the Second Olbiil Era Kelulau, hereby respectfully requests the President of the United States, the President of the Senate and the Speaker of the House of Representatives of the United States Congress to specifically exempt funds, for the compact of Free Association, from the Gramm-Rudman-Hollings deficit reduction law; and

"Be it further resolved that certified copies of this resolution be transmitted to the President of the United States, the President of the Senate and the Speaker of the House of Representatives of the United States Congress, the President of the Senate and the Speaker of the House of Delegates of the Second Olbiil Era Kelulau, and the President of the Republic of Palau."

"HOUSE RESOLUTION No. 2-0033-6

"Whereas, on March 29, 1977, the Trust Territory Public Law No. 7-29, amended later by Public Law 7-30, created the College of Micronesia as a public corporation under its own Board of Regents; and

"Whereas, the said law incorporated into a single post-secondary educational system the Micronesian Occupational College and the Community College of Micronesia and its affiliated School of Nursing; and

"Whereas, Micronesian Occupational College was granted full accreditation by the Western Association of Schools and Colleges in 1977 and that such Accreditation Status was again reaffirmed in 1982; and

"Whereas, while the Micronesian Occupational College curricula are strongly Job-oriented, the mission of the College has been and still is to help students from the Federated states of Micronesia, and Republic of the Marshall Islands, and the Republic of Palau develop their potential in semi-professional and occupational areas; and

"Whereas, there are about one thousand five hundred Micronesian students who have graduated from the college; and

"Whereas, the Department of Interior (DOI) has been providing yearly grant to fund the operation of the Micronesian Occupational College since 1977; and

"Whereas, the yearly grant from the Department of Interior amounted to more than half of the yearly budget of the Micronesian Occupational College; and

"Whereas, such yearly grant from the Department of Interior to the Micronesian Occupational College is not specifically provided for in the Compact of Free Association between the Republic of Palau and the United States; and

"Whereas, the Department of Interior continued funding of the Micronesian Occupational College is not guaranteed under the Compact of Free Association; and

"Whereas, the future of the Micronesian Occupational College is substantially and unavoidably dependent on the continuation of the Department of Interior's funding grant; and

"Whereas, it is in the best interest of the Micronesian Islands governments that Micronesian Occuptional College continue its educational services to the islands community; now, therefore, be it

"Resolved that the House of Delegates of the Second Olbiil Era Kelulau, hereby respectfully requests the President of the United States, the President of the Senate and the Speaker of the House of Representatives of the United States Congress to continue funding of the specific grant, from the Department of Interior, for operation of the Micronesian Occupational College in the Republic of Palau; and

"Be it further resolved that certified copies of this resolution be transmitted to the President of the United States, the President of the Senate, and the Speaker of the House of Representatives of the United States Congress, the President of the Federated States of Micronesia, the President of the Republic of the Marshall Islands, the President of the Senate and the Speaker of the House Delegates of the Second Olbiil Era Kelulau, and the President of the Republic of Palau."

POM-686. Resolution adopted by Community School District No. 201, Westmont, IL, opposing certain provisions of H.R. 3838; to the Committee on Finance.

POM-687. Resolution adopted by the Board of Education of La Salle Public Elementary Schools, District 122, La Salle, IL, opposing certain provisions of H.R. 3838; to the Committee on Finance.

POM-688. Resolution adopted by the Board of Education of Forest Ridge School District No. 142, Oak Forest, IL, opposing certain provisions of H.R. 3838; to the Committee on Finance.

POM-689. Joint resolution adopted by the Legislature of the State of Connecticut; to the Committee on Finance.

"RESOLUTION

"Whereas, Connecticut was the first state in the nation to begin operating an enterprise zone program; and

"Whereas, Connecticut's enterprise zone program has been very successful in promoting economic development, job creation and the revitalization of inner-city areas; and

"Whereas, Congress is currently considering federal enterprise zone legislation; and

"Whereas, state enterprise zones would be far more successful if such federal legislation were enacted, due to the greater impact of federal tax and regulatory incentives that would be available under such legislation; and

"Whereas, the two largest organizations of elected officials, the National League of Cities and the U.S. Conference of Mayors, as well as business and job training organizations, have endorsed proposed federal enterprise zone legislation, now therefore, be it

Resolved, that this general assembly calls upon the Congress of the United States to enact enterprise zone legislation,

"Be it further resolved, that copies of this resolution be sent to the speaker and the Clerk of the United States House of Representatives, the President and the Secretary of the United States Senate, and to each member of the Connecticut Congressional delegation."

POM-690. Joint resolution adopted by the Legislature of the State of Colorado; to the Committee on Foreign Relations:

"HOUSE JOINT RESOLUTION No. 1014

"Whereas, In signing the 1975 Helsinki Accords the Soviet Union promised to respect human rights and fundamental freedoms including the freedoms of thought, conscience, religion, and belief, and to promote and encourage the effective exercise of civil and political rights; and

"Whereas, The Soviet Union, instead of keeping its word, systematically violates the Helsinki Accords by sending Soviet citizens to forced labor camps and psychiatric hospitals for merely trying to discuss their government's nuclear weapons policy and United States-Soviet relations in a meaninful way; and

"Whereas, Soviet human rights violations allow the Soviet government to dictate arms policies without facing opposing political pressure from their citizens; and

"Whereas, Human rights and peace are the same issue and bilateral pressure on the Soviet government from its own citizens would make successful negotiations more likely; and

"Whereas, Courageous people in the Soviet Union endure cruel repression and prison for their activities; now, therefore,

"Be it Resolved by the House of Representatives of the Fifty-fifth General Assembly of the State of Colorado, the Senate concurring herein:

"That the General Assembly of Colorado urges the Governor of Colorado to send a communication to the President of the United States and the General Secretary of the Communist Party of the Soviet Union stating as follows:

"The risk of nuclear war between the United States and the Soviet Union can be reduced if all people have the ability to express their opinions on world issues, including their nations' arms policies, freely and without fear; therefore, the General Assembly of the state of Colorado urges all nations that signed the Helsinki International Accords on Human Rights to observe the Accords' provisions of freedom of speech, religion, press, assembly, and emigration for all their citizens.

"Be It Further Resolved, That the Chief Clerk of the House of Representatives transmit copies of this resolution to the Speaker of the United States House of Representatives, the President of the United States Senate, and the members of the Colorado delegation to the Congress of the United States in order that they may be apprised of the sense of the Colorado General Assembly."

POM-691. A resolution adopted by the Mayor and Council of the Borough of Brielle, New Jersey favoring a constitutional convention for purposes of proposing an amendment to the Constitution relative to taxation; to the Committee on the Judiciary.

POM-692. A resolution adopted by the Township Council of Delran, New Jersey, favoring a constitutional convention for purposes of proposing an amendment to the Constitution relative to taxation; to the Committee on the Judiciary.

POM-693. A resolution adopted by the City Council of South Euclid, Ohio favoring legislation to proclaim June 21, 1986, as Save American Industry/Jobs Day; to the Committee on the Judiciary.

POM-694. A resolution adopted by the Lorain County, Ohio AFL-CIO Federation of Labor, favoring designation of June 21, 1986 as Save American Industry/Jobs Day; to the Committee on the Judiciary.

POM-695. A resolution adopted by the Senate of the Legislature of the State of Hawaii; to the Committee on Labor and Human Resources.

"SENATE RESOLUTION No. 7

"Whereas, there are two chapters of federal law which apply to persons injured in the course of maritime employment; and

"Whereas, the Longshoremen's and Harbor Worker's Compensation Act affords quick monetary compensation to all injured maritime workers except members of the crew and masters, while the Jones Act covers these two categories; and

"Whereas, the two pieces of legislation appear to be mutually exclusive, in that workers covered under the Jones Act do not have access to the remedies available under the Longshoremen's and Harbor Worker's Compensation Act; and

"Whereas, rising insurance rates for commercial fishers who are subject to the Jones Act have increased costs and slowed expansion in this vital industry; and

"Whereas, the Jones Act, unlike the Longshoremen's and Harbor Worker's Compensation Act, has no provision rendering inoperative state laws which create parallel remedies such as workers' compensation; now, therefore,

"Be It Resolved by the Senate of the Thirteenth Legislature of the State of Hawaii, Regular Session of 1986, that the Legislature requests the United States Congress to amend the Jones Act to exclude commercial fishers and amend the Longshoremen's and Harbor Worker's Compensation Act to include commercial fishers; and

"Be It Further Resolved that certified copies of this Resolution be transmitted to the Speaker of the United States House of Representatives, the President of the United States Senate and to each member of Hawaii's congressional delegation."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. THURMOND, from the Committee on the Judiciary:

Report to accompany the bill (S. 1655) to amend the Unfair Competition Act of 1916 and the Clayton Act to provide for private enforcement of the Unfair Competition Statute in the event of unfair foreign competition, and to amend title 28 of the United States Code to provide for private enforcement of the Customs Fraud Statute (Rept. No. 99-295).

By Mr. STAFFORD, from the Committee on Labor and Human Resources, with an amendment in the nature of a substitute:

S. 1965. A bill to reauthorize and revise the Higher Education Act of 1965, and for other purposes (with additional views) Rept. No. 99-296).

By Mr. HATCH, from the Committee on Labor and Human Resources, with an amendment in the nature of a substitute and an amendment to the title:

S. 881. A bill to extend title X of the Public Health Service Act for 3 years (Rept. No. 99-297).

By Mr. HATCH, from the Committee on Labor and Human Resources, with amendments:

S. 1566. A bill to extend the Family Life Demonstration Program for 3 years (Rept. No. 99-298).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. GOLDWATER, from the Committee on Armed Services:

Mr. GOLDWATER. Mr. President, from the Committee on Armed Services, I report favorably the attached listing of nominations.

Those identified with a single asterisk (*) are to be placed on the Executive Calendar. Those identified with a double asterisk (**) are to lie on the Secretary's desk for the information of any Senator since these names have already appeared in the CONGRESSIONAL RECORD and to save the expense of printing again.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk were printed in the RECORD of April 24, 1986, at the end of the Senate proceedings.)

*1. In the Marine Corps there are 11 promotions to the grade of brigadier general (list begins with James E. Sniffen). (Ref. No. 1011)

**2. In the Air National Guard there are 48 promotions to the grade of lieutenant colonel and below (list begins with Archie D. Barnes). (Ref. No. 1035)

Total: 59.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. BUMPERS:

S. 2439. A bill to amend the Act of February 25, 1920, to provide for competitive leasing of oil and gas for onshore Federal lands, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. McCONNELL (for himself and Mr. THURMOND):

S. 2440. A bill to amend the Federal Tort Claims Act to include reasonable limitations on the tort liability of the United States; to the Committee on the Judiciary.

By Mr. McCONNELL (for himself and Mr. THURMOND):

S. 2441. A bill to place limitations on the civil liability of Government Contractors to ensure that such liability does not impede the ability of the United States to procure necessary goods and services; to the Committee on the Judiciary.

By Mr. DeCONCINI (for himself and Mr. GOLDWATER):

S. 2442. A bill to establish the San Pedro Riparian National Conservation Area in Cochise County, AZ, in order to assure the protection of the riparian, wildlife, archaeological, paleontological, scientific, cultural, educational, and recreational resources of the conservation area, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. DOLE (for Mrs. HAWKINS (for herself and Mr. HATCH)):

S. 2443. A bill to amend the Public Health Service Act to revise the authorities of, and redesignate, the Alcohol, Drug Abuse, and Mental Health Administration; to the Committee on Labor and Human Resources.

By Mr. STAFFORD (for Mrs. HAWKINS (for herself, Mr. STAFFORD, Mr. HATCH, Mr. DODD, Mr. KENNEDY, Mr. CHAFEE, Mr. KERRY, Mr. WEICKER, Mr. PELL, Mr. RIEGLE, Mr. SIMON, Mr. BYRD, Mr. ANDREWS, and Mr. GRASSLEY)):

S. 2444. A bill to reauthorize the Head Start Act, the Low-Income Home Energy Assistance Act of 1981, the Community Services Block Grant Act, the dependent care State grant program, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. MURKOWSKI (for himself, Mr. SIMPSON and Mr. THURMOND):

S. 2445. A bill to amend title 38, United States Code, to improve certain Veterans' Administration health-care programs; to the Committee on Veterans Affairs.

By Mr. CHAFEE (for himself, Mr. STAFFORD, Mr. GORE, Mr. HEINZ, Mr. METZENBAUM, and Mr. LEVIN):

S. 2446. A bill to require the Secretaries of Agriculture and Health and Human Services to enforce certain food labeling requirements for packaged foods sold by certain restaurants; to the Committee on Governmental Affairs.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and State resolutions were read, and referred (or acted upon), as indicated:

By Mr. LAUTENBERG (for himself and Mr. HOLLINGS):

S. Res. 405. Resolution to express the sense of the Senate opposing the imposition of a federal licensing fee for marine sportfishing; to the Committee on Commerce, Science, and Transportation.

By Mr. DODD (for himself and Mr. WEICKER):

S. Res. 406. Resolution honoring the 125th anniversary of organized camping in the United States; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BUMPERS:

S. 2439. A bill to amend the Act of February 25, 1920, to provide for competitive leasing of oil and gas for onshore Federal lands, and for other purposes; to the Committee on Energy and Natural Resources.

(The remarks of Mr. BUMPERS and the text of the legislation appear earlier in today's RECORD.)

By Mr. McCONNELL (for himself and Mr. THURMOND):

S. 2440. A bill to amend the Federal Tort Claims Act to include reasonable limitations on the tort liability of the United States; to the Committee on the Judiciary.

S. 2441. A bill to place limitations on the civil liability of Government contractors to ensure that such liability does not impede the ability of the United States to procure necessary goods and services; to the Committee on the Judiciary.

(The remarks of Mr. McCONNELL and Mr. THURMOND and the text of the legislation appear earlier in today's RECORD.)

By Mr. DeCONCINI (for himself and Mr. GOLDWATER):

S. 2442. A bill to establish the San Pedro Riparian National Conservation Area in Cochise County, Arizona, in order to assure the protection of the riparian, wildlife, archeological, paleontological, scientific, cultural, educational, and recreational resources of the conservation area, and for other purposes; to the Committee on Energy and National Resources.

SAN PEDRO RIPARIAN NATIONAL CONSERVATION AREA

Mr. DeCONCINI. Mr. President, it gives me great pleasure to introduce legislation today that will establish special protection for a unique riparian ecosystem in southern Arizona known as the San Pedro Riparian Area. Lands along a 31-mile stretch of the San Pedro River in western Cochise County, AZ, comprise some of the most valued riparian, wildlife, archaeological, paleontological, scientific, cultural, and recreational resources in the Southwest. Intense national interest in this area sparked action by the Bureau of Land Management to acquire riparian lands along the San Pedro. On March 7 of this year, title to these lands was turned over to the Bureau of Land Management through a land exchange initiative with the private owner, Tenneco Inc. Since that time, the BLM has closed the 43,371 acres of land to the public while it formulates an interim land management policy for these important public lands.

The legislation I am sponsoring today, with my good friend from Arizona, Senator GOLDWATER, will place the San Pedro Riparian Area under the management of a National Conservation Area of the Bureau of Land Management. The lands will be managed to protect the fragile resource values but will be open to the public for recreation and uses on a controlled basis.

Mr. President, last year numerous individuals and organizations came to me seeking Land and Water Conservation Funds to acquire the lands now comprising the San Pedro River Riparian Area. At that time, estimates on the cost to acquire this area ranged from $20 to $30 million. Through the initiative of the Bureau of Land Management, the Federal Government now owns these lands and can manage

them to protect the resources and assure public enjoyment for the years to come. I commend the BLM for its foresight and leadership in acquiring and protecting these lands. In times when all of us are gravely concerned about spiraling Federal deficits, it is good to see actions undertaken that respond to our public land needs without deepening the Federal budgetary problems. Dean Bibles, the Arizona State Director, for the BLM, is largely responsible for this achievement and deserves substantial credit.

The 43,371 acres of land along the San Pedro River are rich in wildlife and significant cultural resources. The area provides habitat to the largest diversity of reptiles, birds, and mammals found in the United States and North America. Mexican birds, whose northern range is southeastern Arizona, use the area and species like the Harris hawk, the black hawk, the zone-tailed hawk, gray hawk, aplomado falcon, and the elegant trogon are prevalent. Experts estimate that the area includes 161 species of birds, 80 species of mammals, a dozen fish species, and about 68 species of reptiles and amphibians.

Equally important are the abundance of cultural and historic resources found in the area. There are 110 known archaeological sites including the famous and highly significant Paleo Indian sites dating to 11,000 years ago, the Presido of Santa Cruz de Terrante (Quiburi), Murray Springs, and the Escapule site. This is one of the few areas within the United States where known sites of the period between the prehistoric and historic occupation of the Southwest still exist. While many of these sites must be carefully preserved, they do afford excellent opportunities for interpretation and education for the public.

While the Bureau of Land Management has existing authority under the Federal Land Policy and Management Act of 1976 to manage these lands, because of the fragile nature of the significant resources and the need to ensure the proper protection and use of the area for the years to come, I believe special consideration should be afforded this area by the designation of the San Pedro Riparian Area as a National Conservation Area. Under the legislation I propose today, the San Pedro lands will be managed primarily to conserve and protect the riparian, wildlife, archaeological, paleontological, scientific, cultural, educational, and recreation resources of the area. None of the lands will be eligible for disposal and the Secretary will be directed to work with the public to develop a long-term management policy for the National Conservation Area. The Secretary shall have the authority to enter into cooperative agreements with State and local agencies like the Arizona Game and Fish Department, Arizona State Parks and private organizations who may have special management expertise and concern for the preservation of the area. Subject to valid existing rights, the area will be withdrawn from mineral entry. Because of the environmental importance of this area, a multiple-use advisory council will be established to advise and recommend to the Secretary of the Interior the appropriate practices for the development and implementation of the management plan for this area. Also, because there have been concerns about the BLM's ability to sufficiently manage and protect this area under the designation of a National Conservation Area, I have included a provision which requires the Secretary of the Interior to submit a report to the appropriate committees of the House and the Senate within 5 years of the date of enactment of the act and every 10 years thereafter, on the implementation of the terms of the act. That report is to include a detailed statement on the condition of the resources and the BLM's ability to achieve the management objectives outlined in the bill.

Mr. President, through the initiative taken by Dean Bibles of the BLM and through the permanent management authority offered to the San Pedro area in this legislation, a unique area of diverse resources, breathtaking beauty, and historic values will be preserved and protected for all Americans to enjoy for the years to come. The cooperation and continued work by experts and citizens in Arizona, working with the BLM, will assure this goal.

In order to adopt a permanent management plan for this important area this year, it is my hope that the Energy and Natural Resources Committee will take expeditious action on this measure.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2442

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. ESTABLISHMENT OF CONSERVATION AREA.

(a) ESTABLISHMENT.—(1) There is hereby established the San Pedro Riparian National Conservation Area (in this Act referred to as the "conservation area").

(2) The conservation area shall—

(A) consist of Federal lands acquired by exchange or purchase; and

(B) be managed by the Secretary of the Interior, acting through the Bureau of Land Management, (in this Act referred to as the "Secretary") in accordance with the provisions of this Act.

(3) The conservation area shall not cover more than 60,000 acres.

(b) BOUNDARIES.—Lands to be included in the conservation area are generally depicted on a map entitled "Boundary Map, San Pedro Riparian National Conservation Area", and 51 Fed. Reg. 8715, which together with a legal description, ref. A21410, shall be on file and available for public inspection in the offices of the Secretary of the Interior, Washington, DC, and in appropriate State and local offices of the Bureau of Land Management in the State of Arizona. The Secretary shall finalize the boundaries of the conservation area no later than 5 years after the date of enactment of this Act.

SEC. 2. MANAGEMENT OF CONSERVATION AREA.

(a) MANAGEMENT.—The Secretary shall manage the conservation area—

(1) in accordance with the provisions of this Act, and where not inconsistent with the provisions of this Act, the principles of the Federal Land Policy and Management Act of 1976 (43 U.S.C., 1701 et seq.); and

(2) in a manner that conserves, protects, and enhances the riparian, wildlife, archaeological, paleontological, scientific, cultural, educational, and recreation resources of the conservation area.

(b) OTHER USES.—The Secretary may allow uses other than those specified in subsection (a) if he can show that such uses will have no significant adverse effects on the primary purposes for which the conservation area is established.

(c) NO DISPOSITION OF LANDS WITHIN CONSERVATION AREA.—Notwithstanding any other provision of law, lands within the conservation area shall not be available for disposition, except through exchange to improve boundaries.

SEC. 3. MANAGEMENT PLAN.

(a) DEVELOPMENT OF PLAN.—No later than two years after the date of enactment of this Act, the Secretary shall develop a plan for the comprehensive and long-term management, development, and protection of the conservation area. The plan shall be developed with full opportunity for public participation and comment, and shall contain provisions designed to assure protection of the riparian, wildlife, archaeological, paleontological, scientific, cultural, and recreation resources and values of the conservation area.

(b) USE OF CONSERVATION AREA.—The plan developed pursuant to subsection (a) shall generally provide for visitor use of the conservation area. Notwithstanding the preceding sentence, the Secretary may limit visitor use, close portions of the conservation area to public use, or allow use of the conservation area by permit only (to be issued by him with appropriate conditions) in order to insure protection of the conservation area's resources and values and provided in this Act.

(c) RESEARCH IN CONSERVATION AREA.—In order to assist in the development of appropriate management strategies for the conservation area, the Secretary may authorize research on matters including the environmental, biological, hydrological, and cultural resources in the conservation area.

(d) PRIVATE MANAGEMENT.—The Secretary may enter into cooperative agreements with appropriate State and local agencies or private organizations for the management of any portion of the conservation area in accordance with land use plans for the conservation area developed pursuant to the provisions of this Act.

SEC. 4. MULTIPLE USE ADVISORY COUNCIL.

The Secretary of the Interior shall establish a Multiple Use Advisory Council which shall advise and recommend to the Secretary appropriate management practices to

implement the provisions of the land use plan and the purposes of this Act. The members of the council shall be appointed by the Secretary and shall include representatives from Cochise County.

SEC. 5. GENERAL PROVISIONS.

(a) WITHDRAW FROM MINING.—Subject to valid existing rights, the lands described in section 1 are hereby withdrawn from all forms of appropriation under the public land laws, including mining and mineral leasing laws and the Geothermal Leasing Act.

(b) REGULATIONS.—The Secretary is authorized to issue regulations necessary to implement the provisions of this Act.

(c) VIOLATIONS OF ACT.—Any person who violates any provision of this Act or other regulations issued by the Secretary to implement this Act shall be subject to a fine of up to $10,000, or to imprisonment for up to one year, or both.

(d) COOPERATIVE AGREEMENTS.—The Secretary may enter into cooperative agreements with appropriate State and local agencies for enforcement of the provisions of this Act and regulations issued pursuant to it.

(e) ENDANGERED SPECIES ACT.—Nothing in this Act shall supersede or otherwise affect the Endangered Species Act of 1973 (16 U.S.C. 1530 et seq.).

(f) ACQUISITION OF LANDS.—Nothing in this Act shall affect State or private inholdings within the boundaries of the conservation area as described by the Secretary except as they may be acquired by exchange or purchase but not by condemnation.

SEC. 6. REPORT TO CONGRESS.

No later than 5 years after the date of enactment of this Act and every 10 years thereafter, the Secretary shall furnish to the appropriate committees of the House of Representatives and the Senate, a report on the implementation of this Act. Such report shall include a detailed statement on the condition of the resources within the conservation area and the Bureau of Land Management's ability to achieve the management goals specified under this Act.

SEC. 7. AUTHORIZATION.

There are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

By Mr. DOLE (for Mrs. HAWKINS, for herself and Mr. HATCH):

S. 2443. A bill to amend the Public Health Service Act to revise the authorities of, and redesignate, the Alcohol, Drug Abuse, and Mental Health Administration; to the Committee on Labor and Human Resources.

ALCOHOL, DRUG ABUSE, AND MENTAL HEALTH AMENDMENTS

(Mr. DOLE submitted the following statement on behalf of Mrs. HAWKINS.)

● Mrs. HAWKINS. Mr. President, today, I am introducing with my colleague from Utah, Senator HATCH, legislation reauthorizing the National Institute on Alcohol Abuse and Alcoholism [NIAAA] and the National Institute on Drug Abuse [NIDA].

This bill seeks to reauthorize these Institutes for 5 years. Funding for the fiscal year 1987: NIDA, $83 million and NIAAA, $69 million. Such sums as would be necessary would be authorized each year thereafter.

TEENAGE SUICIDE

In the area of prevention, this bill would require triannual prevention reports. It would also ask the Secretary to present a report to Congress in January 1988 and every 3 years thereafter on suicide among young people. The report on teen suicide would be overseen by the Secretary and the Secretary's Task Force on Youth Suicide and would be coordinated throughout the Department of Health and Human Services.

Mr. President, in our Nation today, the life expectancy of every age group is up. Those of us who are lucky will live well beyond our 80 birthdays. But tragically, there is one age group where this is not the case—young people, 15 to 24. An alarming veil of despair seems to have gripped many in this most vulnerable and precious age group and they are succumbing as never before. We need to know what it is that is driving this tragic increase in teenage suicide if we are to stop it. And stop it we must because these young people are the leaders of tomorrow.

NAME CHANGE FOR ADAMHA

Currently, the National Institute on Alcohol Abuse and Alcoholism and the National Institute on Drug Abuse and the National Institute on Mental Health, represent the premiere substance abuse research efforts in this country. Because the function of these Institutes is primarily for research purposes, this legislation recommends that a title change for the Alcohol, Drug Abuse and Mental Health Administration [ADAMHA] which currently administers these Institutes. Should this provision be enacted, ADAMHA would be become the National Institutes on Alcohol, Drugs, and Mental Health. This would in no way change the current jurisdiction or function of ADAMHA.

TELEVISION COMMERCIALS ON SMOKING AND PREGNANCY

In 1986, lung cancer will become the No. 1 cause of cancer death among women. Additionally, rising numbers of women who smoke are falling victim to heart attacks and strokes. Pregnant women who smoke may pose serious health risks for their unborn children. Yet the Federal Trade Commission has found that less than 50 percent of women are aware of the health risks of smoking during pregnancy. For this reason, Mr. President, this legislation would ask the Secretary of Health and Human Services to prepare announcements for television on the health risks to women which result from cigarette smoking.

ALCOHOL CONTENT LABELING

Currently Federal law requires the labeling of alcohol content for most wines and all distilled spirits. Yet perhaps the most popular drink among our young people, beer, is excluded from this requirement. This legislation would assure that consumers of "malt beverages" be informed as to the alcohol content of such beverages. This provision would simply provide equal treatment regarding the labeling of alcohol content for both "malt beverages" and for distilled spirits.

Mr. President, I have long advocated content labeling on food products. I held hearings where we discussed the need to let consumers know how much salt and fat there was in the food they eat. This legislation is similar. Consumers must be given every opportunity to know just what it is they are consuming.

TECHNICAL AMENDMENT

This legislation would also seek to recodify under title V all of the mental health components of the Public Health Service Act which currently exist under title III. This is simply a recodification effort and in no way changes any authority of the National Institute on Mental Health or ADAMHA.

Additional changes in current law which this legislation proposes include:

Flexibility would be allowed in cases of national public health emergencies thereby allowing NIDA and NIAAA to better cope, as they were asked to this year, with the horrifying AIDS epidemic. This will also allow NIDA, in particular to move rapidly in response to designer drugs.

Animal research standards currently applicable for the National Institutes on Health would apply to ADAMHA.

The Institutes would be allowed to use volunteers for tasks such as feeding research animals.

The advisory councils which oversee grant applications for each of the Institutes would consist of nine members from the scientific community and three members from the public sector, including one individual representing public relations.

The effectiveness of these Institutes is vital to the social and economic health of this Nation and our children's children. Only if they are given the tools for prevention, education, and research will they be equipped for the war against drug abuse.●

By Mr. STAFFORD (for Mrs. HAWKINS, for herself, Mr. STAFFORD, Mr. HATCH, Mr. PELL, Mr. RIEGLE, Mr. SIMON, Mr. DODD, Mr. KENNEDY, Mr. CHAFEE, Mr. KERRY, Mr. WEICKER, Mr. BYRD, and Mr. ANDREWS):

S. 2444. A bill to reauthorize the Head Start Act, the Low-Income Home Energy Assistance Act of 1981, the Community Services Block Grant Act, the Dependent Care State Grant Program, and for other purposes; to the Committee on Labor and Human Resources.

HUMAN SERVICES REAUTHORIZATION ACT

Mr. STAFFORD. Mr. President, I am introducing for Senator HAWKINS the Human Services Reauthorization Act of 1986 to provide for the reauthorization of four very vital human service programs, Head Start, Low-Income Home Energy Assistance, Community Services Block Grant, and the Dependent Care Services Program. We are joined in this effort by our fellow Senators, Mr. HATCH, Mr. DODD, Mr. KENNEDY, Mr. CHAFEE, Mr. RIEGLE, Mr. PELL, Mr. SIMON, Mr. BYRD, Mr. WEICKER, Mr. KERRY, and Mr. ANDREWS.

The bill provides for a 4-year reauthorization of four programs that serve our low-income and elderly citizens. We provide for very modest growth in the program over the next 4 years even though we are painfully aware the need far outstrips the current level of appropriations for the programs.

The bill authorizes the Head Start Program for $1,130,540,000 for fiscal year 1987. This is a 4-percent increase over the fiscal year 1986 appropriation level pre-Gramm-Rudman-Hollings March 1 cuts. In fiscal years 1988-90, the authorization level would increase by 4 percent each year.

The Low-Income Home Energy Assistance Program would be authorized at $2,163 million for fiscal year 1987. This is a 3-percent increase over the fiscal year 1986 appropriation level pre-Gramm-Rudman-Hollings cuts. The Energy Program would grow at a 3-percent rate for the next 3 fiscal years authorized.

The Low-Income Home Energy Program section of the bill also provides additional language to further clarify the income disregard provisions of the law.

The Community Services Block Grant authorization is set at $381,409,000 for fiscal year 1987. This is a 3-percent increase over the fiscal year 1986 authorization level prior to the Gramm-Rudman-Hollings cuts. The authorization levels are increased by 3 percent for the 3 additional years in the bill.

Last but not least the bill reauthorizes the Dependant Care Services Program at $20 million for fiscal year 1987 and the 2 succeeding fiscal years. In addition, the bill contains many of the recommendations from the extensive hearing held by Senator HAWKINS on reauthorization of these programs. Under Senator HAWKINS sponsorship, this bill will make further improvement in the delivery of human services to our elderly and low-income Americans.

Mr. President, the continuation of these important programs is needed to meet some of the needs of elderly and low-income Americans, and I ask my fellow Senators' support for this bill.

Mr. President, I ask unanimous consent that the text of the bill, and the section-by-section analysis be printed in the RECORD at the end of my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2444

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Human Services Reauthorization Act of 1986".

TITLE I—THE HEAD START PROGRAM

REAUTHORIZATION

SEC. 101. Section 639 of the Head Start Act (42 U.S.C. 9834) (hereafter in this title referred to as the "Act") is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 639. There are authorized to be appropriated for carrying out the provisions of this subchapter $1,130,542,000 for fiscal year 1987, $1,175,764,000 for fiscal year 1988, $1,222,795,000 for fiscal year 1989, and $1,271,717,000 for fiscal year 1990.".

ALLOTMENT OF FUNDS

SEC. 102. (a) INDIAN AND MIGRANT PROGRAMS.—Section 640(a)(2)(A) of the Act is amended to read as follows:

"(A) Indian and migrant Head Start programs and services for handicapped children, except that there shall be made available for use by Indian and migrant Head Start programs, on a nationwide basis, 7 1/10 percent of the total amount of funds available for this subchapter during such fiscal year;".

(b) TRAINING AND TECHNICAL ASSISTANCE.—The second sentence of section 640(a)(2) of the Act is amended to read as follows: "In any fiscal year in which the appropriation for which the program authorized by this subchapter is less than the amount appropriated for fiscal year 1984, the minimum reservation contained in clause (C) of this paragraph shall not apply and the amount reserved for training and technical assistance activities described in such clause (C) shall be 3 percent of the total amount available during such fiscal year for this subchapter.".

COORDINATION

SEC. 103. Section 642(c) of the Act is amended by inserting before "programs" the following: "State and local".

PARTICIPATION IN HEAD START PROGRAMS

SEC. 104. Section 645(a) of the Act is amended by striking out "1986" and by inserting "1990".

TITLE II—THE DEPENDENT CARE STATE GRANT PROGRAM

REAUTHORIZATION

SEC. 201. Section 670A of the Omnibus Budget Reconciliation Act of 1981 (42 U.S.C. 9871) (hereafter in this title referred to as the "Act"), relating to grants to States for planning and development of dependent care programs, and for other purposes, is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 670A. For the purpose of allotments to States to carry out the activities described in section 670D, there are authorized to be appropriated $20,000,000 for the fiscal year 1987 and for each of the two succeeding fiscal years.".

AMENDMENTS ON DEPENDENT CARE SERVICES INFORMATION; LICENSING

SEC. 202. (a) DEPENDENT CARE SERVICES INFORMATION.—Subsection (a) of section 670D of the Act is amended—

(1) by inserting "(1)" after the subsection designation;

(2) by striking out "shall" in the second sentence and inserting in lieu thereof "may";

(3) by redesignating clauses (1), (2), (3), (4), (5), (6), and (7) in the second sentence as clauses (A), (B), (C), (D), (E), (F), and (G), respectively; and

(4) by striking out the third sentence and inserting in lieu thereof the following:

"(2) The State, with respect to the uses of funds described in paragraph (1) of this subsection shall—

"(A) provide assurances that no information will be included with respect to any dependent care services which are not provided in compliance with the laws of the State and localities in which such services are provided; and

"(B) provide assurances that the information provided will be the latest information available and will be kept up to date.".

(b) SCHOOL-AGE CHILD CARE SERVICES.—(1) Section 670D(b)(1) of the Act is amended by striking out "where school facilities are not available".

(2) Section 670D(b)(2)(E) of the Act is amended by inserting before "licensing laws" the following: "child care".

SCHOOL-AGE CHILD DEFINITION

SEC. 203. Section 670G(7) of the Act is amended by inserting before the semicolon a comma and the following: "except that in any State which by State law children at an earlier age are provided free public education, the age provided in State law shall be substituted for age five".

SHORT TITLE

SEC. 204. Chapter 8 of title VI of the Act is amended by adding at the end thereof the following new section:

"SHORT TITLE

"SEC. 670H. This subchapter may be cited as the 'State Dependent Care Development Grants Act'.".

TITLE III—LOW-INCOME HOME ENERGY ASSISTANCE PROGRAM

REAUTHORIZATION

SEC. 301. Section 2602(b) of the Low-Income Home Energy Assistance Act of 1981 (42 U.S.C. 8621(b)) (hereafter in this title referred to as the "Act") is amended to read as follows:

"(b) There is authorized to be appropriated to carry out the provisions of this title, $2,163,000,000 for the fiscal year 1987, $2,227,890,000 for the fiscal year 1988, $2,294,726,000 for the fiscal year 1989, and $2,363,567,000 for the fiscal year 1990.".

ADMINISTRATION OF ENERGY CRISIS INTERVENTION PROGRAM

SEC. 302. Section 2604(c) of the Act is amended by inserting at the end thereof the following: "Such entities shall include community-based organizations (such as agencies on aging or community action programs).".

CALCULATION OF GRANTS TO INDIAN TRIBES

SEC. 303. Section 2604(d)(2) of the Act is amended—

(1) by striking out "in such State with respect to which a determination under this subsection is made" and inserting in lieu thereof "and residing within the State on

the reservation of the tribes or on trust lands adjacent to such reservation";

(2) by inserting before the period at the end of such section a comma and the following: "or such greater amount as the Indian tribe and the State may agree upon"; and

(3) by adding at the end thereof the following: "In cases where a tribe has no reservation, the Secretary, in consultation with the tribe and the State, shall define the number of Indian households for the determination under this paragraph.".

APPLICATIONS AND REQUIREMENTS

SEC. 304. (a) STATE PROCEDURES.—Section 2605(b)(5) of the Act is amended—

(1) by striking out ", in a manner consistent with the efficient and timely payment of benefits,"; and

(2) by inserting after "size" a comma and the following: "assure that the neediest households receive the maximum assistance, and provide timely and efficient payment of benefits".

(b) CONFORMING AMENDMENTS.—Section 2605(b) of the Act is amended—

(1) by striking out clauses (14), (15), and (16);

(2) by inserting "and" at the end of clause (13); and

(3) by redesignating clause (17) as clause (14).

CONTENTS OF STATE PLAN

SEC. 305. Section 2605(c)(1) of the Act is amended by striking out clauses (A) through (E) and inserting in lieu thereof the following:

"(A) describes the eligibility requirements to be used by the State for each type of assistance to be provided under this title, including criteria for designating an emergency under section 2604(c);

"(B) describes the benefit levels to be used by the States for each type of assistance including assistance to be provided for emergency crisis intervention and for weatherization and other energy-related home repair;

"(C) contains estimates of the amount of funds the State will use for each of the programs under such plan and describes the alternative use of funds reserved under section 2504(c) in the event any portion of the amount so reserved is not expended for emergencies;

"(D) describes weatherization and other energy-related home repair the State will provide under subsection (k);

"(E) describes how the State will carry out assurances in clauses (3), (4), (5), (6), (7), (8), (10), (12), and (13) of subsection (b); and

"(F) contains any other information determined by the Secretary to be appropriate for purposes of this title.".

CONSISTENT TREATMENT OF ENERGY ASSISTANCE PAYMENTS

SEC. 306. (a) TREATMENT OF PAYMENTS.—Section 2605(f) of the Act (42 U.S.C. 8624(f)) is amended—

(1) by inserting "(1)" after the subsection designation;

(2) by striking out "provided to" and inserting in lieu thereof "provided directly to, or indirectly for the benefit of,"; and

(3) by adding at the end thereof the following new paragraph:

"(2) In carrying out the provisions of paragraph (1), for purposes of determining any excess shelter expense deduction under section 5(e) of the Food Stamp Act of 1977 (7 U.S.C. 2014(e))—

"(A) the full amount of such payments or allowances shall be deemed to be expended by such household for heating or cooling expenses, without regard to whether such payments or allowances are provided directly to, or indirectly for the benefit of, such household; and

"(B) no distinction may be made among households on the basis of whether such payments or allowances are provided directly to, or indirectly for the benefit of, any of such households.".

(b) EFFECTIVE DATE.—The amendments made by this section shall become effective on October 1, 1986, or on the date of the enactment of this Act, whichever is later.

TITLE IV—COMMUNITY SERVICES BLOCK GRANT

REAUTHORIZATION

SEC. 401. (a) GENERAL AUTHORIZATION.—Section 672(b) of the Community Services Block Grant Act (42 U.S.C. 9901) (hereafter in this title referred to as the "Act") is amended by adding at the end thereof the following new sentence: "There is authorized to be appropriated $381,409,000 for the fiscal year 1987, $392,851,000 for the fiscal year 1988, $404,636,000 for the fiscal year 1989, and $416,775,000 for the fiscal year 1990, to carry out the provisions of this subtitle.".

(b) COMMUNITY FOOD AND NUTRITION.—Section 681A(b) of the Act is amended by striking out "1985 and 1986" and inserting in lieu thereof "1987, 1988, and 1989".

DEFINITION; ELIGIBLE ENTITY

SEC. 402. The first sentence of section 673 of the Act is amended by inserting after "1981" a comma and the following: "or which came into existence during fiscal year 1982 as a direct successor in interest to such a community action agency or community action program and meets all the requirements under section 675(c)(3) of this Act with respect to the composition of the board.".

REQUIREMENTS

SEC. 403. (a) TRANSFER AUTHORITY.—Section 675(c)(5) of the Act is amended to read as follows:

"(5) provide assurances that the State may transfer funds, but not to exceed 5 percent of its allotment under section 674, to increase the level of assistance otherwise available to eligible entities under this subtitle, to support services under the Older Americans Act of 1965, the Head Start program under subchapter B of chapter 8 of subtitle A of this title, the energy crisis intervention program under title 26 of this Act (relating to low-income home energy assistance), or the Temporary Emergency Food Assistance Act of 1983, or to provide assistance for State awarded discretionary grants to contribute to the goals of this subchapter to address the causes of poverty, except that the State may not transfer any funds which would diminish the requirement of the State under clause (2)(A) of this subsection;".

(b) TERMINATION PROCEDURES.—(1) Section 675(c)(11) of the Act is amended by inserting after "subject to" the following: "the procedures and".

(2) Section 676A of the Act is amended—

(A) by redesignating the section as subsection (b), and

(B) by inserting before the redesignated subsection (b) the following:

"SEC. 676A. (a) Whenever a State violates the assurances contained in section 675(c)(11) and terminates the funding of a community action agency or migrant and seasonal farmworker organization prior to the completion of the State's hearing and the Secretary's review as required in section 679 of this Act, the Secretary shall assume responsibility for providing financial assistance to the community action agency or migrant and seasonal farmworker organization affected.".

(3) Section 676A of the Act, as amended by this subsection, is further amended by adding at the end thereof the following:

"(c) The Secretary shall conduct the review through the Office of Community Services, which shall promptly conduct such review and issue a written determination together with the reasons of the Secretary therefor.".

(4) The heading of section 676A of the Act is amended to read as follows:

"PROCEDURES FOR A REVIEW OF TERMINATION OF FUNDING".

(c) REPEAL OF EXECUTED PROVISION.—The last sentence of section 675(c) is repealed.

FISCAL EVALUATIONS

SEC. 404. (a) GENERAL RULE.—Section 679(b)(1) of the Act is amended—

(1) by inserting "evaluations and" after "fiscal year";

(2) by adding before the period at the end thereof a comma and the following: "and especially with respect to compliance with sections 672(a), 675(b), and (c)(1) through (11)"; and

(3) by adding at the end thereof the following new sentences: "Such evaluation shall include identifying the impact that assistance furnished under this subtitle has on children, homeless families, and the elderly poor. A report of the evaluation, together with recommendations of improvements designed to enhance the benefit and impact to people in need, will be sent to each State evaluated. Upon receiving the report the State will then submit a plan of action in response to the recommendation contained in the report. The results of such evaluation shall be submitted annually to the Chairman of the Committee on Education and Labor of the House of Representatives and the Chairman of the Committee of Labor and Human Resources of the Senate.".

(b) CONFORMING AMENDMENT.—Section 675(i) is repealed.

DISCRETIONARY AUTHORITY

SEC. 405. (a) GENERAL RULE.—(1) The matter preceding clause (1) of section 681(a) of the Act is amended—

(A) by striking out "is authorized, either directly or through" and inserting in lieu thereof "is authorized to make"; and

(B) by inserting before "contracts" the following: "to enter into".

(2) Section 681(a)(1) of the Act is amended by inserting before the semicolon a comma and the following: "including national conferences, newsletters, and collection and dissemination of data about programs and projects assisted under this subtitle".

(3) Section 681(a)(2)(A) of the Act is amended to read as follows:

"(A) special programs of assistance, awarded on a competitive basis, to private, locally initiated, nonprofit community development corporations, (or affiliates of such corporations) governed by a board consisting of residents of the community and business and civic leaders, which sponsor enterprises providing employment and business development opportunities for low-income residents of the community designed to increase business and employment opportunities in the community;".

(4) Section 681(a)(2)(B) of the Act is amended by inserting before the semicolon the following: "except that loans to borrow-

ers made after the date of enactment of the Food Security Act of 1985 and prior to the date of enactment of the Human Services Reauthorization Act of 1986 shall be transferred to and administered by the Secretary of Agriculture subject to the provisions of the Food Security Act of 1985".

(5) Section 681(a)(2)(D) of the Act is amended by inserting before the semicolon a comma and the following: "with special priority to rural community assistance programs".

(b) NATIONAL CONFERENCE PROVISIONS.—Section 681 of the Act is amended—

(1) by redesignating subsection (b) as subsection (d); and

(2) by adding after subsection (a) the following new subsections:

"(b)(1) The Secretary shall appoint an Advisory Panel consisting of nine members which shall be convened to develop and hold a national conference designed to promote a full exchange of information on past approaches to the problems of poverty in the formulation of innovative plans for future methods of attacking the causes of poverty and the encouragement of self-sufficiency of the poor in the United States.

"(2) The membership of the Advisory Panel shall consist of—

"(A) three members elected by the directors of eligible entities receiving assistance under this subtitle;

"(B) two representatives selected by the National Association of State Community Service Programs;

"(C) one member of the Office of Community Services appointed by the Secretary;

"(D) one member appointed by the Secretary; and

"(E) two members elected by the members of the panel described in clauses (A) through (D) before the first meeting of the Advisory Panel.

The two members of the Advisory Panel selected under clause (E) shall represent nonprofit eleemosynary organizations, members of academic community, or charitable foundations, and have a history of involvement in self-sufficiency programs for the poor, the elimination of the causes of poverty, or the study of the underpinnings of poverty.

"(3) The Secretary shall from amounts appropriated for administrative expenses for the Department, reserve $100,000 to carry out the provisions of this subsection.

"(c)(1) The final reports on projects completed with assistance made under this section to be summarized and presented annually to the Chairman of the Committee on Education and Labor of the House of Representatives and the Chairman of the Committee on Labor and Human Resources of the Senate. The report shall contain a list of grantees who have received funds under this section outside of the competitive process.

"(2) The Secretary shall, at the end of each fiscal year, prepare and distribute a catalog listing all the projects assisted under clause (A) of subsection (a)(2) in that year. The catalog shall include—

"(A) a description of each project;

"(B) an identification of the agency receiving the award, including the name and address of the principal investigator;

"(C) a description of the project objectives; and

"(D) a statement of the accomplishments of the project.".

DEMONSTRATION PARTNERSHIP AGREEMENTS ADDRESSING THE NEEDS OF THE POOR

SEC. 406. (a) GENERAL AUTHORITY.—(1) In order to provide for the self-sufficiency of the Nation's poor, the Secretary may make grants from funds appropriated pursuant to subsection (e) to eligible entities for the development and implementation of new and innovative approaches to deal with particularly critical needs or problems of the poor which are common to a number of communities. Grants may be made only with respect to applications which—

(A) involve activities which can be incorporated into or be closely coordinated with eligible entities' ongoing programs;

(B) involve significant new combinations of resources or new and innovative approaches involving partnership agreements; or

(C) are structured in a way that will, within the limits of the type of assistance or activities contemplated, most fully and effectively promote the purposes of the Community Services Block Grant Act.

(2) No grant may be made under this section unless an application is submitted to the Secretary at such time, in such manner, and containing or accompanied by such information, as the Secretary may require.

(b) FEDERAL SHARE; LIMITATIONS.—(1) Grants awarded pursuant to this section shall be used for new programs and shall not exceed 50 per centum of the cost of such new programs.

(2) Non-Federal contributions may be in cash or in kind, fairly evaluated, including but not limited to plant, equipment, or services.

(3) No more than one grant may be made to any eligible entity and no grant may exceed $250,000.

(4) No application may be approved for assistance under this section unless the Secretary is satisfied that—

(A) the activities to be carried out under the application will be in addition to, and not in substitution for, activities previously carried on without Federal assistance; and

(B) funds or other resources devoted to programs designed to meet the needs of the poor within the community, area, or State will not be diminished in order to provide the matching contributions required under this section.

(c) DISSEMINATION OF RESULTS.—As soon as practicable, but no later than 90 days after the expiration of any grant awarded under this section, the Secretary shall prepare and make available upon request to each State and eligible entity descriptions of the demonstration programs assisted under this section, any relevant information developed and results achieved, so as to provide models for innovative programs to other eligible entities.

(d) DEFINITIONS.—As used in this section, the term—

(1) "eligible entity" has the same meaning given that term by section 673(1) of the Community Services Block Grant Act; and

(2) "Secretary" means the Secretary of Health and Human Services.

(e) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated $10,000,000 for each of the fiscal years 1987, 1988, and 1989, to carry out this section.

TITLE V—CHILD DEVELOPMENT ASSOCIATE SCHOLARSHIP ASSISTANCE PROGRAM

SHORT TITLE

SEC. 501. This Act may be cited as the "Child Development Associate Scholarship Assistance Act of 1985".

GRANTS AUTHORIZED

SEC. 502. The Secretary is authorized to make a grant for any fiscal year to any State receiving a grant under title XX of the Social Security Act for such fiscal year to enable such State to award scholarships to eligible individuals within the State who are candidates for the Child Development Associate credential.

APPLICATIONS

SEC. 503. (a) APPLICATION REQUIRED.—A State desiring to participate in the grant program established by this title shall submit an application to the Secretary in such form as the Secretary may require.

(b) CONTENTS OF APPLICATIONS.—A State's application shall contain appropriate assurances that—

(1) scholarship assistance made available with funds provided under this title will be awarded—

(A) only to eligible individuals,

(B) on the basis of the financial need of such individuals, and

(C) in amounts sufficient to cover the cost of application, assessment, and credentialing for the Child Development Associate credential for such individuals; and

(2) not more than 10 percent of the funds received by the State under this title will be used for the costs of administering the program established in such State to award such assistance.

(c) EQUITABLE DISTRIBUTION.—In making grants under this title, the Secretary shall—

(1) distribute such grants equitably among States in the various regions of the Nation, and

(2) ensure that the needs of rural and urban areas are appropriately addressed.

DEFINITIONS

SEC. 504. As used in this title—

(1) "eligible individual" means a candidate for the Child Development Associate credential whose income does not exceed the poverty line, as defined in section 673(2) of the Community Services Block Grant Act (42 U.S.C. 9902(2)), by more than 50 percent;

(2) "Secretary" means the Secretary of Health and Human Services;

(3) "State" means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Commonwealth of the Northern Mariana Islands, the Republic of the Marshall Islands, the Federated States of Micronesia, and the Republic of Palau.

ADMINISTRATIVE PROVISIONS

SEC. 505. (a) REPORTING.—Each State receiving grants under this title shall annually submit to the Secretary information on the number of eligible individuals assisted under the grant program, and their positions and salaries before and after receiving the Child Development Associate credential.

(b) PAYMENTS.—Payments pursuant to grants made under this title may be made in installments, and in advance or by way of reimbursement, with necessary adjustments on account of overpayments or underpayments, as the Secretary may determine.

AUTHORIZATION OF APPROPRIATIONS

SEC. 506. There are authorized to be appropriated $1,500,000 for the fiscal year 1987 and for each succeeding fiscal year ending prior to October 1, 1990, for carrying out the provisions of this title.

SECTION-BY-SECTION ANALYSIS

The first sentence of the bill provides that the Act may be cited as the "Human Services Reauthorization Act of 1986".

TITLE I—HEAD START

Section 101 reauthorizes Head Start through fiscal year 1990:

1987	$1,130,542,000
1988	$1,175,764,000
1989	$1,222,795,000
1990	$1,271,717,000

Section 102 eliminates the cost of living adjustment for Indian and Migrant Head Start programs. It specifies that national funding for these programs is to be no less than 7.1% of the amount appropriated. This section also provides that in years when the Head Start appropriations are less than the FY 84 appropriation, funding for training and technical assistance shall be 3% of the appropriation.

Section 103 specifies that the type of programs Head Start agencies are to coordinate with are "state and local."

Section 104 continues the prohibition through 1990, of any change in the method the Secretary uses to calculate income used to prescribe eligibility for the participation of persons in the Head Start program if the change would result in any reduction or exclusion of persons in the program.

TITLE II—DEPENDENT CARE STATE GRANT PROGRAM

Section 201 reauthorizes the Dependent Care programs at $20,000,000 for fiscal years 1987-1989.

Section 202 provides that the specified types of information on dependent care services to be made available by resource-and-referral systems are optional rather than mandatory. It requires states to provide assurances to the Secretary that

1. The grant funds will not be used to provide information on dependent care services that are not in compliance with state and local laws

2. The information provided will be the latest available and will be kept up to date.

The section also eliminates the requirement that before-and-after-school child care programs be provided at community centers only where school facilities are not available and clarifies that the licensing laws and regulations with which applicants must comply are those relating to "child care."

Section 203 revises the definition of school-aged children to include children under age five, the younger age to be consistent with the age at which each state provides free public education to children.

Section 204 adds a new section to permit the Act to be cited as the "State Dependent Care Development Grants Act."

TITLE III—LOW INCOME HOME ENERGY ASSISTANCE

Section 301 authorizes appropriations:

1987	$2,163,000,000
1988	2,227,890,000
1989	2,294,726,000
1990	2,363,567,000

Section 302 clarifies that for the purposes of the Food Stamp Act, LIHEAP payments or allowances shall be deemed to be spent for heating or cooling expenses. No distinction shall be made regarding whether payments or allowances are provided directly to or indirectly for the benefit of any household. Amendments in this section are to become effective on date of enactment or October 1, 1986, whichever is later.

Section 303 provides that community-based organizations such as Agencies on Aging or Community Action Programs are the types of entities which may administer the energy programs.

Section 304 makes two changes in the criteria the Secretary must follow in establishing the portion of a state's allotment to be sent aside for direct grants to Indian tribes. First, the formula would be keyed to the number of Indian households (rather than only member households of the particular tribe making the request) residing on the reservation and adjacent trust lands. In cases where a tribe has no reservation, the Secretary shall define the population after consultation with the Indian Tribe and the state. The section also allows the Secretary to set aside for direct grants to the Indian tribes an amount greater than that produced by the statutory formula if that is agreed upon by the state and the governing organization of the Tribe.

Section 305 expands the requirements for the annual application under Section 2605(c) to stress that the neediest households receive the maximum assistance under LIHEAP.

Section 306 reorganizes the requirements for the annual application under Section 2605(b) of the Act and the State plan under Section 2605(c) of the Act.

TITLE IV—COMMUNITY SERVICES BLOCK GRANT

Section 401 authorizes appropriations:

1987	$381,409,000
1988	392,851,000
1989	404,636,000
1990	416,775,000

It also extends authority for appropriations for the Community Food and Nutrition program through 1989.

Section 402 expands the definition of eligible entity to include programs which came into existence in FY82 as a direct successor to a community action agency and meets all of the board composition requirements of section 675(c)(3).

Section 403(a) requires that the allowed transfer of up to 5% of a state's allotment to currently specified programs or to provide assistance for state-awarded discretionary grants is to increase funds otherwise available to eligible entities under the CSBG program. It prohibits the transfer of funds that would diminish the state's responsibility to pass through 90% of funds to eligible entities.

Section 403(b) establishes procedures which the Secretary must follow in reviewing State proposed termination of funding to CAAs or migrant and seasonal farmworker organizations. These procedures include a prompt review and written determination by the Office of Community Services. The section also requires the Secretary to assume responsibility for funding the affected eligible entity if a state terminates funding prior to the completion of the required state hearing and Secretary's review.

Section 403(c) eliminates the transitional provision which had prohibited against organizations receiving funds under the 90% pass-through requirement for receiving additional funds.

Section 404 combines the required investigation and evaluation of compliance requirements in the CSBG program. It states that such compliance evaluations are to be made especially with regard to: Grants to states to ameliorate the causes of poverty in communities; state public hearings on the proposed use and distribution of funds; all the 11 agreements required of states in their annual application; for their allotment of funds.

Such evaluations are to include the impact of funds under this program on children, homeless families and the elderly poor. The Secretary will send recommendations of improvements on how to enhance the benefit and impact to people in need to each state and the state will then submit a plan of action in response to the recommendation contained in the report. Evaluation results are to be submitted annually to the Chairmen of the House Education and Labor and Senate Labor and Human Resources Committees.

Section 405(a) in addition to technical amendments, authorizes the Secretary to fund national conferences, newsletters, and the collection and dissemination of data about programs and projects funded under the CSBG program as part of training activities authorized under the program. It also specifies that Community Development Corporations, which are one of the special emphasis programs for which funding is authorized, are to be governed by a board consisting of residents of the community and business and civic leaders. In addition, this section gives special priority to rural community assistance programs under the special emphasis program on rural housing and community facilities development.

Section 405(b) directs the Secretary to appoint an advisory panel to develop and hold a national conference to exchange information on past approaches to the problems of poverty and to formulate plans for future methods attacking the causes of poverty. The Secretary is directed to reserve $100,000 from administrative expenses to fund this conference. This section specifies the composition of the nine member panel and who is to designate each of its members.

Section 405(c) requires that the Chairman of the House Education and Labor, and Senate Labor and Human Resources Committees are to be provided annually with a summary of final reports on projects assisted under the Secretary's discretionary authority and a list of grantees who have received funds under this authority outside of the competitive process. This section directs the Secretary to compile and make available a catalog listing information on the projects funded under the discretionary grant program.

Section 406 authorizes $10,000,000 each for FY 1987-89 for a new program for the development and implementation of new and innovative approaches to deal with particularly critical needs or programs of the poor which are common to a number of communities. Grants are to be made only for the projects which can be closely coordinated with grantees' ongoing programs; involve significant new combinations of resources of new and innovative approaches involving partnership agreements; and will effectively promote the purposes of the CSBG program.

The Secretary is authorized to make grants to eligible entities to pay for no more than 50% of the costs of the program, with the non-federal share to be in kind or in cash. Not more than one grant may be made to a single entity, and no grant may exceed $250,000. Federal funds are to be for new programs; they may not substitute for programs previously carried out without federal assistance; and other resources for the poor may not be diminished to provide the non-federal match required for this program.

The Secretary is required to prepare and make available upon request to each state and eligible entity information on the results of any funded projects not later than 90 days after the expiration of the grant awarded.

(Mr. STAFFORD submitted the following statement on behalf of Mrs. HAWKINS.)

HUMAN SERVICES REAUTHORIZATION ACT

● Mrs. HAWKINS. Mr. President, today I am introducing legislation to reauthorize four important Federal programs, the Head Start Act, the Low Income Home Energy Assistance Act, the Dependent Care Program and the Community Services Block Grant. This legislation, the Human Services Reauthorization Act of 1986 is cosponsored by Senator HATCH, Senator STAFFORD, Senator DODD, Senator KENNEDY, Senator CHAFEE, Senator BYRD, Senator ARMSTRONG, Senator KERRY, Senator WEICKER, Senator RIEGLE, Senator PELL, and Senator SIMON.

This reauthorization legislation is based upon the testimony presented before my Subcommittee on Children, Family, Drugs and Alcoholism and incorporates provisions that were included in Senator STAFFORD's S. 2081 the Human Services Reauthorization Act, Senator HATCH's S. 2386, the Dependent Care Development Reauthorization Act, and Senator DODD's S. 804, the CDA Scholarship Assistance Act.

HEAD START

The Head Start Program is one of the most successful of the Federal poverty programs. In its 21 year history it has assisted low-income children in getting a head start in life. Head Start is not simply a childcare program. It is a multidisciplinary program which monitors the child's medical, dental, and mental health development.

During our subcommittee's reauthorization hearing on this program, I recited countless examples of success stories involving not just Head Start children, but Head Start families. I placed special emphasis on the family, because this program makes a concerted effort to involve the family in the child's development. Over 63 percent of Head Start parents, about 420,000 last year, volunteer to participate in the program, drawing them closer to their children and permitting them to gain from their child's development.

As I analyzed the history of this program and reviewed the testimony before my subcommittee, I agree with the comments of Senator KERRY, who told Dorcas Hardy, the Assistant Secretary for Human Development Services that "I hope we can give you a little more money than you asked for." That is exactly what this reauthorization legislation provides for by authorizing $1,130,542,000 in fiscal year 1987 and providing a 4 percent inflation increase in subsequent years.

The only modifications I am making in the Head Start Act are to express the funding levels for Indian and Migrant Head Start Programs. After reviewing the salaries of the Indian and Migrant Head Start teachers, I have determined that they are near parity with other Head Start faculty and thus I have acted on the administration's recommendation to eliminate the cost-of-living adjustment for Indian and migrant Head Start teachers. Another modification I have made is to adjust the training and technical assistance in terms of a proportion of the total Head Start budget. Therefore, if the appropriations for the total program are reduced, the size of the programs will remain the same to proportion that they have in the past.

STATE DEPENDENT CARE DEVELOPMENT GRANTS ACT

This legislation also reauthorizes the dependent care programs who have had a torturous and troubled history, despite the fact that the need for some type of Federal financial incentive for these types of childcare is well documented. This section of the Human Services Reauthorization Act is based on a proposal developed by the chairman of the Senate Labor and Human Resources Committee, ORRIN HATCH. The legislation would reauthorize the State Dependent Care Development Grants Act for an additional 3 years at an authorized level of $20 million a year.

The reauthorization legislation amends the act to clarify the assurances that the Dependent Care Information and Referral Program must make to the State to be eligible for assistance. It inserts the words "childcare" before the licensing requirements to stress that the School-Aged Childcare Program is expected to meet all of the licensing requirements appropriate for a childcare facility that served school-aged children, not the licensing requirements appropriate for a school. And the definition of school-aged child is expanded to take into account those States who provide free public education at an age younger than 5 years. The act is also amended to eliminate the priority given to school facilities, thus permitting school-based facilities to compete on an equal basis with community-based school-aged childcare programs for these development funds.

LOW-INCOME HOME ENERGY ASSISTANCE PROGRAM

The Low-Income Home Energy Assistance Program [LIHEAP] affects close to 7 million households all across our county, but these 7 million represent only one-quarter of the low-income people who are eligible for this assistance.

Despite the growth of this program, from $200 million when it began in 1977, to the $2.1 billion authorized last year, States still run out of funds before they are able to assist all those who need help. The LIHEAP Program was designed to provide assistance to the poor—the working poor, the handicapped poor, the elderly poor where it has been established that there is a desperate need—often a life or death need—for this energy assistance. I think it is helpful and encouraging to point out that LIHEAP programs have become a base on which other resources, both financial and human have been mobilized. In addition the LIHEAP Program has been a catalyst to generate millions of dollars of State contributions.

The reauthorization period has been extended to 4 years with a 3 percent per year increase included as an inflation factor. Multiyear reauthorization will help ensure that LIHEAP is administered smoothly.

Language has been strengthened to reiterate congressional intent that LIHEAP benefits are not counted as income in determining the eligibility or amount of assistance under other Federal or State assistance programs.

The restriction that Indian tribal organizations may serve only members of the tribe has been amended. This language will allow such organizations to extend service under the LIHEAP program to Indians and non-Indian households in a community. LIHEAP has, since its inception, enjoyed bipartisan support. I welcome my colleagues's support of this legislation and I look forward to working with them in reaffirming this commitment to LIHEAP and the poor in America.

Community based organizations such as Agencies on Aging or Community Action programs are specified as eligible entities to administer the State's energy crisis program.

Finally, the reauthorization reorganizes the requirements for the annual application and State plans under the act, eliminating one requirement on estimates of energy usage and costs and stressing that the neediest households receive the maximum assistance under LIHEAP.

COMMUNITY SERVICES BLOCK GRANT

This block grant is one of the most effective assaults we have mounted on the causes of poverty in our country. It is a "boot strap" program that helps people help themselves; that creates new jobs for the unemployed at half the cost of similar programs in the Department of Labor; that encourages its participants to feel self esteem and pride in work well done.

When we talk of a safety net that protects Americans from starvation, homelessness, and lack of medical care, the Community Service Block Grant is an intergral part of that safety net. It provides a flexibility and immediate emergency assistance in the delivery of fiscal assistance that can not be provided by the more rigid social service programs with their eligibility standards and guidelines. I believe that the small amount of money in this program provides the all important knots that hold the strands of that safety net together.

I am reauthorizing this program because I have found it to be a cost effective way to overcome the problems of poverty and to help people become self-sufficient, self-supporting citizens. As I toured community action agencies and reviewed the General Accounting Offices' report on the uses of CSBG funds, I became very impressed with the approach of programs funded under CSBG.

These programs offered a hand, not a hand-out. The workers and volunteers did not simply process the eligibility forms for welfare, they took a holistic approach to the individuals plight. The unemployed individual who may have initially come to the Community Action Agency for his share of free agriculture commodities is often guided into job training programs, his Children are enrolled in Head Start and he is told of the availability of weatherization funds for his home.

The reauthorization legislation authorizes this program for an additional 4 years at $381,409,000 in fiscal year 1987 with a 3 percent increase in the remaining years. The bill also reauthorizes the Community Food and Nutrition Program and authorizes $10 million for 3 years for a program of innovative demonstration projects addressing the needs of the poor by promoting partnerships between the Federal Government and State and communities. I feel that flexibility and innovative methods of addressing poverty are the heart and soul of the Community Services Block Grant and that dwindling Federal resources have prevented these programs from expanding their activities to better reach those in need.

The reauthorization legislation contains a number of provisions regulating the process for termination of funding of a community action agency, so that the needy dependent upon these services will not suffer if funding is terminated prior to complete administrative review. I am concerned that services to the needy might be disrupted because of political disputes.

I also feel that there is a need to clarify what types of projects the Secretary is authorized to fund from the discretionary fund. The legislation mandates an annual report from the Secretary to Congress that evaluates the impact of CSBG funds on children in poverty, homeless families, and the elderly poor. These reforms were prompted by testimony presented to my subcommittee on March 27 which indicated disturbing trends in the distribution of the Secretary's discretionary funds under the Community Service Block Grant.

Testimony presented before my subcommittee indicated that these discretionary moneys had been used to fund projects outside of the competitive process at the expense of programs who had been specifically cited in the authorizing legislation. Without getting into the merits of whether the CSBG discretionary funds should be allocated to fund the District of Columbia homeless shelter, I am disturbed that funds from the CSBG discretionary fund are being diverted from projects specifically cited in the act and intended by Congress to be funded through the Secretary's discretionary fund. This action indicated a need to clarify the expected uses and restrictions on projects funded under the Secretary's discretionary authority.

CHILD DEVELOPMENT ASSOCIATE SCHOLARSHIP ASSISTANCE ACT

The child development associate credential provides intensive, high-quality training for potential child care providers.

Following their training, these persons are assessed in child care settings prior to formal certification. Since the CDA program was established in 1975, nearly 17,000 child care workers have received the CDA credential. Thirty-one States and the District of Columbia require the CDA as a prerequisite for licensure as a childcare provider.

The Administration for Children, Youth and Families at HHS has declared it a national goal to have by 1990 at least one qualified adult who has either a degree in early childhood education or a CDA credential in every Head Start classroom. However, only 30 percent of the current Head Start teachers have such training. This is due to the fact that most CDA credital recipients, and most child care providers, are low income individuals who are seeking the means to gain self-sufficiency and avoid welfare dependency. The costs associated with CDA training and certification have soared in recent years, putting the program out of reach for some individuals. The cost of the certification fee alone is $325.

At the Head Start reauthorization hearing before my Subcommittee on Children, Family, Drugs and Alcoholism, we discussed this problem and the legislation sponsored by Senator CHRISTOPHER DODD, S. 804, the CDA Scholarship Assistance Act. At that hearing, Dr. Marilyn M. Smith, executive director of the National Association for the Education of Young children testified that although the cost of a CDA is very reasonable compared with other professional certifications, the cost is nonetheless perceived as a burden by the individual childcare provider.

Dr. Smith testified in favor of S. 804 stating that the Child Development Associate Scholarship Act will be of great assistance to individuals who need financial support in applying for the credential. High quality child care is a commodity in very short supply. Given the shortage of credentialed daycare providers, many parents find themselves torn between two unattractive options; leaving the workforce and possibly relying on government income assistance, or placing the child with a potentially unqualified care provider. I support Senator DODD's legislation to improve this situation and I am delighted to incorporate it into this legislation.●

● Mr. DODD. Mr. President, I am delighted to be an original sponsor of the Human Services Rauthorization Act of 1986. This legislation includes under a separate title the Child Development Associate Scholarship Assistance Act, a bill I introduced last year to provide scholarships for child-care workers seeking on-the-job training along with a professional credential. I wish to thank Senator HAWKINS, chair of the Subcommittee on Children, Family, Drugs, and Alcoholism on which I serve as ranking minority, for agreeing to include my bill, S. 804, as a part of this legislation.

I am also pleased to join Senators HAWKINS, HATCH, STAFFORD, PELL, and RIEGLE in sponsoring this reauthorization of the Head Start, Dependent Care Block Grant, Community Service Block Grant, and Low Income Energy Programs. These four programs are critical to the health, education, and welfare of millions of children and families at risk in this country. This legislative package would reauthorize these important human services programs for 4 years, providing for a 4-percent increase in Head Start, a 3-percent increase in community services and energy assistance, and level funding for child development associate scholarships, afterschool care and resource and referral programs, and community food and nutrition programs.

THE CHILD DEVELOPMENT ASSOCIATE SCHOLARSHIP ASSISTANCE PROGRAM

As founder and cochairman of the Senate children's caucus, I can attest to the skyrocketing demand for quality, affordable child care in this country. At the first children's caucus policy forum in June of 1983, we learned that as many as 15 million children between the ages of 5 and 12 lack any adult supervision after school because their parents must work. That estimate does not include the millions of preschool-age children with parents in the labor force who need child-care services.

One sure way to improve the quality of child care in this country is to improve the skills and performance of child-care workers. The child development associate scholarship title of this omnibus reauthorization will provide eligible child-care staff with training scholarships to perfect their skills through the Child Development Asso-

ciate [CDA] Assessment and Credentialing Program.

Mr. President, the Child Development Associate National Credentialing Program provides performance-based training for child-care providers. The training focuses on 13 core areas, essential building blocks of quality child care. Caregivers must provide the children under their supervision with safe, danger-free environments which promote healthy physical development. CDA candidates must know how to create good learning environments for children to encourage the development of cognitive and communications skills. Emphasis is placed on activities which will stimulate children to express themselves creatively and assist them to gain self-esteem. Candidates must be able to help children get along with each other and adults. Caregivers also must maintain open and informative relationships with each child's family, thereby encouraging full parental involvement. Last but not least, candidates are expected to become effective managers of child-care programs who will continue to seek new ways to improve the care of children in their charge.

Before a CDA credential is awarded, all candidates are assessed on the basis of their performance in a child-care setting. A local CDA assessment team both observes the candidate as she works with the children in her care and asks the parents of such children for their appraisals of her performance. Candidates themselves are also encouraged to play a role in the assessment process by providing dossiers of their accomplishments and participating in the local team's discussions.

The CDA credential is the only national credential formally certifying professional child-care skills. The first CDA credential was awarded on July 24, 1975. To date, more than 15,000 child-care workers have received the CDA credential. And, some States and the District of Columbia have made the CDA credential a part of their child-care licensing requirements. We are very much indebted to Prof. Ed Zigler of Yale University who established the CDA Credentialing Program over a decade ago during his tenure as Director of the Office of Child Development in the then Department of Health, Education, and Welfare.

The overwhelming majority of child-care workers are women who work exceedingly long hours for very little pay. Close to 90 percent of all family day-care providers, for example, earn less than the minimum wage. Yet such work provides an income for many women who would otherwise be dependent on the Aid for Dependent Children [AFDC] Program. Just as importantly, child-care workers make it possible for other mothers to enter the work force and gain self-sufficiency.

The CDA credential allows child-care workers to gain professional status and often to improve their salaries and benefits. Yet CDA candidates are now faced with over a 100-percent increase in the fee they must pay to be certified, from $35 to $325. Given the extremely low salaries of most child-care workers, such high fees could force many of them to forgo training and subsequent CDA certification.

The child development associate scholarship title will provide low-income child-care workers with scholarships to enable them to obtain CDA training and credentialing. The cost of my proposal is modest, totaling only $1.5 million on a yearly basis. Yet the benefits will be enormous for the workers who receive training and formal recognition of their skills as well as for the children in their care.

At present, some 3,000 child-care workers a year receive CDA certificates. With the scholarship program now included in this reauthorization, an additional 1,000 to 2,000 low-income providers could be trained and certified. Scholarships will be awarded to eligible caregivers on the basis of financial need. To cut down on administrative costs, the State agency responsible for the title XX social services block grant program would administer the scholarship program. And to follow up on the effectiveness of this small grant program, the State agency would tell the Secretary of Health and Human Services each year how many workers received scholarships and what their positions and salaries were both before and after receiving the CDA credential.

THE HEADSTART REAUTHORIZATION

As the New York Times noted in an editorial: "* * * American society does know one sure way to lead poor children out of a life of poverty * * * Project Head Start."

Given the crisis of children in poverty in this country, Head Start is good news indeed. For the biggest risk to the health, safety, and future well-being of close to 14 million American children is poverty. One out of every four children under the age of 6 now lives in a family whose income falls below the poverty line. For minority preschoolers, that figure is even higher: every other black child and close to every other Hispanic child will celebrate their 6th birthdays in poverty.

Yet poverty does not afflict only our very youngest citizens. Children of all ages now constitute the poorest age-group in America. More than one out of five Americans under the age of 18 is poor. In the cities of Hartford and New Haven in my State of Connecticut, that figure is higher with every other child living in poverty. And in cities across the country, adults living in families with children are now three times more likely to be poor than other adults.

Over the past 6 years, childhood poverty rates have skyrocketed. Even by conservative estimates, close to 4 million children have been added to the poverty rolls—the sharpest increase on record. Moreover, the depth of childhood poverty has intensified. Over 40 percent of all poor children live in families whose incomes do not even reach the halfway mark with respect to the poverty level.

The risks posed by childhood poverty are numerous and serious. Poverty results in a greater chance of abuse and neglect, poor health, and even death. Poor children who survive face a greater risk of dropping out of school, becoming teen parents, and ending up unemployed. The birth rate among white, unmarried adolescents has increased in recent years. And, as the children's defense fund pointed out in a study entitled "Black Children, White Children," black children today are more likely to be born into poverty, lack early prenatal care, have an adolescent or single mother, have an unemployed parent, be unemployed themselves as teenagers, and not go to college upon high school graduation.

But with the Head Start Program, we have a well-proven way to help children escape from poverty. The high/scope educational research foundation conducted a landmark study of high quality preschool programs like Head Start. This study, entitled "Changed Lives," followed a group of poor children from age three to adulthood. Half had attended a high quality preschool. The other half had not. Those with the preschool experience were twice as likely to graduate from high school, go on to college or vocational training, and to get jobs. Those without the preschool experience were more likely to drop out of school, to become teen parents, and to end up unemployed and dependent upon the welfare system. As cochairmen of the Senate children's caucus, Senator SPECTER and I will be distributing copies of "Changed Lives" to all our colleagues in the Senate.

The costs of high quality preschool education are not insignificant. But the costs of failing to provide children at risk with such a headstart on life are much, much higher. The center for population options just released a study revealing that teenage pregnancies in this country cost the welfare system $16 billion last year. And the cost of unemployment and welfare dependency in human terms show up in the grim statistics of child abuse and family violence.

As we consider the reauthorization of Head Start and celebrate its 20th anniversary, we must keep in mind that at present, we only reach 18 per-

cent of all children who are eligible for such services. And even though Head Start is not targeted to be cut in the President's fiscal year 1987 budget, reductions in other essential programs such as the Community Services Block Grant and the Child-Care Food Program will diminish the quality of Head Start. Thus, I am a cosponsor of this omnibus package to reauthorize Head Start in tandem with other critically important human services programs.

THE DEPENDENT CARE BLOCK GRANT REAUTHORIZATION

The Dependent Care Block Grant was authorized 2 years ago in response to new facts about the risks facing latchkey children in this country. This block grant was designed to provide start-up costs for after school care programs and child-care resource and referral programs. The need for such programs is great. Right now, more than half of all the towns in my State of Connecticut lack any after school program whatsoever to help children whose parents must work. But at a time when they should be expanding their services, after school care programs in eastern and western Connecticut are being forced to shut their doors because they cannot find sufficient funds to keep operating.

The demographics tell us that the demand for after school care programs is just not going to go away. As a program director in New Haven, CT, recently wrote me: "The community is in need of this service and our growth in 3 years only proves this further." The New Haven YMCA program started up in 1983 with 2 staff people and 1 van picking up 15 children at 2 area public schools. Today, 20 staff people use 4 vans and 2 rented school buses to pick up 170 children at 24 public schools.

Parents and child-care experts in New Haven and throughout Connecticut keep asking when their programs will be able to apply for funding under the Dependent Care Block Grant. Although $5 million was appropriated for this program, the administration continues to refuse to release those funds. Given that latchkey children who lack adult supervision are at much greater risk of physical and sexual abuse, accidental injury, alienation, and delinquency, the administration's 18-month delay in releasing funding was irresponsible and untenable. I regret that a representative from the administration was not present during the subcommittee hearing held on this reauthorization this past March. It is my hope that the reauthorization of this program will help convince the administration of the seriousness of congressional intent in providing the startup of afterschool care and resource and referral programs from Connecticut to California.

THE COMMUNITY SERVICES BLOCK GRANT REAUTHORIZATION

The Community Services Block Grant Program continues to serve children and families in most need. Millions of younger and older Americans receive food assistance under this program, combating hunger and malnutrition. Millions more receive housing, transportation, and employment assistance. Last but never least, countless other Americans are able to get educational and job training services through the community services block grant helping them to become self-supporting.

In addition to permitting community action agencies to deliver the above-described services to hard-pressed communities across the country, this legislative package also reauthorizes the Community Food and Nutrition Program. This program has been exemplary in my State of Connecticut in encouraging low-income communities to start child nutrition projects. I am delighted that such innovative attempts to meet the nutritional needs of children and adults in my State will continue.

LOW-INCOME ENERGY ASSISTANCE REAUTHORIZATION

Finally, the package I join in sponsoring today reauthorizes the Low-Income Energy Assistance Program. This program is very important to many residents in my State of Connecticut, where freezing winter temperatures and high heating costs all too often force choices between paying for fuel or paying for food. The Low-Income Energy Assistance Program wisely prevents younger and older Americans from making such draconian choices.

In closing, Mr. President, we know that millions of Americans have joined the ranks of the poor since 1979. The biggest number of these Americans have been children. More alarming still is the fact that many such children come from two-parent homes where one parent is working full time, year round. Since 1978, two out of every three children added to the poverty rolls come from homes with working parents. The legislative package I join in sponsoring today will provide many of these children and their families with critical supports, from Head Start, to child care, to community services, to energy assistance. I urge my colleagues to support this legislation as an important step toward giving such children and their families a headstart.●

● Mr. RIEGLE. Mr. President, I am pleased to join with my colleagues today in cosponsoring S. 2444, a bill to reauthorize the Dependent Care Block Grant Program, Head Start, the Low Income Home Energy Assistance Program, the Child Development Associate Scholarships, and the Community Services Block Grant Program. The programs that are reauthorized in this legislation play a vital role in providing for the care and education of our Nation's children, as well as providing critical services to low-income persons.

I am particularly pleased that this legislation reauthorizes the Dependent Care Grants Program because of the difficulties we have encountered in getting this program started. Mr. President, almost 2 years ago, Congress authorized this program in an attempt to address the tremendous problem that working parents face in finding suitable before and after school care for their children. We appropriated funds to get this program under way in December 1985, and the President signed the appropriation bill into law.

Since that time, Mr. President, the administration proposed a rescission of these funds, and HHS delayed promulgating the regulations until the end of April. HHS has finally issued the regulations for awarding and administering the grants, the States have begun to arrange the required matching funds and approve programs for this year. Because the regulations were released so late in the year, however, the program will barely be under way when the current authorization expires. Reauthorizing the program will provide the time and funds that are required to fully evaluate the effectiveness of this program.

Mr. President, finding suitable before and after school care is a serious problem for American families. In the intervening years since the program was authorized the number of so-called latchkey children has continued to grow because before and after school care is simply not available to meet the needs of working parents. Some estimate that as many as 20 percent of all children may be responsible for self-care while their parents are at work. This situation poses unconscionable risk to our children and creates needless worry for their parents. I believe that it is essential that we reauthorize this program so that we can begin to help working parents devise solutions to the critical shortage of before and after school child care.

Other programs in this package, such as Head Start and other community service programs, have a well-documented history of success which provides compelling reasons for our continued support. The LIHEAP Program, for example, has proved to be an enormously effective way of ensuring that low-income persons have sufficient fuel to protect them from the extremes of the weather. Regardless of the ups and downs in the world oil market, we ought to be able to provide people with sufficient heat in winter—this is fundamental to maintaining the quality of life in our communities.

Mr. President, I urge my colleagues to support this legislation. These programs provide invaluable assistance that is needed to keep our communities vibrant, safe, and stimulating places for American children.●

By Mr. MURKOWSKI (for himself, Mr. SIMPSON, and Mr. THURMOND):

S. 2445. A bill to amend title 38, United States Code, to improve certain Veterans' Administration health-care programs; to the Committee on Veterans' Affairs.

VETERANS' HEALTH CARE PROGRAMS IMPROVEMENTS ACT

● Mr. MURKOWSKI. Mr. President, as chairman of the Senate Committee on Veterans' Affairs, I am introducing today, with my colleagues Senator ALAN SIMPSON and Senator STROM THURMOND, the proposed "Veterans' Health-Care Programs Improvements Act of 1986." As we are all aware, health care in this country is changing at a rapid pace. Health-care policymakers, administrators, and clinicians are initiating cost-containment efforts which are resulting in changes in health services delivery, utilization patterns, lengths of hospital stays, and hospital occupancy rates. At the same time, our general population, including our veteran population is aging.

Public and private sector efforts abound to seek to ensure that the medical, social, and financial needs of our elderly are taken care of. Because of these cost-containment efforts and the variety of needs of a growing number of persons over the age of 65, health-care providers have had to develop new incentives, including appropriate kinds, levels, and modalities of care which are cost-effective and humane.

The Veterans' Administration should be a leader in planning for and responding to these dramatic changes. This legislation is intended to provide the VA with increased flexibility to respond to these changes in new and innovative ways within the framework of the existing comprehensive medical-care system.

SUMMARY OF PROVISIONS

Mr. President, the substantive provisions of the bill would;

First, provide the VA with the authority to furnish respite care to chronically ill veterans,

Second, provide the VA with the authority to furnish hospital-based home care and community-based, health-related services to certain veterans,

Third, clarify the VA's authority to provide community-based psychiatric residential treatment for chronically mentally ill veterans,

Fourth, provide the VA with the authority to hire certain psychologists to conduct research,

Fifth, expand the definition regarding the VA's operating beds requirement,

Sixth, require the VA to develop criteria and procedures for prioritizing State veterans home construction projects, and

Seventh, require the VA to establish an ionizing radiation registry.

The three major provisions of the bill, which I will discuss now, would provide the VA with additional authority and increased flexibility to use certain alternative services to help keep veterans at home or in the community as long as possible.

RESPITE CARE

Mr. President, section 2 of the bill I am introducing today would provide the VA with the discretionary authority to furnish respite care to chronically ill veterans. Respite care would be furnished by a VA facility on an intermittent or temporary basis to a chronically ill veteran residing primarily at home. The goal is to provide a brief break for the veteran's caregiver or family from the constant, and in some cases, long-term responsibility of caring for the veteran. This relief is intended to provide an incentive to the veteran and the family for the veteran to continue to reside at home as long as is medically advisable and otherwise feasible.

While current law does not provide the VA with specific authority to provide respite care, a number of respite care services have been developed informally and are provided on a limited basis by certain VA psychiatry, hospital-based home care, and nursing home programs. The VA's August 1984 planning document "Caring for the Older Veteran" stated that the VA's first objective in developing and carrying out an effective program for the elderly is to provide supportive services to sustain older individual's independence in their own home for as long as possible. The report cites respite care services among the spectrum of nonintrusive sustaining care services.

In April 1985 the VA submitted to the Congress a draft bill to authorize the Administrator to provide respite care and recommended its prompt enactment. Last year the House passed legislation authorizing VA respite care, but that provision was not part of the final compromise agreement on H.R. 505 which was enacted in December as Public Law 99-166.

I would like to note that since our discussions with the House last year, the VA submitted in August 1985, pursuant to Public Law 98-528, a report, "Care of the Terminally Ill Veteran Patient". The report stated that as part of its efforts to meet the needs of the terminally ill patient, a significant percentage of VA medical facilities provide some form of respite care. The VA's geriatrics and gerontology advisory committee, in its December 1985 report on hospital-based home care, recommended that "a mechanism for respite care should be included as a program component * * *." It is also important to recognize that respite care is offered as part of the Medicare hospice benefit.

Mr. President, some concern has been expressed about the use of nursing home care beds to provide respite care because of the limited supply of these beds and the high demand for them. This provision would address that concern by providing the VA with the flexibility to use acute care, intermediate care, or nursing home care beds to be used for respite care purposes, beds which VA clinicians in their best medical judgment have determined to be available at the time for this purpose.

In addition to being more humane by promoting the veteran's continued independence and delaying institutionalization, respite care may be a cost-effective use of VA resources. Because of the fairly high turnover among certain respite users, due to eventual nursing home placement or death, the VA would be able to accommodate a far greater number of patients over the course of 1 year for the same cost in staff and equipment than if the beds were used for other purposes.

ALTERNATIVES TO HOSPITAL AND NURSING HOME CARE

Mr. President, section 3 of my proposal would provide the VA with the authority to furnish two kinds of services provided to veterans in their own homes: The first, hospital-based home care and the second, health-related services. Hospital-based home care would be furnished, when medically appropriate, by the VA to chronically ill veterans otherwise eligible for hospital and nursing home care. Medical, rehabilitative, social, and nutrition services would be provided in the veteran's home by an interdisciplinary team under the direction of a physician. The purpose of this program is to enable the veteran to remain at home and receive needed services instead of being placed in a nursing home.

The Congressional Budget Office's April 1984 report discusses noninstitutional program alternatives as options for limiting the escalation in costs for care, specifically citing hospital-based home care as one such option. The VA's "Caring for the Older Veteran" report calls for an increased reliance on this program and states it has "proven potential maintaining the elderly individual with a chronic illness in the less expensive home setting, thus reducing the pressure on hospital bed capacity. Equally important, research and practice have indicated that home care can lead to a better medical result for many patients."

The VA's own Hospital-Based Home Care Program allows for the early hospital discharge to their own homes of veterans with chronic illness. Most of these veterans are expected to remain bedbound or housebound. The purpose of the program is to reduce readmissions to the hospital and provide care to patients for whom outpatients care is not feasible. The family provides the necessary personal care and the multidisciplinary team provides the services. With the addition of 4 new programs this year, the VA will have 53 such programs.

Mr. President, because less than one-third of all VA medical centers have these programs, I believe it is important to provide the VA with the flexibility to contract for such services. The VA's geriatrics and gerontology advisory committee, in its December 1985 report, recommended that they be expanded and that new models, including a contract program, be encouraged and developed. The President in his request for funds for VA medical care programs for fiscal year 1987 states that legislation will be proposed to contract for hospital-based home care.

Mr. President, section 3 of my proposal would also provide the VA with the authority to furnish community-based health-related services to certain veterans. This discretionary authority would allow the VA to contract for personal care, homemaker, nutrition, and transportation services to assist veterans eligible for and otherwise in need of community nursing home care who, but because of physical or mental health disabilities, are unable to perform necessary activities of daily living. The VA would be required to give priority for these services to veterans who are service-connected, 65 years of age or older, totally and permanently disabled, blinded, or suffering from dementia, including Alzheimer's disease.

Mr. President, long-term care can be defined as:

> Those services designed to provide diagnostic, preventive, therapeutic, rehabilitative, supportive, and maintenance services for individuals of all age groups who have chronic physical and/or mental impairments, in a variety of institutional and non-institutional health care settings, including the home, with the goal of promoting optimum levels of physical, social and psychological functioning.

Institutional long-term care is provided by the VA in several different settings—VA nursing homes and domiciliaries, community nursing homes, and State veterans homes. The VA is increasing its number and kinds of long-term care programs, particularly those outside of nursing homes and domiciliaries. These alternative programs for patients who do not require institutional care include community residential care, hospital-based home care, adult day health care, psychiatric day treatment centers, hospice and respite care programs.

In order to complete the VA's comprehensive continuum of long-term care services, this provision would provide the VA with the authority to contract for health-related services. This provision is derived from a provision in S. 876 which was passed by the Senate last year, but which was not agreed to by the House and therefore was not included in Public Law 99-166 enacted last December.

The need for this authority is clear. In 4 years there will be 7.2 million veterans over age 65 and 14 years from now that number will increase to 9 million. For those veterans who, because of a physical or mental disability, have difficulties with the most fundamental activities of personal care—eating, continence, transferring, toileting, dressing, and bathing—human assistance in the home is critical to that person's ability to remain in the home.

For example, in the case of a veteran who has suffered a stroke and whose condition has become medically stable and, therefore, is ready for discharge from the hospital, personal care could make the difference between that person's return home or entrance into a nursing home. If temporary or permanent paralysis resulting from the stroke prevents the veteran from being able to care for his personal needs, the veteran's options are extremely limited—to either home care or nursing home care. Without this authority, veterans such as this one would have no choice but to be admitted to a nursing home. This authority would provide these veterans with an opportunity to stay at home as long as is medically possible.

TREATMENT AND REHABILITATION FOR CHRONICALLY MENTALLY ILL VETERANS

Mr. President, section 4 of the measure I am intorducing today would clarify the VA's authority to contract for psychiatric residential treatment in halfway houses and other community-based facilities. This authority would specify that veterans who are being furnished VA hospital, nursing home, domiciliary or outpatient care could be provided psychiatric residential treatment at VA expense, if it is determined to be medically appropriate and in the best interests of the veteran.

The VA is the largest single provider of care for long-term psychiatric patients in the United States. Nearly one-third of the VA's inpatient population, 34 percent of the VA's nursing home care population, and over 60 percent of the VA's domiciliary patient population have psychiatric diagnoses. The VA's psychiatry and psychology services include inpatient and outpatient care and specialized programs, such as alcohol and drug dependence treatment, day hospitals, day treatment centers, and mental hygiene clinics.

A September 1985 VA Inspector General report, "Audit of VA Psychiatric Inpatient Care," found that conscientious efforts are being made to meet impatient psychiatry program objectives. However, the IG found that 33 percent of the VA's impatients could more effectively be treated in less costly environments. Though the reasons why some patients are not discharged are complex, the primary reason is that alternative programs are not available. Because of a lack of appropriate alternatives, there is a high probability that some of the veterans discharged will be returned to the hospital. Without appropriate alternative treatment programs, the IG concluded, this recidivism is likely to continue.

The VA is in the process of developing a demonstration project to provide a full spectrum of care for long-term psychiatric patients in certain areas. This effort is designed to respond to clinical experiences and research which have conclusively demonstrated that hospital bed-based programs are linited in their responsiveness to many of the chronic psychiatric patients' needs.

Mr. President, I strongly support the VA's efforts in this regard and commend them for their insight and sensitivity concerning the needs of those veterans who suffer from chronic mental illness disabilities. Caring for this patient population is extremely challenging. The deinstitutionalization efforts of the 1950's and 1960's did not succeed in accomplishing the humane goal of providing appropriate levels of care for the chronically mentally ill in a community setting. Though that effort fell short of its goal, many lessons have been learned from those mistakes.

In 1984, the American Psychiatric Association developed guidelines for a successful program of community care for the chronically mentally ill. And now the Veterans' Administration is seeking to initiate its own efforts which has the potential to set a national example of the goals and components of a comprehensive network designed to meet the needs of its chronically mentally ill patient population.

This provision is derived from a provision I introduced last year as part of S. 876 which passed the Senate. However, the measure was not agreed to by the House during the conference with the House on the measure which became Public Law 99-166. It is the case that under current law, the VA has the authority, as part of its authority to provide medical and rehabilitative services, to establish or contract for halfway houses for the chronically mentally ill.

However, I believe it is important at this time to clarify this authority and provide the VA with specific authority to do so. This provision would serve a two-fold purpose: first, to establish this program as a legislative priority and second, to assist the VA in its efforts to develop a comprehensive network for care for chronically mentally ill veterans. I believe this provision would send an important message to the public and private sectors that the needs of these individuals, particularly the opportunity to live in the community if at all possible, should be met.

CONCLUSION

Mr. President, these additional authorities that would be provided by this bill are consistent with the VA's mission to care for the medical and rehabilitative needs of eligible veterans. I believe they would enhance the VA's already comprehensive continuum of care.

The remaining four provisions of the bill relate to a variety of other important issues: research psychologists, the VA's operating beds, the State Veterans' Home Program, and veterans exposed to ionizing radiation. With respect to the provision to require the VA to establish an ionizing radiation registry, I ask unanimous consent that my December 4 letter to the VA requesting the establishment of such a registry and the VA's February 11 response be printed in the Record.

I would welcome additional cosponsors and urge my colleagues' support of this measure when it is considered on the Senate floor.

Mr. President, I ask unanimous consent that the text of this proposed legislation be printed in the RECORD.

There being no objection, the bill and letter were ordered to be printed in the RECORD, as follows:

S. 2445

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE; REFERENCES

SECTION 1. (a) This Act may be cited as the "Veterans' Health Care Programs Improvements Act of 1986".

(b) Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of title 38, United States Code.

RESPITE CARE

SEC. 2. (a) Section 601 is amended by inserting after paragraph (8) the following new paragraph:

"(10) The term 'respite care' means care furnished on an intermittent or temporary basis by a Veterans' Administration facility to a veteran who has been diagnosed as suffering from a chronic illness and who is receiving care primarily in the veteran's home.".

(b) Section 610(a) is amended by striking out "nursing home care," and inserting in lieu thereof "nursing home care or respite care,".

(c) Not later than 180 days after the date of the enactment of this Act, the Administrator of Veterans' Affairs shall transmit to the Committees on Veterans' Affairs of the Senate and the House of Representatives a report describing in detail—

(1) the actions taken before the date of the report, if any, under the authority provided by the amendment made by subsection (b), and

(2) the plans for exercising such authority.

ALTERNATIVES TO HOSPITAL OR NURSING HOME CARE

SEC. 3. (a) Section 610 is amended by adding at the end the following new subsection:

"(h)(1) The Administrator may contract to furnish hospital-based home care, when medically appropriate, to any veteran in lieu of furnishing hospital care or nursing home care to such veteran under subsection (a) of this section.

"(2) The hospital-based home care which may be furnished a veteran under paragraph (1) of this subsection may include medical, rehabilitative, social, and nutrition services.".

(b)(1) Section 620 is amended by adding at the end the following new subsection:

"(g)(1) The Administrator may contract to furnish services described in paragraph (2) of this subsection, in lieu of nursing home care under subsection (a) of this section, to any veteran who, by reason of a functional deficiency resulting from the veteran's physical or mental condition, is unable to perform a necessary activity of daily living but, considering the veteran's disability, does not require nursing home care, as determined by the Administrator.

"(2) The services which may be furnished a veteran under paragraph (1) of this subsection are the services required for the performance of any necessary activity of daily living, and may include personal care, homemaker, nutrition, and transportation services.

"(3) In administering this subsection, the Administrator shall give priority to furnishing services to a veteran—

"(A) who has a service-connected disability;

"(B) who is 65 years of age or older;

"(C) who has a total and permanent disability;

"(D) who, by reason of blindness in both eyes, has only light perception or is in need of regular aid and attendance; or

"(E) who is suffering from dementia, including Alzheimer's disease.

"(4) The total amount which may be paid for services furnished to all veterans under this subsection in any fiscal year may not exceed 60 percent of the cost which would be incurred if such veterans were furnished nursing home care under subsection (a) of this section in such fiscal year. The total of the periods for which services may be furnished to any such veteran under this subsection shall be the same as authorized for nursing home care under subsection (a) of this section.".

(2) The amendment made by paragraph (1) shall not be construed to limit or reduce the nursing home care and adult day health care programs provided in subsections (a) through (f) of section 620 of title 38, United States Code, or to encourage the limitation or reduction of such programs.

TREATMENT AND REHABILITATION FOR CHRONICALLY MENTALLY ILL VETERANS

SEC. 4. (a) Subchapter II of chapter 17 is amended by adding at the end the following new section:

"§ 620B. Community-based psychiatric residential treatment for chronically mentally ill veterans

"(a) For the purposes of this section:

"(1) The term 'case management' includes the coordination and facilitation of all services furnished to a veteran by the Veterans' Administration, either directly or through a contract, including, but not limited to, screening, assessment of needs, planning, referral (including referral for services to be furnished by the Veterans' Administration, either directly or through a contract, or by an entity other than the Veterans' Administration), monitoring, reassessment, and followup.

"(2) The term 'contract facility' means any facility which has been awarded a contract under subsection (b)(1) of this section.

"(3) The term 'eligible veteran' means a veteran who, at the time of referral to a contract facility—

"(i) is being furnished hospital, domiciliary, or nursing home care from the Veterans' Administration for a chronic mental illness disability, or

"(ii) is being furnished such care from the Veterans' Administration for a chronic mental illness disability and is a veteran described in section 612(a)(1)(B) of this title.

"(b)(1) The Administrator, in furnishing hospital, nursing home, and domiciliary care and medical and rehabilitative services under this chapter, may contract for care and treatment and rehabilitative services in halfway houses, therapeutic communities, psychiatric residential treatment centers, and other community-based treatment facilities for eligible veterans suffering from chronic mental illness disabilities.

"(2) Before furnishing such care and services to any veteran through a contract facility, the Administrator shall approve (in accordance with criteria which the Administrator shall prescribe by regulation) the quality and effectiveness of the program operated by such facility for the purpose for which such veteran is to be furnished such care and services.

"(c) In the case of each eligible veteran provided care and services under this section, the Administrator shall designate a Veterans' Administration employee to provide case management services.

"(d) The Administrator may provide in-kind assistance (through the services of Veterans' Administration employees and the sharing of other Veterans' Administration resources) to a contract facility under this section. Any such in-kind assistance shall be provided under a contract between the Veterans' Administration and the contract facility. The Administrator may provide such assistance only for use solely in the furnishing of appropriate services under this section and only if, under such contract, the Veterans' Administration receives reimbursement for the full cost of such assistance, including the cost of services and supplies and normal depreciation and amortization of equipment. Such reimbursement may be made by reduction in the charges to the United States or by payment to the United States. Any funds received through such reimbursement shall be credited to funds allotted to the Veterans' Administration facility that provided the assistance.

"(e) Not later than 1 year after the date of enactment of the Veterans' Health Care

Programs Improvements Act of 1986, the Administrator shall submit to the Committees on Veterans' Affairs of the Senate and the House of Representatives a report on the experience under this section. The report shall include the Administrator's evaluation and findings regarding—

"(1) the quality of care furnished to participating veterans through contract facilities;

"(2) any medical advantages that may result from furnishing such care and services to veterans with such disabilities in such contract facilities rather than in inpatient facilities over which the Administrator has direct jurisdiction;

"(3) the effectiveness of the use of contract facilities under this section in enabling the participating veterans to live outside of Veterans' Administration inpatient facilities and to achieve independence in living and functioning in their communities;

"(4) the cost-effectiveness of furnishing such care through contract facilities under this section, including the effect on the average daily census in the Veterans' Administration hospitals, nursing homes, and domiciliary facilities participating in the program (taking into account whether the beds previously occupied by the participating veterans were subsequently occupied by other eligible veterans or remained unoccupied); and

"(5) any plans for administrative action, and any recommendations for legislation, that the Administrator considers appropriate to include in such report.".

(b) The table of sections at the beginning of chapter 17 is amended by inserting after the item relating to section 620A the following new item:

"620B. Community-based psychiatric residential treatment for chronically mentally ill veterans.".

AUTHORITY TO WAIVE A LICENSURE REQUIREMENT FOR CERTAIN VETERANS' ADMINISTRATION PSYCHOLOGISTS

SEC. 5. Section 4114(d) is amended by striking out "or optometrist," both places it appears and inserting in lieu thereof "optometrist, or psychologist,".

OPERATING BED REQUIREMENTS

SEC. 6. Section 5010(a)(1) is amended—

(1) by striking out "hospital beds and nursing home beds" in the third sentence and inserting in lieu thereof "hospital, nursing home, and domiciliary beds"; and

(2) by striking out "hospital and nursing home beds" in the fourth sentence and inserting in lieu thereof "hospital, nursing home, and domiciliary beds".

STATE HOME GRANTS

SEC. 7. (a)(1) Section 5031(c) is amended to read as follows:

"(c) The term 'construction' means—

"(1) the construction of new domiciliary or nursing home buildings;

"(2) the expansion, remodeling, or alteration of existing buildings for the provision of domiciliary or nursing home care in State homes;

"(3) the remodeling or alteration of existing buildings for the provision of hospital care in State homes; and

"(4) the provision of initial equipment for any such buildings.".

(2) Section 5032 is amended to read as follows:

"§ 5032. Declaration of purpose

"The purpose of this subchapter is to assist the several States (1) to construct State home facilities (or to acquire facilities to be used as State home facilities) for furnishing domiciliary or nursing home care to veterans, (2) to expand, remodel, or alter existing buildings for furnishing domiciliary or nursing home care to veterans in State homes, and (3) to remodel or alter existing buildings for furnishing hospital care to veterans in State homes.".

(b)(1)(A) Subchapter III of chapter 81 is amended by adding at the end the following new section:

"§ 5038. Priority of projects

"(a) Sums available for grants under this subchapter shall be allocated among State home facilities construction projects in accordance with the priority established for such projects pursuant to subsection (b) of this section.

"(b) The Administrator shall prescribe criteria and procedures for determining the priority to be accorded to State home facilities construction projects with respect to which applications have been approved under section 5035 of this title.".

(B) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 5037 the following new item:

"5038. Priority of projects.".

(2) Not later than 180 days after the date of the enactment of this Act, the Administrator of Veterans' Affairs shall—

(A) develop, prescribe, and implement the criteria and procedures required by section 5038(b) of title 38, United States Code (as added by paragraph (1)); and

(B) shall submit to the Committees on Veterans' Affairs of the Senate and the House of Representatives a report which describes such criteria and procedures and the implementation of the use of such criteria and procedures to establish the priority of construction projects referred to in such section.

(c)(1) Except as provided in paragraph (2), the amendments made by subsection (a) shall take effect with respect to applications submitted to the Administrator of Veterans' Affairs under section 5035 of title 38, United States Code, on or after October 1, 1986.

(2) The amendments made by subsection (a) shall not apply with respect to an application referred to in paragraph (1) if, before October 1, 1986, the applicant furnished any preliminary information to the Veterans' Administration relating to such application in accordance with application procedures established by the Veterans' Administration in administering subchapter III of chapter 81 of title 38, United States Code.

IONIZING RADIATION REGISTRY

SEC. 8. (a)(1) Chapter 57 is amended by adding at the end thereof the following:

"Subchapter III—Special Records

"§ 3321. Ionizing Radiation Registry

"(a) The Administrator shall establish and maintain a special record to be known as the 'Ionizing Radiation Registry' (hereafter in this section referred to as the 'Registry').

"(b) The Registry shall include the following information:

"(1) Subject to subsection (c) of this section, a list containing the name of each veteran who was exposed to ionizing radiation under the conditions described in section 610(e)(1)(B) of this title and—

"(A) has requested hospital or nursing home care; or

"(B) has filed a claim for disability compensation under chapter 11 of this title or pension under section 521 of this title on the basis of a disability which may be associated with the exposure to ionizing radiation; or

"(C) has died survived by—

"(i) a spouse, child, or parent who has filed a claim for dependency and indemnity compensation under chapter 13 of this title; or

"(ii) a spouse or child who has filed a claim for pension under subchapter III of chapter 15 of this title,

on the basis of the exposure of such veteran to ionizing radiation.

"(2) Medical data relating to each veteran listed in the Registry under paragraph (1) of this subsection, including the veteran's medical history, latest health status recorded by the Veterans' Administration, physical examinations, and clinical findings, and a statement describing birth defects, if any, in the natural children of the veteran.

"(3) Data on claims for the compensation and pensions referred to in paragraph (1) of this subsection, including decisions and determinations of the Veterans' Administration relating to such claims.

"(4) An estimate of the dose of radiation to which each veteran listed in the Registry under paragraph (1) of this subsection was exposed under the conditions described in section 610(e)(1)(B) of this title.

"(c) The Registry is not required to contain the name of a veteran described in subsection (b)(1) of this section if the request or claim referred to in such subsection (b)(1) which relates to such veteran was filed before the date of the enactment of the Veterans' Health Care Programs Improvements Act of 1986, and such veteran or the survivor filing the claim (in the case of a claim referred to in clause (C) of such subsection (b)(1)) does not request the Veterans' Administration to include the veterans' name in the Registry.

"(d) For the purpose of establishing and maintaining the Registry, the Administrator shall compile and consolidate relevant information maintained by the Department of Veterans' Benefits and the Department of Medicine and Surgery of the Veterans' Administration, relevant information maintained by the Defense Nuclear Agency of the Department of Defense, and any relevant information maintained by any other subdivision of the Veterans' Administration or the Department of Defense.

"(e) The Secretary of Defense shall furnish the Administrator such information maintained by any agency of the Department of Defense as the Administrator considers necessary to establish and maintain the Registry.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end the following:

"SUBCHAPTER III—SPECIAL REPORTS

"3321. Ionizing Radiation Registry.".

(b) The Administrator of Veterans' Affairs shall establish the Ionizing Radiation Registry required by section 3321 of title 38, United States Code (as added by subsection (a)), not later than 180 days after the date of the enactment of this Act.

(c)(1) Not later than 1 year after the date of the enactment of this Act, the Administrator of Veterans' Affairs shall analyze the information collected in the Ionizing Radiation Registry and transmit to the Committees on Veterans' Affairs of the Senate and the House of Representatives and to the Advisory Committee on Environmental Hazards of the Veterans' Administration a summary of the analysis.

(2) Not later than 90 days after the date on which the Administrator transmits the summary to the Committees referred to in

paragraph (1), the Advisory Committee on Environmental Hazards of the Veterans' Administration shall review the analysis and transmit to the Committees on Veterans' Affairs of the Senate and the House of Representatives such comments on the analysis as the Committee considers appropriate.

U.S. SENATE,
COMMITTEE ON VETERANS' AFFAIRS,
Washington, DC, December 4, 1985.

Hon. HARRY N. WALTERS,
Administrator of Veterans' Affairs, Veterans' Administration, Washington, DC.

DEAR HARRY: I am writing to follow up on my remarks during the November 14 Senate Veterans' Affairs Committee hearing on issues relating to veterans who were exposed to ionizing radiation. During the hearing I stated that I intended to request the VA to initiate immediately an Ionizing Radiation Registry.

I am now formally requesting that you establish such a registry to provide an ongoing data base of, first, veterans who, as a result of the enactment of Public Law 97-72, are eligible for VA health care and who use or seek to use the VA health care system and, second, veterans who apply for VA compensation for disabilities allegedly resulting from radiation exposure. I believe it would be useful to the VA, to veterans who were exposed to ionizing radiation, and to the Congress if the registry included information encompassing a full case history of a patient's visit—personal data, medical history, clinical findings, etc.—including the veteran's name, address, medical history, results of any examinations and clinical findings, VA medical facilities involved, as well as information about the veteran's military service, an estimate of radiation exposure, and any other appropriate findings.

The registry should also document any claims filed for VA compensation for radiation-related diseases resulting from participation in the U.S. atomic weapons test program or the occupation of Hiroshima and Nagasaki. This information should document the veteran's participation in the tests or occupation, an estimate of radiation exposure, the veteran's disability or disabilities, and any VA decisions pertaining to any claims made by or on behalf of the veteran, or the veteran's spouse or survivors.

I believe that a compilation of both the veteran's medical and benefits information related to any ionizing radiation exposure experiences would serve to help detect health trends in such veterans and to indicate any specific characteristics of this particular group of veterans. This is especially critical in light of the recent Office of Technology Assessment determination that an epidemiological study of veterans exposed to ionizing radiation, as required by Public Law 98-160, would not be feasible. The compilation of this information would also serve to consolidate information about such veterans collected by the Department of Medicine and Surgery and the Department of Veterans' Benefits. Consequently, it would expedite the exchange of such information for the purposes of eligibility determinations by VA medical facilities for VA health care services and for the claims adjudication process for radiation-related claims. I wholeheartedly support the VA's Agent Orange Registry and the VA's recent announcement of the forthcoming establishment of a Spinal Cord-Injury Registry and would hope that an Ionizing Radiation Registry would serve a similar purpose.

I request that you carefully consider my request and let me know your plans regarding the establishment of such a registry as soon as possible.

Sincerely,

FRANK H. MURKOWSKI,
Chairman.

VETERANS' ADMINISTRATION, OFFICE OF THE ADMINISTRATOR OF VETERANS' AFFAIRS,
Washington, DC, February 11, 1986.

Hon. FRANK H. MURKOWSKI,
Chairman, Committee on Veterans' Affairs, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: In your letter of December 4, 1985, you requested that the Veterans Administration establish a register, first, of veterans who are eligible for care under the authority of Pub. L. No. 97-72 and who use or seek to use the VA health care system and, second, of veterans who apply for compensation for disabilities allegedly resulting from radiation exposure. You further suggested certain forms of data that should be maintained in the register.

The VA has established a method for identifying veterans who apply to the VA for inpatient care under the authority of Pub. L. No. 97-72. This coding system permits us to retrieve from the VA's automated Patient Treatment File summary data concerning the types of health problems that their permanent medical records. This system has undergone refinement since it was initiated such that we can more easily identify the nuclear weapons test participants seeking care from 1985 onward than we could those seeking care earlier. It could not be practical nor cost-effective to attempt to go back through the earlier records in an attempt to ensure that all of the veterans are incorporated in the more refined system.

From the data that we now have available, and on the basis of current information concerning the types fo health problems that might reasonably be anticipated to result from the kinds of radiation exposure the vast majority of the atomic weapons test participants experienced, we do not believe that a medical register of the sort that you propose would be particularly useful or cost effective. However, we will contact the Defense Nuclear Agency which already has some elements of a radiation register to explore the possibility of linking their data with whatever information the VA may have on these veterans.

Concerning the compensation register, we believe that we already have in place a system that substantially meets your suggestion. In 1984, the Compensation and Pension Service of the Department of Veterans Benefits established a Special Issue Rating system (SIRS) which collects data on claims based on exposure to ionizing radiation and includes service dates, source of exposure (nuclear test, occupation force, therapeutic/occupational, and others), the disabilities claimed, the VA's decision on each disability with respect to service-connection, and the date of the latest rating decision. Data entry is accomplished by adjudication personnel at the regional office level.

SIRS does not store the level of radiation exposure for each veteran. For those veterans exposed to radiation as a result of participation in the atomic weapons testing program or with the occupation forces of Hiroshima or Nagasaki, Japan, however, that information can be obtained, as necessary, from the Defense Nuclear Agency which maintains records of radiation dose estimates on all veterans who file claims for VA benefits. Since this information is readily available, it would be duplicative to store that data in SIRS.

We believe that this approach is a most practical one and is one that addresses most of your concerns.

Sincerely,

EVERETT ALVAREZ, Jr.,
Acting Administrator.●

By Mr. CHAFEE (for himself, Mr. STAFFORD, Mr. GORE, Mr. HEINZ, Mr. METZENBAUM, and Mr. LEVIN):

S. 2446. A bill to require the Secretaries of Agriculture and Health and Human Services to enforce certain food labeling requirements for packaged foods sold by certain restaurants; to the Committee on Governmental Affairs.

FAST FOOD INGREDIENT INFORMATION ACT

● Mr. CHAFEE. Mr. President, today I am introducing legislation providing for ingredient labeling of the food served in fast food restaurants. Joining me as original cosponsors are Senators STAFFORD, GORE, HEINZ, METZENBAUM, and LEVIN.

With over 40 million Americans a day—roughly one-fifth of the population—eating in these restaurants, it is critical that we know what we are getting.

Anyone who has ever tried to find out what is in a typical fast food meal knows it is not a simple matter. Last June, a consumer group wrote to 12 major fast food chains asking for ingredient information. Not recipes, mind you, but just lists of ingredients—nothing more than the makers of Coca-Cola, for instance, are required to put on their cans. Thus, the restaurants were not asked to divulge trade secrets, such as proportions or the names of specific flavorings.

Despite this, 6 of the 12 replied that the information requested was confidential. Another two said it was not available. Three others did not reply at all, even to repeated inquiries. Only 1 of the 12 answered the question squarely, providing complete ingredient lists for all its products.

This is clearly unacceptable. Consumers have a right to know what they are eating.

There's nothing radical about fast food labeling. In fact, FDA and USDA—the two agencies with jurisdiction in this area—have acknowledged that they could, under existing laws, require that fast food be labeled. But unfortunately for the consumer, this has not been done.

That leaves us with an anomaly. Fast food is substantially no different from the food you buy in a supermarket. Supermarket food is labeled, but fast food is not. It should be.

The bill I introduce today would require that fast food be labeled in accordance with existing Federal laws. In cases where printing information on a label would be impractical, the

restaurant would be allowed to provide it in some other way—by posting it on a wall chart, for example, or printing it in a brochure.

Fast food labeling would allow consumers to vote with their fast food dollars. They would be able to avoid meals heavy in fat, sugar, and sodium. They would know whether their french fries had been cooked in vegetable oil or in beef fat, and whether their shake contained any real milk or not. And, in the case of allergy sufferers, they could be reasonably certain that their meal would not mean a trip to the emergency room.

In today's highly competitive fast food industry, product labeling would prompt chains to compete on the basis of nutritional value. This kind of competition would be a tremendous boon to public health. Imagine how our diets would improve if the full force of the fast food giants got behind a race to offer the most wholesome food.

Take heart disease, for instance. It is now this Nation's No. 1 killer, claiming the lives of 400,000 Americans every year. But we're not helpless against it: We can reduce our risk by cutting down on sodium, cholesterol, saturated fat, and caloric intake.

We know this. But how do we use it unless we also know the basic components of the food we eat every day?

That is why we have Federal labeling laws. Those laws can and should be applied to fast food: Because it is sold in a packaged form, fast food comes under the coverage of the Food, Drug and Cosmetic Act, the Federal Meat Inspection Act, and the Poultry Products Inspection Act, all of which require that food sold in wrappers or containers bear ingredient statements on product labels.

This legislation has been endorsed by a number of organizations, including the American Heart Association, the American Cancer Society, the National Parent-Teacher Association, the Consumer Federation of America, the American College of Allergists, the Center for Science in the Public Interest, the National Heart Savers Association, and the Public Voice for Food and Health Policy.

Fast food is here to stay, and that's a good thing for millions of busy people. This bill doesn't tell people what to eat, and it doesn't tell restaurants what to serve. It just makes the facts available.

Mr. President, I ask unanimous consent that a copy of the bill appear in the RECORD at this point, together with a series of editorials and statements supporting fast food labeling.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2446

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Fast Food Ingredient Information Act of 1986".

TITLE I—RESPONSIBILITIES OF THE SECRETARY OF HEALTH AND HUMAN SERVICES

ENFORCEMENT OF LABELING REQUIREMENTS

SEC. 101. (a) Except as provided in subsection (b), the Secretary shall enforce section 403(i) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 343(i)) with respect to the information required by such section to be included on the labels of packaged foods sold for consumption by customers of fast food restaurants.

(b) If the Secretary determines that it is impracticable for fast food restaurants to comply with section 403(i) of the Federal Food, Drug, and Cosmetic Act through the inclusion on the labels of packaged foods of the information required by such section, the Secretary may prescribe regulations which permit such restaurants to comply with such section through the display of such information on notices in conspicuous places in such restaurants or through the provision of such information on other media determined appropriate by the Secretary, such as menu notices, brochures, or food tray liners.

DEFINITIONS

SEC. 102. For purposes of this title—

(1) the term "fast food restaurant" means a restaurant which is part of a chain of 10 or more franchised restaurants;

(2) the term "label" has the meaning prescribed for such term by section 201(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(k));

(3) the term "food" has the meaning prescribed for such term by section 201(f) of such Act (21 U.S.C. 321(f)); and

(4) the term "Secretary" means the Secretary of Health and Human Services.

TITLE II—RESPONSIBILITIES OF THE SECRETARY OF AGRICULTURE

ENFORCEMENT OF LABELING REQUIREMENTS

SEC. 201. (a) Except as provided in subsection (b), the Secretary shall enforce the provisions of—

(1) subparagraph (9) of paragraph (n) of the first section of the Federal Meat Inspection Act (21 U.S.C. 601(n)(9)); and

(2) section 4(h)(9) of the Poultry Products Inspection Act (21 U.S.C. 453(h)(9)),

with respect to the information required by such provisions of law to be included on the labels of packaged foods sold for consumption by customers of fast food restaurants.

(b) If the Secretary determines that it is impracticable for fast food restaurants to comply with the provisions of law specified in paragraphs (1) and (2) of subsection (a) through the inclusion on the labels of packaged foods of the information required by such provisions of law, the Secretary may prescribe regulations which permit such restaurants to comply with such provisions of law through the display of such information on notices in conspicuous places in such restaurants or through the provision of such information on other media determined appropriate by the Secretary, such as menu notices, brochures, or food tray liners.

DEFINITIONS

SEC. 202. For purposes of this title—

(1) the term "fast food restaurant" means a restaurant which is part of a chain of 10 or more franchised restaurants;

(2) the term "label"—

(A) with respect to a food subject to the Federal Meat Inspection Act, has the meaning prescribed for such term by paragraph (o) of the first section of such Act (21 U.S.C. 601(o)); and

(B) with respect to a food subject to the Federal Poultry Products Inspection Act, has the meaning prescribed by section 4(s) of such Act (21 U.S.C. 453(s));

(3) the term "food" has the meaning prescribed for such term by section 201(f) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(f)); and

(4) the term "Secretary" means the Secretary of Agriculture.

TITLE III—REGULATIONS; EFFECTIVE DATE

REGULATIONS

SEC. 301. Within 6 months after the date of enactment of this Act, the Secretary of Health and Human Services shall promulgate final regulations to carry out title I and the Secretary of Agriculture shall promulgate final regulations to carry out title II.

EFFECTIVE DATE

SEC. 302. (a) Except as provided in subsection (b), this Act shall take effect 12 months after the date of enactment of this Act.

(b) Section 301 shall take effect on the date of enactment of this Act.

STATEMENT OF MICHAEL JACOBSON, PH.D., EXECUTIVE DIRECTOR, CENTER FOR SCIENCE IN THE PUBLIC INTEREST

The Center for Science in the Public Interest (CSPI) strongly supports the fast food ingredient disclosure bill introduced today by Senator Chafee. Passage of this legislation will ensure that a vital provision of the federal health laws is enforced. Armed with ingredient information, fast food patrons concerned about diet-related disease and food allergies can make purchasing decisions on the basis of facts.

Ingredient disclosure will enable health-conscious consumers to identify and avoid products that are prepared in frying oils high in saturated fats. In addition, individuals with allergies who currently must play Russian Roulette every time they purchase fast food, will be able to identify and avoid substances to which they are sensitive.

Congressional action is warranted because, in this era of dwindling federal resources, the enforcement priorities of the federal health agencies have been terribly misplaced. While much attention is being directed to "health fraud"—with enforcement actions taken against products such as ripoff baldness cures—the Food and Drug Administration (FDA) and the Department of Agriculture (USDA) intend no action to bring packaged fast food in compliance with the mandatory ingredient disclosure requirements of federal law.

Last June, CSPI and other health and consumer groups petitioned FDA and USDA to enforce the mandatory ingredient labeling provisions of their respective statutes for packaged fast food. USDA denied the petition last December, while FDA has so far failed to respond. FDA and USDA have failed to order labeling despite their joint determination, recently reaffirmed by USDA, that mandatory labeling of fast food is required by federal law. Thus, unless Senator Chafee's bill is enacted, the contents of the $50 billion of fast food sold this year will remain a mystery to the public.

The fast food industry has historically competed on the basis of marketing gimmicks such as "Herb" and the "McDLT." It would be refreshing, to say the least, if some of the millions of dollars the industry spends annually on marketing and promo-

tion could be used to compete on the basis of health and nutrition. We know this is possible because there are nutritious alternatives to the standard high-fat, high-sodium, high-calorie fast food fare. Salad bars, baked potatoes, and roast chicken sandwiches are a few of the healthier offerings that could be the centerpiece of marketing campaigns designed to bring attention to healthful foods and healthful ingredients.

Left to their own devices, FDA, USDA, and the industry would prefer to keep the lid on fast food ingredients. We urge Congress to lift that lid by swiftly enacting Senator Chafee's legislation.

THE AMERICAN COLLEGE OF ALLERGISTS,
Mt. Prospect, IL, May 7, 1986.

The American College of Allergists strongly supports Sen. John H. Chafee's proposed legislation requiring ingredient labeling of fast food products . . . and urges you to join in its co-sponsorship.

As practicing allergists, we have treated many thousands of patients with severe, sometimes life-threatening reactions to hidden ingredients in restaurant foods. Our patients should not have to play Russian Roulette—not knowing whether a Big Mac or Whopper will trigger an allergic reaction—every time they eat a fast-food meal.

The situation is serious.

Sulfites used to freshen fruits and vegetables in salad bars and other places have caused violent asthma and death in some individuals. F.D.C. yellow dye #5, used to color foods, also may cause such reactions.

M.S.G. (monosodium glutamate) can cause flushing, headache and wheezing.

Foods which individuals are commonly allergic to—such as milk, nuts, fish, wheat, soybeans, eggs and corn—may be served in a disguised manner in restaurants and fast-food stores . . . posing a serious threat to unsuspecting allergic patients. Just this winter the New York Times reported that a college student from Brooklyn, who was allergic to peanuts, died after eating chili in a restaurant. Of all things, the chili contained peanut butter used as a thickening agent. She has a severe allergic reaction, resulting in death.

Sen. Chafee's proposal would arm these patients with the vital information they need to protect themselves against potentially life-threatening reactions. That's why we urge you to join Sen. Chafee as a cosponsor of this important legislation.

Thank you for your efforts on behalf of all allergic patients.

Sincerely,

PETER B. BOGGS, M.D.,
President.

[From the New York Times, Nov. 15, 1985]

RISK SEEN IN SATURATED FATS USED IN FAST FOODS

(By Irvin Molotsky)

WASHINGTON, Nov. 14.—A consumer organization said today that eight of the country's largest chains of fast-food and family restaurants cooked their french fries and other foods in beef fat, which is high in the saturated fats that researchers say can contribute to heart disease.

The organization, the Center for Science in the Public Interest, said an absence of labeling laws had left most consumers unaware that the beef fat, or tallow, mixed with a little vegetable oil, was being used by the chains—Arby's, Bob's Big Boy, Burger King, Dairy Queen, Hardee's, McDonald's, Popeyes and Wendy's.

"Most people are shocked that these restaurants use beef fat," Dr. Michael Jacobson, executive director of the consumer organization, said.

Where tested, Howard Johnson's was found to use palm oil, which is even higher in saturated fats than beef fat. A Howard Johnson's spokesman said the chain used vegetable oil in company-owned restaurants but did not stipulate which oil franchises should use.

Dr. Tazewell Banks, a professor of medicine and director of a heart program at D.C. General Hospital, said many parents were unwittingly exposing their children to the increased likelihood of heart disease by allowing them to eat at fast-food outlets.

"It would be safer if they told their children, 'Go out and play in traffic,'" he said at a press conference.

Dr. Jacobson said his organization had asked the restaurant chains why they used beef fat. "Restaurants tell us they think it scores better in customer taste tests," he said. "It also costs less than vegetable oil."

On the other hand, Dr. Jacobson said, companies that fry foods in vegetable oil say they do so to keep beef flavor out of their french fries and fried chicken.

WHERE TESTS WERE DONE

The fast-food chains that used moderately hydrogenated vegetable oil for food frying were listed by the consumer organization as Denny's, Friendly's and Papa Gino's. Hydrogenation makes oil more stable and less likely to spoil. The less hydrogenated oil is, Dr. Jacobson said, the less saturated the fat is.

The chains using heavily hydrogenated vegetable oil, that is, more saturated, were identified as Church's, D'Lites, Kentucky Fried Chicken, Long John Silver, Red Lobster and Rustler.

The analysis on the fat content was conducted by gas chromatography by Dr. Frank Sacks, assistant professor of medicine at the Harvard University Medical School and director of the Lipoprotein Metabolism Research Laboratory at Brigham and Women's Hospital.

Dr. Jacobson said the samples were obtained in the Boston area but were representative of entire chains.

For Dairy Queen, however, uniformity proved not to be the case. The sample obtained in Boston was found to be fried in vegetable oil. When the Center for Science in the Public Interest inquired, it was told that beef fat usually was used and that the Boston outlet had substituted vegetable oil on its own.

The tests were performed on french fries so that the findings would not be affected by the fat content of chicken or other foods. "Many restaurants use the same shortening to fry most foods," the consumer organization said. "Thus, these figures probably also apply to pies, chicken parts and nuggets, fish and other fried foods."

Also participating in the project was Dr. William Castelli, medical director of the Framingham Heart Study, a Massachusetts inquiry that has been going on for 36 years.

Dr. Castelli said that fat in the diet was clearly a major cause of heart disease. "We have to get the fat out of our diet," Dr. Castelli declared.

Restaurant chains were asked to comment, and Frank Belatti, a vice president at Arby's, said his company used both partly hydrogenated soybean oil and a mixture of beef fat and cottonseed oil. "The animal vegetable oil gives the french fry its distinctive fried flavor," he said.

Mary Maguire, a spokesman for the Marriott Corporation, which runs both the Roy Rogers and Bob's Big Boy chains, said that a mix of 90 percent animal fat and 10 percent vegetable oil was used because it had "the most preferred taste profile."

Terri Capatosto, a spokesman for McDonald's, said, "What we use is the highest quality of a vegetable and beef shortening." She said cost was not a factor in the choice of oil.

Denny Lynch, a spokesman for Wendy's, said his company's french fries were cooked in a blend of animal and vegetable fats but would not give the percentage. "We are in the business of selling foods that the customer wants to buy," he said. "There is a lot of money spent on how to cook the perfect french fry."

FAST-FOOD FATTY ACIDS

	Saturated	Unsaturated
Moderately hydrogenated vegetable oil:		
Denny's	18.9	69.3
Friendly's	17.4	70.8
Papa Gino's	15.7	70.0
Heavily hydrogenated vegetable oil:		
Church's	27.4	59.2
D'Lites	31.2	55.3
Kentucky Fried Chicken	26.1	60.1
Long John Silver	28.2	58.0
Red Lobster	24.6	61.3
Rustler	30.5	56.3
Beef fallow (may have some vegetable oil):		
Arby's	49.8	38.7
Bob's Big Boy	47.9	39.2
Burger King	48.8	37.6
Dairy Queen	NA	NA
Hardee's	48.2	40.6
McDonald's	45.5	42.1
Popeyes	47.2	39.4
Wendy's	47.1	39.8
Palm oil:		
Howard Johnson's	53.3	42.2

Note.—Percentage of fatty acids that were found to be saturated and unsaturated. Figures do not total 100 percent because of portion of sample lost in testing.

STATEMENT BY THE AMERICAN HEART ASSOCIATION IN SUPPORT OF LEGISLATION ON INGREDIENT LABELING ON FAST FOOD PRODUCTS

The American Heart Association supports legislation introduced today by Senator John H. Chafee (R-RI) on ingredient labeling of fast foods.

The AHA supports this important legislation for three main reasons. First, the AHA believes that most fast food served today is not heart-healthy, because it increases one of the major risks of coronary heart disease. Second, heart and blood vessel disease are this country's number one killers, and any effort in reducing the public's risk of these diseases promises a substantial reduction in mortality and morbidity, as well as health care costs. And finally, the fast food industry may be taking advantage of the fact that at least two federal agencies, the USDA and the FDA, may not be enforcing provisions in existing laws that extend to fast food sold in wrappers or containers.

WHY IS FAST FOOD NOT HEALTHY FOR THE HEART?

For 25 years the AHA has been advising physicians and the public about the merits of a low-fat, low-cholesterol diet as a means of reducing one of the major risks of coronary heart disease, but the typical burger, fries and shake is anything but low-fat or low-cholesterol. The AHA also advocates a moderate intake of sodium to help control high blood pressure in many people, but the amount of sodium in our fast food is clearly alarming.

As a result, for the 40 million Americans who eat in these restaurants every day, "eating on the run" has become synonymous with "eating for clogged arteries and high blood pressure." The problem is that fast food consumers don't know what they are eating.

The AHA's diet statement, which was first issued 25 years ago, has been repeatedly supported by years of research. The studies have led to two well established facts: (1) dietary saturated fats and cholesterol directly raise the total cholesterol in the blood, including a bad variety of cholesterol; and (2) excess fats and cholesterol in the blood contribute to clogged arteries and eventually coronary heart disease.

The AHA dietary statement recommends: (a) a caloric intake to maintain ideal weight; (b) a total fat intake limited to 30 percent of total calories, with no more than 10 percent saturated fat (such as animal fat), up to 10 percent polyunsaturated fats (such as vegetable fats) and 10 percent monounsaturated fat; (c) a dietary cholesterol intake to be no more than 300 mgs per day; (d) carbohydrates (44-55 percent of total calories) primarily selected from the complex varieties; and (e) a reduced sodium intake to help control high blood pressure.

How does the dietary statement translate into daily eating habits? The following explanation will serve to put the statement in perspective.

The AHA dietary guidelines for healthy Americans recommend the reduction of dietary cholesterol to less than 300 mgs per day. According to the Food and Nutrition Board, the estimated safe intake of sodium is 1100 to 3300 mgs of sodium—a generous serving—for healthy adults. An Egg McMuffin breakfast adds up to 340 calories, about 259 mgs of cholesterol, 885 mgs of sodium and 1,580 mgs of fat.

As a result, the Egg McMuffin consumer has had nearly the full amount of cholesterol recommended by the AHA and a substantial amount of the recommended sodium intake in one meal alone. Add lunch, dinner, alcohol and snacks to the daily eating habit, and the same consumer who started with an Egg McMuffin has substantially exceeded the recommended cholesterol and sodium intake for a day.

Does the consumer know that? We don't believe so. But the consumer should know that. And it is not just a question of Egg McMuffins. The Whoppers, the Bacon cheese burger, the fried chickens, and the french fries are equally as bad. The consumer should also know the amount of saturated fat in fast food. But the fast food chains don't disclose that.

Overall, according to the USDA, Americans are eating a healthier diet today than they were in the early 1960's when cardiovascular mortality was at its peak. But there are a few alarming trends.

One is the skyrocketing consumption of highly saturated fat cheese, a favorite of the fast food crowd. Sales have jumped more than 131 percent over the past 20 years. The USDA has also reported that consumption of fat from animal sources in the form of lard, baking and frying fats—all saturated and often used in fast and convenience foods—increased, while vegetable oil—the acceptable kind—decreased.

The AHA believes that the sheer volume of fast food consumed in this country puts a responsibility on fast food chains for educating the consumer. According to estimates from a recent issue of the Boston Globe, the fast food industry represents $44.8 million of this country's "eating-out" budget. Consumers are buying a lot of cholesterol, fat and sodium with their food dollars, and don't even know it.

THE MAGNITUDE OF HEART DISEASE

The three major risk factors of heart and blood vessel disease are: cigarette smoking, uncontrolled high blood pressure and excess serum cholesterol. Fast foods increase the risk of heart and blood vessel diseases by contributing to two of the three risk factors.

How many Americans are affected by these diseases and how does the disease affect them? The following numbers will highlight the magnitude of the problem:

(a) More than 92 million American adults have blood cholesterol levels above 200 mgs/dl, a level at which the risk of heart disease begins to rise sharply.

(b) About 27 million adults have blood cholesterol levels about 260.

(c) Obesity, which is related to blood cholesterol levels, increased 54 percent in children aged 6-11, and 30 percent in children aged 12-17, during the period between 1963 and 1980.

(d) Superobesity increased 90 percent in the 6-11 years olds and 64 percent in the 12-17 years olds during the same period.

(e) Almost 55 million American adults have high blood pressure or are being treated for it.

(f) An additional 2.7 million children aged 6-17 also have high blood pressure.

Because fast food chains appeal to a broad segment of the population, including children, and young and middle-aged Americans, we may have a whole new generation of individuals headed for heart disease.

CURRENT LAWS REQUIRING LABELING OF FAST FOODS

The Federal Food, Drug, and Cosmetic Act requires that all foods regulated by the FDA that are sold in wrappers or containers bear ingredient statements of product labels. There are similar provisions in food products regulated by the USDA.

In 1979, both these agencies concluded that existing laws requiring labels extended to fast foods sold in wrappers or containers. However, both agencies decided not to enforce those laws for any restaurant food, though they indicated that they would reexamine this policy in the future if needed.

The AHA believes that the time has come for these two agencies to reexamine their policies. But even if they do, Sen. Chafee's legislation will strengthen their authority to require ingredient labeling on fast food.

The proposed legislation is also supported by the U.S. Public Health Service's reports on "Promoting Health/Preventing Disease." The four objectives in that report, which directly relate to this legislation, are:

(a) By 1990, the proportion of adults aged to 74 with mean serum cholesterol above 230 mg/dl should be reduced by at least 50 percent;

(b) By 1990, the average daily sodium intake by adults should be reduced at least to the 3 to 6 range;

(c) By 1990, 70 percent of the adults should be able to identify the major foods which are: low in fat content, low in sodium content, high in calories, high in sugars, good sources of fiber; and

(d) By 1990, the labels of all packaged foods should contain useful and nutrient information to enable consumers to select diets that promote and protect good health. Similar information should be displayed where nonpackaged foods are obtained or produced.

Because of these reasons, we believe that Sen. Chafee's legislation is both timely and reasonable. It will also help educate consumers in reading and understanding labels, make wiser choices with their food dollars, and ultimately reduce their risk of developing heart and blood vessel diseases.

EXCERPT: HEARING ON THE FISCAL YEAR 1987 APPROPRIATIONS BILL FOR THE FOOD AND DRUG ADMINISTRATION

FAST FOOD INGREDIENT LABELING

The Federal Food, Drug, and Cosmetic Act requires that all foods regulated by FDA that are sold in wrappers or containers bear ingredient statements on product labels. 21 U.S.C. § 343(i). Similar requirements are contained in the Federal Meat Inspection Act, 21 U.S.C. § 601(n)(9) and the Poultry Products Inspection Act, 21 U.S.C. § 453(h)(9) for meat and poultry products regulated by the U.S. Department of Agriculture (USDA).

With the advent of nationwide chains of franchised fast food restaurants in the 1950s and 1960s, the manner in which much restaurant food is prepared and served has drastically changed. Each of the thousands of fast food establishments is now akin to a small, decentralized food manufacturing facility. The composition of the products is highly standardized; the variety of foods is limited; and most, if not all, foods are served in wrappers that could easily accommodate ingredient information.

In 1979, FDA and USDA concluded that their statutes' mandatory ingredient labeling provisions extend to fast foods that are sold in wrappers or containers. Food Labeling Background Papers, p. 13 (1979). However, the agencies decided not to enforce those laws for any restaurant food, though they indicated that they would reexamine this policy in the future if needed. (44 Fed. Reg. 76,000 (1979))

Today, with Americans spending nearly $50 billion a year in fast food restaurants, fast foods provide a significant portion of the diets of millions of people. A variety of health problems associated with the ingredients in fast foods makes the disclosure of those ingredients imperative. Hundreds of thousands of Americans are allergic to fast food ingredients such as FD&C Yellow Dye No. 5 and corn-based sweeteners. Many others need to avoid certain ingredients, such as animal fats, and coconut and palm oils, to reduce their risk of heart attack and other diet-related diseases. Ingredient disclosure is the only device that can enable these consumers to safely eat fast foods.

FDA and USDA publicly acknowledged the importance of label disclosure of restaurant ingredients to persons who are allergic to ingredients. In the Food Labeling Background Papers, the agencies stated:

"Sufferers of allergies and persons following special diets would benefit from ingredient labeling of restaurant foods . . . while the actual impact upon health is rather uncertain, the number of people who may more easily be able to deal with their health problems may be significant." (FLBP, p. 13.)

More recently, FDA wrote the Bureau of Alcohol, Tobacco and Firearms (BATF) and urged BATF to require the disclosure of alcholic beverage ingredients. FDA stated:

"Once sensitivity to ingested substances has been confirmed, however, the most effective way of dealing with the problem is to avoid those substances. *Because many ingredients may be concealed in prepared products, reliance on ingredient declaration may be the only practicable means for consumers*

to avoid offending substances." (Memorandum from Joseph P. Hile, FDA associate Commissioner for Regulatory Affairs, to BATF, July 20, 1983 (emphasis added).)

Furthermore, the principle of mandatory ingredient labeling has widespread public support. The Heritage foundations, a conservation think-tank, in its book "Mandate For Leadership II," states:

"The mandatory disclosure of certain information may also prove an effective means of achieving regulatory goals. Requiring food processors to disclose the use of certain additives, for example, allows consumers to make a more intelligent choice . . ." ("Mandate For Leadership II," The Heritage Foundation (1984), p. 421.)

For these reasons, and in particular because of the great concern the public now has over sensitivity to food ingredients and diet-related diseases, CSPI petitioned FDA and USDA last June and urged the agencies to abandon their historical indifference to restaurant ingredient labeling and enforce the labeling provisions of their respective statutes for fast foods served in packaged form. See Attachment 1. Co-petitioners and endorsers included the New York State Consumer Protection Board, the American College of Allergists, and the American Dietetic Association. In addition, thousands of consumers and over 100 health experts have expressed their support for ingredient disclosure to the government. USDA denied the petition in December, 1985. FDA has not yet responded to the petition.

Several members of Congress have expressed concern over the government's failure to enforce this vital provision of federal law. Following the tragic death of a young woman with an allergy to peanuts, who died after she unknowingly consumed peanut butter that was added to a restaurant's chili, Senator John Chafee indicated that ingredient information should be available to restaurant patrons. Congressional Record, March 27, 1986, p. S3756. In addition, after USDA denied the petition, Congressman Stephen Solarz wrote then-Secretary Block and started that he was "troubled by USDA's denial of the petition." See Attachment 2.

We urge this committee to require FDA to issue a report to the committee within the next several months on the status of the petition. The committee should also express its concern over FDA's and USDA's failure to enforce their statutes' mandatory ingredient disclosure requirements.

[From the New York Times, Apr. 4, 1986]

WHAT'S THE BEEF?

Consumers' ignorance about fast food is hazardous to their health. Yet the Federal Government resists efforts to require the preveyors of burgers, fries and shakes to disclose their ingredients. It's therefore up to the states to mandate disclosure. New York's Consumer Protection Director, Richard Kessel, responds with a sensible proposal.

The Federal Ingredient Label Law already requires disclosure on pre-packaged foods sold in supermarkets. The Federal Department of Agriculture has refused to apply that law to the standardized products sold by fast-food chains, contending this would create an unfair burden.

But the burden on consumers is greater. The Center for Science in the Public Interest has found that eight of the largest fast-food chains cook french fries and other foods in beef tallow, a flavorful shortening that is high in saturated fats. And a study sponsored by Science Digest found that the chicken sandwich widely thought to be low in fat may contain as much fat as a pint and a half of ice cream. The artificial preservatives and food colorings used in fast food are of interest to allergy suffers.

More than 100 scientists and deans of medical and health schools recently petitioned major fast-food chains to stop using heavily saturated fats and to disclose their ingredients. But the National Restaurant Association objects that listing ingredients on fast food wrappers or menus would cause "undue anxiety" among customers. The chains ask consumers to write for the information.

About 46 million people a day are served at fast-food restaurants. Forcing disclosure would stimulate the chains to compete on the basis of content as well as taste. Mr. Kessel proposes a New York law demanding disclosure on food wrappers or counter signs or in a brochure available where food orders are taken. The costs would be minimal, the benefits substantial. An industry that feeds a fifth of the nation's appetites should not also feed its suspicions.

[From the New York Times, Jan. 2, 1986]

LET PEOPLE KNOW WHAT THEY'RE EATING

(By Michael F. Jacobson)

Imagine a $50 billion-a-year campaign to sabotage Americans' health. Though it would never admit it, that is essentially what the fast-food industry is doing with its slick merchandising of products dunked in fat and laced with salt. While it may be unrealistic to expect fast-food restaurants to adopt a completely healthful menu, is it too much to ask that they label product ingredients so that consumers can at least make informed choices about what they eat?

Actually, current Federal regulations call for ingredient labeling of packaged foods, but there is some question whether this applies to fast-food restaurants. Last month, the Agriculture Department rejected a petition filed by several consumer health groups to extend labeling requirements to meat and poultry products served in fast-food restaurants, contending that the practice would be expensive, cumbersome and unnecessary. A similar petition is now pending before the Food and Drug Administration, which is responsible for most fast-food products besides meat and poultry.

A food's ingredients help determine its nutritional worth. Only a Rip Van Winkle could be unaware that excessive fats, cholesterol and sodium in the American diet contribute in a major way to high blood pressure and coronary heart disease. Fats also appear to promote cancers of the breast, colon and other organs.

Eat a quarter-pound burger, fries and a shake and you will ingest an artery-clogging 15 teaspoons of grease. That is approaching the maximum amount of fat that the average person should consume in an entire day. Even chicken and fish, the low-fat foods the experts say we should eat, will probably be deep-fried and loaded with fat at your local speed eatery. For instance, at McDonald's a small order of Chicken McNuggets or a filet-of-fish sandwich has about twice as much fat as a regular hamburger.

What is worse, many restaurants—including McDonald's, Burger King and Hardee's—fry foods in almost pure beef fat rather than in liquid vegetable oil. Not only are the potatoes, chicken and fish laden with fat, but the fat they absorb is also highly saturated.

As if that were not bad enough, the high sodium content of fast-food meals promotes high blood pressure. One out of every two Americans develops hypertension by the age of 65. High blood pressure triggers strokes and heart attacks in hundreds of thousands of people annually.

The National Academy of Sciences recommends that adults consume between 1,100 and 3,300 milligrams of sodium (one-half to one and a half teaspoons of salt) per day. A single Burger King Whopper or similar sandwich contains about 1,000 milligrams of sodium. Many fast-food meals easily supply a whole day's ration of salt.

Consumers could make better choices among fast foods if they were able to compare the ingredients these foods contain. But not one fast-food company lists ingredients on its food wrapper. Most will not even respond to phone calls and letters requesting this information.

Without ingredient listings, how can consumers "vote" at the cash register against Chicken McNuggets (which contain ground-up chicken skin and are fried in beef fat)? How can consumers avoid yellow No. 5, the allergy-triggering dye—found in some milk shakes and other fast foods—that the F.D.A. requires to be listed by name when used in packaged grocery products?

The restaurant industry is totally opposed to labeling requirements. Such labeling "would create undue anxiety," says the National Restaurant Association.

In truth, consumers would be upset if labels on restaurant foods revealed the presence of "ground up chicken skin," "sulfur dioxide" or "yellow dye No. 5." And that's precisely the benefit of ingredient information. Its mere presence would drive some of the most nutritionally worthless products right off the market.

Industry representatives also contend that labeling would be both prohibitively expensive and impractical. Granted, listing ingredients on packages would impose some minor expense on chains, as it does now for grocery manufacturers. But the cost would be small compared to the health benefits, and minuscule compared with the chains' billion-dollar-a-year advertising barrage.

As for practicality, many products already come in unique packages. And restaurants could easily list the ingredients of several varieties of sodas and milk shakes on the same cup.

Meals that promote life-threatening diseases, double-barreled ad campaigns that target children, and a level of secrecy that the C.I.A. must envy—all this reflects poorly on the ethical standards of the people running the corporate giants that are increasingly feeding America.

One of these days, though, the chief executive of a fast-food chain will recognize that people really do want low-cost convenient meals that are healthful, not harmful. That chain would provide nutritious foods, from whole-grained buns to cooked green vegetables to fresh fruits (the salad bars and baked potatoes are welcome steps in this direction). Its hamburgers would be lean and the chicken and fish baked, not fried. The chain would brag about its ingredients and nutrients rather than hiding them, and it would mount a two-fisted comparative advertising campaign that made mincemeat of its competitors.

Such a chain stands to do well by doing good. It would prosper while also helping to keep its customers out of the coronary care unit.

[From the New York Times, Dec. 17, 1985]

NAME THAT FAST FOOD

Fast-food restaurants, a $47 billion industry, supply a large part of the American diet. Yet their consumers have little idea of the ingredients mixed into their burgers, fries and shakes. If they did know, the result might well be a healthy change in the nation's eating habits.

A recent study by the Center for Science in the Public Interest, a consumer-advocacy organization, reported that eight of the largest fast-food chains cook french fries and other foods in beef tallow, which is high in the saturated fats believed to be a leading cause of heart disease. Patrons who order a chicken sandwich to avoid cholesterol may instead get fat and cholesterol equal to 11 pats of butter. Fast-food patrons are also exposed to artificial preservatives and some suspect food colorings. Small wonder the major fast-food chains prefer not to disclose their recipes.

The center, joined by the New York State Consumer Protection Board and others, has petitioned the Food and Drug Administration to apply the Federal ingredient label law to fast-food chains. Their legal argument is that fast-food outlets are less like conventional restaurants and more like retailers of standardized products, "packaged" because they are sold in wrappers. Should that argument fail, the petitioners may seek state regulations.

The fast-food industry recognizes health concerns; witness the recent proliferation of salad bars. Yet it resists disclosure. The National Restaurant Association contends that listing the ingredients on fast-food wrappers or menus would cause "undue anxiety" among patrons. It suggests that people with food allergies or other dietary concerns write to the food companies to obtain specific information.

If forced to disclose, fast-food outlets almost surely would start competing on the basis of content as well as taste. Fast food need not hide behind slow facts.●

ADDITIONAL COSPONSORS

S. 950

At the request of Mr. HEINZ, the name of the Senator from Illinois [Mr. SIMON] was added as a cosponsor of S. 950, a bill to amend the Communications Act of 1934 to promote fairness in telecommunications policy by providing for lifeline telephone service.

S. 1622

At the request of Mr. MELCHER, the names of the Senator from Mississippi [Mr. COCHRAN], and the Senator from Arizona [Mr. DECONCINI] were added as cosponsors of S. 1622, a bill to promote the development of Native American Culture and Art.

S. 1661

At the request of Mr. HEINZ, the name of the Senator from Connecticut [Mr. DODD] was added as a cosponsor of S. 1661, a bill to amend the Internal Revenue Code of 1954 to exempt certain emergency medical transportation from the excise tax on transportation by air.

S. 1820

At the request of Mr. DECONCINI, the name of the Senator from Alaska [Mr. MURKOWSKI] was added as a cosponsor of S. 1820, a bill to provide financial assistance to State and local educational agencies for the development and expansion of demonstration chemical substance abuse prevention programs in the public elementary and secondary schools of such agencies, and for other purposes.

S. 1941

At the request of Mr. DENTON, the name of the Senator from Pennsylvania [Mr. SPECTER] was added as a cosponsor of S. 1941, a bill to protect the security of the United States by providing for sanctions against any country that provides support for perpetrators of acts of international terrorism.

S. 1965

At the request of Mr. STAFFORD, the names of the Senator from Oklahoma [Mr. NICKLES], the Senator from Florida [Mrs. HAWKINS], the Senator from Ohio [Mr. METZENBAUM], the Senator from Iowa [Mr. GRASSLEY], the Senator from Massachusetts [Mr. KERRY], the Senator from Kansas [Mr. DOLE], the Senator from Nevada [Mr. LAXALT], the Senator from Texas [Mr. BENTSEN], the Senator from Mississippi [Mr. COCHRAN], the Senator from Tennessee [Mr. GORE], the Senator from Maryland [Mr. SARBANES], the Senator from South Dakota [Mr. ABDNOR], the Senator from Ohio [Mr. GLENN], the Senator from West Virginia [Mr. ROCKEFELLER], the Senator from Minnesota [Mr. DURENBERGER], the Senator from Georgia [Mr. NUNN], the Senator from Washington [Mr. EVANS], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from Vermont [Mr. LEAHY], the Senator from Rhode Island [Mr. CHAFEE], the Senator from Pennsylvania [Mr. SPECTER], the Senator from Maine [Mr. COHEN], the Senator from Arizona [Mr. DECONCINI], and the Senator from New Jersey [Mr. BRADLEY] were added as cosponsors of S. 1965, a bill to reauthorize and revise the Higher Education Act of 1984, and for other purposes.

S. 2081

At the request of Mr. STAFFORD, the name of the Senator from Michigan [Mr. RIEGLE] was added as a cosponsor of S. 2081, a bill to reauthorize the Head Start Act, the Low-Income Home Energy Assistance Act of 1981, the Community Services Block Grant Act, for deferred cost care programs, and for other purposes.

S. 2129

At the request of Mr. KASTEN, the name of the Senator from Pennsylvania [Mr. HEINZ] was added as a cosponsor of S. 2129, a bill to facilitate the ability of organizations to establish risk retention groups, to facilitate the ability of such organizations to purchase liability insurance on a group basis, and for other purposes.

S. 2176

At the request of Mr. BOREN, the names of the Senator from Montana, [Mr. BAUCUS], and the Senator from Arkansas [Mr. BUMPERS] were added as cosponsors of S. 2176, a bill to amend chapter 11 of title 18, United States Code, to prohibit any former high-level Federal civilian officer or employee or high-ranking officer of a uniformed service from representing or advising a foreign principal for a period of at least 5 years after leaving Government service.

S. 2183

At the request of Mr. METZENBAUM, the name of the Senator from Pennsylvania [Mr. SPECTER] was added as a cosponsor of S. 2183, a bill to improve services for individuals with Alzheimer's disease and their families.

S. 2206

At the request of Mr. NICKLES, the name of the Senator from North Dakota [Mr. ANDREWS] was added as a cosponsor of S. 2206, a bill to amend the Internal Revenue Code of 1954 to repeal the windfall profit tax on crude oil.

S. 2273

At the request of Mr. KASTEN, the name of the Senator from Minnesota [Mr. DURENBERGER] was added as a cosponsor of S. 2273, a bill to amend the Internal Revenue Code of 1954 to deny the tax exemption for interest on industrial development bonds used to finance acquisition of farm property by foreign persons.

S. 2286

At the request of Mr. DECONCINI, the names of the Senator from Hawaii [Mr. MATSUNAGA], and the Senator from Maine [Mr. MITCHELL] were added as cosponsors of S. 2286, a bill to prohibit the sale, donation, or other transfer of Stinger antiaircraft missiles to democratic resistance forces in Afghanistan and Angola unless certain conditions are met.

S. 2327

At the request of Mr. GRAMM, the name of the Senator from Texas [Mr. BENTSEN] was added as a cosponsor of S. 2327, a bill to amend the Low-Income Home Energy Assistance Act of 1981 to specify the method of determining State allotments.

S. 2347

At the request of Mr. BENTSEN, the name of the Senator from Texas [Mr. GRAMM] was added as a cosponsor of S. 2347, a bill to authorize the Corps of Engineers to issue permits under the Clean Water Act and the River and Harbor Act for construction of a water resource project in the State of Texas.

S. 2387

At the request of Mr. DURENBERGER, the name of the Senator from Idaho [Mr. MCCLURE] was added as a cosponsor of S. 2387, a bill to provide relief to

State and local governments from Federal regulation.

S. 2411

At the request of Mr. D'AMATO, the name of the Senator from South Carolina [Mr. THURMOND] was added as a cosponsor of S. 2411, a bill to prohibit possession, manufacture, sale, importation, and mailing of ballistic knives.

S. 2434

At the request of Mr. HATCH, the name of the Senator from Oklahoma [Mr. NICKLES] was added as a cosponsor of S. 2434, a bill to amend the Public Health Service Act to require the Secretary of Health and Human Services to prepare announcements for television on the health risks to women which result from cigarette smoking.

SENATE JOINT RESOLUTION 311

At the request of Mr. CRANSTON, the names of the Senator from Illinois [Mr. SIMON] and the Senator from Florida [Mrs. HAWKINS] were added as cosponsors of Senate Joint Resolution 311, a joint resolution designating the week beginning November 9, 1986, as "National Women Veterans Recognition Week".

SENATE JOINT RESOLUTION 323

At the request of Mr. D'AMATO, the name of the Senator from Illinois [Mr. SIMON] was added as a cosponsor of Senate Joint Resolution 323, a joint resolution to designate May 21, 1986, as "National Andrei Sakharov Day".

SENATE JOINT RESOLUTION 326

At the request of Mr. WALLOP, the name of the Senator from Indiana [Mr. QUAYLE] was added as a cosponsor of Senate Joint Resolution 326, a joint resolution to proclaim May 21, 1986, as "Andrei Sakharov Honor and Freedom Day".

SENATE JOINT RESOLUTION 333

At the request of Mr. ANDREWS, the names of the Senator from Michigan [Mr. LEVIN], the Senator from South Carolina [Mr. HOLLINGS], the Senator from Georgia [Mr. NUNN], the Senator from Nebraska [Mr. ZORINSKY], the Senator from West Virginia [Mr. ROCKEFELLER], the Senator from Oklahoma [Mr. NICKLES], the Senator from Vermont [Mr. LEAHY], the Senator from North Dakota [Mr. BURDICK], the Senator from Massachusetts [Mr. KERRY], the Senator from Arkansas [Mr. PRYOR], the Senator from South Dakota [Mr. ABDNOR], the Senator from Idaho [Mr. MCCLURE], the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from Missouri [Mr. DANFORTH], the Senator from Illinois [Mr. DIXON], the Senator from Connecticut [Mr. WEICKER], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Hawaii [Mr. INOUYE], the Senator from Arkansas [Mr. BUMPERS], and the Senator from Michigan [Mr. RIEGLE] were added as cosponsors of Senate Joint Resolution 333, a joint resolution designating the week of May 18, 1986, through May 24, 1986, as "National Food Bank Week".

SENATE JOINT RESOLUTION 335

At the request of Mr. CHILES, the names of the Senator from Pennsylvania [Mr. HEINZ], and the Senator from Massachusetts [Mr. KENNEDY] were added as cosponsors of Senate Joint Resolution 335, a joint resolution to designate May 8, 1986, as "Naval Aviation Day".

SENATE JOINT RESOLUTION 337

At the request of Mrs. HAWKINS, the name of the Senator from Colorado [Mr. ARMSTRONG] was added as a cosponsor of Senate Joint Resolution 337, a joint resolution designating May 18–24, 1986, as "Just Say No to Drugs Week".

SENATE JOINT RESOLUTION 342

At the request of Mrs. HAWKINS, the names of the Senator from Alabama [Mr. DENTON], the Senator from North Dakota [Mr. BURDICK], the Senator from Idaho [Mr. SYMMS], and the Senator from Georgia [Mr. MATTINGLY] were added as cosponsors of Senate Joint Resolution 342, a joint resolution to designate May 25, 1986, as "Missing Children Day".

SENATE CONCURRRENT RESOLUTION 125

At the request of Mr. HEINZ, the name of the Senator from Arizona [Mr. DECONCINI] was added as a cosponsor of Senate Concurrent Resolution 125, a concurrent resolution recognizing the achievements of the Ireland Fund and its founder, Dr. Anthony J.F. O'Reilly.

SENATE RESOLUTION 381

At the request of Mr. DECONCINI, the name of the Senator from Florida [Mr. CHILES] was added as a cosponsor of Senate Resolution 381, a resolution expressing the sense of the Senate with respect to United States corporations doing business in Angola.

SENATE RESOLUTION 385

At the request of Mr. SASSER, the name of the Senator from South Carolina [Mr. HOLLINGS], was added as a cosponsor of Senate Resolution 385, a resolution to express the sense of the Senate that certain action be taken to end hunger in the United States by 1990.

SENATE RESOLUTION 392

At the request of Mr. DECONCINI, the names of the Senator from Vermont [Mr. LEAHY], and the Senator from Michigan [Mr. LEVIN] were added as cosponsors of Senate Resolution 392, a resolution expressing the sense of the Senate that the people of the Republic of Korea should be allowed to petition for a constitutional amendment to allow for the direct election of their president.

SENATE RESOLUTION 397

At the request of Mr. QUAYLE, the names of the Senator from Oklahoma [Mr. BOREN], and the Senator from South Dakota [Mr. ABDNOR] were added as cosponsors of Senate Resolution 397, a resolution expressing the sense of the Senate regarding the lending practices of multilateral development banks.

AMENDMENT NO. 1823

At the request of Mrs. KASSEBAUM, the name of the Senator from Pennsylvania [Mr. HEINZ] was added as a cosponsor of amendment No. 1823 intended to be proposed to S. 100, a bill to regulate interstate commerce by providing for a uniform product liability law, and for other purposes.

At the request of Mrs. KASSEBAUM, the name of the Senator from Montana [Mr. MELCHER] was withdrawn as a cosponsor of amendment No. 1823 intended to be proposed to S. 100, supra.

AMENDMENT NO. 1951

At the request of Mr. DANFORTH, the name of the Senator from Connecticut [Mr. DODD] was added as a cosponsor of amendment No. 1951 intended to be proposed to S. 1999, a bill to regulate interstate commerce by providing for a uniform product liability law, and for other purposes.

SENATE RESOLUTION 405—EXPRESSING OPPOSITION TO THE IMPOSITION OF A FEDERAL LICENSING FEE FOR MARINE SPORTFISHING

Mr. LAUTENBERG (for himself and Mr. HOLLINGS) submitted the following resolution; which was referred to the Committee on Commerce, Science, and Transportation:

S. RES. 405

Whereas the President has proposed the imposition of a federal licensing fee for recreational marine fishermen, to be implemented by the Secretary of Commerce;

Whereas the Administrator of the National Oceanic and Atmospheric Administration has suggested imposing a similar fee on commercial fishermen;

Whereas the federal revenues raised by the proposed fees would not be contributed to enhancement of fisheries;

Whereas the revenues expected to be raised would far exceed federal expenditures in direct support of recreational fisheries;

Whereas there are over seventy million recreational fishing trips taken along the coastal mainland of the United States annually;

Whereas commercial and recreational fisheries together generate an estimated $27 billion to the nation's economy, and provide employment for an estimated 900,000 individuals;

Whereas imposition of such a fee would discourage growth of the fisheries industries in this country, and harm related industries;

Whereas imposition of such a fee would have adverse impacts on state and local economies: Now, therefore, be it

● Mr. LAUTENBERG. Mr. President, today I am submitting a resolution to express the sense of the Senate opposing the imposition of a Federal fishing license fee for recreational fishermen.

I am pleased to be joined by my distinguished colleague from South Carolina, Senator HOLLINGS, in submitting this resolution.

When the President submitted his budget proposal for fiscal year 1987, he included a recommendation to implement a Federal ocean sportfishing license. This proposal would require recreational fishermen to obtain a Federal license in order to fish off our coasts. The fee would be at least $10, with $5 going to the general treasury, and the remainder to the State in which the license was obtained. The administration proposes to raise $200 million in revenues over the next 5 years through this program. None of the Federal revenues generated from this fee would serve to enhance fisheries.

Fisheries represent an important segment of the economies of coastal States. Over 70 million recreational fishing trips were taken in the coastal waters of the continental United States. Combined, recreational and commercial fisheries generate an estimated $27 billion in the United States, and employ approximately 900,000 individuals.

In my State, New Jersey, fisheries play a vital role in the State's economic well-being. An estimated 1.6 million salt water recreational fishermen reside in New Jersey, while another 1.2 million tourists come to our State each year to fish in the Atlantic coastal waters. There are 800 owners of large charter marine sportfishing charter boats in New Jersey. Recreational fisheries bring in between $300 and $400 million each year to the economy of New Jersey.

Mr. President, the imposition of a Federal ocean sportfishing license on recreational fishermen could have devastating impacts on State and local economies. In New Jersey, an overwhelming majority of those chartering marine fishing vessels do so only once each year. If a Federal fee of at least $10 is imposed in addition to the cost of chartering a vessel, many of these one-time fishermen will find a fishing trip infeasible. The impact of this on charter boat owners, as well as on associated businesses would be severe.

The administration's proposal raised Federal revenues without any benefit accruing to the enhancement and enrichment of fisheries. This proposal attempts to raise Federal revenues at the expense of a small group. The National Marine Fisheries Service directly spends only about $3 million to enhance recreational fisheries annually. The funds raised through this proposal would far exceed Federal expenditures in this area. Mr. President, this amounts to nothing more than a tax increase on recreational fishermen which is being disguised as a user fee.

This proposal is inappropriate, and I hope the administration will not pursue it further. This resolution is meant to put the Senate firmly on record in opposition to the administration's proposal. I am pleased to have Senator HOLLINGS as its original cosponsor, and urge my colleagues to support the resolution.●

● Mr. HOLLINGS. Mr. President, today I join with my colleague Senator LAUTENBERG to submit a resolution expressing opposition to the administration's proposal to implement an ocean sportfishing license.

The plan would impose a fee of at least $10 on the Nation's 17 million recreational anglers who fish in our coastal waters; $5 of that license fee would go the Federal Government. The plan would generate hundreds of millions of dollars in revenue over the next few years.

Some might call this proposal a "user fee." But it is not. If it were, then recreational fishermen could expect to benefit directly from hundreds of millions of dollars in Federal services. Yet look at what they are getting—the National Marine Fisheries Service spends only about $3 million a year on programs that directly enhance and support ocean sportfishing. And the administration wants to slash this agency's budget, to boot.

Ocean sportfishermen, who make more than 70 million fishing trips each year, are already paying for existing programs—through special taxes on the marine fuel and recreational equipment they purchase.

Thus, the administration's fishing license proposal is nothing more than a scheme to fleece the Nation's recreational fishermen of their hard-earned money in order to offset deficits they didn't create.

Mr. President, I have said for years that we can balance our Federal budget if the President and the Congress show the discipline necessary to do it. We've passed the Gramm-Rudman-Hollings law to force us to exercise that discipline. But let us not look to hare-brained proposals such as this ocean sportfishing license to solve our deficit problems. It's not fair, it's not right, and it certainly won't get the job done.●

SENATE RESOLUTION 406—HONORING THE 125TH ANNIVERSARY OF CAMPING IN THE UNITED STATES

Mr. DODD (for himself and Mr. WEICKER) submitted the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 406

Whereas, in August of 1861, Frederick William Gunn, Headmaster of the Gunnery School in Washington, Connecticut, set out with his students on a forty-mile excursion to Welches Point on Long Island Sound in the first recorded organized children's summer camping experience in the history of our nation, and;

Whereas, the camp at Welches Point promoted the development and self-discipline of the participants, and was perceived to have been a valuable experience for the young students and adults who pitched tents and lived for two weeks in the out-of-doors, doing their own cooking, fishing, and chores, and enjoying songs and stories by campfire at night, and;

Whereas, since those origins in the late 19th century, organized camping has provided young people with activities designed to promote personal growth and development skills; to encourage positive behavioral change; and to foster the ability to communicate with both other children and adults; and;

Whereas, today over 11,000 camps, in 50 states, serve four million young Americans each year, and;

Whereas, 1986 is the 125th Anniversary of organized camping in the United States;

Resolved, That due honor and recognition be accorded the institution of organized camping in its 125th year of existence, with the acknowledgement of the contributions that organized camping has and continues to offer the youth of America, together with invaluable opportunities for enhanced mental, physical, spiritual, and social development.

● Mr. DODD. Mr. President, today I am submitting with my colleague from Connecticut [Mr. WEICKER] a Senate resolution recognizing and honoring the 125th anniversary of organized camping in the United States. The first organized children's camp was established in 1861 in Connecticut, at Welches Point on Long Island Sound. Since that time, summer camp programs, and the summer camp experience, have become available each year to 4 million young campers throughout all 50 States.

Every State in the Nation currently enjoys established camping programs derived in part from the ideals advanced at Welches Point. With over 11,000 organized camps in the United States today, the summer camp experience has become an important part of millions of young lives, and offers invaluable opportunities for physical, mental, spiritual, and social development.

During the week of July 14, 1986, 125 youths and adults from camps throughout the United States will recreate the historic 40-mile 1861 Connecticut walk. They will be joined in Milford, CT, on July 17, by an additional crowd of some 2,000, for the nationwide great American summer campfire. We wish all participants safety and success in this celebration.

I hope that all Members of the Senate will join me in a tribute to this cornerstone of America's youth in its 125th anniversary.●

AMENDMENTS SUBMITTED

DRUG EXPORT LEGISLATION

METZENBAUM AMENDMENT NO. 1952

Mr. METZENBAUM proposed an amendment to the bill (S. 1848) to amend the Federal Food, Drug, and Cosmetic Act to establish conditions for the export of drugs; as follows:

On page 27, beginning with line 17, strike out through line 7 on page 28 and insert the following:

"(D) in the case of a drug to be shipped to a country on a list established under clause (i) of (ii) of paragraph (2)(A)—

"(i) an application for approval or licensing has been submitted or approved for the drug and the drug has not been the subject to any action by the Secretary or the Secretary of Agriculture denying, withdrawing, or suspending approval or licensing on the basis of safety or effectiveness or otherwise banning the drug; and

"(ii) such application has not lapsed or has not been withdrawn;

GLENN (AND PROXMIRE) AMENDMENT NO. 1953

Mr. GLENN (for himself and Mr. PROXMIRE) proposed an amendment to amendment No. 1949 proposed by Mr. METZENBAUM to the bill S. 1848, supra; as follows:

In lieu of the matter proposed to be inserted, add the following:

SEC. 9. (a) Not later than December 31 of each year, the Director of the Office of Management and Budget shall prepare for the Department of State which, in turn shall provide and inform the public and foreign governments, through their embassies in the United States or other appropriate means, an annual report which summarizes—

(1) all final agency actions taken during the preceding fiscal year with respect to banned or severely restricted substances, and

(2) any additional action taken during the preceding fiscal year with respect to banned or severely restricted substances which were first banned or severely restricted during a fiscal year prior to the fiscal year covered by the report.

(b)(1) No banned or severely restricted substance may be exported from the United States unless—

(A) the person intending to export the substance from the United States provides written notice to the agency reasonsible for carrying out the provision of law specified in subsection (c) which is applicable to the substance, prior to the first shipment to a country after regulatory action, stating such person's intent to export the substance and the intended country of destination; and (d) in addition, notice be made to foreign embassies of all final regulatory actions at the time they are taken.

(B) the agency provides the Secretary of State with a statement concerning the substance which contains—

(i) the name of the substance;

(ii) a summary of any action taken by the agency with respect to the substance, including a description of the grounds for such action and a citation of the statutory authority for such action;

(iii) a description of the determined risks to human health or safety or to the environment that may result from the use of the substance; and

(iv) a specification of the officer or employee of the agency who may be contacted by the government of any foreign country to which the substance is intended to be exported in order to obtain additional information about the substance; and

(C) the Secretary of State delivers a copy of the statement submitted under subparagraph (B) to an appropriate official in the embassy of the country of destination or transmits it to such country by other appropriate means.

(2)(A) The provisions of paragraph (1) shall supersede any other provision of the law to the extent such provision is inconsistent with paragraph (1).

(B) No law enacted after the date of the enactment of this Act shall supersede this subsection unless it does so in specific terms, referring to this Act and declaring that the new law supersedes the provisions of this subsection.

(C) Nothing in this subsection authorizes the disclosure to the public of bona fide trade secrets or other confidential business information.

(c) For the purpose of this section, the term "banned or severly restricted substance" means—

(1) a food or class of food which—

(A) is adulterated, as defined by rules or orders issued under section 402 (a) or (c) (21 U.S.C. 342 (a) or (c)), or

(B) is in violation of emergency permit controls issued under section 404 (21 U.S.C. 344).

of the Federal Food, Drug, and Cosmetic Act;

(2) a drug which is—

(A) is adulterated as defined by rules or orders issued under section 501 (a), (b), (c), or (d) (21 U.S.C. 351 (a), (b), (c), or (d)).

(B) misbranded, as defined by rules or orders issued under section 502(j) (21 U.S.C. 352(j)), or

(C) a new drug or new animal drug for which an approval is not in effect under section 505 (21 U.S.C. 355) or section 512 (21 U.S.C. 360), respectively.

of the Federal Food, Drug, and Cosmetic Act;

(3) an antibiotic drug which has not been certified under section 507 (21 U.S.C. 357) of the Federal Food, Drug, and Cosmetic Act;

(4) a drug containing insulin which has not been certified under section 506 (21 U.S.C. 356) of the Federal Food, Drug, and Cosmetic Act;

(5) a device which—

(A) is adulterated, as defined by rules or orders issued under section 501(a) (21 U.S.C. 351(a)),

(B) is misbranded, as defined by rules or orders issued under section 502(j) (21 U.S.C. 352(j)).

(C) does not conform with a performance standard issued under section 514 (21 U.S.C. 360d).

(D) has not received premarket approval under section 515 (21 U.S.C. 360e), or

(E) is banned under section 516 (21 U.S.C. 360f), of the Federal Food, Drug, and Cosmetic Act;

(6) a cosmetic which is adulterated, as defined by rules or orders issued under section 601 (21 U.S.C. 361) of the Federal Food, Drug, and Cosmetic Act;

(7) a food additive or color additive which is deemed unsafe within the meaning of section 409 (21 U.S.C. 348) or section 706 (21 U.S.C. 376), respectively, of the Federal Food, Drug, and Cosmetic Act;

(8) a biological product which has been propagated or manufactured and prepared at an establishment which does not hold a license as required by section 351 (42 U.S.C. 262) of the Public Health Service Act;

(9) an electronic product which does not comply with a performance standard issued under section 358 (42 U.S.C. 263f) of the Public Health Service Act;

(10) a consuimer product which—

(A) does not comply with a consumer product safety standard adopted under sections 7 and 9 (15 U.S.C. 2056 and 2058) other than one relating solely to labeling,

(B) has been declared to be a banned hazardous product under sections 8 and 9 (15 U.S.C. 2057 and 2058),

(C) presents a substantial product hazard under section 15 (15 U.S.C. 2064), or

(D) is an imminently hazardous consumer product under section 12 (15 U.S.C. 2061),

of the Consumer Product Safety Act;

(11) a fabric, related material, or product which does not comply with a flammability standard (other than one related to labeling) adopted under section 4 (15 U.S.C. 1193) of the Flammable Fabrics Act;

(12) a product which is a banned hazardous substance (including a children's article) under sections 2 and 3 (15 U.S.C. 1261 and 1262) of the Federal Hazardous Substances Act;

(13)(A) a pesticide which, on the basis of potential risks to human health or safety or to the environment,

(i) has been denied registration for all or most signficiant uses under section 3(c)(6) (7 U.S.C. 136a(c)(6)),

(ii) has been classified for restricted use under section 3(d)(1)(C) (7 U.S.C. 136a(d)(1)(C)),

(iii) has had its registration canceled for suspended for all or most significant uses under section 6 (7 U.S.C. 136d),

(iv) has been proceeded against and seized under section 13(b)(3) (7 U.S.C. 136k), or

(v) has not had its registration canceled, but requires an acknowledgement statement under section 17(a)(2) (7 U.S.C. 136o(a)(2)),

of the Federal Insecticide, Fungicide, and Rodenticide Act, or

(B) a pesticide chemical for which a tolerance has been denied or repealed under section 408 (21 U.S.C. 346(a)) of the Federal Food, Drug, and Cosmetic Act; and

(14) a chemical substance or mixture—

(A) which is subject to an order or injunction issued under section 5(f)(3) (15 U.S.C. 2604(f)(3)),

(B) which is subject to a requirement issued under section 6(a)(1), 6(a)(2), 6(a)(5), or 6(a)(7) (15 U.S.C. 2605(a)(1), 2605(a)(2), 2605(a)(5), or 2605(a)(7)), or

(C) for which a civil action has been brought and relief granted under section 7 (15 U.S.C. 2606),

of the Toxic Substances Control Act.

METZENBAUM AMENDMENT NO. 1954

Mr. METZENBAUM proposed an amendment to the bill S. 1848, supra; as follows:

On page 35, beginning with line 4, strike out through line 17 on page 37 and insert in lieu thereof the following:

"(8)(A) If at any time the Secretary or the Secretary of Agriculture determines, with respect to a drug which is authorized to be shipped under this subsection, that such drug is present in a country to which shipment is not authorized under this subsection, the Secretary or the Secretary of Agriculture, as the case may be, shall—

"(i) immediately prohibit the shipment of such drug from the United States to any country;

"(ii) give the person shipping the drug from the United States prompt notice of such determination and prohibition; and

"(iii) afford such person an opportunity for an expedited hearing.

NOTICES OF HEARINGS

COMMITTEE ON RULES AND ADMINISTRATION

Mr. MATHIAS. Mr. President, I wish to announce that the Committee on Rules and Administration will meet in SR-301, Russell Senate Office Building, on Wednesday, May 14, 1986, at 9:30 a.m., to conduct a business meeting.

On the legislative agenda, the committee will be considering two bills concerning official mail costs (S. 2255 and S. 2272); an original bill to authorize appropriations for the Federal Election Commission for fiscal year 1987; Senate Concurrent Resolution 123, to permit the 1986 Special Olympics Torch Relay to be run through the Capitol Grounds; and two printing resolutions for the House of Representatives (H. Con. Res. 288 and H. Con. Res. 301).

Administrative business scheduled to be considered includes the following: use of the official office expense account to defray the cost of drug testing for Senate staff; the budget for the Medvid investigation by the Helsinki Commission; the majority leader's proposal for the use of Hart Subway during rollcall votes; long distance toll charges; and secure telephones for the Select Committee on Intelligence.

For further information concerning this meeting, please contact Carole Blessington of the Rules Committee staff on x40278.

ADDITIONAL STATEMENTS

SWEEDENS SWAMP

● Mr. KASTEN. Mr. President, early next week, the EPA will determine whether to veto an Army Corps of Engineer's decision to authorize a permit to fill a wetland known as Sweedens Swamp. This single decision may be the straw that breaks the camel's back, prompting me and many of my colleagues to raise serious questions about the future of the U.S. Wetlands Protection Program.

Wetlands protection is a critical issue on the national environmental agenda. Wetlands are vital natural resources. They maintain water quality, provide flood control, protect against erosion, and support ground water recharge and water supply. Additionally, they provide the habitat and breeding ground for thousands of plant and animal species.

Wisconsin once had 7.5–10 million acres of wetlands. Today, less than one-third of these remain. Valuable Wisconsin resources will be lost if this national protection program is weakened. Wisconsin's wetlands support a highly productive fisheries industry and are vital to many rare and endangered plant and animal species. These wetlands also recharge ground water, store valuable nutrients, treat wastewater, supply water, and help to control flooding. It is necessary that wetlands targeted for development activities are accorded the level of scrutiny required by the individual permit process.

Section 404 of the Clean Water Act establishes the wetlands protection program by charging the Army Corps with the duty of issuing permits to developers for eligible projects seeking to fill such sites. While the Army Corps initially issues the permits, the EPA is directed by Congress to promulgate guidelines for the corps to follow. The EPA is also directed to assume final review and veto authority over permit decisions.

Poor administration of section 404 has led to congressional hearings on this matter. Let us recall the controversy surrounding Robert Dawson's nomination because of his track record with the 404 Program. Assurances were received by the Senate that Mr. Dawson would uphold the integrity of the program. It is evident that this is not his intention. Recently, the Corps' Washington headquarters overrode the New England Corps' recommendation to deny a shopping mall developer's permit. If EPA abdicates its responsibilities by failing to uphold section 404, reinterpretation of EPA's guidelines will fly in the face of congressional intent and will destroy the Wetlands Protection Program.

The guidelines establish a "water dependency test" which assumes "practicable alternatives" exist if the project is not water dependent. A shopping mall is clearly not water dependent. The developer also contends that in order for an alternative to be practicable, it must first meet the developer's criteria. Such an approach would allow developers to create a "wish list" of criteria that only their wetland site could meet.

The developer, Pyramid Corp., offered a mitigation proposal to replicate the wetland at a sand and gravel pit. Although the status of this technology is questionable, the critical issue at hand is the interpretation of the 404 guidelines. The guidelines do not offer mitigation as a remedy for destroying wetlands when viable alternatives exist. If developers are allowed to destroy wetlands with the promise of building replacements, the Natural Wetland Protection Program should be renamed "The Swamp Swap."

I call upon Mr. Thomas, as do a number of my colleagues, to uphold the guildelines it promulgated by vetoing the developer's permit to destroy a Red Maple Swamp in order to construct a shopping mall in its place.●

STATEMENT OF ROGER WILKINS ON SOUTH AFRICA

● Mr. SIMON. Mr. President, one of the more thoughtful observers on the American scene is Roger Wilkins, professor of history at George Mason University and a senior fellow at the Institute for Policy Studies.

He recently testified before the House Foreign Affairs Committee. I read his testimony, and it deserves distribution beyond the House Foreign Affairs Committee, meaning no disrespect to that committee.

Professor Wilkins' beliefs can be summed up in two questions and two answers which he provides here: "Is a disastrous outcome in South Africa and in the region inevitable? I believe not. Can a new American policy make a difference? I believe so."

I share his beliefs and so do many others in this Nation and in other nations.

But the present drifting or, as Mr. Wilkins describes it, our "befuddled American acquiescence to the status quo," will not avoid that disaster.

The reality is that institutional racism either changes peacefully, or it changes violently, and if it changes violently, that violence is not contained within the boundaries of any one country. That is the lesson of history. That is the lesson of Hitler and Germany. How many times do we need to relearn that lesson? Or will we ever learn it?

I hope that we can start moving, and moving soon, toward a more sensible policy.

I ask that the Roger Wilkins testimony be inserted in the RECORD.

The testimony follows:

STATEMENT OF ROGER WILKINS

Mr. Chairman, members of the Committee—my name is Roger Wilkins. I am Senior Fellow at the Institute for Policy Studies, a Commonwealth Professor of Hitory at George Mason University and a member of the Executive Committee of the Free South Africa Movement. It is in that latter capacity that I testify here today.

For further purposes of identification, I would like to add that more than twenty years ago, in the Kennedy Administration, I served as Special Assistant to the Administrator of AID and bore special responsibility for African programs. During the Nixon presidency, I turned down an offer to be Deputy Assistant Secretary of State for African Affairs and at the inception of the Carter Administration, I declined an offer

to become Assistant Secretary of State for African Affairs. I submit this identifying material because many journalists and a number of other observers have attempted to dismiss the Free South Africa Movement as a group of frustrated civil rights activits in search of a cause. That obervation proceeded from the simple observation that each member of the Executive Committee of this movement—Mary Frances Berry, Walter E. Fauntroy, Sylvia Hill, William Lucy, Randall Robinson and I—is black. But all of us are full human beings with a variety of public policy impulses and histories which include, in the case of all of my colleagues, as long and deep an involvement with African issues as my own.

I submit this testimony in support of HR 997 offered by Rep. Dellums of California which would impose strict prohibitions on a broad range of economic exchanges with South Africa and in support of HR 2589 offered by Rep. Schroeder of Colorado, which would prohibit the exploitation of the national resources of Namibia. I also support H.R. 4276 offered by Rep. Hamilton of Indiana, which, as I understand it, would require Congressional debate on and approval of any U.S. government support for paramilitary operations in Angola.

I need not rehearse for you the details of the brutal oppression, the theft of life, the theft of labor, the theft of childhood and the theft of human joy that is the official policy and practice of the apartheid regime in Pretoria. That regime changes its rhetoric every two months or so, but its purposes remain constant: The maintenance of white domination in South Africa and of South African hegemony in all of Southern Africa. To that end, black South Africans are being killed at a rate of 4 or 5 a day and South Africa's neighbors must endure both the constant threat of brutal cross-border raids by the mighty South African military forces and South African-supported subversion, which now has American approval and material support in Angola.

We in the Free South Africa Movement want the killings to stop and a true peaceful national political process to begin in South Africa. We want Namibia to be freed of South Africa's illegal and exploitative stranglehold. We want the bloody turbulence in the entire region to end, and we want a prompt termination of the new U.S. military alliance with South Africa in Angola.

None of those evils will end until apartheid ends and the bloody security apparatus that sustains and defends it is dismantled. Apartheid and its enforcement mechanisms are the rogue elephants of Southern Africa. We now know that carrots do not pacify apartheid's appetite. Constructive engagement has failed. The apartheid regime has not understood sweet talk.

Constructive engagement was doomed from the start because it sought to pacify the region around the edges of South Africa without facing apartheid directly and without engaging black South Africans or their aspirations. Constructive engagement attempted to free Namibia, get the Cubans out of Angola, and pacify South Africa's borders with Mozambique, Botswana and Lesotho. Under constructive engagement, the capital of Lesotho has been raided and its government overthrown; the capital of Botswana has been raided; a revolt in Mozambique has been supported by South Africa despite its agreement not to do so; South Africa's iron grip on Namibia has not slackened and now the rebels it has supported in Angola threaten private U.S. assets there with sophisticated weapons supplied by the U.S. The Cubans, of course, have not gone home, and Angola has turned away from the U.S. to look to the U.N. as the principal hope for its political future. In South Africa blood and death at an unprecedented level speak eloquently to the world and to black South Africans about the bankruptcy of current American policy.

In my debates with him, the South African Ambassador has charged that those of us who urge strict sanctions against Pretoria are seeking to punish the country. That is wrong. It is the pretoria regime itself that is punishing the country. By continuing its attempts to batter the thirst for freedom out of its black population, Pretoria is poisoning its country's future, killing its children, embittering its youth, radicalizing its politics and building, death-by-death, the stage for future death and destruction that will horrify the world. Its feverish repression has turned South Africa into an efficient factory for the production of radicals who are anti-white, anti-American, Anti-capitalist. The contrast between the hero's reception given to Sen. Robert F. Kennedy in the late sixties and Sen. Edward M. Kennedy last year—where he was hooted off some platforms—speaks not to differences between the two Senators, but to the new anti-Americans engendered by the Reagan Administration's gift of comfort to Pretoria and the continued support provided by substantial U.S. private economic activity there.

Is a disasterous outcome in South Africa and in the region inevitable? I believe not. Can a new American policy make a difference? I believe so. Those who announce smugly that this is a problem that the South Africans themselves will settle are telling a partial truth for selfish or cowardly reasons. Of course, South Africans themselves will ultimately determine the future course of their country. But that does not answer the intermediate questions of how long it will take and how much more blood will be spilled in the shaping of that outcome. Those who snuggle comforably under the "South Africans themselves" shelter do so either because it is still very profitable to do business as usual in South Africa or because they fear the results of unleashing democratic forces there. They also arrogantly ignore the powerful appeals for outside help from such courageous South Africans as Winnie Mandela and Desmond Tutu.

Those South African appeals for help are based on a rock of knowledge forged by daily experience that tells people like Mandela and Tutu that the apartheid regime will not listen to reason even when that reason is in the long-term interests, not just of the people it rules by brute force, but also of that minority it actually represents. A distinguished American professor who recently returned from South Africa told me that every businessman in South Africa to whom he spoke had the same political prescription for the government: Repeal the apartheid laws; repeal the security laws; free Nelson Mandela and other political prisoners; unban the ANC and enter into political negotiations with the blacks. But, he reported, the government won't listen to them. They say it only began to cock an ear slightly when foreign banks refused last summer to roll over South Africa's short-term debt. Rhetorical abhorrance of apartheid won't get Pretoria to the bargaining table, but economic sanctions that are felt inside the country have a real chance of working. The apartheid regime listens when it is cracked over the skull with the prospect of a disintegrating economy.

All whites in South Africa are not alike. All Afrikaaners are not alike. There are whites—Afrakaaners and English speakers—who understand that there is a better path to the future that one paved with the dead bodies of South African citizens. Right now, in the context of a befuddled American acquiescence in the status quo, some, like the businessmen mentioned above, lack the punch to make their views felt and others lack the courage or the political motivation to form views that are in their own interests and to make them known. The only white opposition the Pretoria government has to listen to just now is on its right. This need not always be so. Strong and effective U.S. sanctions, I believe, would enlarge and embolden the now latent and impotent moderate white opposition. They would, in my judgment, open up South African politics and hasten the day when peaceful negotiation rather than brutal repression is the central fact in South African political life.

By grasping this option, the U.S. government can move forward on a line where morality and long-term U.S. political interests converge. We would be helping to put an end to one of the most repressive regimes on earth while replacing the growing enmity of the people who will surely chart South AFrica's future with their respect and perhaps even their affection.

Thank you, Mr. Chairman.●

BOSTON URBAN GARDENERS

● Mr. KERRY. Mr. President, I would like to take this opportunity to recognize Boston Urban Gardeners, an organization which has made significant contributions to fostering a sense of community in Boston neighborhoods. The organization brings together neighbors to work on a common goal, it provides low-income senior citizens a valuable recreational and social activity, it helps prevent neighborhood crime, and it provides nutritional food for people who might otherwise not be able to afford it. Boston Urban Gardeners is a clear example of a public-private partnership that improves the quality of neighborhood life and works to everyone's benefit. The organization is an important model for other cities and deserves commendation and attention.

Charlotte Kahn, executive director of Boston Urban Gardeners, recently testified before the President's Commission on Americans Outdoors on the importance of her organization. I ask that her testimony be printed in the RECORD.

The testimony follows:

PRESIDENT'S COMMISSION ON AMERICANS OUTDOORS, PUBLIC HEARING, BOSTON, MA, APRIL 3, 1986

(Presented by Charlotte Kahn, Executive Director, Boston Urban Gardeners)

Boston Urban Gardeners began in 1976 as a volunteer organization dedicated to the creation and support of community gardens in Boston's low-income neighborhoods. Boston currently contains well over 100 community gardens. Through our efforts and the hard work of Boston residents, more than one million dollars worth of fresh produce is grown annually by those

who most need it. In addition, gardeners get exercise outdoors, can socialize with neighbors they may not have known before and provide the "eyes on the street" so essential to neighborhood safety and cohesion. The majority of Boston's urban gardeners are senior citizens; the vast majority are people of very limited income.

We also work closely with neighborhood multi-service centers, community development corporations and city and state agencies to rebuild and upgrade the quality of life in Boston's neighborhoods. For the past three years we have provided a very successful training program to unemployed Boston residents in landscape construction and urban land management, and are now offering training programs to Southeast Asian refugees and senior citizens in landscape management to help them participate in Boston's downtown development boom. These programs and others like them complement more conventional parks and recreation programs, providing an essential element of economic development to low income neighborhoods. We also work closely with other recreation and urban open space organizations to ensure that urban residents have access to a full range of active and passive recreational opportunities.

I personally, like many of my colleagues, spent several years working more than full-time as a volunteer, supporting myself at a minimal level with a part-time job. Those years were exhilarating, rewarding, successful and finally, exhausting and untenable as a strategy for a long-term commitment to enhancing the quality of life in Boston's low income communities.

Briefly, I would like to argue that volunteerism at best can supplement and complement but never substitute for the government's role in the provision of access to recreational lands and programs.

Particularly as regards recreational programs for low income people, volunteerism has serious limitations. It takes a great deal of time and money to be poor. People on low or fixed incomes do not have the luxury of sending out their laundry or bringing in babysitters and housekeepers to enable them to volunteer their time. Nevertheless, may people of low income are remarkably active in their churches, community gardens and neighborhood associations. The generosity of the poor is well known. However, to expect people of low income to take on roles traditionally and successfully performed by government agencies would in my experience be an exploitative, irresponsible, and finally, unsuccessful strategy for the provision of essential recreational opportunities in urban areas.

In particular, I would point to the federal Urban Parks Recovery Action Program, the Land and Water Fund, Community Development Block Grants, summer youth programs, and the National Park Service and urban mass transit as critical federal contributions. Without them, access to and full use of recreational land would be severely restricted.

Volunteerism, city and state programs, and private sector involvement must have a solid base and vision on which to build. Creative federal incentives and programs will continue to attract committed, generous and hardworking volunteers—with all of the new initiatives and supplementary resources required to reinvigorate our recreational lands and programs.

However, as a society which contains both unprecedentedly mobile and tragically disadvantaged populations, the federal government must provide the overview, incentives and resources to equitably address our region's diverse recreational needs.

(Note: Charlotte Kahn is also President of the Boston GreenSpace Alliance, a coalition of more than 45 organizations concerned with the natural environment and outdoor recreational opportunities in Boston's neighborhoods.)●

THE CRISIS IN SOUTH AFRICA

● Mr. SIMON. Mr. President, the Chicago Defender has provided constant and quality coverage of the ongoing crisis in South Africa. Recently the newspaper published a "Letter to the Editor" which underscores the need for the United States to continue to pressure the South African Government to change its apartheid policies. The letter raises an issue of increasing concern: that the repression practiced by the South African Government against its black citizens includes torture and imprisonment of that country's most vulnerable group—black children. Not only must we be aware of this horror, we must use every tool we have at our disposal to stop it. I ask that the letter be printed in the CONGRESSIONAL RECORD.

The letter follows:

URGES SPLIT OF UNITED STATES AND SOUTH AFRICA

DEAR EDITOR: The South African Ambassador to Britain, Dennis Worral, was quoted recently in the Chicago Tribune as having said, "There are instances in South Africa of persons, particularly youngsters, being subjected to torture in detention." His statement was buried in a longer article as if this latest barbarism should be considered normal behavior. Civilized people do not torture children.

The South African Ambassador's calm acknowledgement of what is done in South African prisons cannot cleanse the reality of such savagery as if to say, "Yes, we torture and kill kids, and, oh yes, how was the stock market today, and, Dear, when will dinner be ready?"

War is war, but a war against children? Is there no more horror in horror. Are we a people so jaded that we can no longer cry out against brutality. Or is it because the Blackness of these children's skins is supposed to provide immunity to pain when they are tortured?

Is the South African Ambassador to be given a prize for his truthfulness, or do we just hope that he will go away since knowing about these savage acts makes us accomplices if we refuse to sound the alarm.

Perhaps Franz Augerbach, the former president of the respected South African Institute of Race Relations, is correct in his statement to the *Daily Mail* of Johannesburg. He said, "If I were Black the figure of 1,200 dead in civil unrest—two-thirds at the hands of forces of law and order—might start looking like attempted genocide. It is (instead) the result of applying a military solution to a problem that needs a political solution."

We Americans, according to a recent Gallup Poll, are growing more sympathetic and supportive of South African Blacks. Of Americans watching the situation in South Africa, 73 percent said their sympathies lie with the Black population. This is up from 63 percent in October 1985 and 67 percent in August 1985. Only 12 percent sided with the South African government.

Yet President Reagan applauded the South African president at a national press conference on April 9, 1986. He said, "President Botha wants change and has made a number—taken a number of steps, as many as he can get away with. It's just like me dealing with the Hill up here." Mr. Reagan said further, "He has agreed with us that he finds the past system repugnant and is trying to get changes as quickly as possible."

Children are being tortured. It is not like "dealing with the Hill." Women whipped, dragged out by their feet, American missionaries beaten in front of churches, and churchgoers gassed by a regime that the American people have turned against. Yet President Reagan, who is grandiloquent about the sancitity of the family, apologizes for a regime that tortures children.

Americans are decent people, and we love our children. Tonight, when we, who are parents, tuck our children into bed, hopefully in ones that are warm and safe, we should recall that our government is in bed with a regime that admits torturing children, and says, in effect, "So what?"

If circumstances were different, those brutalized children could be our own.

I am a father. I love my children, and I love to see the happiness of other children. Children have the right to happiness. Any regime that tortures children, kills hope, happiness and life, must be excluded from the circle of humanity. Americans must say, "Enough. We do not join hands with child-torturers and killers. We will not be silent accomplices."

EDWARD L. PALMER,
President, Black Press Institute.●

RICHARD L. COX, JR., RECEIVES LAW DEGREE

(By request of Mr. DOLE, the following statement was ordered to be printed in the RECORD:)

● Mrs. HAWKINS. Mr. President, it is a pleasure to have this opportunity to recognize the accomplishments of Mr. Richard L. Cox, Jr., U.S. marshal for the middle district of Florida.

Richard Cox, a resident of Tampa, recently received his law degree from the Stetson University College of Law. Mr. Cox was able to complete this rigorous course of study by taking annual leave to attend mandatory classes and working nights and weekends. Because of his outstanding efforts, he is now one of nine U.S. marshals nationwide with a law degree. For this I congratulate him.

Richard has displayed great dedication and drive throughout his career. He is graduate of the U.S. Military Academy at West Point and served 20 years in the Army attaining the rank of lieutenant colonel. He has obtained a master of business degree from the University of Tennessee, has completed all the course work for a doctorate in economics, and has done postgraduate work in the area of managerial studies. Mr. Cox has also completed studies and received a certificate in criminology and law enforcement, and

taught as an adjunct professor at the University of South Florida, Florida State University, and the University of Tampa. These achievements are representative of Richard's character. I ask my colleauges to join me in congratulating Mr. Richard L. Cox, Jr., U.S. marshal for the middle district of Florida.●

MOYNIHAN ON LaROUCHE, STOCKMAN, COURAGE, AND CONVICTIONS

● Mr. HART. Mr. President, the recent issue of the New Republic includes an excellent article by our colleague, Senator DANIEL PATRICK MOYNIHAN.

Senator MOYNIHAN has identified a subtle and compelling connection between two troubling developments in American political life: The recent electoral successes by adherents of the insidious LaRouche sect and the revelations by the architect of Reaganomics, David Stockman. The connection drawn by the senior Senator from New York involves the breakdown of the ideological immune systems of the Democratic and Republican Parties.

Senator MOYNIHAN is a soldier of conscience from both battles. He was an early and outspoken critic of the LaRouche sect, and helped drive them out of the Democratic Party in New York when the prevailing attitude of some officials was benign somnolence. On Reaganomics, the record is equally clear: From the very beginning, Senator MOYNIHAN warned us that the math didn't work; that a defense buildup couldn't be paid for with a tax cut; that the promises of lasting prosperity and a balanced budget would not be realized, and that this prejudice masquerading as a philosophy was designed to undermine progressive government by people who hated government.

In both instances, Senator MOYNIHAN was right, and right early.

Mr. President, I commend this article, "Political Aids: Sick of Stockman and LaRouche," to all of our colleagues. I ask that it be printed in the RECORD.

The article follows:

POLITICAL AIDS: SICK OF STOCKMAN AND LaROUCHE

Political life in this century has been much influenced by esoteric and even concealed ideological movements. In common usage, ideology is taken to mean opinion, perhaps strongly held opinion. But it is something more: a kind of secular religion. As a largely apolitical society, the United States has not generated much by way of ideology. Various institutions, such as the labor unions, have had to ward off assault from assorted Marxist movements. But our political parties have been left largely untroubled. Now, though, this is changing. Our ideological immune system is not working very well in either party.

First the Democrats. The neo-fascist, Jew-baiting, conspiratorial ideas of Lyndon H. LaRouche Jr. pose an extraordinary danger to the Democratic Party. Not only have LaRouche candidates won the primary victories for lieutenant governor and secretary of state in Illinois, but this faction has made its way virtually unopposed into the Democratic congressional campaigns across the country.

This latest phase in the LaRouche movement began in New York City in 1981, when a LaRouche candidate entered the Democratic primary contest for mayor and was afforded all the honors and dignities attendant upon a legitimate aspirant to the party's nomination. This gave LaRouche a previously unimaginable legitimacy. John LoCicero, a political strategist for Mayor Koch in the 1981 campaign, said the LaRouche candidate's bona fides wasn't challenged because "it's not part of the democratic process." This is an honorable sentiment but calamitously wrong. The level of political literacy among the New York Democratic leaders was so low that no one understood who the LaRouchies were. They spoke a political language that the political classes of the city simply did not understand. When the LaRouche candidate was challenged by another "insurgent," on the ground of non-adherence to the principles of the Democratic Party, a state judge ruled that such a charge had to come from a party official. Which did not happen.

In 1982 a LaRouche candidate announced he would challenge me in the Democratic senatorial primary. We fought him from day one. A group of highminded New Yorkers had formed what Hodding Carter calls a "Fair Play for LaRouche Committee." That outfit suggested that my campaign manager, Tim Russert, had engaged in unfair campaign practices when he called the LaRouche movement "anti-Semitic." Our battle may have seemed quixotic to the political classes. They are rarely comfortable with ideological battle (which is more a disability than a dishonor). We declared that ideas matter to us, and I think the voters responded that ideas matter to them as well. We won handily.

And now to the Republican Party. I argued in these pages two-and-a-half years ago ("Reagan's Bankrupt Budget," December 31, 1983) that the unprecedented triple-digit deficits beginning in President Reagan's second year in office were deliberately created to force a great reduction in the size and activities of the federal government. Few believed me. More, perhaps, believed Friedrich von Hayek, mentor to a generation of conservative economists. Asked about our deficits by an Austrian magazine, von Hayek said in 1985 that he regretted them, but added: ". . . one of Reagan's advisers told me why the President has permitted [the deficits] to happen, which makes the matter partly excusable: Reagan thinks it is impossible to persuade Congress that expenditures must be reduced unless one creates deficits so large that absolutely everyone becomes convinced that no more money can be spent."

The disaster was not deliberate; the deficits were. The deficits were meant to spur action, but didn't, thereby resulting in disaster. We now have David Stockman's memoirs, "The Triumph of Politics: Why the Reagan Revolution Failed," which I believe confirm the theory.

The story: young David Stockman becomes a close adviser to the Reagan election campaign of 1980 and will soon be nominated to be director of the Office of Management and Budget. He is part of a foursome, along with Representative Jack Kemp, economist Arthur Laffer, and businessman Lewis Lehrman. They are advocates of "supply-side" economics, a school that proposes to stimulate the economy through private rather than public spending. To that end the foursome advocates large tax cuts.

These are heady young intellectuals. They can scarcely contain their energy or enthusiasm. But trouble soon appears within the group. Dr. Laffer's celebrated curve puports to demonstrate that tax cuts will generate so much additional revenue through the stimulated private economy that no reduction in government spending will be necessary to balance the budget. Young Stockman, however, wants to reduce spending: he is against big government on principle. In late August and September of 1980, Stockman begins to realize that the various theories scribbled on the supply-siders' napkins add up to an economic program far more radical than he had realized.

"If you implemented the Gold Standard Napkin and stopped inflation, Professor Laffer's Tax Cut Napkin didn't work. You would get more real economic growth but no gain in federal revenues. Consequently, only sweeping domestic spending cuts could balance the budget—an action that I believed was desirable but which the other supply siders had denied would be necessary."

At its 1980 convention, the Republican Party endorses both a 30 percent tax cut and a radical reduction in business taxes through more generous depreciation rules. Stockman discovers that to balance the budget, more than $100 billion per year in spending cuts will be necessary. Far from giving Stockman pause, though, the arithmetic excities him. It will force Congress to cut, and cut everywhere. "The idea of a real fiscal revolution, a frontal attack on the welfare state, was beginning to seem more and more plausible."

Enter, alas, the politicians, most notably Ronald Reagan. "The Cabinet was not disposed to . . . [a] patient attack on spending," Stockman notes, adding that "the President never had the foggiest notion." Stockman now admits it was his fault not to have aniticipated such a response. But at the time he saw it entirely as a failture on the part of the politicians. In his zeal, and zeal shines through his memoir, he could not imagine that they would not do what he had made it necessary for them to do. Well, they didn't and the rest in history.

The point is: Capitalism had become an ideology. Stockman's vacabulary is replete with terms we associate with ideology, with an intense belief system, a secular religion, He describes his migration from the student left, SDS and suchlike, to the Republican right in terms that are legitimately intellectual. But at times he also clearly crosses the line dividing measured judgment from radical conviction. He cites authors of meticulous clarity and caution with that element of fervor we associate with zealotry and even intolerance.

Because of his near-addiction to it, Stockman is an absorbing figures to a student of ideology. He goes on as if the Reaganities had appointed him a kind of party theorist responsible for doctrinal conformity. He describes the "organs of international aid" such as the World Bank as "infested with socialist error." He gives one chapter the title "The Coming of the New Order." He recalls supply-side publicist Judge Wanniski endlessly repeating that "over-turning an existing order starts wih one person and an

idea. An idea persuades a second person, then a third, then a fourth. . ." and he is reminded of Lenin's trip from Zurich to Russia in the boxcar. "I knew that Wanniski wasn't talking historical rot. Chain reactions occur in politics; the Soviet precedent, of course, was not exactly inspiring." Not exactly?

Most bizarre of all is Stockman's description of Irving Kristol. Kristol is perhaps the preeminent conservative intellectual of our age. But Stockman describes him, at their first meeting, as "a secular incarnation of the Lord Himself."

We have here a familiar phenomenon. Serious social thinkers such as Kristol come along with fresh insights. There is more, or less, to a set of existing arrangements than has been realized. Then a younger generation elevates thought into belief. Not only are the ideas of their mentors true, they are the Only Truth. Given by the Lord Himself, or his secular incarnation. What began as skepticism concerning perceived notions transmutes into fierce conviction. We have seen all too much of this in the 20th century.

I don't mean to disparage David Stockman's idealism. Unlike so many who pass for conservatives in this period, he is not an apologist for privileges access to public benefit. Just the opposite. His rage is directed more at those who gorge at such public troughs as the Export-Import Bank than at those who live on food stamps. The irony is that the first sort are the ones Stockman helped bring to power.

The "failure" of the Reagan Revolution has brought about horrendous structural changes in the American economy, which will be with us for at least the rest of this century. We are now, for example, a debtor nation. Our export economy is in ruins because of the run-up of the dollar. Our corporations hollow out as they transfer production facilities abroad. The national debt is so large that for an indefinite period it will require a third to a half of all revenue from the personal income tax to pay the interest. If the personal income tax is taken as an elemental tax on labor, and debt service an elemental return to capital, we have here the largest transfer of wealth from workers to owners in the history of our political economy. As Herbert Stein has noted, once Republican legislators found you could have a three-digit deficit and the heavens didn't fall—that day—there was no restraining them. Thus the week after enacting Gramm-Rudman, the Senate passed a $52 billion farm bill.

What Stockman discovered is that after a first round of budget cuts, directed mostly at the poor, Congress came up against the fact that the electorate wanted pretty much the government it was getting. No New Order emerged. To the contrary, something like a latter-day version of Mark Twain's Great Barbecue commenced. The late Jospeh Kraft captured the controlling principle of Washington in the 1980s in one word: greed.

Stockman watched his dream vanish, and slowly his faith began to weaken as well. He became less a radical, more a conservative, even if an embittered one. We have seen socialist ideals betrayed. Now, I suppose, we see capitalist ideals betrayed. The only thing worse than shortsighted, spendthrift, meddling congressmen, Stockman concludes, "is ideological hubris. It is the assumption that the world can be made better by being remade overnight."

We have in Washington today a political class incapable of recognizing a radical ideology when it is verily in the grips of one. Stockman is judged to have behaved badly, but not differently. He told untruths to Congress; he speaks unkindly of colleagues and disrespectfully of the president. That it was his ideas that mattered is a seemingly inaccessible thought. The 20th century has not been especially forgiving of such incapacity.—Daniel Patrick Moynihan (Daniel Patrick Moynihan, a Democrat, is the senior Senator from New York.)●

FRANKING COSTS—ONCE AGAIN

● Mr. QUAYLE. Mr. President, many of us were relieved when the House of Representatives deleted from the supplemental appropriations bill the $42 million for franking costs in fiscal year 1986. But now it turns out that there are no grounds for that feeling of relief. We have created such a marvel—perhaps such a monster—that we can spend the whole additional $42 million without ever having to appropriate one nickel—$0.05.

How can that be? Attached to my statement is a letter from the Comptroller General which states, in effect, that the Postal Service is required to absorb any franking costs that Congress does not fund. In other words, if we do not stick it to the taxpayer through a supplemental, we stick it to the postal patron through an increase in postal rates.

Mr. President, we cannot deal with the escalating costs of the frank through inaction. We also cannot deal with the matter through a Senate resolution such as the one reported from the Rules Committee (S. Res. 374) because that will not restrain the costs of the other body. The only way we can restrain franking costs in both Houses of Congress is by legislation—and I ask all my colleagues to support my initiative, S. 2272, the "Franking Cost Control Act" currently pending before the Rules Committee.

I ask that the text of the Comptroller General's opinion be printed in the RECORD.

The opinion follows:

COMPTROLLER GENERAL
OF THE UNITED STATES,
Washington, DC, May 2, 1986.

B-221498.26.

Hon. DAN QUAYLE,
U.S. Senate.

DEAR SENATOR QUAYLE: This letter is in response to the inquiry dated March 10, 1986, signed by you and Senators Pete Wilson, Phil Gramm, and Don Nickles, as to whether the Antideficiency Act (31 U.S.C. § 1341-1351) is violated when the cost as billed by the Postal Service of delivering congressionally franked mail exceeds the amount appropriated in a given fiscal year. In this respect, you point out that the amount appropriated for congressionally franked mail for fiscal year 1986, after reduction pursuant to the Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99-177), is $95.7 million while the estimated cost of handling congressional mail during the fiscal year is $146 million.

The Antideficiency Act prohibits an officer or employee of the Government from making or authorizing an expenditure or obligation in excess of the amount available in an appropriation or fund for the expenditure or obligation. It also prohibits commitments for the payment of money in advance of an appropriation unless otherwise authorized by law. 31 U.S.C. § 1341. For the reasons which are explained in greater detail in the enclosed Office of General Counsel staff discussion paper, we conclude that no violation of 31 U.S.C. § 1341 is incurred when the cost of handling franked mail exceeds the amount appropriated by the Congress to pay the Postal Service for handling the franked mail. This practice is authorized by 39 U.S.C. § 3216(c) which makes the lump-sum appropriation made to the legislative branch for payment to the Postal Service full payment for all matter mailed under the frank. Furthermore, absent later appropriations for additional costs incurred by the Postal Service for delivery of franked mail, the Postal Service is entitled to receive no more than the amount already appropriated by the Congress for fiscal year 1986 for payment for handling franked mail, as reduced by any sequestrations under Public Law 99-177.

Sincerely yours,

MILTON J. HOWLAN
(For Comptroller General of the United States).

OFFICE OF GENERAL COUNSEL STAFF
DISCUSSION PAPER

The evolution of the congressional franking privilege is discussed in the following passage from the report of the Senate Post Office and Civil Service Committee prepared in connection with Congressional franking reform:

BACKGROUND

"History

"The word 'frank' is derived from the Latin francus which means 'free.' the franking privilege denotes the right of a governmental official to send matter through the public mails free of postage. This privilege, as it applies to Members of Congress, is older than the Declaration of Independence itself, having been enacted by the Continental Congress on November 8, 1775. On October 18, 1782, the franking privilege was extended to letters, packets and dispatches to and from Members of the Continental Congress."

Franking Laws 1789 to Present

The First Congress enacted in 1789 practically the same laws as were in existence under the Continental Congress. In 1792, the law was changed to specifically include the Vice President, Members of the House and Senate, and assistants.

During the 1800's the franking privilege enjoyed by the Congress was alternatively broadened and limited depending upon the mood of the citizens. In 1845, legislation was passed conferring the right of the Secretary of the Senate and Clerk of the House of Representatives to use the franking privilege.

Due to alleged excessive abuses, the franking privileges for Congressmen were discontinued for a few years in the mid-nineteenth century.

Little was done until 1957 when the uniform date was established for termination of the right to use the frank by former Congressmen [on] June 30 following the expiration of their term of office * * * The privilege, with but the one exception, has continually been in effect for nearly 200 years.

Justification

The reasons underlying the franking policy are fundamentally sound. Free transmission of letters on governmental business is directly connected to the well-being of the people because of the nature of the legislative function. The franking privilege serves as an aid and auxiliary in informing the populace since most Members of Congress would be unable to afford correspondence with their constitutency in the absence of the privilege. It may also be stated that the use of franked mail for official business also provides an efficient means of posting since the Postal Service is not required to stamp and cancel franked mail. S. Rep. No. 93-461, 93d Cong., 1st Sess.[2]

The current statutory authority for Members of the Congress and others to use the franking privilege is set forth generally in chapter 32 of title 39, U.S.C. and 2 U.S.C. § 31b-4 (1982).

While use of the franking privilege means that costs are not paid by those entitled to use the frank, the costs obviously must be borne by someone. Until 1953 all costs connected with the frank were borne by the Post Office Department appropriations. These appropriations were funded by postal revenues and when these were inadequate, the deficit was made up out of the general fund of the Treasury. In 1953 the Congress first authorized lump-sum appropriations to pay the postage on mail sent under the frank. Act of August 15, 1953, ch. 511, § 2, 67 Stat. 614. Since the use of the frank itself was not limited, the practice initially followed was for the Post Office Department to request payment in the appropriation request submitted for the fiscal year following the fiscal year to which the billing applied. Congress then appropriated amounts it deemed sufficient based upon its determination of the propriety of the billing.[1] The amount appropriated was also immediately made available for payment to the Post Office rather than awaiting the beginning of the fiscal year of the act in which it was contained in order to make the funds available as soon as possible. This practice continues today.

In 1970, the United States Postal Service was established and the Post Office Department was abolished by the Postal Reorganization Act. Pub. L. No. 91-375, Aug. 12, 1970, 84 Stat. 719. The Postal Service at its first opportunity requested that Congress change the timing of payments to the Postal Service for its handling of franked mail. The Postal Service desired to shorten the time elapsed between when it handled the franked mail and when it received payment related to handling the franked mail. Thus it requested an end to the practice of requesting payment in the fiscal year appropriation following the fiscal year during which the service was rendered and upon which the request was based. Under the proposed new system, quarterly billings would be made based upon estimated volume. These estimated billings would be adjusted at the end of the fiscal year based upon actual volume.

Appropriations would thereafter be requested in advance based upon Postal Service estimates similar to the way Government agencies request operating appropriations. While the billings would be reconciled with actual volume of franked mail handled upon close of the final quarter, actual payments could not exceed appropriations. To address the problem of shortfalls caused by Postal Service under estimates in its initial budget request, or changes in the method employed by the Postal Service to determine its billing to the Congress, the Congress also adopted the practice of adjusting the final quarter's billing through use of the next fiscal year's appropriations. However, no requirement was imposed upon the Congress to appropriate funds to cover the adjusted billings and no effort was made to limit the use of the franking privilege.[2] In fiscal year 1982, the Postal Service began monthly billings for franked mail based upon one-twelfth of the amount of the appropriation for "Official Mail Costs" made for the fiscal year. The Postal Service also provides quarterly reports to show actual usage and to revise its estimate of actual yearly costs. Total billings may not exceed the amount appropriated. Any shortfalls are to be considered during the following fiscal year's appropriation request.[3] This is the current procedure.

DISCUSSION

At the time that the Postal Service proposed the change to the payment procedure to decrease the time between its rendering the service and receiving payment, Congress amended 39 U.S.C. § 3216 to provide:

"§ 3216. Reimbursement for franked mailings

(a) The equivalent of—

(1) postage on, and fees and charges in connection with, mail matter sent through the mails—

(A) under the franking privilege * * * by the Vice President, Members of and Members-elect to Congress, the Secretary of the Senate, the Sergeant at Arms of the Senate, each of the elected officers of the House of Representatives (other than a member of the House), the Legislative Counsels of the House of Representatives and the Senate, the Law Revision Counsel of the House of Representatives, and the Senate Legal Counsel; and

(B) by the survivors of a Member of Congress under section 3218 of this title; and

(2) those portions of fees and charges to be paid for handling and delivery by the Postal Service of Mailgrams considered as franked mail under section 3219 of this title; shall be paid by a lump-sum appropriation to the legislative branch for that purpose and then paid to the Postal Service as postal revenue. * * *

(c) Payment under subsection (a) * * * of this section shall be deemed payment for all matter mailed under the frank and for all fees and charges due the Postal Service in connection therewith."

Subsection (c) of this provision was new and for the first time expressly stated what had been implied since 1953—that regardless of the cost incurred by the Postal Service in handling franked mail, the amount the Congress appropriated to the Postal Service would be considered payment in full for that service.

Accordingly, exercise of the franking privilege without regard to amounts appropriated for payment to the Postal Service for this service is authorized by law and thus not a violation of 31 U.S.C. § 1341.[4] Members, therefore, are authorized to use the franking privilege and the Postal Service is required to handle franked mail regardless of the amount appropriated by the Congress for "Official Mail Costs." Should the actual costs of handling franked mail exceed the amount appropriated (as reduced by any sequestrations under Public Law 99-177), no violation of 31 U.S.C. § 1341 would occur since the amount appropriated is as a matter of law deemed full payment for all matter sent under the frank. Therefore, if the amount billed exceeds the amount appropriated, the Postal Service should be paid only the amount appropriated as reduced by sequestration, unless additional funds are provided by a supplemental appropriation.

DIGEST

No violation of 31 U.S.C. § 1341 is incurred when the cost of handling franked mail exceeds the amount appropriated by the Congress to pay the Postal Service for handling the franked mail. This practice is authorized by 39 U.S.C. § 3216(c) which makes the lump-sum appropriation made to the legislative branch for payment to the Postal Service full payment for all matter mailed under the frank. Furthermore, absent later appropriations for additional costs incurred by the Postal Service for delivery of franked mail, the Postal Service is entitled to receive no more than the amount initially appropriated for the fiscal year in question for payment for handling franked mail, as reduced by any sequestration under Pub. L. 99-177.●

---

[1] See H.R. Rep. No. 1557, 87th Cong., 2d Sess., accompanying the Legislative Branch Appropriations Bill for 1963, 8 (1962), *Legislative Branch Appropriations for 1962 Hearings before the Subcommittee of the Committee on Appropriations House of Representatives*, 86th Cong., 2d Sess. 273-274 (1961); H.R. Rep. No. 1607, 86th Cong., 2d Sess., accompanying the Legislative Branch Appropriations Bill, 1961, 4-5 (1960); and *Legislative Branch Appropriations for 1961 hearings before the Subcommittee of the Committee on Appropriations House of Representatives*, 86th Cong., 2d Sess. 293-296 (1960).

[2] See H.R. Rep. No. 92-937, 92d Cong., 2d Sess., accompanying the Legislative Branch Appropriations Bill, 1973, 10-11 (1972); *Legislative Branch Appropriations for 1973, hearings before a Subcommittee of the Committee on Appropriations House of Representatives*, 92d Cong., 2d Sess. 840-845 (1972); *Legislative Branch Appropriations, 1973, Hearings before the Senate Appropriations Committee*, 92d Cong., 2d Sess., 449-460 (1972). Rule XLVI of the House of Representatives limiting use of the frank by Members of the House under 39 U.S.C. § 3210(d) (relating to mass mailings) was adopted by the House on March 2, 1977 (H. Res. 287, 95th Cong., 123 Cong. Rec. 5952-5953) and currently constitutes the only limitation upon the amount of the use of the frank that we are aware of.

[3] See *Legislative Branch Appropriations for 1982 Hearings before a Subcommittee of the Committee on Appropriations House of Representatives*, 97th Cong., 1st Sess. 345-346 (1981).

[4] We note that the appropriation for "Official Mail Costs" in the annual Legislative Branch Appropriations Act is deemed postal revenue by virtue of 39 U.S.C. § 3216(a). Postal revenue is required by law to be deposited to the Postal Service Fund, 39 U.S.C. § 2003 (b)(1), and immediately appropriated to the Postal Service, 39 U.S.C. § 2401(a). Since the fund is a no-year revolving fund, it is available to pay all expenses incurred by the Postal Service in carrying out its authorized functions no matter when they are incurred. Thus the appropriation for "Official Mail Costs" once paid to the fund is available for payment of expenses of the Postal Service no matter when they were incurred.

We also note that 39 U.S.C. § 410(a) provides that Federal laws "dealing with public or Federal contracts, property, works, officers, employees, budgets, or funds" do not apply to the exercise of powers by the Postal Service unless as provided by 39 U.S.C. § 410(b) or some other provisions of title 39, U.S.C. The Antideficiency Act is not one of the laws listed in 39 U.S.C. § 410(b). No other provision of title 39, U.S.C. expressly makes the Antideficiency Act applicable to the Postal Service.

Thus it is clear that the Antideficiency Act is inapplicable to the Postal Service when billing Congress for handling franked mail.

THE CHEROKEE NATIONAL FOREST

● Mr. SASSER. Mr. President, in the months ahead, the Forest Service will near completion of over 100 plans for the management of 191 million acres of national forest land. The direction and emphasis established in these plans will have profound and far-reaching implications for the future of our public land resources. Congress has an obligation to ensure that each and every one of these plans upholds the highest and best uses for our national forest resources. I am therefore voicing my concern over the poor and imprudent planning by the U.S. Forest Service in the final plan for the Cherokee National Forest in Tennessee.

Last December, I expressed my concerns regarding the proposed final plan for the Cherokee National Forest. I urged the Forest Service then, as I had earlier in the planning process, to redirect the plan's emphasis from the single commodity management of timber to multiple use management. My urging, however, appears to have gone unheeded. The final plan, released by the Forest Service in April, leaves me no more convinced now than I was last December that the plan represents a balanced approach to forest management in the Cherokee National Forest.

Certainly, Mr. President, the final plan is an improvement over the draft plan. In particular, I am very pleased to see that the acreage recommended for either wilderness or wilderness study designation has been increased from 22,214 acres in the draft to 33,735 acres in the final plan. The Forest Service is to be commended for this and other significant changes in the final plan that reflect the concerns voiced during the public comment period.

However, the improvements to the plan are still inadequate in several regards.

The final plan calls for the almost exclusive use of clearcutting on the 61 percent of the forest that will be open to timber harvesting. In fact, less than 4 percent of the timber harvested will be done using any other harvesting method. Practically speaking, this means that over 2,000 acres of the Cherokee National Forest will be clearcut annually.

In justifying such heavy reliance on clearcutting, the Forest Service has said that clearcutting is the optimum method for managing Southern Appalachian forests. While clearcutting may be the Forest Service's optimum method, other Southern forest plans, such as the plans for the Chattahoochee National Forest in Georgia and the Pisgah-Nantahala National Forest in North Carolina, suggest it need not be as extensive as proposed for the Cherokee. In addition, while there may be a common acknowledgement of clearcutting's optimum value for timber management, there is no such consensus on its benefits in multiple use resource management.

The obvious aesthetic impact is only one of the criticisms of clearcutting. The negative impact of clearcutting on diverse biological species and wildlife habitats in the forest is another concern. For example, clearcutting of hardwood stands has been shown in certain areas to cause the conversion of hardwoods to pine monocultures. Clearcutting is also thought to reduce the food and den site availability to black bears. Given these and other impacts, I am troubled to see the Forest Service's blanket justification for clearcutting in the Cherokee. Indeed, there are numerous areas where an alternative harvesting method, such as shelterwood cutting, selective cutting, or group selection, would be a more desirable approach.

Mr. President, I am troubled that the Cherokee management plan continues the practice of selling timber below cost. The Forest Service in recent years has lost 62 cents for every dollar spent on timber management in the Cherokee. This amounts to annual losses from timber sales on the Cherokee National Forest alone of over $2 million. Yet, the final plan for the Cherokee continues this annual deficit by maintaining current timber harvest levels of 40 million metric board feet annually for the next 10 years.

This use of below cost timber sales is not exclusive to the Cherokee National Forest. According to the administration's own fiscal year 1987 budget request, the Forest Service's costs for timber and mineral activities nationally exceeded the Federal share of timber and mineral receipts in 1985 by $621 million. I would like to insert into the RECORD at the conclusion of my remarks an excellent article from the Wall Street Journal on April 18, 1986, that calls attention to this practice of below cost timber sales.

The final plan for the Cherokee National Forest should call for a gradual phaseout of timber sales below cost, except in site-specific instances where such sales would clearly yield noncommodity benefits. Such a phaseout would encourage the Forest Service to determine a long-term economically positive timber harvest level as well as reduce the proposed timber harvest volumes and the proposed road construction mileage in the final plan. An end to below cost timber sales would allow the $2 million annual timber subsidy on the Cherokee to be more wisely spent elsewhere in the forest. Trail construction, land acquisition, campground maintenance, and other resource protection measures that have been continually jeopardized by the Forest Service's timber management priorities would receive much needed attention.

Mr. President, in order to further enhance my understanding of what is at stake in this forest planning process, I plan to visit the Cherokee National Forest in the near future. I intend to get a firsthand look at the use of clearcutting and other Forest Service management practices. I also intend to meet with both Forest Service personnel and representatives of the five organizations that have recently appealed the final plan, so that I might have a better idea of where we should go from here.

The Cherokee National Forest is a magnificent natural resource with abundant recreational and resource potential. It is already among the top 20 most visited of the 155 national forests, with over 2.5 million visitors annually. In light of this, it seems imprudent of the Forest Service to advocate a final plan that emphasizes single commodity exploitation over stewardship activities. Additional emphasis can and must be directed toward tapping the tremendous scenic and recreational potential of the Cherokee National Forest. In the months ahead, I will work to ensure that the public's investment in our national forest lands is preserved to the fullest degree.

The article follows:

[From the Wall Street Journal, Apr. 18, 1986]

FOREST SERVICE'S SALES OF TIMBER BELOW COST STIR INCREASING DEBATE

(By Ken Slocum)

McCALL, IDAHO.—Ron Mitchell vividly recalls camping as a youngster at Poverty Flat Hole on the South Fork of the Salmon River near here and seeing the pool bottom black with migrating Chinook salmon up to 16 pounds.

But that was before 1965 when, under heavy rains, the mountainsides, scored by Forest Service roads, crumbled into the South Fork. It is regarded as one of the nation's worst wildlife disasters. This key spawning area for salmon migrating from the Pacific was turned into what one Senate witness termed "a river of sand."

Some 20 years later, with the fishing season still closed and the South Fork salmon population at minimum survival levels, Mr. Mitchell and others are fighting the Forest Service's plan to harvest logs on more hillsides above the South Fork.

What particularly galls them is that, by the agency's own figures, after it builds more roads into the area and sees to other details of the sale, revenue from the trees won't cover costs and taxpayers will be out some $2 million. "It's subsidized destruction," Mr. Mitchell fumes. "It's outrageous."

RALLYING CRY

The government's below-cost timber sales have become a rallying cry for environmental groups and sportsmen. Increasingly, the sales are being challenged as a subsidy that floods the market and depresses prices, hurting private timber growers and some producers of specialized wood products. Some people consider the sales a basic cause of a fundamental reshaping of the whole timber industry.

Much of the timber cut in the nation's 191 million acres of national forest, in fact, is

sold at a loss. An analysis of four Western regions by the General Accounting Office showed that 42% of Forest Service timber sales in 1982 didn't generate enough revenue to cover costs, costing taxpayers $92 million.

In two regions of the Rocky Mountains, over 96% of the sales didn't cover costs, the GAO found. Some sales apparently didn't even come close. Harvests in the Monongahela National Forest in West Virginia returned only 25 cents on every dollar spent, and harvests in the Beaverhead National Forest in Montana returned only 32 cents, according to an analysis of 1979–84 sales by the Wilderness Society. Wyoming's Bighorn National Park recovered a mere 21 cents on the dollar.

Bjorn Dahl, special-projects forester on policy analysis for the Forest Service, calls the figures inaccurate. He is working on an accounting system ordered by Congress to determine costs and revenues of timber sales.

AN OVERALL PROFIT

Overall, the Forest Service does make a profit on timber harvesting, with three-fourths of timber values coming from just one-third of the national forests, on the Pacific Coast. Below-cost sales are most common in the Rocky Mountains, where low rainfall, rugged slopes and unstable soils make lumbering the most difficult and expensive and where the damage to the winds is the greatest.

Lost taxpayer dollars aren't the main concern of environmentalists and sportsmen. "We're not the economic conscience of the country—we object to a lot of profitable timber sales, too," says Thomas Dougherty, a regional director for the National Wildlife Federation. "But when they plunder the wilderness and taxpayers have to shell out for it, you know there's a rat in the woodpile."

For its part, the Forest Service contends it is doing its job, which is to consider water quality, wildlife and recreation as well as the timber harvests. "With the financial resources we have to work with, we think we do the best possible job," says Robert D. Nelson, the director of Wildlife and Fisheries for the Forest Service.

Officials also contend that timber receipts don't accurately reflect the benefits. "Once we harvest an area, water flows, wildlife comes in and we develop a future investment of timber resource," says Mr. Dahl, the policy analyst. "The timber sale may lose money, but these other benefits aren't reflected."

ANOTHER VIEW

But what the Forest Service sees as a benefit is often viewed as a disaster by other experts. In the Bitterroot National Forest of Montana, for instance, Montana game officials are backing the National Wildlife Federation and another environmental group, The Defenders of Wildlife, in their efforts to stop a Forest Service timber sale along Tolan Creek in the southwest corner of the state.

The Forest Service offered timber from the area, some 9,400 acres of virgin, rugged mountainside, for sale in 1976, but lumber companies declined to bid on it. Then the Forest Service spent $312,000 of federally appropriated funds to break a 10-mile road into the wilderness to make it more attractive to lumber companies.

Besides providing access to the salable timber, the road will help in the removal of downed timber that fuels forest fires and will help the service in culling out trees susceptable to the mountain pine beetle, according to Robert Morgan, the supervisor of Bitterroot Forest. The Forest Service estimates that even after the government absorbs the cost of that road, timber receipts will fall $167,000 short of costs to build additional roads and to administer the sales.

But wildlife experts vigorously reject contentions that the Forest Service can harvest lumber in the wilderness without harming wildlife, particularly elk. "The Forest Service says the cut would benefit elk by providing more forage in the area," says John Firebaugh, the regional wildlife manager for Montana Fish, Wildlife and Parks. "Our position is there's adequate forage there now. The limiting factor for elk there is security—a place to hide from hunters."

Environmentalists and sportsmen are getting some outside support, particularly from small private growers. "All we ask for as small woodland owners is a chance to compete fairly," says Keith Argow, the president of National Woodland Owners Association, a federation of small growers. "We can't compete fairly when you've got this timber being subsidized one way or another." He says small growers, poorly organized, are finally banding together and one of their targets is the below-cost sales.

Small private timber owners (as contrasted with major land-owning timber companies) hold 58.4% of U.S. commercial timberland but produce less than half of harvested timber. Environmentalists would like to see more of the market shifted to private owners, with the national forests increasing their use to meet the rise of recreational needs.

Supporting this idea is Randal O'Toole, forest economist of Cascade Holistic Economic Consultants, a company frequently hired by civic or environmental groups to analyze figures used by the Forest Service to support timber sales. "The opportunity is there for private timber growers," he says. "If the Forest Service would phase out its subsidies, private owners would see prices go up and they would invest in their land instead of letting it lie idle."

But big lumber companies that buy sizable proportions of their lumber supplies from national forests argue that that isn't all that would happen. "If below-cost sales were banned tomorrow, timber supplies would decrease and prices would increase," argues Robert Morris, the resource manager for Louisiana-Pacific Corp., which buys about 27% of its supplies from the national forests. "Then, with increased prices, the American producer would be less competitive, and the Canadians would take a bigger share of the market than the 35% to 38% they have now." He adds, "We're no longer in a regional market, and a consumer in Los Angeles doesn't care whether he buys a two-by-four produced in Canada or the U.S."

Below-cost sales also draw fire from some officials of the specialty side of lumber products. Boise-based Trus Joist Corp. says that as a producer of laminated construction trusses it is the biggest purchaser of high-strength structural timber in the country. Walter C. Minnick, the president, says that because of a growing oversupply of wood fiber, at least partly as a result of below-cost sales, wood fiber is priced at half the 1979 levels, after allowing for inflation. This obviously benefits Trus Joist in its raw-material costs.

But overall, the company is hurt, Mr. Minnick says. "The whole effort . . . among manufacturers of products made from wood is to develop engineered products to do a given structural job with less wood," he says. "But when wood is artificially cheap, the incentives are diminished. By retarding our technological development, we impede our ability to compete internationally."

Clearly, environmentalists' attacks and public resistance are slowing the pace of below-cost sales in the nation's forests. "There's been some shift by the Forest Service, but we haven't yet stanched the tide of below-cost sales," asserts Henry Fischer, a Rocky Mountain field representative.

THE MEN AND WOMEN OF OUR ARMED FORCES

● Mr. GOLDWATER. Mr. President, for several years now, I have been saying that the young officers and enlisted men and women of our armed services are dedicated, loyal, and hard working people. The overwhelming majority of these people are willing and able to make personal sacrifices for the betterment of their unit and their country. These young people are the first line of defense whenever and wherever our country may need them, and they are up to any task which may be imposed upon them.

Recently, a very good friend of mine received a letter from one of these young soldiers which exemplifies the loyalty, dedication, concern, and hard work which instills pride in themselves and pride in us for having such capable people. In reading this letter, I could not help but be struck by the fact that if our country is to succeed in maintaining its position as the "Bastion of Freedom," then we surely have cause for hope. I cannot tell you in words the feelings that this letter aroused in me. Just to be able to be a small part of this soldier's feelings, hopes, and aspirations has given me a sense of mission accomplished.

Mr. President, in order that all of my colleagues and everyone else interested in the welfare and morale of our troops may understand the perspectives of our young service men and women, I ask that the letter be printed in the RECORD.

The letter follows:

APRIL 9, 1986.

DEAR GENERAL: It's hard to believe that a year has passed since you were kind enough to travel down to Fort Benning and honor us with your presence at our One Station Unit Training graduation.

In that year, many good things have happened for our soldiers and the 4th Battalion. The Buffalo's have, in Major General Harrison's words, "done everything I've asked of them and more, and done it all well." In so doing, I am proud to report to you that I truly believe we have lived up to these expectations you charged us with one year ago—to tell the truth no matter the situation, to show courage in every action we undertook, for the good of the Regiment.

In the year, we have:

Taken ARTEPS from battalion down to squad level, and done well in them all.

Afforded our soldiers with the 118 MOS the opportunity of earning the Expert Infantryman's Badge, and 143 of them did.

Led the 7th Infantry Division (Light) in MOS testing, thus affording our NCO's with increased opportunities for promotion.

Participated in Operation Celtic Cross III in August, 1985 successfully, with the distinction of conducting difficult missions for the Division when only 4½ months in being.

Conducting the first Division EDRE (Emergency Deployment Readiness Exercise) for a company-sized unit under the light division concept.

Winning the Commanding General's Marksmanship Award (The Stilwell Cup) for being the finest shooting battalion with combined scores on the M-16, M-60M1 and .45 caliber pistol.

Setting the standard for the Division with a Personal Actions Center (PAC) that truly leads the Division in areas of soldier care and concern such as EER's and personnel assistance.

Made the soldiers of the Buffalo battalion proud of themselves and their unit, and, in so doing, hopefully letting them see, firsthand, that in the Army you truly can "be all that you can be." Thus, it has been a great and wonderful year for me and, I pray, for the vast majority of our soldiers in the Battalion.

As you can see from the return address, we are now in Panama for the Army's three week Jungle Operations Training Center program of instruction. We brought along with us, with 3d Brigade's blessing, our entire combat slice of artillerymen, air defenders, MPs, engineers, medics and other branches that comprise a "go to war" task force.

The soldiers are literally eating the training up, and are doing very well. This is our first OCONUS deployment, so for many it is their first trip to a foreign country. We're trying to balance tough, realistic training with the opportunity to learn about not only a historic locale for Americans (we're only 6 miles from Gatun Lake and the Panama Canal) but also to learn about a region that is obviously of increasing importance to the United States. I think we are succeeding.

In rereading, this letter sounds way too much like an ego building trip for me. I really do not mean for it to be. What I really want to leave you with is the thought that the soldiers are proud and truly capable, their leadership dedicated and professional, and that I think you would feel right at home with the Buffalo Battalion.

My best wishes to your wife. Please keep us in your thoughts, and know that we are doing our best for the Army and our country.

Sincerely.●

NATIONAL HISTORIC PRESERVATION WEEK

● Mr. DOMENICI. Mr. President, the week of May 11 to 17 marks the 14th annual National Historic Preservation Week. But this year's celebration is particularly significant because it coincides with the 20th anniversary of 1966 National Historic Preservation Act, creating the National Historic Preservation Fund. This law will be up for reauthorization next year, and so I think this is a good time to reflect upon the idea of historic preservation and the need to continue our efforts in this area.

In 1965, the Special Committee on Historic Preservation made some recommendations which have served as an inspiration for States to establish their individual historic preservation programs. The committee stated: "If we wish to have a future with greater meaning, we must concern ourselves not only with the historic highlights, but we must be concerned with the total heritage of the Nation and all that is worth preserving from our past as a living part of the present." There is so much truth to these words. They make me appreciate the importance of preserving as much of our past as we can.

Appropriately enough, the theme for this year's program is "Celebrate Historic Places, Our Past for Our Future."

In New Mexico, we are fortunate to have a culturally rich and diverse history. We have a combination of the Indian, Spanish, and Anglo cultures. I'm proud to say that New Mexico's historic preservation program is one of the most active in the United States, and I have strongly supported its countless and ongoing renovation and restoration projects. Both Federal and State tax credits for historic preservation have been invaluable in this regard.

One of New Mexico's richest historical treasures are its mission churches, which exemplify the mixture of Spanish and Indian cultures and styles. Our State's historic preservation program, in cooperation with citizens and the Archdiocese of Santa Fe, has been involved in the identification, analysis, restoration, and maintenance of historic churches, specifically the San Francisco de Asisi Church in Ranchos de Taos and the San Jose de Gracia Church in Las Trampas. In fact, it was just a few weeks ago that dozens of parishioners and volunteers joined together to replaster and remud the adobe structure of the San Jose de Gracia Church, which is a national historic landmark.

Another of our State's treasures are its prehistoric Indian petroglyphs. In Albuquerque, more than 10,000 petroglyphs have been fully identified, and there are plans for protection of this resource.

In Las Vegas, San Miguel County, new life and vitality has been brought to its downtown area as a result of the La Plaza Vieja redevelopment effort to redevelop 19 historic buildings for retail and office tenants. The saving of these buildings mean new businesses and jobs for Las Vegas and will increase the town's appeal as a tourist attraction.

In Rio Arriba County, near the town of Velarde, another of New Mexico's most important examples of its culture and heritage is nearly complete—the reparation of the 200-year-old acequias irrigation system. The acequias have been a lifeline for generations of New Mexicans around Velarde for as far back as the 1700's, and farmers depend on them just as much now as they did then. In 1983, I worked to include the initial funding for this project as part of the Energy and Water Appropriation Act.

Almost anywhere you travel in New Mexico there are efforts to preserve its history. Increasingly, there is a real understanding that we must keep a little piece of the past—that we must maintain our sense of identity if we are to move on into the future. In fact, in towns like Las Vegas, it is evident that preserving our heritage can actually be a catalyst for the future growth of our communities.

We in the Land of Enchantment feel a tremendous sense of pride and joy in our tricultural heritage, and I commend New Mexicans for their dedication to preserving it.●

NAUM AND INNA MEIMAN

● Mr. SIMON. Mr. President, I was honored to be able to participate in this morning's reception in honor of a man whose courage is matched by few, Natan Shcharansky. Mr. Shcharansky demonstrated his wit and his eloquence and proved himself to be the hero that he has been called.

Mr. Shcharansky was a founding member of the Helsinki Watch Group, along with my friend, Naum Meiman of Moscow. As gratifying as it was to see Mr. Shcharansky a free man, I am gravely concerned about the fate of Naum and his wife, Inna, who are still held in the Soviet Union.

Naum and Inna deserve to live the remainder of their lives in Israel. As human beings, we must all have the choice of where we wish to reside.

I strongly encourage the Soviets to allow Inna and Naum to emigrate to Israel.●

THE PRODUCT LIABILITY VOLUNTARY CLAIMS AND UNIFORM STANDARDS ACT

● Mr. DODD. Mr. President, today I am delighted to join Senator DANFORTH in the introduction of a product liability amendment that I think will eliminate the major differences between consumers and businesses and enable us to take a productive step toward solving the product liability crisis.

While this new paragraph moves away from the creation of a new standard for the recovery of lower damages—which was included in both my original product liability amendment and in Senator DANFORTH's bill, S. 1999—it adopts an approach that

should be beneficial for both consumers and businesses.

The incentives to settle in this amendment, particularly in serious injury cases, are so strong that businesses should be encouraged to settle in both open and shut cases and in cases that are near the margin. At the same time, since the bill does not change basic State standards for recovery, businesses that sincerely doubt the legitimacy of a claim would be able to contest such a claim. The greater inducements for rapid settlements for net economic loss plus pain and suffering in serious and permanent injury cases should dramatically reduce the time between injury and compensation and provide for similar compensation for similarly injured people. Moreover, speedier settlements should reduce the huge transaction costs that plague the present system, on both the plaintiff's and defendant's sides.

For businesses, the bill assures them that if they are willing to settle a case, they will be able to do so for net economic loss plus a maximum of $250,000 in very serious injury cases. Moreover, an offering business would be jointly liable only for the claimant's net economic loss and not for pain and suffering that liability would be limited to the business' proportionate contribution.

Mr. President, this bill is not perfect. Not surprisingly, I would prefer to have followed the path of my original legislation, but as I've said time and time again, we must not let the perfect be the enemy of the good. I think this amendment represents a major step forward in product liability law, one that will help both consumers and businesses, and I heartily endorse it.●

CONTRIBUTIONS OF MR. LEONARD LONDON

● Mr. LAUTENBERG. Mr. President, I would like to bring to my colleagues' attention the outstanding contributions of Mr. Leonard London, a dedicated and active member of the New Milford community in New Jersey. On May 18, the New Milford Jewish Center will honor Mr. London for his unparalleled service to the New Milford Jewish Center, the Jewish community in general, and to the town of New Milford.

Mr. London has demonstrated rare and admirable dedication to the Jewish community in New Milford through his many years of service to the New Milford Jewish Center. He has served a series of terms on the board of directors and has served two terms as its president. He has also chaired the New Milford Jewish Center's Board of Education as well as its youth groups.

Mr. London's hard work and dedication have benefited all those who use the facilities of the New Milford Jewish Center. His efforts have enhanced the synagogue as well as the religious school. And his hard work has benefited both the youth and elderly who participate in the multitude of programs offered at the community center.

But Mr. London has done more than serve and strengthen the Jewish community in New Milford. He has dedicated nearly 20 years of his life to the U.S. military. He has served one term on the board of the Borough of New Milford, and he ran the New Milford Blood Program for 5 years. Currently, he is a member of the zoning board for the Borough of New Milford as well as a member of the auxiliary police force.

It is fitting that Mr. London receive this great honor from the New Milford Jewish Center. Through his many years of service to the New Milford Jewish Center, Mr. London has demonstrated a deep understanding of how important it is to take responsibility for strengthening one's community. And through his active participation in the town of New Milford, Leonard London has shown time and again how important it is for citizens to bring their values to bear the community at large. Mr. London's dedication to the town of New Milford is a fine example for all of us to follow.●

ORDERS FOR TOMORROW

RECESS UNTIL 9 A.M.

Mr. HATCH. Mr. President, I ask unanimous consent that once the Senate completes its business today it stand in recess until 9 a.m. on Wednesday, May 14, 1986.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF CERTAIN SENATORS

Mr. HATCH. Mr. President, following the recognition of the two leaders under the standing order, I ask unanimous consent that the following Senators be recognized for not to exceed 5 minutes each for special orders: Senators BYRD, HAWKINS, CRANSTON, WILSON, GORE, SASSER, BIDEN, and PROXMIRE.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. HATCH. Following the special orders just identified, I ask unanimous consent there be a period for the transaction of routine morning business not to extend beyond 10 a.m., with Senators permitted to speak therein for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. HATCH. Mr. President, at 10 a.m., the Senate will resume consideration of S. 1848, the drug export bill. By previous unanimous-consent agreement, final passage must occur prior to 2 p.m. Therefore, votes will occur throughout the day on Wednesday. Following the disposition of S. 1848, the drug export bill, it will be the majority leader's intention to turn to Calendar No. 638, S. 2395, the military uniformed services retirement bill.

Mr. President, I ask unanimous consent that after the Senate resumes consideration of S. 1848, the drug export bill, a final passage vote occur no later than 2 p.m.

Mr. BYRD. Mr. President, there is no objection to this request. I thank the distinguished acting Republican leader, and I am sorry that I was off the floor and caused him to delay. I thank him. As to the 5 minutes, I do not need it for myself but I want a cushion to give time to any Senator on either side who might like to have it. I thank the distinguished Senator. There is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

□ 1700

RECESS UNTIL 9 A.M. TOMORROW

Mr. HATCH. Mr. President, I ask unanimous consent that the Senate stand in recess in accordance with the previous order.

There being no objection, at 6:54 p.m., the Senate recessed until tomorrow, Wednesday, May 14, 1986, at 9 a.m.

HOUSE OF REPRESENTATIVES—*Tuesday, May 13, 1986*

The House met at 12 noon.

The Reverend Dr. A. Dale Patterson, East Brent Baptist Church, Pensacola, FL, offered the following prayer:

Heavenly Father, as I bow before You in this place, with these great people whom You have ordained to lead us, we give You thanks. Thank You for being the giver of good gifts. Thank You for who You are.

We acknowledge that You are indeed the Ruler of all nations. To all nations grant peace which will transcend every human barrier. We pray for worldwide justice to all people.

We lift our Nation up to You, our Father. We ask for Your guidance in every decision; Your protection by day and by night; Your provision in every area of our lives; and Your presence always with us.

These things we ask to glorify Your holy name; in the name of our Lord, Jesus Christ. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. STRANG. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. STRANG. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 258, nays 121, not voting 54, as follows:

[Roll No. 119]

So the Journal was approved.

The result of the vote was announced as above recorded.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Hallen, one of its clerks, announced that the Senate had passed without amendment a bill of the House of the following title:

H.R. 4767. An act to deauthorize the project for improvements at Racine Harbor, WI.

DR. DALE PATTERSON

(Mr. HUTTO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUTTO. Mr. Speaker, I am very proud to ask my colleagues to join me in welcoming our guest chaplain for

today, Dr. Dale Patterson of Pensacola, FL.

Dr. Patterson, a native of Mississippi, now pastors at the East Brent Baptist Church in Pensacola. East Brent is the fifth church Dale has served since his ordination in 1962. He attended the New Orleans Baptist Theological Seminary and received his master of divinity in 1977 and his doctorate of ministry in 1979.

Dale epitomizes the word "pastor" in the truest sense by the manner in which he cares for his people. Under his leadership for the past 4 years, the church has experienced phenomenal growth in membership, staffing, and building programs. In the past 18 months alone, 205 adult families have joined East Brent. This growth is without a doubt attributed to his genuine love and concern for the members of his congregation. More than once he has gone the extra mile to serve—waking at 3 in the morning in order to make a 5-hour drive to Birmingham, AL, in time to be with a family whose loved one was to have surgery at 9 o'clock and then back to Pensacola for evening services.

His love of God and genuine belief that his strength and success in pastoring is, indeed, in the hands of his Lord are heartwarming in today's hectic world. His family consists of two sons and daughters-in-law, a grandson, a granddaughter, and Louise, his loving wife of 25 years who is here with him today.

□ 1225

REPORT ON CONCURRENT RESOLUTION SETTING FORTH CONGRESSIONAL BUDGET FOR FISCAL YEARS 1987, 1988, AND 1989

Mr. GRAY of Pennsylvania, from the Committee on the Budget, submitted a privileged report (Rept. No. 99-598, Part I) on the concurrent resolution (H. Con. Res. 337) setting forth the congressional budget for the U.S. Government for the fiscal years 1987, 1988, and 1989, which was referred to the Committee on Rules pursuant to subsection 301(c) of the Congressional Budget Act of 1974, as amended (Public Law 93-344, as amended by Public Law 99-177), for a period not to exceed 5 legislative days, for consideration of such portions of the concurrent resolution as fall within that committee's jurisdiction pursuant to clause 1(q), rule X, and ordered to be printed.

PERMISSION FOR COMMITTEE ON INTERIOR AND INSULAR AFFAIRS TO SIT TOMORROW, WEDNESDAY, MAY 14, 1986, DURING 5-MINUTE RULE

Mr. RAHALL. Mr. Speaker, I ask unanimous consent that the Committee on Interior and Insular Affairs be permitted to sit tomorrow, Wednesday, May 14, 1986, during the 5-minute rule.

This request has been cleared with the minority.

The SPEAKER pro tempore (Mr. MONTGOMERY). Is there objection to the request of the gentleman from West Virginia?

Mr. DIOGUARDI. Mr. Speaker, reserving the right to object, I would ask the gentleman, with whom has this been cleared?

Mr. RAHALL. Mr. Speaker, if the gentleman will yield, this has been cleared with the ranking minority member, the gentleman from Idaho [Mr. CRAIG], and has been, I understand, with the ranking minority member on the full Committee on Interior and Insular Affairs.

Mr. DIOGUARDI. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

LEGISLATION INTRODUCED TO REPEAL ONE-WAY TOLL ON VERRANZANO BRIDGE

(Mr. WEISS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEISS. Mr. Speaker, today along with nine of my colleagues from New York and New Jersey of both political parties, I am introducing legislation to repeal the congressionally mandated, one-way toll on the Verrazano Bridge between Staten Island and Brooklyn in New York City.

That bridge was built and is maintained entirely with local funds. It connects one part of New York City with another. Yet, last fall, Congess making a serious mistake, both substantively and in violation of the basic principles of federalism, forced the city to change to a one-way toll; ignoring the city's pleas, disrupting traffic patterns and dumping Staten Island's traffic problems onto the congested streets of downtown Manhattan, Elizabeth, Roselle Park, and other communities in New Jersey and the Gowanus Expressway in Brooklyn.

Just after 1 month of this mandated 6-month experiment, the traffic plan is an unqualified disaster. According to the Metropolitan Transit Authority, some 4,000 extra vehicles have been handed a toll-free round trip and try to squeeze through the Holland Tunnel each day, aggravating traffic problems throughout the region.

The only way to remedy this disaster and to correct our mistake is to repeal the law. I urge my colleages to support this bill to do so.

PROVIDENCE HOSPITAL COMMEMORATIVE PLAQUE ACT

Mr. HOWARD. Mr. Speaker, I ask unanimous consent that the Committee on Public Works and Transportation be discharged from further consideration of the bill (H.R. 4382) to require the Architect of the Capitol to place a plaque at the original site of Providence Hospital, and ask for its immediate consideration in the House.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

Mr. SHAW. Mr. Speaker, reserving the right to object, I do not intend to object but I take this time for the purpose of yielding to the gentleman from Missouri [Mr. YOUNG] so he might be able to describe the bill to the House.

Mr. YOUNG of Missouri. I thank the gentleman for yielding to me.

Mr. Speaker, in celebration of the 125th anniversary of Providence Hospital, the Sisters of the Daughters of Charity of St. Vincent de Paul are seeking permission to erect a commemorative plaque at the original site of the hospital. This site is currently part of the Capitol Grounds and is located at Second and D Streets SW. The bill authorizes the Architect of the Capitol to acquire or to accept by donation and to erect on the site an appropriately inscribed plaque and pedestal designating this as the original site of Providence Hospital. There would be no cost to the Government for the plaque, its pedestal, or its erection on the site.

Mr. SHAW. Mr. Speaker, further reserving the right to object, I yield to the gentleman from Virginia [Mr. BLILEY], the author of the bill.

Mr. BLILEY. I thank the gentleman for yielding to me.

Mr. Speaker, I would like to thank the chairman of the subcommittee for his assistance in moving this bill through markup and bringing it to the floor today. The subcommittee took care to ensure that H.R. 4382 was properly drafted to effect its purpose. I concur in its judgment that the amendments offered by my colleague from Florida were necessary and appropriate.

I know that the Daughters of Charity and staff at Providence Hospital are also grateful for the subcommittee's efforts, especially so because they have been planning the dedication of this plaque as one of the events to commemorate Providence's 125th anniversary. Upon House and Senate approval of this bill, they may do so. For the other Members information, that event will be this Saturday, May 17.

Mr. HOWARD. Mr. Speaker, I rise in support of H.R. 4382 and at this time would like to commend the chairman of the Subcommittee on Public Buildings and Grounds, the gentleman from Missouri [Mr. YOUNG], and the rank-

ing minority member of the subcommittee, the gentleman from Florida [Mr. SHAW], for their fine work in bringing this bill before the House today.

Mr. Speaker, H.R. 4382, a bill entitled the Providence Hospital Commemorative Plaque Act authorizes the Architect of the Capitol to place a plaque at the original site of Providence Hospital, currently part of the Capitol grounds. Providence Hospital was located on this site during the years 1861 through 1956. Founded in 1861 by the Daughters of Charity of St. Vincent de Paul from Emmitsburg, MD, they have requested passage of this legislation as part of their 125th anniversary celebration of Providence Hospital. The cost associated with the preparation of the plaque and pedestral will be borne by the Daughters of Charity at Providence Hospital.

Mr. Speaker, passage of H.R. 4382 is a small tribute we can pay for all the invaluable years of service the Daughters of Charity have given to the Washington community.

Mr. Speaker, I urge enactment of H.R. 4382.

Mr. SHAW. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The Clerk read the bill, as follows:

H.R. 4382

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Providence Hospital Commemorative Plaque Act".

SEC. 2. PURPOSE.

The purpose of this Act is to commemorate Providence Hospital for providing 125 years of service to the District of Columbia by authorizing the placement of a plaque at the original site of the Hospital.

SEC. 3. PREPARATION OF PLAQUE.

(a) REQUIRED SPECIFICATIONS.—The Architect of the Capitol shall prepare or accept by donation a plaque that—

(1) is 36 inches in width and 24 inches in height;

(2) displays on the left one-third of the plaque a bas-relief of Providence Hospital as it existed in 1866; and

(3) displays on the right two-thirds of the plaque the following language in caslon typeface:

"ORIGINAL SITE OF PROVIDENCE HOSPITAL

"Providence Hospital was located on this site during the years 1861 through 1956. Founded in 1861 by the Daughters of Charity of Saint Vincent de Paul from Emmitsburg, Maryland, the hospital was chartered by an Act of Congress in 1864.

"During the Civil War, while other hospitals in Washington, D.C., were filled with war casualties, Providence Hospital had the special mission of providing care primarily to the civilian population. Originally located in a private home, the hospital moved in 1866 to the more permanent quarters illustrated on this plaque.

"On this site, Providence Hospital opened the area's first surgical amphitheater in 1882, inaugurated the first social service department in 1894, and opened the first contagious ward in 1898.

"Providence Hospital moved to its present location at 12th and Varnum Streets, NE, in 1956.".

(b) DISCRETIONARY SPECIFICATIONS.—The Architect of the Capitol shall—

(1) prepare the plaque described in subsection (a) with such additional specifications as the Architect determines to be appropriate for carrying out the purpose of this Act; or

(2) require any such plaque that is donated to comply with such additional specifications.

SEC. 4. MOUNTING OF PLAQUE.

The Architect of the Capitol shall mount any plaque prepared or accepted by donation under section 3 on a pedestal to be built in accordance with section 5.

SEC. 5. CONSTRUCTION OF PEDESTAL.

(a) LOCATION.— The Architect of the Capitol shall construct a pedestal at a location that approximates the location of the main entrance of Providence Hospital as it existed in 1866 or, if the Architect of the Capitol determines that such location is not practicable, at a nearby location on the original site of Providence Hospital.

(b) SPECIFICATIONS.—The pedestal referred to in subsection (a) shall be constructed with such specifications as the Architect of the Capitol determines to be appropriate for carrying out the purpose of this Act.

SEC. 6. PAYMENT OF EXPENSES.

(a) IN GENERAL.—The United States may not pay any expense of the preparation and mounting of the plaque or the construction of the pedestal under this Act.

(b) DONATION OF FUNDS.—The Architect of the Capitol shall carry out this Act only if sufficient funds are donated for such purpose.

AMENDMENTS OFFERED BY MR. HOWARD

Mr. HOWARD. Mr. Speaker, I offer several amendments, and I ask unanimous consent they be considered en bloc.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the amendments.

The Clerk read as follows:

Amendments offered by Mr. HOWARD: Page 2, strike lines 1 through 3 and insert the following:

SEC. 3. SPECIFICATIONS FOR AND INSTALLATION OF PLAQUE.

(a) SPECIFICATIONS.—The Architect of the Capitol is authorized to acquire by purchase or donation a plaque that—

Page 3, strike lines 3 through 25 and insert the following:

(b) MOUNTING OF PLAQUE.—The plaque described in subsection (a) shall be mounted on a pedestal to be constructed according to such specifications as the Architect of the Capitol determines are appropriate for carrying out the purposes of this Act.

(c) INSTALLATION.—Such plaque and pedestal shall be installed by the Architect of the Capitol at a location on the original site of Providence Hospital that is as near as practicable to the location of the main entrance of such hospital as it existed in 1866. If such location is required for other purposes by the Congress, the Architect of the Capitol may place such plaque on or near any new building erected on such site.

(d) MAINTENANCE.—The Architect of the Capitol shall maintain the plaque and pedestal installed under this section as part of the United States Capitol Grounds.

SEC. 4. PAYMENT OF EXPENSES.

(a) AUTHORITY TO ACCEPT GIFTS.—Notwithstanding any other provision by law, the Architect of the Capitol is authorized to accept and administer on behalf of the Congress gifts and bequests of money for the purpose of acquisition, preparation, and installation of the plaque and pedestal described in section 3.

(b) TREATMENT OF GIFTS FOR TAX PURPOSES.—For the purpose of Federal income, estate, and gift taxes, any gift or bequest accepted by the Architect of the Capitol under this Act shall be deemed to be a gift or bequest to or for the benefit of the United States.

(c) OBLIGATIONS AND EXPENDITURES.—The Architect of the Capitol is authorized to incur all obligations and to make all expenditures as may be necessary to carry out the purposes of this Act without regard to section 3709 of the Revised Statutes (41 U.S.C. 5).

(d) ESTABLISHMENT OF ACCOUNT.—All gifts and bequests of money received for the purpose of this Act shall be deposited by the Architect of the Capitol in a special account established by the Secretary of the Treasury and shall be subject to immediate disbursement as needed by the Architect in order to carry out this Act.

(e) REPORT.—The Architect of the Capitol shall submit to the Congress a final report of the money received and expended by him in carrying out this Act.

Page 4, strike line 1 and insert the following:

SEC. 5. LIMITATIONS.

Page 4, line 3, strike "preparation" and insert "acquisition, preparation,".

Mr. HOWARD (during the reading). Mr. Speaker, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The SPEAKER pro tempore. The question is on the amendments offered by the gentleman from New Jersey [Mr. HOWARD].

The amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

□ 1235

PERMITTING 1986 SPECIAL OLYMPICS TORCH RELAY TO BE RUN THROUGH CAPITOL GROUNDS

Mr. HOWARD. Mr. Speaker, I ask unanimous consent that the Committee on Public Works and Transportation be discharged from further consideration of the concurrent resolution (H. Con. Res. 311) to permit the 1986 Special Olympics Torch Relay to be run through the Capitol Grounds, and ask for its immediate consideration in the House.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

Mr. SHAW. Mr. Speaker, reserving the right to object, I do not intend to object, but I take this time for the purpose of yielding to the gentleman from New Jersey [Mr. HOWARD] for an explanation of the resolution.

Mr. HOWARD. I thank the gentleman for yielding, and I also thank the gentleman for his cooperation on this legislation.

Mr. Speaker, House Concurrent Resolution 311 authorizes the 1986 Special Olympics Torch Relay to be run through the Capitol Grounds as part of the journey of the special olympic torch to the District of Columbia Special Olympics spring games to be conducted at Gallaudet College, in the District of Columbia, on or about May 30, 1986.

Mr. Speaker, there is a provision in the law prohibiting torches from being carried on the Capitol Grounds, I imagine because of what happened in 1812. We did have to pass special legislation in 1984 so that the Olympic torch could be carried through the Capitol Grounds on its way to the Olympics in Los Angeles. This resolution does the same thing for the Special Olympics to be held at Gallaudet.

Mr. SHAW. Mr. Speaker, further reserving the right to object, at this time I would inquire of the gentleman from New Jersey, I would assume that the carrier of this torch must not be wearing a red coat; is that correct?

Mr. HOWARD. I certainly presume that that will not be the case, I say to the gentleman.

Mr. SHAW. Mr. Speaker, this activity is a wonderful activity which tremendously helps an underprivileged portion of our society in their efforts to attain self-esteem, and I certainly support it.

Mr. YOUNG of Missouri. Mr. Speaker, I rise in support of House Concurrent Resolution 311.

Mr. Speaker, as my colleagues are aware, the Special Olympics, founded in 1968 by Eunice Kennedy Shriver, provides year-round training and competition to any individual age 8 or older who is mentally retarded. House Concurrent Resolution 311 authorizes the 1986 Special Olympics Torch Relay to be run through the Capitol Grounds on or about May 30, 1986, as part of the journey of the Special Olympic torch to the District of Columbia Special Olympics spring games to be conducted at Gallaudet College, in the District of Columbia.

Mr. Speaker, enactment of this legislation is a very positive step toward promoting interest in the Special Olympics and I urge passage of the bill.

Mr. BIAGGI. Mr. Speaker, as the author of House Concurrent Resolution 311, I am proud to rise in full support of this very worthwhile measure authorizing the 1986 Special Olympics Torch Relay to be run through the Capitol Grounds. Quite simply, this measure is a strong and well deserved expression of congressional support for the Special Olympics.

I want to commend the distinguished chairman of the Committee on Public Works and Transportation, Mr. HOWARD, and the Subcommittee on Public Buildings and Grounds, Mr. YOUNG of Missouri, for their expeditious treatment of this legislation.

I am privileged to author this resolution for a number of reasons, most notably, because of my longstanding support for the Special Olympics, but also because the torch relay is being sponsored nationwide by law enforcement, a profession I was proud to serve for 23 years.

The torch relay is being coordinated nationwide by the law enforcement community and is designed to raise funds for the Special Olympics. It is scheduled to be run through the Capitol Grounds on May 30, where it will culminate at opening ceremonies for the District of Columbia Special Olympics spring games to be held at Gallaudet College.

The Special Olympics, which was founded in 1986 by Eunice Kennedy Shriver, provides year-round training and competition in 14 sporting events to any individual age 8 or older who is mentally retarded. The Special Olympics provide a very rewarding experience for more than 1 million athletes in over 20,000 communities in the United States and 50 foreign countries.

Mr. Speaker, I was pleased to work with the Bureau of Alcohol, Tobacco and Firearms in developing this legislation. Daniel M. Hartnett, Deputy Associate Director for BATF is the director of the Law Enforcement Torch Run for the District of Columbia Special Olympics, and he is responsible for planning the route, recruiting runners and coordinating local fund raising activities. The torch relay is being coordinated by the International Association of Chiefs of Police—a leading national police group I have been proud to work with over the years on a number of important issues. The torch relay is sponsored by the Armour Food Cos. Logistical support will be provided by the "Good Sam Club," a national nework of recreational vehicle owners.

I would also like to point out that identical legislation has been introduced in the Senate by the distinguished Senator from South Dakota, JAMES ABDNOR.

Mr. Speaker, the Special Olympics Torch Relay is a very positive way of promoting interest in the Special Olympics, while also raising much needed funds to ensure that the Special Olympics experience can continue to grow. I urge its unanimous approval here today.

Mr. SHAW. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 311

Resolved by the House of Representatives (the Senate concurring),

SECTION 1. RUNNING OF SPECIAL OLYMPICS TORCH RELAY THROUGH CAPITOL GROUNDS.

On May 30, 1986, or on such other date as the Speaker of the House of Representatives and the President pro tempore of the Senate may authorize jointly, the 1986 Special Olympics Torch Relay may be run through the Capitol Grounds as part of the journey of the Special Olympic torch to the District of Columbia Special Olympics Spring Games to be conducted at Gallaudet College, in the District of Columbia.

SEC. 2. AUTHORITY OF CAPITOL POLICE BOARD

The Capitol Police Board shall take such action as may be necessary to carry out the first section of this resolution.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. HOWARD. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the bill and the resolution just considered and adopted.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

AMERICA STANDING TALL?—PR VERSUS REALITY

(Mr. JACOBS asked and was given permission to address the House for 1 minute.)

Mr. JACOBS. Mr. Speaker, America is standing tall again. The American flag is once again respected around the world. That is the PR of it. The reality of it is that Secretary Shultz this morning said that he was going to drop everything to come to Capitol Hill and lobby for enormous increases in the appropriations for the physical protection of American embassies around the globe.

With American tourists deciding to stay home this summer, "PR" could very well stand for "pretty ridiculous," especially in a warfare state.

SAN PEDRO RIPARIAN NATIONAL CONSERVATION AREA

(Mr. KOLBE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)90[H13MY6-76]{H2608}KOLBE

Mr. KOLBE. Mr. Speaker, today, along with the entire Arizona delegation in both the House and Senate, I am introducing legislation to establish the San Pedro Riparian National Conservation Area in Cochise County, AZ. This bill assigns to the Bureau of Land Management the responsibility of protecting this unique and beautiful area in a manner that will enhance public appreciation of the significant natural resources found along the San Pedro River.

The San Pedro River flows into the United States from Mexico and runs more than 100 miles until it joins the Gila River. The area to be designat-

ed—a 30-mile stretch from near the border to Benson—is home to a wide array of unique and special wildlife, such as the peregrine falcon. It is also the site of the only preserved Spanish presidio in Arizona. The San Pedro Riparian National Conservation Area contains over 100 other known prehistoric and historic archeological sites, and fossil sites where evidence of ancient mammoths can be found.

This bill calls for the completion of a comprehensive plan for the long-term management, development and protection of the unique resources found here. This plan will be developed with the advice and assistance of a multiple use advisory council, and with full opportunities for public participation and comment.

Taken together, this legislation is a unique opportunity to further land use planning which is sensitive to the environmental requirements of this special land, while also planning for the future appreciation of this area by the people of Arizona. I am hopeful that the House Interior Committee, and the Subcommittee on Public Lands will take swift action on this important legislation.

"OLD GLORY" RESPECTED AROUND THE WORLD

(Mr. DORNAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORNAN of California. Mr. Speaker, let me offer a quick prolog about whether or not our flag is respected around the world. I wish the gentleman from Indiana [Mr. JACOBS] and every Member had been with Senator LUGAR and me, along with the Vice President of the United States, our great Vice President, GEORGE BUSH, entering the stadium last Thursday in Costa Rica for the swearing in of their new President, Oscar Arias.

As each nation came into the stadium, as at the Olympics, there was polite cheering from the crowd. When Old Glory entered the stadium with this group of Americans—two Members from the Congress of the United States, our Vice President, and several ambassadors—the crowd simply went wild. They gave us a standing, pounding ovation that went on and on and on. No other nation from this hemisphere even came close. The United States is still the citadel of freedom around the world.

Mr. Speaker, the reason I use today is to express my support for a towering figure of history whose presence we honor on Capitol Hill today in the Rayburn Building. We just finished a ceremony in the rotunda. Anatoly Shcharansky, now known as Natan—Hebrew for "God-given"—is among us. I wore his bracelet for 8 years; that is almost a seventh of my life. He took that bracelet from me this morning and said, "Let's break it, Congressman."

It did not quite break. It was bent into a "V"—a "V" for "victory" I said, but he said; "No a V for visa." Mr. Speaker, we cannot forget the other 400,000 Jewish and Pentecostal dissidents who suffer in the Soviet Union.

This giant of a man, all 5 feet, 2 inches of him, is like our Daniel Webster, the only man whose words are inscribed on the walls of this anywhere. God bless Natan Shcharansky now that he is home with us, and may we in this Chamber, this citadel of freedom and this great freedom-loving Nation, seek freedom for everyone in the world from Central America to the gulags of the Soviet Union.

"NOTCH" PERIOD

(Mr. BILIRAKIS asked and was given permission to address the House for 1 minute.)

Mr. BILIRAKIS. Mr. Speaker, I'd like to take a moment today to remind my colleagues of some discrimination that exists in our society. I know it is difficult to believe that our society is still tolerating discrimination of any kind, but it is. More importantly, however, is the fact that we, in Congress, are in a position to do something to stop it and are not.

The discrimination I am referring to, of course, is that imposed upon thousands of senior citizens as a result of the "notch" period in the Social Security system which results in less benefits to some, due simply to the year in which they happened to have been born. Why do we allow this discrimination to continue?

On May 15, hundreds of "notch" babies from every district will come to Washington to remind us, once again, of the unfair treatment they continue to be up against. It is my strong desire that we listen to their plea and act by passing legislation such as my bill, H.R. 65, in order to restore fairness and equality to our Social Security system.

□ 1245

BETTER RELATIONS WITH MEXICO

(Mr. RICHARDSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RICHARDSON. Mr. Speaker, yesterday the New York Times carried an article on Mexico's drug interdiction efforts or lack of them. It quoted Commissioner Von Raab as saying that Mexican officials are corrupt and incompetent.

Mr. Speaker, while Mexico's response to narcotics control has been less than satisfactory, I wonder if remarks like Mr. Von Raab are in our best interests. Do we call the French or our NATO allies names when they refuse to cooperate on Libyan terrorism?

The problem, Mr. Speaker, is that we treat Mexico as another Third World country with a big debt and do not give it the mature position in our relationship that it deserves.

Mr. Speaker, we fail to give our relationship with Mexico a strong priority. We have enormous problems, whether it is immigration, drugs, whether it is Central America or whether it is pollution control. We spend days with our big seven partners, yet only 2 hours with our problems with Mexico.

Mr. Speaker, let us give more attention to our Mexican relationship, because the problems we have are immense and they deserve more attention.

THE EXAMPLE OF ANATOLY SHCHARANSKY

(Mr. CONYERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONYERS. Mr. Speaker, the congressional ceremony for Anatoly Shcharansky was a moving and impressive one. I am very, very proud of the Congress for bringing this great freedom fighter to the Capitol.

I would like to remind our colleagues that a number of members of the Congressional Black Caucus joined with me in sending a letter to the Soviet Jewry March in New York on Sunday past. In that communication to them, we reminded that committee that when Frederick Douglass moved for freedom, he was told to wait. When Susan B. Anthony advanced the cause of women, she was told to wait. When Martin Luther King reignited the civil rights struggle in America, he was told to wait. When black South Africans now move for freedom in South Africa, they are told to wait.

So we know there are over 400,000 other Soviet Jews that are in the same position that Anatoly Shcharansky was. We must all join with them and stay with them until their cause has been won.

PRESIDENT REAGAN SHOULD MEET WITH ANATOLY SHCHARANSKY

(Mr. COURTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COURTER. Mr. Speaker, it's been said that free men and women have two homes: one where people are free, the other where they are not free. Anatoly Shcharansky is such a free man, and I join in welcoming him

to the home of freedom. We Americans believe each individual's freedom is precious, and we rejoiced when the Soviet leaders released him. But Mr. Shcharansky is important, too, as a symbol—a symbol of the powerlessness of tyranny in the face of idomitable courage.

Elie Weisel has said that "indifference to evil is evil." This is why Americans can't be indifferent to Mr. Shcharansky's struggle and triumph. And this is why the administration's apparent decision to downplay his presence here has disturbed many of us. The worst feature of the State Department's policy of not unduly distressing the Soviet leaders is its abject willingness to participate in a kind of self-censorship which serves Soviet purposes and no one else's.

Even at this late date, I urge President Reagan—one of the most courageous leaders of our time—to meet publicly and openly with Anatoly Shcharansky—one of the most courageous men of our time. Together they might remind the whole world that the American Government, like the people it represents, has the courage to reject indifference to evil.

HEART TRANSPLANT NEEDED FOR WESTERN NORTH CAROLINA INFANT, JENNA HUGHES

(Mr. HENDON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HENDON. Mr. Speaker, while in my congressional district over the weekend, I learned about an infant girl from Yancey County, NC, who desperately needs a heart transplant.

Jenna Hughes is 2 weeks old. She was born with a hypolastic left ventricle, which prevents the pumping of blood to her body. Jenna is a fighter. This morning she remains in critical, but stable condition, but she just will not make it, Mr. Speaker, if a heart donor is not found this week.

Little Jenna has been accepted as a heart transplant candidate by Loma Linda University Medical Center in Loma Linda, CA. As soon as a compatible donor is located, she will be flown from North Carolina to California by a specialized Loma Linda medical team.

Her parents have agreed to relocate to California for at least 1 year if their child receives the transplant.

Jenna Hughes could become the sixth newborn infant to receive a transplant and the first to fly from the east coast to the very fine Loma Linda Medical Center for treatment.

Jenna and her family and all of us in western North Carolina would appreciate any assistance that anyone could provide.

LEGISLATION TO ALLOW DRUG RELATED OFFENSES TO BE CONSIDERED AS FACTOR IN DEATH PENALTY

(Mr. SHAW asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHAW. Mr. Speaker, today along with the gentleman from Pennsylvania [Mr. GEKAS], the gentleman from California [Mr. LUNGREN], and the gentleman from California [Mr. HUNTER], I am introducing legislation to allow drug related offenses to be considered as a factor in determining whether the death penalty shall be imposed in Federal cases. Although this Congress is slow to move on the death penalty legislation currently pending in committee, I am convinced that the death penalty is warranted in certain circumstances and it should be imposed in Federal cases.

The bill I introduce today will provide for the death penalty in cases involving murder and further provides that a Federal jury, in determining whether to recommend the death penalty, be permitted to consider as an aggravating factor in their deliberations a defendant's previous drug related convictions.

We all know, Mr. Speaker, that the drug war in this country is being fought from every angle possible by our law enforcement agencies and that lives of law enforcement agents are being lost, and the lives of drug users are being lost, but the lives and profits of the drug dealer are enriched every time he walks from a court house or out of a prison cell. It is time to elevate the crimes of the drug dealer, Mr. Speaker, to those considered most serious in this country and that is to subject to the death penalty, the criminals who violate our drug laws.

CONTRASTING THREE MILE ISLAND AND CHERNOBYL

(Mr. GEKAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GEKAS. Mr. Speaker, at last the Soviet Union seems to be becoming more forthcoming in the news and itemization of what actually went on in that nuclear disaster. They are reporting more deaths, which were predictable, more areas covered by evacuation, even larger areas contaminated for hundreds of years with radiation.

What a contrast to what occurred when that incident happened at Three Mile Island, when within hours after the first report a tremendous crowd of reporters and media representatives from all over the world found themselves in Harrisburg, PA, seeking and finding answers, thus protecting the world from a potential mishap—happily that was not the case at Three Mile Island—but the contrast between the secrecy and reluctance of the Soviet Government to release information that endangered the entire world will show up time and time again as we proceed with cultivating our relationships with the Soviet Union, to be careful about their word, to be careful about their secrecy, to be careful about their closed society.

MORE SPENDING ON CONGRESSIONAL MAIL

(Mr. WALKER asked and was given permission to address the House for 1 minute.)

Mr. WALKER. Mr. Speaker, some of us have caused some consternation in recent days by suggesting that the $100 million that we originally appropriated for congressional mail should be enough, that we ought not to supplement that with additional money because the American people have a right to expect us to cut down on our own mailings at a time when we are telling the American people to cut back as a result of the Federal deficit and that has caused a great deal of consternation. In fact, there have been all kinds of attempts to figure out ways how we can get more money.

Well, this weekend the Congress came up with a dandy. They simply have gone out and declared our mailing program around here, our congressional mail, a new entitlement program. That is right. What they have done is declare that for congressional mail there is now an open-ended blank check for the Congress to spend as much as it wants to, an open-ended blank check for the Congress, but not for the American people. They will end up paying for this new entitlement program and the new ruling is such that they may end up paying for congressional mail with higher postage rates.

Imagine that. Congress in order to get around its overspending problem in mail may be passing the bill along to all Americans in the form of higher postage. Unbelievable. Simply unbelievable, but true. Sad, but true.

CONGRESSIONAL MAIL—A RESPONSE

(Mr. FAZIO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FAZIO. Mr. Speaker, I would like to respond to the gentleman from Pennsylvania [Mr. WALKER]. I just happened to be in the Chamber and heard the gentleman who spoke about congressional postage here a minute ago.

It is true that an opinion of the General Accounting Office under the Anti-Deficiency Act, requested, by the way,

by the Senator from Texas [Mr. GRAMM] and the Senator from Indiana [Mr. QUAYLE] and several others who were critical of the process we were attempting to use to honestly fund the shortfall that we had here in providing for our frank. That request that they made, yes, did in fact come forward with an opinion that the legislative branch has been deemed to have paid its bills sufficiently for the rest of the fiscal year.

Most of us here in the Congress were prepared to go forward in the proper manner with a supplemental appropriation to make sure that the funding was made up. We wanted to make a number of reforms in the process, limiting the number of newsletters, cutting down on the number of first-class computer letters that are sent out.

Even though we have a tremendous increase in the amount of mail coming in, we were prepared to make reforms in the amount of mail that we can send out, particularly in an election year.

The gentleman who was just speaking single-handedly has gone about the process of frustrating us in our desire to deal with this in a manner that we need to honestly fund that shortfall.

I regret very much that some will now hide behind this opinion, which has been sought by Mr. GRAMM and some of the critics of congressional mail.

□ 1300

So I would say at this point the record should show that the proper way to perform our duties here, proceeding with reforms in the congressional mailing process, has been frustrated. It has been frustrated by the very gentleman who just spoke out, seemingly placing himself on the side of the angels.

AN END RUN ON CONGRESSIONAL MAILING PRIVILEGES

(Mr. COBLE asked and was given permission to address the House for 1 minute.)

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. COBLE. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

Mr. Speaker, I think it is amazing to have the chairman of the appropriations subcommittee that is attempting to thrust another $45 million down the throats of the American people for congressional mail come up and make a statement like he just did.

It seems to me that what is clear is that this gentleman was attempting to say that we ought to live with the $100 million that we originally appropriated for mail. That is what some of the gentlemen in the other body are also suggesting, that we ought to live with that kind of appropriation process.

That is what we decided we were going to do earlier in this fiscal year, and now the gentleman wants to turn around and say those of us who wanted to save the money are, in fact, at fault for this particular ruling. That is not the case. What we are attempting to do is get some limits on the process, and the way that an end run has now been done is to get the whole process declared an entitlement.

I would remind the gentleman from California who just spoke that it was the Speaker himself who suggested about 2 weeks ago that if we could not get the appropriation through here, maybe we would just have to go out and get a way to have the post office pay for it. The fact is, that is exactly what has been done now. They have figured out a way for the post office to pay for our mail without our having to come up with the appropriation.

I think that is just incredible, given the fact that the American people are really very, very much concerned about this mailing process that is costing them now more than $100 million a year.

FUNDING THE SHORTFALL IN CONGRESSIONAL MAILING COSTS

(Mr. GLICKMAN asked and was given permission to address the House for 1 minute.)

Mr. GLICKMAN. Mr. Speaker, in the interest of fairness, I yield to my colleague, the gentleman from California [Mr. FAZIO].

Mr. FAZIO. Mr. Speaker, I appreciate my friend, the gentleman from Kansas, yielding.

What is really incredible is the hypocritical way we go about dealing with this issue on the floor. First of all, there was never any hidden method in our approach to funding the shortfall in mailing. It was clear very early on this year that, given Gramm-Rudman, given reductions imposed in the other body, given the shortfaff that was obvious very early on, that we needed to make some reforms in the way we handle our congressional mail and at the same time we needed additional funding to get to an honest figure.

A bipartisan group of Members of both the leadership of the Republicans and the Democrats got together. We reached an agreement and we brought that agreement to the floor as part of the supplemental appropriations bill.

The gentleman from Pennsylvania objected and indicated that he, himself, would stand in the way of dealing with this in an up-front and candid way, and as a result of not wanting to expose the colleagues on the floor who would vote responsibly in both parties, we took that provision out of the supplemental bill.

Today we find that the very people, the four Members of the other body who have been most enjoying this dilemma we face, who have sought this opinion, got an answer they did not expect. It is an old saw to know the answer before you ask the question if you are a good lawyer. These good lawyers did not know the answer they would get. The one they got, in effect, absolves us from being responsible. I regret that, I would still like to proceed in an honest way to make reforms in the congressional mailing process and to fund honestly what we need.

STICK WITH THE LOWER FIGURE FOR CONGRESSIONAL MAIL

(Mr. DIOGUARDI asked and was given permission to address the House for 1 minute.)

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. DIOGUARDI. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

Mr. Speaker, I think it needs to be made clear precisely what the gentleman from Pennsylvania was going to do with regard to franked mail. I was going to bring an amendment to the floor to strike the money in the supplemental bill. That is what the House did not want to vote on.

All I was suggesting was that the House ought to vote on the issue again, just as we voted on the issue before. When the original appropriation bill went through for legislative appropriations, the House specifically decided that it was going to lower the amount that was in the original bill. We made a specific determination out here that the gentleman from Ohio [Mr. MILLER] asked us to do, that we were going to stick with a lower figure for mail.

We found out that Members overmailed. So, therefore, that figure is a problem for us. All I was going to do was ask the House to stick with its previous position, or whether or not it was going to vote for more money for mail. The gentleman from California now admits that if the House had had that question posed to it, a lot of Members would not vote for the additional money.

Then I think we ought to live with what we have appropriated, and that is all this gentleman says. We ought to be able to live with $100 million. The gentleman from California is suggesting that it is hypocritical to bring such an issue to the floor, that it is hypocritical to suggest that Congress should be be able to live with $100 million in mailing expenses. I do not

regard that as hypocritical at all. I think it is a question that the American people deserve to have addressed and have addressed openly. I was prepared to do that through a voting process and that is precisely what the gentleman from California has sought to avoid.

LET US DEAL WITH THE MAILING ISSUE UP FRONT

(Mr. BOUCHER asked and was given permission to address the House for 1 minute.)

Mr. BOUCHER. Mr. Speaker, I yield to the gentleman from California [Mr. FAZIO].

Mr. FAZIO. I appreciate my friend, the gentleman from Virginia, yielding.

Mr. Speaker, the gentleman is incorrect in where I was placing the term hypocrisy. That is one thing I think we can agree to.

I do not think it is hypocritical for the Members to deal honestly and up front with an issue that affects every one of us. Were we all to be required to go on a rollcall vote, and that may yet come, I am sure that a majority, a responsible majority, would vote in order that we not leave the Postal Service of what it really will cost to provide for the mail that we all know must go out.

What is hypocritical is that those Members who vote "no" know very well that their mail will be sent out, just as any who vote "aye." We all have the same dilemma. I happen to have sent out my first newsletter in 2 years most recently. I do not know how many the gentleman from Pennsylvania sent out, but I would guess it is probably somewhat more than I have sent.

That is not the issue. We are all individually in charge of the mail as it relates to our own offices. But the institution does have a certain responsibility to respond to people who write us. Contrary to popular belief, it is not all newsletters that we send out here. We send out a tremendous amount of mail in response to very deep concerns that our constituents have. They address those concerns to us and it is our responsibility to answer them. If we do not have enough funds to do that after May or June of this year, I do not think we have fulfilled our responsibility to the people who elected us.

The way to deal with that is not through some legal opinion that has been sought by our critics. It is to deal with the issue up front, and I am pleased to say that the Congress was prepared to do that until the gentleman from Pennsylvania [Mr. WALKER] intervened.

CONTINUED DIALOG ON CONGRESSIONAL MAILING

(Mr. MOLINARI asked and was given permission to address the House for 1 minute.)

Mr MOLINARI. Mr. Speaker, if the gentleman from California can hear me, I would just like to suggest to my colleagues who have been involved in this colloquy that we have a relatively short agenda today, and I think this is a very important topic that everybody is interested in.

I would make the recommendation that at the conclusion today, if we could get the two gentlemen who were involved in debate, and anybody else interested, that we get involved in a special order to continue the dialog. I think it would be very useful for the Members of the House.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. MOLINARI. I would be happy to yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

Mr. Speaker, I just signed up for a 60-minute special order for today and I will be very glad to discuss the topic at length at the end of the day. I think it would be very useful to have the whole thing aired.

Mr. Speaker, I thank the gentleman for his suggestion.

□ 1310

IMMIGRATION REFORM

(Mr. LUNGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNGREN. Mr. Speaker, last week I addressed this body on three separate occasions in special orders concerning the urgent need for immigration reform. Yet, despite my pleas for this legislation, despite the support of the President of the United States and the U.S. Senate, and despite the exploding growth of illegal entries along our border, the House Committee on the Judiciary has answered with stony silence.

In this context, a constituent recently sent me a startling article from my hometown paper, the Long Beach Press Telegram. This article is entitled "Undocumented Alien College Workshop Set." Undocumented alien, of course, means illegal alien.

The article actually advertises a college workshop for undocumented aliens. If you are an undocumented immigrant and you wish to enroll in a California State university, you wish to find out about employment opportunities or even apply for a scholarship, you can take this course and find out.

The article states the instruction will be both in English and in Spanish; the workshop being sponsored by the Compton Unified School District and California State University of Domingos Hills Student Affirmative Action Group. It appears now that we are going to not only not do anything in the House of Representatives, but some local governments are going to encourage more to come across because of the prospect of educational opportunities even with scholarships.

Mr. Speaker, one of the first things we should teach our children is that adults face up to their problems, no matter how formidable or how intractable they may be.

Is it not time the Committee on the Judiciary followed this prescription? We need immigration reform legislation not months from now, not weeks from now, but today.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5 of rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, will be taken on Wednesday, May 14, 1986.

TO ALLOW SUITS AGAINST THE UNITED STATES FOR DAMAGES BY CONTRACTORS IN ATOMIC WEAPONS TESTING PROGRAMS

Mr. GLICKMAN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1338) to amend title 28, United States Code, to allow suits against the United States for acts or omissions of contractors in carrying out the atomic weapons testing program, and to substitute the United States as the party defendant in suits brought against such contractors.

The SPEAKER pro tempore. The Clerk read as follows:

H.R. 1338

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) chapter 171 of title 28, United States Code, is amended by adding at the end thereof the following new section:

"§ 2681. Certain civil actions involving the atomic weapons testing program

"(a)(1) Notwithstanding any other provision of this chapter, or section 2401 of this title, an action may be brought against the United States for money damages for injury to or loss property or for personal injury or death due to exposure to radiation based on an act or omission of a contractor in carrying out an atomic weapons testing program under a contract with the United States. In any such action, the United States shall be liable to the same extent as the contractor would be liable, and shall have available as

defenses only those defenses that would be available to the contractor.

"(2) Notwithstanding any other provision of this chapter, or section 2401 of this title, in any action brought against any person other than the United States for money damages for injury to or loss of property or for personal injury or death due to exposure to radiation based on an act or omission of a contractor in carrying out an atomic weapons testing program under a contract with the United States, the United States shall be substituted as the party defendant and shall have available as defenses only those defenses available to the contractor.

"(3) For purposes of any action described in paragraph (1) or (2), the contractor shall not be considered to be a corporation primarily acting as an instrumentality or agency of the United States.

"(4) Any action described in paragraph (1) or (2) shall, at the request of any party to the action, be tried by the court with a jury.

"(b) A contractor against whom an action described in subsection (a)(2) is brought shall promptly deliver all process served upon that contractor to the Attorney General. Upon certification by the Attorney General that the suit against the contractor is within the provisions of subsection (a)(2) of this section, an action commenced in a State court shall be removed without bond at any time before trial by the Attorney General to the district court of the United States for the district and division embracing the place in which the action is pending. For purposes of such removal, the certification by the Attorney General under this subsection conclusively that the action is within the provisions of subsection (a)(2) of this section.

"(c) In any action under subsection (a), the United States shall not be liable for interest prior to judgment or for punitive damages.

"(d) The judgment in an action under subsection (a) shall constitute a complete bar to any other civil action by the plaintiff, by reason of the same subject matter, against the contractor whose act or omission gave rise to the claim, or against any employee or agent of the contractor.

"(e) The Attorney General or a person designated by the Attorney General may arbitrate, compromise, or settle any action under subsection (a).

"(f)(1) No attorney may charge, demand, receive, or collect for services rendered, fees in excess of 25 percent of any judgment rendered, or any compromise or settlement made, in an action under subsection (a).

"(2) Any attorney who violates paragraph (1) shall, if recovery be had, be fined not more than $2,000 or imprisoned not more than one year, or both.

"(g) This section applies to actions pending on October 19, 1984, and to actions commenced after that date.

"(h) For purposes of this section, the term 'contractor' includes a contractor, or cost reimbursement subcontractor of any tier, participating in the conduct of the United States atomic weapons testing program for the Department of Energy (or any of its predecessor agencies, including the Manhattan Engineer District, the Atomic Energy Commission, and the Energy Research and Development Administration). Such term also includes facilities which conduct or have conducted research concerning health effects of ionizing radiation in connection with the testing under contract with the Department of Energy (or any of its predecessor agencies).".

(b) The table of sections at the beginning of chapter 171 of title 28, United States Code, is amended by adding at the end thereof the following:

"2681. Certain civil actions involving the atomic weapons testing program.".

SEC. 2. Section 1346 of title 28, United States Code, is amended by adding at the end thereof the following new subsection:

"(g) The district courts shall have exclusive jurisdiction of all actions under section 2681 of this title.".

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Kansas [Mr. GLICKMAN] will be recognized for 20 minutes and the gentleman from North Carolina [Mr. COBLE] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Kansas [Mr. GLICKMAN].

Mr. GLICKMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, in October 1984, the Department of Defense Authorization Act of 1985 was enacted into law. Included as a part of this act was section 1631, which has become known as the Warner amendment. The purpose of section 1631 was to substitute the United States for the contractors as defendants in actions arising out of the U.S. atomic weapons testing program. The act also provided that jurisdiction for these actions would be under the Federal Tort Claims Act.

As the law stands now, many of the pending actions may be subject to dismissal under provisions of the Federal Tort Claims Act or pursuant to the Feres doctrine. In fact, in a recent case decided by the U.S. District Court, Northern District of California, that is exactly what happened.

Prior to enactment of the Warner amendment, a cause of action was allowable against the Government contractors participating in the atomic weapons testing program. These causes of action were maintainable against the contractors in State courts, under State tort law and allowed for trial by jury. Pursuant to these contracts, the contractors would be indemnified by the United States for any costs of litigation, judgments, or settlements paid by the contractors.

The end result is that military and civilian persons who have suffered damages as result of the U.S. atomic weapons testing program have been left with no judicial recourse whatsoever.

This bill, sponsored by the gentleman from Virginia [Mr. BOUCHER] solves the problems created by the Warner amendment.

H.R. 1338 substitutes the United States as the sole defendant in cases arising out of the U.S. atomic weapons testing program, but amends the Federal Tort Claims Act so as to allow suits to be brought against the United States. The bill limits the United States to only those defenses which would have been available to the contractors. The bill also provides a right to a jury trial upon request.

It is simply a matter of justice and equity that we give these people back their right to a day in court.

And I might add parenthetically, Mr. Speaker, that most of these people were people who were exposed many, many years ago to the atomic weapons testing program in Utah and Nevada and had rights to sue for damages caused by exposure to radiation and the other damages due to atomic testing, and then, whammo, as result of the defense authorization bill, this one small provision that was put in there, they lost their rights to sue. They are without a remedy whatsoever.

H.R. 1338 does not comment on the merits of an individual case. It only gives these people the right to have their case heard in court to restore them to the same position they were in before the Warner amendment was adopted.

These people who have suffered injury or damage arising out of the atomic weapons testing program had this right before enactment of the Warner amendment. Given the nature of the contracts involved and the fact that ultimately the United States paid the bill, I don't think anyone can disagree that the United States is the proper defendant in this case. What is unfair is that by making the United States the defendant, the right of these individuals to have their case heard in court was taken away because the United States had no liability under the Federal Tort Claims Act. This bill basically restores the potential liability of the Government if the facts can be proven under the law.

I urge my colleagues to do the right thing today and vote in favor of H.R. 1338.

Mr. Speaker, I will be glad to yield to my colleague from Virginia [Mr. BOUCHER], but before I do so, I would like to compliment him for the extraordinary job he has done in getting this legislation to the floor and the fact that he has fought so hard for something which is right and the many, many people, including thousands of veterans in this country who were exposed years ago to atomic radiation, should owe him a great deal of gratitude.

Mr. Speaker, I yield such time as he may consume to the gentleman from Virginia [Mr. BOUCHER].

Mr. BOUCHER. Mr. Speaker, I thank the gentleman from Kansas [Mr. GLICKMAN] for yielding.

At the outset, I would like to commend the gentleman from Kansas for his leadership in bringing this matter to the floor today and also commend the gentleman from North Carolina

[Mr. COBLE] for his assistance and his support as well.

The single purpose of H.R. 1338 is to provide a day in court for the more than 250,000 individuals who were exposed to radiation as a consequence of the atomic weapons testing program.

Prior to the enactment of the 1985 Department of Defense Authorization Act, they had an effective remedy. They could sue the companies that conducted weapons tests under contract with the Federal Government. Given significant Government involvement in the planning and in the supervision of those tests, the contractors have historically been indemnified by the Government for any loss they may sustain as a consequence of judgments, settlements, or other litigation expenses arising from suits associated with those tests.

So historically, the Federal Government has been the finanically responsible party.

In 1984, the contractors who performed these tests for the Government came to the Congress and, in effect, asked that they be removed from the litigation loop. The device through which they suggested that occur was substituting the Government as the party defendant for the contractors whenever these cases are filed.

The contractors argued that since the Government indemnified them in any event, they should be excluded from the litigation altogether and the Government should be required to defend the suits and to satisfy directly any settlements or judgments that might be forthcoming.

The House Committee on the Judiciary in 1984 considered a bill that was reported by the Subcommittee on Administrative Law and Government Relations that would, in fact, have substituted the Government as the party defendant, but that bill also made a very important provision. That was to protect the rights of those who may have been injured as a consequence of the weapons tests to recover damages in court.

The right to sue would have been preserved in the bill that was considered by the Committee on the Judiciary in 1984. The full committee declined to act on that measure.

Thereafter, also in the year 1984, the conference committee on the fiscal year 1985 Department of Defense authorization bill included a provision in that report that substitutes the Government as the party defendant any time a weapons contractor was sued.

□ 1320

Unfortunately at that time, no protections were included for those who might have been injured in the Atomic Weapons Testing Program, and since the Government was substituted as the party defendant under the Feres doctrine, men and women who were injured while in uniform are prohibited from suing and under the Federal Employees Compensation Act, civilian employees of the Federal Government are also barred from filing suit.

The net effect of that provision was to deny these individuals any remedy. H.R. 1338 is designed to address that injustice and to provide these individuals with a day in court. It would continue to allow the substitution of the Government for the contractors as the party defendant, but it would open the courthouse doors to those injured by giving the Government only the defenses that the contractors themselves could have used.

No longer would the Feres doctrine bar suits by men and women injured while in unfiorm, and no longer would the Federal Employees Compensation Act prevent civilian employees of the Federal Government from having their day in court.

The bill merely gives these 250,000 individuals the same rights they possessed prior to the adoption of the DOD conference report in 1985. They must still carry the burden of proof of showing exposure to radiation by being exposed to these tests. They must still carry the burden of proof of establishing their damages as a consequence of the exposure and they must still carry the burden of proof of the causal connection between the exposure and the damages they suffered; but they would have an opportunity to sue.

We owe them at least that much; justice and fairness demands no less. I urge my colleagues to join with us in the approval of H.R. 1338, and I thank the gentleman from Kansas [Mr. GLICKMAN] for yielding.

Mr. COLBE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the gentleman from Kansas [Mr. GLICKMAN] and the gentleman from Virginia [Mr. BOUCHER] have presented pertinent formation applicable to this bill, and I will not add to that.

I will note for the record, however, that this is a bill which has support from both sides on the aisle.

I have no requests for time, Mr. Speaker, and I yield back the balance of my time.

Mr. GLICKMAN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Kansas [Mr. GLICKMAN] that the House suspend the rules and pass the bill, H.R. 1338.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GLICKMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend his remarks on H.R. 1338, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kansas?

There was no objection.

EDUCATION RESEARCH AND STATISTICS AMENDMENTS OF 1986

Mr. WILLIAMS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2246) to extend and improve the National Institute of Education, as amended.

The Clerk read as follows:

H.R. 2246

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be referred to as the "Education Research and Statistics Amendments of 1986".

SEC. 2. EDUCATIONAL RESEARCH AND IMPROVEMENT.

(a) OFFICE OF EDUCATIONAL RESEARCH AND IMPROVEMENT.—Section 405 of the General Education Provisions Act (20 U.S.C. 1221e; referred to in this Act as "the Act") is amended to read as follows:

"OFFICE OF EDUCATIONAL RESEARCH AND IMPROVEMENT

"SEC. 405. (a)(1) The Congress declares it to be the policy of the United States to provide to every person an equal opportunity to receive an education of high quality regardless of race, color, religion, sex, age, handicap, national origin, or social class. Although the American education system has pursued this objective, it has not attained it. Inequalities of opportunity to receive high quality education remain pronounced. To achieve the goal of quality education requires the continued pursuit of knowledge about education through research, improvement activities, data collection, and information dissemination. While the direction of American education remains primarily the responsibility of State and local governments, the Federal Government has a clear responsibility to provide leadership in the conduct and support of scientific inquiry into the educational process.

"(2) The Congress further declares it to be the policy of the United States to—

"(A) promote the improvement of American education;

"(B) advance the practice of education as an art, science, and profession;

"(C) support educational research of the highest quality;

"(D) strengthen the educational research and development system;

"(E) improve educational techniques and training;

"(F) assess the national progress of this Nation's schools and educational institutions, particularly special populations; and

"(G) collect, analyze, and disseminate statistics and other data related to education in the United States and other nations.

"(3) For the purposes of this section—

"(A) the term 'educational research' includes basic and applied research, development, planning, surveys, assessments, evaluations, investigations, experiments, and demonstrations in the field of education and other fields relating to education; and

"(B) the terms 'United States' and 'State' include the District of Columbia and Puerto Rico.

"(b)(1) It shall be the purpose of the Office of Educational Research and Improvement (referred to in this section as the 'Office') established by section 209 of the Department of Education Organization Act to carry out the policies set forth in subsection (a). The Office shall be administered by the Assistant Secretary for Educational Research and Improvement (referred to in this section as the 'Assistant Secretary') established by section 202 of the Department of Education Organization Act and shall include—

"(A) the National Advisory Council on Educational Research and Improvement (referred to in this section as the 'Council') established in subsection (c);

"(B) the Center for Statistics established by section 406 of the Act; and

"(C) such other units as the Secretary considers appropriate to carry out the purpose of the Office.

"(2)(A) The Office shall, in accordance with the provisions of this section, seek to improve education in the United States through concentrating the resources of the Office on the following priority research and development needs—

"(i) improving student achievement;

"(ii) improving the ability of schools to meet their responsibilities to provide equal educational opportunities for all students, including those with handicaps, those of limited English-speaking ability, women, older students, part-time students, and students who are socially, economically, or educationally disadvantaged;

"(iii) collecting, analyzing, and disseminating statistics and other data related to education in the United States and other nations; and

"(iv) improving the dissemination and application of knowledge obtained through educational research and data collection, particularly to education professionals and policy makers.

"(B) The Secretary shall publish proposed research priorities in the Federal Register every two years, not later than October 1, and shall allow a period of sixty days for public comments and suggestions.

"(c)(1) The Council shall consist of fifteen members appointed by the President, by and with the advice and consent of the Senate. In addition, there shall be such ex officio members who are officers of the United States as the President may designate, including the Assistant Secretary. A majority of the appointed members of the Council shall constitute a quorum. The chairperson of the Council shall be designated by the President from among the appointed members. Ex officio members shall not have a vote on the Council. The members of the Council shall be appointed to ensure that the Council is broadly representative of the general public; the education professions, including practitioners; policymakers and researchers; and the various fields and levels of education.

"(2)(A) Except as provided in subparagraph (B), members shall be appointed to terms of three years.

"(B) Of the members first appointed—

"(i) five shall be appointed for terms of one year;

"(ii) five shall be appointed for terms of two years; and

"(iii) five shall be appointed for terms of three years;

as designated by the President at the time of appointment.

"(C) Any member appointed to fill a vacancy occurring before the expiration of the term for which the predecessor was appointed shall be appointed only for the remainder of such term. A member may serve after the expiration of a term until a successor has taken office.

"(D) An appointed member who has been a member of the Council for six consecutive years shall be ineligible for appointment to the Council during the 2-year period following the expiration of the sixth year.

"(3) The Council shall—

"(A) advise the Secretary and the Assistant Secretary on the policies and activities carried out by the Office;

"(B) review and publicly comment on the policies and activities of the Office;

"(C) conduct such activities as may be necessary to fulfill its functions under this subsection;

"(D) prepare such reports to the Secretary on the activities of the Office as are appropriate; and

"(E) submit, no later than March 31 of each year, a report to the President and the Congress on the activities of the Office, and on education, education research, and data gathering in general.

"(d)(1) In order to carry out the purposes of the Office under this section, the Secretary may conduct educational research; collect, analyze, and disseminate the findings of educational research; train individuals in educational research; assist and foster educational research, data collection, dissemination, and training; promote the coordination of education research and research support within the Federal Government and otherwise assist and foster such research; and collect; analyze, and disseminate statistics and other data related to education in the United States and other nations.

"(2) The Secretary may appoint, for terms not to exceed three years (without regard to the provisions of title 5 of the United States Code governing appointment in the competitive service) and may compensate (without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates) such scientific or professional employees of the Office as the Secretary considers necessary to accomplish its functions. The Secretary may also appoint and compensate not more than one-fifth of the number of full-time, regular scientific or professional employees of the Office without regard to such provisions. The rate of basic pay for such employees may not exceed the maximum annual rate of pay for grade GS-15 under section 5332 of title 5 of the United States Code, except that the pay of any employee employed before the date of enactment of the Education Research and Statistics Amendments of 1986 shall not be reduced by application of such maximum pay limitation.

"(3)(A) The Secretary may carry out the activities in paragraph (1)—

"(i) directly;

"(ii) through grants, contracts, and cooperative agreements with institutions of higher education, public and private organizations, institutions, agencies, and individuals; and

"(iii) through the provision of technical assistance.

"(B) When making awards under this subsection, the Secretary shall—

"(i) solicit recommendations and advice regarding research priorities, opportunities, and strategies from qualified experts, such as education professionals and policymakers, personnel of the regional education laboratories and of the research and development centers supported under paragraph (4), and the Council, as well as parents and other members of the general public;

"(ii) employ suitable selection procedures utilizing the procedures and principles of peer review; and

"(iii) determine that the activities assisted will be conducted efficiently, will be of high quality, and will meet priority research and development needs under this section.

"(4)(A) In carrying out the functions of the Office, the Secretary shall, in accordance with the provisions of this subsection, support—

"(i) regional educational laboratories established by public agencies or private nonprofit organizations to serve a specific region of the Nation under the guidance of a regionally representative governing board;

"(ii) research and development centers established by institutions of higher education, by institutions of higher education in consort with public agencies or private nonprofit organizations, or by interstate agencies established by compact which operate subsidiary bodies established to conduct postsecondary educational research and development;

"(iii) meritorious unsolicited proposals for educational research and related activities that are authorized by this subsection; and

"(iv) proposals that are specifically invited or requested by the Secretary, which meet priority research and development needs under this section.

"(B) Prior to awarding a grant or entering into a contract for a regional educational laboratory or research and development center under subparagraph (A)(i) or (A)(ii), the Secretary shall invite applications to compete for such laboratories and centers through notice published in the Federal Register.

"(C) Each application for assistance under subparagraph (A)(i) or (ii) as a regional educational laboratory or a research and development center shall contain such information as the Secretary may reasonably require, including assurances that the applicant will—

"(i) be responsible for the conduct of the research and development activities;

"(ii) prepare a long-range plan relating to the conduct of such research and development activities;

"(iii) ensure that information developed as a result of such research and development activities, including new educational methods, practices, techniques, and products, will be appropriately disseminated;

"(iv) provide technical assistance to appropriate educational agencies and institutions; and

"(v) to the extent practicable, provide training for individuals, emphasizing training opportunities for women and members of minority groups, in the use of new educational methods, practices, techniques, and products developed in connection with such activities.

"(D) No grant may be made and no contract entered into for assistance described under subparagraph (A) (i) or (ii) unless—

"(i) proposals for assistance under this subsection are solicited from regional educa-

tional laboratories and research and development centers by the Office;

"(ii) proposals for such assistance are developed by the regional educational laboratories and the research and development centers in consultation with the Office; and

"(iii) the Office determines that the proposed activities will be consistent with the education research and development program and dissemination activities which are being conducted by the Office.

"(E) No regional educational laboratory or research and development center receiving assistance under this subsection shall, by reason of the receipt of that assistance, be ineligible to receive any other assistance from the Office authorized by law.

"(F) The Secretary shall make available adequate funds to support meritorious, unsolicited proposals as described under subparagraph (A)(iii), and provide sufficient notice of the availability of such funds to individual researchers in all regions of the country.

"(5) The Secretary, from funds appropriated under this section, may establish and maintain research fellowships in the Office, for scholars, researchers, and statisticians engaged in the collection and dissemination of information about education and educational research. Subject to regulations published by the Secretary, fellowships may include such stipends and allowance, including travel and subsistence expenses provided for under title 5, United States Code, as the Secretary considers appropriate.

"(e)(1) In addition to the other responsibilities of the Office under this section, the Office shall carry out, by grant or cooperative agreement with a nonprofit organization, a National Assessment of Educational Progress which shall have as a primary purpose the assessment of the performance of children and young adults in the basic skills of reading, mathematics, communication, and other subjects and skills. Such a National Assessment shall—

"(A) collect and report at least once every five years data assessing the performance of students at various age or grade levels in each of the areas of reading, writing, and mathematics;

"(B) report, periodically, data on changes in knowledge and skills of such students over a period of time;

"(C) conduct special assessments of other educational areas, as the need for additional national information arises;

"(D) provide technical assistance to State educational agencies and to local educational agencies on the use of National Assessment objectives, primarily pertaining to the basic skills of reading, mathematics, and communication, and on making comparisons of such assessments with the national profile and change data developed by the National Assessment; and

"(E) with respect to each State which voluntarily participates in accordance with paragraph (5), provide for a statement of information collected by the National Assessment for each such State.

"(2)(A) The organization through which the Office carries out the National Assessment shall be responsible for overall management of the National Assessment. Such organization shall delegate authority to design and supervise the conduct of the National Assessment to an Assessment Policy Committee, established by such organization. The Assessment Policy Committee shall be composed of—

"(i) five members appointed by the organization of whom two members shall be representatives of business and industry and three members shall be representatives of the general public; and

"(ii) fourteen members appointed by the organization from the categories of membership specified in subparagraph (B).

"(B) Members of the Assessment Policy Committee appointed in accordance with subparagraph (A)(ii) shall be—

"(i) one chief State school officer;

"(ii) two State legislators;

"(iii) two school district superintendents;

"(iv) one member of a State board of education;

"(v) one member of a local school board;

"(vi) one Governor of a State;

"(vii) four classroom teachers;

"(viii) one elementary school principal; and

"(ix) one secondary school principal.

"(C) The Assistant Secretary shall serve as an ex officio member of the Assessment Policy Committee. The Assistant Secretary shall also appoint a member of the Council to serve as nonvoting member of the Assessment Policy Committee.

"(D) Members appointed in accordance with subparagraph (A)(i) and (ii) shall be appointed for terms for three years on a staggered basis.

"(3) The Assessment Policy Committee established by paragraph (2) shall be responsible for the design of the National Assessment, including the selection of the learning areas to be assessed, the development and selection of goal statements and assessment items, the assessment methodology, the form and content of the reporting and dissemination of assessment results, and studies to evaluate and improve the form and utilization of the National Assessment. The appropriateness of all cognitive, background, and attitude items developed as part of the National Assessment shall be the responsibility of the Assessment Policy Committee. Such items shall be subject to review by the Department of Education and the Office of Management and Budget for a single period of not more than 60 days.

"(4) Each learning area assessment shall have goal statements devised through a national consensus approach, providing for active participation of teachers, curriculum specialists, subject matter specialists, local school administrators, parents, and members of the general public. All items selected for use in the assessment shall be reviewed to exclude items which might reflect racial, sex, cultural, or regional bias.

"(5) Participation in the National Assessment by State and local education agencies selected as part of a sample of such agencies shall be voluntary.

"(e) The Secretary shall provide for a periodic review of the National Assessment. This review shall provide an opportunity for public comment on the conduct and usefulness of the National Assessment and shall result in a report to the Congress and to the President on the findings and recommendations, if any, stemming from the review. The Secretary shall consider these findings and recommendations in designing the competition to select the organization through which the Office carries out the National Assessment.

"(f)(1) There are authorized to be appropriated to carry out the provisions of this section $51,200,000 for fiscal year 1987 and such sums as may be necessary for each of the fiscal years 1988 and 1989.

"(2) Not less than 95 percent of funds appropriated pursuant to this subsection for any fiscal year shall be expended to carry out this section through grants, cooperative agreements, or contracts.

"(3) When more than one Federal agency uses funds to support a single project under this section, the Office may act for all such agencies in administering those funds.".

(b) TRANSITION PROVISIONS.—On the effective date of this Act, the property and records of the National Institute of Education shall be transferred to the Office of Education Research and Improvement.

(c) EMPLOYMENT LIMITATION WAIVER.—Notwithstanding the 3-year employment period limitation under section 405(d)(2) of the General Education Provisions Act, the Secretary may continue to employ for an indefinite period three individuals, selected by the Secretary, who are employed by the Office of Education Research and Improvement on the date of the enactment of this Act, were employed by such office on April 1, 1986, and were employed by the National Institute of Education under its excepted hiring authority immediately prior to employment by such office.

(d) TECHNICAL AND CONFORMING AMENDMENTS.—Section 401 of the Department of Education Organization Act (Public Law 96-88) is amended by striking subsection (c).

SEC. 3. CENTER FOR STATISTICS.

(a)(1) The heading for section 406 of the Act is amended to read as follows: "CENTER FOR STATISTICS".

(2) Section 406 is amended by striking out subsection (e) and redesignating subsections (f), (g), (h), and (i) as subsections (e), (f), (g), and (h), respectively.

(b) Section 406(a) of the Act is amended—

(1) in the first sentence by striking "Office" and everything that follows and inserting "Office of Education Research and Improvement, a Center for Statistics (referred to in this section as the 'Center').";

and

(2) in the second sentence by striking "an Administrator" and inserting "a Director".

(c) Section 406(b) of the Act is amended—

(1) in the first sentence by inserting ", and analyze," immediately after "collect";

(2) in paragraph (1) by inserting "if feasible, on a State-by-State basis," after "(1)";

and

(3) in paragraph (5) by striking "Education Division" and inserting "Department of Education".

(d) Section 406(c)(2) of the Act is amended—

(1) by striking subparagraph (A) and redesignating subparagraphs (B), (C), and (D) as subparagraphs (A), (B), and (C); and

(2) in subparagraph (A) (as redesignated in paragraph (1)) by striking "Director of the National Institute of Education," and inserting "Assistant Secretary,".

(e) Section 406(d)(1) of the Act is amended by striking "Assistant Secretary" and inserting "Secretary"

(f) Section 406(e) of the act (as redesignated in subsection (1)(2)) is amended—

(1) in paragraph (1)—

(A) by striking "(A)";

(B) by striking out the first sentence and inserting "The Center is authorized to furnish transcripts or copies of tables and other statistical records of the Office and make special statistical compilations and surveys for State and local officials, public and private organizations, and individuals. The Center shall provide State and local educational agencies opportunities to suggest the development of particular compilations of statistics, surveys, and analyses that would assist those educational agencies.";

(C) in the fourth sentence by striking "Assistant Secretary" each place it appears and inserting "Secretary"; and

(D) by striking subparagraph (B); and

(2) by striking paragraph (3); and

(g) Section 406(f) (as redesignated in subsection (a)(2)) is amended to read as follows:

"(f) There are authorized to be appropriated to carry out the provisions of this section and section 405(e) $20,000,000 for fiscal year 1987 and such sums as may be necessary for each of the fiscal years 1988 and 1989."

(h) Section 406(g) (as redesignated in subsection (a)(2)) is amended to read as follows:

"(g) In addition to its other responsibilities, the Center shall collect uniform data from the States on the financing of elementary and secondary education. Each State receiving funds under the Education Consolidation and Improvement Act of 1981 shall cooperate with the Center in this effort.".

SEC. 4. USE OF COUNCIL STAFF AND FACILITIES.

The National Advisory Council on Educational Research and Improvement, the Advisory Council on Education Statistics, and members of such councils may not use any staff, facilities, equipment, supplies, or franking privileges of the councils for activities unrelated to the purposes of the councils.

SEC. 5. SPECIAL PROJECTS UNDER THE SECRETARY'S DISCRETIONARY FUNDS.

(a) DISCRETIONARY PROGRAMS.—Section 583(a)(1) of the Education Consolidation and Improvement Act of 1981 is amended by striking ", including" and all that follows before the semicolon.

(b) PRIORITY FUNDING.—Section 583(b) of the Education Consolidation and Improvement Act of 1981 is amended—

(1) by striking "and" after the comma in paragraph (3);

(2) by inserting "and" after the comma in paragraph (4);

(3) by adding after paragraph (4) the following:

"(5) a National Diffusion Network program as described in subsection (c),";

(4) by striking "paragraph (4))" and inserting "paragraph (4) and not less than 34 percent of funds reserved for the purposes of this section in the case of the program referred to in paragraph (5))".

(c) NATIONAL DIFFUSION NETWORK.—Section 583 of the Education Consolidation and Improvement Act of 1981 is amended by adding the following subsection (c):

"(c)(1) The National Diffusion Network program under subsection (b)(5) shall be a national program that recognizes and furthers excellence in education by: (A) promoting the awareness and implementation of exemplary educational programs, products, and practices to interested elementary, secondary, and postsecondary institutions throughout the Nation; and (B) promoting the utilization of the knowledge, talents, and services of local staff associated with various educational excellence recognition efforts.

"(2) The program shall be directed towards improving the quality of education through the implementation of promising and validated innovations and improvements in educational programs, products, and practices, and through the provision of training, consultation, and related assistance services.

"(3) In carrying out the program the Secretary shall—

"(A) acquaint persons responsible for the operation of elementary, secondary, and postsecondary schools with information about exemplary educational programs, products, practices, and services;

"(B) assist them in implementing programs, products, and practices, which those persons determine to hold promise for improving the quality of education in the schools for which they are responsible by providing materials, initial training, and ongoing implementation assistance;

"(C) ensure that all such programs, products, and practices are subjected to rigorous evaluation with respect to their effectiveness and their capacity for implementation;

"(D) provide program development assistance toward the recognition, dissemination, and implementation of promising practices that hold the potential for answering critical needs and that have achieved credibility because of their effective use in schools; and

"(E) ensure that a substantial percentage of the innovations disseminated represent significant changes in practice for schools and teachers;

"(4) For the purpose of carrying out the program the Secretary is authorized to make grants to, and contracts with, local educational agencies, State educational agencies, institutions of higher education, and other public and nonprofit private educational institutions and organizations.".

SEC. 6. EFFECTIVE DATE.

This Act shall take effect October 1, 1986.

The SPEAKER pro tempore. Is a second demanded?

Mr. BARTLETT. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Montana [Mr. WILLIAMS] will be recognized for 20 minutes and the gentleman from Texas [Mr. BARTLETT] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Montana [Mr. WILLIAMS].

Mr. WILLIAMS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 2246, as amended, the Educational Research and Statistics Amendments of 1986.

The bill we are considering today is identical to the bill reported out of the Committee on Education and Labor with two agreed upon changes. The bill is the culmination of a series of hearings which the Subcommittee on Select Education held here in Washington, DC. It is also the product of extensive comments by and negotiations with representatives of the research and education community and the administration.

The bill is a bipartisan effort. I would like to express my appreciation to GUS HAWKINS, the chairman of the full committee and the Subcommittee on Elementary, Secondary, and Vocational Education and to Mr. JEFFORDS, the ranking minority member of the full committee. I would also like to express my thanks to Mr. GOODLING, the ranking minority member of the Subcommittee on Elementary, Secondary, and Vocational Education, to Mr. BARTLETT, the ranking minority member of the Subcommittee on Select Education, and Mr. KILDEE, a member of the full committee.

The bill reauthorizes the Department of Education's research and data collection functions for 3 years. Based on an agreement with the minority, the authorization level for research has been reduced from $55 million, the level agreed to at full committee, to $51.2 million. The $51.2 million figure reflects a 70-percent reduction from the fiscal year 1986 authorization level. The authorization level for data collection is set at $20 million. The authorization level for fiscal year 1988 and fiscal year 1989 is set at "such sums as may be deemed necessary."

The second change from the bill reported out of the full committee enables the Committee on Appropriations to fund the National Assessment of Education Progress out of section 406 of GEPA—data collection. It is the expectation of the Committee on Education and Labor that the Committee on Appropriations will in fact fund the National Assessment out of section 406 of GEPA because the Center for Statistics in the Office of Educational Research and Improvement is responsible for monitoring the National Assessment.

The bill also makes needed technical changes to bring about conformity between current law and the Department's decision to abolish the National Institute of Education and consolidate the functions previously performed by NIE into the Office of Educational Research and Improvement.

In addition, the bill changes the role of the advisory council from policymaking to advisory and clarifies some details of the council, including who is a voting member, provisions for replacement of members, and the duties of the council.

The important role played by our educational laboratories and research centers is retained and language is added to clarify procedures for recompetition and their relationship with the Department of Education.

In addition, the bill requires the Secretary to make available adequate funds to support meritorious unsolicited proposals and provide sufficient notice of the availability of such funds to individual researchers in all regions of the country. Additional requirements are included regarding peer review procedures and wide consultation in determining those projects or activities to be funded.

The bill also retains the National Assessment of Educational Progress and includes certain changes that strengthen and reaffirm its importance.

The bill also makes certain technical and conforming changes to the data collection responsibilities of the De-

partment, broadens the functions of the center, and modifies current policies with respect ot statistical compilations and surveys.

It also makes certain amendments to the National Diffussion Network, which will be described by Mr. KILDEE.

I urge my colleagues to support this bipartisan bill which reauthorizes the research and data collection functions of the U.S. Department of Education.

Mr. Speaker, I reserve the balance of my time.

Mr. BARTLETT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 2246, the Educational Research and Statistics Amendments of 1986, addresses a necessary Federal function toward the goal of improving our educational system. This bill improves what was formerly known as the National Institute of Education, and will assist educators, parents, and policymakers to understand the impact of current educational practices so that those practices can be appropriately modified to the advantage of students of all ages.

In addition to what I believe are significant improvements in the structure of the research and statistics wings of the Department of Education, as continued in H.R. 2246, I rise in support of this legislation because it takes a reasonable approach to funding levels. H.R. 2246 sets the authorization level for what was formerly known as the National Institutue of Education at the fiscal year 1986 presequestration appropriation level of $51.2 million and allows for modest growth in the area of statistics in order to accomodate new requirements in the act. My preference would have been to freeze all authorization levels are due fiscal year 1986 appropriation level, but I do believe this legislation takes a major step toward assigning higher priorities to statistic, assessment dissemination.

I wish to recognize Congressman PAT WILLIAMS, chairman of the Subcommittee on Select Education, for his efforts on this bill. Chairman WILLIAMS has brought to the floor of the House, a bill that was initially mired in controversy. The legislation we are considering today represents a bipartisan effort, supported by the administration, with funding levels that represent a serious attempt to contain the Federal deficit. I congratulate Chairman WILLIAMS, and thank the gentleman for the cooperative approach he has taken toward the development of this legislation.

I take special note of those parts of this legislation which will ensure that the benefits of federally supported educational research will be disseminated in a usable form, to local educators and parents. Provisions in H.R. 2246 will improve the Department of Education's dissemination functions and give State and local educators more of a voice in determining the Department's research priorities. The bill will also generate more national data on a State-by-State basis, thereby improving the usefulness of this information to State educational agencies. The purpose of this legislation is to make Federal educational research accessible to the third grade teacher in Del Rio, TX and all parents and educators around the country.

This program has generated a fair number of detractors whose legitimate criticism of the National Institute of Education has in part led to many of the improvements contained in H.R. 2246. This legislation essentially codifies the reorganization of the Office of Educational Research initiated by the Secretary of Education, William Bennett. I am confident that this reorganization will prove to make the office more efficient, and the research more relevant to State and local educators.

This program and this legislation deserve congressional support because of the improvements being proposed in the program and because of the reasonable authorization levels contained in the legislation.

□ 1330

Mr. Speaker, I reserve the balance of my time.

Mr. WILLIAMS. Mr. Speaker, I want to yield time to my colleague and friend, the gentleman from Michigan [Mr. KILDEE], who has taken a big part in this legislation and helped to move it along to this point. Mr. Speaker, I yield such time as he may consume to the gentleman from Michigan [Mr. KILDEE].

Mr. KILDEE. Mr. Speaker, I rise in support of H.R. 2246, the Education Research and Statistics Amendments of 1986. H.R. 2246 would help achieve the goal of quality education by promoting the improvement of American education, by strengthening the education and research development system, and by collecting, analyzing, and disseminating statistics and other data related to education in the United States.

In addition to the NIE provisions, section 5 of H.R. 2246 incorporates provisions from H.R. 147, which I introduced on January 5, 1985, and which is cosponsored by 78 Members of the House. These provisions ensure funding for the national diffusion network. The national diffusion network [NDN] was created in 1974 by the Department of Health, Education, and Welfare. Its objective is to carry out a congressional mandate to improve educational quality through the dissemination of exemplary educational programs to school districts throughout the United States. It is the only program in the country that has this objective. The NDN also provides assistance to school districts that wish to adopt and operate any of these programs. Though relatively small, the NDN as amassed an impressive record of success in meeting this objective.

Since 1974, the NDN has been fostering the improvement of educational practice in school districts in all 50 States, the District of Columbia, the Virgin Islands, and Puerto Rico.

This provision merely ensures funding under the Secretary's discretionary fund by moving it into tier I of this fund.

Currently, NDN programs are funded from tier II of the Secretary's fund.

The national diffusion network has been funded each year since 1977.

The provisions of this section would take no money away from any of the other programs currently funded by the Secretary's fund, since NDN programs have been funded from teir II of this fund since 1981.

This provision was supported by the chairman of the Select Education Subcommittee, which reported this legislation, and was cleared with the ranking minority member of the subcommittee. In addition, it was supported by the chairman and ranking minority member of the Subcommittee on Elementary, Secondary and Vocational Education and was adopted at full committee by unanimous consent.

Also incorporated into H.R. 2246 are provisions from H.R. 2210, which I introduced on April 24, 1985. H.R. 2210, adds two principals to the Assessment Policy Committee [APC], a body established by Congress to help assess education policymaking at the local, State, and Federal levels.

H.R. 2210 enhances the important task of assessing the achievement levels of children and young adults in the basic skills of reading, mathematics, and communication.

Congress mandated a national assessment of education progress when it enacted Public Law 95-561, the General Education Provisions Act [GEPA]. The APC is charged with the task of selecting the learning areas to be assessed, developing goals and assessment objectives, identifying appropriate methodology and ground rules for measuring educational progress and determining the form and content to the assessment's report, as well as the method of dissemination. The APC also conducts studies on how to improve the ultimate use of the national assessment.

Principals set the learning climate, are the curriculum leaders and are the ones who implement change in each school. They observe and assess the daily implementation of curricula. Secondary and elementary principals would bring to the APC a much needed perspective of the every day implementation and assessment of

curricula. This measure affords the utilization of this perspective.

Again, Mr. Speaker, I urge my colleagues to support H.R. 2246, which includes these important provisions.

Mr. BARTLETT. Mr. Speaker, I yield 5 minutes to the ranking member of the Committee on Education and Labor, the gentleman from Vermont [Mr. JEFFORDS].

Mr. JEFFORDS. I thank the gentleman for yielding time to me.

Mr. Speaker, I rise in support of the bill before us, H.R. 2246, the Education Research and Statistics Amendments of 1986. I first want to thank all the Members involved from the two subcommittees: Mr. HAWKINS, the chairman of the full Education and Labor Committee; Mr. GOODLING, the ranking Republican on the Elementary, Secondary and Vocational Education Subcommittee; the chairman of the Select Education Subcommittee, Mr. WILLIAMS; and the ranking member of the subcommittee, Mr. BARTLETT for the outstanding work they have done in bringing this bill to the floor.

Further, I want to congratulate the Department of Education for working closely with all of us in a nonpartisan manner. Through all of these efforts we were able to ensure that the research and statistical data collection functions of the Department will continue, will respond more to field initiatives, and will serve the education community and the general public in a more efficient and effective manner.

With greater emphasis being placed on educational excellence through school reform and improvement, there is considerable need for data and reliable research regarding this Nation's schools. We need to have a consistent data base to better understand what is taking place in our schools today. Policy makers at all levels of education, local, State, and Federal, need accurate data in order to make informed decisions regarding the education of this country's children. Such decisions cannot be made without up-to-date, fundamental information about the education system we already have.

This bill reflects the new organizational structure of the Department's research, statistical and education improvement activities administered through its Office of Education Research and Improvement [OERI]. The focus of OERI is to improve the Nation's information base both in the amount of data collected and in its content; to broaden general understanding of educational outcomes through strengthened assessments such as the National Assessment of Educational Progress [NAEP]; to improve dissemination efforts; and to augment the knowledge of successful educational practices through research. For example, the value of peer review with respect to the awarding of education contracts for research has been reaffirmed. NAEP will include data that will allow state policymakers to make interstate comparisons of student achievement, and will include, for example, out-of-school 17-year-olds in its assessment. In addition, not only will the National Center for Statistics be authorized to collect and disseminate data, but it will have the authority to analyze the data collected. All of these factors contribute to the achievement of the overall purposes and goals of the Office of Education Research and Improvement, but more importantly, ultimately in more accessible information, sounder research, and improved educational performance.

I urge my colleagues to support this bill, so that we can continue to know what works.

Mr. BRUCE. Mr. President, I rise in support of H.R. 2246, the Education and Statistics Amendments of 1986 and commend the gentleman from Montana for bringing us a bill which recognizes the importance of these areas to education.

Too often when thinking about education, we forget that much of what is done today comes from a body of knowledge that has been collected, developed, and analyzed by experts in the field of education research. The recent education reforms enacted by States stem from federally supported education research; indeed, "A Nation at Risk" is based on the research and data collected and supported by the National Institute of Education. While we agree that education is primarily the responsibility of States and local governments, I hope we also could agree that the Federal Government should have the responsibility to provide important leadership in the field of education research. I believe that no other unit of government can as efficiently and economically support education research.

In my own district, the University of Illinois, which is home to the National Center for the Study of Reading, has been in the forefront of reading research. Work conducted by the center not only adds to the important body of knowledge necessary for advances in the field but will have direct results on the day to day practice in the classrooms. For example, the center has provided advice to publishers which will translate into important improvements in textbooks; they have also influenced State-wide teacher training and textbook adoption. "Becoming a Nation of Readers," a national report published by the center last year, synthesizes critical research in the field of reading and provides professionals with important understandings on the state of the art in teaching reading.

Mr. Speaker, much of this work would not have been possible without Federal leadership and support. And if education is crucial to this Nation's well being, than it is incumbent upon this Congress to provide support for the very stuff that fuels improvement in the education enterprise.

The bill we consider today contains a number of important aspects that deserve attention. H.R. 2246 will put into law a new reorganization that holds promise for a more logical and efficient operation than we had before. While I am disappointed to see the designation of the National Institute of Education removed, it is my hope that through this new organization, education research and the education community can be better served.

Further, the bill provides a greater opportunity for a balanced portfolio of research and improvement activities. Research initiated by the field is an important component to the overall research agenda. Unfortunately this area has suffered major cutbacks and in 1984 was completely eliminated. Part of the problem is created by sharp declines in overall funding for education research, which when coupled with long-standing institutional commitments, crowd out the potential for any new research initiated and conducted in the field. The consequences of this practice suggest that sparse and less diverse information will be available on which to base future decisions in education.

I believe this bill goes a long way toward correcting this problem. H.R. 2246 requires the Secretary to make sufficient funds available for unsolicited meritorious proposals. To insure this research is relevant, the bill requires the Department to publish proposed research priorities in the Federal Register and allow 60 days for public comments. Finally, the bill allows the National Assessment for Education Process, previously funded by the research account, now to be funded under section 406, the statistics account. This change reflects the new organizational placement of NAEP in the Department and will free up the needed resources for research activities allowed under section 405.

In closing Mr. Speaker the bill we consider today will reaffirm our commitment to education by supporting research and data-gathering activities. This bill will support the important body of knowledge which provides critical information to policy makers at all levels. I urge my colleagues to join me in supporting H.R. 2246.

Mr. BIAGGI. Mr. Speaker, it is my privilege and pleasure to rise today in support of H.R. 2246, the Educational Research and Statistics Amendments of 1986. One of the most important functions of the Department of Education is the production of high quality research and accurate information about the condition and quality of all levels of American education—from elementary through post graduate. To accomplish this task, in 1972, Congress established the National Institute of Education to assist in identifying and solving the problems in American education, to promote the reform and revitalization of our education systems, to strengthen scientific and technological aspects of education, to establish an educational research and development system, and to provide equal, high-quality educational opportunity for all regardless of race, color, religion, sex, age, handicap, national origin or social background. In 1974, Congress authorized the establishment of the National Center for Education Statistics, to collect and disseminate statistics and other data related to education in this and other countries. Last July, the Secretary of Education created the Office of Educational Research and Improvement by consolidating the National Institute of Education

and the National Center for Education Statistics along with the Center for Libraries and Education Improvement.

OERI contains five major units: the Office of Research, which carries out most of the familiar NIE research functions; the Center for Statistics, which retains most of the functions of the National Center for Education Statistics; Programs for Improvement of Practice, which primarily aims to inform the education community of the findings of researchers and of methods of exemplary education practices; Information Services, which serves to address the specialized information needs of parents, policymakers, journalists and scholars; and the Library Programs, which makes Federal grants available to support public and research libraries.

H.R. 2246 reauthorizes through fiscal year 1989 the research and improvement activities carried out by the OERI. This legislation is necessary to ensure the research and statistical information necessary to give the education community the necessary tools for improvement and advancement of education. H.R. 2246 provides for assessment of the performance of children and young adults in the basic skills of reading, math, communication and other necessary subjects and skills. It expands the Assessment Policy Committee to include an elementary and secondary school principal. This legislation continues support for labs and centers of research.

This bill expands the purpose of the National Center for Education Statistics to include the analysis of education and statistics as well as the traditional role of collection and dissemination of education information. H.R. 2246 also requires the Secretary of Education to fund the National Diffusion Network, which makes exemplary educational programs available for adoption by schools, colleges and other institutions, under the Secretary's Discretionary Funds.

H.R. 2246 enjoys bipartisan support, as well as the support of the administration. I commend Mr. WILLIAMS and Mr. BARTLETT in their tremendous efforts on behalf of this legislation, as well as Mr. KILDEE in his special initiative on behalf of those who use the National Diffusion Network, and in expanding the Assessment Policy Committee to include both an elementary and secondary school principal. In supporting H.R. 2246, we are supporting an improved national education data base; we are supporting the increased availability of research results to the local school systems and the individual teachers; we are supporting increased research and investigation of new and improved education methods; we are supporting the future of our children and our nation. It is imperative in this age when our education systems does not receive adequate support or funding, in this age when we are "A Nation at Risk," that we continue to support research and development of education ideas in our dedication to make this a nation at its best. I urge my colleagues to join me in supporting H.R. 2246.

Mr. BARTLETT. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. WILLIAMS. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Montana [Mr. WILLIAMS] that the House suspend the rules and pass the bill, H.R. 2246, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The title of the bill was amended so as to read: "A bill to reorganize and improve research and statistics in the field of education."

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. WILLIAMS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 2246, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Montana?

There was no objection.

EXPRESSING THE SENSE OF CONGRESS WITH RESPECT TO AGRICULTURAL LOAN RESTRUCTURING

Mr. DE LA GARZA. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 310) to express the sense of Congress with respect to agricultural loan restructuring and interest rates, as amended.

The Clerk read as follows:

H. CON. RES. 310

Resolved by the House of Representatives (the Senate concurring), That it is the sense of Congress that—

(1) the Farm Credit Administration and the lending institutions of the Farm Credit System should take additional regulatory and administrative actions immediately to help alleviate the unusual financial situation facing many thousands of agricultural producers and farm lenders by providing additional time to resolve these problems in the agricultural sector, recognizing that such actions may be in the best interests of both the Farm Credit System and its borrowers when there is a reasonable prospect that the borrowers will eventually be able to repay the loan;

(2) the Farm Credit Administration and the Farm Credit System lending institutions should—

(A) facilitate and participate in agricultural loan restructuring programs;

(B) classify restructured loans as performing, provided that the payments, as restructured, are being made; and

(C) permit, to the extent feasible, the multiyear amortization of agricultural loan losses;

(3) before instituting a proceeding to foreclose a loan made to a borrower, the Farm Credit System should determine—

(A) the cost of foreclosure; and

(B) the cost of restructuring the loan, using a two-tier or other system of forbearance;

(4) if the Farm Credit System determines that the cost of foreclosure of a loan made to a borrower is equal to or exceeds the cost of restructuring the loan, the System should use restructuring rather than foreclosure. Such restructuring should include consideration of the use of the two-tier loan structure that is based on the borrower's ability to pay and under which—

(A) there would be a reduced interest rate applicable to the second tier of debt, containing the portion of debt the borrower is unable to fully service;

(B) portions of the outstanding principal balance in the second tier of debt are periodically reassigned to the first tier, containing the serviceable debt, so that the outstanding principal in the first tier remains constant; and

(C) there is an agreement that, during the period of the restructuring, all farm debt incurred beyond normal operating expenses would be subordinated to the restructured debt; and

(5) consistent with the purposes and objectives of the Farm Credit Amendments Act of 1985, the Farm Credit Administration should limit its involvement in System business affairs to only those situations where safety and soundness are primary concerns. The Farm Credit Administration should permit production credit associations, Federal land banks, and banks for cooperatives to have flexibility in adjusting their interest rates to more accurately reflect changing market conditions so as to remain competitive in agricultural lending, consistent with the capital needs of the System.

The SPEAKER pro tempore. Is a second demanded?

Mr. COLEMAN of Missouri. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Texas [Mr. DE LA GARZA] will be recognized for 20 minutes and the gentleman from Missouri [Mr. COLEMAN] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Texas [Mr. DE LA GARZA].

Mr. DE LA GARZA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this is a very timely resolution in view of the terrible traumatic times that rural America and the producers of our food and fiber are experiencing at this point in time in our history.

Mr. Speaker, I urge every Member of the House to vote to suspend the rules and pass House Concurrent Resolution 310, as amended.

This legislation represents the strong feeling among the many Members in Congress who cosponsored it that wherever it is possible for Farm Credit System agencies to help farmers avoid foreclosure, everybody benefits by arrangements that keep the farmer on the land while he repays his debts.

I want to thank ED MADIGAN, the ranking minority member of the Committee on Agriculture, and ED JONES and TOM COLEMAN, the chairman and ranking minority member of the

Subcommittee on Conservation, Credit, and Rural Development, for their actions in facilitating timely consideration of the resolution. Also, I commend LINDSAY THOMAS of Georgia, the author of the resolution, for his tireless efforts in support of our Nation's farmers.

Last year, thousands of farmer-borrowers of the Farm Credit System went into bankruptcy or foreclosure under their farm credit loans. These loan liquidations and other adverse factors caused the Farm Credit System, the Nation's largest agricultural lender, to lose an unprecedented $2.7 billion.

The financial crisis facing the agricultural industry has continued unabated in 1986. Many more farmers are threatened with foreclosure or liquidation this year.

With respect to the Farm Credit System itself, if its loan losses increase, the System will be facing disaster and the prospect of a Federal bailout.

Under the plan proposed by the resolution, the Farm Credit System would consider restructuring of loans if the costs associated with foreclosure equal or exceed the costs of restructuring. This approach would reduce both the number of farm foreclosures and the losses to the Farm Credit System.

In addition, under the amendment to the resolution that is incorporated into this suspension, the Farm Credit Administration would be encouraged to give System institutions more flexibility in setting interest rates to farmers at levels that reflect market conditions and that will allow System institutions to be more competitive.

While this legislation shows compassion toward hard-pressed farmers, it also makes good sense. It is far better to allow a dedicated farmer, if at all possible, to stay on the land and work his way out of his difficulties—which in many cases are not of his making—than to move to foreclosure—when the farmer loses, the lender loses, and the rural community they both live in suffers.

Adoption of this resolution will send a strong signal to the Farm Credit System from Congress that we expect the System to prudently adjust its operating procedures to reflect the realities of the current severe depression in the agricultural economy.

Farmers, their lenders, and the Government must work together to overcome present adversities. The plan advanced by this resolution is a sound contribution toward meeting that challenge.

I urge speedy approval of the resolution.

For some it may be too late, to them we can only say, "we tried." To all the others, we pledge our concern and our cooperation within the art of the possible. We have limited resources and, yes, very limited areas wherein we can help; but the issue is of such magnitude and importance to all the American people, that we see it as a moral obligation to help. Hence, we try, and we try, and we try, and with the people of the United States behind us and the good Lord on our side, we hope to help as many as we can.

Mr. THOMAS of Georgia. Mr. Speaker, I rise in support of my resolution, House Concurrent Resolution 310, expressing the sense of the Congress endorsing a cost-effective plan to restructure the debt of the Farm Credit System.

The Farm Credit System is the Nation's largest agricultural lender. It is best recognized through the loans made by its various Federal land bank members, Production Credit Associations, and banks for cooperatives, which operate throughout rural America.

The customers and stockholders of the land banks are our farmers, and this House knows all too well that our farmers are locked in a desperate struggle for survival. The American farm family has been ravaged by droughts, embargoes, plunging crop prices, rising operating costs, and export markets decimated by the overvalued U.S. dollar.

As surely as crops depend on water, fertilizer, and the sweat of a farmer's brow, those same crops could never come out of the ground without credit. To stay in business, in good times as well as bad, a farmer must borrow to secure the resources demanded by modern agriculture.

But last year, thousands of farmers and ranchers throughout the Nation were forced into bankruptcy and foreclosure under the procedures of the Farm Credit System. In the process, the System lost an unprecedented $2.7 billion.

Under the leadership of our full committee Chairman DE LA GARZA, and our subcommittee Chairman ED JONES and our distinguished Republican colleagues, Mr. MADIGAN and Mr. COLEMAN, we have conducted extensive hearings to examine this problem. We have held a number of meetings with representatives of the Farm Credit System.

But first and foremost, we have listened to the men and women who love and farm our land. Their message is clear—the credit procedures employed in the past by the Farm Credit System are in many cases putting viable farmers out of business.

That is why I am here today in support of House Concurrent Resolution 310. This sense of the Congress resolution will not cost the taxpayers a dime. It will not direct by law that the Farm Credit System take any action that it deems imprudent.

What it would do is focus powerful congressional guidance on the issue of farm foreclosures. Those foreclosure orders are relentless, and they are bringing about a devastating and ironic result. The foreclosures are further depressing land values, eroding the equity of the remaining farmers, and ultimately may bring down both good farmers and the Farm Credit System itself. And because prices are depressed, the foreclosure sales themselves are in many cases not covering the defaulted loans.

Many of us have seen this crisis coming for well over a year. We told the FCS that its loan restructuring policies were forcing out of business its best customers. Sadly, those predictions have come true.

That is why on April 8 of this year, I introduced House Concurrent Resolution 310. This is a resolution similar to Senate Concurrent Resolution 122, introduced by Senators NICKLES and GRASSLEY.

I owe a special debt to members of the American Farm Bureau Federation, who have helped fashion the proposals of this resolution and who have been tireless advocates for their farm members. I personally want to thank my own Georgia Farm Bureau for its help.

The resolution calls on the Farm Credit System to use its regulatory and administrative authority to take six basic actions.

First, to allow farmers with viable farming operations to restructure their loans in such a way that they can pay off the balance of the loan with interest.

Second, to classify these restructured loans as performing, provided that the farmer meets his new payment schedule.

Third, to permit to the extent feasible, the multiyear amortization of agricultural loan losses.

Fourth, to compare the cost of foreclosure to the cost of forebearance through loan restructuring, and using restructuring when the cost is the same or less than foreclosure.

Fifth, when restructuring is feasible, to consider a two-tier system of repayment. This means dividing the amount of an outstanding loan into two parts or tiers.

The first tier would require regular payments of both interest and principal at a level which the farmer can reasonably be expected to pay. The farmer would be required to pay interest only, and at a reduced rate, for the amount of the unpaid loan that is held in the second tier. But as portions of the principal of the loan are paid off in the first tier, then a portion of the debt in the second tier would be shifted to the first tier. This means that eventually the entire amount of interest and principal would be repaid.

Finally, the resolution states the sense of the Congress that the Production Credit Associations, Federal land banks, and banks for cooperatives have flexibility in adjusting their interest rates to reflect changing market conditions so as to remain competitive in agricultural lending. The Farm Credit Administration should be involved in the System's business affairs only in those situations where safety and soundness is a primary concern.

This flexibility to meet market conditions must be fully consistent with the Farm Credit Amendments Act of 1985 and all relevant regulations de-

signed to protect the integrity of the System.

This final provision was added to the resolution to reflect the new information we have about the need for the System to be more competitive in light of today's lower interest rates. This provision has the support of the American Farm Bureau, the majority and minority leadership of the committee, and the U.S. Department of Agriculture.

This provision is relevant because the artificially high rates being charged to financially sound farmers are forcing them out of the Farm Credit System. Without these valued customers, the System will be doomed to fail, and a massive taxpayer bailout will be sought.

Mr. Speaker, my resolution would not mandate that the Farm Credit System make any changes in loan procedures that would endanger the stability of its resources. It puts no burden on the taxpayer. It simply expresses our view that farmers be given a chance to repay their debts, and it gives the Farm Credit System some guidance to extend reasonable consideration to its farmer-borrowers.

I am pleased to report that since I introduced this resolution on April 8, some 195 Members of Congress have joined as cosponsors.

I am also pleased that on May 8, the Farm Credit System reacted to this initiative by announcing a new system of guidelines for foreclosures. These guidelines incorporate an emphasis on restructuring loans rather than foreclosing.

While it is too early to see how these guidelines will be implemented in the field, I am encouraged by this development and congratulate the System for making the change.

Now we in the Congress have the chance to see that this momentum for reform continues. The Farm Credit System needs the support of the House to keep moving forward. This resolution gives it a mandate to look at its loan practices with a new eye, and to take reasonable and prudent action to prevent disaster.

Mr. Speaker, rural America echoes with the stories of desperate men and women who fought, and lost their fight, to save their land. Family financial ruin is a matter of routine. Illness, death, and suicide are not uncommon consequences.

I was a farmer before my constituents gave me the greatest honor of my life by electing me to the Congress of the United States. Now, in my native State of Georgia, farmers have stood knee deep in the dust of what is developing into the worst drought in our history.

Those farmers are my neighbors and my friends. They are part of the agricultural miracle that has made the United States the most powerful Nation on Earth. Now they are bruised and battered, but all they are asking is a chance to work their way out of debt.

I ask my colleagues to vote in support of this resolution, and to send a signal to the Farm Credit System that we want to keep our farmers on their land.

□ 1345

Mr. COLEMAN of Missouri. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am pleased to rise in support of House Concurrent Resolution 310. This nonbinding resolution expresses Congress' concern for the borrowers of the Farm Credit System by encouraging the Farm Credit System and the Farm Credit Administration to work with financially stressed borrowers.

The System should be commended for its announcement last week of a new loan restructuring policy to help troubled borrowers. The resolution we have before us today is very consistent with the new policy adopted by the System. The System announces that restructuring would be the preferred alternative when: First, the borrower has acted in good faith to manage his business affairs and has been cooperative with the bank or association; second, the borrower can present a plan with reasonable assumptions showing a high probability of return to financial viability as a result of the restructuring; and third, the alternative chosen will minimize any loss that will be borne by the other farmer-owners of the bank or association.

This resolution confirms Congress' support for the new policy adopted by the Farm Credit System. It expresses the sense of Congress that the Farm Credit System should restructure troubled loans rather than foreclosing when it is least costly to the System. Specifically, it encourages the Farm Credit Administration and the Farm Credit System to: First, facilitate and participate in agricultural loan restructuring programs; second, classify restructured loans as performing, providing the payments, as restructured, are being made; and third, permit, to the extent feasible, the multiyear amortization of agricultural loan losses.

House Concurrent Resolution 310 also encourages the Farm Credit System to compare the cost of foreclosing on a borrower to the cost of restructuring a loan. In cases where the cost of foreclosure is equal to or exceeds the cost of restructuring, the System should consider the two-tier debt restructuring.

Finally, the resolution encourages the Farm Credit Administration to limit its involvement in the day-to-day operations of the Farm Credit System and to allow some flexibility to the System in adjusting interest rates so that the System can offer more competitive rates.

I support the new policy on restructuring announced by the System, and I encourage my colleagues to show their support for actions taken by the System by adopting this resolution today.

Mr. DE LA GARZA. Mr. Speaker, I yield such time as he may consume to the chairman of the subcommittee, the gentleman from Tennessee [Mr. JONES], who has done yeoman work in this endeavor and in this area.

Mr. JONES of Tennessee. Mr. Speaker, I thank the gentleman from Texas for yielding time to me.

Mr. Speaker, I rise in support of House Concurrent Resolution 310, and want to express my sincere appreciation to the gentleman from Georgia [Mr. THOMAS] for his leadership and diligence on this important issue.

Farm operators across this Nation are continuing to suffer under the most severe economic crisis the agriculture industry has experienced in 50 years. As more and more farmers are forced against the wall, agricultural lenders are also finding themselves under tremendous pressure to balance loan forebearance against the difficult realities of credit worthiness.

The resolution we are considering makes it clear that Congress intends for the Farm Credit System to make every reasonable effort to assist its borrowers through sensible alternatives to foreclosure. Likewise, the Farm Credit Administration should practice reason in its regulatory responsibilities over the system by permitting prudent credit policies which are beneficial to both the system and its borrowers.

I was greatly encouraged last week when the leaders of the Farm Credit System announced plans to establish a systemwide policy to promote restructuring of troubled loans, and to seek authority from the Farm Credit Administration to reduce interest rates in order to remain competitive in agricultural lending.

I include an article from last Friday's Wall Street Journal which reports on the system's latest actions.

[From the Wall Street Journal, May 9, 1986]

FARM CREDIT SYSTEM LEADERS ACT TO AID BOTH HEALTHY AND TROUBLED BORROWERS

(By Albert R. Karr)

WASHINGTON.—Farm Credit System leaders announced a double-barreled plan aimed at retaining its borrowers who are in good financial shape while helping many who aren't so well off.

The Farm Credit Corp. of America, a policy group for the huge government-chartered, farmer-owned cooperative lending network, said its 37 member banks have agreed on the plan. The banks hope the plan will keep the beleaguered system viable and will head off any need to seek federal funds.

In recent months, many of the stronger farmer-borrowers have left the system to seek lower interest rates from commercial banks. To stem these departures, the member banks plan to present a blanket request today to the Farm Credit Administration, their federal regulator, that would permit interest-rate reductions for many farmers.

The plan most likely would supersede a raft of individual petitions for general or selective rate cuts that the banks have made to the administration, with mixed response, the Farm Credit Corp.'s president Brent Beesley told a news conference.

The banks will be seeking rate reductions generally of one-half to one percentage point, bringing rates to a range mostly between 10% and 11.5%.

While cutting rates might hurt some banks financially for a while, not doing so would result in a greater financial loss from the outpouring of disgruntled borrowers, officials said.

FEWER LOANS OUTSTANDING

The system's loans outstanding have shrunk by about $13 billion over the past 15 months, largely because of this borrower exodus, Mr. Beesley said. System banks' share of the nation's total farm debt has declined to 28% of the $200 billion total from 34% a year earlier.

The marketplace requires the rate reductions "regardless of the impact on current earnings," he said. The credit system had a net loss of $2.69 billion in 1985, and this week reported a loss of $206 million for the 1986 first quarter.

Mr. Beesley said the system will have to dip deeper into its reserves to keep operating, but if farm conditions don't worsen and the interest-rate changes are approved, he'd give 5-to-3 odds that the system's banks won't have to seek a federal bailout.

LINE OF CREDIT AUTHORIZED

Congress last December enacted legislation authorizing a Treasury Department line of credit for the system. Congress didn't approve specific funds, and required an appropriation for any funding that may be deemed necessary.

For borrowers in economic difficulty, system banks agreed to restructure as many loans as possible, or to show forbearance while the farmer seeks to get in shape to repay his loans, officials said. Many of the banks are already doing this, but a more uniform, concerted effort is needed, Mr. Beesley said.

The credit system is under congressional pressure to foreclose less on weak borrowers and stick with them longer. "We think that's good business, and we want to get on with it," said Delmar Banner, president of the Farm Credit Council, the system's Washington-based trade association.

The banks would restructure loans—often involving reduced obligations on repayment of principal or lower interests payments—whenever that wouldn't cause a bigger loss to the lender than if it forecloses, Mr. Beesley said.

But with farm finances having progessively worsened in recent years, some foreclosures are inevitable, he said. Most occur after the lender has worked with the farmer for two or three years in an effort to keep him financially afloat, usually with some debt restructuring, he said.

Probably one-tenth of those borrowers who are in bad financial shape will wind up being foreclosed, Mr. Beesley added.

Mr. COLEMAN of Missouri. Mr. Speaker, I yield 2 minutes to the gentleman from Minnesota [Mr. STANGELAND].

Mr. STANGELAND. Mr. Speaker, I thank the gentleman for yielding this time to me.

Mr. Speaker, as a coauthor of House Concurrent Resolution 310, I rise in strong support of the resolution. This resolution would urge the Farm Credit System to take immediate steps toward a restructuring policy for the debt of its financially stressed borrowers. It also encourages the Farm Credit Administration to permit the PCA's, the Federal land banks and the banks for cooperatives, to exercise flexibility in adjusting their interest rates to more accurately reflect changing market conditions.

During this fiscal year the focus has been on the immediate problems on one-third of our Nation's farmers who hold two-thirds of the agricultural debt. About one-half of this group, 100,000 to 125,000 farmers are at the point where substantial debt restructuring will be needed over the next 2 years to avoid liquidation, either voluntary or forced. Many of these farmers are in my district in Minnesota. A substantial reduction in debt load is absolutely essential. Only this will bring long lasting financial relief to these farmers.

House Concurrent Resolution 310 is another step in the direction of providing the help that is urgently needed by farmers who through no fault of their own have fallen on hard times. The Farm Credit System has a certain responsibility to these loyal farmers and borrowers. This resolution provides that the system carry out the procedures that are necessary to change the present attitude of the Farm Credit System from one of foreclosure to one of forbearance. And I urge my colleagues to support it.

□ 1355

Mr. JONES of Tennessee. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. COLEMAN of Missouri. Mr. Speaker, I yield 2 minutes to the gentleman from Wisconsin [Mr. GUNDERSON].

Mr. GUNDERSON. Mr. Speaker, let me begin by thanking the distinguished ranking minority member of our subcommittee, our distinguished chairman, and my good friend, the gentleman from Georgia, for his efforts and leadership in this regard.

Mr. Speaker, I am pleased to rise in support of House Concurrent Resolution 310 introduced by my good friend from Georgia, Mr. Thomas.

The agriculture credit situation in this country is without question greatly distressed. The Farm Credit System lost $2.7 billion in 1985 and projections for 1986 are not bright. In the first quarter, nonaccrual loans increased $613 million to total nearly $6 billion. Other high risk loans increased $1.1 billion to $5.1 billion. Total capital for the Farm Credit System was $7.9 billion a $452 million drop from December 1985.

House Concurrent Resolution 310 expresses the sense of Congress that the FCS should restructure rather than foreclose on loans so farmers and ranchers with viable farming operations have a chance to succeed.

Reducing principal or dropping interest rates a couple points can make the difference between turning the corner or leaving the farm for producers who were caught in a situation they had no control over.

Specifically, the pending legislation, suggests that the FCS implement a two tier debt restructuring program. The first tier would include payments of interest and principal on an amount agreed to by the lender and borrower. The second tier would include all remaining debt and require only payments on the interest. As a portion of the tier one debt is paid off, debt would shift from tier two to tier one until all tier two debt is paid off.

As such, the suggested program is not one of debt forgiveness but rather debt restructuring to allow repayment over a greater period of time.

Clearly, the recent announcement by the Farm Credit System of a system wide plan to restructure troubled loans is a step in the right direction.

Under the FCS program, interest rate reductions, extended maturity dates, reductions in principal and accrued interest will be used to ease repayment by farmers and ranchers.

Actions like House Concurrent Resolution 310 and the program announced by the Farm Credit system are positive steps toward a better agriculture in the future. I commend all the cosponsors of House Concurrent Resolution 310, the American Farm Bureau and the Farm Credit System for their dedication and commitment toward a solution to the credit crisis in American agriculture.

Mr. COLEMAN of Missouri. Mr. Speaker, I yield 3 minutes to the gentleman from Oregon [Mr. ROBERT F. SMITH].

Mr. ROBERTS. Mr. Speaker, will the gentleman yield?

Mr. ROBERT F. SMITH. I yield to the gentleman from Kansas.

Mr. ROBERTS. Mr. Speaker, I rise today in strong support of House Concurrent Resolution 310. The farmers in my district, as well as those across the Nation are struggling to overcome the tough economic times that the entire agriculture industry is facing.

House Concurrent Resolution 310 expresses the sense of Congress that

the Federal Farm Credit System should take immediate steps to make its loan policies more flexible for struggling producers who have a chance of repaying their debts, or face stiff resistance in Congress to requests for funds to shore up the System.

Let me make it clear, this resolution is not advocating that the FCS should bankrupt itself with further bad loans, nor does it suggest that we would dig the farmers' credit hole any deeper. But there's a critical need for some common sense to balance the hard calculations against compassion and forbearance. I've visted with several farmers in my district that have presented workable, viable restructuring plans only to be told that forclosure is the only option that will be considered.

The goal of this resolution is to force the FCS to step back some from its hard line and work with financially distressed farmers and banks. By letting their calculators get ahead of commonsence, the FCS is fueling a new escalation of the crisis in farm country. We've been successful in the past in convincing Federal bank regulators that our small rural banks need need flexibility in farm lending. My hope is that the same will be true of the FCS.

I applaud the system's recently announced loan restructuring plans designated to assure a fair and consistent approach to working with distressed borrowers. I strongly urge the FCS to do everything in its power to insure that this new program is implemented as quickly as possible, and to insure that it is used.

Mr. ROBERT F. SMITH. Mr. Speaker, I rise as a cosponsor of this legislation to urge support of House Concurrent Resolution 310 by my colleagues.

The purpose of this bill is simple: it would give a financially strapped farmer the opportunity to restructure his loans rather than face foreclosure when there's a reasonable prospect that restructuring will lead to repayment of the loan.

Foreclosure and refinancing have always served as alternative on the opposite sides of a distressed farm's utlimate fate. This bill, however, provides a clear economic criteria to guide the Farm Credit Administratioin in its choice of one option or the other.

The FCA is encouraged to compare the costs of foreclosure to the cost of restructuring and proceed toward restructuring when it costs the same or less than foreclosure.

The matter of taking a home and business away from someone is always fraught human sorrow. But this bill gives us an opportunity to answer bad times in a way which is truly compassionate, as well as economically sound.

By definition, foreclosure represents failure. But those of us who have worked in, lived in and understand the life of farming and ranching know that failure of a business that is so completely at the whims of nature, Government, markets and the free enterprise system itself doesn't represent failure of a farmer or failure of a rancher.

Most often, farm or ranch foreclosures represent the results of a crippling series of bad circumstances.

There are, certainly, people who have simply chosen the wrong profession, and there are circumstances that show no hope of improvement.

In other words, we need to give the Farm Credit Administration a chance to foreclose if it is the absolute last resort. FCA won't follow loan restructuring processes when there is no reasonable chance to recover the business itself.

But where it's possible that we can lighten the burden of loans enough to once again make the business of farming viable, that must be our first choice.

Some in this Chamber feel that there's a price tag on every generosity Congress provides, in keeping with the old cliche that, "no good deed goes unpunished."

Well, the fact is that foreclosure sales seldom recapture the investor's total interest in a property. Every time we foreclose, the Government's financial loss simply compounds the human loss of the family involved.

Economically, this bill makes sense. Last year, FCA foreclosed on properties worth $2.7 billion when thousands of farmers and ranchers could not meet required payments on their loans.

The bill will open the door to recovery from failure. It will allow us to avoid some of the human anguish that follows the failure of a business when that failure is due to bad times rather than bad management.

And it will make a path to full recovery of Government's investments—slower, I grant, but much more surely than we would ever recover from simple foreclosure.

Few bills give Congress the chance to demonstrate its understanding of the human condition without costing us the proverbial arm and a leg.

When we have the chance—as we do today—we must seize it. Please join me in supporting today's passage of House Concurrent Resolution 310.

Mr. COLEMAN of Missouri. Mr. Speaker, I yield 2 minutes to the gentleman from Michigan [Mr. SCHUETTE].

Mr. SCHUETTE. Mr. Speaker, I rise in strong support of House Concurrent Resolution 310, and I wish to commend the gentleman from Georgia [Mr. THOMAS], as well as the gentleman from Texas, Chairman [DE LA GARZA], the gentleman from Illinois [Mr. MADIGAN], the gentleman from Tennessee [Mr. JONES], and the gentleman from Missouri [Mr. COLEMAN], for their leadership on this issue.

Mr. Speaker, no farmer is immune from the effects of foreclosure. And while not all farmers face this tragedy now, all are threatened by it. When circumstances beyond the control of the farmer result in foreclosure, the land sold at auction, land which has plummeted in value in recent years, then later often brings even less than market value. When foreclosures increase, the amount of land on the market also increases. That, in turn, depresses land prices further, and solvent farmers find that their land value, the collateral for their loans, eaten away at an alarming rate, pulling them even closer to ruin.

The irony is that these fire-sale farm auctions often provide less money than could be secured by allowing viable farmers to restructure their loans.

This vicious cycle can and must be stopped. Rather than stand by while farmland is dumped on this depressed market, I ask you to support the bill before us today expressing the sense of Congress that the Federal Farm Credit Administration and its associated agencies and lending institutions should use their existing authority to restructure loans for viable farming operations instead of foreclosing, and to take other actions to help farm families.

I say, let us not foreclose—let us have forbearance. And I say, let us permit production agriculture to readjust and to reamortize loans—let us not foreclose on the hopes and dreams of farm families and production agriculture across this land.

I urge my colleagues to support this effort, to lend a hand, to have forbearance, not foreclosure, and to help American agriculture continue to prosper.

Mr. COLEMAN of Missouri. Mr. Speaker, I yield 1 minute to my colleague, the gentleman from Missouri [Mr. EMERSON].

Mr. EMERSON. I thank the gentleman for yielding time to me, and I commend the gentleman and the chairman of this distinguished subcommittee, the gentleman from Tennessee [Mr. JONES], for their great work in this effort.

Mr. Speaker, last year the Congress passed legislation reorganizing the Farm Credit System and setting up a mechanism through which the Federal Government could come to the aid of the system if it became necessary. Of course, the whole purpose of the restructuring was to try to avoid the necessity of Federal involvement. The Farm Credit System is an autonomous organization and I believe that the Congress should refrain from interfering with its operation as much as possible. With the possibility of a Federal

rescue of the system, though, I believe it is appropriate for the Congress to make its views known as how the FCS should handle its financial problems and how it should deal with farmers. For this reason, I became a cosponsor of House Concurrent Resolution 310 which is intended to let the FCS know what the Congress thinks.

First and foremost, the FCS should allow farmers with viable farming operations to restructure their loans in such a way that they can pay off the balance and interest. Obviously, if this can be achieved, it is in everyone's best interest. Second, I certainly believe that the FCS should restructure loans when it can be determined that foreclosure will be more costly to the system. If the value of the land is too low, everyone can lose on a foreclosure. When restructuring is feasible, I think consideration should be given to a "two-tier" system of repayment which would spread out payments in such a way that the farmer could reasonably be expected to service his debt.

It is important to note that the Congress is not mandating that the FCS make any changes in its procedures. It is still the responsibility of the FCS to set policies that will protect its own stability. The resolution does send a message from the Congress that we feel that the FCS should apply forbearance to its foreclosure policies. The response of the FCS to that message will be crucial in determining how we might respond if the FCS needs Federal assistance down the road.

Mr. COLEMAN of Missouri. Mr. Speaker, I yield 2 minutes to the gentlewoman from Nebraska [Mrs. SMITH], who looks after the interests of American farmers on the Appropriations Committee.

Mrs. SMITH of Nebraska. Mr. Speaker, I rise in support of House Concurrent Resolution 310, which would express the sense of Congress that we should encourage the Farm Credit System to practice forbearance and restructuring of farm loans.

I urge my colleagues to vote for this resolution in establishing that the concerns of our Nation's farmers and ranchers are indeed being heard and that we, in Congress, understand the problems they face and want to do all we can to see that the future of their farms is not further jeopardized.

This is the proper course of action to take since we have agreed as a body that past governmental policies are to blame for most of the present economic problems faced by our farmers. Our lending institutions have to be encouraged and allowed to operate in a manner to provide assistance to our beleaguered farmers. Our farmers and ranchers need more time to work out their financial problems.

Encouraging loan restructuring, and multiyear amortization of agricultural loan losses is a positive step in reaching the goal of putting the American farmer back on his feet and bringing financial prosperity back to agriculture. After all, agriculture did not get into this position in 1 year, and we should not expect that the typical farmer or rancher could dispose of his entire debt in 1 year.

The Farm Credit System [FCS] has the responsibility to help its client/owners regain the economic vitality that once was American agriculture, especially when it is the largest agricultural lender. It has more than $60 billion of the $200-plus billion in outstanding farm loans, and its loan authority is solely toward agriculture. This places it in the forefront of agricultural lending, and the lending practices that it follows will in large measure affect the other lending institutions who have already eased their lending policies.

In Nebraska alone, more than 1,200 farms have gone out of business between 1982 and June 1985. One primary reason was the high interest rates being charged to the agricultural sector. While most of the rest of the economy was enjoying falling interest rates, many lenders including the FCS were raising the rate of interest they charged farm borrowers.

The rates of interest being charged farm borrowers have a fairly large range. The rates are different for the various types of loans; for example, farm ownership loans vary between 12 and 13 percent while operating loans vary between 10.5 and 14 percent.

Another problem caused by the troubled farm economy is the escalation in bank failures. This, of course, was one of the reasons the Federal Reserve System, the FDIC, and the Comptroller of the Currency eased certain banking regulations, giving banks more flexibility to deal with troubled borrowers. Now farmers have a better chance of keeping loans current once the loans were rewritten with lower interest rates and payments.

With less pressure to put assets on the chopping block, values of farm property will slow in their, heretofore, relentless downward spiral. By keeping the existing farmers on their land, further erosion of land and machinery values can be halted. In addition, these farmers will be able to keep agricultural lenders like the FCS in business. The outcome, thus, has two significant effects: one, to maintain the family farm; and, two, to keep agricultural lenders viable and competitive with the rest of the economy.

I would also like to point out that I have already cosponsored the Landowner Protection Act of 1986, H.R. 4369, which addresses this problem in a similar manner. The primary thrust of H.R. 4369 is to require the FCS to restructure a loan if the cost associated with the foreclosure is equal to or exceeds the amount that a borrower can repay. This would in effect minimize losses for the FCS and probably would allow the FCS to lower interest rates.

My bill stipulates that any participating borrower would have to be a stockholder behind in his principal or interest payments and unable to make timely payments. Furthermore, the borrower would have to have gross annual sales of farm products in excess of $40,000 and derived greater than or equal to 50 percent of his gross annual income from agriculture in at least 2 of the last 5 years.

As I understand the matter, the Farm Credit System itself is on the brink of administratively adopting a loan restructuring plan similar to the ones contemplated in House Concurrent Resolution 310.

I insert in the RECORD a copy of a letter to me from the Federal Farm Credit Council, dated May 8, detailing the Farm Credit System's intentions, subject to the approval of the Farm Credit Administration (FCA).

In conclusion, I urge the Congress to vote for House Concurrent Resolution 310 to encourage the FCA to approve the system's loan-restructuring plans, or some variation thereof. But if the FCA fails to follow through, I will be urging the House to turn to my bill, H.R. 4369, in mandating this loan-restructuring plan forthwith. We must act swiftly and decisively to help keep many families on their land and their land off the glutted real-estate markets.

THE FARM CREDIT COUNCIL,
Washington, DC, May 8, 1986.

Dear Member of Congress:

During this week, the Farm Credit System has adopted Systemwide Guidelines and Definitions for Restructuring Troubled Loans. Pursuant to these guidelines, foreclosure is clearly the least desirable alternative. A copy of these guidelines is enclosed.

The system has also adopted this week the Farm Credit System Model Pricing Program. Upon approval by the system's regulator, the Farm Credit Administration, this new pricing program will give the system that ability to provide its borrowers with a wide range of products at competitive prices. The Model Pricing Program addresses concerns regarding the impact of competitive pricing on the earnings of the system. However, it is the opinion of the Farm Credit System that the marketplace requires the system to price its products competitively, regardless of the impact on current earnings. The system is not a "public utility" and cannot charge its current borrowers to cover problems resulting from a deteriorating agricultural environment and/or past errors in managing interest rate and/or credit risk. Borrowers with options are leaving the system; other borrowers are being unfairly treated.

We will keep you advised of developments regarding the implementation of the Guidelines for Restructuring Troubled Loans and

the FCA approval process for the Model Pricing Program.

Sincerely yours,

DELMAR K. BANNER.

FARM CREDIT SYSTEM ANNOUNCES LOAN RESTRUCTURING PLANS

WASHINGTON, DC.—The Farm Credit System today announced plans to implement a nationwide loan restructuring policy designed to assure a fair and consistent approach to restructuring the debt of financially stressed borrowers.

The loan restructuring policy has been endorsed by the presidents of the 37 Farm Credit Banks and was approved today by the board of directors of the Farm Credit Corporation of America. The FCCA is the central policy-making organization and spokesman for the Farm Credit System.

"This policy is an important step for the system and the nearly 900,000 farmers and ranchers that borrow from it," said H. Brent Beesley, president and chief executive officer of the FCCA. "The decisions made this week by system leaders clearly represent the beginning of a new era in Farm Credit."

The Farm Credit System also announced that it has developed a proposal for changing the way it sets interest rates. This proposal will be presented tomorrow to the Farm Credit Administration, the system's regulator.

The loan restructuring policy and interest rate plans are part of a business plan that is designed to enable the Farm Credit System to achieve the long-term strategic objectives and mission statement unanimously agreed to recently by the presidents of the 37 Farm Credit Banks and approved by the FCCA board of directors.

The Farm Credit System's mission is to be the premier provider of credit and financial services to farmers, ranchers, cooperatives and other eligible entities. "In other words," Beesley said, "We are going to serve American agriculture better than anyone else. The Farm Credit System is back," he added, "and I want our customers, our employees and our competitors to know it."

In regard to the system's proposal to change the way it sets interest rates, Beesley noted the system is under a great deal of pressure to lower its rates in many areas of the country.

"In our discussions with borrowers, farm groups, trade and commodity organizations and Congress, we are being told that the Farm Credit System needs to be more competitive in its interest rates," Beesley said. "As a result, we have developed a model pricing plan which we are going to discuss with our regulator. We know that FCA shares our concern about interest rates and that the agency is eager to review our proposal.

"What we are proposing to do," Beesley added, "is to develop a method of setting interest rates that will give the system the flexibility to adjust its rates according to changes in the market. This is preferable to our current method of setting rates which is based on an 'average cost of funds' approach. To get more competitive, we need to be able to price our products and services on an individual loan basis considering the competition, the risks involved and the costs incurred. We'd like to replace our traditional pricing strategy by moving to a marginal cost of funds strategy based on the yield curve of U.S. Treasury obligations."

A related element of the system's business objectives is to offer customers a variety of loan programs from which they can select the one that best suits their needs and financial situations. This includes both variable- and fixed-rate loans and a variety of amortization and repayment options.

Beesley noted that "Farm Credit leaders demonstrated in their meetings here this week their resolve to overcome the system's financial problems and make the difficult decisions on restructuring loans, cost of operations and pricing that must be made for the system to succeed."

FARM CREDIT SYSTEM GUIDELINES AND DEFINITIONS FOR RESTRUCTURING TROUBLED LOANS, MAY 6, 1986

GENERAL

The banks and associations of the Farm Credit System will administer troubled accounts with the objective of utilizing FmHA loan guarantees and other loan restructuring measures, including participation in federal- and state-funded interest rate buydown programs, as preferred alternatives to foreclosure.

Restructuring should be accomplished on a case by case basis when:

The borrower has acted in good faith to manage his business affairs and has been cooperative with the banks or association;

The borrower can present a plan with reasonable assumptions showing a high probability of return to financial viability as a result of the restructuring; and

The alternative chosen will minimize any loss that will be borne by the other borrowers/stockholders of the bank or association.

(Resolution #7 unanimously adopted by the FCS bank Chief Executive Officers on March 24, 1986, and the FCCA Board of Directors on April 2, 1986.)

The objective of these System Guidelines and Definitions for Restructuring Troubled Loans is to provide a reasonable alternative to foreclosure and property acquisition by:

1. Generating the greatest return of principal and interest to the FCS while protecting the interests of other stockholders.

2. Encouraging FCS participation in Federal and State programs which offer relief of financially stressed borrowers.

3. Standardizing key definitions which differentiate between normal forebearance and troubled debt restructuring and encouraging consistency in application.

FOREBEARANCE

Forebearance is the act of a creditor who refrains from enforcing contractual obligations, rights, or claims against borrowers when a debt falls due. Loan servicing actions such as rescheduling of principal and interest payments, change of installment dates, temporary forebearance of payments due, renewal, of unpaid principal and interest, agreed carryover, waivers, subordinations, etc., are examples of forebearance. The common characteristic of this type of restructuring is that the lender receives all that was agreed to in the original contract. There is no special accounting treatment since no concessions are granted.

Forebearance shall continue to be offered on a case by case basis to assist worthy borrowers provided the borrower is:

1. Acting in good faith to manage and operate the agricultural business properly;

2. Applying the proceeds of production (minus reasonable and necessary living and operating expenses) to the payment of debt obligations;

3. Maintaining the buildings, improvements, and farm assets in a reasonable state of repair;

4. Working out of the existing situation and has the resources to operate the agricultural business efficiently.

TROUBLED DEBT RESTRUCTURING

"A restructuring of debt constitutes a troubled debt restructuring if the creditor for economic or legal reasons related to the debtor's financial difficulties grants a concession to the debtor that it would not otherwise consider. That concession either stems from an agreement between the creditor and the debtor or is imposed by law or a court." (FASB 15)

The common characteristic is that the lender negotiates with the borrower and receives in return less than the lender had agreed to in the original loan contract. A Compromise of Indebtedness described in Section 4512 of the Regulations is a troubled debt restructuring. Troubled debt restructuring is subject to special accounting treatment as defined in Financial Accounting Standards #15.

Examples of loan servicing actions which constitute troubled debt restructuring are:

1. Transfer of real estate, receivables, or other assets to the lender to fully or partially satisfy a debt, including a transfer resulting from foreclosure or repossession.

2. Grant an equity interest to the lender to fully or partially satisfy a debt, unless the equity interest is granted pursuant to existing terms for converting the debt into an equity interest.

3. Modify the terms of a debt by:

Reducing the stated interest rate for a period of years, up to the remaining original life of the debt.

Extending the maturity date at a stated interest rate lower than the current market rate.

Reducing the principal amount of the debt.

Reducing accrued interest.

Troubled debt restructuring is to be considered on a case by case basis. The analysis shall document the potential cost and benefits of restructuring to the bank or association involved versus the loss which would likely occur using traditional methods of asset liquidation and foreclosure. Restructuring should be considered when the system will otherwise take a loss.

As a minimum the following factors are to be used:

1. The borrower is acting openly and in good faith, is caring for the collateral, has pledged or agrees to pledge all assets of reasonable value, has good farm management skills, and has a lifestyle adjusted to the current financial situation.

2. Complete and current balance sheets and income and expense statements will be obtained, analyzed and verified.

3. Complete and current appraisals and field reports should be made and analyzed. A projection of the lender's field realizable value of the collateral is to include expected movement of the market and the local level of stress.

4. A complete legal audit of the loan file is to be made to assure the sufficiency and accuracy of all loan documents.

5. The borrower is to present a workout plan and cash flow analysis using reasonable projections showing a high probability of orderly debt retirement as a result of the proposed restructuring.

6. Communication between all creditors is expected, especially the major long- and short-term lenders. Concessions from other creditors should be negotiated.

7. FmHA loan guarantees and interest rate buydown programs or any other Federal- or State-sponsored financial assistance programs should be utilized to the extent practicable.

8. The borrower should be advised to consult legal and tax counsel prior to finalizing troubled debt restructuring.

9. Normally principal should not be forgiven; it may be set aside on a deferred, reduced, or non-interest bearing note with a definite maturity.

10. Generally, the least cost alternative should be selected. While forebearance may be appropriate, debts that can clearly be collected through other means should not be restructured.

When restructuring troubled debt, certain operational issues should be addressed.

1. Troubled debt restructuring should be administered through one main focal point in each district. Districts are encouraged to establish a specialized loan restructuring unit to assist, coordinate, and control such cases. Prior to delegating restructuring authority to associations, districts should establish clear understanding and controls to realize consistent results.

2. Districts should develop a system to follow-up and supervise completed troubled debt restructuring actions to ascertain the case by case effectiveness.

3. Accounting treatment of all troubled debt restructuring shall be in accordance with Generally Accepted Accounting Principles.

4. Each district general counsel should review applicable state laws prior to implementation of these guidelines.

5. Nonaccrual loans shall be reviewed in accordance with Section 307 of the Farm Credit Act Amendments of 1985.

6. Periodic reports should be developed to provide the number and volume of loans and concessions granted according to each type of forebearance and troubled debt restructuring. The reporting data will be used to assess the overall effectiveness of these guidelines.

Mr. COLEMAN of Missouri. Mr. Speaker, I yield 2½ minutes to the gentleman from Louisiana [Mr. MOORE], who is a hard worker in this Congress on behalf of family farmers.

Mr. MOORE. I thank the gentleman for yielding.

Mr. Speaker, I compliment the gentleman from Georgia [Mr. THOMAS] for offering this resolution. I am privileged to be on of his two original cosponsors.

I did so because this resolution is needed, it is needed to send a message to the Farm Credit Administration, that we are asking for the same kind of flexibility for farm loans in this country made by the Farm Credit System as lenders in general are now getting from banks across the country.

The Federal bank examiners were instructed some many months ago to allow two-tiering of loans all across the country in commercial banks. We have had some difficulty, some lack of understanding, some lack of communication in being able to arrange that; the same thing to the Farm Credit Administration, the Farm Credit System, for farmers. I find it very hard to understand why. It is illogical, and that kind of difference should not be there. This resolution will help straighten that out.

Many farmers across this country have been good debtors in the past, they have been good borrowers, they have been good farmers, they have been good business people, and through no fault particularly of their own, they are in trouble today. In Louisiana they are in trouble because we had three hurricanes last year, followed by a freeze, followed by a drought, and many years of low-crop prices, many years of increased foreign competition due to the high value of the dollar. A lot of that comes right back here in the Congress because of its deficit-spending problems.

So many of those farmers can work it out. They can be productive farmers again, they can pay off their loans if they are given any flexibility whatsoever in the restructuring or two-tiering of their loans.

□ 1410

That is what this resolution calls for. It needs to be done; it is being done for businessmen all across Louisiana and all across the country today, and it needs to be done for farmers as well.

The farmers, I think, those that should not have been in business, those that never had any equity, those that did not know how to really efficiently farm, they are out of business now. I do not think any of them are still in business.

We are not talking about if we do not do something like this beginning to lose those farmers that are very good at what they do. That is what we are asking for. Not that every farmer be kept in business; that is not our job. But it is our job to see to it that we give the Farm Credit Administration or see to it that they understand it is the Congress' intent that farmers are given the same flexibility in restructuring of their loans that other people are getting from commercial banks across the country by order of the Federal bank examiners and bank regulators.

There are farmers in this country that will go out of business this year unnecessarily if we do not see this kind of flexibility become part of the everyday procedures of the Farm Credit Administration.

Mr. COLEMAN of Missouri. Mr. Speaker, I yield such time as I may consume.

Mr. Speaker, I want to just close by commending our colleague, Mr. THOMAS, who originated this resolution in our committee and brought it forward. I think it is obvious that there is a lot of interest in the subject matter. In the 20 minutes that we had we have utilized all of our time here.

I think it shows that we are looking at the Farm Credit System and how it operates and we hope that this resolution sets the stage for better operation in the future.

Mr. DORGAN of North Dakota. Mr. Speaker, will the gentleman yield?

Mr. COLEMAN of Missouri. I yield to the gentleman from North Dakota.

Mr. DORGAN of North Dakota. I thank the gentleman for yielding to me.

Mr. Speaker, the soaring rate of Federal orders for farm foreclosures is bringing about two devasting results. One is the stark human tragedy of a farm family forced off their land. The other is the increasing likelihood that the foreclosure action will recover only a fraction of the outstanding loan that led to the foreclosure in the first place.

The foreclosures and inadequate crop prices have depressed the value of farm land to record lows. Rather than continue to stand by while farm land is dumped on this depressed market, I urge my colleagues to support House Concurrent Resolution 310, which expresses the sense of the Congress that the Federal Farm Credit Administration and its associated agencies and lending institutions should use their existing authority to restructure loans for viable farming operations and to take other actions to help farm families while protecting the financial integrity of the Farm Credit System.

The Farm Credit System is the Nation's largest agricultural lender. Last year, in the process of losing $2.7 billion, it forced thousands of farmers and ranchers off their land. The irony is that these "fire sale" farm auctions often provide less money than could be secured by allowing viable farmers to restructure their loans.

Mr. Speaker, it is certainly no secret that the Farm Credit System will soon return to Congress to request additional appropriations. During deliberation of the issue I believe Congress should mandate a policy of forebearance rather than foreclosure outlined by House Concurrent Resolution 310. It will:

First, allow farmers with viable farming operations to restructure their loans in such a way that they can pay off the balance and interest. Such restructuring should be permitted when there is a reasonable prospect that the borrower will be able to repay the loan.

Second, compare the cost of foreclosure to the cost of forebearance through a loan restructuring, and implement restructuring when the cost is the same or less than foreclosure.

Third, when restructuring is feasible, consider a "two-tier" system of repayment. The first tier would include interest and principal payments on an amount within the capability of the farmer to service. Payment of interest only, at a reduced rate, would be required for the second tier of debt, which would be the remaining balance of the loan. As a portion of the principal is repaid in the first tier, portions of the outstanding principal balance would be periodically reassigned to the first tier.

Fourth, classify restructured loans as performing, provided that the payments are being made under the restructured arrangement.

In summary, House Concurrent Resolution 310, will cost no money. It will not mandate that the FCS make any changes in loan pro-

cedures that would endanger the stability of its resources. Instead, it provides a clear indication that the FCS should apply forebearance to its foreclosure policies if it expects the Congress to lend a sympathetic ear to its problems.

Mr. TOWNS. Mr. Speaker, I want to lend my support to House Concurrent Resolution 310, the House Agriculture Committee's resolution to restructure farm loans.

We cannot stand idly by while the Nation's small, family farmers go down the drain. The farm loan crisis is affecting all farmers but black farmers are being especially hard hit during this current crisis. In 1920, there were 1 million black farmers in the United States. In 1982 that number was 33,000, a drop of 97 percent. In 1910, blacks owned 16 million acres of farmland. By 1980 that number had dropped well below 4 million acres; in fact more Mississippi farmland is owned by blacks in Chicago than blacks in Mississippi.

Other industries have been supported by the Federal Government during periods of economic crisis. We certainly responded when Chrysler was in trouble; we've helped cities and countries like New York City, Japan and West Germany rebuild economically. And yet, we have turned our backs on the American family farmer. I realize that this resolution is only a concurrent resolution and that it does not have the binding effect of a law but I hope that it will act as a catalyst for a loan restructuring program by the Department of Agriculture. I know that Secretary Lyng is aware of this situation and I hope that he will reconsider his current position on this issue and act to save America's family farmers from annihilation.

Mr. COELHO. Mr. Speaker, I am pleased to be a cosponsor of the resolution we are considering today. There is no doubt that the crisis facing our Nation's farmers is continuing. They try to get credit to operate their farms and find there is none available. Additionally, many farmers are facing foreclosure because of their inability to service their present debt.

If we are going to prevent many thousands of farmers from losing their land and their way of life, we must take some action. Last week many leaders in the Farm Credit System came to Washington to give us a report on the current state of the system. It was apparent from this meeting that the system still faces some problems.

The resolution before us today is directed toward addressing these problems and insuring that our Farm Credit System remains responsive to the farmers it serves. The Farm Credit Administration and the Farm Credit System are urged to take immediate action to help farmers who are facing foreclosure. This can be done by permitting additional time to resolve any financial problems and by allowing loans to be restructured. The system is also urged to prevent foreclosure by using a two-tier loan restructuring plan whenever feasible.

We were also told last week that one of the biggest problems facing the system is the inability to reduce interest rates on their loans. Despite several requests, the Farm Credit Association has refused to permit the system institutions to lower their loan rates. Consequently, many farmers who have borrowed from the system in the past are getting their loans from other places where the interest rates are more favorable. This only threatens the future stability of the system.

Because of my concern about the continuing high interest rates being charged by the Farm Credit System, I have offered an amendment to this resolution. This amendment encourages the Farm Credit Administration to give system institutions more flexibility in setting interest rates, so they will more accurately reflect changing market conditions. This will allow the system to remain competitive in agricultural lending and be a continuing source of assistance to our Nation's farmers.

I hope this resolution will encourage the Farm Credit Association to help our farmers who are having financial problems. I urge my colleagues to support my amendment and to support the resolution before us today.

Mr. GEPHARDT. Mr. Speaker, I rise in support of the resolution offered by my colleague from Georgia, Mr. THOMAS.

The continuing rash of foreclosures has thrown thousands of families off the lands they have farmed for generations. And the situation worsens each day.

As lenders foreclose on more farms, and as that property is dumped onto a market already glutted with farmland, land values continue to drop—jeopardizing the equity of all farmers and the ability of farm lenders to stabilize their own long-run financial conditions. Often these "fire sales" net less money than could be secured by allowing hard-working farmers to restructure their loans and continue operations.

The rush to foreclose has led to nothing but a further downward spiralling of land values. And in Missouri, where land prices have dropped 30 to 40 percent in 5 years, we can't take any more of that.

This resolution puts Congress in support of a lender policy of forebearance rather than foreclosure. It states simply that lenders ought to make every effort to restructure loans before they consider foreclosure. Congress after all supported a restructuring of the Farm Credit System, restructuring to help the farmer—not just the lender. The loosened regulations should give lenders the tools to exercise more forebearance. We expect lenders to use these tools.

This resolution is no cure. Our crises in agriculture and land values are rooted in our low commodity prices. And without change in prices, the outlook remains bleak. Fully half of our farmers appear destined to lose part or all of their land. Half of this group will leave agriculture altogether. The devastation to families, communities, and entire regions will continue.

It is past time for action. Why has the administration not taken effective common sense actions to fight the economic holocaust in mid-America? Why has it invested its faith in star wars while remaining so willing to write off the American farmer?

I commend Mr. THOMAS for his efforts to reverse the downward spiral in land values, an important first step. I urge support for this resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas [Mr. DE LA GARZA] that the House suspend the rules and agree to the concurrent resolution, House Concurrent Resolution 310, as amended.

Mr. BONER of Tennessee. Mr. Speaker, I rise in strong support of House Concurrent Resolution 310, expressing the sense of Congress in support of a cost-effective plan to restructure the debt of the Farm Credit System.

The Farm Credit System is the Nation's largest agricultural lender. This important resolution expresses the strong feeling among Members of Congress that the Farm Credit Bureau should work with financially stressed farmer-borrowers to restructure their debt.

Last year, thousands of farmer-borrowers of the Farm Credit System went into bankruptcy or foreclosure because of their farm credit loans. These loan liquidations and other adverse factors caused the Farm Credit System, the Nation's largest agricultural lender, to lose an unprecedented $2.7 billion.

The financial crisis facing the farm community has continued unabated this year. Many more farmers are threatened with foreclosure unless farm debt is restructured.

House Concurrent Resolution 3 proposes that the Farm Credit System consider restructuring farm loans if the costs associated with foreclosure equal or exceed the costs of restructuring. This approach would reduce both the number of farm foreclosures and the losses to the Farm Credit System.

In addition, the resolution encourages the Farm Credit Administration to give the System more flexibility in setting interest rates that reflect market conditions and allow System institutions to be more competitive.

Adoption of the resolution will send a strong signal to the Farm Credit System that Congress expects the system to prudently adjust its operating procedures to reflect that hard realities of the severe depression in the agricultural economy. Continuing a policy of foreclosure when other alternatives are available is not only imprudent, but dangerous.

Farmers continue to be a vital part of our Nation's economy and we need to recognize that the well-being of those of us who are not farmers is dependent on restoring vitality to the farm community.

The resolution is an important step to correcting the credit crisis farmers face, and I join my colleagues in urging its adoption.

Mr. DASCHLE. Mr. Speaker, today the House of Representatives is considering House Concurrent Resolution 310, which I have cosponsored and which has my wholehearted support.

House Concurrent Resolution 310 expresses the sense of the Congress that the Farm Credit System should practice forbearance and restructure a farmer's loan rather than foreclose where there is a reasonable prospect that the farmer will be able to repay the loan. The resolution states that before foreclosing on a loan the FCS should determine the cost of foreclosing and the cost of restructuring the loan. If the cost of foreclosing exceeds the cost of restructuring, the FCS bank should restructure the loan.

The resolution also encourages the FCS bank to use a new two-tiered loan restucturing program. Under this program, the amount of the existing loan that the farmer could repay under existing terms would be placed in the

first tier. The proportion of the loan that the farmer could not repay under existing terms would be placed in the second tier. The farmer would not be required to repay the principal on the portion of the loan in the second tier and the interest rate on this portion of the loan would be reduced. As the farmer pays off the principal in the first tier, principal from the second tier would be moved into the first tier.

Finally, the resolution encourages the Farm Credit Administration, which oversees the system, to grant member banks more flexibility in setting the interest rate on farm loans.

Last year when Congress passed the Farm Credit Act Amendments of 1985, it created a new Farm Credit System Capital Corporation. One of the primary functions of this newly created Capital Corporation was to enable members of the Farm Credit System to better serve farmers through refinancing, reamortizing, or otherwise adjusting debts. Such activities would be undertaken in an effort to give a farmer every opportunity to stay in business.

Unfortunately, the full loan restruction authorities of the Capital Corporation have not yet been implemented. Hopefully, the sense of the House resolution we are passing here today will give the Farm Credit Administration a nudge in the right direction and a strong message that Congress is awaiting the full implementation of the Farm Credit Amendments of 1985. The Farm Credit System has only recently adopted "Systemwide Guidelines and Definitions for Restructuring Troubled Loans" and has also adopted the Farm Credit System Model Pricing Program, which awaits the approval of the Farm Credit Administration.

The Congress expects the Capital Corporation to practice forbearance and to make loan restructuring a high priority. This resolution confirms this requirement.

The question was taken.

Mr. ROBERT F. SMITH. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

GENERAL LEAVE

Mr. JONES of Tennessee. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the concurrent resolution just debated.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

EXPRESSING SENSE OF CONGRESS WITH RESPECT TO PARTIAL LIBYAN OWNERSHIP OF FIAT

Mrs. BYRON. Mr. Speaker, I move to suspend the rules and agree to the concurrent reoslution (H. Con. Res. 315) to express the sense of Congress that the Secretary of Defense should defer the final award of a contract with respect to Defense Construction Supply Center Solicitation numbered DLA700-85-B-4-4607 (for the purchase of 178 crawler tractors) until Congress completes consideration of the Department of Defense Authorization Act, 1987.

The Clerk read as follows:

H. CON. RES. 315

Whereas the Government of Libya has been identified as aiding and abetting international terrorism;

Whereas it is the policy of the United States to seek to contain and deter further acts of terrorism sponsored by the Government of Libya; and

Whereas economic sanctions taken by the United States against Libya would be undercut by the inadvertent transfer of United States tax dollars to the Government of Libya: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of Congress that the Secretary of Defense should defer final award of a contract with respect to Defense Construction Supply Center Solicitation numbered DLA700-85-B-4-4607 (for the purchase of 178 crawler tractors) until Congress completes consideration of the Department of Defense Authorization Act, 1987.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentlewoman from Maryland [Mrs. BYRON] will be recognized for 20 minutes and the gentleman from Ohio [Mr. KASICH] will be recognized for 20 minutes.

The Chair recognizes the gentlewoman from Maryland [Mrs. BYRON].

Mrs. BYRON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Concurrent Resolution 315 would express the sense of Congress that the Secretary of Defense should defer award of a contract for procurement of 178 Crawler tractors until the Congress completes consideration of the Department of Defense Authorization Act for Fiscal Year 1987.

The Department of Defense is ready to award a contract for 178 Crawler tractors, required by the U.S. Marine Corps, to Fiat-Allis North America, Inc., the low bidder on the contract. But who is Fiat-Allis North America, Inc.? Fiat-Allis North America is a wholly owned subsidiary of Fiat-Allis Europe which, in turn, is wholly owned by Fiat-Allis, B.V., which is owned by International Co., which is owned by Fiat SPA. The complicating factor is that the Libyan Government, through the Libyan Arab Foreign Investment Co., holds a 15-percent ownership in Fiat SPA and has two members on Fiat SPA's 15-member board of directors. Thus, if the contract is awarded to Fiat-Allis North America, the Libyan Government would benefit from the award as a result of its ownership in Fiat SPA.

The low United States bidder on the contract filed a protest with General Accounting Office alleging that the award to Fiat-Allis North America would be improper because of the sanctions imposed by the President on economic relations with the Government of Libya. The Treasury Department, however, advised the General Accounting Office that the President's Executive orders precluding Government contracts with hostile foreign nations would not interfere with award of the contract to Fiat-Allis North America, because it is not substantially owned, managed or controlled by the Libyan Government

The Department of Defense has also taken the position that the Libyan Government interest in Fiat SPA would not prohibit the award of this contract to Fiat-Allis North America.

Mr. Speaker, it appears that we are in the interesting situation of having our Department of Defense send out its aircraft to bomb terrorist facilities in Libya and then shortly afterward award a contract which will benefit that same Government which has supported terrorist acts against the United States. That, I believe, is wrong. I also believe that we must convince the Secretary of Defense that it is wrong and should not be done.

Mr. Speaker, this resolution only asks for a delay. The Marine Corps, who will benefit from these tractors, has no objection to this delay. I think this should be done. Accordingly, I urge the adoption of this resolution.

Mr. KASICH. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of House Concurrent Resolution 315. This resolution would make the Secretary of Defense aware of our concern over a $7.9 million contract which is about to be awarded to Fiat-Allis North America, Inc. We are concerned because the Government of Libya holds a 15-percent ownership in Fiat SPA, the ultimate corporate parent of Fiat-Allis North America, thus would benefit from the award of the contract.

Many of us had thought that, when the President signed Executive Order No. 12543, which virtually ended economic relations with the Government of Libya, Fiat-Allis North America would be ineligible for the award of this contract, because of its connection with the Government of Libya. We were wrong. On May 5 the General Accounting Office denied a protest by the low U.S. bidder for this contract for manufacture of 178 Crawler tractors. It held that "in light of the position of the Department of State, in consultation with the Office of Foreign Assets Control, that an award to Fiat-Allis will not violate the Libyan sanctions regulations currently in

effect, we must deny this portion of the protest."

All this resolution would do is ask the Secretary of Defense to defer the award until the Congress completes its consideration of the Defense Authorization Act for Fiscal Year 1987. This will give Congress time to preclude the awarding of this contract to Libya.

Mr. Speaker, we must not allow that Government, which has flagrantly supported terrorist acts against our people, to reap the benefits of U.S. defense spending.

I urge all my colleagues to support this resolution.

□ 1420

Mrs. BYRON. Mr. Speaker, I yield 2 minutes to the chairman of the Subcommittee on Investigations of the Committee on Armed Services, the gentleman from Alabama [Mr. NICHOLS].

Mr. NICHOLS. I thank the gentlewoman from Maryland for yielding time to me.

Mr. Speaker, I want to add my strong support for House Concurrent Resolution 315, which would express my concern over the award of a contract to a corporation in which the Government of Libya has an ownership interest. I believe that we must convince the Secretary of Defense to defer the award of the contract until the Congress has had an opportunity to express its will in the Defense Authorization Act.

As my colleagues all know, I am a strong supporter of competitive procurement and the award of contracts to the lowest possible bidder. But I believe that because of the peculiar circumstances of this case, the contract should not be awarded to the lowest bidder. It is true that there is a complex corporate structure which connects the Fiat Co. of North America to the Government of Libya. It is also true that the 15-percent Libyan Government interest in Fiat SPA, the parent company, is a relatively small minority interest, and that the profits that the Libyan Government might derive would not be great.

Nevertheless, I object to our Government appropriations of any sort being used to provide any support to the government of Colonel Qadhafi. Accordingly, I support the resolution, which would defer the award of the contract pending an opportunity for the Congress to take additional action on this procurement.

I commend the gentleman from Indiana for introducing this resolution, and ask that the Congress give it strong support.

Mr. KASICH. Mr. Speaker, I yield 4 minutes to the gentleman from Iowa [Mr. LEACH].

Mr. LEACH of Iowa. Mr. Speaker, I rise in support of House Concurrent Resolution 315. As just explained, all this resolution does is express the sense of the Congress that the Secretary of Defense defer the final award of a contract for the purchase of 178 crawler tractors until Congress completes consideration of the Department of Defense Authorization Act.

The question thus arises: Why occupy the attention of the House on this relatively small defense contract?

The answer is that delay in letting this contract called for by this measure is needed to enable Congress to review a situation which could potentially result in U.S. tax dollars being paid to the Libyan regime of Colonel Qadhafi.

When bids were opened on this solicitation in December of last year, the low bidder was Fiat-Allis, a wholly owned subsidiary of Fiat of Italy 15 percent of which is owned by the Libyan Government. Unless Congress has the time to make the necessary changes in current law to permit the President to waive certain defense contracting requirements, we stand on the threshold of awarding a U.S. military contract worth $7.9 million—the profits from which could go directly into the coffers of the world's preeminent terrorist.

For the President's efforts to isolate Libya economically from the civilized world to be successful, it is crucially important that the trade sanctions invoked in January be broadened to preclude U.S. Government purchases from companies controlled, in whole or in part, by Libya. If this is not accomplished, not only will Qadhafi be undeterred in his international outlawry, the U.S. campaign against terrorism will be discredited.

I am not generally enthusiastic about trade embargoes. In the past they have frequently hurt American producers more than foreigners, but if our embargo against Libyan terrorism is to be effective it must be complete.

To call Qadhafi a pariah while allowing him to profit from sales to the U.S. military makes a laughingstock of our foreign policy. No amount of public posturing can substitute for the sort of concrete action for which this resolution represents a necessary first step.

Mr. Speaker, I represent a plant in Bettendorf, IA, of the company which was the second low bidder on the contract tentatively awarded to Fiat-Allis. Last week that company announced its intention to close this facility. Company officials informed that loss of this particular contract was not the determinative factoring in its decision to close the plant, but the fact remains that loss of our industrial competitive edge, which is a function of public as well as private decisionmaking, has caused much of American industry to cut back employment and press for consolidation.

As long as Government is partly responsible for the loss of our competitive edge, it has a responsibility to walk the final mile for the American worker.

In the defense arena particularly, all Americans ought to be concerned that our industrial base not be dismantled.

While this resolution deals only with a small contract, it is symbolic, not only for the average American concerned for his or her job, but for the average citizen concerned for a responsible foreign policy.

Accordingly, I urge this House go on record to direct the administration to reconsider the folly of its contracting ways.

Mrs. BYRON. Mr. Speaker, I yield 3 minutes to the gentleman from Indiana [Mr. MCCLOSKEY].

Mr. McCLOSKEY. I rise today in strong support of House Concurrent Resolution 315.

At a time when the United States has bombed Libya, criticized numerous allies for not complying with economic sanctions and denounced Qadhafi for the terrorist that he is, the Pentagon is on the verge of awarding another military contract to an Italian firm with significant Libyan ownership.

This $7.9 million contract is for 179 Marine Corps crawler tractors. This resolution, which had the unanimous and bipartisan support of the Armed Services Committee shortly after I introduced it, urges the deferral of the proposed contract award, pending further consideration in the armed services authorization bill. It would be preferable for the administration to assert its executive power, cancel and rebid this contract.

The foreign firm scheduled to get this contract is Fiat-Allis which is wholly owned by Fiat of Italy. Fiat is 15 percent owned by Libya, which has two members on Fiat's board of directors.

It is difficult to see how we can demand full economic sanctions by our allies, while treating this relationship as insignificant.

The Pentagon has claimed it has no choice but to award the contract, and the GAO has also refused redress.

Surely if we have the power to bomb Libya, we have the power to modify this contract. As the distinguished chairman of the House Armed Services Committee, Mr. ASPIN, and the distinguished chairman of the Government Operations Committee, Mr. BROOKS, have noted in a letter to Secretary of Defense Weinberger, the administration has substantial legal authority and precedent to set aside a decision in the national security interest.

The American firm that was the low bidder on this contract, J.I. Case, an-

nounced last week that they were going out of business with some 1,500 American jobs being lost in Terre Haute, IN; Rock Island, IL, and Bettendorf, IA.

The some 625 employees facing economic tragedy at the Case plant in Terre Haute know the jobs would still be there but for the loss of four contracts totaling $18 million to the firm with the Libyan connection.

These workers, concerned neighbors, and indeed citizens throughout our great land cannot understand why our industrial base is being eroded by decisions like this.

These issues will be considered more extensively on other days, with other comprehensive legislation.

We want to send a message to the administration, the world, and our own citizens that we are serious about terrorism, that we are serious about economic sanctions and that we are serious about unnecessary and tragic erosion of our economic base. Thus, we should wholeheartedly support this resolution. The people, workers, and farmers of our Nation deserve no less. Surely revenues from our defense contracts should not be going into Qadhafi coffers of terrorism.

Mr. KASICH. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Indiana [Mr. MYERS].

Mr. MYERS of Indiana. I thank my colleague from Ohio for yielding me this time.

Mr. Speaker, I rise in support of this concurrent resolution. I regret that it is necessary for us to take this action.

It first came to my attention last summer that we had a problem with the competition from the Fiat Corp. It is one thing serious enough that our Defense Department contracts with contractors outside of the United States; not only does it lose jobs and lose taxes for this country, but it also, as has been discussed here, loses our industrial base, which is very vital to our national defense. But it became much more when we learned last December that the Fiat Corp., who had won the successful contract bid for these crawlers, was partially owned by Libya.

I do not understand why our President, the Defense Department, and our own General Accounting Office here in the Congress have allowed this to continue to happen. To allow the Libyan Government to use the profits from our own taxpayers to fund terrorism throughout the world, which we have found to be true, I think is just unacceptable.

I did not go on the gentleman's resolution because I thought that surely we could talk to the Defense Department, that the President would take action. I really do not understand why it has not been done up to this point.

I am certainly a supporter of competitive bids, about which the gentleman from Alabama just spoke a moment ago, but this is quite different. When we are contributing to their profit structure by buying from a partially Libyan-owned company, the Fiat Corp., we are funding terrorism ourselves. On one hand we say no; on the other hand we shovel them money.

I am sorry that this does not have the force of law. It is really not going to do anything unless the administration is willing to do something. But at least I think that the administration should be on notice that we do not believe that this is the proper action for our Government to take.

Mr. Speaker, I strongly support the resolution, but regret we have to take it.

Mrs. BYRON. Mr. Speaker, I yield 3 minutes to the gentleman from Illinois [Mr. EVANS].

Mr. EVANS of Illinois. Mr. Speaker, many of us recently saw Secretary of State Shultz on TV, talking about the antiterrorism measures agreed to by the allies. He said that the message of Colonel Qadhafi is, "You've had it, pal."

But that same day, the GAO said the Defense Department could award a million dollar contract to Fiat-Allis, a company owned 15 percent by the Libyan Government. What the Defense Department was saying in effect to Qadhafi was: "You've got it, pal."

Over the last year, Fiat-Allis has received an increasing number of U.S. defense contracts. Meanwhile, its American competitors have been laying off workers and closing their doors. Just last week Case IH announced that it will close three American plants, costing over 1,500 American jobs.

How can we possibly justify sending American servicemen to fight a terrorist regime that buys its bullets with the profits of our own industrial decline?

When our young people return from the service, they deserve the opportunity to find a decent job. Our defense dollars should be helping to build economic opportunity at home. And our Government should be committed to defending American jobs the way our servicemen are committed to defending American freedom.

The bill being considered today, House Concurrent Resolution 315, urges the Secretary of Defense to defer final award of the Fiat-Allis contract until Congress passes the fiscal year 1987 Defense authorization bill. This legislation is necessary because the administrative appeal to block the award was denied—even though it was supported by the chairmen of the House Armed Services Committee and the House Government Operations Committee.

At a recent Senate hearing, State and Defense Department officials testified that they have no choice under current law but to award this contract to Fiat. The resolution we are considering today would simply defer that contract until we have a chance to change current law. Mr. LEACH of Iowa and I have already introduced legislation to make the necessary change.

Allowing Colonel Qadhafi's terrorist regime to profit from U.S. defense contracts is unconscionable. Yet that is exactly what will happen if we don't pass House Concurrent Resolution 315 today.

I ask that you vote to ensure that U.S. defense dollars don't end up aiding our enemies. I hope you will join in supporting this important and timely legislation.

I applaud the gentleman from Indiana, FRANK MCCLOSKEY for offering this important resolution and I thank the gentlewoman from Maryland [Mrs. BYRON] and the gentleman from Ohio [Mr. KASICH] for their leadership on this issue.

□ 1430

Mr. KASICH. Mr. Speaker, just to close on this side, I think the resolution sends a clear message to the Pentagon, the GAO, and anybody else who is involved in this Federal Government that we want the award of this contract stopped.

Secretary Weinberger needs to understand, along with the President, that awarding this contract would do more to undermine confidence in the Department of Defense than $400 toilet seats and $110 diodes.

This is a gut issue—the American people want to put a stop to state-sponsored terrorism. We have sent a clear message. Let us carry through with it. We can stand together, Republicans and Democrats, and send a message not just to our Department of Defense, but around the world that we are serious about this economic boycott and about our commitment to defeat terrorism in the world.

Mr. BROOKS. Mr. Speaker, I rise in support of the resolution offered by LES ASPIN, chairman of the Armed Services Committee. Recently, Chairman ASPIN and I wrote Secretary Weinberger urging him to exercise his legal authority to cancel the award of the contract and to recompete the procurement—excluding Fiat-Allis or any other company controlled by a hostile government.

In that letter, we stated that "it is our firm belief that the U.S. Government, particularly the Department of Defense, should not be awarding lucrative contracts to any company which is substantially owned or controlled by foreign governments that are hostile to our country. With the award of this contract, we are indirectly providing financial support for Libya's sponsorship of worldwide terrorism."

DOD has asserted that Federal procurement law required them to award the contract to Fiat-Allis because the company was the lowest bidder. As Chairman ASPIN and I pointed out in our letter, the Competition in Con-

tracting Act, passed in 1984, allows agency heads to exclude companies from a procurement when it is in the public interest. I can't think of a more clearcut example of where the public interest would be better served than by using this exemption to deny a contract to a company controlled by Libya. DOD really dropped the ball on this one. They should have known that this was possible under the law. Now they are hiding behind the excuse that the law made them do it. This is ridiculous.

I urge all my colleagues to support this resolution.

Mr. HOPKINS. Mr. Speaker, I rise in support of House Concurrent Resolution 315 thereby expressing my concern over the apparent blind intention of the Department of Defense to award a $7.9 million contract to Fiat-Allis, of which 15 percent is owned by the Libyan Government.

This is the same Libyan Government responsible for the death of an American serviceman and hundreds of injured in the cowardly bombing of a Berlin disco a few weeks ago—the same government which has actively supported an international terrorist network stalking American citizens throughout the world.

How can the same Pentagon that a few weeks ago so successfully delivered our response to Mr. Qadhafi's terrorist attacks turn around and grant his government, on a silver platter, the opportunity to profit from an American defense contract? Mr. Speaker, this is not the first time I find inconsistencies in the decisions coming from across the Potomac, but I fear such a blunder will only undermine the hard fought moral victories President Reagan and Secretary Shultz extracted from our reluctant allies at the recent Tokyo economic summit.

I urge my colleagues to join me in supporting this legislation so we can directly address this problem during the upcoming Department of Defense authorization bill.

Mr. KASICH. Mr. Speaker, I yield back the balance of my time.

Mrs. BYRON. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from Maryland [Mrs. BYRON] that the House suspend the rules and agree to the concurrent resolution, House Concurrent Resolution 315.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mrs. BYRON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on House Concurrent Resolution 315, the concurrent resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Maryland?

There was no objection.

STUDENT FINANCIAL ASSISTANCE TECHNICAL CORRECTIONS ACT OF 1986

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 2329) to make technical corrections in the higher education title of the Consolidated Omnibus Budget Reconciliation Act of 1985, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

Mr. COLEMAN of Missouri. Reserving the right to object, Mr. Speaker, this is a bill which is purely technical in nature, and it makes some changes to the Omnibus Reconciliation Act on higher education. It has no opposition on this side of the aisle.

Mr. FORD of Michigan. Mr. Speaker, will the gentleman yield?

Mr. COLEMAN of Missouri. I yield to the gentleman from Michigan.

Mr. FORD of Michigan. Mr. Speaker, I rise today in support of S. 2329, a bill making technical corrections to the Consolidated Omnibus Reconciliation Act of 1986. This bill is essential to making the guaranteed student loan provisions of the act workable.

There are four corrections made by S. 2329. The first of these adds a phrase to the end of a sentence that was erroneously deleted in the printing of the reconciliation bill. The second provision corrects an erroneous reference. The third correction changes an inaccurate word, and the fourth provision changes the effective date for provisions from January 1, 1986, to July 1. This final change is needed because the education provisions of the act were completed in October and we contemplated a November or December passage of the act. However, the bill did not pass until April, making the effective dates retroactive.

When the Reconciliation Act was signed into law on April 7, there was great confusion about how the GSL provisions would be implemented. The Department of Education is to be commended for working with the higher education community to expeditiously develop guidelines that are workable and will allow for the smoothest possible implementation of the act. Those guidelines along with S. 2329 will maintain the efficient delivery of guaranteed student loans to students for the 1986-87 academic year. The only issue as yet unresolved is the payment to the guaranty agencies of their administrative cost allowances which is made mandatory by the Reconciliation Act. I do, however, expect that the Department will move quickly to provide this necessary funding to the agencies.

I urge my colleagues to join me in supporting S. 2329.

Mr. COLEMAN of Missouri. Mr. Speaker, I urge the House to adopt S. 2329 in the form that it was sent over to the House from our colleagues in the Senate. S. 2329 amends the higher education provisions of the Omnibus Reconciliation Act of 1985 by making technical corrections. The Omnibus Reconciliation Act of 1985 set into law a variety of money saving provisions in the Guaranteed Student Loan Program. These provisions once implemented will yield $830 million in savings over the next 5 years.

The bill contains three technical corrections:

Adds a phrase erroneously omitted during the printing of the bill;

Changes an incorrect reference;

Amends effective dates from January 1, 1986, to July 1, 1986;

There is very little one can say about a technical amendments bill, except to assure the Members of this body that this is indeed only a technical amendments bill. The purpose of the legislation is simple—it makes technical modifications to the various provisions contained in reconciliation which should of been made at the time of enactment.

As Members of this body will recall, the 1985 reconciliation bill was pronounced dead. Fortunately it came back to life, but because of the speed at which the bill then moved through the legislative process, the possibility of putting final touches on the legislation was eliminated.

By enacting S. 2329 we will complete these needed modifications and ensure the smooth operation of our student financial assistance programs.

Mr. JEFFORDS. Mr. Speaker, I rise in support of S. 2329, a bill making technical corrections to the higher education provisions of the Omnibus Reconciliation Act of 1985. Timely implementation of this legislation is important to ensure that our student loan programs continue to function smoothly under the mandates of budget reconciliation.

There is relatively little that I can add to the contributions made by BILL FORD and TOM COLEMAN in this floor discussion. S. 2329 merits the support of all Members because it will ease the administrative implementation of many of the changes made to our Federal student loan programs earlier this year in the reconciliation bill.

I am pleased that Congress has enacted the cost-saving and loan default prevention measures under budget reconciliation. These amendments, which are supported by the financial aid community, will save $830 million in our Federal student loan programs over the next 3 years without limiting student access. These amendments will reduce the occur-

rence of loan defaults and enhance the ability of lenders, guarantee agencies, postsecondary institutions and the Federal Government to make loan collections.

I urge my colleagues to adopt S. 2329.

Mr. COLEMAN of Missouri. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 2329

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Student Financial Assistance Technical Corrections Act of 1986".

SEC. 2. (a) Section 16014(b) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (hereafter in this Act referred to as "the Act") is amended—

(1) by redesignating paragraphs (1), (2), and (3) as paragraphs (2), (3), and (4), respectively; and

(2) by inserting before paragraph (2), as redesignated by clause (1), the following new paragraph:

"(1) Section 428(c)(1)(A) of the Act is amended by inserting before the period at the end of the first sentence of such section a comma and the following: 'including the administrative costs of supplemental preclaim assistance for default prevention as defined in paragraph (6)(C)'.".

(b) Section 16016 of the Act is amended by striking out "section 435(d)(1)(D)" and inserting in lieu thereof "section 435(g)(1)(D)".

(c) The second sentence of section 16023 of the Act is amended by striking out "to the Secretary" and inserting in lieu thereof "by the Secretary".

(d)(1) Section 16041(b)(1) of the Act is amended by striking out "January 1, 1986" and inserting in lieu thereof "July 1, 1986".

(2) Section 16041(d) of the Act is amended by striking out "January 1, 1986" and inserting in lieu thereof "July 1, 1986".

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on S. 2329. The Senate bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

CONFERENCE REPORT ON S. 124, SAFE DRINKING WATER ACT AMENDMENTS OF 1986

Mr. WAXMAN. Mr. Speaker, I call up the conference report on the Senate bill (S. 124) entitled the "Safe Drinking Water Amendments of 1985."

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Pursuant to the rule, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of May 5, 1986.)

The SPEAKER pro tempore. The gentleman from California [Mr. WAXMAN] will be recognized for 30 minutes and the gentleman from Illinois [Mr. MADIGAN] will be recognized for 30 minutes.

The Chair recognizes the gentleman from California [Mr. WAXMAN].

Mr. WAXMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am very happy that today the House can give final approval to a new law to protect the American public from the growing threat of drinking water contamination.

House and Senate conferees have agreed upon amendments to the Safe Drinking Water Act of 1974, which should do much to help stem the serious and growing problem of dangerous chemicals leaking into our tap water from hazardous waste landfills, leaking underground gasoline storage tanks, and runoff from agricultural pesticides.

I am especially pleased the conferees have agreed that drinking water standards established to protect the public health should reflect the use of "the best available technology" for the removal of dangerous contaminants.

Both Houses have also agreed that a treatment technology of proven effectivenss, granular activated carbon, is feasible for the control of synthetic organic chemicals, a very common and very dangerous family of drinking water contaminants.

These provisions will go far in protecting the American public from pervasive health threats, including for example, the known carcinogen chloroform, which was found in 57 percent of the underground drinking water supplies in a recent EPA survey. EPA will be required to dramatically tighten the very weak current standard for chloroform under this legislation to reflect the use of GAC technology, which has been proved effective for the control of this substance and other dangerous byproducts of the disinfection process.

I want to congratulate the distinguished ranking minority member of the Health and the Environment Subcommittee, Representative MADIGAN, for his initiative and effort which played a key role in the development and passage of this legislation.

Mr. MADIGAN. Mr. Speaker, I yield 3 minutes to the gentleman from Idaho [Mr. CRAIG].

Mr. CRAIG. Mr. Speaker, I would like to thank my colleague for yielding.

I regretfully rise in opposition to this conference report because it requires the States to establish wellhead protection programs and establish wellhead protection areas.

I want to take this opportunity to alert my colleagues to the fact that this legislation could establish Federal jurisdiction over ground water, a resource traditionally left under local State control.

Supporters of this provision may claim that the language in this report was drafted purposely broad in order to insure that State and local governments retain their traditional jurisdiction. If this is the case, then I am uncertain as to the intended purpose of this provision. According to section 205, the Governor is instructed to submit a State plan to the Administrator of the Environmental Protection Agency that outlines a program to protect wellhead areas from contaminants which may have adverse impact or effect on the health of persons.

The report further stipulates that the State must modify and resubmit the plan if it is found to be inadequate by the Administrator.

In my opinion, this constitutes the beginning of Federal jurisdiction and Federal control over underground water.

Although the commendable intention of the conferees reportedly was to retain the State and local jurisdiction over ground water, I am unsatisfied with the means employed to accomplish the end that they set out to deal with. Broad and indefinite language is a two-edged sword and all of us here in the Congress know that so very well.

I am concerned that this section could encourage lawsuits against the Governor or the States should the State ground water plan be rejected by the EPA or should the State fail to implement it during a time period deemed appropriate by citizens.

How well I have watched the water quality standards of EPA and their impact upon my State of Idaho and the great difficulty we have had arriving at a plan, when in fact we have not yet accomplished it.

Another problem arising from the overly broad language is found in the sentence I quoted earlier. Specifically, the State submitted plan must protect wellhead areas from contaminants which may have any—and I repeat—any adverse effect on the health of persons.

Mr. Speaker, such a directive could require the State to develop a program to protect against an indefinite number of substances, since almost any substance may have some effect on the health of persons.

This requirement could open the door to lawsuits by citizens who deem certain substances other than those determined by the State to be hazard-

ous if they are not included in the plan.

Mr. Speaker, I join every American and I think every Member of this Congress in a desire for clear, clean, safe drinking water; however, I must oppose this bill on grounds that I think it establishes unprecedented and unacceptable Federal jurisdiction over ground water regulations, and ground water controls that have been traditionally those of State responsibility.

Mr. WAXMAN. Mr. Speaker, I am pleased to yield 5 minutes to the gentleman from Ohio [Mr. ECKART].

I want to point out the important contribution the gentleman has made to this legislation before us. It has taken us two Congresses to adopt this compromise and his leadership in the previous Congress working on this legislation was very significant. I do not think we would be here at this point without his efforts.

Mr. ECKART of Ohio. Mr. Speaker, I thank the gentleman for his very kind remarks.

I would like to return the compliment to my friend, the gentleman from California, and to my colleague, the gentleman from Illinois, without whose persistence and consistent support of enacting strong safe drinking water protections for the Nation's consumers' drinking water, we would not be here today. Indeed, as the gentleman from California suggested, we first introduced this bill and testified before his subcommittee in June of 1983.

I believe this is a critical environmental issue and one of great significance.

In juxtaposition to the previous remarks of my colleague, the gentleman from Idaho, let me say that I do think it is a national problem. Twenty-two percent of the Nation's small water systems and at least 37 percent of the large water systems supplied by ground water already have at least one volatile organic contaminant. Ten billion gallons of liquid hazardous wastes every year are dumped into land. The land, we have discovered, is not a veritable sponge capable of soaking up these wide varieties of different forms of carcinogens in a veritable stew, overflowing with substances that are injurious or suspected of being injurious to our health.

□ 1445

If we focus for but a moment on the impact on rural America, let me tell my colleagues that a Cornell study discovered that at least half a million rural families in America are drinking water that, if it was found at a public bathing beach, would be labeled unfit to swim in, let alone to drink.

Over 700 contaminants have been identified in our water. Yet EPA since 1974 has been able to regulate fewer than 25. The gentleman from Illinois [Mr. MADIGAN], the gentleman from California [Mr. WAXMAN], and I discovered that you can lead EPA to water, but you cannot necessarily make them regulate it. That is why the amendments we bring forward today in this appropriate piece of key environmental legislation are long overdue.

Sixty-four thousand violations in 1984 of current drinking water standards have occurred, while enforcement actions indeed have been few.

Mr. CRAIG. Mr. Speaker, will the gentleman yield for a question?

Mr. ECKART of Ohio. I would be happy to respond.

Mr. CRAIG. I thank the gentleman for yielding.

Mr. Speaker, I earlier expressed my concern on this issue. We all know, with any limited knowledge of underground water, that water takes on the character in chemicals and metals of the area or aquifer in which it flows.

We have found in many instances in the Clean Water Act, and now I fear with this act, that those uniquely different areas, are not spoken to in the law. What happens to a State plan where there are natural substances in an area that are at levels historically acceptable and can certainly not be changed, the citizens of that area drink the water, but a national plan and a national standard says, "No, that does not meet the Federal requirements. The State says change but the Feds say we cannot amend it just for your locale or we would have to change it for every place in the Nation."

Is that not Federal jurisdiction over local or State water rights?

Mr. ECKART of Ohio. If I could reclaim my time, Mr. Speaker, I would point out to the gentleman that under the conference report there are extensive negotiations that must take place between State EPA's and the U.S. EPA in arriving at those locally agreed to standards.

It would be my hope that in this important Federal-State partnership that the peculiarities of local problems particularly would be addressed at sole-source aquifer provisions of importance on Long Island and in the State of Washington. I think that is the kind of mechanism that would be helpful.

Mr. CRAIG. Mr. Speaker, would the gentleman yield for just one more comment?

Mr. ECKART of Ohio. Let me yield first to my friend, the gentleman from California [Mr. WAXMAN].

Mr. WAXMAN. I thank the gentleman for yielding.

Mr. Speaker, I want to point out that under this legislation the Federal Government has primacy to set the standards to protect the public health. That is the significant aspect of this legislation.

Mr. CRAIG. Mr. Speaker, would the gentleman yield for one more comment?

Mr. ECKART of Ohio. I yield to the gentleman from Idaho for an additional inquiry.

Mr. CRAIG. I thank the gentleman for yielding.

I appreciate the gentleman's concern and his explanation. Scientists, good, knowledgeable scientists oftentimes disagree. In the case of oxygen levels in water as it relates to fish in the Clean Water Act, we have scientists who disagree. One says, "This must be the standard to maintain the livelihood of fish." and another says, "No, it can be maintained at this level."

Even if a State scientist, regionally recognized, establishes and can prove through tests that his standard is a safe standard, if it does not agree with a Federal standard and someone from the EPA, the State standard is overruled.

That is very specific to a point that happened in Idaho. That is Federal primacy, as was just mentioned, over the right of the local area or the State to control their water destiny.

The SPEAKER pro tempore. The time of the gentleman from Ohio [Mr. ECKART] has expired.

Mr. WAXMAN. Mr. Speaker, I yield 1 additional minute to the gentleman from Ohio [Mr. ECKART].

Mr. ECKART of Ohio. I thank the gentleman for yielding this additional time to me.

Mr. Speaker, briefly to respond to the gentleman from Idaho, perhaps he makes my point.

In my own State, I could not lead my State to drinking water regulation dealing with brine. Our State discovered that we have brine, yielded from oil and gas production, almost 1 million gallons of brine produced every day, only 10 percent of which is disposed of safely.

This bill, unfortunately, does have to set a national standard because the health of several States in the Midwest and the citizens who consume that water is very seriously jeopardized. I think the point of the gentleman from California is important. Minimum national standards enforced at the local level with responsible help and guidance from the Federal Government is critical because, unfortunately for all of us as citizens, drinking water knows no artificial geographic boundary or political boundary. It affects us all.

This bill, I think, gives EPA the explicit instructions it needs to enforce the appropriate national regulations to get about dealing with what I believe is the most fundamental environmental problem of this decade, and that is protecting our Nation's precious ground water sources.

Mr. Speaker, I urge the adoption of the conference report. I congratulate, in conclusion, my colleagues, the gentleman from California [Mr. WAXMAN] and the gentleman from Illinois [Mr. MADIGAN] for their dedication to this effort.

Mr. MADIGAN. Mr. Speaker, I yield 4 minutes to the gentleman from New York [Mr. LENT].

Mr. LENT. I thank the gentleman for yielding this time to me.

Mr. Speaker, the conferees for the Safe Drinking Water Act amendments are to be commended for reporting a strong, yet practical piece of legislation aimed at protecting our Nation's drinking water supplies.

As a cosponsor of this legislation in the House, I am pleased by the widespread bipartisan support for this effort and delighted that, at long last, we have reached this stage in the legislative process.

S. 124 provides for improved drinking water standards and stricter enforcement of those standards. Of particular importance is the provision which would enhance protection of our underground water supplies. On Long Island, where my constituency is located, as in many areas around the country, underground aquifers serve as the whole source of drinking water. Needless to say, if these sources are contaminated whole communities could be at risk.

Public concern over the potential for ground water contamination is justified. Long Island has only one aquifer which supplies the entire island's drinking water. The need for protection for this precious water system is particularly acute. S. 124 effectively addresses these concerns by providing funding for demonstration programs for protecting aquifers that are the sole or principal source of a municipality's water. The bill also requires each State to adopt and submit to the Environmental Protection Agency, within 36 months, a program to protect areas around public water system wells from contaminants that may pose a health threat. These provisions, along with other reforms contained in the bill, will go a long way toward ensuring safer drinking water.

In addition, I am pleased over the approval of a provision I helped craft which would significantly reduce the amount of harmful lead in our drinking water. This provision would ban the use of lead pipes or pipe fittings in the installation or repair of public water systems. The dangers of lead in water are well known. This provision would affect the reduction of hazardous lead in drinking water and promote the quality of our water supplies.

In sum, I believe S. 124 represents an improved reform of existing safe drinking water standards. Swift enactment of this bill is needed to ensure that our drinking water supplies are indeed made safe for this and future generations.

Mr. MADIGAN. Mr. Speaker, I yield 4 minutes to the gentleman from Utah [Mr. NIELSON], a member of the subcommittee.

Mr. NIELSON of Utah. I thank the gentleman for yielding this time to me.

Mr. Speaker, I rise in opposition to this bill on several counts. I would like to associate myself with the comments of the gentleman from Idaho [Mr. CRAIG] that it is too much Federal control over ground water systems.

In my State, many communities have several sources of water, 10 or 11 sources of water, and they have to require testing of every one of those sources rather than at the common collection point. It is very expensive to both the communities and the State.

In the House, we took the original bill, the House bill, and kept the existing program at $69 million. The other body went to $101 million, and a compromise in a so-called conference ended at $102 million. I do not call that much of a compromise, going from $69 million to $100 million. $100 million is not very near the middle of 69 and 101. It is a 45-percent increase in the existing program, 91 percent of which is in emergency assistance, 47 percent in technical assistance, 26.5 percent in State-public water system supervision, and 72.8 percent in underground water source protection, a total of a 45-percent increase in funds.

□ 1455

In addition to that, there are new programs of approximately $70 million. The House passed $40 million of those, and on the basis of those, I objected. I felt that the sole-source aquifer program was a fine program, but it should be handled by the States themselves. Washington and New York could handle those themselves and as far as the planning and technical assistance, I felt that the States are more than happy to handle that on their own without the Federal guidelines and the help.

The conference report added $30 million additional to monitoring unregulated contaminants; in other words, making them get information on things which are not known to contaminate and which, in some cases, are known not to contaminate. They nevertheless have to monitor them.

For all those reasons, both the fiscal part that we cannot afford a 45-percent increase in the existing program, plus an additional $70 million, so you have a total increase of over $100 million in this program.

I think that is irresponsible in the fiscal situation that we have and it does bring additional Federal regulation. I do not want to be accused of running for dirty water or supporting dirty water, but I think it is a problem that can be handled with the existing programs at the present levels and I intend to call for a vote on this on that basis.

Mr. WAXMAN. Mr. Speaker, I yield to the gentleman from Texas [Mr. BROOKS] for the purpose of making a unanimous-consent request.

PRESIDENTIAL LIBRARIES ACT OF 1986

Mr. BROOKS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 1349), to reduce costs of operating Presidential libraries, and for other purposes, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Strike out all after the enacting clause and insert:

That this Act may be cited as the "Presidential Libraries Act of 1986".

RESEARCH AND MUSEUM FACILITIES

SEC. 2. Section 2101(1) of title 44, United States Code, is amended by inserting before the semicolon a comma and "and may include research facilities and museum facilities in accordance with this chapter".

PRESIDENTIAL ARCHIVAL DEPOSITORIES

SEC. 3. (a) Section 2112(a) of title 44, United States Code, is amended to read as follows:

"(a)(1) When the Archivist considers it to be in the public interest, the Archivist may—

"(A)(i) accept, for and in the name of the United States, land, a facility, and equipment offered as a gift to the United States for the purpose of creating a Presidential archival depository;

"(ii) take title to the land, facility, and equipment on behalf of the United States; and

"(iii) maintain, operate, and protect the land, facility, and equipment as a Presidential archival depository and as part of the national archives system;

"(B)(i) make agreements, upon terms and conditions the Archivist considers proper, with a State, political subdivision, university, institution of higher learning, institute, or foundation to use as a Presidential archival depository land, a facility, and equipment of the State, subdivision, university, or other organization, to be made available by it without transfer of title to the United States; and

"(ii) maintain, operate, and protect the depository as a part of the national archives system; and

"(C) accept, for and in the name of the United States, gifts offered for the purpose of making any physical or material change or addition to a Presidential archival depository.

"(2) The Archivist shall promulgate architectural and design standards applicable to Presidential archival depositories in order to ensure that such depositories (A) preserve Presidential records subject to chapter 22 of this title and papers and other historical materials accepted for deposit under section 2111 of this title and (B) contain adequate research facilities.

"(3) Prior to accepting and taking title to any land, facility, or equipment under subparagraph (A) of paragraph (1), or prior to entering into any agreement under subparagraph (B) of such paragraph or any other agreement to accept or establish a Presidential archival depository, the Archivist shall submit a written report on the proposed Presidential archival depository to the President of the Senate and the Speaker of the House of Representatives. The report shall include—

"(A) a description of the land, facility, and equipment offered as a gift or to be made available without transfer of title;

"(B) a statement specifying the estimated total cost of the proposed depository and the amount of the endowment for the depository required pursuant to subsection (g) of this section;

"(C) a statement of the terms of the proposed agreement, if any;

"(D) a general description of the types of papers, documents, or other historical materials proposed to be deposited in the depository to be created, and of the terms of the proposed deposit;

"(E) a statement of any additional improvements and equipment associated with the development and operation of the depository, an estimate of the costs of such improvements and equipment, and a statement as to the extent to which such costs will be incurred by any Federal or State government agency;

"(F) an estimate of the total annual cost to the United States of maintaining, operating, and protecting the depository; and

"(G) a certification that such facility and equipment (whether offered as a gift or made available without transfer of title) comply with standards promulgated by the Archivist pursuant to paragraph (2) of this subsection.

"(4) Prior to accepting any gift under subparagraph (C) of paragraph (1) for the purpose of making any physical or material change or addition to a Presidential archival depository, or prior to implementing any provision of law requiring the making of such a change or addition, the Archivist shall submit a report in writing on the proposed change or addition to the President of the Senate and the Speaker of the House of Representatives. The report shall include—

"(A) a description of such gift;

"(B) a statement specifying the estimated total cost of the proposed physical or material change or addition and the amount of the deposit in an endowment for the depository required pursuant to subsection (g) of this section in order to meet the cost of such change or addition;

"(C) a statement of the purpose of the proposed change or addition and a general description of any papers, documents, or historical materials proposed to be deposited in the depository as a result of such change or addition;

"(D) a statement of any additional improvements or equipment for the depository associated with such change or addition;

"(E) an estimate of the increase in the total annual cost to the United States of maintaining, operating, and protecting the depository that will result from such change or addition; and

"(F) a certification that the depository, and the equipment therein will, after such change or addition, comply with the standards promulgated by the Archivist pursuant to paragraph (2) of this subsection.

"(5) The Archivist may not—

"(A) accept or take title to land, a facility, or equipment under subparagraph (A) of paragraph (1) for the purpose of creating a Presidential archival depository;

"(B) enter into any agreement under subparagraph (B) of such paragraph or any other agreement to accept or establish a Presidential archival depository; or

"(C) accept any gift under subparagraph (C) of such paragraph for the purpose of making any physical or material change to a Presidential archival depository,

until the expiration of a period of 60 days of continuous session of Congress beginning on the date on which the Archivist transmits the report required under paragraph (3) of this subsection with respect to such Presidential archival depository or the report required under paragraph (4) of this subsection with respect to such change or addition, as the case may be.".

(b) Section 2112(g) of title 44, United States Code, is amended to read as follows:

"(g)(1) When the Archivist considers it to be in the public interest, the Archivist may solicit and accept gifts or bequests of money or other property for the purpose of maintaining, operating, protecting, or improving a Presidential archival depository. The proceeds of gifts or bequests, together with the proceeds from fees or from sales of historical materials, copies or reproductions, catalogs, or other items, having to do with a Presidential archival depository, shall be paid into an account in the National Archives Trust Fund and shall be held, administered, and expended for the benefit and in the interest of the Presidential archival depository in connection with which they were received, and for the same purposes and objects, including custodial and administrative services for which appropriations for the maintenance, operation, protection, or improvement of Presidential archival depositories might be expended.

"(2) The Archivist shall provide for the establishment in such Trust Fund of separate endowments for the maintenance of the land, facility, and equipment of each Presidential archival depository, to which shall be credited any gifts or bequests received under paragraph (1) that are offered for that purpose. Income to each such endowment shall be available to cover the cost of facility operations, but shall not be available for the performance of archival functions under this title.

"(3) The Archivist shall not accept or take title to any land, facility, or equipment under subparagraph (A) of subsection (a)(1), or enter into any agreement to use any land, facility, or equipment under subparagraph (B) of such subsection for the purpose of creating a Presidential archival depository, unless the Archivist determines that there is available, by gift or bequest for deposit under paragraph (2) of this subsection in an endowment with respect to such depository, an amount for the purpose of maintaining such land, facility, and equipment equal to—

"(A) the product of—

"(i) the total cost of acquiring or constructing such facility and of acquiring and installing such equipment, multiplied by

"(ii) 20 percent; plus

"(B)(i) if title to the land is to be vested in the United States, the product of—

"(I) the total cost of acquiring the land upon which such facility is located, or such other measure of the value of such land as is mutually agreed upon by the Archivist and the donor, multiplied by

"(II) 20 percent; or

"(ii) if title to the land is not to be vested in the United States, the product of—

"(I) the total cost to the donor of any improvements to the land upon which such facility is located (other than such facility and equipment), multiplied by

"(II) 20 percent; plus

"(C) if the Presidential archival depository will exceed 70,000 square feet in area, an amount equal to the product of—

"(i) the sum of—

"(I) the total cost described in clause (i) of subparagraph (A); plus

"(II) the total cost described in subclause (I) or (II) of subparagraph (B)(i), as the case may be, multiplied by

"(ii) the percentage obtained by dividing the number of square feet by which such depository will exceed 70,000 square feet by 70,000.

"(4) If a proposed physical or material change or addition to a Presidential archival depository would result in an increase in the costs of facility operations, the Archivist may not accept any gift under subparagraph (C) of paragraph (1) for the purpose of making such a change or addition, or may not implement any provision of law requiring the making of such a change or addition, unless the Archivist determines that there is available, by gift or bequest for deposit under paragraph (2) of this subsection in an endowment with respect to such depository, an amount for the purpose of maintaining the land, facility, and equipment of such depository equal to the difference between—

"(A) the amount which, pursuant to paragraph (3) of this subsection, would have been required to have been available for deposit in such endowment with respect to such depository if such change or addition had been included in such depository on—

"(i) the date on which the Archivist took title to the land, facility, and equipment for such depository under subparagraph (A) of subsection (a)(1); or

"(ii) the date on which the Archivist entered into an agreement for the creation of such depository under subparagraph (B) of such paragraph,

as the case may be; minus

"(B) the amount which, pursuant to paragraph (3) of this subsection, was required to be available for deposit in such endowment with respect to such depository on the date the Archivist took such title or entered into such agreement, as the case may be.".

APPLICABILITY

SEC. 4. Paragraphs (3) and (4) of section 2112(g) of title 44, United States Code (as added by the amendment made by section 3(b) of this Act) shall apply with respect to any Presidential archival depository created as a depository for the papers, documents, and other historical materials and Federal records pertaining to any President who takes the oath of office as President for the first time on or after January 20, 1985.

STUDY OF MUSEUM OF THE PRESIDENTS

SEC. 5. (a) The Archivist of the United States, in consultation with the Secretary of the Smithsonian Institution and the National Capital Planning Commission, shall study the demand for, and the cost, and space and program requirements of, establishing a museum of the Presidents. With respect to such costs, the study shall examine the feasibility of establishing and operating such museum exclusively with non-Federal funds.

(b) Each Federal agency shall cooperate with the Archivist in conducting the study required by subsection (a).

(c) In the annual report for fiscal year 1986 required by section 2106 of title 44, United States Code, the Archivist shall include a statement of the results of the study required by subsection (a) and any recommendations of the Archivist with respect to establishing such a museum.

Mr. MADIGAN (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objecton to the request of the gentleman from Illinois?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Texas?

Mr. MADIGAN. Mr. Speaker, reserving the right to object, I yield to the gentleman from Texas [Mr. BROOKS] for a brief explanation of what is going on.

Mr. BROOKS. Mr. Speaker, I thank the gentleman from Illinois for his perceptive understanding of the parliamentary situation.

Mr. Speaker, last year, the House passed and sent to the Senate the bill, H.R. 1349, amending the Presidential Libraries Act of 1955.

The bill passed by the House last June represents an attempt to reestablish the balance between public and private support anticipated by the original law, by limiting the operating costs of future libraries and by shifting the burden of the remaining costs from the taxpayer to those individuals who would raise the funds used to build the libraries. This would be achieved by requiring future libraries to meet certain design and archival standards and by requiring that the donation of a building to be used as a Presidential library be accompanied by an endowment equal to at least 20 percent of the cost of building and equipping that facility.

The income from the endowment would then be used to offset the building-related operations costs.

The Senate amendment is consistent with the thrust of the House-passed bill. The gentleman from Ohio [Mr. KINDNESS] may wish to yield to the gentleman from Oklahoma, the chairman of the subcommittee, to explain the Senate amendment in more detail.

Mr. MADIGAN. Mr. Speaker, further reserving the right to object, I yield to the gentleman from Ohio [Mr. KINDNESS] for any contribution that he might care to make to this unexpected dialog.

Mr. KINDNESS. Mr. Speaker, I thank the gentleman from Illinois [Mr. MADIGAN] for yielding and for maintaining the rhythm of accomplishment of the House of Representatives during the course of this afternoon through his timely interdiction.

I say to the gentleman from Illinois that the gentleman from Texas [Mr. BROOKS] has, I think, quite properly described the measure, H.R. 1349. I would like to ask if the gentleman from Illinois would allow the gentleman from Oklahoma [Mr. ENGLISH] and myself to exchange words in a colloquy, if he would yield alternately to us.

Mr. MADIGAN. Perhaps, Mr. Speaker, I could withdraw my reservation and the gentleman from Ohio [Mr. KINDNESS] could make his own reservation.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Texas [Mr. BROOKS]?

Mr. KINDNESS. Mr. Speaker, reserving the right to object, and with great thanks to the gentleman from Illinois [Mr. MADIGAN], I would like to yield to the gentleman from Oklahoma [Mr. ENGLISH] for the purpose of explaining the Senate amendment that has taken place in conference between the House and the Senate conferees.

Mr. ENGLISH. Mr. Speaker, the Senate amendment to H.R. 1349 strengthens the House passed bill by—

Requiring a proportionately larger endowment for future libraries that exceed 70,000 square feet; and

Providing that additions or modifications, to future libraries, that increase the operating cost of that facility are accompanied by an endowment.

The Senate version also provides that more information be given to the Congress than is currently required.

Mr. KINDNESS. Mr. Speaker, I thank the gentleman for his response and further reserving the right to object, I would like to pose a couple of questions to the gentleman.

First, under current law, Presidential libraries are built only with privately donated funds and nothing in this legislation would change that, is that correct?

Mr. ENGLISH. That is correct, the cost of building Presidential libraries would continue to be borne by private groups. Like, for example, the 100-member Reagan Library Foundation we've read about recently.

Mr. KINDNESS. Second, the income to the endowment is to be used for building operations costs and not program costs and, further, that income would supplant, not supplement, annual congressional appropriations for the operation of that library and, thereby reduce the growth in the cost to the taxpayers of operation of these facilities in the future, is that correct?

Mr. ENGLISH. That is correct, it would supplant most if not all of the building operations cost appropriation. Had this approach been in effect from the outset, costs to the taxpayers would be one-half of what they are now.

Mr. KINDNESS. Third, this legislation would clarify the authority of the Archivist of the United States to solicit, as well as accept, gifts or bequests for the purpose of maintaining, operating, protecting, or improving any of the existing of future Presidential libraries. Gifts offered for the purpose of maintenance of an existing or future Presidential library would be treated as an endowment, the income to which could be used only for that purpose, but other income, such as the proceeds from fees or from sales of historical materials, copies or reproductions, catalogues, or other items having to do with a presidential library would not be so limited in its use; in fact the bill makes no change in how those proceeds may be used, is that correct?

Mr. ENGLISH. The gentleman's understanding is consistent with mine.

Mr. KINDNESS. Finally, although the endowment requirement would first apply to the library of the incumbent's successor, the Archivist's building standards for archival suitability would take immediate effect, is that correct?

Mr. ENGLISH. That is correct. Both the House and Senate rejected a White House proposal that the incumbent's library be exempt from the minimum standards provision.

Mr. KINDNESS. Mr. Speaker, before withdrawing my reservation of objection, I would like to remind my colleagues of the obligation of the U.S. Government, which took effect with the incumbent administration, under the Presidential Records Act of 1978, to be responsible for the custody, control, and preservation of, and access to presidential records. While some have criticised the continuance of the Presidential library system, I believe that it provides an efficient means of fulfillment of the Government's obligations under the Pesidential Records Act.

Mr. WAXMAN. Mr. Speaker, will the gentleman yield to me?

Mr. KINDNESS. I yield to the gentleman from California.

Mr. WAXMAN. Mr. Speaker, I thought this was an agreed-upon report. I did not realize it was going to involve a lengthly debate.

Perhaps you two could work out your differences.

Mr. KINDNESS. I thank the gentleman from California for his thought there. If it sounds as though there is controversy, the thought it just to lay down a little bit of legislative history and go on from here. I do not believe there is any disagreement.

If that is correct, the gentleman from Oklahoma [Mr. ENGLISH] may very well have a short response to that.

Mr. ENGLISH. Mr. Speaker, if the gentleman would yield, certainly the

gentleman's understanding is consistent with mine.

Mr. KINDNESS. Mr. Speaker, I thank the gentleman and just before withdrawing my reservation of objection, I would like to remind my colleagues of the obligation of the U.S. Government which took effect with the incumbent administration under the Presidential Records Act of 1978 to be responsible for the custody, control and preservation of and access to Presidential records. That is the purpose of this legislation, to make that clearer and to set the rules for the future with less costs to the American taxpayer.

Mr. Speaker, further under my reservation of objection, I yield to the gentleman from Idaho [Mr. CRAIG] who has, I believe, a question.

Mr. CRAIG. Mr. Speaker, I thank my colleague for yielding and I would just like to join with my colleagues from the Committee on Government Operations in urging the House to adopt the Senate amendment to H.R. 1349, the Presidential Libraries Act of 1986.

If there is one comment that I, and I am sure other Members of Congress, hear spoken often by our constituents in our districts, it is that we think that past Presidents are oftentimes treated too generously by the taxpayers of this country and here is an example to tighten up on the generosity of the Treasury at this time as decided by this Congress to make Presidential libraries largely stand on their own two feet with those who support the ultimate endowing of them.

I would urge the passage of this legislation.

□ 1505

Mr. KINDNESS. I thank the gentleman.

Mr. ENGLISH. Will the gentleman yield further?

Mr. KINDNESS. I yield to the gentleman from Oklahoma.

Mr. ENGLISH. I want to thank the gentleman from Ohio [Mr. KINDNESS], our ranking minority member, for his thoughtful and unwavering support of this legislation. I also urge my colleagues to support the adoption of the Senate amendment, and I hope that they will join me in urging President Reagan, whose $45 million library will, at the insistence of his aides, be exempt from this cost-saving, deficit-reduction effort, and to have set an example for the American taxpayer by committing his library foundation to the establishment of the operating cost endowment-type envisioned by both the House and the Senate.

Mr. KINDNESS. Mr. Speaker, under my reservation, I thank the gentleman from Oklahoma in particular for his thoughtful approach to the resolution of this matter over the course of several years now, since 1982 when the hearings were first held, to this point where we contemplate final passage.

Mr. REID. Mr. Speaker, I rise in support of H.R. 1349, as amended by the Senate. The purpose of this legislation, introduced by my distinguished colleague from Oklahoma, Mr. ENGLISH, will reduce the costs of operating Presidential libraries. This legislation is long overdue.

My interest in the Presidential Library System began in 1983 during a meeting with Senior Citizens in Overton, NV. The residents of Overton expressed their strong objections to the costs of maintaining former Presidents. Of particular concern to the Overton Senior Citizens was the $14 million spent by the American taxpayers in 1983 to maintain Presidential libraries—the largest chunk of the expense associated with maintaining former Presidents. During the 98th Congress, I introduced legislation to curtail the costs of the Presidential Library System and have joined Congressman ENGLISH in his efforts to accomplish this end ever since.

Even though the libraries are built with private funds, they are maintained by the taxpayers. Operating costs for the seven existing Presidential libraries are expected to be about $14.6 million in fiscal year 1986. H.R. 1349 requires that in the future, private foundations that build the libraries must establish an endowment, amounting to 20 percent of the cost of construction, to defray operational expenses. A sensible provision added to the bill by the other body also places a 70,000-square-foot limit on the size of future libraries, requiring private funding to pick up costs associated with larger space.

It is time for us to relieve the Federal Government and the taxpayers of this excessive financial burden. H.R. 1349 will address the uncontrollable spending associated with maintaining former Presidents and still allow for the maintenance of these historical documents. For these reasons, H.R. 1349 deserves our support. Thank you.

Mr. KINDNESS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Texas?

There was no objection.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON S. 124, SAFE DRINKING WATER ACT AMENDMENTS OF 1986

The SPEAKER pro tempore. The Chair recognizes the gentleman from Illinois [Mr. MADIGAN].

Mr. MADIGAN. Mr. Speaker, I yield 5 minutes to the gentleman from North Carolina [Mr. BROYHILL], the ranking member of the Committee on Energy and Commerce.

Mr. BROYHILL. Mr. Speaker, I rise in strong support of this reauthorization of the Safe Drinking Water Act amendments of 1986. The Safe Drinking Water Act has often been overshadowed by more aggressive and expensive environmental laws, such as the Clean Air Act and Superfund, but we now know that it is equal to those other statutes in importance. This new legislation represents a giant step forward in the protection of our tap water.

Contamination of our Nation's drinking water supplies has become a major public health concern. Up to this point in time, the Federal Government has set national standards, or maximum contaminant levels, for only 22 contaminants in our drinking water, even though there may be thousands of pollutants invading our public water supplies. This bill will require the regulation of 85 additional toxic chemicals in the next 3 years and potentially hundreds more shortly thereafter. Of equal importance, however, is the fact that this legislation maintains the important provision of current law which requires the environmental protection agency to take into account the costs of control, when setting maximum contaminant levels. This represents a reasoned, balanced approach to environmental regulation.

Mr. Speaker, there are two provisions in this legislation which are especially important.

The first is designed to prevent underground sources of drinking water, which are now clean, from becoming contaminated. Section 205 of S. 124 requires States to develop plans to prevent man-made contamination from entering underground drinking water supplies through wellhead areas. This provision requires no new State regulatory program, but instead gives each State maximum flexibilty to protect these vital resources in the way it sees fit. Too often environmental laws have concentrated solely on cleaning up pollution after it occurs. This bill puts equal emphasis on guaranteeing that our pure drinking water stays that way.

The second provision which deserves to be highlighted is section 107 which provides for technical assistance to small water systems. Currently, the majority of violations of the Safe Drinking Water Act occur at the thousands of small water systems which serve rural, less populated areas. These types of systems are prevelant throughout North Carolina and most other areas of the country. Many times these systems are operated by the town manager or local fire chief, who have little, if any, training in this area.

This bill would provide funds to establish cost-effective, but crucial technical assistance programs for these small towns. This assistance would include training, the performance of engineering studies, and perhaps most importantly, the implementation of a "circuit rider" program. This means that an expert in public water delivery would travel around a region and instruct the operator of small, rural sys-

tems on the appropriate methods of monitoring, treatment, and management. This simple program could literally eliminate thousands of violations of the law every year, and improve the quality of tap water for millions of rural Americans.

In closing, Mr. Speaker, I want to reiterate my strong support for this bill and urge my colleagues to approve it overwhelmingly.

Mr. WAXMAN. Mr. Speaker, may I inquire of the Chair the time I have remaining?

The SPEAKER pro tempore. The gentleman from California [Mr. WAXMAN] has 22 minutes remaining.

Mr. WAXMAN. Mr. Speaker, I am pleased to yield 5 minutes to our colleague, the gentleman from New York [Mr. DOWNEY] who introduced legislation to deal with a very important problem of sole-source aquifers, which became the basis for part of the legislation that is before us today.

Mr DOWNEY of New York. Mr. Speaker, I am pleased today that 4 years of hard work have produced a conference report on amendments to the Safe Drinking Water Act that will mean high quality drinking water for millions of Americans. I want to thank the chairman and ranking minority member of the Health Subcommittee, Representatives WAXMAN and MADIGAN, and their counterparts in the other body for their efforts to include a program to protect the 21 sole source aquifers in the United States in the Safe Drinking Water Act. The Sole Source Aquifer Demonstration Program in S. 124 will enable areas such as Long Island to protect underground supplies of drinking water and preserve lands that are critical to the quality and quantity of that ground water.

Maintaining potable ground water in an aquifer depends on the nature of the land and vegetation lying above the aquifer's recharge zone. A recharge zone is an area through which precipitation and other surface runoff filters down into the water table. Several undeveloped tracts of land on Long Island—including 110,000 acres of pine in eastern Suffolk County—anchor the loose soil of the island's recharge areas. Preserving this land is critical to the protection of Long Island's supply of ground water.

However, pressure to develop these lands threatens the future quality and quantity of Long Island's only source of drinking water. Recent facts exemplify the ways in which pressure to recklessly develop land has led to ground water contamination. Between 1976 and mid-1981, 88 of the approximately 1,000 major public drinking water wells on Long Island were closed or restricted in their use because of contamination from synthetic organic chemicals and nitrates. On the east end of Long Island, 1,400 private wells have been contaminated by pesticides that have entered the aquifer system.

Severe contamination of a sole source aquifer system means costly remedial action. Losing a natural supply of water would force a community to rely on bottle water, treat its tap water through filters, or even pipe good water from a distanct source. Portions of some communities on Long Island, such as Bay Shore, have been forced to abandon their wells in favor of using public wells. The hookup costs have been expensive. Preventing problems before they develop is sound public policy that will mean cost savings and clean water for millions of people. That is what S. 124 will do.

The Sole Source Aquifer Demonstration Program in S. 124 is based on legislation that Senator DANIEL PATRICK MOYNIHAN and I introduced in the 98th and 99th Congresses. Knowing how important the preservation of Long Island's watershed lands are to the quality of the island's drinking water, we wrote our legislation to enable Suffolk and Nassau Counties and New York State to obtain parts of these lands. S. 124 preserves this important provision and will enable municipal governments on Long Island such as Suffolk County to acquire land within the Suffolk Pine Barrens in order to protect the underlying ground water.

S. 124 should preserve Long Island's fragile supply of drinking water and those lands critical to our water. It is good solid preventive medicine and will guarantee the purity and abundance of clean drinking water for the people of Long Island and the other 20 sole source aquifers, now and forever.

Mr. MADIGAN. Mr. Speaker, I yield 3 minutes to the gentleman from Colorado [Mr. STRANG].

Mr. STRANG. Mr. Speaker, if I may, I would like to engage the chairman of the subcommittee, Mr. WAXMAN, in a brief colloguy regarding section 205 of the bill.

Mr. WAXMAN. Certainly.

Mr. STRANG. Regarding the text of section 205 of the bill regarding wellhead protection and State plans, and the report language on page 46, is it the intent of the committee that nothing in this section shall interfere with State water laws and State water appropriation processes?

Mr. WAXMAN. If the gentleman will yield to me, that is correct.

Mr. STRANG. Would the chairman agree then, for the purpose of legislative history and congressional intent, that if there is found to be any conflict between the provisions of this section and State water laws and State water appropriation processes, that it is the intent of Congress that the primacy of State water laws are to prevail?

Mr. WAXMAN. If the gentleman will yield further, I do not anticipate any such conflict.

Mr. STRANG. I thank the chairman. I would also like to thank the committee and the chairman and the ranking Republican on agreeing to provisions in section 302 whereby Indian tribes are being treated under the act at a par with the States in terms of primary enforcement responsibilities. Also, that you appreciate the survey directed the legislation to ascertain drinking water problems and needs on Indian reservations. The Southern Ute and Ute Mountain Ute tribes in Colorado are appreciative of these provisions.

Finally, Mr. Chairman, I would point out that even with the assurances of the esteemed chairman of the subcommittee, I must rise in reluctant opposition to this bill due to certain revisions which were underscored by letters from the Colorado General Assembly; from Mr. Thomas of the EPA; and from the Justice Department, pointing out that this is an intrusion of the Federal Government into what are properly State land use and local management decisions.

Mr. Speaker, I am submitting these letters for the RECORD at this point:

COLORADO HOUSE OF REPRESENTATIVES,
Denver, CO, April 25, 1986.

Hon. MIKE STRANG,
Longworth House Office Building, Washington DC.

DEAR CONGRESSMAN STRANG: I am writing concerning the 1986 amendments to the Safe Drinking Water Act which are now in conference committee. Senator Stafford and Congressman Dingell are the chairmen of the Conferees. My concern about the Act is that, as I understand it, the Wellhead Protection Act has been included in the proposed conference committee report. The wellhead provisions, as I understand it, were apparently written entirely by the conference committee staff without debate by either the House or Senate. Obviously, this process is not a desirable way to pass such a major piece of legislation.

As a matter of fact, we have not even been able to obtain a complete text of the wellhead provisions to review them. I would urge you to ask that such far reaching legislation not be included in the final conference committee report of a measure such as this that is bound to pass.

Not only has the procedure been violated, but I see great potential for harm to Colorado and other western states if this type of land use legislation is passed in the name of protecting ground water quality. This type of land use regulation might be appropriate in the East; however, it is inappropriate in the West, and that is the basis for my concern. In western states, as you know, drinking water supply wells often are hundreds of feet deep, with recharge zones hundreds of miles away from the well site. In addition, of course, alluvial wells in Colorado have withdrawals regulated by our surface water right system. I am afraid that this legislation would interfere with our surface water right regime. I know time is short, so I urge you to talk to your colleagues on the conference committee to prevent them from

making a good intentioned mistake in this new and complex area of ground water management.

Thank you for your attention to this matter.

Sincerely,

CHRIS PAULSON.

U.S. ENVIRONMENTAL PROTECTION AGENCY,
Washington, DC, March 20, 1986.

Hon. ROBERT STAFFORD,
Chairman, Committee on Environment and Public Works, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: In my September 17 letter to you, I set forth the Administration's serious reservations regarding provisions in both the Senate and House versions of the Safe Drinking Water Act amendments. While I am pleased to note that progress has been made in addressing some of our concerns, there are still two major issues on which I would like to make further comment.

GROUND WATER

I have learned that Conferees and their staffs are continuing to meet to resolve differences between S. 124 and H.R. 1650. I am specifically concerned about reports that you are moving toward a compromise that would substantially enlarge the Federal responsibility to control ground water. I share this concern with Attorney General Meese, who wrote to you on March 14.

I wish to make it very clear that this Administration is strongly opposed to legislation of a Federally-mandated or Federally-approved ground-water regulation program. Inclusion of such provisions would be unwise and unnecessary.

The Administration takes this position for several reasons: first, a requirement, like the one being considered, that States develop comprehensive ground-water protection programs which are then subject to Federal review and disapproval would inevitably, despite the best of intentions, involve the Federal government in sensitive local land use and water rights decisions. This would seriously disrupt well-settled Federal/State relationships. State and local primacy over ground-water use, even on Federal lands, has historically been recognized by Congress, dating back to such acts as the Desert Lands Act, the Reclamation Act of 1902, and continuing through the Clear Water Act in the last decade. The site-specific nature of contamination incidents and the character of the groundwater resource necessitate reliance on land use controls which have been traditionally and properly the province of State and local governments. We do not believe that the problems we are now facing with ground-water contamination warrent the massive shift in traditional Federal/State roles that would result from the current proposed compromise.

Second, there is no need for an increase in Federal over-sight of ground water. This issue was carefully explored by EPA when it developed the Ground-Water Protection Strategy. We concluded then that sufficient statutory authority exists within the Agency to protect ground water from major contaminants of concern and that the States have the principal role in protecting the overall resource. This conclusion is still valid. This position is also strongly held by the Association of State and Interstate Water Pollution Control Administrators and the National Governor's Association, who have thoroughly studied the issue and are in agreement that no new Federal legislation is needed.

Third, we continue to be impressed with the efforts and progress that the States have made to protect their own resource. They are working closely with EPA in implementing national programs directed at hazardous waste. They are also taking responsible steps to assess their overall problem and the need for comprehensive protection. A number of States have passed ground-water legislation. Some ten States now have Ground-Water Protection Strategies and another 25 are currently developing them. The remaining States have activities underway which will lead to statewide ground-water strategies and programs. We believe that the proposal you are currently considering would disrupt these efforts and delay the progress which is underway.

As a part of implementing the Ground-Water Protection Strategy, EPA has provided $7 million in State grants in FY 1986 and $6.7 million in FY 1987 for the States to use toward developing and enhancing State ground-water protection strategies and programs. In addition, EPA is actively addressing various sources of ground-water contamination, such as pesticides and underground tanks through new and existing regulatory programs. Problems such as septic tank contamination are also being addressed through a series of advisory documents. Also, the Agency is addressing other issues such as promoting consistency among EPA programs and policies for ground water, identifying ground-water priorities, and enhancing our research capacity. We firmly believe that these efforts currently being undertaken by EPA and the increasing attention to ground-water protection by the States represent substantial progress in addressing our concerns about ground-water quality.

Fourth, we understand that the Federal consistency section has been changed to language similar to that found in several other Federal environmental statutes, such as the Resource Conservation and Recovery Act (RCRA) and the Clean Water Act. This new provision would provide that Federal agencies are subject to the substantive and procedural requirements of a State program to the same extent as other persons, and authorizes the President to exempt a Federal activity from the requirements of a State plan if he deems this to be in the paramount interest of the United States. This provision raises some concerns. The State ground-water programs envisioned by these new bills would require far less uniformity and consistency among the States than programs developed under other Federal statutes such as RCRA and the Clean Water Act. There is also more potential that control measures adopted by the States could take the form of land use controls which could result in excessive and unwarranted State intrusion into Federal policies and activities. The Presidential exemption for activities deemed to be in the paramount interest is a limited one which would not entirely balance these concerns.

Fifth, we are concerned that there has been no opportunity for public discussion of the proposed compromise. Major changes in a long-held State responsibility such as ground-water control deserve careful and deliberate scrutiny by all interested parties. Many organizations are developing positions on the ground-water protection issue and a number of related bills have been introduced. We believe that this public dialogue should be fully heard before congressional action, if any, is taken on ground water.

STANDARD-SETTING

In my previous letter, I stated that the Agency needs flexibility for selecting priority contaminants for regulation. Consequently, I am pleased to note that the Conferees are considering dropping the "rational basis" language in the House Bill.

I continue to be concerned, however, about the proposed requirement that the Agency regulate all of the chemicals listed in our two Advanced Notices of Proposed Rule Making (ANPRMs) without regard to what the data on those chemicals might show. The ANPRMs were never intended to be a final list but rather were preliminary working lists on which public comment and additional data were requested. Requiring the Administrator to regulate all chemicals listed would preempt decisions based on good scientific evidence and could lead to unsound and unwarranted regulations. The Agency must have flexibility to make scientific judgments regarding the appropriateness of establishing MCLs.

The need for flexibility is demonstrated by regulatory proposals we have made since my letter to you in September. In November, we proposed MCLs for eight volatile organic chemicals (and plan to propose an MCL for a ninth) and we have proposed recommended maximum contaminant levels [RMCL's] for 46 of that group. We also proposed RMCLs for three new constituents and plan to set standards for seven radionuclides.

Based on the available scientific evidence regarding the health effects caused by the remaining constituents and their frequency of occurrence in drinking water supplies, we decided not to propose RMCLs for 22 constituents at that time. For three of these 22 constituents, we had sufficient data to determine that they do not merit MCLs. For the remaining nineteen, we are conducting additional toxicological studies, monitoring programs, and surveys. This work will enable us to re-evaluate these remaining substances as well as to identify additional contaminants which may require future regulation. We plan to address these constituents in Phase V of our regulatory development process. After the evaluation of the data for the Phase V contaminants, we may determine that some may not warrant regulation.

Clearly, in order to use our limited resources most effectively to protect public health, we need to have this type of flexibility to select priority contaminants for regulation. We have discussed with your staff the concept of substituting contaminants on a one-for-one basis for those listed in ANPRMs. These substitutions would allow the Agency to focus its resources on chemicals which merit consideration. I urge you to allow EPA to substitute up to at least 15 contaminants for those listed in the ANPRMs.

As you continue Conference Committee deliberations, I would be pleased to discuss our concerns and suggestions with you and other members of the Conference Committee.

The Office of Management and Budget advises us that it has no objection to the presentation of these views from the standpoint of Administration policy.

Sincerely,

LEE M. THOMAS.

OFFICE OF THE ATTORNEY GENERAL,
Washington, DC, March 14, 1986.

Hon. JOHN DINGELL,
Chairman, Energy and Commerce Committee, U.S. House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: We have learned that Conferees and their staffs are continuing to meet to resolve differences between S. 124 and H.R. 1650, specifically concerning initiation of a broad federal responsibility to control groundwater. Further, we understand that discussions to date may lead the Senate Conferees to accept several major provisions of section 203 of the House Bill to which the Administration remains strongly opposed.

The Department of Justice is particularly concerned about these groundwater proposals based on our unique perspective as the courtroom representative of a host of federal departments and agencies. The groundwater proposals implicate a broad range of legal policy issues which we identify from our litigation experience involving, for example, Indian water rights claims, the Environmental Protection Agency's hazardous waste enforcement program, claims brought under the Coastal Zone Management Act, the National Environmental Policy Act, federal takings and condemnation laws, and a broad range of other environmental and natural resource legal policy issues.

The Department is strongly opposed to the type of groundwater program contained in the House bill and current staff proposals. We urge that the Administration as a whole be given an adequate opportunity to review and comment on the specifics of any staff recommendations to Conferees before final action is taken by the Conferees.

State and local primacy over groundwater use has historically been recognized by Congress, dating back to such acts as the Desert Lands Act of 1877 and the Reclamation Act of 1902, and continuing through the Clean Water Act in the last decade. Land use decisions also traditionally have been left to local control. However, contrary to the representations made in report language, the House bill necessarily would result in federal intrusion into highly localized and sensitive decisions on land use, water allocation, and other areas of particular state and local concern. I would point out that the National Governors Association, the Conservation Foundation and the Association of State and Interstate Water Pollution Control Administrators have all recently concluded that, at most, a limited federal role is appropriate—emphasizing the kind of technical assistance that the Environmental Protection Agency (EPA) is moving rapidly to provide as part of its groundwater strategy.

As stated in more detail in the Department's letter of September 13, 1985, the House bill's approach to groundwater is highly objectionable. Under the House bill every state must develop a comprehensive regulatory plan to control groundwater quality and quantity, meeting detailed federal standards specified in the Act, and then must subject the plan to federal approval.

The detailed federal standards for the groundwater regulatory plan as set forth in the bill require regulations and other measures for controlling all human development activities that affect groundwater; plus elaborate data collection and description of groundwater sources, recharge areas, and quality, and the location and types of human development potentially affecting groundwater throughout the state.

Should a state fail to produce a regulatory plan, the federal government can be compelled to do so through court action under a procedure specified in the bill—though the federal government could not be compelled to directly regulate activities within the states.

This Administration firmly believes that the extensive scheme contained in the House bill for regulating human development activities in every state has no place in Federal law. If passed it would represent a federal mandate for a regulatory system that, once put in place and defined in even more detail in regulations and court decisions, would inevitably become an unwarranted federal bureaucratic intrusion into human and economie affairs. There is no demonstrated urgent need, given the array of other federal statutes already in place and EPA's current activities, and there clearly has been inadequate analysis of the impacts of embarking on such a course.

We understand that current Senate staff proposals are more moderate than the House bill in many respects, but those proposals still represent a dramatic change in groundwater policy with a substantive federal presence. The existing federal presence, in protecting groundwater from specific sources of contamination, is substantial and EPA is already moving toward coordinating that federal presence and developing a strategy that states can use and adapt to meet their own unique situations.

The Senate staff proposals under consideration, however modestly phrased, require each state to develop an extensive plan to control groundwater quality and apparently still subject those plans to federal oversight for substantive adequacy. Yet the EPA Administrator's responsibility in plan review is left unacceptably vague. If the Administrator is expected simply to determine if each element of a program is present, without passing judgment on the adequacy of the program in actually meeting a substantive federal protection standard, then this should be explicitly stated. However, if a substantive review standard is intended, then the Administrator is left without guidance on many extremely difficult issues of basic policy, and, in fact, it may be impossible to meet that standard without interference with prior appropriations systems of water rights or, more importantly, rights already acquired under those systems.

The protection standard of the proposal, if one exists, apparently is enormously broad and stringent. States must develop plans that protect geographic areas around drinking water sources from all potential sources of contaminants which may have any adverse impacts on the health of persons. The proposal does not limit the universe of potential contaminants to a manageable level. Also, the protection standard does not take into account the feasibility and other environmental and socio-economic impacts of various control measures. Finally, the geographic scope of the protection area is not limited to that reasonably necessary to protect the water supply.

Like the House bill, the staff proposal (as we understand it), requires that all federally conducted or supported activities must be consistent with state plans. This goes far beyond a requirement that federal facilities not contaminate local water supplies. This potentially grants states (and, as discussed below, any citizen) enormous power over a very wide range of federal and private activities which may only indirectly affect groundwater, it at all. This program could even be interpreted to alter responsibilities provided by other federal law. There is no requirement for consideration of the national interest in state plans: nothing explicitly prevents imposition of the most extreme and unreasonable measures to bar unpopular federal activities of federally supported private activities.

In addition, absent specific language to the contrary, the existing citizen suit provision in the SDWA provide a basis for any citizen to sue states or the fedral government over development and implementation of this program. The judiciary will be faced with determining the meaning and effect of the vague but far-reaching standard, and thus will be thrust into a policymaking role for which it is institutionally ill-suited.

The sum of these flaws is a program of vast and wholly unpredictable dimensions, with results ranging from excessive federal involvement in local land use to excessive state power over federal policies and activities, with no means for balancing competing legitimate interests, and no clear vision of appropriate federal and state roles.

I believe that if either the House bill or the staff proposal is enacted, they will disrupt a broad range of federal activities and strain relations among federal, state, and local governments, in no small part because of questions raised by proposed language which would have to be resolved in litigation. Therefore, I strongly urge that the Conferees reject the new substantive groundwater regulatory program under current staff consideration, and not adopt any groundwater program without an opportunity for full public and Administration input.

Sincerely,

EDWIN MEESE III,
Attorney General.

Mr. STRANG. Mr. Speaker, I also find objectionable the increase in moneys put into this bill by the conferees, which far exceeded the moneys contemplated by this House when this bill passed here.

The increase of $30 million, for example, in new programs is absolutely at variance with anything we are trying to do around here under the era of Gramm-Rudman.

Mr. MADIGAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of the conference report on S. 124, the Safe Drinking Water Act Amendments of 1986. This bill represents a 5-year reauthorization of this important environmental law, which expired on September 30, 1982.

I introduced this bill on March 21, 1985, along with Chairman WAXMAN and many other Members. It passed the Subcommittee on Health and the Environment, the Committee on Energy and Commerce and the full House of Representatives, all by voice vote. The Senate bill, S. 124, also passed by voice vote. This measure was formulated with the assistance of the U.S. Environmental Protection Agency, our public water utilities, the chemical and petroleum industries, and several environmental groups.

Mr. WAXMAN has already outlined the major features of this bill. Briefly,

it requires EPA to set more national standards, or maximum contaminant levels, for pollutants in our drinking water. It maintains, however, the important requirement that costs of compliance be taken into consideration when setting these maximum levels.

This legislation also increases monitoring of unregulated contaminants in drinking water, provides technical assistance to small rural and Indian water systems which are the ones most often violating the law, and provides criminal penalties against anyone who willfully tampers with a public water supply.

Finally, Mr. Speaker, this bill contains a modest, but very important provision to protect wellhead areas over underground sources of drinking water. This provision requires that States develop plans to prevent manmade contamination from entering underground drinking water supplies through the wellhead. This narrow provision does not cover potential sources of drinking water or other ground water supplies which do not serve as drinking water.

This ground water provision was developed with Senator SIMPSON to take into account the concerns of the West, and both the legislative language and the statement of managers make clear that states have total flexibility to develop this protection plan and that in no way are we altering existing water rights or priorities, nor or we limiting existing authorities for States to manage, regulate, protect, or identify ground water resources within their jurisdiction.

□ 1515

I would read to you from the April 23, 1986 issue of Chemical Week magazine, the following article:

The Clean Water bill wins cheers all around.

The Safe Drinking Water Act reauthorization bill approved last week by House and Senate conferees was like an oasis in the legislative desert, refreshing to the chemical industry and environmentalists alike.

"The chemical industry and Union Carbide were very please" says Scott Cunningham, Union Carbide's chairman of the Chemical Manufacturers Association Government Relations Committee on Safe Drinking Water. Jackie Warren, senior staff attorney at the National Resources Defense Council, says, "I like it." Cunningham calls the bill an excellent effort to improve the Nation's drinking water supplies on a schedule that the Environmental Protection Agency thinks it can meet.

Here we have the Chemical Manufacturers Association, environmental groups, the Environmental Protection Agency, the Democratic leadership, and the Republican leadership on the committee all embracing the bill; the Senators from the West embracing the bill, the conference report and the bill passing the Senate by voice vote. I would suggest to you, Mr. Speaker, that anybody who thinks they found something wrong with this has in fact a very active imagination. And I congratulate the gentleman from California, the chairman of the subcommittee, for his leadership and the gentleman from North Carolina [Mr. BROYHILL] for his leadership on this issue.

Mr. Speaker, I reserve the balance of my time.

Mr. NIELSON of Utah. Mr. Speaker, will the gentleman yield?

Mr. MADIGAN. Yes; I would yield to the gentleman from Utah. I have to be careful with the time because we have another Member who has asked for time. We have to be brief.

Mr. NIELSON of Utah. I thank the gentleman for yielding.

I have one question. The gentleman has indicated that the administration is for the bill. EPA says they are strongly opposed to this legislation of a federally mandated or federally approved ground water regulation program. They say it involves the Federal Government in sensitive local land use and water rights decisions.

Mr. MADIGAN. If the gentleman will allow me to reclaim my time, that statement was made by EPA before the conference committee report was ever agreed to by the conferees.

Mr. NIELSON of Utah. I agree with that. However, you have added $100 million to what you had before, and they were opposed to it before. I would think they would be even more vehemently opposed now.

Mr. MADIGAN. If the gentleman would allow me to reclaim my time, throughout this entire process, throughout this entire process in addressing all of the objections raised by the Environmental Protection Agency, they never once at any time made any objection based upon the amount of funding in the bill. At no time throughout the entire process going back to the original considerations in the subcommittee has the EPA said one word about the funding levels in the bill. They do not communicate with us now in that regard and have not throughout the entire process.

Mr. Speaker, I yield 3 minutes to the gentleman from Washington [Mr. CHANDLER].

Mr. CHANDLER. I thank the gentleman for yielding.

Mr. Speaker, the gentleman from Illinois says that anybody with a problem with the bill may well have an active imagination. I may be standing in behalf of people who fit that description today. But nevertheless, they are concerned. If I may ask the chairman of the subcommittee a question concerning the intent of the bill: Purveyors of water in my district claim that they are selling pure water, yet they are concerned that with this legislation they will be required to treat it. Do the amendments require mandatory treatment of all public water systems regardless of purity, or do they require treatment only in documented problem cases?

Mr. WAXMAN. Mr. Speaker, will the gentleman yield to me?

Mr. CHANDLER. I yield to the gentleman from California.

Mr. WAXMAN. I thank the gentleman for yielding.

Mr. Speaker, as the conference report specifies, the amendments direct the Administrator of EPA to promulgate regulations specifying criteria under which filtration is to be required or to specify procedures by which States may require filtration.

Mr. CHANDLER. Is that to say that we can ease the minds of water district commissioners who feel they have pure water and do not want to have to treat it? And in one case, in fact, they claimed they would have to filter out manganese in order to treat it, if that becomes necessary.

Mr. WAXMAN. It is up to EPA, and I think the report speaks for itself. If they have safe drinking water and meet the standards, then it seems to me they should not be required to do anything more.

Mr. CHANDLER. I think that is the assurance that they are looking for, Mr. Chairman.

Mr. Speaker, I congratulate the chairman of the subcommittee for the bill, and I thank him for his answer.

Mr. SCHEUER. Mr. Speaker, today the House takes up consideration of the conference report on S. 124, the Safe Drinking Water Act Amendments of 1986. As one of the House conferees on this important environmental legislation, I am pleased that the House and the Senate conferees have been able to agree to a bill which significantly strengthens the present Safe Drinking Water Act.

The amendments, as agreed to by the House and the Senate conferees, address several issues which are critical to the protection of our drinking water. Perhaps the most important is the protection of our ground water. Despite assurances from the EPA and from the chemical companies that pesticides could never leach into ground water from agricultural applications, over the last several years we have discovered ground water contamination from pesticides in scores of rural communities across the Nation. In other communities, we have discovered contamination from a wide range of volatile organic compounds which may be associated with adverse health effects, including cancer. Indeed, the Congressional Office of Technology Assessment estimates that 29 percent of the ground water supplies of 954 U.S. cities with populations over 10,000 are contaminated.

The threat from ground water contamination is all the more serious considering that, for all practical purposes, amendments agreed to by the Senate and the House conferees go far toward protecting this vital resource for ourselves and for the next generation. While the wellhead protection program included in the conference report does not go as far as the ground water protection provisions included in

H.R. 1650, it takes a significant step forward in requiring all States to establish programs to protect existing wells supplying public drinking water systems from sources of contamination, such as hazardous wastes, leaking underground storage tanks, and pesticide applications.

The provisions agreed to by the House and Senate conferees should also prod EPA into issuing long-overdue health standards for drinking water. Despite the fact that more than 700 synthetic organic chemicals, pesticides, heavy metals and other pollutants have been found in our drinking water, EPA has regulated fewer than 25 contaminants in 12 years. The conference report requires EPA to set standards for 83 contaminants within 3 years, and provides the Administrator with narrow discretion to substitute other contaminants which he may find to be more of a threat to public health.

The conferees and their staffs have worked diligently to bring back to both Houses recommendations which can put the Safe Drinking Water Act back on course, and protect our public drinking water supplies for the next generation. I urge the Members of the House to accept the conference report, and to send it to the Senate and the White House.

Mr. PICKLE. Mr. Speaker, I rise in support of the conference report before us. I believe the Federal Government has a legitimate role to play in the presevation and conservation of this Nation's drinking water supplies.

Our State and local governments have done a commendable job of enacting laws and programs designed for the preservation of water supplies. However, the problem has grown. Pollution from one area spills into an area under a different governmental jurisdiction. For these reasons, Congress should act cooperatively to maintain the quality of drinking water for the Nation.

Mr. Speaker, as the Congressman from the 10th Congressional District in Texas, where a portion of our drinking water is supplied from an underground aquifer called the Edwards Aquifer, I am particularly supportive of the sections of the bill dealing with the protection of sole-source aquifers.

In my part of the country, we are very dependent on the Edwards Aquifer for drinking water. Yet this important supply of water is already being threatened with various forms of contamination and the possibility of total depletion.

Some positive things are happening at the State and local levels in Texas to help protect this invaluable resource, but they need our support. We, in Congress, ought not to sit by and watch the depletion and contamination of our drinking water occur.

Many of our technical experts in the area of water supply have predicted that by the 1990's, we could face the same kind of crisis with drinking water shortages that we did with oil in the 1970's. So we have to ask ourselves, where are we going to import safe drinking water from, in the 1990's, if we do not have enough in the United States to go around. The answer is to plan ahead. We may have to take some lumps now, but I believe it will be worth it in the long run. Let's take the lead on this critical issue by passing this conference report today. It is good for the country.

Mrs. VUCANOVICH. Mr. Speaker, although I am in support of safe drinking water and concerned about contaminants that threaten public health, I am equally concerned about the standards and procedures being used by the EPA in determining hazardous levels of chemicals in our water systems. Specifically I am concerned that the EPA may blindly impose standards that are unrelated to the actual health hazards posed by the natural chemicals appearing in our drinking water.

There are areas in my district, specifically Fallon, NV, that have relied on local, untreated water for all their water needs for decades; certainly before the EPA offered any standards for contaminants. The water supply in Fallon has a natural chemical in it as do some other Western areas. That chemical is pentavalent arsenic. Among chemicals now monitored by the EPA is arsenic. However, the levels which the EPA currently deems to be a health hazard were derived from a study done in Taiwan on water containing trivalent arsenic, a more toxic form of arsenic.

We know now, through years of experience and health studies, that the water in Fallon is safe. In fact, in 1969 a study was made by the Desert Research Institute at the University of Nevada specifically to determine whether purification was needed to render the drinking water safe. It was concluded that no treatment was necessary.

Therefore, I strongly urge the EPA to first ensure that the levels used are based on the actual chemical appearing in the water in Fallon—pentavalent arsenic; and second, that the actual experience of the community and its existing health records not be discounted.

Mr. McGRATH. Mr. Speaker, today the House of Representatives is considering the conference report on the Safe Drinking Water Amendments of 1986. I would like to include in the RECORD my heartiest congratulations and thanks to the entire conference committee who worked so diligently in forming a very comprehensive reauthorization of the Safe Drinking Water Act.

Especially encouraging was the committee's actions concerning ground water. A great deal of evidence has surfaced in recent years indicating that contamination of our Nation's ground water supplies is increasing at a dangerous pace. When you consider the fact that about one half of all Americans depend on ground water for drinking water, we can begin to realize the potential magnitude of this problem. Citizens of Long Island consider ground water to be one of our Nation's biggest environmental concerns, for we depend solely on underground aquifers for drinking water.

The conference agreement has drawn praise from several environmental groups as well as many water supplier associations. The National Governors' Association and the Washington Post have also come out in support of the bill. Protection of ground water is finally receiving the attention needed to preserve the adequate supply of safe drinking water.

Again, I would like to laud all the conferees on a job well done. Those of us who rely on ground water were not forgotten. This is truly a measure that I, and surely an overwhelming number of my colleagues, can support.

Mr. WAXMAN. Mr. Speaker, I have no other requests for time, and I yield back the balance of my time.

GENERAL LEAVE

Mr. WAXMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report presently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. MADIGAN. Mr. Speaker, I have no further requests for time on this meritorious and excellent conference report, and I yield back the balance of my time.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the conference report.

There was no objection.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. NIELSON of Utah. Mr. Speaker, I object to the vote on the grounds that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 382, nays 21, not voting 30, as follows:

Mr. STALLINGS changed his vote from "yea" to "nay."

Mr. SWINDALL changed his vote from "nay" to "yea."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 4567

Mr. PURSELL. Mr. Speaker, I ask unanimous consent that my name be removed as a cosponsor of H.R. 4567.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

CONFERENCE REPORT ON S. 974, PROTECTION AND ADVOCACY FOR MENTALLY ILL INDIVIDUALS ACT OF 1986

Mr. WAXMAN. Mr. Speaker, I call up the conference report on the Senate bill (S. 974) to provide for protection and advocacy for mentally ill persons.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Pursuant to the rule, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of May 5, 1986.)

The SPEAKER pro tempore. The gentleman from California [Mr. WAXMAN] will be recognized for 30 minutes and the gentleman from New York [Mr. LENT] will be recognized for 30 minutes.

The Chair recognizes the gentleman from California [Mr. WAXMAN].

Mr. WAXMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I call up the conference report to accompany S. 974.

This bill expands the charge of the protection and advocacy agencies that exist in all States to assist the developmentally disabled. Under this bill, these agencies will also protect mentally ill persons in institutions from abuse and neglect.

This bill first arose from a series of hearings held by the Senate Subcommittee on the Handicapped, documenting serious injury and neglect of the mentally ill. The bill passed the Senate unanimously and passed the House earlier this year by a vote of 290 to 84.

In the conference, the House agreed to the Senate's lower funding levels over the 3 years of the bill. Unrelated matters in the Senate bill were removed. And, I am pleased to say, the Senate agreed to the provisions regarding Alzheimer's disease family support groups, authored by my colleague from Florida [Mr. BILIRAKIS].

I should also point out one change in language. The House bill provided for services to mentally ill persons in hospitals, nursing homes, community facilities for the mentally ill, and board and care facilities, as well as for persons recently discharged from all these types of institutions. The Senate bill spoke only of residential facilities, without enumeration. Senate conferees were concerned that an enumeration of the types of facilities might be construed as prejudging the types of facilities in which abuse and neglect actually occur. The conference language, therefore, uses the phrase "facility rendering care or treatment," and the Statement of the Managers makes very clear that the conferees intend for P&A agencies to work in and have access to the full range of such facilities that care for or treat mentally ill persons—including all hospitals (public and private, both general and psychiatric), nursing homes, community facilities, board and care facilities, and other facilities that render care or treatment. It is also clear that the conferees do not intend for questions of standing or jurisdiction to limit the effectiveness, range, or forums in which P&A agencies can work.

The conference agreement also deletes the Senate's provision that restricted the availability of services to only those people whose primary diagnosis is mental illness. Since the purpose of the legislation is to provide advocacy services for those persons who cannot advocate on their own behalf, it did not seem appropriate to provide a mentally ill person admitted with a broken hip with fewer services than a mentally ill person without such other problems. The goal is to prevent abuse and neglect of the mentally ill, whether the mental illness is the first, second, or last reason that a person is receiving care or treatment.

The spending authorized by this bill is included in the 1986 budget resolution. Funding for the program is also included in the appropriations bill already signed into law. We are also told that the administration does not oppose the passage of this bill.

The conference report retains the substance of the House-passed bill at a lower funding level without the unrelated provisions of the Senate bill. It has strong bipartisan support in both Houses.

I urge its passage.

Mr. Speaker, I reserve the balance of my time.

Mr. LENT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I urge my colleagues to join me and Congressman WAXMAN in supporting the conference agreement on S. 974, the Protection and Advocacy for Mentally Ill Individuals Act of 1986. This legislation will assist States in the development of independent advocacy systems for mentally ill individuals, residing in treatment facilities, who may be subject to abuse or neglect.

S. 974 will designate State entities that currently provide protection and advocacy services for the developmentally disabled as eligible for grants under this program. These entities will be given access to facilities that treat mentally ill patients as well as the records of patients in those facilities in order to investigate incidents of neglect and abuse and to pursue administrative, legal and other appropriate remedies to ensure the protection of these individuals.

This legislation also gives the Secretary of Health and Human Services the authority to promote the establishment of family support groups for Alzheimer's disease patients and to promote the development of a national network to coordinate these activities. S. 974 provides no new authorization of appropriations for this program.

The conference agreement on S. 974 authorizes $31.5 million for 3 fiscal years for this program. This represents a reduction of $1.5 million from the House-passed bill. The conference agreement also specifies that protection and advocacy systems exhaust all administrative remedies where appropriate prior to pursuing legal action and not duplicate the actions of an individual's guardian or representative unless such assistance is requested.

As the cost of providing health care for the institutionalized mentally ill continues to rise, it is increasingly important that the care and treatment of these individuals are appropriate. The enactment of this legislation should ensure that health-care facilities provide adequate nutrition, care, and a safe environment for the mentally ill of this country.

Mr. Speaker, I yield 7 minutes to the gentleman from Florida [Mr. BILIRAKIS].

Mr. BILIRAKIS. Mr. Speaker, I want to say just a few words today in support of the conference report on S. 974, the Protection and Advocacy for Mentally Ill Individuals Act of 1986. As one of the two sponsors of this bill in the House, I want to impress upon all my colleagues the importance of passing this legislation—which addresses assistance and protection for people who often cannot help or protect themselves.

The Protection and Advocacy for Mentally Ill Individuals Act of 1986, sponsored by Chairman WAXMAN and myself in the House and Mr. WEICKER in the Senate, is supported by the American Psychiatric Association, the American Psychological Association, the Association for Retarded Citizens, the National Alliance for the Mentally Ill, the National Mental Health Association, the United Cerebal Palsy Association, as well as a number of other professional patient and family organizations. Its primary purposes are twofold. First, to assist States to establish and operate protection and advocacy systems for mentally ill persons and, second, to promote family support groups for Alzheimer's disease patients and their families.

We are all familiar, I am sure, with recent studies which have uncovered alarming statistics of significant abuse and neglect of the mentally ill in residential facilities throughout the Nation. As a member of the Energy and Commerce Committee's Health and Environment Subcommittee, I have personally heard witnesses, some former patients themselves, attest their experience or familiarity with the abuse—physical, emotional, and sexual—and neglect of mentally ill persons in institutions and those recently discharged from institutions.

P&A services already exist for the developmentally disabled. They have been a condition of a State's receipt of funds under the Developmental Disabilities Assistance and Bill of Rights Act since 1975. This program has been widely accepted and used by disabled people, their families, and service providers. It has also been well received by the States, the GAO, as well as by the Reagan administration. The conference report currently before us would provide modest increases in authorizations to expand the mandate of these existing protection and advocacy services for the mentally ill as well.

As a fiscal conservative, no one recognizes the constraints of our deficit situation more than I, nor more strongly feels that every appropriate and conceivable effort be made to reduce it. However, certain problems, especially those in the health area, transgress budgetary concerns and require immediate attention and compassion. This is especially true in the area of protection and advocacy services, for there is no doubt but they are needed in order to investigate and prevent further instances of abuse and neglect.

The Protection and Advocacy for Mentally Ill Individuals Act of 1986 requires States to certify, by the beginning of fiscal year 1987, that an advocacy program has been established in order to continue to receive an allocation from the Alcohol, Drug Abuse and Mental Health Administration (ADAMHA) block grant funds. Funding for this program is already included in the Appropriations Act for this year that was signed by the President on December 12. Furthermore, the funding is within the approved budget ceiling for this function. I urge my colleagues to support the protection and advocacy services of this legislation and thereby speak for those who are unable to speak or defend themselves from the abuse and mistreatment of others.

The second purpose of the Protection and Advocacy for Mentally Ill Individuals Act of 1986 is to promote the establishment of family support groups for victims of Alzheimer's disease and their families. We all know about the horrors of Alzheimer's disease and how it suddenly grips a normal and productive life and ravages it until there is neither personality, mentality, nor humanity left in its victim. Although there is currently little we can do to help victims of this deadly disease as it progresses, we can provide the necessary emotional hand to victims in the early stages and, especially, to the families who are forced to watch a loved one literally deteriorate in mind and spirit, through support groups.

I'm sure everyone will agree that recent Congresses have seen many showpiece initiatives addressing Alzheimer's disease. Today, however, we will finally have the long-awaited opportunity to do something to help the unfortunate victims of this debilitating dementia. Support groups have already proven successful and beneficial on the private level, as demonstrated by the pioneer work of the Alzheimer's Disease and Related Disorders Association [ADRDA], because they offer the victim and his family the opportunity to talk with others who are going through the same unfortunate experiences with Alzheimer's disease.

The conference report currently before us calls upon the Secretary of Health and Human Services [HHS] to promote, subject to available appropriations, the establishment of family support groups to provide, without charge, educational, emotional, and practical support to assist individuals with Alzheimer's disease or a related memory disorder and their family members.

These support groups would primarily be established in university medical centers and community based programs which already receive Federal funds and which conduct research on Alzheimer's disease or provide services for it. The legislation under consider-

ation also calls upon the Secretary to promote the establishment of a national network to coordinate these family support groups and to report to Congress, within 1 year after enactment of this provision, on the establishment of the support groups and their network.

In summation, then, the conference report before us provides mechanisms which will protect a vulnerable population of citizens against mistreatment. No one in our society should have to be subjected to any unethical or inhumane treatment, least of all patients who are in mental health facilities to receive professional care and attention. The expansion of protection and advocacy services to cover the mentally ill, which this bill proposes, will help ensure against instances of abuse and neglect in the future.

Second, this legislation contains provisions which will assist yet another vulnerable population—the 2.5 million victims of Alzheimer's disease and the family members who are often victimized as much as the patient himself. The support groups which this legislation proposes will help this group of unfortunate victims come to grips with the reality of the disease with which they or their loved one has been afflicted. Nothing can compare with the emotional trauma such people go through, and the support group will offer them the opportunity to share with others who have been there and understand while simultaneously offering them practical information and advice on the disease known as Alzheimer's. I hope all my colleagues will support passage of the conference report before us and thereby help both groups of vulnerable victims.

□ 1555

Mr. LENT. Mr. Speaker, I yield 3 minutes to the gentleman from Connecticut [Mr. MCKINNEY].

Mr. MCKINNEY. Mr. Speaker, I rise for the purpose of engaging the distinguished chairman of the subcommittee in a colloquy.

This bill provides for protection and advocacy against abuse and neglect of mentally ill persons. Would the chairman describe the scope of the word "neglect" in the bill as he sees it.

Mr. WAXMAN. Mr. Speaker, if the gentleman will yield, the bill defines neglect as an act or omission which caused injury or put a person at risk of injury.

It is our intent that this term include such neglect as the failure to provide appropriate services—both inpatient and outpatient—as well as the failure to discharge inappropriately placed patients and the failure to inform discharged patients of available resources.

I know that the gentleman from Connecticut has been very concerned about the inappropriate placement and discharge of mentally ill persons, and I believe that this bill will do a great deal to stop the "dumping" of mental patients from hospitals without appropriate community resources.

Mr. MCKINNEY. I thank the distinguished chairman. Since 1981, I have worked with mental health groups in trying to craft language that would prevent States from neglecting patients by discharging them without providing any followup care. This bill will go a long way to provide what I call an "optimum therapeutic setting" for all patients and I commend the chairman on his fine work.

Mr. BIAGGI. Mr. Speaker, I rise in strong support of the pending conference report to accompany S. 974, the Protection and Advocacy for the Mentally Ill Act of 1986. Adoption of this conference report will be a significant step forward by Congress in recognizing the critical need we have to ensure that our mentally ill are provided with basic rights and the ability to advocate for those rights.

This legislation is the product of some excellent work on the part of the House and Senate. It will help States establish protection and advocacy systems for mentally ill persons. It authorizes $10 million in fiscal year 1986 and $10.5 million for fiscal year 1987 and $11 million in fiscal year 1988 for these important programs. It is vital that these programs are established so we are not allowing those mentally ill persons to be left vulnerable victims of abuse and neglect.

I am especially pleased that the final conference agreement retains an amendment I sponsored to the House passed bill dealing with the new language establishing family support groups for those families of victims of Alzheimer's disease. Under my amendment, those programs eligible to participate would be expanded to specifically include "community-based programs which receive funds from the Administration on Aging."

I offered this amendment as a means of both recognizing and assisting the work that is already underway in States and localities with respect to family support groups for Alzheimer's victims. A number of the newest ones are being funded by the Older Americans Act which is run by the Administration on Aging. This is largely due to the provisions of language which I authored, together with my distinguished colleague from Maine, OLYMPIA SNOWE, to the 1984 Older Americans Act.

Under our language, a priority in the use of funds under title III–B supportive services would be provided to those programs providing support services for families of Alzheimer's disease victims. Now, almost 2 years later, these programs have been established by some of the more than 50 State agencies on aging and 660 area agencies on aging that administer the Older Americans Act at the local level. By including them among programs eligible for support under title II of this bill, we complement their efforts.

One such community-based program that I know does exist is in my home city of New York. The New York City Alzheimer's Resource Center was established in March 1984. It is the first municipally sponsored, comprehensive information, referral, and counseling service in the Nation. It is operated and funded with both public and private funds. It is operated under the auspices of the New York City Department for the Aging which is an area agency on aging funded by the Older Americans Act. The resource center has as its main goal to link Alzheimer's patients, their families and the service community at large with appropriate programs and services in New York City that can assist those whose lives are affected by Alzheimer's disease. Among its services are guidance to families and caregivers on entitlement programs, residential and institutional placement, alternate housing arrangements, home care services and conducts seminars, including an annual citywide conference that I have been proud to participate in during the past 3 years.

The fact is—it is imperative that we adopt this legislation to allow for the establishment of these family support groups. Alzheimer's disease today affects more than 2.5 million persons. There are the actual victims of the disease. Yet, there are millions of other Americans who are ravaged by the disease, the families and loved ones of these victims. Both groups are victims and deserve our compassion and our support. We give them both with the adoption of this bill.

Mr. LENT. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. WAXMAN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the conference report.

There was no objection.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken, and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. LENT. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 383, nays 21, not voting 29, as follows:

□ 1615

Mr. ECKERT of New York changed his vote from "yea" to "nay."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GONZALEZ. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the conference report just approved.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF HOUSE CONCURRENT RESOLUTION 337, CONGRESSIONAL BUDGET FOR THE U.S. GOVERNMENT FOR FISCAL YEARS 1987, 1988, AND 1989

Mr. WHEAT, from the Committee on Rules, submitted a privileged report (Rept. No. 99-600) on the resolution (H. Res. 455) providing for consideration of the concurrent resolution (H. Con. Res. 337) setting forth the congressional budget for the U.S. Government for fiscal years 1987, 1988, and 1989, which was referred to the House Calendar and ordered to be printed.

PERMISSION FOR MEMBERS "TO SUBMIT SUBSTITUTES FOR HOUSE CONCURRENT RESOLUTION 337, CONGRESSIONAL BUDGET FOR THE U.S. GOVERNMENT FOR FISCAL YEARS 1987, 1988, and 1989

Mr. WHEAT. Mr. Speaker, I ask unanimous consent that Members have until midnight tonight to submit their substitutes to the budget resolution for printing in the CONGRESSIONAL RECORD. This request has been cleared with the minority.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

PERMISSION FOR COMMITTEE ON RULES TO FILE REPORT ON HOUSE CONCURRENT RESOLUTION 337, CONGRESSIONAL BUDGET FOR THE U.S. GOVERNMENT FOR FISCAL YEARS 1987, 1988, AND 1989

Mr. WHEAT. Mr. Speaker, I ask unanimous consent that the Committee on Rules may have until midnight tonight to file its report to accompany House Concurrent Resolution 337. This request has been cleared with the minority.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

PROVIDING FOR CONSIDERATION OF H.R. 1, HOUSING ACT OF 1985

Mr. WHEAT. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 450 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 450

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 1) to amend and extend certain laws relating to housing, and for other purposes, and the first reading of the bill shall be dispensed with. All points of order against the consideration of the bill for failure to comply with section 402(a) of the Congressional Budget Act of 1974, as amended (Public Law 93-344, as amended by Public Law 99-177) are hereby waived. After general debate, which shall be confined to the bill and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Banking, Finance and Urban Affairs, the bill shall be considered for amendment under the five-minute rule. In lieu of the amendment in the nature of a substitute recommended by the Committee on Banking, Finance and Urban Affairs now printed in the bill, it shall be in order to consider an amendment in the nature of a

substitute consisting of the text of the bill H.R. 4746 as an original bill for the purpose of amendment under the five-minute rule, said substitute shall be considered for amendment by titles instead of by sections, and each title shall be considered as having been read. All points of order against said substitute for failure to comply with the provisions of sections 302(c), 302(f), 311(a), and 402(a) of the Congressional Budget Act of 1974, as amended, and with the provisions of clause 5(a) of rule XXI, are hereby waived. It shall be in order to consider an amendment printed in the Congressional Record of May 7, 1986, by, and if offered by, Representative Burton of California to the amendment in the nature of a substitute made in order as original text for the purpose of amendment by this resolution and all points of order against said amendment for failure to comply with the provisions of clause 7 of rule XVI are hereby waived. It shall be in order to consider an amendment to the amendment in the nature of a substitute made in order as original text for the purpose of amendment by this resolution printed in the Congressional Record of May 7, 1986, by, and if offered by, Representative Kolbe of Arizona, and said amendment shall be considered en bloc despite the fact that it amends a title of the bill not yet considered for amendment, and said amendment shall not be subject to a demand for a division of the question in the House or in the Committee of the Whole. It shall be in order to consider an amendment in the nature of a substitute, if offered by Representative Wylie of Ohio, consisting of the text of the bill H.R. 4757, and said amendment shall be considered as having been read. All points of order against said amendment for failure to comply with the provisions of section 402(a) of the Congressional Budget Act of 1974, as amended, and with the provisions of clause 5(a) of rule XXI, are hereby waived. It shall be in order to consider an amendment printed in the Congressional Record of May 7, 1986, by, and if offered by, Representative Burton of California to the amendment in the nature of a substitute offered by Representative Wylie made in order by this resolution and all points of order against said amendment for failure to comply with the provisions of clause 7 of rule XVI are hereby waived. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the amendment in the nature of a substitute made in order as orginal text by this resolution. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from Missouri [Mr. WHEAT] is recognized for 1 hour.

Mr. WHEAT. Mr. Speaker, for the purposes of debate only, I yield 30 minutes to the gentleman from Missouri [Mr. TAYLOR], pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 450 is an open rule providing for consideration of H.R. 1, the Housing Act of 1985. The resolution provides for 2 hours of general debate to be divided equally between the chairman and ranking minority member of the Committee on Banking, Finance and Urban Affairs. The rule makes in order the text of H.R. 4746 as an original bill for the purpose of amendment and provides that the bill shall be considered for amendment by title instead of by section and that each title shall be considered as having been read.

All points of order against the substitute for failing to comply with sections 302(c), 302(f), 311(a) and 402(a) of the Congressional Budget Act of 1974 as amended, and with the provisions of clause 5(a) of rule XXI, are waived.

Section 302(c) of the Budget Act prohibits consideration of a committee's legislation providing new budget authority, new spending authority or new credit authority until the committee has filed a report which complies with section 302(b) of the act. Since the Banking Committee has not yet filed its section 302(b) report, a waiver of section 302(c) is necessary.

The rule also waives section 302(f) of the Congressional Budget Act. Section 302(f) prohibits consideration of legislation providing discretionary new budget authority, new entitlement authority or new credit authority in excess of the committee's 302(b) allocation of such authority.

The Banking Committee has already exceeded its appropriate allocation for fiscal year 1986. Therefore, the new spending authority provided for in the substitute further breaches the committee's 302(b) allocation and a waiver of section 302(f) is needed.

Section 311(a) of the Budget Act is waived as well. Section 311(a) prohibits consideration of any measure which increases spending in a final year in excess of the ceilings set forth in the budget resolution. This legislation creates new spending in fiscal year 1986 by foregoing receipts from the sale of an urban renewal project and by foregoing the interest on funds advanced to a local housing authority. Therefore, the measure increases outlays for fiscal year 1986 and a waiver of section 311(a) of the Budget Act is needed.

The rule provides for one other Budget Act waiver—a waiver of section 402(a). Section 402(a) prohibits consideration of any legislation providing new credit authority which is not limited to amouts provided for in appropriation acts. The measure extends the Federal Housing Administration Mortgage Insurance Programs and Flood and Crime Insurance Programs through the end of fiscal year 1987. Since the programs are not subject to advance appropriations, the legislation violates section 402(a) of the Budget Act and a waiver is needed.

Points of order against the substitute for failing to comply with clause 5(a) of rule XXI are also waived. Clause 5(a) of rule XXI prohibits appropriations in an authorization bill. Since, the substitute made in order as original text, provides that previously appropriated funds be used for other purposes, a waiver of clause 5(a) rule XXI is needed.

An amendment, by and if offered by Representative BURTON of California, is made in order by the rule. All points of order against the amendment for failing to comply with clause 7, rule XVI, that is the rule which prohibits consideration of nongermane amendments, are waived.

The rule provides that an amendment printed in the CONGRESSIONAL RECORD on May 7, to be offered by Representative KOLBE of Arizona, be considered en bloc notwithstanding the fact that the amendment will amend provisions of the bill not yet read for amendment.

The rule also makes in order an amendment in the nature of a substitute to be offered by Representative WYLIE, which consists of the text of H.R. 4757. All points of order against the substitute for failing to comply with section 402(a) of the Budget Act are waived. Also waived are points of order which may be raised against the bill for failing to comply with clause 5(a), rule XXI.

The amendment offered by Representative BURTON of California to the substitute made in order as original text, is also in order to the Wylie amendment. Again, a waiver of clause 7, rule XVI is granted.

Finally, Mr. Speaker, the rule provides for one motion to recommit, with or without instructions.

Mr. Speaker, the Rules Committee is generally reluctant to grant this number of Budget Act waivers. However, in this instance, the waivers were judged necessary in order that the House may consider legislation which is vital to so many of this country's citizens.

This measure reauthorizes the Federal Housing Administration mortgage insurance program, Farmers Home Administration rural housing programs, flood and crime insurance and lower income housing assistance programs. It also establishes new programs and modifies existing ones.

Mr. Speaker, this rule enjoys the support of Members from both sides of the aisle. I urge that we adopt the rule so that we may proceed to consideration of this measure.

Mr. TAYLOR. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 450 is an open rule under which the House will consider legislation authorizing extension of several housing and community development insurance programs through the end of 1987.

The rule makes H.R. 4746, a bill introduced by the gentleman from

Texas [Mr. GONZALEZ] and the gentleman from Connecticut [Mr. MCKINNEY], in order as an amendment in the nature of a substitute to H.R. 1.

The Gonzalez substitute, H.R. 4746, is to be considered as an original bill, for the purpose of germane amendments under the 5-minute rule.

The rule also makes H.R. 4757, a bill introduced by the gentleman from Ohio [Mr. WYLIE] and the gentleman from Texas [Mr. BARTLETT], as a substitute for the Gonzalez amendment.

Mr. Speaker, the rule contains seven waivers of the Budget Act. Section 402(a) is waived against consideration of the bill, the Gonzalez substitute and the Wylie substitute.

Section 402(a) of the Budget Act prohibits floor consideration of bills providing new credit authority, when the new credit authority is not limited to amounts provided in advance in appropriation acts.

The reported bill, as well as both of the substitutes, extend the Federal Housing Administration mortgage insurance and the flood insurance programs through the end of fiscal year 1987. Since these programs are not subject to advance appropriations, the legislation would be subject to a point of order under section 402(a).

Mr. Speaker, the other provisions of the Budget Act that are waived in this rule are waived against consideration of the Gonzalez substitute, and have been explained in some detail by the gentleman from Missouri [Mr. WHEAT].

As the gentleman from Missouri [Mr. WHEAT] pointed out, the Gonzalez substitute provides additional spending with budget outlays in the current fiscal year. Since the budget ceiling for 1986 outlays has already been breached, any legislation providing additional outlays would be subject to a point of order.

The substitute to be offered by the gentleman from Ohio [Mr. WYLIE] does not provide additional budget authority or outlays for fiscal 1986. As a matter of fact, the Wylie substitute reduces fiscal 1986 outlays by $104 million.

Members who are interested in staying within the current budget for housing programs should know that the Wylie substitute does, and the other one doesn't. In order to consider the Wylie substitute, however, it is necessary to waive the Budget Act against the Gonzalez substitute.

Mr. Speaker, the House bill will be presented with two very clear and distinct choices under this rule.

The substitute to be offered by the gentleman from Texas [Mr. GONZALEZ] does not contain specific authorization limits for fiscal 1987. The substitute authorizes such sums as may be appropriated, and says that spending for all the major housing and community development programs will be held to the 1987 budget limitations.

This is highly unusual, since we have yet to consider the 1987 budget resolution, let alone reach a final agreement on the 1987 budget.

The Congressional Budget Office estimate of the authorization level of H.R. 4746 in 1987 is $15.2 billion, and is based upon the current appropriations level adjusted for inflation, the so-called CBO baseline.

Mr. Speaker, the substitute to be offered by the gentleman from Ohio [Mr. WYLIE] does set specific authorization limits, does reduce the costs of many of these programs and does present the House with a responsible way to legislate.

The Congressional Budget Office estimate of the authorization level of H.R. 4757, the Wylie substitute, is $8.7 billion. This estimate is based upon specific amount contained in the bill.

Mr. Speaker, there are several other important differences between the two substitutes, one of which is a new program of grants to establish fair housing testing. The Gonzalez version is an open-ended authorization for testing of realtors, with no standards as to how these tests are to be conducted.

The Wylie substitute does not contain the testing program, but Members should expect a floor amendment to the Wylie substitute legislating an agreement reached this week between the National Association of Realtors and the Department of Housing and Urban Development.

□ 1630

Mr. Speaker, I have at this point a few requests for time, and I yield 6 minutes to the gentleman from Texas [Mr. BARTLETT], a member of the committee.

Mr. BARTLETT. I thank the gentleman for yielding this time to me.

Mr. Speaker, I will say that I will not actively oppose the rule out of gratitude and appreciation for Chairman GONZALEZ, the chairman of the subcommittee, for including the comprehensive grant major reform that was originally included in H.R. 1 in his substitute.

That comprehensive grant is a major initiative that has been long in coming that would deregulate and provide for reliable funding of the modernization and repair of public housing. However, I would bring to the attention of the House that there is a considerable problem and difficulty with the rule that was granted by the Committee on Rules not necessarily at the request of Chairman GONZALEZ.

The rule has been described as an open rule. I think it would be more accurate to describe this rule as a semi-open rule, and let me bring to the attention of the House this error and this fact.

The rule, as my colleagues have heard, waives clause 5, rule XXI of the Budget Act for both substitutes to the bill, but a key amendment which I had planned to offer and talked with the Committee on Rules about, an amendment that would transfer all of the funding that is provided for new construction of public housing into modernization and repair, was not made in order; that is, the rule was not waived for that amendment.

I think that is a mistake. I would comment that that amendment has considerable bipartisan support, and on the Committee on Rules itself, the vote not to grant that waiver was a 5-to-4 vote, with two Members of the other party voting in favor of that waiver. It is a bipartisan effort.

The good news that I would bring to the attention of the House is that I have redrafted the amendment in a way that is clumsier but in a way that allows the House to vote on the heart of the issue, and the heart of the issue is this in housing: It is time, it is past time, for the U.S. Congress to begin allocating a higher priority for repair and modernization and rehabilitation of existing units of public housing rather than to increase authorizations and appropriations for the construction of new units.

The amendment that I will be offering, entitled "The Repair and Modernization Funding Amendment," will do two things. First, it would restrict the HUD Secretary's authority to obligate new construction funding to only one of three cases: One, for the completion of units obligated in prior years; two, when the public housing authority itself certifies that 90 percent of its units are up to standard or they have been funded to be brought up to standard, a public housing authority under this amendment would not be given more money to build new units until they repair the ones they have; and third, to replace those units lost through demolition and disposition.

Thus, by adopting this amendment, which I believe the Congress will, the Congress is setting as a priority in the appropriations process that appropriations that are not required for new construction would be appropriated for repair and modernization.

Second, this amendment would, for fiscal year 1986, which we are in the middle of, increase the authorization level for repair and modernization by $860 million, and that is the amount that is appropriated but as yet unobligated by HUD. So, in essence, we are setting up a mechanism where the $860 million can be added to modernization and repair, and that doubles the amount this Congress would be spending for modernization and repair and sets, for the first time, the priority of modernization of existing units

of public housing over the priority of new construction.

Data that I have received today from HUD would tell us this, preliminary data from the ABT study: That there are over 459,000 units of public housing in this country that are substandard and need repair in excess of $5,000 per unit. That tells us that 36 percent of all the units of public housing in this country are in substantial need of repair.

The fastest, the least costly, the most efficient and the most compassionate way to increase standard units, decent, safe, and sanitary public housing units in this country is to add money to repair and modernization, and that goes to the heart of the issue.

I will also be offering a second amendment which is fully germane which would be in the form of a new title. Many of the sections of this new title were adopted, interestingly enough, by the Banking Committee and by the Housing Subcommittee, but have been left out of the draft of the substitute by Chairman GONZALEZ and the gentleman from Connecticut [Mr. MCKINNEY].

This new title, entitled "Liveability and Employment Opportunites," would provide some key reforms that are long overdue that would add to the livability, to the living standards, to the quality of life and to the employment opportunities of tenants who are living in public housing.

I am putting both of these amendments on the record today, and I commend them to the attention of the House on a bipartisan basis when the bill is brought up for amendment.

Mr. TAYLOR. Mr. Speaker, I yield 4 minutes to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. I thank the gentleman for yielding this time to me.

Mr. Speaker, I would ask anyone who thinks that Congress is really serious about maintaining a posture under the Budget Act to take a look at this rule.

This rule is an atrocity. This rule waives every major provision of the Budget Act that attempts to get a handle on spending.

For example, this rule waives the part of the Budget Act that stands against new credit authority beyond that provided in appropriations. In other words, what this rule says is go ahead and allow credit authority beyond that which has the money already appropriated.

This rule waives the part of the Budget Act that prohibits consideration of a measure where the committee is supposed to have submitted reports. So, in other words, what this rule says is that despite the fact that the committee did not submit the proper reports, we ought to go ahead and spend the money anyhow.

This rule waives the part of the Budget Act prohibiting consideration of a measure where the budget amounts assigned to a particular subcommittee would be exceeded. In other words, we already know that the subcommittee has already exceeded its limits for fiscal year 1986. This particular rule would say that does not matter; go ahead and consider the measure anyway.

So, in fact, it waives the Budget Act above and beyond that which we have already spent in this fiscal year.

It also waives the Budget Act in that section which prohibits new budget authority or outlays being exceeded or the revenue floor being breached. That is the main protection we have in the entire Budget Act. That is the protection that says that we are not supposed to bring measures to the floor that are over and above the budget, and this particular rule waives that part of the Budget Act.

So, in fact, this is really a major Budget Act violation we have before us.

Then, in addition to that, it waives the House rules as well, and the particular part of the House rules that it waives prohibits appropriations in an authorization bill.

So what we do in this rule is waive the entire Budget Act, and then we go ahead and say spend the money. We do not even have to go to the Committee on Appropriations. Go ahead and spend the money under this authorization bill.

That is the rule that is before us. What kind of money are we talking about? The administration says that the $96 billion represented by this bill is $35 billion over the President's budget over a 5-year period. This is a $35 billion budget buster that is being approved by approving this rule. Anyone who votes for this rule is voting to bust the budget; make no mistake about it. They are not voting for mere technical Budget Act violations; they are voting for the biggest, baddest, budget-busting rule of this legislative year.

□ 1640

Mr. WYLIE. Mr. Speaker, will the gentleman from Pennsylvania [Mr. WALKER] yield?

Mr. WALKER. I yield to the gentleman from Ohio.

Mr. WYLIE. Mr. Speaker, I would suggest that that does not necessarily apply to the substitute which I will offer.

Mr. WALKER. I would say to the gentleman, if he would allow me, his substitute, in fact, gets around many of the problems that are attempted to be alleviated by this rule in the committee-passed bill, but the problem is, in improving the rule that allows the gentleman's substitute, we also have to approve the budget-busting.

Mr. WYLIE. Mr. Speaker, I would point out that in the area of waiving the Budget Act, for instance, there is only one application to my rule and that would be in the area of the FHA credit limit which we just extended up until June 6 a little while ago, and which we have to do, but we would not be in this position if we had a Budget Act.

It was only in that one regard where we waived the Budget Act in ours. We do not waive any germaneness rule in our particular substitute.

I just thought that the record should be cleared up in that regard.

Mr. WALKER. The gentleman is correct. I simply want to point out to the House that the complaints are with the bill as brought to the floor by the committee, and it is that particular bill that is the problem in terms of the Budget Act. I maintain, again, this is the single biggest, baddest budget-busting rule that we have had before us in this legislative year.

Mr. TAYLOR. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. WHEAT. Mr. Speaker, I have no requests for time. While the Rules Committee is generally reluctant to grant this number of waivers, in this instance, the waivers were judged necessary in order that the House might consider legislation which is vital to many of this country's citizens.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 257, nays 149, not voting 27, as follows:

Mr. SAXTON changed his vote from "yea" to "nay."

Mr. HUNTER changed his vote from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair desires to announce that pursuant to clause 4 of rule I, the Speaker signed the following enrolled bill on Monday, May 12, 1986:

S. 2308. An act to authorize the President of the United States to award congressional gold medals to Naton (Anatoly) and Avital Shcharansky in recognition of their dedication to human rights, and to authorize the Secretary of the Treasury to sell bronze duplicates of those medals.

NATIONAL SCIENCE WEEK, 1986

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 251) to designate the week of May 11, 1986, through May 17, 1986, as "National Science Week, 1986," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, but I simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, under my reservation of objection I yield to the gentleman from New York [Mr. GARCIA].

Mr. GARCIA. Mr. Speaker, I thank my colleague from Utah for yielding to me. This resolution was introduced in the House by our colleague from Florida [Mr. FUQUA] who is also chairman of the Committee on Science and Technology. And I would like everybody to know that we believe it is important to build and maintain a highly dedicated, motivated work force with scientific and technological skills. And we believe that as leaders in that area, that this resolution is appropriate, and we congratulate our colleague from Florida [Mr. FUQUA] for the resolution.

Mr. HANSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 251

Whereas science and technology are considered to be critical in the long-term, economic development and international competitiveness of the Nation;

Whereas the rate of scientific discovery and the application of high technologies have an immediate and profound impact on the quality of life;

Whereas the scientific and technological leadership of the Nation continues to be challenged on an increasing basis from members of the international community;

Whereas it is vital to build and maintain a highly dedicated and motivated workforce with scientific and technological skills;

Whereas it is important that scientific research be made more interesting and accessible to youth as a potential career option;

Whereas in order to take advantage of the opportunities and meet the challenges, the Nation must provide all citizens, particularly young people, with a quality educational experience in science and technology;

Whereas it is the national interest to stimulate and encourage the most talented and promising students to pursue careers in science and technology; and

Whereas schools, universities, museums, the media, and professional, educational, and voluntary organizations, together with industry, labor, government, and private citizens, should be encouraged to work cooperatively to develop programs, events, and materials that will contribute to an increased public awareness of the importance of science and technology to the well-being and long-term prosperity of the Nation: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of May 11, 1986, through May 17, 1986, is designated as "National Science Week, 1986" and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe the week, with appropriate conferences, programs, ceremonies, and activities, including

programs designated to further the awareness of all citizens, particularly the youth of the Nation, of the importance of science and technology.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate joint resolution just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

HOUSING ACT OF 1985

The SPEAKER pro tempore. Pursuant to House Resolution 450 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 1.

□ 1705

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 1) to amend and extend certain laws relating to housing, and for other purposes, with Mr. AUCOIN in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rules, the gentleman from Texas [Mr. GONZALEZ] will be recognized for 1 hour, and the gentleman from Ohio [Mr. WYLIE] will be recognized for 1 hour.

The Chair recognizes the gentleman from Texas [Mr. GONZALEZ].

Mr. GONZALEZ. Mr. Chairman, our leadoff speaker will be the very distinguished chairman of the full committee, who is, above being the chairman of the full committee, the ranking member of the Subcommittee on Housing and Community Development of the Committee on Banking, Finance and Urban Affairs, of which subcommittee he has been a member since the beginning.

Mr. Chairman, it is quite a privilege for me at this monent to yield such time as he may consume to our chairman, the gentleman from Rhode Island [Mr. ST GERMAIN].

Mr. ST GERMAIN. Mr. Chairman, I rise in support of H.R. 1, the Housing authorization bill, and strongly endorse the compromise substitute contained in H.R. 4746 and worked out by our distinguished chairman of the Housing Subcommittee, my colleague from Texas [Mr. GONZALEZ], and the distinguished ranking minority member of the Housing Subcommittee, my colleague from Connecticut [Mr. MCKINNEY]. It has been 3 years since we have been able to bring a housing bill to the floor of the House, so I commend the tenacity of the chairman of the Housing Subcommittee and my Democratic and Republican colleagues on the Banking Committee have pressed hard and worked together so that important housing and community development issues may be considered by the House in the authorization process rather than being decided upon in budget resolutions and appropriations acts.

The substitute amendment offered to H.R. 1 reauthorizes our federally assisted housing program through to the end of fiscal year 1987; reauthorizes the community development block grant and the urban development action grant programs through to the end of fiscal year 1987; reauthorizes the Farmers Home Administration's Rural Housing programs through the end of fiscal year 1987; and extend the HUD-FHA Mortgage Insurance Program through to the end of fiscal year 1987. The substitute makes a number of program amendments for FHA mortgage insurance and the secondary mortgage market programs; prohibits the imposition of user fees on the operations of FNMA and FHLMC, which if imposed would authorize a hidden tax on the homebuying public.

Mr. Chairman, the amendment contains an important provision regarding the UDAG Program that would change the selection criteria so that the UDAG Program would be more available in the areas of the country particularly the South and Southwest. This amendment would also extend the Federal Flood Insurance Program and the Federal Crime Insurance Program, both of which programs continue to be greatly needed particularly at a time when our insurance industry is walking away from all areas of insurance coverage.

Our federally assisted housing programs for lower- and middle-income people would be continued and reauthorized by the provisions of the Gonzalez-McKinney amendment despite the fact the administration for the past 2 years has attempted to terminate such programs as the section 202 Elderly Housing Program and the public housing and section 8 programs. The amendment would make a number of important administrative changes in the manner in which public housing operating subsidies are provided and a revision in the comprehensive modernization improvement program sponsored by our colleagues, the gentleman from Texas [Mr. BARTLETT] and the gentleman from Massachusetts [Mr. FRANK]. The amendment also would authorize a program authored by Mr. MCKINNEY of Connecticut to provide that section 202 assistance would be available for a new program of housing for mentally handicapped people.

A new initiative provides an expanded response on the part of the Federal Government to the national dilemma of homelessness in our country. This provision is sponsored by our colleague from Minnesota, Mr. VENTO, and our colleague from Ohio, Ms. OAKAR. The emergency food and shelter assistance would continue with an addition of new programs to provide Federal funding for the renovation of existing structures for housing for homeless people and a second stage housing program for homeless people.

Finally, Mr. Chairman, the amendment would authorize a new homeownership assistance program developed by our colleague from New York, Mr. SCHUMER, an attempt to replicate on a national basis the successful results of the Nehemiah Housing Opportunity Program that has taken place in Brooklyn, NY.

Mr. Chairman, again I congratulate my distinguished colleague from Texas [Mr. GONZALEZ] for his perserverance in seeing a housing authorization bill to the floor afer a long three-year absence and to the gentleman from Connecticut [Mr. MCKINNEY] for working so diligently on this pending bipartisan substitute amendment. I would also like to congratulate all of the members of the Housing and Community Development Subcommittee for their efforts at seeing this compromise through.

Mr. GONZALEZ. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I am pleased to bring to the House H.R. 1, the housing authorization bill, and to provide the Members of the House with an opportunity to debate and vote on major housing and community development related issues. It has been 3 years since the Congress has acted on a major piece of housing legislation; 3 years, in my opinion, of not responding to the housing needs of our Nation. While our consideration of H.R. 1 and the amendment in the nature of a substitute is an important legislative step, it does not by any stretch of the imagination begin to meet the huge housing needs our Nation requires today. I believe that our efforts on this bill represent a change of direction from experience of doing nothing. For the past 3 years we have been acting on temporary extender resolutions, assumptions in budget resolutions, and appropriations bills. This bill responds to the housing and community development policy mandates within the Banking Committee's authorizing jurisdiction.

I am not trying to hide the fact that the administration has proposed in its last two budgets the termination of

our federally assisted housing efforts and major curtailment of our community development programs. But there are indications that the administration might be backing away from their efforts at terminating these programs, and are willing to live with current programs with some refinements, if the Congress shows by positive legislative action that these programs will be continued.

So, Mr. Chairman, our efforts in this legislation are continuing what, in my opinion, is a very low level of activity for the federally assisted housing programs for low- and moderate-income people and the major mortgage insuring authorities of FHA.

Our amendment in the nature of a substitute, H.R. 4746, would extend the basic HUD FHA insuring authorities, the Farmers Home Administration rural housing programs, the Federal flood and crime insurance programs, and the Community Development and Urban Development Action Grant programs for an additional 1½ years through the end of fiscal year 1987. In addition, we would make major changes in the way the Urban Development Action Grants would be available to many communities throughout our country, particularly for the South and Southwest. The amendment in the nature of a substitute would also continue a number of other HUD programs for the same period of time.

While continuing the FHA mortgage insurance programs, this amendment would cap the already high FHA mortgage premium and would prohibit user fees that would be applied to our secondary mortgage market entities, FNMA [Fannie Mae] and FHLMC [Freddie Mac], that the administration is seeking to impose. These so-called user fees being proposed on Fannie Mae and Freddie Mac are viewed by most of the members of the Banking Committee as a tax on the housing industry and have little support in our committee.

The Committee amendment sponsored by myself and the ranking minority member of the subcommittee [Mr. McKINNEY] contains the authorizations for the HUD-assisted programs—public housing, section 8, and section 202 housing for the elderly. The funding levels for these programs are not set in this legislation but would be subject for these subsequent funding levels to be established by appropriations acts. We have made a number of changes in the way the public housing operating subsidy allocation system is administered and made major revisions in the manner in the way the public housing modernization program is operated. This proposed amendment, Mr. Chairman, also contains a very innovative provision to the 202 program to make the 202 assistance available to nonelderly handicapped people, those people who are mentally handicapped but who with assistance and counseling can live in a structured environment financed under the 202 program. I would like to commend our colleague, Mr. McKINNEY, for his efforts to assist the mentally handicapped that are contained in this bill.

Also, Mr. Chairman, we have provided authorizations for rural housing programs of the Farmers Home Administration subject to funding levels to be established in subsequent appropriation acts.

Our legislation contains a very innovative approach to dealing with the terrible dilemma of homelessness in America today that has been developed by our colleague from Minnesota [Mr. VENTO] and our colleague from Ohio [Ms. OAKAR], and supported in bipartisan fashion by both Democrat and Republican Members of the Committee. Let me point out, Mr. Chairman, that our Housing and Community Development Subcommittee was the first committee of the Congress in December of 1982 to raise the issue of homelessness in America to the National attention in a series of hearings that began in December of 1982 and have continued up to the present time. In response to these hearings our colleagues on both sides of the aisle on the committee sought to provide a Federal response to this growing national dilemma. The least that we can do, Mr. Chairman, is endorse this tenuous first step at providing a Federal response to a growing national problem.

And finally, Mr. Chairman, our amendment includes a very innovative homeownership program developed by our colleague from New York, [Mr. SCHUMER], that attempts to replicate the very successful program called the Nehemiah Housing Opportunity Grants Program. The experience of the Nehemiah program of Housing for low- and middle-class homeowners in Brooklyn, NY, combines the energies of nonprofit groups, churches, local, and State governments and in this amendment an up-front grant from the Federal Government. Mr. Chairman, the Subcommittee on Housing and Community Development conducted hearings in Brooklyn, NY, right at the site where the Nehemiah Program is building 1,500 units of single family homes for working class people and just last year in our authorization hearings held a day of hearings on the proposed legislation that is contained in our substitute amendment.

Mr. Chairman, it is safe to say that H.R. 1 has had a checkered history to date since it emerged from the Banking Committee last July. We have attempted to make the provisions of the bill more accepable to the majority of the Members of the House. Mr. Chairman, I am a political realist and while I can strongly support the amendment in the nature of a substitute I do so knowing full well that it hardly begins to address the terrible housing needs that this Nation faces. H.R. 1 even as reported by the Banking Committee last July did not contain the comprehensive approach I believe that is still necessary to address our crying housing needs. We have substantially reduced the scope and number of provisions in H.R. 1 recognizing the political climate that we in the House and in the other body are operating under.

I wish to take this opportunity to commend my distinguished ranking minority member of the subcommittee, Mr. McKINNEY of Connecticut, for the outstanding contribution he made in developing this bipartisan compromise. Mr. McKINNEY has carried on the great Republican tradition of supporting our assisted housing programs begun by the late and distinguished Republican Senator from Ohio, Robert Taft "Mr. Republican." Up until the advent of this administration housing and community development policy generally represented a bipartisan effort and I am pleased, Mr. Chairman, to tell my colleagues today that the contribution of Mr. McKINNEY and his colleagues on our Housing Subcommittee are continuing that tradition.

Mr. Chairman, I have included the attached chart which compares the bipartisan Gonzalez-McKinney amendment to H.R. 1, the Housing Act of 1986, with the fiscal year 1986 funding levels after Gramm-Rudman sequestration, the proposed fiscal year 1987 House Budget Committee concurrent budget resolution, and the fiscal year 1987 Wylie amendment. The chart illustrates the fact that the bipartisan amendment has aggregate budget authority levels below both the fiscal year 1986 baseline and the proposed fiscal year 1987 House Budget Committee's levels. Also, it does show that the Wylie amendment may result to be more costly, mainly $2.3 billion more for subsidized housing, if the administration's proposed deferrals are disapproved by Congress and enacted into public law. Obviously, the BA levels presented in the bipartisan amendment are far below the funding levels needed to meet the great demand in our country for HUD and farmers home housing and community development levels; however, the levels provided in the amendment represent a sincere bipartisan effort to bring about a modicum of support for these programs.

[1] All BA amounts are subject to future Appropriations Acts and must conform to BA levels provided in Concurrent Budget Resolution. Actual cost of the Bipartisan Amendment would depend on actual FY 1987 Appropriations not yet enacted. CBO has assumed the current appropriated level adjusted for inflation in the absence of 1987 appropriations.

[2] House Budget resolution reflects freeze of FY 1986 CBO baseline levels for most non-defense discretionary accounts; subsidized housing, operating subsidies, FEMA homeless, congregate services, and rural housing grant programs are kept at FY 1987 current service levels. Resolution assumes BA amounts subject to FY 1986 freeze may be subject to an additional 2.5 percent reduction in FY 1987 subject to future appropriations aggregate reductions in function totals.

[3] Assumes the availability of the Administration's $2.3 billion FY 1986 deferred BA for use in FY 1987 for a total of $4.951 billion. However, if disapproval of deferral becomes public law, the cost of Wylie amendment is increased by $2.3 billion because new BA would be necessary to cover Wylie program levels.

[4] FEMA Homeless and Housing Counseling funding level subject to Concurrent Budget Reoslution levels and future Appropriations Acts. CBO does not include costs for Emergency Shelter Grants, Second Stage Homeless, Nehemiah Housing Grants, Neighborhood Development Demonstration, Fair Housing Initiatives, and Solar Bank because there is no projected funding level basis.

[5] Includes the CBO assumption of $500 million in FY 1986 deferred BA available for obligation in FY 1987 for a total available of $3.135 billion in FY 1987.

[6] There is minimal direct correlation between the BA level and the program level in a given year. BA amounts primarily constitute the estimated appropriations necessary for prior years obligations, including interest credit subsidies and rental assitance payments.

[7] Savings attributable in both amendments to collection of flood insurance premiums and of FHA insurance premiums. Bipartisan amendment also includes savings for crime insurance.

Note.—Chart prepared by House Subcommittee on Housing and Community Development staff with information provided by the Congressional Budget Office and House Budget Committee staff.

Mr. Chairman, we believe that it is important to pass this housing bill since it reasserts the 50-year Federal housing policy endorsed by both parties, that the Federal Government does have a responsibility to provide housing assistance to low- and moderate-income people, and does have the responsibility to provide mortgage insurance for middle-income Americans.

Mr. Chairman, I urge my colleagues to support our efforts on H.R. 1 and the compromise substitute made in order by the rule. This bill represents our efforts to get back into the con-

gressional responsibility of making housing policy.

Mr. Chairman, I ask unanimous consent that I be permitted to yield half of the time allotted to our side to the gentleman from Connecticut [Mr. MCKINNEY] for his use and his purposes.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

□ 1715

Mr. MCKINNEY. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, last year the Banking Committee reported H.R. 1, the housing authorization bill, to the House. In my views submitted with that report I stated that the committee reported bill was a substantially better bill than that which was brought before the Banking Committee. But even with the many improvements made to H.R. 1 by Members from both sides of the aisle, it was evident that our legislation as then drafted could not be expected to pass without a very lengthy consideration in the House. Chances in the other body were even more questionable.

During last year's conference on the budget reconciliation bill the chairmen of both Banking Committees instructed staff to develop recommendations on as many issues contained in our respective authorization bills as possible. Although most of those recommendations never became part of the reconciliation package, they played an important function in the development of this substitute being offered today.

At this point I would like to give the efforts of Mr. GONZALES, the chairman of the Housing subcommittee, special recognition. As one of the most dedicated housing advocates in this body he realized that some different approach was needed if a housing bill were to pass in this Congress. The chairman took the initiative and suggested that we could develop a bill based on those fundamental elements necessary for a national housing program. In addition, we incorporated provisions from H.R. 1 which had been considered noncontroversial. Finally we included the recommendations from the earlier House-Senate negotiations.

The process we followed in developing the Gonzalez-McKinney substitute to H.R. 1 has not endeared us to our colleagues on the Housing Subcommittee. We have been accused of ignoring some interests or pandering to others; we have put in too much or not enough. But because this substitute does not attempt to be a panacea, because it makes no attempt to be all things to all people, and especially because it does not make promises that we can't keep, I think we have a very realistic housing authorization bill. There will be amendments offered and some things added to our bill. But we have provided the House with the opportunity to vote for or against housing programs for the American people. And for that opportunity to demonstrate our support for housing programs I think we owe Chairman GONZALEZ our congratulations.

Now I would like to comment on some of the specific elements of our substitute. A primary concern I had with H.R. 1 was the aggregate authorization level. I believe that the Gonzalez-McKinney substitute addresses that concern by stating in section 2 that no budget authority, budget outlays or new entitlement authority for fiscal year 1986 or 1987 is provided in excess of the aggregate levels established by the budget resolution. If we don't pass a budget resolution for fiscal year 1987, then the current services level will prevail. The Congressional Budget Office cost estimate for our proposal is $15.2 billion for fiscal year 1987. In comparison, Congress appropriated approximately $18 billion for fiscal year 1986 for all housing progams. When H.R. 1 entered the reconciliation process the price tag was almost $20 billion. Our substitute represents a decrease of $3 billion over last year's level.

The Gonzalez-McKinney substitute contains as its major provisions authorizations for HUD and Farmers Home assisted housing programs for fiscal years 1986 and 1987. It extends the FHA mortgage insurance program as well as the crime and flood insurance programs through fiscal year 1987. As you may remember, we have been required to extend these several times since they expired last September 30. Each time there has been the threat of disruption, and twice actual disruption, of the Government's major home mortgage insurance program at considerable cost to the Government and to the private sector. We need to restore long-term stability to that program.

Other provisions of our substitute include:

Reauthorization of the Community Development Block Grant and Urban Development Action Grant programs,

Changes in UDAG selection criteria to make more parts of the country eligible for grants,

UDAG antipiracy provisions,

The prohibition of user fees on any housing credit program,

An increase in the number of FHA insured adjustable rate mortgages,

A 3-year phaseout of CDBG communities who lose eligibility,

A homeless initiative,

Several items relating to assisted housing projects such as a performance funding system related to operating subsidies, the disposition of multifamily housing owned or held by HUD to protect low-income tenants against displacement and a public housing comprehensive grant program.

One element in the substitute currently that had caused much concern on both sides was the Fair Housing Initiative Program sponsored by HUD Secretary Pierce. I supported the administration on this and succeeded in keeping it in the bill while in committee. I think Members on both sides will be pleased to learn that the controversy surrounding that issue has been resolved.

I received this morning a letter from Secretary Pierce and Mr. Clark Wallace, president of the National Association of Realtors, which I will include in the RECORD. In part the letter reads:

> After open and frank discussions, we are happy to report that HUD and NAR have succeeded in drafting a set of Guidelines, which ensure that only objective, reliable, and controlled testing will be funded by HUD. HUD is satisfied that these guidelines will not infringe on either the proper role of courts in adjudicating fair housing complaints or the rights and remedies provided to individuals and testers under federal law.
>
> The national Association of Realtors now supports the Fair Housing Initiatives Program with provision for testing funded under the guidelines agreed upon.

I think both parties to those negotiations are to be congratulated for their success in resolving this issue. There was never a disagreement in what was our ultimate objective fair and equal access to housing for all Americans. The only disagreement concerned how HUD's program would be implemented. That disagreement was between HUD and the National Association of Realtors and I am glad that they have been able to settle their differences in this timely fashion. The language of the Gonzalez-McKinney substitute will be amended to reflect this compromise when we reach that stage of consideration.

There are many other provisions in our bill that merit our attention but to enumerate them would be to repeat much of what Chairman GONZALEZ has already said. The Nehemiah program, for example, is an excellent approach to moderate income home ownership with minimal Federal involvement. I am certain it will be discussed in length during this debate. I could go on down the list of provisions, but I would like briefly to comment on the other substitute that will be offered to H.R. 1.

In marked contrast to the budget level contained in the Gonzalez-McKinney substitute to H.R. 1 the House will be given an opportunity to consider another substitute offered by my good friend and colleague on the Banking Committee, CHALMERS WYLIE. The recommended authorization level in that proposal is estimated by CBO to be approximately $8.2 billion. The difference between the funding provid-

ed in these substitutes accurately reflects the major philosophical differences between the two approaches towards a national housing policy.

Spending under the Gonzalez-McKinney substitute for HUD housing programs totals $10.4 billion and provides for 116,758 housing units. The Wylie substitute would spend $4.7 billion for 101,287 housing units; 70,000 of those units, however, are accounted for by the use of vouchers. The voucher program has been funded on a modest basis by the Appropriations Committee for several years, but still has been unable to use more than a small fraction of the vouchers that were funded.

Yet in spite of that experience with the voucher program more than two-thirds of the assisted housing units provided by the Wylie substitute are accounted for by vouchers. As an alternative approach to subsidies which provide for construction of housing units, vouchers deserve to be considered, but we are not ready to make that program the foundation of our assisted housing policy.

Most simply put, vouchers do not build housing, especially in parts of this country where available space and available housing are already at a premium.

Frankly the debate here is focused on whether there is a role for the Federal Government in providing housing for all Americans. Housing availability is as important to the people of this country as is housing affordability. I hear from my constituents that they cannot afford to buy a home or in so many instances they cannot even find a place to rent. At the lower end of the economic ladder they are totally shut out.

I believe it is the right of every American to have shelter, to have a roof above one's head at the very least. This can only become reality if we provide some money for construction programs.

The substitute prepared by my colleague, Mr. WYLIE, contains the majority of the provisions that Mr. GONZALEZ and I included in our bill. However, the fundamental thrust of the Wylie substitute is not to provide housing. I think the choice is a simple one: Do we want to make housing available for people who would otherwise be unable to find anything for an affordable price.

The Gonzalez-McKinney substitute gives us the chance to provide housing where needed. At the same time it offers an alternative through a modest voucher program until we have sufficient housing units to implement fully a broader assisted housing program based on vouchers.

I think the choice should be clear and I urge my colleagues to vote for the Gonzalez-McKinney substitute and to reject any weakening amendments. This is your best chance to show your support for a national housing policy.

The letter from Samual R. Pierce, Jr., Secretary, U.S. Department of Housing and Urban Development, and Clark E. Wallace, president, National Association of Realtors, follows:

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT, THE SECRETARY,

Washington, DC

Hon. STEWART B. MCKINNEY,
House of Representatives, Washington, DC

DEAR MR. MCKINNEY: On May 2, 1985, the National Association of Realtors testified before the House Appropriations Subcommittee on HUD-Independent Agencies on the Administration's Fair Housing Initiatives Program (FHIP). At that time, the National Association of Realtors objected to federally funded fair housing testing as pending in H.R. 1.

Last March, we met to address the issues of concern between the Department of Housing and Urban Development (HUD) and the National Association of Realtors (NAR). At that meeting, NAR offered to support HUD if an agreement could be reached on guidelines for the regulations which will govern testing under the FHIP program and which would be approved by NAR's Board of Directors on May 12.

After open and frank discussions, we are happy to report that HUD and NAR have succeeded in drafting a set of Guidelines, which ensure that only objective, reliable, and controlled testing will be funded by HUD. HUD is satisfied that these guidelines will not infringe on either the proper role of courts in adjudicating fair housing complaints or the rights and remedies provided to individuals and testers under federal law.

The National Association of Realtors now supports the Fair Housing Initiatives Program with provision for testing funded under the guidelines agreed upon.

Very sincerely yours,

SAMUEL R. PIERCE, JR.,
Secretary.
CLARK E. WALLACE,
President, National Association of Realtors.

□ 1725

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. MCKINNEY. I yield to the gentleman from Texas.

Mr. BARTLETT. On the gentleman's last comment, I very much appreciate the gentleman's diligence and his comments in summarizing the entirety of the substitute. I have shared with the gentleman a copy of the livability title which I plan to offer, containing a series of reforms and improving livability and employment opportunities. I just wanted to make sure the gentleman did not include that in his description of weakening amendments.

Mr. MCKINNEY. No. Let me just simply suggest, in fact, one of the reasons that an adaptation of your livability amendment is not more prominent is that we had to close off shop somewhere so that we would not end up with another 700-page bill from the House of Representatives, and I will probably stand and speak for a livability amendment.

Mr. BARTLETT. I thank the gentleman.

Mr. MCKINNEY. Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. The gentleman from Ohio [Mr. WYLIE] is recognized for 1 hour.

Mr. WYLIE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, Congress has not passed a free-standing housing authorization bill since 1980. As has been mentioned, we have had no bill on housing since 1983, and then it was tied to the International Monetary Fund replenishment fund increase. I hope this year we will be able to do so. In the past, our efforts to achieve enactment of housing legislation have run afoul of budget considerations. The proposals that have been advanced were not realistic. I fear that we could have the same problem this year if the House approves the Gonzalez-McKinney substitute. For that reason I, along with Mr. BARTLETT and other Members have prepared a substitute of our own. This is a very complicated program. So I will take some time here to explain the Wylie-Bartlett substitute and to make the record as to where we are coming from, since there does seem to be some difference of opinion as to the thrust of our legislation. But in developing this substitute, we have kept in mind the fact that there are serious budget considerations, given our deficit budget problem. We are not going to solve that problem by continuing to do business as usual, nor are we going to solve it by making only minor reductions from last year's $18 billion spending levels. I do not recommend a meat-ax approach to the housing budget, but we are never going to meet our deficit reduction goals by virtually exempting housing from budget cuts.

Our substitute would provide aggregate spending of $8.2 billion for fiscal year 1987, if we can include deferrals. I guess we cannot now include deferrals, since the Budget Committee has indicated that we cannot, so that amount would be approximately $10.2 billion for specific authorization for Federal housing programs. In contrast, the Gonzalez substitute is an open-ended authorization for all programs. Throughout the text of H.R. 4746 you will find the words "There are authorized to be appropriated such sums as may be provided in appropriation acts."

Mr. GONZALEZ. Mr. Chairman, will the distinguished gentleman yield at that point?

Mr. WYLIE. Yes; I yield to the gentleman from Texas.

Mr. GONZALEZ. Mr. Chairman, I hesitated to rise during the colloquy

between the gentleman and the gentleman from Pennsylvania, but I would like to point out that when we went to the Rules Committee, when the waivers were requested, they were requested on the basis that they would be applicable to both the McKinney-Gonzalez substitute, as well as the gentleman's substitute, and they are, the waivers are applicable. If they were not, the gentleman would be confronted with a point of order that might have been raised during the rule's consideration.

Mr. WYLIE. I appreciate what the gentleman is saying, and I will accept that caveat. The point I think the gentleman from Pennsylvania was making is that, where it says "There are authorized to be appropriated such funds as may be provided," that requires a waiver of the rules. There are no such provisions in my bill. I do have aggregate limits of spending.

Now, the rule had to be waived with respect to the spending limits, insofar as FHA authority is concerned, as it applies to credit limits only, and that was the point that I was making. But I have no objection or had no objection to the rule. We went to the Rules Committee, we worked together. The gentleman from Texas and the gentleman from Rhode Island [Mr. GERMAIN] and I and the gentleman from Connecticut [Mr. MCKINNEY] all agreed that we would support the rule waiving these points of order if my substitute was made in order. And I am certainly not backing away from that.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from Texas.

Mr. BARTLETT. The gentleman is correct. We both voted for the rule because of the agreement that it would be an open rule, even though we had reservations.

I would point out, though, that the gentleman's substitute, as I understand it, only deals with fiscal year 1987, with authorization for fiscal year 1987. So the substitute of the gentleman from Ohio [Mr. WYLIE] is not required to have that waiver of the Budget Act, in his substitute.

Mr. WYLIE. In that regard, it did not require a waiver because, in place of agreed upon dollar amounts, which my bill has, there was only the ambiguous aggregate limit and did not make specific requests. I think that is the point I want to make and the point that the chairman, the gentleman from Texas [Mr. GONZALEZ], has helped me to make.

In place of agreed upon dollar limits, there is only an ambiguous aggregate limit. Because of this it is difficult to put a price tag on the Gonzalez substitute.

I would assume this is part of the strategy. So we cannot really get a fix on the amount their bill costs. Their conservative estimate, however, would put it at over $15.4 billion. It could go higher. To me, this is not being fiscally responsible. In addition to the potential high bottom-line figure, there is the procedural question of using "such sums as may be necessary" open-ended authorizations.

Mr. Chairman, I have a high regard for members of both the Appropriations and Budget Committees, but I am not willing to cede to them the authority to determine spending priorities for programs under our jurisdiction. In addition, I maintain that if Members of authorizing committees believe a program has merit, they should be able to quantify that belief.

What this really gets down to is the question of the role of authorizing committees; do they have a role to play in establishing ceiling limits on programs or don't they? The strong implication is that authorizing committees are not necessary. I respectfully disagree.

Mr. Chairman, in addition to our substitute meeting the test of fiscal responsibility it contains a mix of housing programs that gives the American taxpayer and more importantly the beneficiaries of our Housing Assistance programs more "bang for the buck."

The funding levels for assisted housing contained in our substitute should enable Congress to meet the target established in the Balanced Budget and Emergency Deficit Control Act while at the same time aiding those in need of assistance.

□ 1740

To meet this objective, the substitute is premised on the belief that it is necessary to modify priorities in order to provide the greatest amount of assistance for the least amount of money. The primary example of this is the issue of new construction of public housing units versus modernization of existing public housing units.

Mr. Chairman, let us face it—new public housing construction is extremely expensive. The average cost of constructing just one public housing unit is $65,000. It is much more cost effective to repair an existing unit. The average cost of modernizing a public housing unit is $2,400. I wish to point out to my colleagues one other staggering fact. Since the inception of the Public Housing Program in 1937, our Federal Government has financed the development of some 1.3 million units of public housing with a replacement value of over $65 billion. HUD estimates that some 70,000 of these units are vacant and uninhabitable.

I believe these figures are compelling. I think you would agree that there is a large cost disparity between new construction and modernization. I think you would also agree that our public housing inventory is a national resource that should not be allowed to waste away, as it surely will if they are not kept in repair. When one considers the 35,000 public housing units now in the pipeline, or in other words, units allocated to a housing authority but not constructed, it makes little sense to add to our deficit by funding new units when the inventory is in such disrepair. Therefore, our substitute provides a 17-percent increase for public housing modernization and a curtailment of public housing new construction, taking into account the 35,000 units that will be built if we do nothing.

Mr. Chairman, building on our substitute's theme of providing the greatest amount of assistance for the least amount of money, it also reflects a shift in emphasis in the composition of the low-income assistance payment programs. Existing section 8 certificates have an average cost of $5,400 per unit on an annual basis. In contrast, housing vouchers average $4,500. While the difference of $900 per unit appears slight—when you carry this differential over the full run out cost of a 15-year contract you end up with a $13,500 savings for only one unit. Multiply this by the thousands of units we authorize on a yearly basis and you can see where major savings occur.

Vouchers can be the key to alleviating some of the problems associated with low-income housing assistance at a much less expensive and faster rate than costly production programs. On April 23, 1985, GAO issued a report which indicated that among lower income households the number paying rents in excess of 30 percent of their incomes increased by 4.1 million in 1975 to 11.9 million in 1983. The number paying in excess of 50 percent of their incomes increased by about 2.6 million—from 3.7 million in 1975 to 6.3 million in 1983.

These figures emphasize that affordability is a major problem facing low-income renters and vouchers have been proven to help the affordability problem. Our substitute contains sufficient funding authority for 70,000 vouchers. This is 20,000 more than proposed in the President's budget.

The substitute would also prohibit the imposition of new so-called user fees. Some view this concept as a way of raising revenues and thus helping with the deficit. We believe this to be very short sighted. The revenues are really quite small in the context of the total budget. In fiscal year 1987, they would amount to only $90 million. On the other hand, fees of anything like the magnitude proposed could seriously jeopardize the needed support given to the mortgage finance system by Ginnie Mae, Fannie Mae, and Freddie Mac. Similiarly imposing a higher fee

on FHA home buyers and requiring them to pay the fee up front without allowing amortization over the life of the loan would place too heavy a burden on first-time home buyers. In our view, the user fee concept would hurt the housing industry. The falloff in housing activity could actually contribute to the overall deficit.

Mr. Chairman, our substitute provides long-overdue public housing reforms. The two primary areas of focus are public housing operating subsidies and comprehensive modernization. Concern about the funding system for operating subsidies has focused on the manner in which funding levels are established and on the incentives it provides for efficient management. Questions about the comprehensive modernization program have centered on a program structure which would facilitate modernization and deregulate the process so that excessive regulation and oversight would be replaced with greater Public Housing Authority planning and responsibility for decisionmaking. First, our substitute includes the Bartlett-Frank Public Housing Comprehensive Grant Program. This reform to the existing Comprehensive Modernization Program had broad bipartisan support in subcommittee and passed by a vote of 26 to 13. It deregulates the existing Comprehensive Improvements Assistance Program called CIAP—and provides for greater reliability of funding for capital improvements through use of a formula allocation method. Second, our substitute includes modest reforms to the performance funding system which is the formula used to allocate public housing operating subsidies.

With regard to the public housing operating subsidy funding level, I wish to point out that our funding level for fiscal year 1987 should allow for sufficient budget authority to provide housing authorities sufficient funds to meet the critical issue of property and casualty insurance premium increases. Within the last 18 months, property and casualty insurance has increased over 400 percent.

Mr. Chairman, too often the Congress and the executive branch lose sight of the fact that Federal programs are not created for the bureaucrats who administer the programs, but for the beneficiaries of the programs. In the area of public housing, the beneficiaries are the public housing tenants, specifically some 3.4 million tenants. In this regard, I am happy to say our substitute does something for the tenants for a change. It contains a provision to provide certain incentives to encourage increased resident management in the public housing setting. This provision, which is based on our colleague Mr. FAUNTROY's H.R. 4026, which in turn was based upon an amendment I successfully offered to H.R. 1 in committee; will encourage public housing residents to organize and have more control on life in their public housing communities.

Building on the concept of protenant reforms our substitute contains a rent phasein policy which would reward tenants who obtain employment with a consequent increase in income. The provision would permit PHA's to establish a method to phase-in rent increases over a 6-month period for section 8 and public housing tenants who obtain a change in employment status and so they would not be evicted if they go over the incoming ceiling by a few dollars. Additionally, our substitute contains a provision which would permit beneficiaries of section 8 certificates and vouchers greater flexibility to make choices about the dwelling and location in which they will live. Based on the extensive hearings conducted by the Housing Subcommittee on desegregation in federally assisted housing programs we are hopeful that this flexibility will aid in the attempts to achieve greater desegregation.

□ 1750

The substitute also includes a provision authored by Mr. MOLINARI concerning public housing economic rent. This provision would allow PHA's to establish rents in public housing at the fair market rent in order to retain tenants who are at the upper end of the low-income range. This provision would enhance the quality of life in public housing by allowing PHA's to have an economic mix of residents, particularly among what has become to be referred to as the working poor. This concept could improve the overall livability standard of public housing residents.

Another reform initiative would provide explicit authority to HUD to prevent fraud and abuse by participants in HUD programs by, first, asking applicants to give their Social Security numbers to be used in verifying eligibility and proper level of benefits, and, second, by requiring applicants and participants to sign a consent form to permit verification of information furnished by families.

This provision was first introduced by our colleague, Mr. CHAPPELL, back in 1982. Needless to say, something like this is long overdue. The HUD Office of Inspector General estimates that at least $200 million is spent annually in section 8 assistance for tenants who are ineligible or are receiving more than is allowable. Benefits now going to ineligible families would become available for legitimately eligible program participants. Replacing ineligible households with eligible households will not necessarily save money but it will ensure that limited Federal funds are going to the right people and are being spent for the purpose we, the Congress, intended.

Mr. Chairman, our substitute emphasizes the special housing needs of the elderly, handicapped, and the homeless.

We provide fiscal year 1986 level funding for the section 202 program for housing the elderly and handicapped to support some 11,500 new housing units. Fiscal year 1986 level funding is also provided for the Congregate Housing Services Program to prevent premature institutionalization of elderly persons who need supportive services.

I am particularly pleased about inclusion of a provision which was authored by the ranking minority member of our subcommittee, Mr. MCKINNEY, which revises the existing section 202 program to assure that the section 202 program will better meet the special needs of the handicapped. In view of the 8 million U.S. citizens with severe handicaps, we believe this change is needed.

Finally, we have included a restructured Shelter Assistance for the Homeless Program. Since the early 1980's, Congress has been providing financial assistance through the Federal Emergency Management Agency to provide emergency food and shelter assistance for the homeless. Although this financial aid has been beneficial, it was stopgap at best. Based on the subcommittee's extensive hearings on homelessness, our substitute contains what we think is a balanced approach for meeting State and local governments' needs in providing assistance to the homeless through a network of nonprofit sponsors. My colleagues on the housing subcommittee, Mr. VENTO and Ms. OAKAR, deserve much of the credit for their fine work in this area along with our chairman, Mr. GONZALEZ.

Mr. Chairman, there is one element our substitute does not contain. It doesn't have any pork. There are no raids on the Federal Treasury authorized for projects in individual Members' districts. That cannot be said of the Gonzalez-McKinney proposal. In one instance, they allow the city of Boston to keep the proceeds from the sale of land which was originally purchased with urban renewal funds. I submit this money belongs to the Federal Government and represents a $3.3 million windfall to the city of Boston. In another case, they authorize a set-aside of section 8 funds and CDBG funds for one small new community in Texas. This particular new community has already received more than its fair share of Federal funds and it would receive $45 million more under this provision. In a third instance, Gonzalez-McKinney would forgive the interest on a debt owed to HUD by the Pittsburgh Housing Authority. This is a contractual obligation and if the provi-

sion is enacted, it would amount to a gift of $375,000 to Pittsburgh.

Our substitute also modifies the UDAG Program. I must admit, Mr. Chairman, I have had reservations about the public need for this program. However, our bill would reauthorize UDAG but with a 10-percent reduction in funding if the program is amended to provide a more equitable and fair distribution of program funds. Our substitute would do this by providing a 50–50 split of program funds between projects selected under what has become to be known as project merit criteria.

At the present time, there is no separation of UDAG funds into two separate pots. As a result, 40 percent of all UDAG dollars have gone to only 20 large cities, most of them in the North and Midwest. If we include a quality of project test as one of the determining factors, localities from other sections of the country will have an opportunity to compete. As I said, our substitute provides this opportunity for at least 50 percent of the funds. The Gonzalez substitute would limit the quality of the project test to 35 percent.

Mr. Chairman, as members of the authorizing committee, we believe we have met our obligation of recommending to the House an authorization bill containing specific program authorizations. We have tried to develop a balanced, well-rounded substitute while staying within the bounds of reality dictated to us by our still substantial budget deficit. I believe we have succeeded.

Mr. GONZALEZ. Mr. Chairman, I yield 3 minutes to the gentleman from New York [Mr. LUNDINE].

Mr. LUNDINE. Mr. Chairman, I rise today in support of H.R. 4746, legislation which reauthorizes a number of vitally important housing programs and authorizes a small number of new programs and which is a substitute to H.R. 1.

This legislation is the result of literally months of negotiations by Republican and Democratic members and staff on the Housing Subcommittee and the Budget and Appropriations Committees. I believe that this legislation, sponsored by the chairman of the Housing Subcommittee, Mr. GONZALEZ, is a well-thought-out bill that has support from both sides of the aisle here in the House and will ultimately have the support of crucial members of the Senate.

Our legislation reauthorizes and in some instances modifies existing programs. Community Development Block Grants are reauthorized for example. This program has been essential to the redevelopment of many urban neighborhoods. The UDAG program is reauthorized and modified to improve the grant distribution formula.

This legislation prohibits the imposition of user fees on Freddie Mac and Fannie Mae mortgages, ensuring that mortgage funding will continue to be available to the greatest possible number of families seeking to purchase homes. In addition to the prohibition of user fees for these two programs, H.R. 4746 places caps on fees for FHA mortgages and GNMA securities.

Because my district is primarily a rural one, Mr. Chairman, I would like to speak briefly about the rural housing provisions contained in this measure. Again, the legislation we are debating today accepts the funding levels for these programs which are outlined by the Budget Committee.

Mr. Chairman, I cannot emphasize enough to you and the other members of this body how essential the continuation of Federal Housing Assistance is to people of low and moderate incomes who live in rural areas. Without these programs, there will be no way to finance the purchase of homes by moderate income rural people and no way to build new rental housing for low-income people. This legislation reauthorizes a number of rural housing programs, including contract authority for rental assistance payments, low-income home repair loans, and rural preservation grants. The last two programs, emphasizing as they do rehabilitation and repair, certainly make the best use of limited funding resources by providing the means for improving existing housing stock. Without exception, these rural housing programs represent a very small proportion of our Federal spending and serve a great number of needy people. Mr. Chairman, these and many other programs contained in this legislation are truly "poor people" programs, serving the poorest of the poor in our country.

Mr. Chairman, as I stated earlier, the bill before us today is the result of months of negotiation and compromise. This bill, more than the Republican alternative sponsored by Mr. WYLIE which will be debated later today, represents a viable and workable vehicle for the reauthorization of these programs. I hope my colleagues will join me in supporting this bill.

Mr. McKINNEY. Mr. Chairman, I yield 7 minutes to the gentleman from New York [Mr. MOLINARI].

Mr. MOLINARI. Mr. Chairman, I am going to address one issue, and that is the serious issue involving a rent cap, but before I do so, I think the gentleman from New York [Mr. GILMAN] has a time problem.

Mr. GILMAN. Mr. Chairman, will the gentleman yield?

Mr. MOLINARI. I am happy to yield to the gentleman from New York.

Mr. GILMAN. I thank the gentleman for yielding.

Mr. Chairman, I am pleased to rise in strong support of the Housing Act of 1986, and I thank our colleagues for yielding time to all of us today, the gentleman from Connecticut [Mr. McKINNEY] for his leadership as the ranking minority member of the Subcommittee on Housing and Community Development in developing and improving our major housing and community development programs, along with the subcommittee's distinguished chairman, the gentleman from Texas [Mr. GONZALEZ].

The substitute that is being offered today, H.R. 4746, the Gonzalez-McKinney substitute, is the product of countless hours of consultation and negotiation between the minority and majority members of the House Committee on Banking and Urban Affairs. This measure is a fair and reasoned response to the urgent need to reauthorize these programs, many of which have been functioning under short-term extensions since the end of fiscal year 1985, last September.

In rising in strong support of the Gonzalez-McKinney substitute in its entirety, I would like to take this opportunity to commend the committee particularly for including a provision in this legislation which will allow 19 U.S. cities to continue to compete for CDBG funding for 3 more years.

Since 1983 cities classified as central cities for the purposes of being eligible for CDBG moneys have faced the threat of losing their entitlement status due to arbitrary criteria promulgated by the Office of Management and Budget. These regulations changed the method of defining central cities and/or the fluctuations in populations in our cities in the years between the decennial censuses. The 19 cities affected by these regulations have been caught up in a virtual catch-22—because their population has decreased, they are being deprived of the very funds they need to retain and attract businesses. Among the 19 cities affected by the OMB regulations are the cities of Middletown and Newburgh in Orange County, New York. As the Representative of the city of Middletown and the former Representative of the city of Newburgh, I know that I speak for all the constituents in our Mid-Hudson Valley region when I thank the Banking, Finance and Urban Affairs Committee for recognizing the significant work that has been accomplished and can continue to be executed with vital CDBG funding. These two cities have worked extremely hard to overcome both regional and national problems. In Middletown alone CDBG moneys have contributed to changing the face of our town. The repaving of streets, the installation of street lamps, the revitalization of the old railroad station, rehabilitation of old housing to make it habitable—all of these projects paid for in part with CDBG moneys have

helped Middletown enter into a new era, an era of growth and prosperity which will ultimately benefit the entire region. I am hopeful that the 3-year extension of the central cities status included H.R. 4746, will allow these 19 cities sufficent time to explore alternate funding options and for Congress to examine the possibility of a more permanent solution.

Accordingly, I urge my colleagues to support the McKinney-Gonzalez substitute to H.R. 1 and to vote in favor of final passage.

□ 1800

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. MOLINARI. Yes; I am happy to yield.

Mr. BARTLETT. Mr. Chairman, I thank the gentleman for yielding.

I understand the two gentlemen from New York and what they have said. I know they are going to support the bill. I have shared with these two gentlemen two amendments which would improve the legislation substantially, both in terms of liability and in providing increased funding for modernization by setting that as a priority.

I do hope and I know they will consider and, I hope, favorably consider those amendments, regardless of the vote on the final passage of the legislation.

Mr. MOLINARI. Mr. Chairman, I rise to address an issue relating to public housing which is essential to the future of our program, that is the need to restore maximum rents for public housing. Last year I introduced legislation which would allow housing authorities, at their discretion and with the approval of the Secretary of HUD, to establish maximum rents for units they operate. I would urge that we give our approval to those provisions when we consider this bill.

In the past, our Government has seen the benefit of an economic mix of tenants in public housing. Unfortunately, however, we have not always paid due attention to this consideration. Prior to 1981, public housing authorities had the flexibility to establish rent schedules which could include maximum rents. The Omnibus Budget Reconciliation Act of 1981, however, established a rent of 30 percent of gross income for new tenants, with rents for current tenants increasing 1 percent until that figure was reached, and eliminated a public housing rent cap. There are many well-intentioned Members of both Houses of Congress that removed the prior rent cap on the theory that, due to the lack of Federal financing and new housing developments, existing units should be set aside for those on the lowest income rung of the ladder.

It sounds, at first consideration, that this is the logical and compassionate course to take. However, the reality of the consequences will prove to be disastrous to our public housing program.

Because of the lack of maximum rents, working low-income families are moving out of public housing. Yet, these tenants are vitally important to the overall social and financial viability of our public housing. In order to provide and maintain stable housing facilities, it is necessary to have a mix of income levels. In fact, the Housing and Community Development Act of 1974 adopted a cross-section of income as an objective in federally assisted housing. Lower inciome and working families provide stability and serve as role models for the community. If we continue to force these families to leave public housing because of the heavy rent burden we have placed on them, we will be left with concentrations of the very poor. Studies have shown that maintenance costs will increase and, more importantly, the social fabric and balance of public housing and the surrounding neighborhoods will be undermined. Unfortunately, I have seen this occur in my own congressional district.

Ironically, although the 30-percent ratio was instituted as a means to increase rent revenues and lower Federal operating subsidies, just the opposite will occur. Lower income families contribute a disproportionately high amount of rental income. Should these families be replaced with tenants in the lowest income level, rent revenues will decrease and force higher Federal subsidies. For example, the New York City Housing Authority estimates that it may lose up to $47 million in rental income, an amount which must be made up in Federal subsidies. Various other housing authorities also project a loss of rent revenues. The loss of a rent cap does not affect rental income for larger authorities only. Small, rural authorities report that they are being affected by increasingly higher vacancy rates, and therefore rent revenues are decreasing.

It is important to note that these working families are still in need of assistance and, in fact, housing studies have shown that there is a critical shortage of available housing for lower income families. Many of these tenants are facing a severe economic burden in paying their mandated rents. For example, a New York City single working mother with three children who earns $21,400 a year must pay $500 per month rent. After deducting social security, Federal, State, and city income taxes, transportation costs, and rent, this family is forced to live on only $9,500—which falls below the poverty level for a family of four and may even be lower than the cash value of assistance provided welfare families.

The need for a maximum rent for public housing has been recognized by those who have day-to-day experience with public housing. Housing authorities across the country—including Atlanta, Denver, Baltimore, Hartford, Louisville, Portland, and many smaller authorities—favor restoring maximum rents. Legislation I introduced last year related to the issue has been cosponsored by members of both parties hailing from diverse areas of the country.

Let me conclude by saying that, should the public housing rent cap not be approved by Congress, there will be no winners—only losers. If working tenants leave public housing, they will be replaced by tenants who, in many cases, have no earned income whatsoever and pay very little rent; housing decay and abandonment follow; Federal subsidies increase substantially; and instead of providing available housing for the most needy, we are contributing to the demise and rapid disappearance of decent housing units for everyone.

While the theory of providing housing only for those in the lowest income brackets sounds appealing, the reality is that it just does not work. If you care about the long-term future of our public housing and want to provide a stable environment for our public housing tenants, support the provisions which will once again give public housing authorities the discretion to establish maximum rents.

I want to report that I am very grateful to the chairman, the gentleman from Texas [Mr. GONZALEZ], to the ranking member of the full committee, the gentleman from Connecticut [Mr. MCKINNEY], and also to the gentleman from Ohio [Mr. WYLIE], and the gentleman from Texas [Mr. BARTLETT], who have advised me just before I took to the well that they are going to change their provision to conform so that there will not be a 5-year limitation.

Did I understand that correctly? I thought that is what the gentleman from Texas told me.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. MOLINARI. Yes; I am happy to yield to my colleague. I may have misunderstood.

Mr. BARTLETT. Mr. Chairman, if the gentleman will yield, I will be offering an amendment which is a livability title with a series of reforms. The ceiling reform was one that the gentleman has worked on for several years and it is a good reform and I had included that in my original title. I do plan to offer it as a part of that livability title without the 5-year limitation.

Mr. MOLINARI. All right. I have not seen that provision, so I will withdraw that portion and not put anybody on the spot.

The fact is I am grateful, I am grateful to those who recognize this as a serious problem. I ask the body and particularly those who will be conferees to carry this very important message when we go to conference.

Mr. Chairman, I thank the gentleman for yielding. I appreciate the cooperation that I have received from colleagues on both sides of the aisle. It is the right thing to do.

Mr. WYLIE. Mr. Chairman, I yield 5 minutes to the gentleman from Indiana [Mr. HILER].

Mr. DREIER of California. Mr. Chairman, will the gentleman yield?

Mr. HILER. I yield to the gentleman from California.

Mr. DREIER of California. Mr. Chairman, I rise in strong opposition to H.R. 1, as amended by the substitute package contained in H.R. 4746. While this substitute package is far better than the old, seriously flawed H.R. 1, it still makes a mockery out of our efforts to make substantive budgetary reforms to bring the federal deficit under control.

This bill, which I kindly refer to as the Subsidized Housing Glut and Budget Busting Act of 1986, authorizes five new programs and is three-quarters of a billion dollars over 1985 levels. It does this in spite of the fact that the committee overwhelmingly passed an amendment establishing the proposition that aggregate funding for housing programs authorized in the bill should not exceed 1985 levels.

There is no doubt in my mind that we can greatly improve the availability and affordability of low and moderate income housing in this country without the levels proposed in this bill. Many of the programs are without merit, and should either be eliminated or reduced.

For instance, there is not, in my mind, a shortage of low-income subsidized housing—there's only a shortage of affordable housing and H.R. 1, in its current form, does nothing to correct this problem. Near the end of 1985, the national vacancy rate for low-income housing stood at 6.8 percent, the highest in 18 years. Yet H.R. 1 would continue rental housing starts which are already at their highest levels since the early 1970's.

We could make available a greater number of low-income units by shifting from housing development action grants to the Rental Rehabilitation Program. My colleague from Florida, Mr. MCCOLLUM, will be offering an amendment to redirect our limited Federal resources to those housing programs which are more cost effective. His amendment will provide more housing for less cost—something I'm sure we all agree is prudent and necessary.

The administration voucher proposal would also make Federal housing programs more cost-effective. Vouchers are cheaper than new construction—$19,000 for 30 years of housing compared with $55,000 for FmHA section 515 or HUD section 202—and they are better for recipients because of their flexibility. Yet without justification, H.R. 1 merely continues the voucher program as a demonstration program, and does not authorize any vouchers.

Even more disturbing is the fact that H.R. 1 continues the controversial UDAG Program in spite of evidence that the program is targeted to politically affluent commercial developers rather than the needy. Program funds are distributed without equity, and the program has resulted merely in the redistribution of economic investment from one community to another. The committee made no attempt to even reform this wasteful program.

Last, the committee is well aware that the CDBG Program could be reduced substantially while still meeting the program's objective of expanding economic opportunities for low-income Americans. By cutting excessive administrative costs and encouraging greater private sector involvement, the CDBG Program could increase its effectiveness at lower costs to the taxpayers. Yet H.R. 1 fails to make any necessary reforms in the program.

Mr. Chairman, H.R. 1 does not increase our commitment to adequate and affordable housing for the needy. It merely exhibits our disregard for fiscal responsibility. In the long run, H.R. 1 only serves to undermine Federal housing programs, and I urge my colleagues to reject the measure in its present form.

Mr. HILER. Mr. Chairman, I rise in support today of the Wylie substitute to the Housing Act of 1985. It seems that a day doesn't pass when someone—Republican or Democrat—comes to the well and exclaims the awesome evils of deficit spending and decries our failed attempts to come to grips with it.

And, of course, they are right. Our current deficit is over $200 billion and our total debt as a Nation is $1.9 trillion. While economic growth will put our deficit on a downward trend, restraint in spending is a necessity.

But too often, it is like what Mark Twain said: Everybody talks about the weather, but nobody does anything about it.

We have an opportunity here to do something about the deficit, however, and to reduce it without abandoning our Nation's commitment to helping those who need our help—the poor, the elderly, and the disadvantaged, whether they live in our cities or in rural America.

And we need not abandon our willingness to help small communities and large cities maintain a pace of development that keeps them alive and growing so that people can find jobs, small businesses can thrive, and citizens can take pride in their neighborhoods, towns, and cities.

We can accomplish all this and still save about $6 billion by rejecting the idea that this is the time to fund and embark on new programs, for clearly it is not. We can do this by recognizing that there are less expensive—but better—ways of providing these services. And we can do this with the healthy precision of the scapel, not the carnage of the ax.

The Wylie substitute offers funding for 101,500 new housing units—help above and beyond the 97,000 units now in the pipeline for urban areas alone, and the 5.7 million units currently in operation throughout America.

It provides well over $2 billion in development funds, keeps our public housing authorities operating, offers special assistance to the elderly, continues the rural housing programs, helps neighborhoods work to help themselves, offers assistance to the homeless, and authorizes funds for rehabilitating units in need of repair. In short, the substitute does the job and does it well, but recognizes that the future and current citizens of this Nation can no longer afford the frills of past years.

One way the substitute meets the need while saving money is through the use of housing vouchers. Vouchers are a more efficient, less bureaucratic way of providing housing assistance. Vouchers rely on the true market price of housing in a given area, so that participants have an incentive to shop and to save, and landlords have an incentive to keep the prices down. With vouchers, we can continue to provide housing, but at less cost to the taxpayer, and that is the kind of innovative idea our Government needs.

We also need to take a hard and sometimes painful look at what works and what does not. The time to retire the Urban Development Action Grant Program is upon us. With this in mind, when we begin the amending process, perhaps next week, I intend to offer an amendment to eliminate the UDAG program.

There will be efforts to resuscitate the program by revising the formula for distributing funds among the thousands of communities vying for money, but the fact remains that the approximately $300 million we expect the taxpayers to spend on UDAG's cannot be fairly distributed or well spent.

First, we cannot call this a national program. Since the program first distributed funds in 1978, four States—Alaska, Hawaii, Nevada, and Wyoming—have not received any UDAG funds. Twenty-five States have received less than $40 million during the 7-year history of UDAG's, and New York State alone has received more

UDAG money than the combined awards made to those same 25 States.

The top six UDAG recipients—New York, Massachusetts, Pennsylvania, Ohio, New Jersey, and Michigan—have been awarded a total of about $1.8 billion. Yet, if you added up the UDAG's awarded to all of the rest of the States, the total would be just over $1.9 billion. In short, six States have received about the same amount as the rest of the Nation combined.

Second, it is not at all clear that UDAG's have worked to draw private funds to projects that otherwise would not be built. The history of UDAG's is filled with examples of grants for shopping centers, hotels, corporate headquarters, condominiums, and, yes, even some "dockominiums" and a sightseeing boat. These are projects that should, and probably would, be built based on good development and marketing plans drawn from sound business principles—not because of UDAG dollars from taxpayers hundreds of miles away.

Third, one of the selection criterium—and purposes)—of UDAG's is to create jobs. Yet, a 1985 HUD study indicates that ony 35 percent of the permanent jobs UDAG applicants said would be created have actually been created thus far.

I don't argue that some good has been done for a few communities, mine included, but too often UDAG's fund developments that would have taken place without a subsidy, create bogus jobs, or revisit the same communities time and time again while other cities and towns receive little or no benefit from the investment.

We are long past reaching the bottom of our pockets. Certainly, we can still say "yes" to those who truly need our help in meeting their basic shelter needs, and the Wylie substitute does. But we must now say "no" to hotels, motels, "Dockominiums" and Marina's, to UDAG's that construct corporate headquarters.

I urge this body to support the Wylie substitute, but I also ask that you join with me in ending a program that helps the few at the expense of the many; that ceased serving any useful purpose it once may have had some time ago. Thank you.

Mr. WYLIE. Mr. Chairman, I yield 3½ minutes to the gentleman from Wisconsin [Mr. ROTH.]

Mr. ROTH. Mr. Chairman, I thank the gentleman for yielding.

First of all, I would like to say to the chairman of our subcommittee, the gentleman from Texas [Mr. GONZALEZ], that I of course respect him very much, because he is one of the most dedicated, hard working and determined Members of our body. Without his work, this bill would not be here on the floor.

I also want to recognize our ranking member, the gentleman from Connecticut [Mr. MCKINNEY], who probably knows more about housing issues than anyone else in the country.

I want to recognize the gentleman from Ohio [Mr. WYLIE], my good friend, who introduced the substitute that I think this entire body is going to work for and vote for. It is a real blessing I think to the Nation, to the media and to the taxpayers of this country; so I congratulate all three gentlemen.

I think the bill that we have before us is well crafted legislation. It is scaled back from the version of the housing authorization that we originally had. While it is an improvement, when you analyze the legislation you find that the Wylie substitute will deliver more quality housing to more low income people in a more cost-effective manner. That is why I endorse the Wylie substitute, because I think it is the right approach.

The Wylie substitute provides clear priorities, in contrast to the committee bill which merely sets aggregate spending limits and allows actual decisionmaking to other committees of the Congress.

So I think we in the Banking Committee if we go the route of the bill that we have before us, we are really abdicating our responsibility. I do not think we should do that, I do not think we can do that.

The committee bill reauthorizes the HODAG program, a costly subsidized new construction program which costs $76,000 a unit. HODAG originally aimed at rental markets that had low vacancies rates. In the first year of the program, only 7 out of 141 projects went to cities with a vacancy rate of under 3 percent.

What I particularly like and wish to recommend to this body, which is in the substitute of the gentleman from Ohio, is a provision which unties housing vouchers from the rental rehabilitation program. This was an amendment that I offered in the full committee, in the Banking Committee, during markup on H.R. 1. Unfortunately it was dropped in the substitute version which we have here on the floor today.

I will again at the request of numerous Members of this body offer a voucher amendment to the Gonzalez substitute at the appropriate time.

We want to encourge vouchers. This is a concept that has worked well. We have had pilot projects in Green Bay, WI, and South Bend, IN. They do work. Vouchers are the wave of the future in housing for two reasons; because you can help more people and second, you do that at a time when we have finite Government dollars.

□ 1815

Vouchers offer freedom of choice to the low-income families and are less costly and more efficient than new construction programs. That is why we have to go the route of the voucher program.

By eliminating the current requirement that vouchers be used in connection with rental rehab programs, we can give them a fair test to those people who say they have not been fairly tested. I think the results are going to be a foregone conclusion.

But when all has been said and done, the reason I like the Wylie substitute is not only because we can help more people, because we can do it with less dollars, but at a time when we have $200 billion deficits, this bill is calling for $35 billion more than the President has requested. It is going $3.6 billion over fiscal year 1987. No one has ever heard of Gramm-Rudman-Hollings.

This is why we have to have this particular bill. Anybody who votes for this bill, my friends, has got to wear a button that says "I am a budget buster." That is why we have to go along with the Wylie substitute. I think it is only fair to the low-income people and to the people who benefit from these programs, and also to the American taxpayer.

Mr. GONZALEZ. Mr. Chairman, I yield 3½ minutes to the gentleman from Maryland [Mr. MITCHELL].

Mr. MICHELL. I thank the gentleman for yielding this time to me.

Mr. Chairman, first of all, I want to compliment our distinguished chairman and, of course, I rise in very firm support of the legislation that is before us.

It was a very frustrating experience to be a member of the Housing Subcommittee and of the Banking Committee and year after year not be able to articulate a housing policy. What was happening was that we were being folded into the Budget Committee reconciliation but we did not have an opportunity to articulate a housing policy, and this legislation before us certainly gives us that opportunity.

There is no question in anyone's mind about the essential role that housing plays not only in the life of a community but in the life of an individual. I live in an area which is fairly comfortable, but I took around in my area and I see the conditions under which certain people live and I say, "They cannot be good citizens; they cannot succeed," and I submit to my colleagues that the Federal Government has a mandate and a responsibility to provide decent, affordable housing for people.

In all of the national publications there has been a great deal of praise about the rebirth of cities and, indeed, there has been a rebirth in many, many cities, but I tell my colleagues that would not have been accomplished had we not had community development block grants and had we

not had UDAG. It simply would not have happened.

You come over to my city of Baltimore and all of you revel in the glories of Harbor Place over there. Harbor Place would not be in existence if we did not have a UDAG and a Community Development Block Grant Program.

I like this legislation. I like the inclusion of the Nehemiah plan, which is certainly one of the most innovative things that has come down the pike in a long period of time.

We talk about budget busting. I am aware of a button called A Budget Buddy, because there are no sums authorized in this, to my undestanding. How do you bust something when you do not have any money authorized for it. Indeed, what has happened is that we have cut back so badly in terms of housing that we are at least $3 billion below where we were last year. It does not make sense to make this budget more important than the lives of human beings.

My good friend, the gentleman from Ohio [Mr. WYLIE] has a substitute, and I must tell my colleagues very candidly that I have some problems with giving vouchers the preeminent position. Maybe they do work in Green Bay, WI. They have not worked in my city of Baltimore. A voucher system works if you have an adequate supply of sound housing, and very few large cities have an adequate supply of sound housing. I worry about this idea of placing everything on vouchers, or weight on vouchers, and very little in terms of new construction.

Also, as I understand it, the gentleman's substitute will tilt the scales in favor of more modernization as opposed to new housing starts. That gives me considerable concern.

I walk in every city where I go and I look at public housing. We need modernization, but I will tell my colleagues right now, we can put as much money as we want in modernization and it will not keep pace with the demand for new, low-income housing. I think you are tilting the scales in the wrong direction, Mr. BARTLETT and Mr. WYLIE, but I will be listening to your debate on this.

Mr. Chairman, I would urge fantastic support for the legislation before us.

In my last 10 seconds, Mr. GONZALEZ, you amaze me with your perseverance, your sagacity and your tenacity. Thank you for having all three of those measures.

Mr. WYLIE. Mr. Chairman, I yield 5 minutes to the gentleman from Georgia [Mr. BARNARD].

Mr. BARNARD. I thank the gentleman for yielding this time to me.

Mr. Chairman, first, I wish to honor Mr. GONZALEZ and Mr. MCKINNEY for their efforts to produce a compromise on this most difficult housing situation in H.R. 4746, which I understand will be offered as a substitute to H.R. 1. I deeply share many of their concerns over what will happen to low-cost, public housing and the many, in need, that it serves.

However, I believe even the substitute can be greatly improved—to the final benefit of those truly in need. They are the ones we must surely protect in this era of tight funding.

First, we have to make the system more efficient. This means we should encourage broader use of rehabilitation and modernization, rather than new construction. Second, we should also encourage vouchers for obtaining alternative housing instead of the more cost consuming certificates. Third, we must deal in a more business-like manner to assure that only the truly eligible obtain low-cost public housing. When we do not get this kind of assurance, with present budget constraints, it is undoubtedly the truly needy who come up with the short end of the stick. Fourth, urban development assistance grants—UDAG's—need to be distributed more broadly around the country than is the case under H.R. 4746. I also believe any bill we produce should improve the quality of selection in UDAG grants.

I hope during the amending process we will give favorable consideration to all these concepts which will make the Housing Act a more workable instrument of public policy.

Mr. Chairman, I am especially concerned over section 210 of H.R. 4746 on public housing disposition and demolition. This section amends current section 18(b) of the Housing Act of 1937 in such a manner as to make it even more difficult than ever for local housing authorities and HUD to authorize the disposition of even heavily deteriorated facilities. Indeed, I might almost go so far as to say the amendments will make it impossible to dispose of them.

I am aware of the concerns expressed by the authors of H.R. 4746. These are that, because of Federal budget restraints, it is more difficult to replace units from projects that are being disposed.

The stock that they seek to protect with amendments in section 210 would require 1-for-1 replacement of public housing units. Further, the replacements would have to be funded in advance by the public housing authorities.

I realize there are certain limited "escape" clauses in section 210 of H.R. 4746 related to the section 8 payment assistance for alternate housing. These could be used if 1-for-1 replacement units were not available. Nevertheless, these seem inadequate since the bottom line will be inflexibility for the housing authorities and HUD. The "escape" clauses are simply too tightly drawn. They do not—and probably cannot—take into consideration the many, many factors best left to the case-by-case decisionmaking abilities of the local housing authorities and, ultimately, HUD.

This is especially true if we are talking about advance funding for replacement units, 1-for-1. That provision removes the options for modernization and rehabilitation plans currently being pursued by some PHA's with units in need of repair. This is so because at least part of the funding for such rehabilitation, modernization or replacement could not be available until the existing units were disposed of. In other words, part of the money for rehabilitation, modernization, and replacement is actually generated by disposition.

Even now, these housing authorities and HUD are far from free-handed in disposing of projects, and section 210 would tie them completely to unrealistic expectations.

Most of us are fully aware of situations where this inflexibility is just not appropriate. There are circumstances where the dwelling units simply are no longer habitable or will be that way soon. Further, there are circumstances where other public purposes—for community needs, not high-cost housing—should at least be able to be balanced against the condition of a given project. This balancing could not happen with adoption of section 210.

I hope that during the amendatory process, we can fashion more flexible requirements for disposition and demolition while assuring that the public housing agencies which might be affected would have to certify a plan for the provision of other decent, safe, sanitary, and affordable housing to tenants who would be displaced.

I cannot stress enough that, in my opinion, we need a highly workable and realistic piece of legislation this year, and that, though the provisions of H.R. 4746 are a good place to start, we still have our work cut out for us in the days to come to improve that product.

□ 1825

Mr. MCKINNEY. Mr. Chairman, I yield 4 minutes to the gentleman from New York [Mr. WORTLEY].

Mr. WORTLEY. Mr. Chairman, soon this Chamber will debate and, I hope, enact a long-awaited housing bill. I serve on the Housing and Community Development Subcommittee, and I commend both the majority and minority leadership for settling many of the controversies which have prevented a housing bill from being brought to the floor. I believe that H.R. 4746 could, and needs to be improved, but at least the full House is now in a position to debate and amend a comprehensive housing bill. In addition to

these positive developments, the Senate has been responsive and is working on a housing bill of its own. I urge expeditious action by both Chambers.

The reasons we need a comprehensive housing bill are numerous. Since September of last year, the House has reauthorized housing programs piecemeal on an ad hoc basis. Besides consuming valuable time in this Chamber, legislating in this manner has led to many problems. Programs such as the Federal Home Administration mortgage insurance, Federal flood insurance, the community development block grant, the urban development action grant, and others have temporarily lapsed or been on the brink of lapsing. Individuals served by these programs have been left confused and uncertain of their future. Furthermore, House Members have not been able to have an overall view of Federal housing programs, which is necessary to provide a proper and timely response to our Nation's housing needs.

Congress must continue its commitment of providing housing assistance for lower income and disadvantaged people. Not everyone is endowed with the gifts necessary to provide adequately for themselves and, in many cases, their families. Others have just been unfortunate enough to hit a rough spot in life; prolonged unemployment; a debilitating injury or handicap; the mental and physical problems associated with old age. Whatever the case, clean, safe, and affordable housing is often a scarce commodity. Through efficient utilization of its formidable powers and resources, the Federal Government has a major role to play in insuring that the citizens of this country are properly housed.

Unfortunately, the administration's proposed budget for 1987 was overly harsh on community development and rental assistance programs. In my views, these programs have already taken their fair share of reductions, both in decreased appropriations over the last few years and through the recent Gramm-Rudman-Hollings budget cuts. While this is no time to significantly expand expenditures in any sector of the Federal budget, I don't believe it is necessary or fair to decimate housing programs which are serving their intended purpose.

I would also like to address a small, but important provision in the bill which would require procedures to allow rural borrowers, at their option, to have the availability of an escrow account for the purpose of taxes, insurance, and other necessary expenses. I proposed this amendment during markup of the committee bill because this option would benefit all parties concerned. The municipalities would be better able to collect their tax payments; the Federal Government would be able to protect its loan; and the rural borrower would be able to budget and pay small monthly tax payments rather than a large lump sum at the end of the year. I am pleased that this provision will be included in the housing bill, and I thank my colleague from Connecticut for his work in this matter.

Mr. Chairman, at this time I would also like to bring to the attention of my colleagues an amendment which I intend to offer when the housing bill is before the full House for consideration. The amendment would establish a demonstration program with the Federal Housing Administration for home equity conversions designed to benefit elderly homeowners. Home equity conversion is one way older Americans who own their own homes can obtain additional disposable income while remaining in their residences. Nearly 16 million Americans over the age of 65 live in single-family homes, and 80 percent own their homes outright according to the 1980 annual housing survey. Almost 65 percent of all elderly poor are homeowners with substantial assets in their homes.

What is needed is a mechanism with adequate consumer safeguards that will permit elderly homeowners the option of converting their equity to cash. My amendment would authorize a demonstration program with FHA insurance to get at the issue. Since widespread home equity conversions involving the elderly are virtually nonexistent, a demonstration program makes the most sense until adequate data can be gathered and the private sector can take over.

The concept of home equity conversion for the elderly has been endorsed by the American Association of Retired People, the 1981 White House Conference on the Aging, and the Older Americans Consumer Cooperative, among others. Home equity conversion is not for everyone, but it represents another option for elderly housing that should be tried.

I commend my colleagues for moving this housing bill to the floor for action.

Mr. GONZALEZ. Mr. Chairman, may I inquire how much time we have remaining on this side?

The CHAIRMAN. The gentleman from Texas [Mr. GONZALEZ] has 9½ minutes remaining, the gentleman from Connecticut [Mr. MCKINNEY] has 8 minutes remaining, and the gentleman from Ohio [Mr. WYLIE] has 24 minutes remaining.

Mr. GONZALEZ. Mr. Chairman, I yield 3 minutes to the gentleman from the District of Columbia [Mr. FAUNTROY].

Mr. FAUNTROY. Mr. Chairman, I am pleased to join with the distinguished chairman of our Subcommittee on Housing and Community Development, Mr. GONZALEZ, and the distinguished ranking minority member of that subcommittee, Mr. MCKINNEY, in urging support for this very responsible, bipartisan substitute to H.R. 1, the housing bill.

The substitute, H.R. 4746, embodies five titles, all of which are important improvements to programs administered by our Department of Housing and Urban Development. I am particularly encouraged by the reauthorization of HUD-assisted housing programs in title II, the assistance that is provided for homeless and displaced persons under title IV, and the assistance provided to families with single-family housing in certain depressed areas, as provided in title V.

Next week, when we consider H.R. 4746, I intend to offer an amendment which I believe will further improve the bill. The principal aim of my amendment is to encourage the conversion from government-managed public housing to resident-managed public housing.

Many local government authorities are poor landlords. Government managers typically work an 8-hour day, are not on site, and have no real stake in the condition of the property. As a result, in some jurisdictions, public housing is among the worst managed and most poorly maintained of any housing.

Resident management seems to be the wave of the future. Experimental Resident Management Programs have been carried out in Boston, New Orleans, and St. Louis. More recently, the District of Columbia has been the site of a successful Resident Management Program.

The Kenilworth-Parkside public housing project in Washington, DC, was similar to many big city public housing projects. Many of its residents failed to regularly pay rent. The property had become run down. Overflowing trash dumpsters housed rats, and many vacant apartments housed drug dealers. According to the residents, their units, at that time, rarely had heat and hot water.

In March of 1982, after a 2-year training program, the residents of Kenilworth-Parkside formed a nonprofit corporation to assume management of their apartments. The results of their first 3 years have been nothing short of amazing. Rent collection has increased by 179 percent. On-site administrative costs have dropped by 60 percent, and expenditures for routine maintenance have declined by 20 percent. The Kenilworth resident managers appear to have halted the deterioration of their homes and brought income to their housing project. A program that was once totally dependent on Government support now no longer needs a Federal operating subsidy.

Kenilworth-Parkside and the other successful experiments in resident management demonstrate that tenants taking an active role in their project's management can produce conditions far better than those typical in some public housing. The pride of residents in their own well-kept homes can not be matched or instilled by a distant government official. I hope the Members will support my amendment when we vote on H.R. 4746 next week.

The CHAIRMAN. The time of the gentleman from the District of Columbia [Mr. FAUNTROY] has expired.

Mr. WYLIE. Mr. Chairman, I yield 2 additional minutes to the gentleman from the District of Columbia and I hope he will yield to me.

Mr. FAUNTROY. I yield to the gentleman from Ohio.

□ 1835

Mr. WYLIE. Mr. Chairman, I want to congratulate the gentleman for his amendment, and I want the gentleman to know—and I said this in my remarks earlier—that I did put his amendment in my bill. It is an improvement over an amendment which I offered a little earlier to H.R. 1 in the subcommittee, which was adopted.

Does the gentleman recall that?

Mr. FAUNTROY. I do recall that, and I appreciate that, and I hope the gentleman supports my amendment to H.R. 4746 as a result.

Mr. WYLIE. We will support it.

The CHAIRMAN. The time of the gentleman has expired.

Mr. WYLIE. Mr. Chairman, I yield an additional minute to the gentleman from the District of Columbia.

Mr. FAUNTROY. I am happy to yield to the gentleman from Texas [Mr. BARTLETT].

Mr. BARTLETT. I want to compliment the gentleman and say that I have supported his amendment and his legislation, and plan to vote for and support his amendment to the bill next week, or when it comes up.

I commend the gentleman both for his leadership in developing this legislation, which will improve the lives of tenants throughout this country, but also on his guts and his perseverence in sticking to his guns in ensuring that this kind of legislation would be brought to the floor, and hopefully will be passed and signed into law, and I commend the gentleman for his leadership.

Mr. FAUNTROY. I certainly want to thank the gentleman for those remarks, and I am sure that our colleague, the gentleman from New York [Mr. KEMP] will be very much appreciative of it, and of the support that we are all going to get on this amendment when it comes up next week.

Mr. McKINNEY. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would like to enter into a brief colloquy with the gentleman from California [Mr. TORRES], simply stating that we have included a provision in H.R. 4746 that provide for timely payment of subcontractors. This provision is section 164. I wonder whether the gentleman from California could provide some clarification here. I am concerned that this language will be interpreted to require general or prime contractors to pay their subcontractors regardless of whether they have received payment from the owner through HUD. Such an interpretation, whether by a court or by HUD through regulations, would be contrary to the general industry practice that the subcontractor is paid by the prime contractor after the prime contractor is paid by the owner.

Mr. TORRES. Mr. Chairman, if the gentleman will yield, as the author of this provision, I assure the gentleman from Connecticut that it is not my intent to require general or prime contractors to pay their subcontractors regardless of whether they have received payment from the owner through HUD. The intent of the provision is to ensure that prime contractors pay their subcontractors in a timely manner once they have received payment from the owner.

Mr. McKINNEY. I thank the gentleman from California for that clarification.

My WYLIE. Mr. Chairman, I yield 10 minutes to the gentleman from Texas [Mr. BARTLETT], who has worked very hard, let me say, to develop this Wylie-Bartlett substitute, and who is very rapidly developing into a very preeminent expert on housing.

Mr. BARTLETT. Mr. Chairman, I very much thank the gentleman from Ohio [Mr. WYLIE], the ranking member, for his kind words, and I very much admire and respect his leadership that he provides the committee on both sides of the aisle.

I appreciate the additional time, it is a bit unusual, that the gentleman has offered. I recognize and would comment the obvious, that every one can tell from this House floor at this late hour, that this is not the best process to actually have a debate on the housing issue before us.

At some point, I know that others would agree in looking at this debate, it would be the best thing to do to have a debate on a piece of legislation like this on the day that we are actually going to consider the bill; but nevertheless, I think this legislation, some $18 billion in annual spending would be authorized; deserves a rather lengthy debate and some comments.

The legislation itself was developed after lengthy debate and hearings and markups beginning on January 3, 1985. The substitute that has been offered by my distinguished colleague from Texas [Mr. GONZALEZ] and the gentleman from Connecticut [Mr. McKINNEY], I do have to say has some positives in it as well as some negatives. It is not the same legislation, both for good and ill, that was developed by the Housing Subcommittee and the full banking Committee, but it did take some of the items that were developed by the committee in H.R. 1, as amended.

The positives. It seems to me that the legislation makes some improvements in present law. it does, as I said earlier, contain a provision for comprehensive grants. Now what that would mean is that would provide a major reform for the way in which we modernize and repair and provide for modernization funding for public housing authorities. It would require a multiyear plan of every authority to bring their public housing all the way up to standard; that would be a comprehensive plan; it would provide for a reliability of funding, so the public housing authority could count on knowing what kind of funding is available for modernization—that would be in a formula that would be determined by later legislation. This legislation would provide for a process to get to that formula, and then we would agree on the formula, and then we would agree on the formula at a subsequent time.

Most importantly, Mr. Chairman, it would deregulate the repairs that are made in public housing. It would place the public housing authority in the business of bringing the housing stock up to code, and take HUD out of the business of having to approve every blueprint and every item and every change that is made.

I would note, to my colleagues on the other side of the aisle, that when we go to the conference with the other body, if this bill gets to conference with the other body, this is the kind of provision which some would be tempted to drop in conference. We have all been there before, and I would caution them not to consider doing that, because it is this comprehensive grant reform that is one of those reforms that it seems to me could well become the engine that could drive this bill in to law, if it ever does become law.

I would comment that there are other things that have to happen before that happens; we still have to come to grips on funding. The legislation also prohibits user fees and extends FHA, which is a positive.

On the negative side, much remains to be done. There are three areas that I think need to be substantially changed from the bill that is before us.

First of all, the legislation, the Gonzalez-McKinney substitute does not attempt to make any priorities for public housing or assisted housing programs. It treats all priorities as they have been funded, and simply ratifies the

status quo, and thus we have the anomaly of authorizing some $945 million—which is the current appropriations level—to build 5,000 new units of public housing when there are almost a half a million units of public housing that are in dire need of repair.

It seems to me the Congress is ready to set priorities in public housing, and the first priority ought to be modernization and repair.

Second, the legislation affirms the status quo in the living conditions of tenants of public housing. Now that is not a funding issue; that is an area that needs improvement, not ratification of the status quo of the programs of the 1960's.

Third, the funding is at such sums, which essentially says that we would continue at current levels of spending; and that is why I am supporting the Wylie substitute, that would provide essentially the same level of services, the same level of services for approximately $5 billion less money.

The reason that the Wylie substitute can do that is that it does it more efficiently, it provides for a more reasonable and more efficient, less costly allocation of those same funds, so that the Wylie substitute, for example, can provide for an incremental number of units; of an additional 81,000 units of assisted housing in the urban areas, for $11 billion of the total bill versus the Gonzalez-McKinney substitute, which would provide only 94,000 incremental units, for a total cost of $15 billion.

I think it is time that Congress start acting smarter, and not just simply continue to allocate the programs, reallocate the programs of the past.

Mr. Chairman, I plan to offer in addition to that, two very key amendments that I think will go to the heart of the matter of this legislation. The first one would be designed to replace the money that we are spending on new construction of a very small number of public housing units that provide primarily Members of Congress and local politicians the opportunity to cut a ribbon, to say that they provided new units of public housing and to take that money and to spend it on repair and modernization, which is where the real need is.

Second, I will be offering a title, which is a title of a series of reforms many of which were adopted, most of which were considered by the Housing subcommittee; reforms designed to improve the living standards of those people who are using either section 8 certificates or living in public housing.

First, on the repair and modernization amendment. Let me share with the House some statistics which we have just obtained today. Preliminary information from the ABT study, which we are in the process of finishing at HUD, that is designed to be completed by August.

The preliminary indication, and it is only preliminary, but it gives us a range, indicates what we all know to be true by looking at our individual districts; and that is, some 36 percent of the public housing units in this country, 459,000 units it is estimated, require repairs or modernization just to bring them up to standard; just to bring them up to decent, safe and sanitary, 36 percent of the total require repairs.

Of those 459,000, in fact, 65,000 it is estimated, are vacant today. The Boston Public Housing Authority has a 19-percent vacancy rate. The Newark Public Housing Authority has a 34-percent vacancy rate. The Detroit Public Housing Authority has a 23-percent vacancy rate.

□ 1845

It is time to begin to place our priorities where we can do the most good; That is, to repair the current housing stock.

What does this amendment do? First, it would restrict new construction of public housing units themselves to only one of three circumstances. First, to finish public housing units that had been begun in prior years but were underfunded. Second, to replace those units that had been lost through demolition and disposition in which the Secretary certifies that new units of public housing are required for their replacement. And third, to permit those public housing units that have 90 percent of their current units already up to standard or they are funded to be brought up to standard, to permit those public housing authorities to apply for new construction.

Second, this amendment would take the $860 million that remains in fiscal year 1986 appropriations and essentially to make it available for authorization for repair and modernization. In one step the Congress can virtually double the amount of funds that would be available for repair and modernization.

The amendment in fact would provide that those funds would continue to be available if unexpended by the end of fiscal year 1986 and would continue to be available in future years.

I ask every Member of Congress just to think about your own State, your own district, your own city. If you have any question about the need for repair and modernization of public housing in this country, ask your housing authority, ask your city council. Better than that, ask the tenants who live in public housing who want the opportunity to live in decent, safe, and sanitary housing units. The fact is we can provide more units faster, less costly, more efficiently and with more compassion by emphasizing repair over new construction.

The second amendment is entitled livability and employment. Most of the ideas, frankly, came from tenants themselves. This is not a funding issue. It will not cost anything. By and large, these reforms in fact will save money over a multiyear period of time. It is a bipartisan approach and a bipartisan set of amendments, many of which were adopted by the committee, oftentimes on a division, and on a divided question.

It falls into three areas. First, to improve the living environment of the residents of public housing themselves by providing them with a freedom of choice, an ability to control their own destiny.

Therefore, we have a provision for portability of section 8 certificates, so that a person who has a section 8 certificate living in one city in a standard metropolitan statistical area, if they get a job and want to move across town, they can move and use that certificate.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. WYLIE. Mr. Chairman, I yield 2 additional minutes to the gentleman from Texas.

Mr. BARTLETT. I have made available for the RECORD a summary and exact copy of these amendments.

The second approach or the second part of the livability amendment is to provide employment opportunities by eliminating those barriers in public housing laws and regulations that keep tenants from getting a job today.

Third is to deregulate public housing authorities, to allow that independently operated public housing authority with oversight and appointment by the local governments, to make their own decisions as far as how to operate the public housing authority.

I want to pay particular attention—the gentleman from Georgia talked about the flexibility that is required in demolition and disposition—I want every Member of this House to look at their own situation and realize that some flexibility, more than is in the committee substitute, is required in demolition and disposition. So that, yes, the public housing authority would be required and should be, under my amendment, to replace those units for those tenants that are living there, but in fact to make it a reasonable requirement so that demolition and disposition can occur in an orderly way and that it can be replaced with other units. In conclusion, both of these amendments do enjoy bipartisan support. There is no reason to accept the status quo.

We have entered into the debate over a long period of time and many hearings, and we have discovered that tenants will tell you that the Congress, if it will, can improve the status

quo of public housing and assisted housing in this country.

These amendments, with these amendments and others, in fact, this Congress can prove that we are up to that task.

I thank the gentleman for yielding the additional time.

The CHAIRMAN. The gentleman from Ohio [Mr. WYLIE] has 10 minutes remaining; the gentleman from Connecticut [Mr. MCKINNEY] 8 minutes; and the gentleman from Texas [Mr. GONZALEZ] has 6½ minutes remaining.

Mr. MCKINNEY. Mr. Chairman, I yield 4 minutes to the gentleman from Pennsylvania [Mr. RIDGE].

Mr. RIDGE. I thank the gentleman for yielding.

Mr. Chairman, although there have been no major housing bills considered by this body for some time, the housing and community development needs of the Nation have certainly persisted, and unfortunately in parts of the country, obviously, have increased.

After months of hard work by my colleagues on the committee and the appropriate subcommittee, but particularly my colleagues from Texas [Mr. GONZALEZ] and from Connecticut [Mr. MCKINNEY] the House will finally consider its first omnibus housing bill in 3 years.

The substitute provides for the continuation of most of the housing programs that have been in existence prior to this date. It preserves the vital economic development programs and opportunities offered to individuals and communities through the Community Development Block Grant Program, the Urban Development Action Grant Program. It provides in a reasonable and practical way additional housing needs for the low income, elderly and poor.

I must respectfully disagree with my colleagues who want to rely exclusively on the voucher system for additional units.

Clearly, housing vouchers have a place in some areas, but I do not believe they are universally acceptable alternatives to meet the needs of all those families and individuals in need.

For vouchers to work, there must be a high vacancy rate in rental housing, and certainly all localities do not meet that criterion.

In my part of the country housing vouchers simply will not work in rural areas because there is simply not enough rental housing constructed.

In many urban areas, although constructed, the units are not available, they are occupied.

Vouchers can only work as part of a housing mix and the Gonzalez-McKinney substitute provides a satisfactory and practical mix.

I urge my colleagues to support the substitute because it is a realistic compromise that should be given the bipartisan support it deserves after many, many months of long and arduous negotiations and compromise.

I would like also to alert my colleagues to an amendment that will be offered in the area of economic development. I am pleased to be offering an enterprise zone amendment along with a colleague on the Banking Committee, the Congressman from New York, Mr. GARCIA.

All my colleagues and all the Members should know that the full Committee on Banking and Currency voted to include authorization for enterprise zones. However, the language was initially deleted from the substitute version of the bill.

Our amendment would authorize the Secretary of HUD to designate 100 enterprise zones. It is important for my colleagues to note that 25 of the zones would have to be in rural areas.

The language sets criteria for the zones and a procedure by which local government entities can nominate them.

Clearly, the concept of enterprise zones has been well articulated on the floor in the past years and needs little explanation. Many in this Chamber and many of my colleagues listening can certainly identify communities at home where citizens and community leaders search for new initiatives to put their friends and their neighbors back to work. It is not just those from older industrial sections, it is not just those from the Northeast and the Midwest. Recent changes in high technology businesses and the recent drop in oil prices highlight the fact that the fortunes of local economies can change rapidly and unpredictably.

Those whose home areas are in pretty good shape, economic shape now, have low unemployment, should realize that no one and no place is immune from economic difficulty.

The designation of enterprise zones would create a mechanism by which economic development efforts of all levels of government could be coordinated for areas most in need. At a time when Congress is reducing direct support for local governments, enterprise zones would provide a new tool for local economic development.

The amendment has the potential to create places of business to prosper in towns that have known too little prosperity. I urge my colleagues to vote "yes" on the Garcia-Ridge enterprise zone amendment and to wholeheartedly support and vote "yes" on the Gonzalez-McKinney substitute housing bill.

Mr. GONZALEZ. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsylvania [Mr. KANJORSKI].

Mr. KANJORSKI. Mr. Chairman, I want to take this opportunity to emphatically restate my support for a new housing bill in this Congress. It is well known that the present administration does not believe in the importance of urban development or affordable housing, and does not truly care whether American families have the opportunity to buy and own their own homes.

This attitude is terribly misguided. Approval of major housing legislation by this body will remind the President and his advisers that the Congress still believes in the American dream of homeownership, affordable rentals, economic development in the form of UDAG's and CDBG's, in FHA, and the scores of other worthwhile programs covered in this legislation.

By passing a realistic housing bill, which adequately funds these programs, we will be helping those who still genuinely need some assistance from the Government. I notice that an amendment may be offered on behalf of the administration to make substantial cuts in the funding for housing programs. I am sorry to see this, and I hope my colleagues will vote against this devastating measure.

The administration and their supporters believe that America's urban and less-affluent areas can get by with an additional 47-percent cut in funding for CDBG's, UDAG's, and others. Such a cut, along with the elimination of scores of existing programs, would mean an overall reduction of 9.1 percent in funding since 1980. With the deficit still looming large before us all, it is important to remember the tremendous cuts in housing that have already taken place. Housing programs have taken their cuts, so lets look to the real sources of waste to reduce the deficits.

I want to congratulate the chairman, Mr. GONZALEZ, and the ranking minority member, Mr. MCKINNEY for bringing this needed legislation to the floor. I look forward to supporting a fair and responsible Housing bill.

Mr. WYLIE. Mr. Chairman, as an indication of bipartisan support here, I yield 2 minutes to my friend, the gentleman from Ohio [Mr. TRAFICANT.]

Mr. TRAFICANT. Mr. Chairman, I rise in strong support of H.R. 4746, the Gonzalez-McKinney substitute to H.R. 1. This bill authorizes a wide range of housing programs that are of critical importance to both rural and urban areas in this country that are struggling economically.

My district, the Youngstown-Warren area of Ohio, has one of the highest unemployment rates in the country. While many areas of the country have benefited by the so-called economic recovery, areas like mine continue to suffer. Programs, such as those authorized in this measure, provide areas like mine with the helping hand they so desperately need to help themselves. And that is what we are talking about here today. Providing ailing

communities with the basics to help themselves.

The Community Development Block Grant Program has been targeted for termination by the administration. Rather than eliminate this program—which has benefitted areas like mine tremendously—H.R. 4746 would retain the program in fiscal year 1987 for those communities that qualify. I recognize the need to address the deficit problem. Without question, steps must be taken to streamline Federal programs. But I do not believe that the wholesale elimination of programs such as the Community Development Block Grant Program or the Urban Development Action Grant Program is the right or just way to go. I do not argue the fact in some instances, communities and cities that perhaps were not in dire need or economic dire straits did, nonetheless, receive funding. The purpose now, should be, and must be, to retarget these programs to those communities that are in dire need. I invite any one of my colleagues to tour my district and then tell me that these programs wouldn't help. Communities throughout the country are hurting and we can't turn our backs on them.

I strongly support the provision in the bill amending the current selection criteria for UDAG assistance. Under this provision, project merit will be given greater consideration. Also to be considered in determining project merit will be the extent to which grants leverage private investment; the number of permanent jobs created or retained; the level of local government funding; the amount of low-income housing produced; and the impact which such aid would have on physical and economic development. I believe that these provisions are exactly what is needed to ensure that the funds expended in these programs are done so in a judicious fashion and in the most cost-effective way. As outlined in H.R. 4746, the UDAG Program will be of enormous benefit to economically depressed areas and will provide communities with the economic push needed to realize economic revitalization.

Another important component to this bill that I'd like to mention in the Rehabilitation Loan Program. This program allows low to moderate-income families to have decent, affordable housing. The measure also authorizes a whole slate of low-income housing programs that specifically target the most needy of our society: senior citizens, the handicapped, the disabled, the indigent, and the homeless. These individuals do not have a powerful lobby here in Washington. They do not have the financial resources to plead their case. We, here in Congress, are their only voice. Low-income housing programs such as section 8, housing vouchers, public housing development, rental rehabilitation and development grants, and public housing improvement grants allow this Nation's poor seniors, our indigent, and handicapped to live in decent housing. They provide hope and humanity for an otherwise forgotten group of Americans.

The sad truth is that without these programs, low-income housing would quickly become a rare commodity and literally thousands of poverty stricken families and elderly would be without adequate housing. The sad truth is that without these government programs, no incentive exists in the private sector to invest in low-income housing or housing projects for the disabled and handicapped. This legislation reflects this sad reality and is necessary. The bill provides much needed assistance to this Nation's homeless. The bill would supplement the efforts of State, local and charitable organizations that provide shelter and other assistance to the homeless.

In a country as rich and as affluent as ours, it is an outrage and a disgrace that every year we have thousands of homeless individuals dying of exposure in the streets. We have senior citizens dying in their homes during the winter months because of no heat in their apartment building. H.R. 4746 attempts to deal with this tragic problem—a problem that is not confined to our urban areas. The bill authorizes vital rural housing programs that provide much needed repair loans, housing technical assistance grants, and farmworker rental housing assistance to America's ailing farm regions.

In closing, I would like to state that this measure is one that is greatly needed to address the tragic realities of life in America. All is not coming up roses and we must recognize that. People in areas like northeast Ohio and western Pennsylvania are hurting. In our cities, senior citizens need affordable housing, as do single parents and poverty stricken families. Throughout the country, handicapped and disabled individuals deserve the opportunity to live in communities and be productive members of society. And I believe everyone in the Chamber is all too familiar with the tragic problems being experienced in our farm economy.

These are the sobering realities we must deal with in 1986. We cannot turn our backs on these people—these problems won't go away simply by ignoring them. Action must be taken and H.R. 4746 represents the most responsible and sound action we, as a legislative body, could take. I urge all of my colleagues to support this important legislative initiative and I would also like to commend Chairman GONZALEZ for his career long commitment to this issue and for his leadership over the years.

Mr. McKINNEY. Mr. Chairman, I yield 2 minutes to the gentleman from New York [Mr. GREEN], a powerful member of the Committee on Appropriations.

Mr. GREEN. I thank the gentleman for yielding to me.

Mr. Chairman, I want to express my appreciation to the Housing Subcommittee of the Committee on Banking, Finance and Urban Affairs for bringing us H.R. 1.

At the outset of my remarks, let me acknowledge that I think the administration is right that there are many parts in this country where there are significant vacancy rates in housing and where a voucher type program, not that different from the section 8 existing housing program, can in fact meet the needs of low-income families and low-income elderly.

But it was also very clear at the hearings held before the Subcommittee on HUD and Independent Agencies, Appropriations Subcommittee, on which I serve as the ranking minority member, that there are also, by HUD's own statistics, significant metropolitan areas in this country where there is a vacancy rate below 5 percent, normally considered the breaking point between high-vacancy and low-vacancy areas.

I think it is also very clear there are significant rural areas in this country where there is a shortage of housing.

Now, it seems to me that, as good as the existing housing programs are, they cannot meet the full housing needs of low- and moderate-income households in those kinds of areas.

□ 1900

So, I think it is important that H.R. 1 continues housing creation programs as well as the existing programs.

The amounts, we all know, are extremely modest indeed; for example, 5,000 units for public housing, 12,000 units for the section 202 program for the elderly and the handicapped. But at least they will keep the program alive, and I hope that the programs will be implemented in a way where HUD can target those resources that the committee is authorizing toward those parts of the country that have low vacancy rates, where the solution to the needs of low- and moderate-income households cannot entirely be met by the voucher program.

Mr. Chairman, I thank the committee for its work.

Mr. WYLIE. Mr. Chairman, I reserve the balance of my time.

Mr. GONZALEZ. Mr. Chairman, I yield 2 minutes to a distinguished and hard-working member of the subcommittee, the gentleman from New York [Mr. SCHUMER].

Mr. SCHUMER. Mr. Chairman, I thank the gentleman for yielding this time to me.

Mr. Chairman, I am delighted to be here today. I first want to thank our glorious subcommittee chairman, the gentleman from Texas [Mr. GONZALEZ], and our ranking member, the gentleman from Connecticut [Mr. MCKINNEY] for the hard labor they have put together in putting together a compromise. I would also like to thank the gentleman from the other side of the aisle. I think that the debate has had a erudite and, while possibly partisan, certainly substantive tone.

Mr. Chairman, I would like to simply address two points on why I believe the Gonzalez-McKinney is the substitute of preference.

One relates to a program that many of us have been actively involved in pushing for a while, the Nehemiah program. We were told in this debate, with good reason, how expensive it is to build a new unit of public housing. If it is going to cost $65,000 or $85,000 or $110,000 to build a new unit of public housing, somebody said, then why not give someone a new single-family home for the same price? Well, Nehemiah gives somebody a new single-family home, but not for the same price, for only a $15,000 subsidy. It represents home ownership, which I think will be the way to go in the future. It represents an opportunity for inner cities to rebuild themselves, to take large tracts of now vacant land and make those inner cities bloom, as has been done in the east New York part of Brooklyn, in my colleagues', MAJOR OWENS and EDOLPHUS TOWNS, district.

And it means more units available to the very poor, because while it is true a $5,000 deposit is needed on Nehemiah, it will open up, if the experience in New York is any indication, large numbers of public housing units and other units to which the very poor can move, cheaply and in number.

The days are gone, Mr. Chairman, I think when we can just simply blithely say we can afford $100,000 or $90,000 of a unit for housing for the poor. There are too many poor people. But Nehemiah is a reason to commend the Gonzalez-McKinney substitute.

Mr. WYLIE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I think, as does the gentleman from New York, that we have had a good debate, that we have made the points that we wanted to make as far as the difference between the two bills. I think that everyone who has spoken today is committed to the necessity of the housing bill, of housing legislation, and that we are all trying to achieve the same goal.

I would recommend my bill because, in my judgment, it is more fiscally responsible, as I suggested in my opening remarks. If you use the deferred funds, or if we are not able to use the deferred funds, it will cost approximately $10.2 billion, as compared to the $15.2 billion in the Gonzalez-McKinney bill. I think it will accomplish basically the same purpose.

I think it provides more effective utilization of the housing assistance programs at less cost through the modernization program we have in our bill, which would cost only $2,400 per unit, as compared to $65,000 per unit in new construction.

We also have the voucher program which I mentioned a little earlier, which would provide units at approximately $4,500 per unit.

My bill also prohibits user fees, as does the Gonzalez-McKinney substitute, except in the area of FHA user fees, and it keeps the user fees on FHA loans at the present level.

My bill, I think, has a significant provision as far as public housing reform. It provides for comprehensive modernization programs, for tenant management opportunities which had been discussed here a little earlier, for income verification tests to combat fraud and abuse which have been recommended for many years since I have been on the Banking Committee. It provides improved livability for tenants, in my judgment.

We incorporate in our bill some of the special programs for the needy, which we apparently all agree on and which are also included in the Gonzalez-McKinney bill. We have no disagreement in that area.

We do not have, and we do have disagreement on this, any special provisions, any special interest provisions, which would benefit only three congressional districts, so there is no pork in this barrel.

I do think it provides a better UDAG formula and more equitable and fair distribution through the so-called 50-50 split program which I have incorporated in my substitute.

Mr. Chairman, I would urge adoption of my bill on the theory that it is less expensive and would provide better housing at less cost and more affordability.

Mr. CHAIRMAN, I reserve the balance of my time.

Mr. MCKINNEY. Mr. Chairman, I yield the balance of my time to the gentleman from Connecticut [Mr. MORRISON].

Mr. WYLIE. Mr. Chairman, I yield 1 additional minute to the gentleman from Connecticut [Mr. MORRISON].

Mr. CHAIRMAN. The gentleman from Connecticut [Mr. MORRISON] is recognized for 2 minutes.

Mr. MORRISON of Connecticut. Mr. Chairman, I rise in strong support of the Housing Act of 1986. I want to commend the chairman of our subcommittee, the gentleman from Texas [Mr. GONZALEZ], for his leadership; and also the gentleman from Connecticut, my good friend and colleague [Mr. MCKINNEY], for his cooperation in making possible this bill and bringing it to the floor with what I hope will be strong bipartisan support for a bill that is very necessary.

In fact, much more is necessary to respond adequately to the housing needs of the people of this country.

This bill is a minimal bill. It is what we must do, not what it would be good if we could do, but what we must do just to maintain our current effort.

I have heard a lot of discussion about the budget as if this were a budget buster. This subcommittee has worked as hard as any in the House to conform itself to a budget that is a cruel budget in terms of the limitations it places on the housing needs of the poor.

□ 1910

And yet we have conformed to the budget and in fact this bill stays within any reasonable budget targets. It does so for both 1986 and 1987 by assuring that no funds can be appropriated under this authorization that have not been authorized by the Appropriations Committee and that are not within the budget limitations. It does things that are absolutely necessary. It continues the UDAG Program which the cities, the depressed cities of this country, desperately need. It sees to it that public housing demolitions, which are going on around the country because of outdated public housing projects, must be replaced with equivalent units for the people who are in need of housing, so we will not lose our housing stock because there are outdated public housing units. It continues the section 235 program which has been so important in many areas for home ownership opportunities. Just in my own district, we have just broken ground for 40 two-family homes that are being built under the 235 program that will allow low- and moderate-income people to have a home of their own and allow the revitalization of neighborhoods.

This is a bill we can proudly support, and I hope an overwhelming majority of my colleagues will do so.

The CHAIRMAN. The gentleman from Ohio [Mr. WYLIE] has 4 minutes remaining, and the gentleman from Texas [Mr. GONZALEZ] has 2½ minutes remaining.

The gentleman from Texas [Mr. GONZALEZ] has the right to close debate.

Mr. WYLIE. Mr. Chairman, I yield back the balance of my time.

Mr. GONZALEZ. Mr. Chairman, I yield the remainder of my time to the gentleman from Minnesota [Mr. VENTO].

The CHAIRMAN. The gentleman from Minnesota [Mr. VENTO] is recognized for 2½ minutes.

Mr. VENTO. Mr. Chairman, I rise in support of the substitute to be offered

by the chairman of the Housing and Community Development Subcommittee, Mr. GONZALEZ, and the ranking minority member, Mr. MCKINNEY.

It is widely recognized that the Banking, Finance and Urban Affairs Committee had reached an impasse in bringing H.R. 1 to the floor. As reported from the Banking, Finance and Urban Affairs Committee, H.R. 1 was a comprehensive approach to a myriad of problems in housing. I continue to see the need for the comprehensive approach contained in H.R. 1 as reported and hope that in the future Congress will pass many of the provisions not contained in the Gonzalez-McKinney substitute. However, it became apparent during conference committee deliberations on the fiscal year 1986 budget reconciliation legislation that the other body would not consider legislation which dealt with such a wide breadth of housing issues.

Because we have a responsibility to produce a housing authorization, Chairman GONZALEZ and Representative MCKINNEY labored long and hard to produce a bipartisan substitute which deserves the support of the Members of the House. Passage of the bipartisan Gonzalez-McKinney substitute will facilitate consideration by the other body of similar legislation and make it likely that we could have a housing authorization on the President's desk before the Fourth of July.

Mr. Chairman and Members, apparently some would continue to stymie this Gonzalez-McKinney compromise that authorizes such sums as will be appropriated, by raising budget concerns. Frankly this is inappropriate and misleading. It is the same technique and debate tactic that has worked with some success to defeat housing measures in the past few years but is not valid in today's debate. The policy decisions inherent in this Gonzalez-McKinney substitute are sound and should not be defeated on a budget basis. This legislation authorizes the basic housing and community development programs for 1986 and 1987. The legislation extends the FHA mortgage insurance authority and provides that such authorization not exceed the budget authority established in the budget resolution. It also authorizes the Farmers Home Administration housing programs and the crime and flood insurance programs. The current FHA mortgage insurance premium is maintained and new user fees on Fannie Mae, Freddie Mac and Ginne Mae products are prohibited.

The Gonzalez-McKinney substitute authorizes the continuation of the Community Development Block Grant Program and the Urban Development Action Grant Program. These important programs are authorized at such levels as may be established in appropriations acts. In addition, the UDAG changes so important to our colleagues from the South and West are also included in this legislation. This change will insure that the highly successful UDAG Program will have greater geographical balance.

The Gonzalez-McKinney substitute also authorize the existing low income and Government assisted housing programs at levels to be established in appropriation acts. Modifications to these programs which have bipartisan support are contained in the substitute. These changes do not increase the costs of these programs but rather increase the efficiency and improve the delivery system of these programs. Essential programs such as public housing, Government assisted housing, section 202 housing for the elderly and handicapped and the congregate services program are authorized at the levels established in appropriations acts.

There are two provisions which I helped write in this substitute which I would like to call to the special attention of Members. Title IV authorizes programs to assist Communities to provide shelter for the homeless. This provision, I am pleased to report, received unanimous bipartisan support of members of the Banking, Finance and Urban Affairs Committee. In fact the Emergency Shelter Program is also contained in the Wylie substitute. It is the culmination of more than 5 years of effort to craft a program to meet the shelter needs of our Nation's most improverished people. It is a refinement of legislation which has passed the House on four separate occasions and it deserves to pass again and be enacted into law.

This program would reauthorize the existing Emergency Food and Shelter Program administered by the Federal Emergency Management Agency. This program has been very successful, particularly in providing food for hungry Americans. However, since the program has allocated 66 percent of its funds for food allocation it has not been able to focus properly on the shelter needs of homeless Americans.

Mr. Chairman, today there are 2,000,000 homeless people in this country. The existing Government and charitable resources cannot hope to shelter this huge number of people. Every night shelters from New York to California turn homeless people away because these shelters are full. As a result, Americans are forced to suffer the indignity and the life threatening dangers of being night after night on the street.

The Emergency Shelter Program contained in this bill will increase the number of people who have a safe place to sleep and could save hundreds if not thousands of lives. It does so in an innovative manner which builds upon the existing effort of local charitable organizations and with a limited amount of Federal involvement.

Funds authorized by this program would be distributed to cities and States based upon the Community Development Block Grant Program formula. These funds could be used by the governmental entity or it could be distributed to nonprofit agencies which have the capacity to assist the homeless.

Funds from this program could only be used for costs associated with the rehabilitation of existing structures into shelters for the homeless. Up to 15 percent of the Federal funds could be used to provide services for homeless but only if the services were not available in the community prior to the establishment of the program.

The Emergency Shelter Program builds upon the tremendous efforts of local churches and charitable organizations by requiring a 1-to-1 match of local effort for every Federal dollar. We provide flexibility to the local community in generating this local match. It may be in the form of cash, donation of a building or materials, the value of time donated by volunteers or the services provided to the homeless. In effect we allow the local community to provide that which is needed most by the homeless in that area. As a result of this type of program structure we establish accountability for Federal investment—we know how each Federal dollar will be used—and flexibility for local communities to meet the unique needs of their community.

The Emergency Shelter Grants Program meets the immediate need of providing shelter to people who will face life threatening situations because of a lack of shelter. But the Gonzalez-McKinney substitute also looks to the future. It authorizes a pilot program which will demonstrate how communities can provide a more comprehensive approach to the problems of a given homeless individual. This program, authorized by my colleague, MARY ROSE OAKAR, would demonstrate how comprehensive services such as health care, substance abuse treatment, mental health services, and job training programs can move the homeless from the streets or emergency shelters into the economic mainstream of our nation. Within the current budget constraints facing Congress we can't expect to provide this level of services for each of the 2,000,000 homeless Americans. But a pilot program which funds a few of these transitional housing projects will provide a model for communities to replicate with their own funds. In the long run, transitional housing is the best hope for assisting the homeless. Today, we must be concerned with meeting the most urgent housing need in our Nation and that is to provide basic and safe shelter for homeless Americans.

I also want to thank my colleagues on the committee for their support for a change in the UDAG Program which will prohibit the use of UDAG funds to pirate jobs from one area to another. As my colleagues know, current law explicitly prohibits pirating job with UDAG funds. However, a situation is my district tragically demonstrates that the administration does not understand the clarity of current law. As a result of the loss of 700 jobs in my district, I proposed an amendment which the committee adopted. That amendment will insure that never again will jobs be stolen from St. Paul or any other city in this nation with UDAG funds. Passage of this provision should send a clear and additional message to this administration that the approval of this Amhoist grant was a clear violation of the meaning of current law and seeks to avoid any such future transgression. It also demonstrates the determination of the committee and indeed this House to achieve the restoration of Federal funds improperly awarded.

Mr. Chairman, I urge my colleague to support this legislation. It is absolutely essential to maintain the job creation nature of the UDAG Program, absolutely essential for millions of Americans who wish to own or rent a home, and absolutely essential to millions of Americans who desperately need a safe place to sleep.

Mr. MANTON. Mr. Chairman, I rise in strong support of the amendment in the nature of a substitute to H.R. 1, the Housing Act of 1985, offered by the distinguished chairman of the Housing and Community Development Subcommittee, the gentleman from Texas [Mr. GONZALEZ], and the ranking minority member of the subcommittee, the gentleman from Connecticut [Mr. MCKINNEY]. I want to commend both gentlemen for their diligent and tireless efforts to bring this important legislation to the floor.

Mr. Chairman, the substitute being offered today is a modest, bipartisan proposal. The amendment reauthorizes existing housing and community development programs through fiscal year 1987 and provides for a number of much needed programmatic changes to make these programs operate more efficiently. In addition, the substitute maintains the viability of Federal mortgage programs which are under attack by the administration, authorizes a new program to provide homeownership opportunities for low- and moderate-income families, and increases Federal assistance for the homeless.

On October 1, 1985, authority for a number of Federal housing and community development programs expired. Congress has been forced to temporarily extend these programs several times pending action on a comprehensive housing reauthorization bill. Unlike the substitute being offered by the Chairman and the gentleman from Connecticut, these simple extenders provided no long-term stability for Federal housing programs and contained none of the much needed programmatic changes included in the substitute.

For example, the substitute would dramatically improve the operation of local public housing programs. The measure provides for a change in the allocation in public housing operating assistance to make certain that public housing authorities [PHA's] receive the funds they need to properly maintain existing units. The bill would require that the performance funding system be updated annually, in consultation with local PHA's. In addition, the measure would also create a new grant program to improve and modernize the physical condition of existing public housing and to upgrade management and operation.

In addition to these much needed public housing changes, the substitute would also improve and extend a number of other important housing and community development programs.

First, the substitute would reauthorize the Federal crime insurance and prohibit any increases in premiums. The Federal Crime Insurance Program is particularly important in the economically distressed areas of New York City, including portions of the Ninth Congressional District, which I represent. The Federal Crime Insurance Program provides insurance against burglary and robbery to homeowners and businesses situated in high crime areas when coverage through the private sector is either unaffordable or unavailable. Federal crime insurance has allowed small businesses to flourish in New York City's most distressed neighborhoods. These small businesses provide much needed jobs and services in the most economically disadvantaged areas of the city and are the seeds of economic growth. Without Federal crime insurance, many of these businesses would be forced to close their doors.

Despite the fact that the cost of the Federal Crime Insurance Program is minimal and has been declining over the past few years, the administration has continued its efforts to kill the program. Last year, the administration took a back-door approach to its attack on crime insurance by proposing to dramatically increase premiums by more than 30 percent. I authored a provision of H.R. 1, which is also part of the substitute, that would limit increases in crime insurance premiums.

Second, the substitute would prohibit the imposition of new user fees on Federal mortgage programs as proposed by the administration. These new "taxes" would have restricted the ability of Federal mortgage agencies to generate new mortgage funds and would have substantially increased the cost of owning a moderately priced home.

Third, the substitute rejects the administration's plan to dramatically restrict eligibility for FHA mortgage insurance. Under the administration's fiscal year 1987 budget proposal, FHA mortgage insurance would have been limited to families with an annual income of $40,000. This income cap alone would have meant that 40 percent fewer families in New York would have qualified for an FHA-insured loan. For those who would have remained eligible for FHA insured mortgages, closing costs would have been more than doubled under the administration's proposal to increase FHA mortgage insurance premiums.

The substitute makes certain that FHA programs continue to serve first time and moderate income home buyers. We must make certain that all Americans are given the opportunity to take advantage of today's favorable mortgage rates.

Fourth, the substitute authorizes a new homeownership program for low- and moderate-income families. The program is based on the highly successful Nehemiah Project in Brooklyn, NY, where more than 2,000 single family homes have been built in a previously desolate area. The Nehemiah plan brought together a group of local parishes and nonprofit groups which raised the initial capital for the construction of the homes. With the help of innovative construction techniques and the assistance and cooperation of State and local officials in the form of tax abatements and mortgage financing, the dream of homeownership has become a reality for hundreds of low- and moderate-income New Yorkers. With limited Federal assistance, we can make certain that this success is duplicated across the country.

At a time when Federal resources are becoming more scarce, it is crucial to establish new housing programs that are effective and cost-efficient. Nehemiah is one of those programs which I strongly support.

Fifth, in response to the growing and tragic plight of the homeless, the measure establishes a National Emergency Food and Shelter Board to oversee and improve existing shelter programs. In addition, the substitute authorizes a new grant program to supplement the efforts of State, local, and charitable organizations that provide shelter to the homeless.

Finally, Mr. Chairman, the substitute makes certain that Federal housing programs will continue to be funded through fiscal year 1987. This is a major victory given the Reagan administration's continuing efforts to terminate all Federal support for assisted housing programs.

Mr. Chairman, since coming to office, President Reagan has slashed federally assisted housing programs by more than 60 percent. The President's fiscal year 1987 budget proposes no new funds for Federal housing programs and would rescind or defer more than half of the funds appropriated by Congress in fiscal year 1986 for assisted housing. Under the President's proposal section 8 rental assistance, housing for the elderly and handicapped would all be terminated. Given the dramatic increase in homelessness across America, and the shrinking supply of safe, decent, affordable housing in this Nation, the President's housing proposals are harsh, cruel and irresponsible. President Reagan has chosen to ignore the historic commitment of the Federal Government to provide all Americans with a safe and decent place to live. The substitute being offered today reaffirms the Government's commitment and duty to provide housing assistance to the poor and elderly.

I urge my colleagues to support this vitally important legislation.

Ms. KAPTUR. Mr. Chairman, I rise today in strong support of H.R. 4746—the Bipatisan Housing Act of 1986. This bipartisan compromise comes as a result of the most extensive set of hearings on housing in 20 years. It also comes after a full year of discussion and com-

promise with our colleagues on the other side of the aisle.

I believe this measure is a carefully balanced and responsible approach to fulfilling the legitimate Federal role of providing housing assistance to low and moderate income families within the context of fiscal restraint. Indeed, the bill before us today is an example of bipartisanship at its very best.

Late last spring, the Banking Committee reported a $16.3 billion housing reauthorization bill, fully a 64 percent cut since 1981. This modest figure was reduced further to $14.3 billion when the House approved inclusion of H.R. 1 in the omnibus budget reconciliation bill of 1985. Both of these proposals were within budget. Granted, our committee ordered its priorities in a very different manner than the administration would have done. However, this critical decisionmaking—changing, cutting, testing and yes, the creation of alternatives—represents the very heart of the authorization process. All too often authorizing legislation is casually dismissed as unnecessary during periods of budgetary restraint. This proposal reaffirms our committee's longstanding commitment to continue at a minimal level the housing programs for low- and moderate-income people—a commitment this administration does not have. It is clear that due to huge program cutbacks in the last 6 years. The housing situation at the local level is becoming severe. In a community like mine in Toledo, OH, the backlog of applicants for decent shelter is close to 10,000.

This legislation is an attempt, however modest, to respond to the housing needs of low-income families and to address some of the criticism leveled at the financing and administration of these programs in the past. Indeed, if some of the proposals which would affect housing that are being discussed in the context of tax reform become law, this minimal level of housing support we reauthorize today will provide the sole Federal activity in the provision of housing for low- and moderate-income families.

Mr. RODINO. Mr. Chairman, I rise in strong support of H.R. 1, the housing authorization bill, and I commend our Committee on Banking, Finance and Urban Affairs for its fine work in bringing to the floor this important and long overdue measure.

This bill generally extends, through fiscal year 1987, most of the housing assistance programs without specific authorization levels, with the actual funding to be set for individual programs through the appropriations process.

For 50 years the Federal Government has been committed to the goal of making homeownership possible for average families and providing decent, low-cost housing for poor Americans. Unfortunately, since the beginning of this administration, President Reagan's budget proposals have been designed to abolish this goal. This year his budget recommendations would deny the opportunity for homeownership to hundreds of thousands of American families and all but eliminate housing assistance for the poor.

Congress has, wisely, provided more funding than the administration requested in each fiscal year. But despite this, it is a shocking fact that HUD housing assistance funds have been reduced by 64 percent since 1981, and housing programs in the Farmers Home Administration have been reduced by 43 percent. Moreover, the administration has succeeded in requiring low-income tenants to pay a larger share of their income to rent, and virtually all new construction and substantial rehabilitation programs by HUD have been eliminated.

Mr. Chairman, H.R. 1 offers us the opportunity to start to turn back the administration's attack on Federal housing assistance and to reaffirm our commitment to providing essential aid for housing needs for all Americans.

The bill before us would extend a number of programs that have provided vital assistance to my district and the State of New Jersey. I am particularly glad to note continued authorization for the Community Development Block Grants and Urban Development Action Grants Programs. New Jersey has consistently competed successfully in the UDAG Program. In fiscal year 1985, my State received $51.73 million in UDAG funds and $110.82 under the CDBG Program.

The rental rehabilitation and rental development [HoDAG] grant programs are reauthorized. Under these programs New Jersey received $5.56 million in rental rehabilitation funds and $4.25 million in HoDAG funds.

It is heartening to note the bill's authorization for a new public housing modernization program. In fiscal year 1985 New Jersey received $4.8 million in contract authority for modernization and $136 million in budget authority.

I am particularly pleased that the committee's bill will reauthorize the section 8 housing assistance program, the public housing operating funds program, the Urban Homesteading Program and the section 202 program for the elderly and handicapped. In my district, too, the reauthorization of the crime insurance program is essential.

The bill deals with the growing problem of shelter for the homeless by establishing a National Emergency Food and Shelter Board in HUD to oversee operations of the existing emergency food distribution and shelter program and to administer two new shelter programs. One would demonstrate the development of support services for the homeless and the other would provide Federal aid to supplement the efforts of State, local, and charitable shelter programs.

Mr. Chairman, this bill addresses our Nation's housing needs wisely and fairly, and I urge its passage.

Mr. DE LUGO. Mr. Chairman, I would like to thank the gentleman from Texas, Mr. GONZALEZ, chairman of the Subcommittee on Housing and Community Development, for his leadership on H.R. 1, and his continuous efforts to assist the American people living in the U.S. territories to obtain decent housing.

We in the Virgin Islands are experiencing a severe housing and mortgage shortage and the only alternative left to many families is the Farmers Home Administration. And even this alternative has been jeopardized by the Administration's recission and subsequent deferral of the funds necessary to keep the program running. I am hopeful that all that will soon be behind us now, and we can get on with the important task of providing decent housing for all Americans.

Again, I would like to thank Mr. GONZALEZ and the members of his committee for their commitment to this ideal and for the support and concern that they have shown for the people living in the U.S. territories.

The CHAIRMAN. All time has expired.

Mr. GONZALEZ. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore [Mr. MCCLOSKEY] having assumed the chair, Mr. AUCOIN, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 1) to amend and extend certain laws relating to housing, and for other purposes, had come to no resolution thereon.

GENERAL LEAVE

Mr. GONZALEZ. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 1 the bill just debated.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

GENERAL LEAVE

Mr. GONZALEZ. Mr. Speaker, I ask unanimous consent that all Members be permitted 5 legislative days in which to extend their remarks and to include therein extraneous material on the bill, H.R. 1349, which passed the House today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

DON'T PLAY WITH MELTDOWN

(Mr. DANNEMEYER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and to include extraneous matter.)

Mr. DANNEMEYER. Mr. Speaker, the ill-fated Soviet nuclear reactor at Chernobyl was operating on the principle of controlled chain-reaction. Not many people realize that the circulation of currency is based on a similar principle. At the core is confidence which, as an astute observer has put it, is nothing but sleeping suspicion. If provoked, a chain reaction of suspicion may trigger a meltdown of the dollar.

Just how precarious is the international position of the dollar is shown by a full-page paid advertisement that has appeared in the International Herald Tribune, the largest American

newspaper in Europe, and also in the leading German daily, the Frankfurter Allgemeine Zeitung, inserted by Johann Philipp von Bethmann, a director of the Bethmann Bank in Frankfurt. It says, among others:

The game is over. The dollar has had it.

Get out of the dollar before it is too late!

The dollar is as rotten as a rotten apple. Drop it!

Sell the bad dollar.

Help make the dollar lighter. You will be helping yourself, your country and your currency. Get out of the dollar! Down with the dollar exchange rate!

The summiteers at Tokyo were playing with meltdown. Confidence is shaken, suspicion is rampant. Jawboning won't stop the chain reaction threatening the dollar, any more than it stopped the nuclear inferno at Chernobyl. The proper way of preventing a meltdown of the dollar is to reinforce confidence by fixing the dollar's gold content.

[Advertisement from the International Herald Tribune]

December 13, 1985.

To: All Dollar Holders around the World.

To: All Central Banks.

LADIES AND GENTLEMEN: The game is over. The dollar has had it. Caution!

Get out of the dollar before it is too late.

Get out of the dollar at least until the dollar is where it belongs: At no more than *DM 1.50 for 1 U.S. dollar.*

The dollar is as rotten as a rotten apple. Drop it! The rotten parts of the dollar are hundreds of billions in lost dollar loans all over the world and in the U.S. itself!

Sell the bad dollar. Help make the dollar higher. That would be prevention of the great big crash at the very last minute.

You "make" exchange rates. You also determine the dollar exchange rate, not the central banks alone. They have all reached the end (of their wits, also). Contribute to the long overdue exchange rate adjustment now.

Get out of the dollar! Down with the dollar exchange rate! You would be helping yourself, your country and your currency. You would be helping the world economy and, above all, the highly indebted nations. And finally you would be helping the U.S.A., its economy and the U.S. dollar itself. With substantial devaluation, there would be a less severe crash, less bankruptcies and, in the end, a once more healthy dollar.

Help make certain that this happens—by getting out of the dollar now!

It would be the last chance for an "emergency landing" of the world economy. This emergency landing is better than crash landing.

Please act now before it is too late.

Sincerely yours,

J.P. VON BETHMANN.

TRADE BILL FOCUSES ON UNFAIR PRACTICES

(Mr. PEASE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEASE. Mr. Speaker, I rise today to discuss the international trade bill which will soon come before the House. In particular, I wish to talk about the heart of the bill—the title reported out of the Committee on Ways and Means.

The trade bill is a huge step in the right direction. Focusing on unfair trading practices, it will back up the rhetoric of "free but fair trade" with action.

The bill is not protectionist. It does not automatically or mechanistically mandate import restrictions like, for example, the textile bill does.

Yes; the bill is trade restrictive; it seeks to restrict unfair trade. Mr. Speaker, if the President wants to tell the American people that restricting unfair trade is bad for the country, let him tell them.

The goal of the administration's trade policy continues to be the defeat of protectionism at home, rather than the elimination of unfair trade abroad.

I believe that if the administration concentrated on doing a thorough job on unfair trade, it would not have to spend as much time worrying about protectionism in Congress.

This trade bill will ensure that the U.S. Government does a thorough job on unfair trade. It would transform the Government into an active advocate of American economic interests, while leaving ultimate Presidential discretion intact.

The bill does not force the President to impose import restrictions. What the bill does is require the President to investigate foreign unfair trade practices and engage the offending party in negotiations to eliminate or offset the practice. The ultimate decision of whether to retaliate or take other action affecting trade flows rests with the administration.

In other words, this bill requires the administration to vigorously press America's case on unfair trade when our workers' and firms' interests are at stake. That is not the same thing as requiring it to cut off imports. That is not protectism; it is activism; it is advocacy.

The bill requires that the trade laws be used and that the Government initiate the use of them when our rights under international law are violated.

True, in certain circumstances, the bill creates a basis for action that would go beyond the GATT. But is addressing practices which are unfair and burdensome tantamount to protectism just because no international consensus yet exists on how they should be treated? Hardly.

Prodding the GATT to extend its discipline to new areas of unfair trade is a delicate task. However, that should not cause us to shy away from it. To the contrary, the United States should and must lead the GATT. If we don't do it, you can be certain no one else will.

Mr. Speaker, without a strong policy statement from Congress, I fear the administration will fail to press America's case decisively in what I regard as a make or break round for the GATT.

We need this bill. I urge my colleagues to give it careful consideration.

"UNEMPLOYMENT" A CONTINUING PROBLEM

(Mr. HAYES asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. HAYES. Mr. Speaker, President Reagan's State of the Union Messages have disguised the impact of the trade deficit and the Federal deficit. His Economic Reports have hidden the true facts on joblessness. They violate the mandate of the Hawkins-Humphrey Act to bring officially measured unemployment down to 4 percent. His latest budget conceals the big welfare given to chosen corporations through tax giveaways. It hides the fact that excessive military contracts are a way of laundering money into the political action committees that support the party of privilege. Unfortunately, the major media have allowed him to get away with it.

We are all fully aware of our Nation's urgent need to adopt measures aimed at reducing the high unemployment and putting the American people back to work.

The national figures on officially measured unemployment for April 1986 show that 7.1 percent of Americans are unemployed which means that 8.3 million Americans are looking for work. Unemployment among minorities and minority youth is proportionately much, much worse. Black unemployment is 14.8 percent and black youth unemployment is a staggering 42.6 percent.

"The Full Employment Action Council, a coalition of religious, labor, civil rights, and youth groups, asserted that after taking account of underemployed workers and those so discouraged that they have dropped out of the labor forces, the real unemployment rate was 13 percent in April." [1]

In 1978, the Hawkins-Humphrey Full Employment and Balanced Growth Act was enacted to deal with our Nation's unemployment. The act calls for the President to work toward full employment, but the Reagan administration has made no effort to carry out the mandates of the law.

On May 6, 1986, the Tokyo Economic Declaration, issued by the leaders of the United States, Japan, West Germany, Britain, France, Italy, and Canada, at the conclusion of their 3-

[1] April Unemployment Was 7%, Labor Dept. Says, by Robert D. Hershey, Jr., The New York Times, 5-3-86, p. 33.

day summit meeting; among other things, stated:

Since our last meeting, we have had some success in the creation of new jobs to meet additions to the labor force, but unemployment remains excessively high in many of our countries. Noninflationary growth remain the biggest single contributor to the limitation and reduction of unemployment, but it needs to be reinforced by policies which encourage job creation, particularly in new and high-technology industries, and in small business.

To address this void, I, along with 10 Members of the House, introduced the Income and Jobs Action Act of 1985, designed to create an environment where true sustainable economic recovery is achieved by establishing a Presidential program designed to reduce high unemployment. Our country's strongest line of defense will not be achieved through record military budgets, but through providing for the economic well-being of every American citizen. The greatest threat to people who are stricken by poverty, homelessness, and hunger does not come from any external source, but from joblessness.

Let me repeat that: The greatest threat to people who are stricken by poverty, homelessness, and hunger does not come from any external source, but from joblessness. Without a decent, income-providing job, it is impossible to plan a decent future, provide for family security, or to participate in the mainstream of our society.

With all the debates on deficit reductions, have we yet done enough to call attention to the decrease that would be achieved by bringing officially measured unemployment rate down by 1 percent?

A recent Congressional Budget Office [CBO] report [February 1986] estimates that every 1 percent reduction in the officially measured unemployment would decrease the federal defict by $44 billion in fiscal year 1987.[2] A 3-percent reduction in the unemployment rate would reduce the Federal deficit by more than $130 billion.

EFFECT ON CBO BASELINE BUDGET PROJECTIONS OF A 1 PERCENTAGE-POINT LOWER UNEMPLOYMENT RATE BEGINNING JANUARY 1986

[By fiscal year; in billions of dollars]

	Fiscal year—		
	1987	1988	1989
Revenues:			
Individual income taxes	8.4	9.1	9.5
Corporate income taxes	19.6	20.1	20.7
Social insurance taxes	8.4	6.4	5.6
Other	0.9	0.6	.9
Total	37.3	36.5	36.8
Outlays:			
Unemployment insurance	−2.1	−2.2	−2.2
Other entitlements	−.8	−1.0	−1.2
Net interest	−4.1	−7.8	−11.5
Total	−7.0	−11.0	−14.9
Deficit	−44.3	−47.5	−51.7

[2] According to the February 1986, Congressional Budget Office report, *The Economic and Budget Outlook: Fiscal Years 1987-1981. A Report to the Senate and House Committees on the Budget—Part I*, Table II-6 at p. 72.

EFFECT ON CBO BASELINE BUDGET PROJECTIONS OF A 1 PERCENTAGE-POINT LOWER UNEMPLOYMENT RATE BEGINNING JANUARY 1986—Continued

[By fiscal year; in billions of dollars]

If more people were familiar with these estimates then perhaps we could also begin to formulate goals for bringing officially measured unemployment down to the Hawkins-Humphrey 4-percent goal over a number of years.

What this country needs today is a civilian equivalent of military spending. That means a total legislative package dealing with shorter work year with no reduction in pay, child care, health, housing, environment, Social Security, public works, progressive taxation, and all the other quality of life actions needed to attain the objectives of the Income and Jobs Action Act, H.R. 1398.

Let us be realistic. We may be able to take some steps in this direction if a better House and a much better Senate are elected this year. We might even be able to force the White House to back down on a few issues and override a Presidential veto on other matters.

But that's hardly enough. The comprehensive approach of the Income and Jobs Action Act requires a White House and a Congress dedicated to the high ideal of expanding genuine freedom for everyone. Indeed, one might say that the Income and Jobs Action Act is a job description for the kind of President that American needs in the White House.

True and meaningful economic recovery must include a substantial reduction in our Nation's unemployment rate because without it, the promise of a full economic recovery remains wholly an illusion.

Mr. Speaker, 55 Members of the House, representing a broad spectrum of our concerned colleagues have cosponsored, H.R. 1398. This bill is a legislative vehicle which when enacted will significantly reduce unemployment in our country, without inflation, and will also significantly reduce the Federal deficit. I again, invite my colleagues from both sides of the isle to join as cosponsor of the Income and Jobs Action Act, H.R. 1398. Let your constituents know that you consider unemployment a top priority. To cosponsor, contact me personally or call me in my office on, 225-4372. A copy of the bill is attached.

H.R. 1398

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Income and Jobs Action Act of 1985".

THE RIGHT TO EARN A LIVING

SEC. 2. (a) Every adult American able and willing to earn a living through paid work has the right to a free choice among opportunities for useful, productive and fulfilling paid employment (part- or full-time) at decent wages or for self-employment.

(b) All Federal departments, agencies, and commissions shall plan and carry out their policies, programs, projects, and budgets in a manner that will contribute to establishing and maintaining conditions under which all adult Americans may freely exercise this right.

(c) Neither the Federal Reserve System nor any Federal department, agency, or commission may directly or indirectly promote recession, stagnation, or involuntary unemployment as a means of reducing wages and salaries or inflation.

THE RIGHT TO AN ADEQUATE STANDARD OF LIVING OF AMERICANS UNABLE TO WORK FOR PAY

SEC. 3. (a) Every adult American unable to work for pay has the right to an adequate standard of living that rises with increases in the wealth and productivity of the society.

(b) No adult American shall be judged unable to work merely because of the unavailability of suitable paid employment opportunities at a given time or place or because of the lack of previous employment.

(c) In the absence of such opportunities and until such opportunities can be provided under section 2, an adult American able and willing to work for pay shall be provided with whatever income is required to maintain a moderate level of living, as defined by the Bureau of Labor Statistics.

CONVERSION TO EXPANDING CIVILIAN SECTORS

SEC. 4. (a) In the first annual message at the beginning of the first session of the Congress after the enactment of this Act, the President shall include specific proposals for a Conversion Planning Fund, to be administered by such agencies as the President shall determine.

(b) The purpose of such Fund shall be to promote short- and long-term plans for coping with declines in civilian or military activities by developing specific policies, programs, and projects (including but not limited to feasibility studies, education, training on the job, and inducements for whatever increased labor mobility may be necessary and desirable) for the expansion of economic activities in sectors where additional or improved goods or services are needed.

(c) In addition to such other funds as may be authorized, such Fund shall include no less than 1 percent of the amount appropriated for military purposes during each subsequent year.

LOCALLY BASED OVER-ALL PLANNING

SEC. 5. (a) Within six months after the date of enactment of this Act and thereafter in each annual economic report and budget message, the President shall transmit to Congress a staged program to create conditions under which the rights set forth in

sections 2 and 3 may be fully and freely enjoyed and to set forth how the Fund created by section 4 may be most productively used.

(b) Such program shall be designed to prevent or counterbalance undue concentration of Federal or corporate power by fostering recovery and full employment planning by—

(1) town, city, county, and State governments and their agencies in urban, suburban, and agricultural areas of the country;

(2) small and large business enterprises; labor organizations and trade unions; the unemployed; nonprofit, voluntary, and cooperative organizations (including neighborhood, tenant and home owners' associations and corporations); women; and racial and ethnic minorities;

(3) broad-based local partnerships in which the groups referred to in paragraphs (1) and (2) cooperate—

(A) to assess unmet needs in their areas, including the need for voluntary leisure as well as for goods, services, adequate income, employment at good wages, and volunteer activities;

(B) to survey the supply of labor resources and of managerial, professional, and technical skills that might be used in meeting such needs;

(C) to analyze the potential for obtaining necessary funds from various combinations of private and public sources without undue reliance on Federal funding;

(D) to develop goals for the future (through the year 2000) of their area; and

(E) in the light of the activities conducted under subparagraphs (A) through (D), to initiate high priority action projects that attain prompt progress toward such goals through both private and public agencies and market and non-market processes.

(c) Such program shall be designed to promote conditions for more self-empowerment by people victimized by discrimination in hiring, training, wages, salaries, fringe benefits, or promotion on the basis of prejudice concerning race, ethnic background, gender, age, religion, station in life, political or sexual orientation, or personal disability.

(d) Such program shall include, but need not be limited to, general and specific policies and projects designed—

(1) to provide quick action through reductions in real and nominal interest rates, voluntary work-sharing arrangements, and a program of private and public works and services to use the abilities of the unemployed and repairing and improving the Nation's infrastructure of private industry, public facilities, human services, and natural resources;

(2) to provide improved Federal incentives for small and large business enterprises; labor organizations and trade unions; the unemployed; and non-profit, voluntary, and cooperative organizations (including neighborhood, tenant, and home owners' associations and corporations), with the receipt of any Federal incentives by larger corporations conditioned on their performance in living up to well-defined standards of corporate responsibility, including the obligation regularly to certify compliance with laws and regulations governing working conditions, labor relations, affirmative action, environmental protection, taxation, election contributions, and bribery at home or abroad;

(3) to provide for Federal grants to promote creative initiatives by local and State governments and their agencies in planning and budgeting for genuine recovery and a full employment society;

(4) to promote staged reductions in paid working time by reducing the average work week in manufacturing to no more than 35 hours without any corresponding loss in weekly wages;

(5) to vastly increase the opportunities for voluntary part-time employment with full fringe benefits;

(6) to take such other steps as may be needed to cope with the threat of increased unemployed caused by the increased use of technology;

(7) to provide for vastly improved education, training, and retraining of managers, technicians, the employed, and the unemployed;

(8) to prevent plant closings through all feasible means (including conversion to other forms of production and ownership) and provide standards (including measures such as appropriate advance notice, termination payments, and extension of health benefits) for any corporation planning to close, substantially reduce, or relocate its operations;

(9) to promote conversion from military to civilian production; and

(10) to control inflation.

IMPLEMENTATION

SEC. 6. (a) As part of the annual program developed by the President under section 5, the President shall transmit in the annual economic report to Congress a short- and long-range schedule for implementing the purposes of this Act.

(b) The implementation schedule shall include, but need not be limited to—

(1) reductions in the military budget;

(2) recommendations for increased revenues through the reduction or elimination of wasteful tax expenditures and other loopholes in the tax laws;

(3) reduction in interest payments on the Federal debt by reductions in both real and nominal interest rates and Federal deficits;

(4) recommendations for the appropriate use and direction of public and private pension funds; and

(5) the creation or promotion of private and public development banks, particularly in neighborhoods and other areas of high unemployment and poverty.

(c) The implementation schedule shall include, but need not be limited to—

(1) the promotion of educational activities within each State on locally-based overall planning, with special attention to educational processes that promote and use the creative abilities of small, medium, and large business, of labor organizations and the unemployed, and of nonprofit voluntary and cooperative organizations; and

(2) timetables for developing the conditions for progress in attaining the policy goals of this Act.

(d) Any outlays proposed by agencies involved in the implementation of this Act shall be presented in terms not only of gross outlays but also of net outlays, computed with a full estimation of any immediate impact additional employment may have in—

(1) reducing outlays by reducing the number of people receiving unemployment compensation, public assistance, and other transfer payments (without necessarily including reduced outlays resulting from improvements in public health and safety); and

(2) increasing tax receipts as a result of more individuals earning income subject to social security and income taxes and more business enterprises, particularly small business, earning the larger, more stable, and less subsidized total profits possible under conditions of full employment.

FEMA WANTS OUT OF DISASTER RECOVERY BUSINESS

(Mr. RIDGE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RIDGE. Mr. Speaker, regulations issued by the Federal Emergency Management Agency [FEMA] published in the April 18 Federal Register I think will be of interest to many of my colleagues.

In those regulations, FEMA proposes drastic reductions in the amount of Federal support that would be provided to State and local governments in the event of natural disasters.

FEMA's disaster recovery programs are separated into two categories, public and individual assistance. Individual assistance consists of individual and family grants, temporary housing, crisis counseling, and disaster unemployment assistance. The Disaster Relief Act allows the Federal Government to pay for 100 percent of certain costs associated with Presidentially declared disasters. While the Federal Government currently finances many of those individual assistance programs at 100 percent, the new cost-sharing regulations propose reducing some programs to a 75-percent Federal share, with State and/or local governments picking up the remaining 25 percent. Public assistance programs are debris removal and the repair or replacement of uninsured damage to public property, such as roads and public buildings. While this Federal Government share of these programs has been established at 75 percent, FEMA proposes unbelievably strict, new eligibility requirements for the programs. And, if State and local governments substantiate damage of incredible proportions sufficient to qualify for the public assistance programs under the proposed regulations, FEMA then proposes to reduce the Federal/State and local match to approximately 50-50, according to a sliding scale.

To give an example, Pennsylvania had three major disasters in 1985—tornadoes in northwestern Pennsylvania, Hurricane Gloria, and flooding of the Monongahela Valley, which also caused extensive damage in West Virginia and Virginia. Even with three major disasters in 1985, with hundreds of millions of dollars of damage, under FEMA's new eligibility and cost-sharing proposals, Pennsylvania would not have been eligible for public assistance programs. Had FEMA made no contributions to debris removal and to the repair of public property in my State in 1985, the Pennsylvania State government would have been required to spend an additional $11 million that year. Wisconsin officials report that their State would have to sustain a bare minimum of $4.4 million in unin-

sured damage to public facilities to even be considered for Federal participation, and that two of the last three disasters in that State would have been ineligible under the new rules. Kentucky calculations show that, despite frequent and severe flooding problems, no disaster since the enactment of the Disaster Relief Act would have been eligible for public assistance. In FEMA region V, Illinois, Indiana, Ohio, Michigan, and Wisconsin, the new formula would have reduced public assistance disaster declarations by 73 percent.

Mr. Speaker, these regulations have been promulgated, obviously, with no consideration of the massive and unexpected burden they would place on State treasuries. State and local governments already provide between 75 and 85 percent of the costs of emergency management programs. And I can tell my colleagues from personal experience that following a natural disaster is the very worst time to place such major burdens on local governments, which will surely be financially strapped.

Under the new cost-sharing regulations, 61 of the Nation's last 111 disasters would have been ineligible for public assistance programs.

Clearly, FEMA officials want out of the disaster recovery business, despite the congressional mandate contained in the Disaster Relief Act. These actions go far beyond any mandate contained in the Gramm-Rudman legislation. They cannot be justified or legitimized with deficit reduction explanations. I ask for the support of my colleagues in stopping these proposed regulations which begin what I believe is a process to eliminate Federal involvement in disaster recovery.

SANDINISTAS SHOWING THEIR TRUE COLORS

(Mr. SWINDALL asked and was given permission to address the House for 1 minute, to revise and extend his remarks and to include extraneous material.)

Mr. SWINDALL. Mr. Speaker, I would like to commend this afternoon to my colleagues an editorial appearing in this morning's Atlanta Constitution, entitled "Sandinistas Showing True Colors."

The significance of this editorial is that it appears in a paper that has consistently criticized the President's attempt to aid the Contras in Central America.

The other significance of this editorial is that apparently the editors of the Atlanta Constitution now understand the duplicity of the arguments being made by the Sandinista Communists. Specifically, they criticize the Sandinistas for stating the fact that they want to engage in the Contadora process, but now that a Contadora treaty date has been set for signing June 6, once again they have backed off.

It is evident now to all of us that the Sandinistas are not in fact interested in peace in that region. They are simply stalling for time in order to continue their military buildup.

This editorial summarizes it very adequately in the last sentence where it states: "In continuing to flout Contadora, the Sandinistas prove that peace is not a goal of their revolution."

Mr. Speaker, I include the article from the Atlanta Constitution, as follows:

[From the Atlanta Constitution, May 13, 1986]

SANDINISTAS SHOWING TRUE COLORS

The Sandinistas of Nicaragua are waving the flag of their true colors. By stubbornly refusing to get on board with Contradora, the Sandinistas have hoisted—if not the bloody red of communism—the tiresome camouflage and fatigue-green hues that show off leftists' fondness for the gun.

The Sandinistas' recalcitrance spoiled an April attempt to rekindle the Contradora pact, and since then its sponsoring nations have labored valiantly to revive it. They have managed to set a June 6 signing date that every Central American country but Nicaragua has at least tentatively accepted. Among other provisions, the draft version of the agreement could limit the size of both armies and arsenals in those countries.

The Sandinistas' main gripe seems to lie in that key provision—Contadora's call for arms limits. And, in general objections to the treaty, President Daniel Ortega dredges up his well-worn contention that the pact could pave the way for a U.S.-backed ouster of the Sandinista government.
